QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the fourth calendar quarter of 1988 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings. This page (Page 1) is designed to supply identifying data, and Page 2 deals with financial data.)

PLEASE RETURN 1 ORIGINAL TO: THE CLERK OF THE HOUSE OF REPRESENTATIVES, OFFICE OF RECORDS AND REGISTRATION, 1036 LONGWORTH HOUSE OFFICE BUILDING, WASHINGTON, D.C. 20515

PLEASE RETURN 1 ORIGINAL TO: THE SECRETARY OF THE SENATE, OFFICE OF PUBLIC RECORDS, 232 HART SENATE OFFICE BUILDING, WASHINGTON, D.C. 20510

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19 . . . . .

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

IDENTIFICATION NUMBER

Is this an Amendment? ☐ YES ☐ NO

NOTE on ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) *"Employee".*—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) *"Employer".*—To file as an "employer", write "None" in answer to Item "B".

(*b*) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

☐ CHECK IF ADDRESS IS DIFFERENT THAN PREVIOUSLY REPORTED

NOTE on ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER—State name, address, and nature of business. If there is no employer, write "None."

NOTE on ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have ☐ terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) description, (*b*) quantity distributed, (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and, if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly Report."

STATEMENT OF VERIFICATION

[Omitted in printing]

NOTE on ITEM "D."—*(a)* IN GENERAL. The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—§ 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In general.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in connection with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multi-purpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In general.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received—"The term 'contribution' includes a . . . *loan* . . ."—§ 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $....."Expense Money" and Reimbursements received this Quarter.

Contributors of $500 or More (from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last day of this Quarter, total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE on ITEM "E".—*(a)* IN GENERAL. "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—§ 302 (b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) IN CONNECTION WITH LEGISLATIVE INTERESTS:

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than Item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from Jan. 1 through this Quarter (Add "9" and "10")

Loans Made to Others—"The term 'expenditure' includes a . . . *loan* . . ."—§ 302 (b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayments received during this Quarter

15. *Recipients of Expenditures of $10 or More*_____

If there were no single expenditures of $10 or more, please so indicate by using the word "NONE".

In the case of expenditures made during this Quarter by, or on behalf of, the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

SENATE—*Thursday, May 18, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 1:30 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

The law of the Lord is perfect, converting the soul: the testimony of the Lord is sure, making wise the simple. The statutes of the Lord are right, rejoicing the heart: the commandment of the Lord is pure, enlightening the eyes.—Psalm 19:7-8.

Almighty God, all wise, all powerful, infinite and eternal, perfect in truth and justice, we thank Thee for this profound provision for our total well-being which the psalmist declares. We thank Thee for Thy truth which restores the soul, makes wise the simple, rejoices the heart, and enlightens the eyes.

As biblical truth was pervasive in colonial days and the foundation for the ideas which gave birth to a political system unknown and unprecedented and a nation unique in its commitment to people freedom and sovereignty; renew in us interest in the Bible and sensitize us to the peril of its neglect.

For Thy glory and the health of our Republic. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, following the time for the two leaders there will be a period for morning business not to extend beyond 2:30 p.m. with Senators permitted to speak therein for up to 5 minutes each.

Under the consent agreement the Senate will then proceed to the consideration of the conference report on the budget resolution, House Concurrent Resolution 106. That is at 2:30 p.m. A 30-minute vote on the conference report will occur at or about 3:45 p.m.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time and I reserve the leader time for the distinguished Republican leader as well.

The PRESIDENT pro tempore. Without objection, the time of both leaders will be reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. Is there morning business?

The Senator from Vermont is recognized for not to exceed 5 minutes.

Mr. JEFFORDS. I thank the Chair.

(The remarks of Mr. JEFFORDS pertaining to the introduction of S. 1035 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. JEFFORDS. All right. I yield my remaining time to the senior Senator from Vermont.

The PRESIDENT pro tempore. The senior Senator from Vermont [Mr. LEAHY] is recognized for not to exceed 6 minutes.

Mr. LEAHY. I thank the Chair.

(The remarks of Mr. LEAHY pertaining to the introduction of S. 1035 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

(The remarks of Mr. LEAHY, Mr. HEFLIN, Mr. MCCONNELL, and Mr. CONRAD pertaining to the introduction of S. 1036 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDENT pro tempore. The Senator from North Dakota is recognized.

Mr. CONRAD. I thank the Chair.

(The remarks of Mr. CONRAD pertaining to the introduction of S. 1041 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDENT pro tempore. The senior Senator from Nevada [Mr. REID] is recognized for not to exceed 5 minutes.

WETLANDS

Mr. REID. Mr. President, recently I joined the distinguished majority leader in introducing legislation to preserve our continent's wetlands.

The North American Wetlands conservation Act is a sign that the tide has turned. The tide of water supplying our Nation's wetlands is receding. The water that does make it to the wetlands is often contaminated.

At issue is not merely a series of marshes and random watering holes. The wetlands represent an ecosystem that is essential for preservation of wildlife species and natural habitats.

As a member of the Environment and Public Works Committee, and as an individual greatly concerned with the dwindling natural resources in our country, I plan to do what I can to push for passage of the proposed legislation.

The bill embodies President Bush's commitment to his proclaimed "no net loss" policy for our Nation's wetlands.

The legislation will ensure preservation of our wetlands, and will provide the means to build up those wetlands which have drastically deteriorated in both size and water quality.

The wetlands have terrific significance. They provide nutrition for migratory birds. Scores of plant and animal species are sustained by the diversity of natural riches in the wetlands.

The wetlands provide essential food for today's wildlife population, and they prepare the way for future generations by providing spawning grounds for all kinds of fish and wildlife.

The wetlands are places where life is created and then sustained. But things have changed. The wetlands are now more and more likely to be places of death rather than life.

People are warned from eating fish or ducks from the wetlands, and water pollutants have killed hundreds of thousands of birds and fish.

In the wetlands of Nevada's Stillwater Wildlife Management Area, ducks were found to contain mercury levels as high as 55 times above U.S. Food and Drug Administration legal action guidelines.

Much of what little water the Stillwater wetlands now get comes from poisonous irrigation drainoff. Wetlands water sources have been diverted to support agriculture. By the time this water reaches the wetlands, its essential nutrients have been soaked up through the irrigation process. Much of this water is polluted. As the size of the wetlands diminishes, the pollutants in the water are forced into higher concentrations.

These areas are at a crossroads. Either we help preserve and restore

the wetlands, or we turn our backs, and they will simply dry up.

The demise of the wetlands is tragic. Just recently, a bald eagle was found dead by one of Nevada's wetland waterbeds.

The eagle—a symbol of our country's greatness—was struck down by polluted waters of the wetlands. This is not something that our country can be proud of. It is not something we can ignore, either.

The proposed North American Wetlands Conservation Act calls for cooperative relationships with our neighbors, Canada and Mexico, to restore our wetlands habitat.

The bill includes provisions for public-private partnerships that will enlist the support and involvement of nongovernment organizations in our efforts to preserve the precious wetlands. This is not a legislative initiative to be put on the back burner and shuffled from one session to the next. Because time is running out.

It is estimated that 215 million acres of wetlands existed in the United States. Only 99 million acres of wetlands remain—less than half of what originally graced our country.

And who knows how much longer we will have that 99 million acres. Each year, we will lose a projected 300,000 to 450,000 acres of wetlands.

A few months ago, a Reno, NV, newspaper contained an account of endangered species, including the bald eagles of Stillwater—the eagles that are threatened by the wetlands' loss and contamination. The article quoted conservationist John Muir, who said, "When one tugs at a single thing in nature, he finds it attached to the world."

And so, as I said earlier, Mr. President, wetlands are not mere watering holes or random waterfowl resting places. They are a source of life and a critical part of our environment. Once gone, they cannot be replaced.

But they are not gone yet, and we now have a chance to restore them.

I encourage my colleagues to join with me and others who support the Wetlands Conservation Act. The well-being of the wetlands cannot be divorced from the well-being of our environment and our Nation.

The ACTING PRESIDENT pro tempore. The Senator from Delaware is recognized.

Mr. ROTH. I thank the Chair.

(The remarks of Mr. ROTH pertaining to the introduction of S. 1038 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. WILSON addressed the Chair.

The PRESIDENT pro tempore. The junior Senator from California [Mr. WILSON] is recognized for not to exceed 5 minutes.

(The remarks of Mr. WILSON pertaining to the introduction of S. 1040 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. SYMMS addressed the Chair.

The PRESIDENT pro tempore. The junior Senator from Idaho [Mr. SYMMS] is recognized for not to exceed 5 minutes.

(The remarks of Mr. SYMMS pertaining to the introduction of S. 1045 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDENT pro tempore. The senior Senator from Arizona [Mr. DECONCINI] is recognized for not to exceed 5 minutes.

Mr. DECONCINI. I thank the Chair.

(The remarks of Mr. DECONCINI pertaining to the introduction of S. 1039 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE REPUBLICAN LEADER

The PRESIDENT pro tempore. The Republican leader is recognized.

Mr. DOLE. Mr. President, is my leader time reserved from this morning?

The PRESIDENT pro tempore. The leader is correct.

Mr. DOLE. I thank the Chair.

(The remarks of Mr. DOLE and Mrs. KASSEBAUM pertaining to the introduction of S. 1044 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

THE SENIOR COMPANION PROGRAM CELEBRATES ITS 15TH ANNIVERSARY

Mr. DOLE. Mr. President, 15 years ago, Congress authorized the Senior Companion Program as one of the title II older American volunteer programs under the Domestic Volunteer Service Act of 1973. The Senior Companion Program is one of six volunteer programs administered by ACTION, an independent agency which coordinates and encourages volunteerism in the United States.

ACTION was established in 1971 to administer a number of existing volunteer programs. In 1973, the President asked Congress to expand the role of low-income older volunteers in providing supportive services to vulnerable, frail elderly individuals. Congress responded with the Domestic Volunteer Service Act of 1973. This act gave statutory authority to action and authorized several new volunteer programs. One of these new programs was the Senior Companion Program.

The Senior Companion Program assists low-income individuals over the age of 60 by giving them opportunities to serve their communities in exchange for a stipend. A law passed during the 99th Congress made it possible for non-low-income senior citizens to participate in the Senior Companion Program as well. These volunteers offer their services without receiving a stipend in exchange. Senior companions offer invaluable person-to-person services to adults with exceptional needs and developmental disabilities. Also, as their name implies, senior companions provide valuable companionship to homebound elderly individuals who may otherwise have few opportunities for socialization.

By August 1, 1974, 18 senior companion projects were funded. Senior volunteers were assigned to rural, urban and suburban communities across the country. By February 1975, there were over 1,000 senior companion volunteers serving in programs which ranged in size from 40 to 120 volunteers. Over 60 percent of these senior companions were assigned to private homes. In 1988, the Senior Companion Program consisted of 7,442 elderly volunteers in 144 individual programs.

On July 20, the Senior Companion Program at Fort Hays State University in Hays, KS, will celebrate its 15th anniversary as one of the original programs of its kind. The Fort Hays Senior Companion Program is unique in that it is the only one to be sponsored by an institution of higher education. I commend the senior companion programs of Fort Hays and across the Nation for their outstanding efforts to provide much-needed assistance to homebound, chronically disabled and institutionalized senior citizens.

The Senior Companion Program at Fort Hays State University provides services to more than 400 elderly residents of Ellis, Rook, Rush, Trego, and Russell Counties. The Fort Hays program is staffed by over 100 low-income volunteers, all of whom work hard to ensure the continued success of the program. On July 20, these 100-plus volunteers will be honored at a recognition banquet. Bessie Nestler, a special honoree from my hometown of Russell, will be recognized for her dedicated service to the Senior Companion Program since its beginning in 1974. Senior companions at Fort Hays and throughout the Nation deserve to be honored for their extraordinary commitment to helping meet the needs of older Americans.

CHARLES S. SCOTT, SR.: A CHAMPION OF CIVIL RIGHTS

Mr. DOLE. Mr. President, a man who made significant contributions in the area of civil rights, Charles S. Scott, Sr., died at the age of 67 on March 3 in his hometown of Topeka, KS. Charles Scott was indeed a champion of civil rights. His name will perhaps be most widely recognized in connection with the landmark case of Brown versus Topeka Board of Education, in which the Supreme Court ruled in 1954 that racial segregation in public schools is unconstitutional. Charles Scott and his late brother, John J. Scott, both argued this lawsuit in Federal District Court in Topeka. Charles Scott spoke before the Supreme Court during its deliberations on the case.

Charles and John Scott were members of a family widely known and honored for its outstanding achievements in battling discrimination. Legal action which led to the desegregation of South Park High School in Merriam, KS was initiated by Charles and his father, Elisha Scott, Sr. The law firm of Charles Scott, his father and his two brothers represented the Congress of Racial Equality during the civil rights movement of the 1960's. Charles Scott and his brother helped open the doors of theaters, restaurants, and swimming pools to black residents of Kansas by representing public interests in the prosecution of several lawsuits.

Charles Scott once again displayed his passion for securing justice when he represented civil rights workers in Mississippi. Back home in Topeka, he founded the Coordinating Committee of the Black Community. His inspiration for this particular initiative came in 1968 after the assassination of the Reverend Martin Luther King, Jr. Under the leadership of Charles Scott, the Coordinating Committee of the Black Community successfully fought the discrimination that had blocked minorities from obtaining jobs in Topeka.

In his capacity as a lifelong member of the National Association for the Advancement of Colored People, Charles Scott served for a number of years as the legal redress committee chairman of its Topeka branch. Yet another beneficiary of Charles Scott's dedicated work in the name of civil rights was the Kansas Commission on Civil Rights, on which Scott served as general counsel for 3 years in the 1970's.

Charles Scott's notable accomplishments were not limited to his lifelong fight to protect the civil rights of his fellow Americans. During World War II, he provided his loyalty to his country by serving in the military. The war interrupted his years as a college student from 1940 to 1946. These 6 years found Charles Scott in Fort Scott, TX, Sicily, and southern France. A Victory Ribbon, a Good Conduct Medal, a Fame Theater Ribbon and two Bronze Service Stars are all evidence of his admirable sense of duty. After the war, Charles Scott returned to Topeka to earn both his undergraduate degree and his law degree from Washington University.

His dedication to the community in which he was born, raised and educated led Charles Scott to become actively involved in civic activities throughout Topeka. As well as being a member of the Asbury Mount Olive United Methodist Church, he was Sunday school superintendent and a Sunday school teacher. Charles Scott was not one to take his membership in an organization lightly. When he believed in a cause, he put his all into it. He could not accept a position in life as an observer. Rather, Charles Scott felt the need to become actively involved in his world in order to improve it for posterity.

Charles Scott's full, productive life was marked by humanitarianism and a sense of goodwill. He was indeed a wide man who was able to see not only the inequities that existed in his community, but also the most effective method of working to correct these inequities. Charles Scott's honorable career and dedicated service as a defender of civil rights are an inspiration to the men and women who every day strive to follow in his footsteps. Charles Scott will be missed by the thousands of people whose lives he touched, either directly or indirectly.

EXECUTIVE SUMMARY OF THE FINAL REPORT OF THE SECRETARY'S COMMISSION ON NURSING

Mr. HATCH. Mr. President, I am pleased to receive and to place into the CONGRESSIONAL RECORD the executive summary of the December 1988 Final Report of the Secretary's Commission on Nursing [SCN]. The SCN was an advisory panel established by former Secretary of Health and Human Services, Otis R. Bowen, M.D., to examine reports of a widespread shortage of registered nurses. The Commission's report, a summary of which appears below, is the result of a year-long examination of the nature and scope of the current shortage. Its findings and conclusions are based on a thorough review of the most recent data on nursing and testimony provided by 135 witnesses, who testified before the Commission at hearings held in three regions of the country. The SCN's report presents an analysis of the root causes of the nurse shortage and outlines a series of recommendations and strategies for implementation by organizations in both the public and private sectors.

In developing its report the SCN has endeavored to provide guidance for the directions the Nation must take to alleviate the nurse shortage. I believe that the Commission's work warrants serious consideration by Members of the Congress and by all who have a stake in our health care system. For this reason I commend the executive summary for your review.

I ask unanimous consent that the executive summary be printed in full in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

EXECUTIVE SUMMARY

In late December 1987, in response to reports of widespread difficulties recruiting and retaining registered nurses (RNs), Health and Human Services' Secretary Otis R. Bowen, M.D. established the Secretary's Commission on Nursing. The charge given to this 25-member, public advisory panel was to: 1) advise the Secretary on problems related to the recruitment and retention of RNs; and 2) develop recommendations on how the public and private sectors can work together to address these problems and implement immediate and long-range solutions for enhancing the adequacy of the supply of RNs. The Commission was given to the calendar year 1988 to accomplish these tasks.

The first five months of the Commission's tenure were devoted to an assessment of the magnitude, causes, consequences, and future implications of the nurse shortage. The results of this assessment were presented in the Commission's Interim Report, presented to the Secretary in July 1988. Based on this assessment, the Commission concluded:

The reported shortage of RNs is real, widespread, and of significant magnitude. There is evidence to support the conclusion that the current shortage cuts across all health care delivery settings and all nursing practice areas. The shortage is most acute in urban hospitals, critical care and medical/surgical units, and nursing homes.

The current shortage of RNs is primarily the result of an increase in demand as opposed to a contraction of supply. Although RN supply continues to grow, the number of new RN graduates has declined, and there are strong indications that RN supply has not kept pace with increased demand.

The shortage of RNs is contributing to the deterioration of RNs' work environment and may also be having a negative impact on quality of patient care and access to health services.

Projections for the future are not encouraging. In the short term, the quantity of care provided by the existing pool of RN's will be difficult to increase without significant intervention. In the long term, there is considerable evidence to suggest that the demand for RNs will continue to increase, and a continued imbalance with supply is anticipated.

Working from this assessment, the Commission then turned its attention to the task of developing action-oriented recommendations designed to alleviate the current shortage and assure a healthy nurse labor market in the future. Recommendations development was an iterative process that spanned five public meetings of the Commission and that led not only to the drafting of recommendations but also to the construction of a series of companion strategies designed to secure the successful implementation of each recommendation. The results of these

long and thoughtful deliberations form the heart of this Final Report.

The Commission advances 16 specific recommendations and 81 directed strategies to achieve them. These are presented in groups, as they address the following issues: Utilization of nursing resources; nurse compensation; health care financing; nurse decision making; development of nursing resources; and maintenance of nursing resources.

The specific recommendations are listed below, along with a brief statement explaining the rational which supports each set of recommendations. Section 3 of this report contains all of the recommendations, more detailed rationales, and specific implementation strategies. These strategies provide guidance regarding the Commission's assessment of viable actions that can be undertaken to realize the objectives stated in the recommendations. Although not listed here in the Executive Summary, these implementation strategies are an integral component of the recommendation package and should be given careful consideration by all readers interested in the Commision's work.

UTILIZATION OF NURSING RESOURCES

As stated earlier, the Commission has concluded that the current nurse shortage is primarily the result of a rapidly-increasing demand for RN's. Some of this increased demand for RNs is arising because health care delivery organizations are compensating for reductions in non-nursing staff—both clinical and non-clinical—as well as in other categories of nursing personnel. The four recommendations advanced in this area are intended to encourage nurse employers to use scarce RN resources in an efficient and effective manner, thereby enhancing the adequacy of the existing RN supply. These recommendations call for the provision of adequate support services for nurses, utilization of the most appropriate mix of nursing personnel, adoption of automated information and other labor-saving technologies in order to increase RN's productivity, and improvement in the internal management of nurse resources within health care delivery organizations. The specific recommendations are as follows:

1. Health care delivery organizations should preserve the time of the nurse for the direct care of patients and families by providing adequate staffing levels for clinical and non-clinical support services.

2. Health care delivery organizations should adopt innovative nurse staffing patterns that recognize and appropriately utilize the different levels of education, competence and experience among registered nurses, as well as between registered nurses and ancillary nursing personnel.

3. The federal government should sponsor further research and encourage health care delivery organizations to develop and use automated information systems and other new labor-saving technologies as a means of better supporting nurses and other health professionals. Health care delivery organizations should work with researchers and manufacturers to ensure the applicability and cost-effectiveness of such information systems and technologies across all practice settings.

4. Health care delivery organizations, nursing associations, and government and private health insurers should collaborate to develop and implement methods for costing, budgeting, reporting and tracking nursing resource utilization, both to enhance the management of nursing services and to assess their economic contribution to their employing organization.

NURSE COMPENSATION

Evidence analyzed by the Commission indicates that nurse compensation is inadequate and that the severe wage compression over the span of a nurse's career is of particular concern. The Commission believes that inadequate compensation is one of the roots of the current nurse shortage. On the demand side, low RN compensation levels relative to those of other personnel for which RNs can substitute encourage employers' inappropriate utilization of RNs in carrying out non-RN functions. On the supply side, compensation levels lower than those of other professions requiring comparable educational preparation may encourage existing nurses to leave the profession, thus exacerbating the current shortage. In the longer-run, inadequate compensation is also likely to discourage potential nurses from entering the profession, contributing to a continuation of the shortage. The following compensation recommendation is advanced to address these concerns.

5. Health care delivery organizations should increase RN compensation and improve RN long-term career orientation by providing a one-time adjustment to increase RN relative wages targeted to geographic, institutional and career differences. Additionally, they should pursue the development and implementation of innovative compensation options for nurses and expand pay ranges based on experience, performance, education and demonstrated leadership.

HEALTH CARE FINANCING

The Commission recognizes that many employers of nurses, especially those in the nursing home and home health sectors, may not have sufficient financial resources to support the compensation enhancement advocated in the preceding recommendation. Thus, the health care financing recommendation listed below and its accompanying implementation strategies given in Section 3 are put forth in the hopes of ensuring that the reimbursement levels and procedures do not constrain the efforts of efficiently-organized health care delivery organizations to offer competitive compensation packages.

6. Government should reimburse at levels that are sufficient to allow efficiently-organized health care delivery organizations to recruit and retain the number and mix of nurses necessary to provide adequate patient care.

NURSE DECISION MAKING

The Commission believes that failure on the part of health care delivery organizations, physicians, and health policy making bodies to fully recognize the decision making abilities of RNs has contributed to problems in recruiting and retaining nurses, hindered the development of a career orientation in professional nursing, and limited the efficiency and effectiveness of patient care delivery. With improved representation on policy-making, regulatory, and accreditation bodies, nurses can make unique, critical, and effective contributions to the health care delivery system. Furthermore, the technological, ethical, and managerial challenges facing health care delivery organizations dictate more collaboration among members of the health care team. The recommendations below address the active involvement of nurses in decision making at all levels.

7. Policy-making, regulatory, and accreditation bodies that have an impact on health care at the national, state, and local levels should foster greater representation and active participation of the nursing profession in their decision-making activities.

8. Employers of nurses should ensure active nurse participation in the governance, administration, and management of their organizations.

9. Employers of nurses, as well as the medical profession, should recognize the appropriate clinical decision making authority of nurses in relationship to other health care professionals, foster communication and collaboration among the health care team, and ensure that the appropriate provider delivers the necessary care. Close cooperation and mutual respect between nursing and medicine is essential.

DEVELOPMENT OF NURSING RESOURCES

While nearly all evidence indicates that the current nurse shortage is demand-driven, the recent downturn in nursing school enrollments is cause for serious concern that the shortage will grow worse in the future. Additionally, the distribution of RNs across specialties and employment settings is currently problematic, and there is evidence that the formal education received by many new nurses leaves them inadequately prepared for the rigors of clinical practice in today's complex health care environment. Finally, the Commission believes that increased public awareness regarding the image of nursing can contribute to a reversal of recent enrollment trends. The recommendations contained within the development of nursing resources category are aimed at facilitating the education of nurses, and thereby increasing the supply of qualified RNs, through increased targeted financial support and improved program accessibility, updating the relevancy of nursing curricula, and promoting nursing as a career.

10. Financial assistance to undergraduate and graduate nursing students must be increased. The burden of providing this assistance should be equitably shared among the federal and state governments, employers of nurses, philanthropic and voluntary organizations. The preferred method of providing this support is the use of service-payback loans as well as scholarship funding for those in financial need.

11. State governments, nursing organizations, schools of nursing and employers of nurses should work together to minimize non-financial barriers to nursing education for individudals desiring to enter the profession as well as for nurses wishing to upgrade their education.

12. Schools of nursing, state boards of nursing, and employers of nurses should work together to ensure that the curricula are relevant to contemporary and future nursing practice, prepare nurses for employment in a variety of practice settings, and provide the foundation for continued professional development.

13. The nursing profession should take primary responsibility for providing immediate and sustained attention to the promotion of positive and accurate images of the profession and the work of nurses.

MAINTENANCE OF NURSING RESOURCES

Although certain in their assessment of the current status of the nurse labor market, and confident that the recommendations put forth in this report embody the best approaches to resolving the current nurse shortage, the Commission believes that the federal government should spearhead a sustained effort devoted to: monitor-

ing the nurse labor market; collecting improved data and conducting further research on the demand for nurses, as well as the supply and nursing practice; and following through on the implementation of the recommendations and strategies outlined in this report. The recommendations that follow are designed to accomplish these goals.

14. The Department of Health and Human Services should create a commission having a duration of at least five years that will monitor the implementation of the recommendations in this report as well as the development and maintenance of nursing resources. This Commission should be constituted as an advisory body reporting directly to the Secretary.

15. The Department of Health and Human Services, private foundations, and employers of nurses should support and carry out research and demonstrations on the effects of nurse compensation staffing patterns, decision-making authority, and career development on nurse supply and demand as well as health care cost and quality. Research should be sponsored on the relationship of health care financing and nursing practice.

16. The federal government should develop data sources needed to assess nursing resources as they relate to health planning and manpower.

The Commission does not view the development of these recommendations as the final step in addresisng the nurse shortage. Rather, the more important and challenging task still lies ahead. The Commission strongly encourages the organizations addressed in this report to examine carefully the Commission's diagnosis of the problem, to assess honestly and carefully the relevance of each issue to their own particular organization, and to implement without hesitation the appropriate recommendations. The Commission recognizes that some of the identified problems transcend the interests of one particular organization and expects that, in these cases, the relevant institutions, organizations, associations, and individuals make a good faith effort to collaborate in the implementation of the recommended solutions to the problem. It is the sincere belief of the Commission that the health of this nation will be at risk if the changes suggested in these recommendations do not occur.

THE NEED FOR A SENSIBLE MINIMUM WAGE INCREASE

Mr. COATS. Mr. President, I support a sensible, compassionate increase in the minimum wage. To me, that means raising the minimum wage to a level consistent with helping those working Americans and their families whose sole source of income is the minimum wage, while at the same time providing a meaningful boost for those unskilled, youthful, minority, and entry-level workers in the form of a training wage to offset any negative economic impact of a minimum wage increase.

For some time I have believed that an increase in the minimum wage is justified to help the working poor and their families who are dependent on entry-level jobs. The minimum wage was last increased in January 1981 and since then has lost about 20 percent of its value due to inflation. Today a person who works full time at the minimum wage of $3.35 earns roughly $7,000 a year, hardly enough to keep a family of three above the poverty line in Indiana. So for those 3.9 million Americans out of the work force of 116 million who earn the minimum wage, especially those estimated 326,000 households earning the minimum wage and living in poverty, an increase will come as welcome news.

It is true that most people who are employed at the minimum wage level are not poor, but are second income workers or young people who prefer part-time employment. Moreover, the number of minimum wage earners has declined by 2.6 million or 40 percent since 1982 due largely to the robust economy of the Reagan years which has enabled them to move into higher paying jobs. In fact, during 1988 alone the number of minimum wage earners declined by 770,000. According to the Labor Department, 72 percent of minimum wage earners are single, and 59 percent of them have never been married. The truth is that 67 percent of those paid the minimum wage work only part-time. Of all minimum wage workers 58 percent are under 25 years of age, and 36 percent are teenagers, and 61 percent of those young people are full-time students who need part-time work to help pay for their school expenses and other extras.

Nevertheless, there is a significant number of working heads of households with children who are dependent on the minimum wage. It is these 3.9 million Americans who earn no more than $3.35 an hour—out of a workforce of 116 million—and the 336,000 minimum wage earners, 8.6 percent, who are both heads of households and below the poverty level to whom we show our concern.

I am convinced that a sensible, compassionate increase in the minimum wage will provide sufficient assistance to these low-income working families who are having difficulty making ends meet. In the long run, of course, a vibrant national economy, with sustained growth and job expansion, and programs of improved education and quality job training designed to hone basic job skills, are the best methods of moving the working poor into the mainstream of American economic life and keeping them there. But for now a reasonable minimun wage increase will keep them ahead of inflation and off the welfare rolls, and that is a good beginning.

That is why I agreed with the President, when, as candidate George Bush, he said he supported raising the minimum wage and providing a training wage. That is why I voted for the administration's minimum wage proposal earlier, and why I support it today, and why I commend the President for following through with his campaign promise to working Americans and their families.

Today the Congress is again faced with a choice. It can approve the conference report which would raise the minimum wage to $4.55 an hour over 3 years, with a 60-day training wage set at 85 percent of the applicable minimum, for first time hires only, which sunsets in 3 years. This package also would create a minimum wage review board that would report to Congress on the need for future wage increases. Or it can agree with the President that this proposal is unacceptable.

The President offered a generous compromise package between those who want no increase in the minimum wage and those who were seeking a boost to $4.55 and higher. The administration proposal would raise the minimum wage over three years to $4.25, coupled with a training wage of $3.35 an hour, or 80 percent of the new minimum, for all newly hired workers.

I am pleased to note that both the conference report and the administration package contains two provisions I strongly favor: an increase in the small business exemption from $362,000 to $500,000 in gross annual sales; and increase in the tip credit from 40 to 50 percent over 2 years. As I sponsored an amendment to liberalize the tip credit in the Labor Committee markup of the minimum wage bill I am pleased that Congress will provide some assistance to the 600,000 small busineses and their over 8 million employees who constitute the food service industry, America's largest retail employer. With the enactment of these two changes, small business will receive some compensatory relief should a minimum wage increase become law.

As I indicated, the administration's proposal is generous, without being excessive. It provides a minimum wage increase of 27 percent phased in over 3 years, or 30 cents more each year. This is roughly 80 percent of the $4.55 approved in conference. Thus the Bush package provides needed support for those in entry-level jobs. At the same time, it avoids the major disemployment, inflationary impact, and disruption to most small businesses that I believe occur as a consequence of enacting the conferees' package.

One of my own concerns about raising the minimum wage is that it could lead to a loss of thousands of jobs and job opportunities for many Americans, especially teenage, minority, and unskilled workers—those disadvantaged members of our society whom proponents claim a boost is supposed to help. According to the Labor Department, a 10-percent increase in the minimum wage will result in the loss of 100,000 to 200,000 jobs. Other studies show similar results. Thus, an increase to $4.55 per hour could cost between 350,000 and 700,000 jobs.

Mr. President, a boost to $4.55 an hour is too high a price to pay for such adverse effects on employment, on inflation, on economic output, and on the working poor and their families.

The significant difference between the conference report and the administration package—the major reason why I consider the Bush proposal to be the better, more realistic, more compassionate approach—is the training wage. The President has supported a training wage equal to 80 percent of the minimum wage, with a $3.35 an hour floor, for all new hires for a 6-month period. By contrast, the conference report recommends a 60-day subminimum wage for persons with no previous job experience.

The conferees' training wage would be available only to employees with no work history. Essentially that means 16-year-olds only—hardly enough to make it worthwhile to employers, and certainly not sufficient to offset the impact of a large minimum wage increase and to preserve jobs for entry-level workers. Moreover, the employer would be faced with the burden of showing that the new workers had never held a previous job or be penalized for paying the subminimum wage. The paperwork and recordkeeping involved in meeting such a heavy burden of proof would be a major disincentive for employers to hire anyone at this training wage.

By contrast, the training wage proposed by the administration is a meaningful incentive for employers and for workers alike. This subminimum wage will clearly mitigate the effects of a reasonable minimum wage increase. It will enable young and inexperienced workers to find work and receive valuable on-the-job training and work experience for up to 6 months. Businesses are understandably reluctant to hire individuals lacking in training or experience, especially when wages rise rapidly. New hires can be justified only if they are more productive. With the President's training wage, employers will be more receptive to giving such workers a chance. In other words, a meaningful training wage is an incentive to employers to provide entry-level employment to those most in need—the unskilled, youthful, and minority workers.

For these disadvantaged Americans the administration's training wage is a godsend. It offers them hope that they can find work and stay off welfare. Through gainful employment, work experience and job training, they will learn the demands and details of the job and the workplace. They will acquire good working habits and earn needed income. They soon gain pride in themselves and their work. They become useful, productive, better skilled and more marketable members of society. They will soon be able to compete for higher paying jobs in a competitive marketplace, earning a brighter future for themselves and their families. They will prepare themselves for the changing, more challenging jobs and job opportunities of tomorrow.

Some trainees will need 6 months for training, some will require less. We must keep in mind that for many new hires holding a job—any job—is a first time experience. They need to get used to showing up to work on job and getting along with fellow workers and superiors and to develop good work habits, in addition to learning the mechanics of their jobs.

Employers will also benefit from a training wage of 6 months. They have sufficient opportunity to train these workers for their new jobs and evaluate their performance. Keep in mind that not all entry level jobs require as little training as hamburger flippers or messengers. Many new hires will change jobs, moving from a position where training may be brief and minimal to a more complex work environment, perhaps with computers or machinery, entailing extensive new training. A 6-month period should be sufficient for most new employees in most new job situations. At the end of this period employers will find themselves with workers who have gained good work experience, are committed to their jobs and employers, and do not need extensive retraining.

Employers, especially small businesses, need the flexibility that a 6-month-training period gives them. Of course, there is nothing to say that an employer will not promote an employee or raise his or her pay before the 6 months is over. There is no justification to the charge that employers will take indefinite advantage of a training wage by continually hiring and firing. It makes no business sense for an employer to hire workers, give them training, make them more productive, and then turn around and let them go just in order to hire new unskilled workers at a lower wage. Not only do current wage-and-hour laws prevent such a practice, but the administration's training wage proposal also forbids it.

The administration's 6-month-training wage is realistic. It is long enough to be worthwhile for employers and employees alike. A 60-day period is not sufficient for either if the goal is to provide meaningful training for trainees.

The Bush package proposes a training wage for all new hires, rather than limiting the subminimum to the first hire. This is preferable because it will help preserve job opportunities.

Employers will be less likely to take advantage of a differential for first hires, unless the job opening requires no additional training, and that is seldom the situation. According to the Labor Department, a new hire requirement saves four times more jobs than first hire—169,000 jobs as opposed to 40,000 jobs. The conference first-job limitation will reach very few workers, since by age 17 or 18 most young people have had some job experience.

Our society and our economy will gain from the opportunity afforded by the Bush training wage. Workforce 2000, the Labor Department study prepared by the Hudson Institute of Indianapolis, indicates that we are rapidly facing a shortage of qualified workers in our society, the jobs of the future will have to be filled increasingly by youth, women, and minorities, many of whom are untrained and unqualified. By providing a meaningful training wage today we could take the first step toward ending the skills gap and worker shortage facing us.

As I stated earlier, over 36 percent of all minimum wage earners are teenagers, who lack the skills, education, and training to fill many of tomorrow's more complex jobs. The National Chamber Foundation's study by McKenzie and Simon projects, if the minimum wage is increased to $4.55, a loss of between 113,000 and 339,000 jobs annually for teenagers—over 30,000 jobs lost by the mid 1990's in Indiana alone. Teenage unemployment, as of April of this year, stood at almost 15 percent. In Indiana last year teenage unemployment averaged 18.8 percent. Raising the minimum wage without providing for a compensatory training differential will only make this tragic situation worse for our Nation's youth.

It is also worth noting that, according to the Bureau of Labor Statistics, over the past 7 years—during a period in which the minimum wage remained unchanged at $3.35 an hour, the number of black male teenagers in the labor force increased by 70 percent. Last year the overall rate of summer employment for young people set a record. Let is not reverse these gains by approving a minimum wage increase without a meaningful training wage.

I do not claim that the administration's training wage will give youth the education and qualifications they need for permanent employment. But it may save thousands of entry-level jobs and part-time positions for young workers. In fact, the Labor Department estimates that the Bush training wage will save close to 170,000 jobs.

Mr. President, in my opinion, the administration proposal is far superior to the conference recommendation, for the economic and humanitarian reasons I have discussed. Let us recognize one fact, however. Raising the minimum wage itself does nothing to improve the job skills or the lot of low-income workers. If we are really serious about helping the working poor,

we must do a lot more to improve education and vocational training so that we can eliminate the skills gap that is keeping many low-income workers poor. At the same time, we must keep our economy strong and vibrant. Continued growth in employment opportunities, together with improved education and training, will pave the surest way out of poverty, not policies which discourage job creation, reduce work hours and encourage inflation.

Increasing the minimum wage is a blunt instrument indeed if we are trying to solve the deeper problems of the working poor. I believe that a better approach would be to expand the earned income tax credit and adjust it according to family size.

For the present, however, I urge my colleagues to join me in rejecting the conference report on the minimum wage. The administration's $4.25 an hour package is the most generous, most effective compromise we can afford. The President has already stated that he will veto any higher minimum wage or any package lacking a meaningful training wage. I am as certain he will do that as I am that his veto will be sustained. Perhaps then we shall have another opportunity to consider the President's package as the better, more compassionate way to go.

FRANK Q. NEBEKER TO BE CHIEF JUDGE OF THE U.S. COURT OF VETERANS' APPEALS

Mr. MURKOWSKI. Mr. President, yesterday the U.S. Senate confirmed Frank Q. Nebeker as the first chief judge of the newly established U.S. Court of Veterans' Appeals.

The Senate Committee on Veterans' Affairs held its confirmation hearing on May 15, 1989, during which the Members addressed Judge Nebeker's experience, personal philosophy, and leadership skills. I believe that Judge Nebeker clearly demonstrated that he has all of the qualities he must possess in order to assume this highly responsible position. The next day, the committee voted unanimously to recommend his confirmation.

Judge Nebeker will face two monumental tasks: To get the court fully operational by September 1, 1989; and to make the court function fairly and efficiently from the outset.

With respect to the first task, Judge Nebeker was on the building committee which planned the present courthouse of the D.C. Court of Appeals. He became such an expert in designing floor plans and courtroom spaces that several States thereafter asked him to help build their State courthouses. His talents will be put to good use in arranging the budget, funding, space, equipment, personnel, and furnishings for the new court.

Judge Nebeker's extensive legal experience and knowledge will be of vital importance in accomplishing the second task, that of ensuring the court functions fairly and efficiently from the very beginning. His experience includes; 13 years with the Department of Justice as a trial attorney and as an assistant U.S. attorney; 18 years as an associate judge on the District of Columbia Court of Appeals; and 2 years as the Director of the Office of Government Ethics.

Under his guidance, I expect the court will establish a solid reputation for fairness and impartiality in the veteran community and the overall legal community as well.

It should also be noted that Judge Nebeker wore our country's military uniform for 8 years as an officer in the District of Columbia and Utah National Guard.

Judge Nebeker's willingness to accept a difficult assignment on the new court is consistent with his record of public service and is good news for all veterans who want their claim finally determined in a court of law.

I congratulate him on his confirmation as the first chief judge of the U.S. Court of Veterans' Appeals.

EL SALVADOR

Mr. MOYNIHAN. Mr. President, I would like to share with my colleagues a most insightful analysis of the situation in El Salvador written by Mr. Maurice Sonnenberg. Mr. Sonnenberg, who has a long and distinguished record of public service in foreign policy matters, was an official United States observer of the election in El Salvador held on March, 19, 1989.

And an extraordinary election it was. In a article published in the New York Post on May 14, 1989, Mr. Sonnenberg describes the efforts of leftist guerrillas to intimidate voters, and takes note of the remarkable 58 percent of the electorate that nevertheless went to the polls. Indeed, the U.S. observer group concluded unanimously that the election was "free and fair."

This is not to say that El Salvador's problems are over. Mr. Sonnenberg argues that the new President of that country, Alfredo Cristiani, faces a major challenge:

> Cristiani will have to place human rights high on his agenda, show he is independent of the more violent and reactionary elements of his party and bring to justice those members of the military who engaged in human-rights violations.

Mr. President, this body will soon begin considering the issue of foreign assistance to El Salvador. And in taking up a matter of such importance, it is essential that we gain as much insight as possible from those who have the most to offer—from public servants such as Maurice Sonnenberg, who have been to El Salvador and analyzed that country with such care. Mr. President, I ask unanimous consent that Mr. Sonnenberg's article from the New York Post of May 19, 1989, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From The New York Post, May 14, 1989]

NEW SALVADOR REGIME MERITS HELPING HAND

(By Maurice Sonnenberg)

While Nicaragua is no longer a central issue for partisans and headline makers, attention in Washington is shifting to another Central American location—El Salvador. Indeed, that country, whose government has faced a leftist guerrilla movement for many years, is now replacing Nicaragua as a major issue of foreign-policy confrontation.

A concurrent resolution of the House of Representatives (H. Con. 48), signed by 140 members, requests the administration to pursue a "negotiated political settlement" of the civil war in El Salvador.

In Senate bill S. 642, some members are pushing stricter measures. The effect of this bill would be to withhold 50 percent of U.S. military aid to the government of El Salvador pending reports from the administration about progress towards a negotiated settlement and improvement of the human-rights situation.

Both bills seek to make the Salvadoran government more accommodating, but neither addresses the issue of violence from the leftist guerrillas.

What kinds of negotiations and progress should be expected in El Salvador? Should we seek what President Jose Napoleon Duarte describes as an "Imposed provisional government" with guerrilla participation—and undermine the democratic process already under way?

AN EXTRAORDINARY ELECTION

One perspective on these issues comes from the Salvadoran presidential election held March 19, which I observed as a member of the official bipartisan U.S. Observer Team.

On that date, over one million Salvadorans, 58 percent of the electorate, went to the polls, a larger percentage than voted in the last U.S. presidential election. This demonstration of civic responsibility is even more remarkable when one considers that the FMLN (Farabundo Marti Liberacion Nacional) left-wing guerrillas pledged to destroy vehicles carrying voters and to blow up gas stations servicing vehicles involved in the election process.

The 17-person election observer team of the AFL-CIA reported that "at approximately 8:30 in the morning, a truck carrying campesinos from La Prensa cooperative was attacked with machine-gun fire. Ten people were wounded, three gravely." A majority of the electric grids were knocked out by rebels, causing near-total blackout of the city of San Salvador before and during the voting. On election day, explosions, fires and gunshots were not uncommon.

Under these conditions the Salvadorans carried out an election that our observer mission unanimously deemed "free and fair." The fairness of the election stands in stark contrast to the electoral fraud carried out by General Noriega in Panama.

There appeared to be no intimidation of voters. We felt the military, which is pro-

hibited from voting in elections, assisted rather than hindered the election process. Election procedures, including voter registration and identification, voting, balloting, collection and tabulation were of an extremely high standard. We did not encounter vote fraud.

In fact, having spent decades involved in American campaigns, I can easily say this was a "clean" election compared to some past votes in New York and Chicago?

The three major parties were well represented at the polls by an extensive army of poll watchers. For the first time, a leftist coalition of citizens participated, under the banner of the "Democratic Convergence" (which received only 3.5 percent of the vote), led by Guillermo Ungo and Ruben Zamora, socialists who had formerly been affiliated with the FMLN guerrillas. They joined many others, including Costa Rica's President Arias, in denouncing the intimidation tactics of the FMLN.

WHY THE RIGHT WON

Most of my friends from the labor movement and Democratic Party are disappointed that the candidate of the moderate left Christian Democratic (CD) Party, Fidel Chavez Mena, lost to the candidate of the rightist party (ARENA), Alfredo Christiani.

They are concerned because ARENA's founder and candidate in the last presidential election was Major Roberto d'Aubuisson, who is alleged to be a leader of the death squads that were active in the early '80s.

The election prospects of the Christian Democrats were diminished, however, by economic problems, rampant corruption, poor political organization and internal bickering.

Furthermore, the guerrilla strategy was to assist the ARENA party by preventing many CD voters in the outlying regions from reaching the polls. The far left wanted to elect Alfredo Christiani, in the hope of further polarizing the nation, rolling back the Duarte reforms and creating a climate for a cutoff of U.S. aid.

A representative from an AFL-CIO observer team estimated that 150,000 to 200,000 voters could not get to the polls because of guerrilla disruptions. He felt most of these trade unionists, largely involved with the National Union of Workers and Campesinos (UNOC), would have voted for Chavez Mena.

After generations of constant and brutal military dictatorships, the election of Christiani will bring about an orderly transfer of power from one party to another, without parallel in El Salvador's history. Furthermore, this is the only election where none of the candidates were generals or former generals!

AGENDA FOR THE FUTURE

So what of the future? Christiani will have to place human rights high on his agenda, show he is independent of the more violent and reactionary elements of his party and bring to justice those members of the military who engaged in human-rights violations.

He seems to have begun by reinstating charges against eight military and civilians charged with kidnapping for profit and suspected of being part of the infamous death-squad activity.

Next, he will have to reach out for dialogue with the guerrillas. He has already met with the leaders of the Democratic Convergence.

He will be watched to see how he handles key cabinet appointments, the army, peace negotiations and, most of all, human rights.

Christiani must be given time to implement his policies while the U.S. maintains the same levels of military and economic assistance.

A cut in U.S. aid to El Salvador at this time would be a disheartening breach of faith and contradict our professed desire for democracy in the region. It would signal our unwillingness to see this democratic experiment through to the end, and would allow the FMLN to win with the gun what it could not win with the ballot.

RESIDENTS OF PUBLIC HOUSING ARE ON THE MOVE

Mr. DIXON. Mr. President, this body may remember that the Housing and Community Development Act of 1987 authorizes resident management of public housing developments. This is an initiative which I sponsored and which I first presented to this body on March 26, 1986.

Today, I take great pride in saluting the residents of LeClaire Courts for recently taking control of the management of their own living conditions in the LeClaire Courts public housing development in the city of Chicago. Last week, the residents celebrated their success in a ceremony at this southwest side low-rise development.

Mr. President, I have great hope for the residents of LeClaire Courts. As a result of residents managing the development, I look forward to seeing an increase in rent collections, an increase in the number of employed residents, creation of business ventures, and a safer and more stable community at LeClaire Courts.

Additionally, Mr. President, I look forward to coming before this body in the near future to recognize resident management at several other public housing developments in Illinois.

KITTY DUKAKIS INSPIRES WITH WORDS AND EXAMPLE

Mr. PELL. Mr. President, I had the honor last Sunday to attend the commencement where a truly remarkable address was given by Kitty Dukakis at the New England Institute of Technology in Providence, RI.

Her address, which draws from her personal experiences and the challenges that she has faced, is a deep source of inspiration both from her words and from her example.

Mrs. Dukakis offers encouragement for all graduates, but particularly for the women and for the older students with dependents. It is absolutely clear that she knows what they went through to reach their graduation day.

Drawing from her experience, she also urges the graduates to remain flexible and creative but, above all, to remain determined to make a difference. She sees in them the spirit needed to guide our Nation.

It is that part of her address, which captures a unique strength of America, that I hope will be a source of insight and inspiration to my colleagues. For that reason, I ask unanimous consent that her remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

COMMENCEMENT ADDRESS BY KITTY DUKAKIS, MAY 7, 1989

Thank you, Dom DiLuglio, for that kind introduction, and thanks to President Richard Gouse . . . and to the faculty and trustees of New England Tech for inviting me here today.

But . . . most importantly of all . . . thanks to you . . . the 49th graduating class of the New England Institute of Technology for allowing Michael and me to share your big day . . .

And, it's a big day for your families and friends as well . . . in fact, I'll bet that they're almost as happy as you are . . . but for a different reason.

I'll bet that a lot of you have boyfriends and girlfriends . . . husbands and wives . . . out there in the audience . . . you know who I mean . . . the ones who heated up your cold dinners . . . typed your reports . . . gave you a ride when the car wouldn't start . . . am I right?

They're the ones who watched the kids when you had to study . . . called your boss when you were going to be late for work . . . waited for you in the rain and snow . . . I'll bet they're at least as happy as you are that you're graduating . . . that it's finally over!

And let me say also how pleased I am to look out at your faces and see so many women in this graduating class . . . you are a sure sign that women are becoming an important part of the workplace of tomorrow.

I know that many of you had to give it a little extra to get here today . . . to overcome the obstacles that society still puts in the way of women who want to enter traditionally male professions . . . but I ask you to keep up the good work . . . and never give up . . .

So, congratulations from the bottom of my heart . . . to each and every graduate . . . to your family and friends . . . to faculty, students and alumni . . . to trustees and administrators . . . you all have many reasons to be proud indeed . . .

A very wise person once said that commencement speeches should be funny . . . inspirational . . . and short . . . well, I'm really not a comedienne . . . and you graduates are more inspirational than I could ever be . . . but I will try to be brief.

Recently, I started thinking back to my own experiences as a student . . . like nearly everyone of you, I too came to my commencement day a little older than the average graduate . . . in my case, I had interrupted my education for five years . . . and when I eventually went back to get my degree, I was a divorced mother . . . with a three year old son . . .

Those were pretty tough days . . . I mean, most people hadn't even heard of child care in 1961. But with a lot of help from family and friends, I made it through and somehow arrived at my own graduation day. And so I'm particularly happy to be standing in front of this group of graduates on this beautiful day in May.

For when you pick up your diplomas today, you're really going to know what

they're worth. None of you just rolled out of high school and stumbled through your years of college because everybody expected you to. None of you came to New England Tech in the footsteps of generations of relatives whose support and memory made the hard times a little bit easier.

No . . . most of you came here from jobs that didn't promise you the kind of future your talents deserved . . . and, many of you continued to hold down full-time jobs while you were getting your degree . . . large numbers of you commuted quite a distance . . . over an hour each way, I'm told . . . so, Michael and I salute all of you . . . and I'm proud to stand before you and have the chance to speak to you today. And you couldn't have picked a better school for the education you were seeking.

Back in the early 1970's your President, Richard Gouse, saw the profound impact that changing technology was beginning to have on the American economy.

He saw that this impact would extend to how we educate the workforce of the future . . . that the distinction between liberal and vocational education would be altered forever . . . and the growth of New England Tech over the last fifteen years shows that President Gouse was correct indeed . . . where there was a single campus, there are now three . . . and, 70 students have grown to over 2,000.

The New England business community has recognized your success . . . last year you placed over 91 percent of your alumni in jobs immediately upon graduation . . . and I understand that this year's percentage could be even higher . . . that there are more jobs in your college's job bank than there are students to fill them.

It looks to me like New England's businesses know where to come to find top-notch workers nd future leaders . . . they come to the New England Institute of Technology.

All of you at New England Tech . . . but especially your students . . . have a lot in common with our region . . . the region you've made part of your name . . . New England . . . for, New England is a region on the move . . . our people and our economy have always been ready to change when the times demanded it . . . to change and remain vital and alive . . . we New Englanders keep moving because we know what happens when we stand still . . . we know what happens when we depend too much on one or two industries for our economic health . . . when we don't keep a watchful eye for the signs of economic or social change . . . we know that jobs go away . . . our cities and towns start to decay . . . factories close . . . and we can't meet the needs of our citizens for protection and education and a decent place to live.

For almost 50 years, New England Tech has been changing along with the changing face of New England business . . . at first you were named "New England Radio" . . . named for the broadcast medium to which nearly everyone was tuned in 1940 . . . but radio was soon to be joined by a host of other technologies . . . and so you changed: you changed your name to the one it bears now . . . and you broadened your curriculum . . . but in the 1970's you faced new challenges . . . it was hard to see where a traditional vocational school fit into the space age . . . so you changed again . . . you redefined yourselves . . . you began to combine technical expertise in a broad range of disciplines with the professional skills the workplace priced . . . you started to turn out students with excellent communications skills and with the potential to enter the ranks of management . . . before long, you began to confer Bachelor's Degrees.

And, New England Tech started to attract a special breed of student . . . like those of you who are graduating today . . . who knew first hand the meaning of change in your own lives.

And, as you graduates stop on this special occasion and think about how you got here . . . and as you make your plans for the future . . . I'd like to suggest that this ability to change . . . this willingness to grow and be flexible is probably the most important lesson you can carry with you into your jobs and communities . . . it's a lesson that's critical not only to your own futures . . . but to the future of America as well.

And, it's a lessson I've had to learn over and over again in my own life . . . in Politics, Michael and I have had to learn to be flexible and open enough to accept the good with the bad . . . to rejoice in election victories and to acknowledge election defeats . . . it isn't always easy . . . *believe me*, it isn't always easy . . . in my personal life, I've had to be open to the reality of my dependency on drugs and alcohol . . . a dependency I've been fighting for over 30 years . . . I've had to be open to the reality that I would spend the rest of my life recovering from that dependency . . . One Day at a Time.

And, I've had to learn these lessons in the public eye . . . with the intense scrutiny of the media . . . and with the knowledge and awareness of tens of millions of people.

But . . . through it all . . . the most important lesson has been not to give up in the face of challenge and change . . . but to welcome it . . . to accept our limitations . . . to change what we had to . . . and to turn apparent defeats into victories.

Now, I don't mean to minimize in any way the importance of all of the superb technical training you've received from your instructors . . . and, I don't mean to minimize what you've learned in the jobs you've held throughout your years in school.

But, I do mean to say that you'll be able to really make a difference . . . both on the job and in your communities . . . when you're open to change . . . and when you're flexible in the face of the many possibilities that your jobs and daily life offer you . . . you'll be able to make the difference that our country needs today more than ever before in its history.

For, its by being open and flexible that you'll have the greatest chance to be creative . . . to see how things might be done a little differently . . . on the job or in your hometown.

It's this flexibility and creativity that has made the difference in New England for centuries . . . it's what we need all across America today . . . and it's what each and everyone of you can nurture in your lives and on the job . . . for, it really is possible to make a difference . . . and, you'll be limited only by your imaginations.

And when you learn to make a difference, you'll be joining a great New England tradition . . . a tradition that includes people like An Wang who pioneered the introduction of Word Processing in our everyday workplace . . . and who changed the face of offices everywhere . . . like Governor Madeline Kunin of Vermont and, before here, Governor Ella Grasso of Connecticut . . . who have helped forge a new role for women on the American political scene . . . like Mitch Kapor whose genius made it so much easier for men and women in the business world to attack their daily problems . . . and who in the process built Lotus Development Corporation.

But the challenge before us has never been greater.

Today, we see so much technological creativity coming from foreign sources . . . in many cases, America has lost her traditional leadership role to competition from overseas.

From the manufacturing of cars and steel . . . to televisions and VCR's . . . we seem to have lost much of our competitive edge.

Some say we've given up.

But I don't think America's given up . . . and, looking out at your faces here today, I know for sure that you haven't given up either!

For nearly two years, I travelled all over America as Michael sought our nation's highest office . . . I covered over 250,000 miles . . . from the heat of southern Texas to an icy glacier near Juneau, Alaska . . . from the farmlands of Fresno, California to the plants of Pennsylvania and Michigan . . . and, everywhere, I saw an America that knows we can once again be second to none.

I remember meeting with autoworkers and their families in Ohio . . . I remember their spirit and determination in the face of layoffs and givebacks . . . they weren't ready to give up . . . and neither am I.

I remember farm families in Iowa and Illinois . . . ravaged by drought and overwhelmed by mortgages they could no longer pay . . . I remember their pride in the land that was their families' livelihood for generations . . . they were determined to make their own corner of America great again . . . and so am I.

I remember the faces of homeless women in New York City . . . women who until recently had been raising children on the streets and in shelters . . . I remember the fierce determination I saw in their eyes . . . determination to become part of the American Dream . . . to have homes they could call their own and jobs they could be proud of . . . my friends, if they hadn't given up . . . I'll never give up.

This is the spririt that I saw all over the country.

This is the spirit that brought you to New England Tech . . . with the determination to change your lives . . . the determination to make a difference.

It's a spirit I've learned something about in my own life.

And, today, I put a challenge to you: keep that spirit with you . . . in the workplace . . . in your communities . . . with your families and among your friends.

For two years, I came to know an Amercia that wants to be great again . . . that wants to seize the leadership we once knew . . . that is ready to move ahead into the twenty-first century.

If we are to do that . . . if we are to move ahead . . . it is you who will take us there . . . and, you will do just that with the spirit of flexibility and openness to change what has marked the history of New England Tech.

And then you will take your own places in the great tradition that has allowed our New England region to grow and prosper over the years . . . you will take your own places among Americans all across our land who believe . . . as I do . . . that our future can be as great as our dreams.

And . . . when you do . . . remember to put something back into your communities . . . into your cities and towns . . . become involved with your neighbors in projects

that assist your fellow citizens who need your help . . . whatever your politics, become involved in your local government . . . work with your school committees and Town Councils . . . I think you might be surprised at the difference you can make.

So, thank you, once again, for sharing your celebration with Michael and me . . . I look forward to speaking about these and other issues on my current lecture tour of the United States and to writing about my experiences in a book that will be published next Spring.

Have a wonderful day . . . enjoy!

WELCOME BACK ORESTES GONZALEZ

Mr. PELL. Mr. President, yesterday, at 6 a.m., Orestes Gonzalez, a political prisoner held in Cuban jails since December 1981, arrived in Miami to the welcoming arms and cheers of his family and friends. As I did on the occasion of the arrival of former fellow prisoner Amado Jesus Rodriguez Fernandez in March, I join with the family in welcoming Orestes back to the United States. The case of Orestes Gonzalez, a United States resident, is unique in that he was taken prisoner in Cuba while on a family visit in late November 1981. The Cuban Government charged him with being a member of Alfa 66, a charge which he has denied to this day.

As in the case of Amado Jesus, I welcome the gesture of the Cuban Government in freeing Orestes Gonzalez. I look forward to the eventual release of Alberto Grau Sierra, the old plantado, and the last of the three prisoners who have been linked to my visit to Cuba last November. Shortly after I returned from my trip, I was informed by the Cuban Government that these three political prisoners would be released because of my intervention on humanitarian grounds. I responded with satisfaction to this gesture but at the same time I reminded the Cubans that during my long meeting with Fidel Castro, I strongly suggested that all the remaining political prisoners should be released. That message was conveyed to Havana. I am hopeful that these recent releases will signal the beginning of the release of all the remaining political prisoners in Cuba.

As I said upon the arrival of Amado Jesus in March, the releases reenforce my belief that the Cuban Government does want a better relationship with the United States. I concluded from my trip that the United States and Cuba should begin to deal with each other on small mutually beneficial steps to create the climate for the resolution of the difficult issues. The Cuban exile community in the United States would be one of the major beneficiaries of an improved relationship with Cuba. I now anxiously await the release of Alberto Grau Sierra and ultimately the rest of the political prisoners.

It is with great satisfaction that I join Orestes Gonzalez' family in welcoming him home, his wife Martha, and his daughter Irma Escarra, who has worked so hard to gain the release of her father. It is my hope that one day, in the not too distant future, many relatives and families of political prisoners in Cuba will also experience the joy that is felt today in the Gonzalez household in Coral Gables.

THE SOUTH CAROLINA DEPARTMENT OF PARKS, RECREATION AND TOURISM AND NATIONAL TOURISM WEEK

Mr. THURMOND. Mr. President, in honor of National Tourism Week, May 15–May 21, I would like to take this ideal opportunity to recognize the outstanding work done by the South Carolina Department of Parks, Recreation and Tourism [PRT]. Tourism is the second largest industry in the State of South Carolina and the value of the excellent work done by the PRT cannot be underestimated.

South Carolinians are blessed with a beautiful State that has much to offer. Tourism plays a large role in South Carolina's economy and helps to bring added revenue and jobs to our State. It is estimated that the tourism industry was directly responsible for 98,500 jobs and generated $4.6 billion in revenues for fiscal year 1988.

I would like to commend Mr. Fred Brinkman for his leadership as director of the PRT. Mr. Brinkman's dedicated efforts at PRT have helped to bring the rich travel resources of our State to the attention of all Americans and foreign visitors to the United States.

I would also like to commend Mr. Bob Liming, director of tourism, for the fine job he is doing. Bob is national chairman of the State Travel Council and is recognized nationally for his great skill and expertise in travel and tourism.

My wife Nancy joins me in lauding the efforts of the administration and staff at PRT. She has a special interest in promoting tourism in South Carolina and she too recognizes its tremendous importance to our State. Nancy plans to continue working to expand the industry and to further broaden South Carolina's travel appeal.

I congratulate PRT for the success they have achieved in the past year and I wish them the best for the upcoming tourism season. It is my sincere hope that Americans and foreign tourists alike will continue to discover and enjoy South Carolina's beautiful places and smiling faces.

TRIBUTE TO ROBERT F. BOTT, PROFESSIONAL STAFF MEMBER, ARMED SERVICES COMMITTEE

Mr. WARNER. Mr. President, I rise today to pay tribute to Mr. Robert F. Bott, a key member of the Senate Armed Services Committee staff for the past 6 years, who will depart the Armed Services Committee to enter the private sector next month.

Since 1983, Bob Bott has been the principal Republican professional staff member for the Strategic and Theater Nuclear Forces Subcommittee, which has jurisdiction over all funding and issues related to strategic aircraft, missiles, submarines, communications, intelligence and space systems, theater nuclear forces, arms control and verification, and United States-Soviet military balance. I know of no professional staff member who has contributed more to this body in terms of effort, imagination and actual accomplishment for these past 6 years.

Bob is originally from Logansport, IN. At the age of 7, he moved to White Plains, NY with this family. Bob was valedictorian of his high school class and voted most likely to succeed. He graduated from Holy Cross College in 1967 and was commissioned in the Navy. As a naval flight officer, he played a significant role in the introduction of the P3C antisubmarine warfare aircraft.

Upon leaving the Navy in 1972, Bob became a program analyst for the Department of the Navy until 1975, when he became a staff member in the Strategic Forces Division of the Department of Defense Program Analysis and Evaluation Office. In 1983, Bob was serving as the Director of the Strategic Offensive Forces Division of DOD PA&E when we were able to persuade him to come to work for the Armed Services Committee here in the Senate.

While I served as the chairman of the Subcommittee on Strategic and Theater Nuclear Forces, Bob was the principal professional staff member assisting me in my responsibilities on these critical national security issues. His expert analyses and personal skills were critical to the important compromise package on Peacekeeper funding in 1985. President Reagan sent Bob a personal letter thanking him for his critical help in securing funding for the Peacekeeper missile. The approval of this compromise set the stage for the continued funding of Peacekeeper.

Bob was also instrumental in maintaining funding and support for the command, control, and communication modernization program which is so crucial for the maintenance of a credible and effective nuclear deterrent force. He also played an invaluable role in the formation of the Nuclear Weapons Council, the funding of the

B-1 and B-2, advanced cruise missile, and certain sensitive intelligence programs.

Bob was notably effective in the Senate-House conference deliberations on the annual DOD authorization bill. All members and other staff would agree that Mr. Bott was one of the most credible and authoritative advisors on important decisions regarding strategic force issues. His objective and well-reasoned analyses were accepted in a true bipartisan spirit. His advice will surely be missed.

Bob has truly earned the genuine respect and admiration of all those with whom he has worked—Senators, Members of the House of Representatives, and professional staff members of both bodies. I am certain that the chairman of the Senate Armed Services Committee, Senator NUNN, and the chairman of the House Armed Services Committee, Representative ASPIN, would attest to Bob Bott's comprehensive knowledge, unique capabilities and dedication. Bob's technical knowledge and his ability to grasp and express clearly and concisely highly complex issues made him ideally suited for the extremely important and demanding staff position he has held.

I would like to pay tribute also to Bob's family; his wife, Ruth, and his children, Catherine and Michael, are to be commended for their patience with Bob's grueling hours and extensive work schedule. They have accepted a large measure of sarcrifice so that Bob could serve the Senate and his country so faithfully and so unselfishly.

On behalf of the Senate and the Nation, I want to express our sincere appreciation to Bob Bott for his selfless dedication, his truly outstanding performance, and the great contributions he has made to the security of this Nation. And I want to express my personal thanks also to Bob for his unparalled professionalism, his loyalty, and his friendship. Mr. THURMOND and other members of the committee joined me in the preparation of this statement.

We wish him well in his new career and bid him well with a snappy hand salute.

THE CHICAGO DEFENDER

Mr. DIXON. Mr. President, recently the Chicago Defender celebrated its 84th anniversary. For 84 years the Chicago Defender has been a leader in the fight for civil rights for African Americans and other ethnic Americans. The Chicago Defender was founded in 1905 by Robert S. Abbott and through much hard work has achieved the high level of success it holds today. I heartily congratulate the Chicago Defender and look forward to its continued leadership in civil rights.

I would also like to submit for the RECORD the text of an editorial from the May 6 edition of the Chicago Defender.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

STRUGGLE AND GLORY OF OUR 84 YEARS

From May 5, 1905, when Robert S. Abbott, LL.B., founded the *Chicago Defender*, the newspaper has experienced the struggle and glory of making America a better place in which everyone can live. On this auspicious 84th anniversary, our deep thanks not only to the late Mr. Abbott, but also to our readers who are directly responsible for our continued success.

Our call for dignity and human rights, established by Mr. Abbott in the original platform, was not an empty series of statements. They were listed as goals that America had to reach to fulfill the true meaning of the words indelibly written into the U.S. Constitution, its amendments and the Declaration of Independence.

Currently, there are seven goals in the platform. They can be seen at the bottom left of this page and until they are properly addressed, the United States will not have truly reached its full level of greatness or fulfilled the promises of true democracy.

It is not enough for the U.S. to declare itself "The land of the free and the home of the brave" when millions of its citizens, for racial, gender or other reasons, are not treated fairly and are denied an equal chance to participate in the vast opportunities of this nation. That hypocritical situation was not fair in 1776, when the Declaration of Independence was signed or in 1905 when the *Defender* published its first edition. The denial of human dignity and Civil Rights continue as one of the ultimate injustices plaguing society today. We will not be satisfied until the wrongs are righted.

Although the 84 years of our existence have been a long, hard struggle, in many ways it has been a glorious one. It took great courage to oppose lynching and the countless forms of institutional racism that have resulted in death, hospitalization and unhappiness for countless individuals. But it has been glorious to be responsible to some degree for: the reduction of lynching; the implementation of voting rights; the integration of the armed forces and the civilian sector of society; and numerous other positive changes in America.

The pain of striving for a better country is also offset by the glory of having millions of young people build strong, moral character and go on to become productive, caring, well-balanced adults.

There must be no doubt that the struggle must continue. This is especially true if African Americans, women and various other racial and ethnic groups are to become first-class citizens. With your help, we can make the seven goals in the *Chicago Defender's* platform a reality.

COMMITTEE ON HUNGER TRIP TO AFRICA

Mr. LEAHY. Mr. President, I want to draw the attention of the Senate to the unique journey of the House Select Committee on Hunger to Ethiopia and Sudan during this past Easter recess period.

So often the press criticizes congressional travel. But this grueling trip is proof of the value of bringing public policymakers in direct contact with urgent international problems.

Led by Congressman MICKEY LELAND, chairman of the House Select Committee on Hunger, the delegation included Vice Chairman BILL EMERSON, who also serves on the House Agriculture Committee, Congressman GARY ACKERMAN, and Congressman MICHAEL MCNULTY.

Also participating in this trip were the following staff: Denise Lionetti, Bob Jackson, Hugh Johnson, and Marty LaVor of the Select Committee on Hunger; Tom Clin and Nancy Stetson of the Senate Foreign Relations Committee; and Steve Morrison of the House Foreign Affairs Committee, Balbeer Sihra of Congresswoman PATTERSON's office, and Ann Schonfield of Congressman ACKERMAN's office.

Mr. President, I want to commend those who took time out from their own schedules, away from family and local commitments, to see first hand the overwhelming hunger problems in Africa. These people showed the best face of the United States—and their own humanity. I am so proud of them all. As my own Agriculture Committee considers the reauthorization of the Food for Peace Program (Public Law 480), I look forward to receiving the recommendations of the Hunger Committee. We must work together to improve this, and all our food aid programs, so that they better serve the pressing economic development and hunger problems around the world.

MONEY LAUNDERING CONTROL

Mr. KERRY. Mr. President, last year when Congress enacted the omnibus drug bill considerable attention was devoted to the problem of using legitimate businesses and banking institutions as a front for the laundering of millions of dollars in drug profits. The omnibus drug bill included several important provisions dealing with this problem by imposing new requirements, clarifying ambiguities, increasing penalties, and requiring international cooperation aimed at the use of offshore drug havens by narcotics smuggling organizations.

In the time since the passage of the drug law last fall, events have confirmed the congressional findings of rampant abuse of banking institutions got drug money laundering provisions. Publicity surrounding the Operation C-Chase in southern California, the worldwide Bank of Credit and Commerce International [BCCI] money laundering scheme, and the recently uncovered Chicarci affair in Switzerland point to the existence of a major problem.

Earlier this year the American Bankers Association established an ongoing money laundering task force to provide leadership and focus to the efforts of bankers to help rid this country of the scourage of drug-related racketeering. This task force builds upon earlier efforts by the ABA to provide leadership on this issue. The importance and effectiveness of the ABA's Task Force was recently recognized by the director of Federal antidrug efforts, Mr. William Bennett, when he asked that the task force submit recommendations for Federal efforts in this area.

The ABA Task Force has responded to Mr. Bennett's request with a detailed set of recommendations, and has indicated its readiness to cooperate with the Federal Government in the implementation of new initiatives. Some of the recommendations may be controversial; others will be readily accepted—one issue on which there is certain agreement is that there must be increased cooperation and exchange of information between the private sector and the Government on this vitally important issue.

I ask unanimous consent that a complete text of the ABA Task Force recommendations, as well as several articles about money laundering, be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN BANKERS ASSOCIATION,
Washington, DC, April 28, 1989.

MR. WILLIAM J. BENNETT,
Director, Office of National Drug Control Policy, Executive Office of The President, Washington, DC.

DEAR MR. BENNETT: The American Bankers Association greatly appreciates your request for recommendations as to how the banking industry can aid the government in curbing our country's drug problem. Our members are keenly aware of the need for active participation from the private sector in addressing this critical issue. We hope all members of our nation's business community will rise to the challenge.

Specifically, I have enclosed a detailed paper prepared by ABA's Money Laundering Task Force. This group provides advice and comment on legislative and regulatory proposals and is designed to coordinate all of ABA's present and future programs to educate its members and the government on how best to prevent the use of banks for money laundering both in the United States and abroad. The enclosed paper is only one aspect of our industry's resolve in this critical area.

Your task is indeed formidable and we pledge our continuing support.

Sincerely,

DONALD G. OGILVIE,
Executive Vice President, American Bankers Association.

TOWARD A NEW NATIONAL DRUG POLICY—THE BANKING INDUSTRY STRATEGY

TASK FORCE RECOMMENDATIONS

1. Government—Industry cooperation is essential for any successful national drug policy. Establishment of a formal financial industry advisory board will greatly enhance communications between these two critical groups.

2. The government should establish a mechanism for prompt dissemination of money laundering activities and trends to the financial industry.

3. There should be a thorough review of all recordkeeping and reporting regulations designed to attack the drug money laundering problem. There is a need for a study addressing the law enforcement utility of the Bank Secrecy Act.

4. Successful prosecutions resulting from active support from the banking industry should be publicized by the government whenever possible.

5. The problem with tracking possible laundering schemes through the use of wire transfers and other complex transactions should be addressed.

INTRODUCTION

It is as imperative for the banking industry as it is for the law enforcement community to deter drug dealers from using our nation's financial institutions to launder monies derived from illegal activity. To be successful, however, there must be a partnership in this effort. The maze of regulations and laws imposed upon the financial industry in the name of drug enforcement may not always achieve this noble goal.

Our members strongly believe that the government and the banking industry need to work together as a team, not as adversaries, in pursuing the goal of a drug-free America.

USE OF ADVISORY COUNCILS

We have specific recommendations on how best this could be accomplished. First, through the formation of a government advisory council (consisting of representatives from the banking industry, regulators, law enforcement, and the Treasury) would be all of the groups that have some role in money laundering deterrence.

This type of council could jointly develop common short and long term goals, to concentrate on the drug and money laundering problem instead of allowing the government to continue the current categorization of the issue as a "bank compliance problem." We must get beyond the excessive rhetoric and cynical attempts by Congress to solve the drug problem by increasing paperwork. With an advisory council we can logically attend to this serious problem.

An advisory council could work much the same way as the Federal Reserve Board's Consumer Advisory Council. The group, composed of regulatory, legal, and banking experts, would set realistic goals and be able to determine very quickly what changes were needed to keep banks from spending too much time gathering irrelevant information. While the legality of an advisory board must be reviewed, it is an idea whose time has come.

EDUCATION AND AWARENESS

The second recommendation concerns education. We are proud of our work in the area of deterring money launderers and we are frequently confused as to the government's strategy. There is a need for consistency in supervision and regulation of the financial industry. This can only occur once the government and the banking industry understand their different roles.

One way to do this is by educating the industry on the latest tactics and techniques utilized by money launderers. Currently, the government waits until there are a series of activities, and then as a last resort passes this information on to the industry in a rushed, makeshift manner.

It would be helpful if various banking and law enforcement agencies could immediately adivse the banking community as to the latest money laundering trends, suspicious customers, and preferred illegal transactions so that the industry could put into effect the necessary safeguards to preclude that type of activity. Communication must come from all members of the law enforcement community, the regulators, and the industry itself. We recommend a formal dialog between these critical parties on a frequent basis to keep abreast of what is necessary to combat this activity. This would be slightly different than the proposed advisory council but similar to what the banking industry and the Inter Agency Bank Fraud Working Group have done in the bank fraud area. There, whenever the government or the industry has a issue of major concern to discuss, we would hold an informal meeting. This is an opportunity to share common concerns and question participants on how best to combat fraud. Money laundering, like fraud, is an activity that all groups wish to see eliminated from our nation's financial institutions. Advisory councils and ongoing communications can achieve this result.

THE BANK SECRECY ACT

The Bank Secrecy Act (BSA)[1] remains the cornerstone of all laws utilized against money laundering activities. The list of regulations and policies requiring reporting of bank transaction activities is well known and need not be reiterated here. However, it is clear that there is widespread confusion and uncertainty in and out of government as to which reporting mechanisms are the most efficient methods for aiding appropriate law enforcement drug investigations.

The Currency Transaction Report (CTR) is the most widely known but the most misunderstood form in terms of its effectiveness. In the early 1980's the financial industry filed over 100,000 forms for an entire year. In 1988, the banking industry filed approximately 7,000,000. This dramatic shift can be based on a number of factors. The question remains, however, as to the utility of all the reporting forms for law enforcement purposes.

The entire banking industry is impressed at the diligent efforts of the Treasury Department at developing a system to handle all of the additional reports in a relatively timely manner. However, if you take into consideration the several new reporting requirements created in the last Congress as well as the use of the banking regulatory agency's criminal referral forms, there is an obvious need to sort out all of these requirements. No one in the government appears ready to accept the challenge of reducing unnecessary paperwork in the name of law enforcement.

WIRE TRANSFERS

The commercial banking industry has worked toward virtually eliminating money laundering by cash or currency. However, the trail of illicit profits is hard to follow if done through the use of wire transfers.

The Treasury Department has attempted to aid the banks by issuing an "Advisory Concerning Wire Transfers." This advisory presented some examples of suspicious wire transactions but we need more. A review of the money laundering statutes and how they relate to wire transfers is critical. The

---

[1] 31 U.S.C. 5311-5324.

banking industry can provide the type of information that is available by wire and thus help slow the use of this mechanism for laundering purposes.

It is apparent to most of us in the financial services industry who are involved with transaction tracking and money laundering that the serious money now moves by wire transmission. Although a wire transaction is subject to a CRF report if it is determined to be "suspicious", the nature of the transaction makes it difficult, if not impossible, to analyze for laundering potential. The current regulatory environment is therefore paradoxical: banks are overregulated where the transaction involves currency or monetary instruments, yet the most serious drug-laundering operations have worked hard to minimize the exposure of their currency to U.S. financial institutions. Wire transactions, which are essentially unregulated, have emerged as the primary method by which high volume launderers ply their trade.

The regulatory emphasis must shift, in a logical and reasonable manner, from currency to wire transaction tracking. This will be a difficult task but one which can only be accomplished by the concentrated efforts of the government and the financial services industry.

SIMPLIFICATION OF REPORTING

In order to allow banks to concentrate on being able to recognize and report suspicious currency transactions, the requirements of the BSA regulation need to be simplified. The task force has isolated several of the areas of immediate concern, but a full scale review is necessary.

Only amendments that would significantly reduce the number of unnecessary CTR filings by requiring only meaningful reporting should ever be accepted by the Congress. There is a need to encourage banks to make better use of the exemption process. A thorough review of the Bank Secrecy Act will help to assure that banks are reporting useful and meaningful information to the government.[2]

CLARIFICATION OF THE MONEY LAUNDERING STATUTES

Legislation that created the Money Laundering statutes in 1986 resulted in committed compliance by the banking industry. The new provisions affected day-to-day banking activity. The financial industry and the regulatory agencies worked together in compliance seminars, teleconferences, and developed manuals to educate the industry on the changes to the Bank Secrecy Act and the creation of the money laundering statutes. Many agency officials have indicated that the banking industry has worked efficiently in this area.

We have argued unsuccessfully that any attempt to strengthen or clarify the Money Laundering Control Act of 1986 should include a modification of 18 U.S.C. 1957. This section of the '86 Act, developed to prohibit financial institutions from accepting monies derived from illegal proceeds, warrants modification. Section 1957 of Title 18 prohibits knowingly engaging in virtually any typical banking transaction involving a financial institution in "criminally derived property" with the value exceeding $10,000.

The principal problem that the banking industry has with Section 1957 is that it requires banks to make decisions about the unlawful origin of their customers' monies that bankers are simply not equipped to make. The banker has neither the expertise, the evidence, nor the time to decide whether a customer is engaged in illegal activities in the hours or minutes while a prospective transaction may be pending. This is understandable because such questions typically require highly trained federal prosecutors, months or years of intensive grand jury investigations to decide, and even then the jury may acquit the defendant. In an effort to protect themselves and their banks against criminal prosecution for violating Section 1957, bankers who have any doubt about the suspicious nature of a customer's activities may refuse to do business with an individual. Not only will this deprive many innocent customers of banking services because of some suspicious trait or characteristic, it also exposes banks and bankers to civil litigation from the customers who are erroneously denied banking services. In short, the bankers are more than willing to stop money laundering by refusing to do business with criminals, but they are simply not equipped to identify those individuals.

Bank officers and banking institutions have the obligation to protect customer confidentiality. The liability for inaccurately reporting a customer's affairs and civil and criminal penalties for improper compliance are balanced by financial institutions on a daily basis. Conflicts between federal and state law sometimes complicate effective investigation and prosecution by the government and compliance by financial institutions. This is an additional issue which should be addressed as part of any effective national agenda addressing the drug problem.

The problem will be solved by the addition of an intent element to Section 1957. The inclusion of an intent element will assure bankers that they will not be prosecuted for doing business with a customer that they merely suspect of being engaged in illegal activity. There is a separate question of creating a "safe harbor" for institutions who have reported suspicious transactions and continue to do business with that customer. This issue needs to be addressed by the government so as to encourage awareness and instill confidence as to the scope of an individual's liability.

REPORTS TO THE INDUSTRY

The banking industry needs to know whether or not the "system works" and if our efforts are paying off. Therefore, we would suggest that the government and law enforcement officials quantify and report, on a regular basis, successful prosecutions resulting from the industry's compliance efforts or voluntary action. If bankers knew they that were making a difference, or were helping to solve this problem, there would be an increase in voluntary reporting of suspicious transactions.[3]

The banking industry and the ABA supported most of the legislative efforts aimed at deterring money laundering in 1986. It is therefore frustrating to hear attacks on banking for not accepting each and every legislative proposal offered by a Congress that is often unwilling to get the facts. Knowing that our reporting makes a difference will go a long way toward easing that frustration.

It is important that the banking industry emphasize to its regulators the need to stop the flow of paper, a situation that is reaching epidemic proportion. We will continue to point out all of the examples of voluntary reporting by the industry that have resulted in investigations and/or indictments. The banking industry abhors money laundering and is working extremely hard to eliminate it from within our industry. Emphasis should be placed on activities such as the recent "Operation Polarcap" where Attorney General Thornburgh said: "In most cases, the involvement of U.S. Banks, . . . was one of cooperation in attempting to get to the center of the operations involved. I think individuals within the United States' banking community, . . . performed extraordinary acts of cooperation, recognizing through their own antenna, what precisely was going on with these enormous movements of cash."

THE TASK FORCE

The ABA has created a Money Laundering Task Force. This group, comprised of leading banker experts in the field of bank secrecy, will coordinate all activities that our association has been engaged in during the past several years. The task force will comment on all legislative proposals designed to address the money laundering issue and all court cases, involving the applicable statutes, continuing ABA's long-standing commitment to work with the regulators to make the most of BSA compliance.

This task force is the starting point for active cooperation with the government in jointly eliminating our nation's financial institutions as a place where drug money can go.

ELECTRIC CARS IN HAWAII

Mr. MATSUNAGA. Mr. President, I rise to alert my colleagues from the great State of Michigan to be on notice: Honolulu may well be the automotive capital of our country in the next century.

My reason for this assertion is the success of the University of Hawaii's Electric Car Program, which has recently emerged as the national leader in road endurance. Because of its de-

[2] The banking industry is constantly frustrated at the conflicting signals we receive from the government. There have been good faith attempts by the Treasury to ease reporting through exemption guidelines and other advisory rulings, but this is not enough. We are currently seeking from the Treasury Department clarifications on a number of recent interpretations:

(1) expanding the list of "excepted transactions" under Section 103.22 of the BSA (b) to include certain national and regional retail businesses and other similar qualified businesses; and (2) allow banks unilateral authority to establish a single exemption covering multiple accounts of qualified established depositors.

[3] Former Deputy Assistant Secretary for Law Enforcement at the Treasury Department, Gerald L. Hilsher told an audience in September that:

In my opinion, the Treasury Department has done a poor public relations job in not telling the private sector what the Treasury Department is doing with this information and what kinds of cases the Treasury Department is making. The Treasury Department needs to keep better statistics because although Title 31 convictions are not the only measure of BSA effectiveness, we have not brought forth statistics on other aspects of BSA utility. The federal government has good examples of individual cases brought as a result of BSA compliance, but the Treasury Department, for example, can't state the degree to which BSA compliance has resulted in incresed tax revenues. One of the recommendations that I will be making from this roundtable is to do a better job of tracing Title 31 involvements in criminal and tax cases, so that next year, perhaps, we can bring these statistics to the financial community to show that we do have a program that makes sense.

pendence on imported petroleum for its energy needs, the Aloha State has set out to become the National Renewable Energy Laboratory of the Pacific as it strives to shift from finite to infinite—that is renewable—energy sources. Transportation fuel represents the biggest challenge to us in our transition efforts to renewable energy; hence, our interest in electric and alternative fuel automobiles.

The manager of the university's program in this field is my good friend, D. Richard "Dick" Neill. His work was the subject of a most informative newspaper article last month in the Honolulu Advertiser by science writer Jim Borg which appeared under the headline: "UH Revving Up Research in Practical Electric Cars." The key word here, Mr. President, is the adjective "practical." For the enlightenment of my colleagues and others. I propose that this article be included in the CONGRESSIONAL RECORD and ask that it be printed in full.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UH REVVING UP RESEARCH IN PRACTICAL ELECTRIC CARS

(By Jim Borg)

After a bumpy beginning, the electric car program at the University of Hawaii has emerged as the national leader in road endurance. The program may set the stage for non-gasoline vehicles of the 21st century.

The research is particularly encouraging for Hawaii, where mild temperatures allow batteries to operate at peak efficiency, researchers say.

A battery-powered 1982 Ford "EVcort," an electric version of an Escort station wagon, on one occasion in October ran for an astounding 96 miles between charges, more than twice the expected mileage, said D. Richard Neill, director of the program at the Hawaii Natural Energy Institute. For comparison, circumnavigating the Koolau Mountains is about a 100-mile trip.

The success of Neill's self-avowed "supercar" hangs in part on a system that recharges the batteries whenever the brakes are applied. Neill estimates that half the energy lost going uphill can be recovered going back down.

Some battery problems persist, and the high mileage mark hasn't been repeated. But Neill said there are reasons for renewed optimism in an effort that five years ago was nearly dead.

"Most of the basic problems have been solved in terms of reliability, acceptability and availability," said Neill, who drives the EVcort to and from work, a 16-mile one-way trip between Aiea Heights and the UH Manoa campus. "I'm the winner in the country today."

Upon arriving at either destination, he simply plugs the car into a typical 120-volt AC wall socket. After four hours or so, the batteries are ready to go.

But EV's are not for speed demons.

Cruising at 50 to 55 mph on the highway, the car sucks 100 amps of electrical current. Doubling of the output to 200 amps results in an increase of only 3 mph.

"You use twice as much energy to go 3 to 4 mph faster, so I'm a 100-amp driver," said Neill.

The EVcort can accelerate from 0 to 30 mph in 12 seconds and consumes less than 0.4 kilowatt hours per mile, which translates to a cost of 4 cents per mile. Uphill performance leaves something to be desired: The car makes only 35 mph going up Moanalua Freeway at Red Hill.

The sensation is similar to driving a golf cart or carnival bumper car, with a slight delay in response to touching the pedal. The pollution-free engine makes almost no noise, so a driver must be careful not to forget it's on.

The institute's electric vehicle or "EV" program began in 1981 with money from the U.S. Energy Department. From Jet Industries, the institute acquired 15 vehicles—five Dodge Omni sedans, five Dodge 1400 nine-passenger vans and five Ford Courier pickup trucks. After three or four years, nearly all had sputtered to a permanent halt.

"It was an embarrassment," recalls Neill, who took over the program about two years ago.

Perhaps the most intriguing innovation is the so-called regenerative braking system.

Once the car is moving faster than a crawl, hitting the brake triggers gears that slow the car by making it do work: charging the batteries. It is similar to slowing a car with a standard transmission by shifting into low gear, except that energy is saved, not spent in the process.

"All the energy that normally goes into the brake lining (generating heat) goes into recharging the battery," said Neill.

Neill suspects he damaged the EVcort battery system in attaining the 96-mile record, since its road endurance has since dropped off dramatically. A few charging cycles later, he said, the car was down to a range of 30 miles.

Nationwide, a half dozen new battery technologies are now under study, each with its own tradeoffs of cost, performance and maintenance hassle. Another option is an on-board "range extender," some kind of back-up engine or fuel cell on board that would offer a "limp home capability" if the juice runs low.

Among the most promising technologies are air-aluminum batteries, which are light and don't require recharging. They merely must be watered every 200 miles and have their internal plates changed every 2,000 miles.

That's similar to getting gas every 200 miles and getting a lube job every 2,000 miles, Neill said.

The Hawaii institute now has a fleet of 28 electric vehicles, including five sedans and seven pickups donated by Hawaiian Telephone Co., a subsidiary of GTE; four Jet-Escort sedans from the Navy; and two vehicles from the Energy Department. The institute is now in the process of donating some of the cars to users on Neighbor Islands and to sister research organizations and universities in Hong Kong and China.

Electric cars are not going to end-run the inevitable fossil-fuel crisis in Hawaii as long as electricity is generated by burning oil. The state and Hawaiian Electric Co. hope eventually to trim the reliance on oil with such renewable resources as volcano heat, sunbeams, ocean temperature differences, wind power, and natural gases such as methane.

At Kahuku, for instance, an electric vehicle is recharged by windmill.

The institute also will soon be getting a photovoltaic cell charger that tracks the sun. That will charge the supercar via solar energy with 14 kilowatts over the course of a day, which translates to a 30-mile trip at about 20 to 25 cents per mile. Ultimately, photovoltaic technology is expected to provide juice at 4 cents per mile, Neill said.

Furthermore, battery-powered cars someday will be joined by those that burn methanol, which can be produced from biomass and is less harmful to the environment. The institute operates seven methanol-fueled cars as a demonstration project.

"Although there has been a decline in interest in EVs since the so-called oil glut, each year our country's dependency on imported oil for automobiles and trucks is increasing, so we are more vulnerable to future supply interruptions," Neill and three colleagues said in a recent research summary on the program. The main challenge, they said, is to make the cars viable before the next oil crunch hits.

A HAWAII FIRST

Mr. MATSUNAGA. Mr. President, I rise to commend my good friend, the senior Senator from Vermont [Mr. LEAHY], on his good work in fashioning a rural development legislative package, and to ask that he include me as an original cosponsor, because the problem of lagging growth and high poverty in rural America has been a seriously neglected subject that deserves congressional attention. At the same time, Mr. President, I do wish to correct a statement he made here this afternoon in regard to Vermont being the first State to enact a law banning ozone-damaging chemicals.

It is a fact that the Aloha State, Mr. President, not the Green Mountain State, became the first State in the Union to enact such a ban. As proof, I offer a newspaper story which appeared last Friday in the Honolulu Advertiser by reporter Stu Glauberman. He reports that Hawaii Gov. John Waihee, upon signing such a bill the day before, Thursday, a week ago, placed a phone call to Vermont Gov. Madeleine Kunin to inform her of the fact. The Vermont bill was still awaiting her signature at that time, and Governor Kunin is quoted.

I might add, Mr. President, that the Hawaii law banning the willful release of chemicals that deplete the ozone layer takes effect January 1, 1991, while the Vermont measure becomes effective in 1992, according to the Advertiser account.

In any case, I imagine that other States will follow the lead of Hawaii and Vermont in this area, Mr. President, but I did want to amplify the record on this matter, and for the benefit of my colleagues and others I ask unaminous consent that the Advertiser story be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ISLES FIRST TO BAN OZONE-DAMAGING CHEMICALS

(By Stu Glauberman)

Hawaii has become the first state in the nation to enact a law banning the willful release of chemicals that deplete the ozone layer and contribute to global warming.

A bill signed into law yesterday bans the over-the-counter sale of chlorofluorocarbon refrigerants—now widely sold in pressurized cans—and requires service stations to recover and recycle auto air-conditioner chemicals. It does not take effect until Jan. 1, 1991.

Gov. John Waihee's signature yesterday morning dashed any hopes Vermont might have had of being first to ban chlorofluorocarbon-containing products.

A similar bill is awaiting the signature of Vermont Gov. Madeleine Kunin.

Waihee called Kunin yesterday to tell her Hawaii had beat Vermont to the punch.

When she got the news, Kunin told Waihee: "You should have told me (you were ready to sign), we could have raced."

Vermont's measure isn't set to take effect until 1992. The effective date has been put off in both states to give researchers time to provide workable alternatives to the ozone-depleting products.

Waihee called the new law "Hawaii's contribution" to combating a problem of global significance. He said it was a "pace-setting" measure that would be followed by other states.

State Sen. Mary-Jane McMurdo, who basked in being the "Member" of the ozone-layer bill, said the simple-but-effective measure would significantly decrease the amount of chlorofluorocarbons escaping from air conditioners in Hawaii.

McMurdo said European nations were well ahead of the United States in dealing with the threat from ozone-destroying chemicals. She said she plans to introduce another measure next year to control other emissions.

The Washington-based environmental protection group Friends of the Earth yesterday praised Waihee and McMurdo for their efforts.

"The importance of this legislation will be felt not only in your native state, but throughout the world," said Liz Cook, the group's ozone campaign director.

MARIJUANA PRODUCTION IN THE UNITED STATES

Mr. MOYNIHAN. Mr. President, according to this year's National Narcotics Intelligence Consumers Committee report, United States marijuana production is up 38 percent over last year and the United States is now tied with Mexico as the world's second largest producer of the drug. That the United States is itself a major drug source country should give pause to those who would argue that the solution to our drug problem lies in the jungles of Peru or the waters of the Gulf of Mexico. And that production has increased while enforcement continues to rise should make clear that the drug traffic operates according to ordinary economic principles—principles we must learn to recognize if we are to end the drug crisis.

A Rand Corp. report released in January 1988 concluded that the United States has at last managed—rather expensively—to provide effective tariff protection for one industry: marijuana production. Marijuana is a bulky product. It is more difficult to hide than cocaine, and thus easier to interdict. Interdiction of marijuana acts like a tariff in that it makes it more expensive to import marijuana into the United States. The domestic industry is thus protected from foreign competiton.

American marijuana does not grow in isolated jungles. America is not Peru—leftist guerrillas do not protect marijuana growers from the DEA. The American variety grows on U.S. Government-owned National Forest land, over 1 million acres of which have been taken over by the growers. And yet we have been unable to do anything about the domestic crop. And we will not. A massive increase in enforcement would drive cultivation indoors, where it is already beginning to flourish.

Smugglers who used to bring marijuana into this country now bring cocaine—a safer and more lucrative enterprise. Prohibition had a similar effect. Enforcement tended to favor suppliers of hard liquor over suppliers of less potent beer and wine. Cocaine is close to impossible to interdict. The close to 1,000-percent markup between its wholesale and retail prices allows suppliers to lose shipments without losing profits. And small quantities of the drug can be hidden in commercial cargo—a recent, and chillingly effective adaptation to enforcement.

Interdiction is the most expensive, and perhaps least effective, of our antidrug strategies. Of the five radar blimps we have installed on our borders, each of which costs $18 million, not one caught more than five drug airplanes all last year. During a 3-month period in late 1987 antidrug AWACS flights cost $700,000. They made three arrests.

Mr. President, the war on drugs will be successful when we recognize that it must be fought on the demand side. I ask that an article from today's Washington Post on marijuana production in the United States, and a recent article from the Tampa Tribune-Times be included in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 18, 1989]

DOMESTIC MARIJUANA CROP GROWING

(By Michael Isikoff)

U.S. marijuana growers, thwarting government efforts to destroy their crop, expanded their production by 38 percent last with Mexican growers as the world's second-largest producers of the drug behind Colombia, according to government estimates released yesterday.

At the same time, marijuana prices have reached their highest levels ever—as much as $300 an ounce in some instances—in part because of increased cultivation of sinsemilla, a seedless strain that is far more potent than traditional "commercial grade" marijuana, according to figures in a report by the National Narcotics Intelligence Consumers Committee (NNIC.)

The 101-page NNIC report also states that cocaine prices continued to fall last year and street purity of that drug increased amid signs that worldwide production has reached record levels. Cocaine sold for as low as $11,000 a kilogram in 1988 compared with $30,000 in 1985.

But the panel for the third year in a row decided not to include any estimate of the total cocaine market in the United States. "It would be another piece of speculation," said Thomas G. Byrne, the NNIC chairman who also serves as deputy assistant administrator of the Drug Enforcement Administration's Office of Intelligence.

NNIC, a committee consisting of members from 11 federal agencies, provides the only official government estimate of illicit drug supplies in the country. The report paints a broad portrait of an overall drug problem that is worsening, including a dramatic jump in cocaine-related hospital emergencies reported by the National Institute of Drug Abuse's DAWN system.

The number of such emergencies was projected to claim to 42,491 in 1988—up from 32,578 the year before and about four times the figure only three years earlier.

"What we are trying to get across here is a general trend pattern," Byrne said. "Each one of these things is and of itself doesn't mean a whole hell of a lot."

In recent years, some critics have charged that the NNIC's figures have been influenced as much by political considerations as hard data. This has been particularly true of the domestic marijuana estimates, which critics say have been understated to avoid embarrassing the State Department when it pressures Latin American governments to destroy their drug crops.

However, the new report continues a trend in recent years of gradually increasing the estimate of both the size of the U.S. crop and its proportion of the marijuana consumed in the country. The report estimates U.S. production of marijuana at 4,350 to 4,850 metric tons—more than double the figure from only two years ago and up from 3,000 to 3,500 metric tons last year.

Colombia remains the world's largest producer, with 5,000 to 8,700 metric tons, while Mexico is estimated to produce 4,710 metric tons. U.S. growers now account for about one-fourth of the marijuana available to consumers in this country.

"They're still probably understating it," Said Doug McVay, projects coordinator for the National Organization for the Reform of Marijuana Laws, which has estimated the U.S. crop to be much larger. "The domestic crop is a direct affront to these people * * * because it's easier to view the enemy as a foreign one."

[From the Tampa Tribune-Times]

WATCHFUL SMUGGLERS OUTWIT INADEQUATE TOOLS OF U.S.

(By Ron Bartlett)

TAMPA—Frustrated by the tons of drugs pouring across the borders, U.S. drug warriors sent their most sophisticated radar plane, the AWACS, out to find some smugglers.

Its like trying to drill a gnat with a bazooka.

Designed to spot Soviet bombers screaming across the stratosphere, the AWACS

proved no match for the low-flying, slow-moving dopers. It flat-out missed most of them and spit out reams of useless information on other planes. It cost nearly $10,000 an hour to fly.

AWACS missions cost $700,000 during three months late in 1987. The payoff: three arrests, 2,000 pounds of cocaine.

The most high-tech hardware in the U.S. arsenal has been thrown into battle, but it has malfunctioned or shown limitations.

Chronic wing cracks plague the sophisticated radar planes that are crucial to the strategy of identifying smugglers as they leave Latin America. The planes are sporadically grounded.

No radar planes patrolled off Florida and in the Caribbean for 75 percent of the time last year because law enforcement agencies didn't have enough planes, according to a 1988 congressional report. U.S. agencies refused to say what the current percentage is.

Even if there were more radar planes to spot more suspects, it wouldn't matter. There aren't nearly enough interceptor planes to check them out.

No one knows how many smuggling planes are crossing the borders, but the government estimates 1,300 to 3,500 a year.

The U.S. Customs Service said it seized 72 planes last year. An analysis by Aviation Week and Space Technology, a respected aviation magazine, was less generous.

It said customs and the Coast Guard are catching one or two smugglers a month.

A RADAR FENCE

The blimps are the most controversial tool in the war. The strategy calls for them to form a "picket fence" of radar coverage. They're tethered to fly at 10,000 feet and look for boats and low-flying airplanes that would avoid military radar that scan above that altitude.

But they can't spot the small fiberglass speedboats favored by smugglers. And the dopers simply pass the word on where the blimps are flying and avoid them.

Each blimp costs $18 million, plus $4 million a year to operate.

None of the five along the U.S. border or in the Bahamas caught more than five drug airplanes all last year. The 1988 scorecard:

Kudjoe Key: 10 arrests, 4 airplanes, 33 pounds of marijuana, 0 cocaine.

Cape Canaveral: 4 arrests, 0 airplanes, 0 marijuana, 0 cocaine.

Grand Bahamas Island: 0 arrests, 5 airplanes, 1,225 pounds of marijuana, 0 cocaine.

Fort Huachuca, Ariz.; 6 arrests, 2 airplanes, 2 vehicles, 2,500 pounds of marijuana, 240 pounds of cocaine.

The best showing came from the newest blimp, floated in December at Deming, N.M.: 8 arrests, 5 airplanes, 9 vehicles, 1,300 pounds of marijuana, 2,530 pounds of cocaine.

Drug warriors say the numbers are unimpressive because the blimps have done the job of deterring smugglers. When the blimps went up in the Southeast and the Bahamas, they say, air smuggling into South Florida virtually stopped.

"What are the alternatives?" asked Capt. Jim Leskinovitch, the top Coast Guard official at a Miami command center where the blimps are used to look for drug airplanes.

"If you bring it down, you basically have a sky that's ruled by the smuggler."

JOINING THE BATTLE

Customs joined the air war modestly in 1971 with a $15 million budget and eight surplus Navy planes.

Now it has its own air force. The 1989 air budget is $149 million, with 350 pilots, 88 planes and approval for 107. Its annual interdiction budget has jumped from $122 million in 1981 to $357 million this year.

The Coast Guard's annual interdiction budget increased from $227 million in 1981 to $574 million this year.

The Coast Guard was scoring successes on the waters, seizing 3.5 million pounds of marijuana in 1982. But during the marijuana operations, Coast Guard Adm. Paul Yost realized the dopers had stepped off their boats and into private planes. They were flying over his cutters, and he wasn't about to sit back and watch. In 1986, the Coast Guard jumped into the air war.

The Coast Guard fleet of 41 French-made Falcon jets had been purchased for search and rescue missions and to spot oil pollution. In late 1986, the agency spent $50 million to install forward-looking radar and infrared systems in eight of them. Their new mission: Intercept smugglers.

But engine trouble routinely kept the jets grounded. To keep the interceptors flying, the Coast Guard cannibalized parts from other jets in the fleet and spent an extra $20 million on spare parts and maintenance.

In early 1987, the Navy offered four aging E-2C Hawkeye radar planes to the drug war. When the Navy made the same offer six years earlier, the Coast Guard turned the planes down because they required too much maintenance. But now, both Yost and Customs Commissioner, William Von Raab wanted them.

Congress settled the turf battle with a non-decision: It gave two to customs and two to the Coast Guard. The Pentagon, which wanted all four to go to the Coast Guard, estimated it would cost an extra $16 million to maintain them separately.

Problems with the Hawkeyes surfaced almost immediately. They had endured years of stressful takeoffs and landings from aircraft carriers. Now they had wing cracks. They were grounded.

"Old, almost worn-out aircraft," is how William Rosenblatt, customs' assistant commissoner for enforcement, described them in testimony before Congress in 1988.

"It's plagued the program," said Clark Stuart, director of customs' Surveillance Operations Center. "You can't go out and do your job because the tool that's been given to you is on the ground awaiting major repairs."

Frank Ault, a retired Naval officer and former consultant to customs' air programs, testified in Congress in 1987: "Customs aviation is now about where we were in naval aviation at the end of World War II, and I am being a little generous."

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

OMNIBUS CONGRESSIONAL BUDGET RESOLUTION—CONFERENCE REPORT

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of the conference report on House Concurrent Resolution 106, which the clerk will report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the concurrent resolution (H. Con. Res. 106) setting forth the Congressional Budget for the United States Government for the fiscal years 1990, 1991, and 1992 having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of May 15, 1989.)

Mr. SASSER. Mr. President, I ask unanimous consent that the staff of the Committee on the Budget and its members be allowed to remain on the floor during consideration of the conference report to accompany House Concurrent Resolution 106.

I send to the desk a list of these staff.

The PRESIDING OFFICER. Is there objection?

Hearing no objection, it is so ordered.

Mr. SASSER. Mr. President, I ask unanimous consent that the presence and use of small electronic calculators be permitted on the floor of the Senate during the consideration of the conference report to accompany House Concurrent Resolution 106.

The PRESIDING OFFICER. Is there objection?

Hearing no objection, it is so ordered.

Mr. SASSER. Mr. President, There are some printing errors in the joint statement of the managers in the conference report on the resolution, and in the print of the statement of managers that appeared in the CONGRESSIONAL RECORD on May 15 of this year. I send to the desk an errata sheet and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ERRATA

ERRATA IN THE CONFERENCE REPORT

On page 19, in the table entitled "Conference Agreement Total Budget," under the function "050 National Defense," change the outlay amount for 1990 from "209.2" to "299.2".

ERRATA IN THE CONGRESSIONAL RECORD FOR MAY 15, 1989

On page H1884, column 3, in the table entitled "Conference Agreement Total Budget," under function "050 National Defense," change the outlay amount for 1990 from "209.2" to "299.2".

Mr. SASSER. Mr. President, as a matter of interest, I might tell my colleagues that the error being corrected is one that occurred at the Govern-

ment Printing Office, in which the Department of Defense budget was reduced by $90 billion by the printing error. If that had gone into effect, I suppose it would have been the largest defense cut at one time in the history of this country.

The PRESIDING OFFICER. The Chair appreciates the comments of the Senator from Tennessee.

Mr. SASSER. Mr. President, I anticipate that I will be joined shortly by the distinguished ranking member of the Committee on Budget, Mr. DOMENICI of New Mexico, and I see his able aides and assistants here. So it is indicated that we may proceed with preliminary statements prior to the arrival of the distinguished manager for the minority.

The PRESIDING OFFICER. The Chair will state to the Senator that he certainly may proceed. The time for debate on this conference report is limited to 1 hour, to be equally divided and controlled in the usual form, with an additional 15 minutes allotted to the Senator from Colorado [Mr. ARMSTRONG] and it is under those rules that we are now proceeding, and the Chair recognizes the manager, the Senator from Tennessee.

Mr. SASSER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SASSER. Am I correct in my calculation that there is 1 hour and 15 minutes total on the bill, 15 minutes of that reserved to the Senator from Colorado [Mr. ARMSTRONG], the remaining 60 minutes equally divided between the majority and the minority?

The PRESIDING OFFICER. The Senator is correct in his parliamentary inquiry.

Mr. SASSER. I thank the Chair.

Mr. President, I rise to bring to the floor the conference agreement on the 1990 budget resolution, and I wish to take this occasion to urge all of my colleagues on both sides of the aisle to join with the leadership of both Houses of the Congress, the President of the United States, and the budget negotiators in supporting this bipartisan budget resolution, or, more specifically, to support this conference report which is a product of the bipartisan budget resolution. This conference report was adopted by our colleagues in the House of Representatives yesterday by a substantial margin.

I once again ask for my colleagues' support because I quite sincerely believe that voting for this resolution is the only responsible course of action in this particular year at this particular juncture in our history.

I say that despite the fact that I frankly agree with many of my colleagues here in the Senate on both sides of the aisle that this conference report does not solve the deficit crisis. It is, in many respects, I think, merely a prelude to the difficult decisions that lie ahead for us all.

We have heard, during the prior floor debate on this issue, an extended discussion of what this resolution does and what it does not do. I think it would be surplusage to recount the achievements of the bipartisan agreement at this point except I would say that this conference report, which is a product of that agreement, does restrain spending. We continue the trend line of the deficit going down both in real dollars and as a percentage of gross national product. We do break with the partisan confusion that has paralyzed our fiscal policy over the past several years.

Those are the things that this conference report does. As for what it fails to do, I think we are all in substantial agreement. It does not represent the kind of bold deficit reduction that many of our colleagues, including myself, would prefer. We do not have to get deeply into the numbers to agree on that fact.

But I do want to say a few words about the reasons for our failure to take a bolder approach this year, because I believe the forces underlying this budget tell us a great deal about the challenge we are going to face next year.

Mr. President, I think it is abundantly clear that for fiscal year 1990 there simply is no broad consensus in this body in favor of either higher taxes or deeper spending cuts. I would also submit that there is no broad consensus among the American people at this point on either of those approaches on how to deal with the deficit.

In fact, the truth is that the reverse is the case. There is an absolute and categorical prohibition imposed by the President of the United States on virtually every dramatically effective deficit reduction measure that we could take this year.

In fiscal 1990, there will be no taxes. We will not tamper with Social Security. We will largely maintain the defense budget. We will have new initiatives in education, in drug enforcement, the environment, and child care.

Now, that is the agenda for which the American people overwhelmingly cast their ballots last year. If there is a fundamental contradiction, and I think there is, among these various propositions, then, if there is such a contradiction, I would submit to my colleagues that only the Chief Executive Officer of this Government, the President, can provide the necessary leadership to resolve these inherent contradictions.

In short, if there are to be new taxes, the President is going to have to call for them. He is going to have to call for them either by himself or in conjunction with the Congress.

If there are to be deep cuts in domestic programs, or deep cuts in entitlements, then the President is going to have to explain to the American people why the vision of needs and priorities that he offered during the campaign and that he reaffirmed in his State of the Union Message to the Congress and to the American people cannot be realized.

What we have done this year within the constraints I have just outlined is simply to make a beginning. No one is attempting to claim that this is the final chapter in our efforts to reduce the Federal deficit. No single plan that we adopt this year will bring about a conclusive victory in the deficit battle.

But as we approach this vote on final passage for this conference report, I cannot overstate the importance of this crucial stage in the fiscal history of our Nation. This agreement represents the condition precedent to ultimate fiscal responsibility.

We have built into the bipartisan budget agreement a clause, section 13, that requires the negotiators from the administration, the House and the Senate, to begin negotiations as soon as possible. It is my very real hope that, when we reconvene, we can reach another bipartisan agreement, an agreement that can be reached with the full support and collaboration of the members of the Senate Budget Committee from both sides of the aisle, an agreement that can be reached with the full collaboration of the leadership of the U.S. Senate and one for which Senators from both sides of the aisle will be proud to vote, without the qualms and skepticism that, frankly, have encumbered this resolution.

That is what we aim for, but we should make no mistake, taking more decisive action is not an option, in my judgment, Mr. President; it is a necessity.

The Gramm-Rudman-Hollings target for fiscal 1991 is $64 billion. Reaching that target is going to require that we build on this work. It's going to require compromise. It's going to require concerted action. It's going to require a willingness on the part of all the differing parties to make some tough political choices.

Mr. President, some 4 months back, when President Bush gave his inaugural address outside the Capitol, he reached out a hand of cooperation to the Congress and to the leadership of my party.

Today, we have the opportunity to accept that offer of bipartisanship and goodwill. It's my hope that, by passing this resolution overwhelmingly, we will do just that, and that we will demonstrate the Congress' willingness to work constructively with the executive branch.

In that spirit, we have pushed forward this year, but we have pushed forward within rigorous and unyielding boundaries.

I would say to my colleagues that next year and in the years ahead, there will be no room for inflexibility and intransigence. There will be no room for iron constraints and unconditional demands.

If negotiations are to be successful in the years ahead, the iron walls are going to have to come down. We will have to come to the bargaining table without predisposition.

I believe we can do those things. And I ask my colleagues to give us that chance. Vote for this resolution and give us the opportunity to take a bold step toward fiscal responsibility.

Mr. President, may I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator has consumed 12 minutes and 30 seconds.

Mr. SASSER. Mr. President, I wish to reserve the remainder of my time at this juncture and defer to the distinguished ranking member of the committee, Senator DOMENICI, for any comments or observations that he might wish to make.

Mr. DOMENICI. I thank the Chairman very much.

The PRESIDING OFFICER. The Senator reserves his time.

The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Under the consent order am I in control of the time on this side and if so how much do we have?

The PRESIDING OFFICER. Under the consent order the time limit was 1 hour to be equally divided between the manager on behalf of the bill, Mr. SASSER, and yourself, with 15 minutes allocated to the Senator from Colorado [Mr. ARMSTRONG]. That was not to count against either time.

So there is really a 3 partite time bases which the managers will perhaps wish to discuss with Mr. ARMSTRONG when he receives his 15 minutes, but the full 30 minutes of debate allocated to the minority position is under the control of the Senator from New Mexico.

Mr. DOMENICI. I thank the Chair.

I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. DOMENICI. I will be brief, Mr. President. Let me first congratulate Chairman SASSER again on this, his first conference agreement on a budget resolution. Whatever else is said about this agreement, it is on time, and for that, the Senate, the Congress, and the President, owe a debt of gratitude to the new chairman.

For his sake, indeed for all of us, I hope his future budget resolutions are as timely, and as bipartisan as this his first one has been.

But, Mr. President, I believe the chairman knows that this has been a unique year for preparing a budget. And while I sincerely hope that the bipartisan, bicameral, Presidential involvement will continue for the budgets to come, please understand when I say "it probably ain't gonna be that easy."

I pledge my best to work toward helping to replicate the bipartisan spirit that brought us this conference agreement this year. But I must confess, it is going to be difficult in the future.

A lot has been written about this budget agreement, editorials have generally been uncomplimentary. I too have not been enamored with the agreement we reached, but I do not believe that those who are so quick to fault this agreement appreciate the uniqueness of having effectively reformed the process in producing this agreement.

No one should cavalierly dismiss the importance and potential long-term benefit of establishing a process that brings all the parties into the negotiations early and quickly.

Those who want to focus only on the numbers, I respectfully suggest, may have missed the real accomplishment of this first budget of the 101st Congress and the first budget of the 41st President of the United States.

For the new Members of the Senate, I understand your frustation. But please give those of us who have been at this process for some time the benefit of the doubt. The process used to achieve this 1990 budget resolution is historic and it will prove essential to doing the things that you and I want for future fiscal policy in this country.

And for those older Members of the Senate, who feel that even with this new process, the bottom line is not good enough, I ask you to think with me about the alternatives. Mr. President, we are so used to budget debates that are confrontational, we seem to think that unless we are fighting—Republicans, Democrats and the administration—then we must not be really doing anything.

There are others, including my friends in the fourth estate, who believe deficit reduction cannot be real unless a massive tax increase is imposed on the American public. For them, the $5.3 billion in revenue increases assumed in this resolution is nothing. Tell that to the Finance and Ways and Means Committees.

There are others who believe that deficit reduction cannot be real unless there is a massive cut in our national security expenditures. Tell that to the Armed Services Committees and the Defense Appropriations Subcommittees when they start the process of reporting authorization and appropriation bills that will require a fifth straight year of negative real growth.

There are those who believe we should do more in the entitlement area. I am one of those. But don't let it be said that there are not restraints on entitlements in this budget. Achieving $2.7 billion in Medicare savings, about half what President Reagan and President Bush requested, will not be easy. Achieving another $7.1 billion in reconciliation spending cuts—excluding the Postal Service off-budget treatment—will not be easy.

So while there are things in this conference agreement each of us fault, I suggest we agree today to do what we have agreed to do. Who knows, we may find it isn't as simple—not all "smoke and mirrors"—as some would have us believe.

Once we accomplish what we agreed to do, I believe we will discover that we will have actually done quite a lot. We will have continued the slow process toward fiscal discipline. No one is claiming we have won the battle, but for the first time in the first year of the Bush administration, we are on the same side. That, Mr. President, is one heck of a marvelous achievement.

Mr. President, again, might I congratulate the new chairman of the Budget Committee, the distinguished senior Senator from Tennessee [Mr. SASSER] for his work on this budget resolution and on this process.

I believe his chairmanship has got this process off to a very good start. Because of this process, the fiscal problems of this country are much more apt to be resolved over the next 3 to 5 years in a manner that is healthy for the American people. We are too prone to say healthy for the economy. I believe they are the same thing. In fact, I think it is probably one of the things that we do not understand as a people.

We try to talk about the problems in the country as if they might belong to certain people, but when we talk about a growing American economy, we do not really think that that is the people's doings. People are not quite so sure that they ought to be concerned about American business, because that is sort of business' problem, it is not America's problem.

So I believe what we are doing here is a first step in righting one inhibitor to America's growing economy, the deficit.

Let me just say there are many critics of this proposal this year. There will be a lot of Senators come down and vote no, and I have great respect for them. I am very hopeful, however, that at least 1 more than 50 will vote "aye" so we will get it passed. And I think that will be the case.

Mr. Presidnt, first, let me talk about a much made statement that this budget is filled with smoke and mirrors. Well, Mr. President, and Members of the Senate, when we are finished here and the Congress of the United States has this budget in front of them, they are going to have to do the things that it says. And I am certain that we have not seen the last of the moaning, of the consternation, of the frustration as they try to do it.

And I am sure when we answer them, "Why, there is nothing to this budget; it is all smoke and mirrors," that we are going to find out that a number of committees that have to implement this are not going to be so sure that the entitlements that they have to save money on are smoke and mirrors. When that Finance Committee and Ways and Means Committee have to meet and find the revenues, change some programs to save money, take a look at Medicare and say how do we cause that huge increase of 13, 14 percent that is automatically built into get chopped down by 1½ or 2 percent, I am sure they are not going to say it is smoke and mirrors.

Mr. President, from my standpoint, the reason we ought to vote for this is threefold: First, it has a real chance of meeting the Gramm-Rudman targets come July or August if we implement it as stated. No small achievement. That means we do not have an across-the-board chopping up of the Federal programs under the planned train wreck of the Gramm-Rudman enforcement mechanism.

Second, on the spending side we have not precipitously acted against our national defense interests. If you listen to some people, they already assume Russia has disappeared. They already assume that the millions of tanks and hundreds of thousands of nuclear weapons, airplanes and submarines, that they have disappeared from the face of the Earth.

Well, because of President Reagan, we negotiated an arms reduction and we are going to save money, and that was because we worked together. But clearly the United States of America and our people have worked too hard and spent too much money to have a world that is free and a world that does not have the undue pressure of the Soviet-type system to make a big mistake now. And while this is a tight defense budget, it is a rather prudent recognition of the changing world. It is sort of saying, yes, it is changing but let us make sure we see the change before we do anything radical that might be disastrous.

Further we all know that there are a number of program initiatives that will require additional money. It is now in the hands of appropriators of the U.S. House of Representatives and the U.S. Senate. And I am not going to stand here and say that they will increase education as much as we recommend here, but there is plenty of money for them to do some additional innovative and exciting things in education.

In the area of nuclear cleanup, in the areas of the environment and of drugs and drug prevention, if they want to spend the money that we put in this budget, they can make a real significant contribution.

So on those two fronts, as my second point, this budget does a good job.

And, incidentally, while we are at it, for those who think this is a budget, the inference might be, that it is for fiscally restrained times excessive on the expenditure side, let me repeat: The entire expenditure package of the U.S. Government is growing at somewhere between 2 and 2.5 percent. Now, I will acknowledge that is not a cut, but that is in nominal terms. If inflation is 4, it is growing at 2 percent less than inflation. So everyone will know, that is not the lowest ever, but it is a long, long way from the average of the last 20 years, when it was about 8 to 10 percent. So we are indeed somewhat prudent on the expenditure side.

My last point, Mr. President—and I predict that what I say would happen if we did not do this. We have reached a point, in this Senator's opinion, where, in order to have a dramatic, if that is what we want to do, impact on the deficit in a permanent way, none of the so-called smoke and mirrors that are part of this process, the only way it will be done is if Democrats and Republicans, in their leadership role are joined by a President with a plan. I am absolutely convinced that we have reached a point where the majority party in the Senate and the House cannot do it or will not do it. And that is the nature of it.

The issues that have to be addressed cannot be addressed under our system by the majority party acting alone. Now it should be logical, and it is, that if they cannot, the Republicans could not do it. And it should be equally logical that the President could not do it. So we engaged ourselves in a very good first step at seeing whether we could do it together. This was our first venture in Democrats, Republicans, and a President locking arms and saying "Let's negotiate, let's analyze together, and let's agree together."

Mr. President, that has not happened before. We did not change any laws to get it there. It is done under the umbrella of the leadership of both parties here and the head of the Republican Party, the President, and chairmen from both sides of the aisle in both parties agreeing to do it this way. And now they are going to enforce it.

Many new things have occurred. We did the work jointly, the House and Senate. That is a historic first. We had the President in on the negotiating. That is a historic first. And then, we had an agreement from the leadership saying: Do it this way and we will enforce it.

Now, if ever there was a format that is standing there, waiting for the second step, it is that format. Without that format the second step, the so-called 1991 big budget reduction package, taking the next step, I believe, will never be done. I believe it was worthwhile to test the waters, to try that. A great deal of understanding, of genuine credibility has been created between both sides of the aisle and both Houses, and we are all human beings, and a President which we have not had in this process of deficit reduction before.

So, for those three reasons, Mr. President, I am going to support this, as I have in putting it together. I have no false impressions about it. It is not a structural change in the American fiscal policy such that we can say with certainty it solves the deficit. It is a far cry from that. But I believe in our great democracy, with two great parties in two great Houses and many committees, to get this much put together, walking that first big step, waiting to take the next one, is worthwhile. And I think we ought to start on the next step as soon as possible.

I think we ought to start analyzing, looking at all the options, making our assumptions, and we ought to start doing that rather quickly.

With that, Mr. President, I thank the Chairman, again, for his work. I thank the members of the committee who have helped us. And, indeed, I even thank those who have been critics. I believe their criticism has been legitimate, for the most part. But it is quite obvious that nobody has a better plan.

Finally, and I know this is not believed by some, but I honestly think without this we would have no budget and, in about 6 months under the hammer of a sequester, we would get one. And I believe it would look just about like this, just about like this. Because we would try to avoid the sequester, avoid the Gramm-Rudman impact. And this is about what we would have put forward 6 months later with total chaos and frustration in the meantime. And I do not think any of that would have yielded any results.

If chaos will yield something better, much better—maybe we should have waited. I do not believe it would have.

I yield the floor.

The PRESIDING OFFICER. The Senator has yielded the floor. Who seeks time?

The Senator from Tennessee is recognized.

Mr. SASSER. Mr. President, I note we have been joined by the distinguished Senator from Illinois who

wishes to speak on this conference report. I yield 5 minutes to my distinguished friend from Illinois.

The PRESIDING OFFICER (Ms. MIKULSKI). The Senator from Illinois is recognized for 5 minutes.

Mr. SIMON. I thank the chairman of the committee, Senator SASSER. I want to commend both Senator SASSER and Senator DOMENICI for working on this legislation that is a massive piece of compromise. Any major piece of legislation is compromise. But there is nothing that is more of a compromise than the budget.

I am going to vote for the resolution with some misgivings and I will explain these misgivings in just a moment. But I think Senator DOMENICI probably summed it up pretty well just a moment ago when he said if we did not approve this, we would end up with chaos and then the net result, considering where Congress is, where the President is, would not be substantially different from where we are right now.

Having said that, I do have some misgivings, Madam President.

One is we are assuming some unrealistic figures in here, in particular the figure on interest. To assume that interest rates next year are going to be 5.5 percent, I would love to believe it, but it is just not going to happen and we know it.

No. 2, we are ducking the deficit again. We find all kinds of reasons, year after year after year, to duck the deficit problem. Last year we said: Let us wait until this year, when we have a new President. This year the people who speak for the administration are whispering to us: The President cannot do anything significant about the deficit this year because he made these statements last year about "read my lips." So, they say: Next year let us face the deficit problem.

Next year the House is going to be up for reelection and one-third of the Senate will be up for reelection. We may find another reason for continuing to fail to face the deficit.

One of the things that is happening, and my friend from Tennessee and the staff know of my concern here is that we list interest as net interest. The real figure is gross interest; what we are spending. And the gross interest figure for next year is going to be $262.5 billion, even assuming the rosy scenario of this administration. The fastest growing item in the budget is interest. And 2 years out, if the present trends continue, in all probability for the first time in the Nation's history the No. 1 expenditure of the Federal Government is not going to be defense, it is going to be interest.

I think we have to face up to this thing. We are living on a massive credit card, saying "send the bill to our children and our grandchildren," and we have to stop it.

Then, No. 3, Madam President, I am concerned that we are not shifting the priorities as we ought to. This budget permits the Nation to continue to be No. 1 in defense, in terms of military power. I want us to be strong militarily. But I want to see a budget one of these days that will permit us to be No. 1 in the field of education. We are making progress and I have to credit my colleagues, Senator SASSER and Senator DOMENICI for this. We are making some progress. We are permitting some growth. But this morning I had breakfast with a group of attorneys in New York City at one of the major law firms of this Nation, Skadden Arps, and the very first question out of the box was: When are we going to devote the kind of national resources we ought to for the kind of school crisis we have in New York City? When, indeed, are we going to do it? We ought to be doing it in New York City, in Chicago, in Baltimore, in the other great cities of this Nation.

When we look at the school dropout rate in this Nation, 28 percent compared to 2 percent in Japan, and you recognize Japan is our No. 1 economic competitor, you have to recognize we are going to have to do something. Twenty-eight percent dropout rate here, and in every major urban center the figures are much more dramatic. I see the President is about to tell me my time is up. I am going to vote for this resolution but I do it hoping that within a year or two we will face up to our deficit problems, we will have realistic economic assumptions and we will make education a priority in this Nation that it ought to be.

The PRESIDING OFFICER. Who yields time?

Mr. SASSER. Madam President, we yield 5 minutes to the distinguished Senator from New Jersey.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. I want to compliment the chairman of the Budget Committee, the Senator from Tennessee and the ranking member, the Senator from New Mexico, for a job well done. It is with, therefore, some reluctance that I admit here that I am not satisfied with the final product. I supported the budget resolution when it passed the Senate. I thought it was based on rosy economic assumptions. And, while it provided an increase in domestic discretionary spending, it fell short of many of the Nation's real needs.

Despite these shortcomings I supported the resolution because I wanted to avoid a sequester. Also, I wanted to support the leadership. They worked very, very hard and negotiated in good faith with all parties and got an agreement with the administration in the hope that an early budget accord for fiscal year 1990, even if imperfect, would help launch serious budget negotiations for fiscal year 1991 and beyond that.

I have no doubt that his budget resolution will be adopted. Madam President, I did not sign the budget conference report, and I feel compelled today to cast a "no" vote against the conference report. There is much in the agreement that I support, but there are serious shortcomings. Total domestic discretionary spending remains inadequate. As a result, there simply will not be enough money to do what is needed to educate our kids, to fight drugs, to house our people and, of course, the list goes beyond that.

But today as chairman of the Transportation Appropriations Subcommittee who is going to have to deal in a very real way with the hard reality of funding shortfalls, and I might add with scores of requests from individual Senators, I want to focus on transportation which fared poorly especially in the conference.

Madam President, under the Reagan administration, an awesome assault took place on Federal transportation programs. Mass transit has been cut by 20 percent since 1982. In real terms, Amtrak has been cut in half since 1981.

The results of these kinds of cuts is a transportation infrastructure that looks like a house filled with termites. From the outside it looks terrific; inside, it is coming apart.

Scrimping on transportation, Madam President, is pennywise and poundfoolish. This country already has made major investments in roads, rail, and air transportation. We made these investments because we recognized their importance to economic development and the well-being of our people, but in the 1980's, we have been unwilling to maintain these investments. Last year, the National Council on Public Works Improvements gave the country a mediocre grade of "C" when it comes to investing in transportation. Unfortunately, this conference report only continues the disturbing negligence of the past, and I briefly want to review the transportation budget.

The administration has asked for significant increases in several areas. For instance, the President wants more than $700 million over the CBO fiscal year 1990 baseline for the Federal Aviation Administration and more than $400 million over baseline for the Coast Guard, but to pay for these increases, the President proposes to eliminate or drastically cut vital programs like Amtrak, essential air service, and mass transit. All together, the President's requested increases amount to more than $1.8 billion in budget authority over the CBO baseline for fiscal year 1990. Yet this conference agreement would actually cut budget authority by $100 million. That

leaves the transportation function about $1.9 billion short of meeting the President's request. The conference agreement's recommended funding level would leave the Transportation Subcommittee with very few options. Sure, we could simply refuse to meet the President's request for FAA and the Coast Guard. That would be underfunding air safety, air security, antidrug, antipollution, and boating safety efforts, and I cannot support that.

Alternatively, we could eliminate grants to Amtrak, and the distinguished President knows what that would mean if we were to take that kind of drastic action. I cannot support that. Amtrak is an essential component of the Nation's transportation system.

Where else could we turn? It is hard to see how essential air service could avoid the ax, or mass transit. Again, even if we completely abolished the mass transit formula grant programs, as the President wants, we would still be hundreds of millions of dollars short of the needed cuts.

Unfortunately, despite their efforts, the conference committee simply accepted the House's proposed total levels for transportation—which were about $500 million less than the Senate's level in budget authority, and $100 million less in outlays.

These levels are grossly insufficient to meet the country's transportation needs.

Madam President, if the resolution's funding level for transportation is not increased in the 302(b) process, I am going to have to say "no" to a lot of unhappy Senators. Members who want more money for new airports will be going back to their States empty handed. Those who want new capital improvements for Amtrak may find that Amtrak funding has to be scaled back. Senators seeking funding for new roads and bridges—or for improved maintenance of existing infrastructure—may face cuts instead. And those who complain about air traffic delays may find that we are unable to provide the controllers needed to keep the air traffic moving.

Madam President, we are just going to have do do much better than this in the 302(b) process. We simply cannot afford to continue our neglect of transportation.

That is why I feel I have no choice but to oppose this conference report.

Mr. SASSER. Madam President, I thank the distinguished Senator from New Jersey for his comments. Just let me say we have been sympathetic with the case that my distinguished friend from New Jersey makes on behalf of the transportation needs of this country. He has fought a long, hard, and valiant battle as chairman of the Transportation Appropriations Subcommittee to see that we have a safe and efficient transportation system here in the United States. But what the Senator from New Jersey is saying, I think, reflects in microcosm the difficulties we have in putting the budget together.

As my friend from New Mexico has stated, many of our colleagues are indicating that this budget is not satisfactory. It is not satisfactory because it does not take a bold enough approach in reducing the deficit. But what we see are many of our colleagues coming to the floor and saying to us, publicly and privately, that we need more for these particular programs that are essential for the well-being of the American people, and they are right. No question about it. But the problem is the resources just are not adequate enough to go around. So we have one of two ways to go: We can either substantially increase revenues; we can cut spending substantially; or perhaps a middle ground is the combination of the two.

We had a substitute budget resolution submitted here on the floor which cut more from spending than the resolution that was approved by an overwhelming margin. It added more by way of revenues, taxes than the resolution that we have offered, and that substitute got, if memory serves me correctly, 18 votes and that is all. About 81 or 82 Members of this U.S. Senate voted against it.

My friend, the distinguished Senator from New Mexico, is entirely right. If we had not negotiated this budget resolution, chaos would have prevailed and there would have been bitterness between the executive and the legislative branches; finger-pointing and name-calling would have stymied the action here of the legislative branch. Finally, with the financial markets going into a state of collapse, but certainly with sequester looking us right in the eye, we would have come back here and produced a budget resolution, I submit, almost identical to the one that we have presented here.

So, Madam President, nobody pretends that this conference report that we have here today is perfect. Nobody contends that it could not be improved, and nobody contends that the deficit should not be reduced more. But what we are saying is, given the parameters that we had to confine ourselves to and within which we had to operate, given the views of the administration that there should be no new taxes, no new revenues, but at the same time there ought to be increases in certain domestic programs which were justified, and I applaud the President for indicating there should be increases in education and other very needed programs, this is the best compromise that can be fashioned given the circumstances under which we had to operate.

Madam President, may I inquire how much time I have left?

The PRESIDING OFFICER. About 2½ minutes.

Mr. SASSER. Madam President, I see the distinguished Senator from Wisconsin on his feet. I only have 2½ minutes, they tell me. Could I yield the distinguished Senator 1½ of those 2½ minutes?

Mr. KOHL. Madam President, the conference report before us today accomplishes many good things.

Unfortunately, it fails to make progress against the main problem it was intended to address, the deficit. I therefore will oppose this legislation.

The negotiators insist this is the best deal they can get for fiscal year 1990. We are told that real deficit reduction will come next year. This budget just sets the stage and creates goodwill between the negotiators for that great day when they sit down and really take some action.

I call this the "blind third base coach" approach to budget negotiations.

Congress comes to bat. We look down the third base line to get our signal. The negotiators give us the sign to bunt. We are told to make a sacrifice bunt with this budget to advance the runner, next year's budget.

Madam President, unfortunately, it is the bottom of the ninth inning, we are down 15 to zip and the bases are empty.

We do not need a bunt. We need to stop playing the game.

By failing to take serious action today, we only make our job next year more difficult. Why did we not negotiate more toughly? Why did we not walk away from the table if the White House refused to get serious?

Madam President, I do not know the answers to those questions. I do find it ironic, however, that we displayed such toughness on the minimum wage, but caved in so easily with the budget. I want our leaders to fight as fiercely for deficit reduction as they did for the increased minimum wage.

But my opinion has not carried the day. Instead, we are just going to coast along. That is an assessment shared by many across the country. Madam President, let me just mention a few of the newspapers that have recognized how little this budget resolution does:

The Wisconsin State Journal;

The New York Times;

The Philadelphia Inquirer;

The Washington Post;

The Chicago Tribune;

The Minneapolis/St. Paul Star Tribune;

The Memphis Commercial Appeal;

The Los Angeles Times; and

The Washington Times.

I ask unanimous consent that the editorials from each of these papers be

printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. KOHL. Madam President, I wish the White House and congressional negotiators well in their coming discussions. With this budget, Congress has complied with their wish to have relatively little pain in fiscal year 1990. Reports from yesterday's meeting indicate that the President wasn't bubbling over with gratitude for our willingness to play along this year.

I only wish I was surprised.

[From the Wisconsin State Journal, May 3, 1989]

BUDGET TRICKERY CAN'T LAST FOREVER

More than 20 years ago, when President Lyndon B. Johnson was trying to pay for the "butter" of the Great Society and the "guns" of the Vietnam War, he came up with an accounting trick that helped to hide the hard fiscal facts. He included in the federal budget both the income and the cost of Social Security, thus using the reserve in Social Security trust funds to mask—on paper only—a growing imbalance in the general budget.

Johnson's creative accounting planted the seeds of deficit spending that have grown to ominous beanstalks today. Worse yet, LBJ's practice of using Social Security surpluses to gloss over general budget shortages has been elevated to an art form.

The House and Senate budget bills being debated in Washington this week promise to hold the annual deficit to $100 billion for fiscal 1990, down sharply from the $220-billion peaks of just a few years ago. Good news? Not entirely, because a $68-billion reserve in Social Security trust funds is being used in the budgets to cover the day-to-day operating deficit of the federal government.

This is money that is supposed to be saved for the next century to finance the retirements of the baby-boom generation, a group that is paying stiff Social Security taxes now in hopes of getting a fair return later.

The Social Security reserve isn't being spent—that would be patently illegal—but an inordinate amount is being invested in U.S. Treasury securities. The Treasury then uses the securities to help pay government bills not paid by general taxes and revenues.

It is a classic example of robbing Peter to pay Paul. Just as the lands of St. Peter's Cathedral at Westminster were appropriated to pay for the repair of St. Paul's of London 450 years ago, the Social Security fund is being used to "repair" the federal deficit. But these repairs won't stand the test of time.

On paper, it works. In practice, it only delays the inevitable pain of facing up to the root cause of the federal deficit—government spending that exceeds revenues.

So long as the Social Security reserves are being diverted, there will be less pressure on Congress and President Bush to face up to that reality.

Some members of Congress will try this week to win approval of a non-binding amendment that calls for changing how the deficit is calculated after 1990 so that Social Security reserves aren't included in the bottom line. It is time for honesty in government accounting methods, not ratification of a Washington shell game first played more than two decades ago.

COOKED BOOKS

(By Peter Milius)

The other day President Bush announced from the Agriculture Department that he was speeding up $850 million in income support payments to help sustain farmers still feeling the harsh effects of last summer's drought.

That was a wise and generous decision, and further proof of what an advantage it is to have an experienced president who knows how to make economical use of the funds at his disposal. Just a few days before, the White House had made the opposite use of the same $850 million. The speeding-up of the payments had been construed by the president, his budget director and congressional leaders as a example not of generosity but of restraint. If was part of their budget agreement; by moving the money from fiscal 1990, when it normally would have been paid, to the current year, they were able to claim that they cut the 1990 budget deficit.

Fakery has become almost as important a federal budget item in recent years as Social Security, defense and interest on the debt; the only thing it lacks is its own account. The elected branches have both renounced the deficit, but not the tempting stuff that makes it up. Every year they take the pledge, but seldom do they make it out of the station. To keep up appearances, they have developed an elaborate set of conventions for cooking the books. Here are five of the basic techniques.

1. Spend the money faster: The Gramm-Rudman spotlight, which currently determines how the game is played, is always focused on the year ahead. A year only matters until it starts; then no one pays any attention any more. The idea is therefore to do wherever possible what the budget negotiators did with those farm support payments. You move them from next year into this; you make the recipients happier, not sadder; yet you get credit for a cut and having inflicted pain. The Defense Department over the years has been especially adept at this. A lot of defense spending in any year is the result of accumulated prior-year appropriations on major projects; it takes several years after funds are approved for an aircraft carrier to be built and fully paid for. Defense spending estimates for any year thus depend arcanely on what are called spend-out rates; money sloshes among fiscal years all the time. The department can almost decree that a few billion dollars will be spent this year instead of next, and who is to dispute it?

2. Say you will spend the money slower: This is the opposite of Method 1; it has the same effect, not of reducing spending but of moving or seeming to move it to another year. Here again the slow-spending items in the Pentagon budget have been a favorite playing field. The Reagan administration regularly argued that it was possible to fit an expansive program into a tight budget because the full spending effect of so many parts of the program would not be felt until later. Part of the Pentagon's problem this year and next is that later has finally arrived. But the same sort of thing is regularly done on a smaller scale in domestic spending. In the budget agreement between the president and Congress, domestic spending authority would rise billions of dollars more than actual spending next year; the balance would be deferred. That offers members the best of all possible worlds; they can vote to expand the programs—the space program, for example—and appear to be restraining the spending all at the same time.

3. Just don't count it. That's what they're going to do with the savings and loan bailout: it's too painful to contemplate, so they put it "off-budget." means; you look the other way. In the current agreement, about $2 billion would be saved by moving the postal service off-budget; it will have about that large a deficit next year while awaiting approval of an increase in the price of a stamp. Congress has earlier put the cost of bailing out the farm credit system off-budget, too, then thought better of it and agreed, beginning next year, to put the cost back on. The negotiators "saved" about $450 million simply be abandoning that fleeting good intention and agreeing to keep the cost uncounted.

4. Count the same savings over and over again. If you adopt a provision to cut the deficit but with a time limit so that it is effective for only, say, a year, when the year is up you can adopt it again. Nothing changes, but you get credit for a second savings. A couple of years ago Congress voted to limit the part of Medicare payments that reimburses hospitals for their capital costs. The limit expires this year. By merely voting to extend it, Congress will be credited with between a fourth and a third of the 2.7 billion it has agreed to cut next year from Medicare. Recent budgets have abounded with such examples.

5. Make it up. If all else fails, you merely assert that a savings will occur, or already has. The agreement between Mr. Bush and Congress picks up half a billion dollars by a declaration that taxes will be better collected next fiscal year, a like amount by saying the welfare rolls will be better policed and, in a moment of maximum inspiration, about the same amount by writing off the food stamps that are estimated to have been issued but lost and not cashed over the years.

There are other devices, of course. For the privatizers in the Reagan administration, whose fondest dream was that the government would disappear anyway, asset sales were always a favorite, and they continue to be; about a fifth of the deficit reduction in the current plan would be achieved through such bargains.

The result of all these illusory savings year after year is no savings at all. Gramm-Rudman calls for declining deficits; that was the great pledge that President Reagan and Congress took when they adopted the process. The original schedule was to reduce the deficit in stages, so that it would be $72 billion this year on the way to balance in fiscal 1992. For several years we were solemnly assured that this schedule would be met; then it was revised to ease the pressure before the last election, and we were assured the revised schedule would be met. That called for a deficit of $136 billion this year. In fact the deficit this year is likely to be more than $160 billion, not down from the two years before at all, but up a little. For next year, though, they say they'll get it down to $100 billion, and if you believe that, they have a bridge they'd like to sell you. It's part of their program of asset sales. When you're cutting the deficit as hard as these people are, you can't afford to overlook a thing.

DEFICIT DEAL FALLS SHORT OF BUSH PLEDGES

(By David Hoffman and Paul Blustein)

During his campaign last year, President, Bush promised to "solve this problem" of the federal budget deficit by engaging in "decisive deficit negotiations" with Congress.

Bush also vowed to accomplish that goal by curbing domestic programs, saying, "I won't accept big new spending."

But the recent budget agreement that Bush struck with congressional leaders fails to fulfill either of those pledges. The accord amounts to a holding action on the deficit that makes virtually no headway on the long-term budget problem, fiscal analysts say. And rather than curtailing spending, the pact envisions a substantial increase for domestic programs.

"Basically, you have a situation in which an agreement was made for the sake of an agreement—any agreement," said Stephen E. Bell, a former Senate Budget Committee staff director who manages the Washington office of Salomon Brothers.

To get that agreement, Bush all but abandoned the spirit of the "flexible freeze" he proposed during the campaign. A close reading of the accord's fine print shows it would permit an increase in the next fiscal year of nearly $15 billion, or 10 percent, in spending authority for domestic programs subject to annual appropriations—a figure that blows the lid off the spending restraint that was supposed to occur under the freeze.

Meanwhile, many of the pact's supposed cuts and economics in other programs involve accounting gimmicks and one-time savings measures. As a result, in terms of its impact on the deficit, the agreement is a mouse," said Murray Weidenbaum, who served as the first chairman of President Ronald Reagan's Council of Economic Advisers.

In a sarcastic reference to a prediction by budget director Richard G. Darman, Weidenbaum said: "I think he's right that this budget agreement will bring down interest rates. In fact, I have a specific estimate—one basis point," which is one one-hundredth of a percentage point.

No one in the administration argues that the budget agreement solves the fundamental deficit problem or even fulfills Bush's campaign vows. Instead they boast that the pact, which they call a "first step" toward eliminating red ink, shows they can work with Congress.

More important for Bush is the aura of success he gains by surmounting the first big hurdle on the budget without violating his most important campaign pledge: "No new taxes." The White House hopes this makes Bush appear resolute, which not only enhances his public image but also could make it politically easier for him to accept a tax increase later.

"There was a clear, unspoken understanding from the outset of these negotiations that we had to do a one-year type agreement without [a tax increase], to get us through this period and get us some distance away from the campaign," said one Republican congressional participant. "Then, we'll be able to deal better," This assumes, of course, that the economy—and Bush—will cooperate.

Bush aides maintain that the pact, which consists of $27 billion in deficit-reduction measures—including federal asset sales and other revenue-raising items—does provide substantive benefits.

By providing a framework, however flimsy, for reaching the fiscal 1990 deficit target of $100 billion set by the Gramm-Rudman-Hollings law, the agreement helps avert the prospect of budgetary chaos this year. "It will put a real limit on what Congress can increase," said one White House official. "If they're going to pass a big expensive child-care bill, they've got to fit it into [the targets set by the agreement] somehow. The same for a big housing bill."

However, the agreement bears little resemblance to the kind of deficit reduction that Bush called for in the campaign. The flexible freeze was supposed to balance the budget in five years by holding down spending, with the overall total for domestic programs (excluding Social Security) allowed to grow no faster than inflation.

"One of my first acts as president will be to sit down with the leaders of Congress and negotiate a plan to cut this federal deficit—a plan that holds spending down to the rate of inflation," Bush said in the final weeks of the campaign.

In a Chicago speech earlier in the year, Bush declared, "I'm going to freeze spending, get out the waste, remove the things we don't need. . . ." He promised to personally lead "decisive deficit negotiations" with Congress. "We are going to meet and talk and maybe even shout—but we are going to solve this problem," Bush said.

Once elected, Bush decided to let Darman serve as the administration's chief negotiator. According to a participant, the Democratic negotiators confronted the budget director with Bush's own rhetoric calling for more spending on his "kinder, gentler" priorities, and they insisted that their priorities not be sacrificed to pay for the president's.

In the end, Darman bowed to Democratic demands for a sizable boost in domestic appropriations—to $157.5 billion in fiscal 1990 from $142.8 billion in the current fiscal year. He was forced to grant this 10 percent increase for domestic "discretionary" programs in order to obtain the Democrats' assent to a less stringent cutback in defense, participants said. (Discretionary spending is set by annual appropriations, unlike spending for entitlement programs such as Medicare.)

The way the increase is structured underscores the short-term nature of the deficit reduction in the agreement. The spending boost does not cause serious problems for the goal of reaching the fiscal 1990 deficit target, because only a portion would actually be spent in that year. The increase applies to spending authority—the amount Congress allows agencies to commit during the course of a year even if all of the money is not spent immediately. Whatever portion of the increase is not spent in 1990 would be spent in 1991 and beyond, worsening the deficit in those years.

"It's staggering," a former Reagan budget official said of the prospective increase for domestic discretionary spending.

This former official and other budget experts acknowledge there is considerable pressure to expand discretionary programs after the severe cuts those programs suffered during the Reagan years. But they complain that the increase was not offset by genuine cuts in entitlement programs.

The pact's $7 billion in proposed entitlement savings include a number of bookkeeping measures. Farm spending in 1990, for example, would be "cut" by shifting payments from 1990 to the current fiscal year. "Savings" would be achieved in the food stamp program by recognizing that hundreds of millions of dollars worth of food stamps have been lost or damaged over the years and will never be redeemed. Still other "savings" would come from simply putting certain outlays off the federal budget.

Negotiations on a more ambitious long-term deficit-reduction pact are scheduled to begin next month. Administration officials acknowledge that without higher taxes, it will be extremely difficult to reach the $64 billion deficit target set by Gramm-Rudman-Hollings for fiscal 1991.

Asked eight days ago on CBS' "Face the Nation" whether the administration would flatly rule out a tax increase for 1991, White House chief of staff John H. Sununu said: "We've done very well working together with the members of Congress in a way of getting results. . . . I don't see why we have to define anything in or out at this stage."

BUDGET GAMES

The House and Senate are about to approve their respective versions of a fiscal 1990 budget resolution that will supposedly reduce the deficit to $100 billion next year. Anyone who believes that number needs a refresher course in capital games.

Game No. 1: President Bush and the leaders of Congress have agreed on spending and revenue totals with a deficit of $100 billion, as required by the Gramm-Rudman-Hollings budget law. Their agreement was useful: it resolved defense and non-defense spending shares without a public wrangle. But it left unexplained $5 billion in new revenues—a big wrangle yet to come—and otherwise shrouded reality in flimsy forecasts and devious bookeeping.

Game No. 2: Gramm-Rudman-Hollings decrees automatic across-the-board spending cuts to trim the deficit to the statutory target if appropriations and revenue bills fail to do so. But the deficit has now grown for two years, and there's been no across-the-board cutting back. That's because the law's fine print says that the deficit is whatever the Office of Management and Budget estimates it will be on Oct. 15—just two weeks into the new fiscal year, and usually well before the budget legislation is complete.

After Oct. 15, anything can happen. Because the economy never peforms exactly as forecast, spending and revenues can be less, or more, than predicted. And unforeseeable expenses crop up, like the savings and loan bailout.

Game No. 3: There's also bald deception. The White House-Congress compact for 1990 shifts almost $1 billion in spending into 1989, by advancing next year's farm payments. That's pure subterfuge to cut the 1990 deficit. So is the decision to remove the Postal Service and its deficit from the budget. Federal outlays and revenue won't be altered one iota, but the books will look better.

Game No. 4: Social Security and other Government trust funds are technically earmarked for future benefit payments, but counted in the current budget totals. It's proper that everything be counted together, to get a fix on the Government's fiscal impact. But because the trust funds currently collect much more than they pay out, they hide a huge amount of deficit spending. Without these surpluses, the regular budget deficit would be $100 billion larger. And just maybe the Administration and

Congress would be more serious about cutting it.

President Bush and Congress both proclaim that the deficit is a critical problem, yet gladly play these games to make the problem seem less than it is. In reality, it remains critical.

[From the Chicago Tribune, Apr. 17, 1989]

A "FEEL-GOOD" BUDGET AGREEMENT

President Bush summoned reporters to the Rose Garden Friday to announce an agreement with Congress to shrink the budget deficit for the next fiscal year. He called it a "first manageable step," but it was more like a tiptoe, hurting no one and leaving no visible footprint.

The best thing about the plan, said Senate Majority Leader George Mitchell, was "its existence," referring to the fact that a Democratic-controlled Congress and a Republican administration could agree on anything at all. But any display of bipartisan support was a little thin. Sen. Lloyd Bentsen, the Democratic chairman of the Senate Finance Committee, was so upset he refused to participate in the Rose Garden ceremony and left for Texas.

The pact, which Budget Director Richard Darman and congressional leaders worked on for two months in secret, offers an outline for reducing the fiscal 1990 deficit by about $28 billion. The idea is to get the deficit down to about $99 billion next year, with half the reduction coming from increased revenues and the rest from lower spending. Without a budget accord, the deficit next year was expected to reach about $127 billion, down from an estimated $163 billion this fiscal year and $155 billion in 1988.

Unfortunately, the negotiators left the difficult decisions to congressional committees. For example, on the revenue side, after selling government assets and hiking user fees for government services, there's still almost $6 billion in additional new revenues needed. Darman insists there are no tax hikes in the plan and that there are many ways to raise the money through tougher tax-code enforcement and changes in the tax laws that still won't violate George Bush's read-my-lips campaign pledge of "No New Taxes!"

In return for being allowed to play the "quacks-like-a-duck" game on taxes, Bush gave ground on defense spending, agreeing to freeze Pentagon outlays at about $299 billion instead of letting them keep pace with inflation. That concession and some bookkeeping gimmicks, such as moving the postal service off budget, will add up to enough savings so Congress won't have to squeeze some of its favorite domestic programs.

The Bush administration's first effort at deficit reduction is disappointing at best and seems to be the same old gamesmanship practiced by the previous White House bunch. As a result, Congress will keep on spending and no new taxes will be proposed to help pay the bills. Meantime, Bush can say he kept his tax promise, Congress can say it isn't cutting domestic programs and most Americans can say it didn't hurt a bit. Everyone can feel good about our fiscal mess—at least for a little while longer. But the mess remains.

[From the Minneapolis/St. Paul (MN) Star Tribune, Apr. 20, 1989]

FEDERAL BUDGET DEAL WAS AN EMPTY PROMISE

The federal budget compromise put forward Friday as significant movement toward taming the deficit was little more than a political show, mainly for the benefit of President George Bush. By refusing to consider tax increases, Bush has blocked substantive efforts to tackle the deficit. So Friday he gathered many of the major players in the national government around him and simply proclaimed a victory.

Last week's deal to rewrite the 1990 budget allows Bush to claim he kept his election promise of no new taxes. Congress, meanwhile, gets to dodge the tough matter of deciding where to cut spending while still meeting the requirements of the Gramm-Rudman budget-balancing law. But the agreement is based on unrealistically optimistic projections about the economy and inflation, and includes a fair amount of accounting gimmickry.

The compromise lays out only general spending and revenue guidelines. It is really an agreement to agree later. The two most powerful men in Congress on tax matters, Sen. Lloyd Bentsen and Rep. Dan Rostenkowski, declined to endorse Friday's announcement. Minnesota Rep. William Frenzel, the senior GOP member of the House Budget Committee, called the compromise disappointing and said it will simply push the hard budget decisions into next year.

Friday's announcement may have been good political theater, but it was poor public policy. Federal deficits have turned the United States into a debtor nation, dependent on foreigners for its investment capital. They have produced a diminished dollar that makes American companies and real estate a bargain for foreign investors. The resulting fire sale of American businesses and technology raises serious questions about the country's ability to control its economic destiny. The deficits also have prevented the United States from leading the effort to solve the Third World debt crisis.

House Ways and Means Committee chairman Rostenkowski is right to press for an increase in taxes, despite Bush's threat of a veto. Real reductions in spending for both military and domestic programs are also needed, as are limitations on cost-of-living allowances for Social Security, Medicare and Medicaid.

Bush should be commended for his willingness to negotiate with congressional leaders on the deficit issue, something Ronald Reagan refused to do. But the time has come for real progress on this critical issue, not just vague promises of better things to come.

[From the Memphis Commercial Appeal, Apr. 18, 1989]

SMOKE AND MIRRORS

When Americans voted last fall to keep the White House in one party's hands and Congress in the other's, they virtually guaranteed that Washington would avoid decisive action on issues such as the federal budget. The budget compromise unveiled Friday by President Bush and congressional leaders fits that pattern. It uses phony numbers to conceal problems, postpones hard decisions and tries to reconcile the irreconcilable.

The compromise is supposed to trim the deficit from the current $163 billion to just under $100 billion. That may sound like an impressive achievement, but more than half the reduction will come simply from the increase in tax revenues produced by economic growth. Washington continues to benefit from growth-oriented, "supply-side" economics even while sneering at it.

The remaining $30 billion in deficit-trimming represents only about 2 percent of all federal spending. If it were not for the specific targets required by the Gramm-Rudman-Hollings budget law, the negotiators would not have produced even that much.

About half of this $30 billion is to come from new revenues, the other half from spending reductions. From past congressional behavior we worry that the lawmakers will find a way to welsh on the latter side of the deal: A year from now it may turn out that the spending cuts were largely fake, the revenue hikes all too real.

Some phoniness is already apparent. More than $3 billion of the plans alleged "savings" are to come from tricks such as moving the U.S. Postal Service "off budget." Another $1 billion will be "saved" from 1990 by shifting some farm subsidies to 1989.

Other spending restraints are one-shot items, which will make the 1990 numbers look better but avoid long-term deficit cuts. Rep. Bill Frenzel (R-Minn.) says such tactics will "make the work for next year very difficult."

The negotiators agreed on several revenue targets, but not necessarily on how to meet them. Some $2.7 billion is to come from increased fees for government services, $5.8 billion from taxes. Will the latter goal be reached merely by closing loopholes, or will Bush end up abandoning his "read my lips" pledge against tax hikes? At this point nobody can be sure.

The President sacrificed major policy goals, such as keeping defense spending in pace with inflation, to get this compromise. he should have demanded more in return.

[From the Los Angeles Times, Apr. 25, 1989]

MUDDLING THROUGH THE BUDGET

Washington analysts are sorting out style and substance as they take the measure of George Bush and his first 100 days. This is a mostly harmless exercise in gauging the impact of White House puppies and horseshoe pits vis-a-vis Contra aid and reponse to the Alaskan oil spill. The assessments will wind up being mixed. What counts over time is results, and there are not many of them to measure in the first 100 days of most administrations.

In awarding himself high marks Monday, Bush cited a bipartisan budget agreement with Congress as one of his major achievements. The budget deal was not a triumph of either style or substance, however, but of illusion. The best that can be said is that it fudges the deficit issue for another year, thus allowing Bush to avert a major clash with the Democratic Congress and to fulfill his no-new-taxes pledge for respectable period of time.

There was no particular surprise in this. Bush tediously taught the nation to lip-read last year with his no-tax pledge. He could not afford to break that vow in his first year. And congressional budget leaders—most of them—were willing co-conspirators in fashioning a budget deal that put off all the tough issues for another year. This was the illegitimate offspring of honeymoon politics.

It all seems innocent and convenient enough. The harm is that Americans may be deluded into believing that all this congeniality may result in some real deficit reduction. The agreement purports to meet the fiscal 1990 Gramm-Rudman budget deficit target of $100 billion. In fact, it is based on a lot of suppositions and assumptions that

cannot come true, according to an analysis by the Committee for a Responsible Federal Budget.

The committee claims that even if every single assumption is correct, the 1990 deficit still would be $125 billion. And that, of course, is illusion, too, since the figure does not include $153 billion in Social Security and other trust-fund surpluses that are counted against the deficit even though they are reserves earmarked to meet future spending requirements.

So in spite of the agreement, the United States is headed for its ninth consecutive year of budget deficits in excess of $100 billion, and the total federal debt will exceed $2.4 trillion, three times what it was when Ronald Reagan took office. Congress and the President bought time this year. They, and the American people, will have to pay the price next year.

[From the Philadelphia Enquirer, Apr. 16, 1989]

A ROSE GARDEN RUSE

For some strange reason, it took negotiators for Congress and the White House more than a month to script the vague $1.2 trillion budget plan that they unveiled Friday. Any good PR firm or fiction writer could have produced it overnight. This gimmicky, cowardly package has virtually no chance of meeting its basic goal: to make next year's deficit less than $100 billion.

To their credit, the budgeteers honored the tradition of doing little but dressing it up nicely. The plan promises a super-low deficit—just $99 billion—but by way of changes you'll hardly feel. These include the sale of federal assets, accounting gimmicks galore and nips and tucks in spending and taxes.

The plan's greatest act of legerdemain was simply to use the administration's giddy forecast of an economy so strong and interest rates so low that the deficit will drop by more than $36 billion next year even if Congress does nothing. Since the plan teeters on incredibly rosy assumptions, it was only right to unveil it in the Rose Garden. It's worth noting, however, that Sen. Lloyd Bentsen (D., Texas), who dutifully attended the final budget meeting, declined to join his colleagues in the garden for the happy-faced announcement.

In fairness, some of the plan's parts are real. It includes $2.7 billion in higher fees for government services and a $2.7 billion cut in Medicare reimbursements to hospitals and doctors. Defense spending would rise by less than the inflation rate. These are sensible ideas, but they can't do more than dent a federal deficit that should exceed $160 billion this year.

Much of the purported deficit-cutting is phony. On the spending side, the plan includes more than $4 billion worth of accounting gimmicks, such as putting the postal service outside of the budget. One whopper is to take more than $1 billion that farmers expect to receive next year and to pay it this year instead. (What the heck, this year's deficit will miss the Gramm-Rudman target by about $25 billion anyway.)

As for any new "revenue" (none dare call it taxes), the only genuine item is to raise fees for such things as entrance to national parks. The package promises $5.7 billion from selling off federal assets such as loan portfolios, a one-year gimmick that simply delays fiscal discipline for another year. And it includes more than $5 billion in "tax measures" with no further explanation of what those measures might be.

What makes this mediocre budget plan particularly dispiriting is the realization that bolder action is unlikely to come in the future. A bipartisan commission can't be counted on to save the day, because that approach collapsed last winter. With the next congressional election one year and seven months away—and the next presidential election three years and seven months away—this was the ideal time for politicians to show some backbone.

Last week every cabinet secretary and agency head was sent a memo, signed by Mr. Bush, about the need to ignore minutiae, focus on priorities and achieve them. That's exactly what Mr. Bush and Congress have so far failed to do about the deficit.

[From the Washington Times, Apr. 18, 1989]

A BUDGET, SORT OF

Call it a death wish: No sooner had Democratic leaders hammered out a compromise federal budget with President Bush than some of them began hectoring for a tax hike in the election year of 1990. Sen. James Sasser, chairman of the Senate Budget Committee, and Rep. Leon Panetta, chairman of the equivalent House panel, implied that they will push next year for new taxes. Meanwhile, House Ways and Means Committee Chairman Dan Rostenkowski and Sen. Lloyd Bentsen of the Senate Finance Committee boycotted Friday's announcement of the plan, partly for fear that Congress will get blamed next year for raising the taxes it plans to raise.

The budget document, like most budget documents, conceals at least as much as it reveals. On the bad side, the conferees agreed to take the Postal Service off-budget (a horrible ideal) and to keep Social Security Trust Fund surpluses in the deficit calculations (which is misleading). The White House squeezed the budget within the Gramm-Rudman-Hollings deficit-reduction target of $100 billion for next year by adopting economic assumptions that seem a little optimistic, given the Federal Reserve Board's recent efforts to keep monetary growth slow and interest rates high. The president also seems to have given up on the idea of cutting the capital-gains tax rate, a move that would stimulate investment and enhance our entrepreneurial competitiveness with Japan, which doesn't tax capital gains at all.

The compromise also included some good news, not the least of which is that the much-maligned Department of Defense has begun to show how government might live within its means. Defense Secretary Richard Cheney plans to meet his fiduciary obligations by cutting back on the production of the Stealth Bomber, scrapping the V-22 rotating-engine craft ordered by the Marines," spreading out the deployment of a new generation of army attack helicopters, and planning on strategically acceptable troop reductions. While the Pentagon still could use some sweeping reform, beginning with an overhaul of the procurement system, Mr. Cheney at least has done something that social-service agency heads haven't been doing: he cut out some programs that were unnecessary or that didn't work.

We hope the sense of frugality proves contagious, since many of our most prominent social programs have proven spectacularly incapable of achieving their primary aim, which is to promote self-sufficiency among America's poor. If Congress judged social services by results, rather than by propaganda value, the budget's bottom line and the American underclass both would benefit.

Congress also ought to explore a suggestion made yesterday by Sen. Chuck Robb of Virginia. He urged his colleague to draft budgets more in conformity with generally accepted accounting principles, rather than sweeping the postal service under the "off-budget" rug or hiding other problems in various trust funds. He wants the American people to understand just how bad or good the budget situation is at any given time.

He's right: Congress must adopt standards of honesty in evaluating programs and reporting budget figures. The Bush administration meanwhile ought to develop a battle plan to cut spending and taxes. This year's genial budget talks have merely set the stage for more open guerrilla warfare in 1990.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator may proceed.

Mr. DOMENICI. First, might I ask how much time do I have?

The PRESIDING OFFICER. The Senator has about 15½ minutes.

Mr. DOMENICI. I yield myself 3 minutes.

Madam President, I might say to my good friend, this is more like spring training and we have a merger, a lot of new players, a new general manager, and this spring training is going to put them all on the same team, and then we are going to go into the World Series in the next 4 or 5 months.

Madam President, let me talk about two things that I think are tremendously important about the future. I should have mentioned that if anyone is looking around for a real problem, in the event they would like to be helpful with reference to the future of this country, they ought to look at the spiraling costs of health care in America. We only have Medicare and Medicaid. We do not have all of America's health delivery system, but I think the numbers that I am going to quickly describe apply to the health delivery system in the country.

First of all, health delivery in our budget for something like Medicare is going up at well over 13 percent a year. We are going to try to reduce that by 2. But, Madam President, if health care costs are not in some way adjusted to be more in tune with our productivity increases and inflation, I predict the strikes between labor and management in the next year and a half are not going to be over wage payment but, rather, over health care costs. I predict that the health care costs are going to use up almost all of the new growth in this country and there will be little left over so that the rest of America can have the kind of

capital, the kind of resources to keep this engine of prosperity going.

I submit it will not happen by cutting Medicare by $2 or $3 billion. Somebody has to get to the heart of the problem. It is the best delivery system in the world. Some people say let us take Canada's. Americans would not live under Canada's for 1 year because we are used to the very best. We are used to getting whatever we want all the time and, frankly, the costs are now reaching the stage where we better find out how we can deliver good health care without bankrupting the country.

Second, we do have in this budget, I failed to mention it, science and research, if the appropriators care to fund them, going up at dramatic paces in the National Science Foundation, space program, many of the technology and research programs, including those in the national laboratories. Those are absolutely imperative for a United States that is in a new world, a world of competitive models that are just like ours, built on democracy, investment, individual ownership, and capitalism. We are not operating in the vacuum of only America having this model economic system. So we need to keep pace in those areas because change is the order of the day and breakthroughs in science are the order of the day. We will have more science breakthroughs in the next 30 years than all of history. Either we will make them and we will apply them in the marketplace or those who are out there trying to compete with us to add huge amounts of material wealth to the world will do it.

So I close by suggesting that we cannot do everything in a budget, but I submit we have a real chance of taking the next step because of this one and it will not be easy. I think we have gone through the spring training and maybe we will be able to get the job done.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. SASSER. Madam President, I suggest the absence of a quorum and ask that the time be charged against all sides proportionately.

The PRESIDING OFFICER. Without objection, it is so ordered. The time will be charged to all three parties. The clerk will call the roll.

The legislative clerk called the roll.

Mr. ARMSTRONG. Madam President, I ask unanimous consent that we dispense with further proceedings under the quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. It is not clear to me whether time had been allocated to me or whether I need to request some time.

The PRESIDING OFFICER. The Senator has been allocated 15 minutes in his own right.

Mr. ARMSTRONG. I thank the Chair and I appreciate the opportunity to speak briefly upon the conference report of the concurrent resolution on the budget.

Madam President, I am disappointed to report to my colleagues that there is a little item which I had hoped would be contained in this conference report which is not in there. It is just a couple of lines at a certain spot in the resolution and it does not involve, proportionate to the total of Federal spending, a very large amount of money. Although it is significant, it is several hundred millions of dollars, but compared to several trillion dollars in spending in the next few years that are contemplated by this budget document, it is not a very big percentage. But I tell you this, it is a big item in the lives of some people who are getting a raw deal, some people who deserve better treatment than they are getting as a result of the failure of the conference committee to include in here room to permit Congress to legislate to lift the Social Security earnings limit.

I have mentioned this to my colleagues previously, and I think most Members of the Senate are well aware of the issue and well aware of the justice of the cause that I have arisen to advocate, and that is that, by gosh, it is time to raise, phaseout, and ultimately abolish the Social Security earnings limit. I hesitate to even go into the issue in any detail because I have discussed it with the Senate before, but let me just outline it for the benefit of anybody who might read this in the RECORD and find it a novel issue.

The essence of it is very simple. At the present time, a Social Security recipient between the ages of 65 and 70, who reaches a plateau of $8,800 in outside earnings per year, thereafter forfeits $1 of Social Security entitlement for every $2 of income. That means instead of earning $8,800, if some person maybe made $9,000, earned $200 over the limit, they would have to give back $100 of their Social Security.

I am here to tell you, by gosh, that is not fair. It is not right. It is terrible social policy, it is bad labor policy, and it is an economic injustice.

We are not talking, by the way, about a handful of people. We are not talking about wealthy people. We are talking about working elderly men and women. We are not talking about coupon clippers or people who have big incomes from dividends or bond interest or rental income on housing or partnership interests from business or anything like that because, Madam President and my colleagues, that kind of income does not trigger a reduction in Social Security.

Now, let us be clear about that. If you get $1,000 a year, $500,000 a year, $5 million a year in dividend income, you do not have to give up a penny of your Social Security entitlement, but if you earn over $8,800 a year, about $750 a month, a little less, you have to start giving back to Uncle Sam 50 cents for every dollar of new income.

Madam President, if you think about that for a minute, what it means is this: that you pay in tax disincentive what amounts to 50 cents on the dollar Social Security earnings limit offset, then you pay your Federal income tax, which is 15 percent, then you pay FICA, then you pay maybe in some States, State income tax, and you very quickly get up to a point where about 80 percent, in a typical case, of your marginal earnings are forfeited if you are between 65 and 70 and a Social Security earnings recipient in this income bracket, in sort of that middle bracket from maybe $8,800 to $15,000, $18,000, $20,000.

High-income people, relatively speaking, are not affected. Those who are in the very lowest income brackets who do not have any earnings or very little are not affected. Coupon clippers and investors are not affected. It is just these poor working people. I think it is a raw deal. Now, it could be 80 percent. It might be as much as 102 percent.

One newspaper—I believe it was the Wall Street Journal—made that point very forcefully and very correctly and in extreme cases it could actually be a marginal tax disincentive. It is not precisely a tax rate but a marginal tax disincentive of about 102 percent.

The Senate on two occasions has considered this matter and on the first occasion on a vote of 86 to 11 agreed that we ought to raise the Social Security earnings limit and on the second occasion when we were considering the budget resolution agreed in fact to a proposal which I advanced along with a number of my other colleagues which would give headroom, give in effect budget room to permit the Finance Committee to come forward with a proposition that would allow us to raise by $3,000 next year and $3,000 in each of several subsequent years the amount of the Social Security earnings limit, leading I would hope ultimately to phasing it out altogether but certainly raising it to a level of $20,000 or $25,000 in the very near future.

I want to express to my colleagues on the conference committee, and I was a conferee, my great appreciation for them trying to help us get this past our colleagues in the House. We did not succeed. We did not win the victory that I had hoped we would win on this issue but I am here to tell you two things about that.

First, we have sensitized a lot of people to the issue who were not aware of it before, who really had not thought about it, including a lot of Members of the House who for one reason or another were not ready to accept an amendment on this subject during the course of the conference but who may be ready to do so the next time around. That is not just an optimistic appraisal on my part. I think the facts bear that out. The last I knew over 100 Members of the House of Representatives had sponsored legislation along these same lines. In addition, the Ways and Means Committee has scheduled for May 25, the hearing on the matter.

I think a great deal of interest has been evidenced not only in this Chamber where almost unanimously we have agreed to this idea, but now there is a growing level of interest in the House of Representatives. I think it is a great thing. Though we have not won the victory today, I guess it is no secret that I intend to press this matter. In fact I intend to raise it as many times as I can find an appropriate vehicle during the balance of this year, next year, the next year, and until we get it passed.

My hunch is it is not going to take too many more tries. In fact as recently as last night, I attended a little reception over at the White House and a number of Members of the House, including some of the House conference, including some of the ones who were not in the position for one reason or another to accept it during the course of the conference, saddled up to me and said, "We would like to help you with this." I was not out about seeking help from them. I did not seek them out or try to twist their arms. It was a social evening but a number of them came up and said, "We would like to help."

So I am going to make a few phone calls, and when we get back from the recess, I am pretty optimistic we are going to get something done.

In the interim I would not want to fail to acknowledge the help my colleagues in the Senate gave me on this matter, and my appreciation to them.

Let me, before I turn my attention briefly to another aspect of the budget resolution, say this. Some people may think this is some sort of an abstract issue, and that it is mostly just a question of theoretical social policy or theoretical economic policy or something.

Madam President, it is really not that at all. We are talking about some people in retirement years who want to work, who need to work for economic reasons and who need to work because if you do not work for a lot of people—this is not everybody—you lose your reason to get up in the morning. You lose status, you lose your contact with the changing of the seasons, as one poet has put it, and in a lot of cases people who just need the money, who without the extra earnings they have from having a job down at McDonald's dispensing hamburgers or for whatever their job is, in retailing, part-time or full-time jobs, without that extra earnings they do not have the extra money that makes the difference between hanging on or existing or living in impoverished circumstances being able to do some of the things they would like to do, like make a phone call on a grandson's or granddaughter's birthday.

I do not think we ought to put people in this age bracket in a position of having to decide to spend $3 or $4 for a phone call to a grandchild, or to buy a birthday gift or a Christmas card, and whether or not they can have what they want to eat the next day for lunch. I think that is a choice for people who are willing to work, and we should not, as a matter of Government policy, put them in that kind of a situation.

So with my thanks to my colleagues, let me just say we will be back to the well on this, and hope to prevail before the year is over.

Madam President, may I ask how much time I have remaining?

The PRESIDING OFFICER. Five and a half minutes.

Mr. ARMSTRONG. Madam President, I want to take a very few minutes to recall the admonition—I have forgotten if it was Santayana or George Steinbrenner who said—that "those who do not remember history are destined to repeat it." This was Santayana, the philosopher, not the one who invaded Texas and laid siege to the Alamo, but, my friends, budget resolution does not indicate to me that we have learned a lot from history.

I have not kept careful track, but I believe this is about the 11th time that I am familiar with since I have been in the Senate in the last 11 years that we have adopted the budget based upon the optimistic assumption that things are going to get better next year. Maybe this is the best we can do. I think somebody thinks it is. I think we should have tried to do better. I do not fault my colleagues who have put this together because I understand when the President of the United States makes a deal with a bunch of the leaders, it is very hard to upset that apple cart. But this is an apple cart that ought to be upset. This is a budget that is bad for America, and compromises our economic future.

This is a budget which, in my view, means in the long run, more inflation, more unemployment, and sets the stage to do one of three things next year: either have a tax increase, or a huge cut in the national defense, or slip the Gramm-Rudman targets, or maybe there will be a miracle intervening that will prevent that. Let me explain why I think that is true: Because while we purport to meet the Gramm-Rudman-Hollings targets we do it through a series of golden gimmicks in the budget by making unrealistically optimistic assumptions about the state of the economy, about what T bill rates will be, about what our rate of productivity growth will be over the next few years, and other assumptions.

Second, by the sale of assets which we all agree, and I am not telling my colleagues anything they are not well aware of, we are scoring—and I favor the sale of assets by the way—as a reduction of Federal spending which simply is inconsistent with the facts in my opinion, and other kinds of golden gimmicks.

Madam President, I ask that we printed in the RECORD by unanimous consent just some basic facts about the budget resolution and why I am concerned about it; also a brief little essay on the budget gimmicks which are used in this conference report which I thing are worthy of note; also, Madam President, some specifics on where these gimmicks have been applied in unreconciled assets, unreconciled asets sales, unspecified revenue increases, and so on; just documenting some of the contentions which I have just made.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BUDGET DEFICIT

The law mandates that we reduce the deficit each year and balance the budget by 1993. If we resort to phony deficit reduction in one year, we make our job that much harder next year . . . and that is exactly what we have done with this budget resolution.

By ducking the chance to accomplish something real this year, we have set the stage for economically destructive tax increases or abandonment of deficit targets for next year . . . probably both. In the meantime, the deficit will remain, forcing interest rates higher, and depriving American families and businesses of access to affordable credit.

FACTS ABOUT THE CONFERENCE REPORT ON THE BUDGET RESOLUTION

When the Senate reported its Budget Resolution, our deficit target for FY 1990 was $99.4 billion. When the House reported its Budget Resolution, their deficit target for FY 1990 was $99.7 billion. In the Conference "agreement", we accepted their $300 million higher deficit figure.

The higher deficit amount is attributable to a $200 million increase in Medicaid that was not part of the budget summit agreement. Rather than assume any increase in Medicaid would be deficit neutral as the Senate did, the House simply *increased* their deficit target. No attempt was even made to offset this expenditure.

Another $15 million of the decrepancy in the House and Senate deficit targets was for child nutrition. No matter how worthy this expenditure might be, an attempt should at least be *made* to offset it. The remainder of the difference is due to rounding.

Both the Senate and the House Budget Resolutions included $5.7 billion in asset sales. Importantly, the Senate reconciled every dime of these sales per the budget summit agreement. The House, however, did not reconcile *any* of the asset sales in their Budget Resolution and *refused* to do so in Conference (despite the urging of both the Chairman aand Ranking Members of the Senate Budget Committee).

Again, the Senate accepted the House position. As Senator Domenici stated during Conference, "To the extent that we do not reconcile $5.7 billion worth of assets, we are here and now predicting that it will be $5.7 billion off because we will not have those receipts and that amount will continue in the deficit to be debt serviced . . ." (*Transcript of Proceedings*, U.S. Senate Committee on the Budget Joint with the House of Representatives Committee on the Budget, Conference on the Budget, 5/11/89). Without reconciling these asset sales, it will be surprising if we realize even 20% of the savings that we are stating will accrue.

Both House and Senate Budget Resolutions called for $2.7 billion in user fees per the budget summit agreement. The Senate reconciled $1.8 billion according to the general outlines used to come up with the $2.7 billion figure in the summit agreement. The House, however, reconciled only $1.5 billion. The Conference "answer" to this discrepancy was to *lower both the Senate and the House numbers.* The Senate now reconciles $1.5 billion and the House reconciles $1.2 billion. It is unclear how this still existing discrepancy will play out in reconciliation.

The Senate included reconciliation instructions for one year in its Budget Resolution, while the House included them for three. The Conference "agreement" is for the House to lower that number to two years. Again it is hard to see how this conflict will be resolved in reconciliation.

BUDGET GIMMICKS USED IN FY90 BUDGET

In addition to the heavy reliance on asset sales ($5.7 billion) and user fees ($2.7 billion) in this budget agreement, certain budgetary gimmicks have raised their ugly heads.

Taking Off-Budget an Account Operating at a Deficit: Whether or not one believes that Postal Services should be taken off budget for policy or internal efficiency reasons, few would support taking it off-budget because it is operating at a deficit. This is, in fact, precisely what we did. Postal Services was operating at a deficit of $1.8 billion. This made it a prime candidate for this budget gimmick. They way it works is as follows: Because the program is currently running a $1.8 billion deficit, taking it off-budget automatically "saves" $1.8 billion.

Why the House only asked for $1.3 billion from Postal Services defies logic. Under their scenario not only could the necessary "savings" have occurred simply by moving off-budget, but the Postal Services could actually claim a "slush fund" of $500 million to increase spending. Note: Sen. Domenici pushed and succeeded in having the Senate require Postal Services to meet the $1.8 billion and produce additional receipts of $500 million. The House gave into the Senate on this provision in Conference and Postal Services was reconciled for $2.3 billion.

Advance Deficiency Payments: This budget claims $900 million in savings by shifting FY90 deficiency payments into FY89. Athough there is a Gramm-Rudman-Hollings rule stipulating that such action not be used for purposes of deficit reduction, the Administration received a legal opinion that this action could be counted toward meeting our GRH target because it did not necessitate a change in "a law or regulation".

Assume Outstanding Food Stamps Will Not Be Cashed: Truly innovative, this maneuver "makes" $500 million by stating that old, unused foodstamps can be collected and the money they represent, therefore, realized.

Don't Count the Cost of Bailing Out the Farm Credit System: Under current law, healthy lending institutions are required to make payments as part of a bail-out of the Farm Credit System (Economically, this is a tax, but is counted as a spending cut under the budget process). By accelerating payments into FY1990, we claim $500 million in "savings."

FISCAL YEAR 1990 BUDGET RESOLUTION: A STEP IN THE WRONG DIRECTION

"The [budget] agreement's most serious weakness is its failure to look beyond the coming year." (The New York Times, 4/15/89)

This budget agreement may be historical in its style . . . bipartisan, approved by the Administration, relatively quickly accomplished, pushed through Conference in almost record time . . . but it is definitely not historical in its substance.

We use the same tactics and employ the same accounting "gimmicks" that have been made famous (or infamous) in past budget deals. After everyone loudly complains about OMB "rosy" economic assumptions, they are quietly implemented, not because we believe them, but because it makes the job easier.

Not a single spending program is terminated in this budget and Domestic Discretionary spending has increased by $11 billion—that's 6%—over FY89 levels.

Because the agreement relies so heavily on one-time savings and budget gimmicks, what little deficit reduction there actually is will not effect the long-term trend lines of government spending.

Deficit reduction breakdown in the conference report:

	Billion
Unreconciled asset sales	$5.7
Unspecified revenue increase	5.3
Increased IRS compliance	.5
User fees	2.7
Postal off-budget	1.8
Entitlements and other mandatory savings	6.6
Defense	4.2
Non-defense	.3
Net interest	1.1
Total	28.2
OMB baseline deficit	128.0
CBO alternative baseline deficit	147.3
OMB economic assumptions plug line [1]	10.4
Claimed deficit level	−99.7

[1] The difference between the sum of the CBO baseline minus the OMB baseline and the OMB economic plug is due to FSLIC.

We are deliberately ignoring the fact that next year, when we put together the budget for FY1991, we will be required to reduce the deficit to $64 billion. Under this agreement, the baseline deficit (which we use as the starting point for each year's debate) may be as high as $130 billion. It is highly unlikely that Congress will reduce the deficit by as much as $60 billion in an election year.

In terms the American people understand, this would necessitate a "hard" freeze, or a nominal year-to-year freeze of government spending. Although some of us would be willing to support such a measure, it is almost impossible to imagine such a bold move being taken.

In order to make spending increases possible, Congress is almost certain to turn to taxes or change the Gramm-Rudman-Hollings targets. Neither of these choices would be wise economic policy for the short or long run.

Regardless of one's economic perspective on tax increases, it is amazing that so many members are willing to put themselves into such a politically untenable position next year. By putting off any substantive spending restraint, we are not only worsening the American economy's chances this year, but jeopardizing future years as well.

The S&L crisis is a prime example of a very simple lesson. The longer one puts off a problem the more it is likely to grow (and the more difficult a solution will be to find and implement).

Mr. ARMSTRONG. Thank you, Madam President.

Finally, I want to say this: I do not raise these objections to be cranky, and I certainly do not raise them to be critical of my colleagues. I raise them because it is important, even though a handful of us who might vote against this conference report have no chance to prevail, that we at least raise the issue so that thoughtful people in this Chamber and elsewhere can think about it when the crunch comes. I do not think the crunch is 25 years from now or even 25 months from now. I believe before this year is over we will have good reason to regret the adoption of this budget. I am not the only one that thinks that.

In fact, there is a growing consensus among observers who are not Senators or Congressmen or economists but are just people out in the country who care about such things that we are making a big mistake.

I ask unanimous consent to insert in the RECORD at this point the editorial comments from around the country. The New York Times editorial, "Budget Games"; Philadelphia Inquirer's report entitled "A Rose Garden Ruse"; the LA Times' explanation of our budget, and their editorial "Muddling Through The Budget"; the Washington Post comments which they call "Paper Cuts"; the Christian Science Monitor's budget——

The PRESIDING OFFICER. The Chair wishes to advise the Senator he has 1 minute.

Mr. ARMSTRONG. I thank the Chair. I shall conform with that 1 minute.

"A 'Feel Good' Budget Agreement," editorial of the Chicago Tribune. "Face Up Honestly to the Deficit Problem," from USA Today. "Smoke and Mirrors," from the Commercial Appeal of Memphis, Tennessee. "Phanton of the Rose Garden"; "Deficit is Headed for a Mexican Standoff," from an Arkansas newspaper. "A Budget, Sort of," from the Washing-

ton Times. Boston Globe, "Budget Flexibility," and on and on and on.

The point is this: These newspapers, and a lot of our constituents at home, and deep down inside many of us in this Chamber, know that we have not solved the problem with this budget resolution. We have merely put it off. I, for one, am eager to get on with the solution, and the sooner, the better.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 3, 1989]

BUDGET GAMES

The House and Senate are about to approve their respective versions of a fiscal 1990 budget resolution that will supposedly reduce the deficit to $100 billion next year. Anyone who believes that number needs a refresher course in capital games.

Game No. 1: President Bush and the leaders of Congress have agreed on spending and revenue totals with a deficit of $100 billion, as required by the Gramm-Rudman-Hollings budget law. Their agreement was useful; it resolved defense and nondefense spending shares without a public wrangle. But it left unexplained $5 billion in new revenues—a big wrangle yet to come—and otherwise shrouded reality in flimsy forecasts and devious bookkeeping.

Game No. 2: Gramm-Rudman-Hollings decrees automatic across-the-board spending cuts to trim the deficit to the statutory target if appropriations and revenue bills fail to do so. But the deficit has now grown for two years, and there's been no across-the-board cutting back. That's because the law's fine print says that the deficit is whatever the Office of Management and Budget estimates it will be on Oct. 15—just two weeks into the new fiscal year, and usually well before budget legislation is complete.

After Oct. 15, anything can happen. Because the economy never performs exactly as forecast, spending and revenues can be less, or more, than predicted. And unforeseeable expenses crop up, like the savings and loan bailout.

Game No. 3: There's also bald deception. The White House-Congress compact for 1990 shifts almost $1 billion in spending into 1989, by advancing next year's farm payments. That's pure subterfuge to cut the 1990 deficit. So is the decision to remove the Postal Service and its deficit from the budget. Federal outlays and revenue won't be altered one iota, but the books will look better.

Game No. 4: Social Security and other Government trust funds are technically earmarked for future benefit payments, but counted in the current budget totals. It's proper that everything be counted together, to get a fix on the Government's fiscal impact. But because the trust funds currently collect much more than they pay out, they hide a huge amount of deficit spending. Without these surpluses, the regular budget deficit would be $100 billion larger. And just maybe the Administration and Congress would be more serious about cutting it.

President Bush and Congress both proclaim that the deficit is a critical problem, yet gladly play these games to make the problem seem less than it is. In reality, it remains critical.

[From the Philadelphia Inquirer, Apr. 16, 1989]

A ROSE GARDEN RUSE

For some strange reason, it took negotiators for Congress and the White House more than a month to script the vague, $1.2 trillion budget plan that they unveiled Friday. Any good PR firm or fiction writer could have produced it overnight. This gimmicky, cowardly package has virtually no chance of meeting its basic goal: to make next year's deficit less than $100 billion.

To their credit, the budgeteers honored the tradition of doing little but dressing it up nicely. The plan promises a super-low deficit—just $99 billion—but by way of changes you'll hardly feel. These include the sale of federal assets, accounting gimmicks galore and nips and tucks in spending and taxes.

The plan's greatest act of legerdemain was simply to use the administration's giddy forecast of an economy so strong and interest rates so low that the deficit will drop by more than $36 billion next year even if Congress does nothing. Since the plan teeters on incredibly rosy assumptions, it was only right to unveil it in the Rose Garden. It's worth noting, however, that Sen. Lloyd Bentsen (D. Texas), who dutifully attended the final budget meeting, declined to join his colleagues in the garden for the happy-faced announcement.

In fairness, some of the plan's parts are real. It includes $2.7 billion in higher fees for government services and a $2.7 billion cut in Medicare reimbursements to hospitals and doctors. Defense spending would rise by less than the inflation rate. These are sensible ideas, but they can't do more than dent a federal deficit that should exceed $160 billion this year.

Much of the purported deficit-cutting is phony. On the spending side, the plan includes more than $4 billion worth of accounting gimmicks such as putting the postal service outside of the budget. One whopper is to take more than $1 billion that farmers expect to receive next year and to pay it this year instead. (What the heck, this year's deficit will miss the Gramm-Rudman target by about $25 billion anyway.)

As for any new "revenue" (none dare call it taxes), the only genuine item is to raise fees for such things as entrance to national parks. The package promises $5.7 billion from selling off federal assets such as loan portfolios, a one-year gimmick that simply delays fiscal discipline for another year. And it includes more than $5 billion in "tax measures" with no further explanation of what those measures might be.

What makes this mediocre budget plan particularly dispiriting is the realization that bolder action is unlikely to come in the future. A bipartisan commission can't be counted on to save the day, because that approach collapsed last winter. With the next congressional election one year and seven months away—and the next presidential election three years and seven months away—this was the ideal time for politicians to show some backbone.

Last week every cabinet secretary and agency head was sent a memo, signed by Mr. Bush, about the need to ignore minutiae, focus on priorities and achieve them. That's exactly what Mr. Bush and Congress have so far failed to do about the deficit.

[From the Los Angeles Times, Apr. 25, 1989]

MUDDLING THROUGH THE BUDGET

Washington analysts are sorting out style and substance as they take the measure of George Bush and his first 100 days. This is a mostly harmless exercise in gauging the impact of White House puppies and horseshoe pits vis-a-vis Contra aid and response to the Alaskan oil spill. The assessments will wind up being mixed. What counts over time is results, and there are not many of them to measure in the first 100 days of most administrations.

In awarding himself high marks Monday, Bush cited a bipartisan budget agreement with Congress as one of his major achievements. The budget deal was not a triumph of either style or substance, however, but of illusion. The best that can be said is that it fudges the deficit issue for another year, thus allowing Bush to avert a major clash with the Democratic Congress and to fulfill his no-new-taxes pledge for a respectable period of time.

There was no particular surprise in this. Bush tediously taught the nation to lip-read last year with his no-tax pledge. He could not afford to break that vow in his first year. And congressional budget leaders—most of them—were willing coconspirators in fashioning a budget deal that put off all the tough issues for another year. This was the illegitimate offspring of honeymoon politics.

It all seems innocent and convenient enough. The harm is that Americans may be deluded into believing that all this congeniality may result in some real deficit reduction. The agreement purports to meet the fiscal 1990 Gramm-Rudman budget deficit target of $100 billion. In fact, it is based on a lot of suppositions and assumptions that cannot come true, according to an analysis by the Committee for a Responsible Federal Budget.

The committee claims that even if every single assumption is correct, the 1990 deficit still would be $125 billion. And that, of course, is illusion, too, since the figure does not include $153 billion in Social Security and other trust-fund surpluses that are counted against the deficit even though they are reserves earmarked to meet future spending requirements.

So in spite of the agreement, the United States is headed for its ninth consecutive year of budget deficits in excess of $100 billion, and the total federal debt will exceed $2.4 trillion, three times what it was when Ronald Reagan took office. Congress and the President bought time this year. They, and the American people, will have to pay the price next year.

[From the Washington Post, Apr. 16, 1989]

PAPER CUTS

The budget agreement just reached between President Bush and congressional leaders of both parties greatly understates the savings necessary to reach next year's deficit target, then fails to achieve even those and covers up the failure with duplicitous accounting. Its authors plead for time and understanding, saying the document should be seen less as itself a deficit reduction plan than as the first step down a longer path to such a plan. They argue that even this pallid agreement and the accompanying promise to continue to talk are better than the snarls and impasse of the Reagan years.

But surely that is not the standard. If the deficit cannot be cut in the strong first year

of a new administration, when can it be? Will it be easier next year, an election year? It is always easier next year, and meanwhile the danger grows that a recession will lock the present deficit and the drain it represents on the future into semi-permanent place. In neither party nor branch is there the economic leadership the country needs.

The deficit target next fiscal year is $100 billion. The rules are already rubbery; if the President and Congress can even momentarily come within $10 billion of that on paper, their work is counted a hit. The White House has decreed, on the strength of optimistic and internally inconsistent economic and other assumptions, that it will take only $28 billion in deficit reduction to reach the happy result. The main assumption is that interest rates will decline in the face of a strong economy, when strong economies drive interest rates up. Congress has weakly acquiesced in the confection even though its own budget office continues to point out what recent history confirms, that a much greater effort is needed. The budget deficit this fiscal year was supposed to be $136 billion, and not many months ago there were the requisite assurances that it would be. But the actual figure, as was understood all along, is likelier to be around $160 billion, and even that may not count everything.

As to the supposed cuts on which the President and Congress have agreed, nearly $900 million would come from moving some farm support payments from next year into this, now that no one is paying attention to this year anymore; the money wouldn't be saved, just paid to farmers earlier. Another $400 million would come from reversing an earlier good intention and keeping off budget—which is to say, not counting—the cost of the program enacted in the last Congress to bail out the underfinanced farm credit system. A similar fanciful $1.8 billion saving would occur by taking the postal service off budget next year, when it will be running a deficit while awaiting another increase in the price of a stamp. A one-time-only half-billion-dollar credit is creatively taken because not all the food stamps that have been issued over the years have been cashed; the writing-off of the forgotten obligations is counted as a spending cut. Similar credits are taken on the strength of little more than assertions that the Internal Revenue Service will be more vigorous in enforcing the tax code next year, that assorted benefit rolls will be better policed and that the payout of civil service pensions will not be accelerated. There are also to be more than $6 billion in the usual asset sales, after which comes the fiscal equivalent of dessert: having made all these paper cuts and thereby so decisively reduced the deficit, the budget writers claim the interest savings associated with a smaller debt.

A few things in the agreement seem real. Medicare costs would be nicked, defense spending would be a few billion dollars lower than the president earlier proposed (if the chancy spending estimates are to be believed), and there would be $5.3 billion in "revenue measures" if any can be agreed to. You know what those are; there need to be more of them. Plenty of spending cuts can be made, but as the present exercise again demonstrates, the spending side of the budget as a whole neither can nor will nor should be cut much below its present path. The key to genuine deficit reduction is a tax increase. The president's own priorities are suffering.

[From the Christian Science Monitor, Apr. 18, 1989]

BUDGETS AND SAUSAGES

The budget deal worked out by the White House and congressional negotiators nudges the federal deficit in the right direction. But it is the bare minimum necessary to avoid the Gramm-Rudman machete, and thus could make wringing out that last $100 billion in red ink that much harder in coming years. It also includes some questionable aspects—the phrase "accounting gimmicks" appears in most news accounts—that could come back to haunt budgeteers.

The budget outline includes a real freeze (no inflation adjustment) on defense spending, which the Pentagon can certainly live with. It tightens up on other spending areas, including some entitlements. And it also raises revenues (including some taxes) without crossing President Bush's line in the sand on "new" taxes.

But the bottom line is also based on economic assumptions—strong growth and lower interest rates—not shared by many experts across the political spectrum. The administration also insists that cutting the capital-gains tax rate will bring in more revenue because of increased financial activity, an assumption that seems overly optimistic, especially after the first year.

In some cases, budget wizards seem merely to have shifted spending in an "out-of-sight, out-of-mind" way. Like claiming $2 billion in savings by moving the US Postal Service "off budget." Or creating a quasi-governmental agency to sell bonds intended to revive the savings-and-loan industry. This allows government numbers crunchers to count the bond sales as revenue for now, when in fact they'll eventually have to be paid back at a higher interest rate than with a straight government loan.

Some of the plan's new revenue comes from the sale of government assets (often loan portfolios), which can cost Uncle Sam more in the long run.

Like sausagemaking, putting together a federal budget is not a pretty sight. It involves necessary trade-offs between short-term gains and long-term goals. And because it's oh-so-political, what's right can be overshadowed by what's expedient.

To end on a more positive note: There are many more steps in the budget-grinding process, chances for the Bush administration and Congress—so far, an unusually cooperative pair of chefs—to remove the gristle and add more nutritious elements.

[From the Chicago Tribune, Apr. 17, 1989]

A "FEEL-GOOD" BUDGET AGREEMENT . . .

President Bush summoned reporters to the Rose Garden Friday to announce an agreement with Congress to shrink the budget deficit for the next fiscal year. He called it a "first manageable step," but it was more like a tiptoe, hurting no one and leaving no visible footprint.

The best thing about the plan, said Senate Majority Leader George Mitchell, was "its existence," referring to the fact that a Democratic-controlled Congress and a Republican administration could agree on anything at all. But any display of bipartisan support was a little thin. Sen. Lloyd Bentsen, the Democratic chairman of the Senate Finance Committee, was so upset he refused to participate in the Rose Garden ceremony and left for Texas.

The pact, which Budget Director Richard Darman and congressional leaders worked on for two months in secret, offers an outline for reducing the fiscal 1990 deficit by about $28 billion. The idea to get the deficit down to about $99 billion next year, with half the reduction coming from increased revenues and the rest from lower spending. Without a budget accord, the deficit next year was expected to reach about $127 billion, down from an estimated $163 billion this fiscal year and $155 billion in 1988.

Unfortunately, the negotiators left the difficult decisions to congressional committees. For example, on the revenue side, after selling government assets and hiking user fees for government services, there's still almost $6 billion in additional new revenues needed. Darman insists there are no tax hikes in the plan and that there are many ways to raise the money through tougher tax-code enforcement and changes in the tax laws that still won't violate George Bush's read-my-lips campaign pledge of "No New Taxes!"

In return for being allowed to play the "quacks-like-a-duck" game on taxes, Bush gave ground on defense spending, agreeing to freeze Pentagon outlays at about $299 billion instead of letting them keep pace with inflation. That concession and some bookkeeping gimmicks, such as moving the postal service off budget, will add up to enough savings so Congress won't have to squeeze some of its favorite domestic programs.

The Bush administration's first effort at deficit reduction is disappointing at best and seems to be the same old gamemanship practiced by the previous White House bunch. As a result, Congress will keep on spending and no new taxes will be proposed to help pay the bills. Meantime, Bush can say he kept his tax promise, Congress can say it isn't cutting domestic programs and most Americans can say it didn't hurt a bit. Everyone can feel good about our fiscal mess—at least for a little while longer. But the mess remains.

[From USA Today, Apr. 17, 1989]

FACE UP HONESTLY TO DEFICIT PROBLEM

While last-minute fliers were busy paying their taxes this weekend, our political leaders in Washington were busy cooking up a recipe for fiscal misery.

President Bush and congressional leaders from both parties gathered in the White House Rose Garden to announce an agreement they said would cut the federal deficit by $27 billion next year. They know their numbers are phony, and they know they will waste your tax money in the long run.

In 1982, President Reagan's first budget, they said the deficit—the difference between what the government spends and what it takes in—would be $38 billion. It turned out to be $111 billion.

This year, they said it would be $136 billion. It's closer to $160 billion.

Now they're saying in public that it will be below $100 billion next year. But some are already admitting it will be billions more.

Some people, like the columnist across the page, tell you the red ink isn't so bad as long as we don't raise any taxes.

That's wrong. Our politicians in Washington have been bragging for years about not raising taxes. But they're borrowing money instead. That means you pay even more.

For every $1,000 you paid in taxes this year, $150 will be wasted just on interest on the debt.

You pay in higher interest rates on your mortgage, your credit cards, your car loans.

You pay in higher inflation. You pay at the department store, at the gasoline pump.

Worst of all, you pay because our leaders refuse to face facts and give those facts to the taxpayers. That lack of candor prevents us from solving our problems:

Schools decay in Chicago and Detroit because we "can't afford" good education.

Smog builds up over Los Angeles and Denver because we "can't afford" to fight pollution.

People live on the streets of New York and Philadelphia and Washington, D.C., because we "can't afford" sufficient housing for the poor.

President Bush and our congressional leaders should stop playing games.

Surely they can find ways to cut a $1.2 trillion budget to produce genuine savings, not just accounting gimmicks.

And surely they can consider raising taxes to that we can tame the deficit and get on with solving our problems.

One of the biggest myths around is that any politician who votes for a tax increase will be kicked out of office. Voters in South Carolina, Indiana, Virginia, Tennessee and Arkansas have shown they will support tax increases—if they are shown the money will be carefully spent on problems that matter and not just squandered.

Voters are not children. They are not selfish people who will spend and spend on VCRs and color TVs and other fancy toys while bridges crumble, rivers and lakes are poisoned and drug lords take over the streets.

They know it takes money to solve problems. But they want honesty and leadership from Washington.

Honesty and leadership. That would be a real return on our taxes.

[From the Memphis Commercial Appeal]

SMOKE AND MIRRORS

When Americans voted last fall to keep the White House in one party's hands and Congress in the other's, they virtually guaranteed that Washington would avoid decisive action on issues such as the federal budget. The budget compromise unveiled Friday by President Bush and congressional leaders fits that pattern. It uses phony numbers to conceal problems, postpones hard decisions and tries to reconcile the irreconcilable.

The compromise is supposed to trim the deficit from the current $163 billion to just under $100 billion. That may sound like an impressive achievement, but more than half the reduction will come simply from the increase in tax revenues produced by economic growth. Washington continues to benefit from growth-oriented, "supply-side" economics even while sneering at it.

The remaining $30 billion in deficit-trimming represents only about 2 percent of all federal spending. If it were not for the specific targets required by the Gramm-Rudman-Hollings budget law, the negotiators would not have produced even that much.

About half of this $30 billion is to come from new revenues, the other half from spending reductions. From past congressional behavior, we worry that the lawmakers will find a way to welsh on the latter side of the deal: A year from now it may turn out that the spending cuts were largely fake, the revenue hikes all too real.

Some phoniness is already apparent. More than $3 billion of the plan's alleged "savings" are to come from tricks such as moving the U.S. Postal Service "off budget." Another $1 billion will be "saved" from 1990 by shifting some farm subsidies to 1989.

Other spending restraints are one-shot items, which will make the 1990 numbers look better but avoid long-term deficit cuts. Rep. Bill Frenzel (R-Minn.) says such tactics will "make the work for next year very difficult."

The negotiators agree on several revenue targets, but not necessarily on how to meet them. Some $2.7 billion is to come from increased fees for government services, $5.8 billion from taxes. Will the latter goal be reached merely by closing loopholes, or will Bush end up abandoning his "read my lips" pledge against tax hikes? At this point nobody can be sure.

The President sacrificed major policy goals, such as keeping defense spending in pace with inflation, to get this compromise. He should have demanded more in return.

[From the New York Times, Apr. 15, 1989]

PHANTOM OF THE ROSE GARDEN

What better backdrop for fragrant scenarios than the White House Rose Garden: that's where President Bush and the leaders of Congress yesterday proclaimed their agreement on next year's budget. Their pact leaves a gaping disagreement on taxes. Their numbers are laced with optimism and gimmickry. But give them credit for reaching any agreement at all, and so quickly.

Mr. Bush remains true to his inaugural promise of wanting to work with the Democrats. Rather than submit a budget full of proposals that would be rejected out of hand, as his predecessor did regularly, he presented an outline and offered to negotiate. The early confrontations that typified the Reagan years have thus been avoided. Still, the new spirit faces big tests in the months to come.

The agreement's most serious weakness is its failure to look beyond the coming year. Mr. Bush promised that when he became President he would develop, with Congress, a long-term plan to erase the deficit. Instead they produced another one-year patch job to reach the target inscribed in the Gramm-Rudman-Hollings budget law. The target is $100 billion, more or less, and their plan gets there, more or less.

Mr. Bush conceded that the plan doesn't address the future. He called it "a first, manageable step." But Senator Lloyd Bentsen, a negotiator as chairman of the Finance Committee, refused to join in the announcement because he considers the revenue estimates unreal. As usual, the Administration assumes a stronger economy and more revenue than do most independent experts, and Congress goes along because realistic forecasts would make it harder to reduce the deficit. In addition, the President still wants a cut in the tax on capital gains. He says this would yield $5 billion in revenues; the Democrats disagree, and don't like the idea anyway. Thus, the tax debate remains wide open.

The accounting gimmicks are less important than the unresolved revenue issues. But they're still blatant. The postal deficit would be wiped out by the simple expedient of removing the Postal Service from the budget. And farm subsidy spending will be lowered by juggling the timing of payments. Neither change will save a penny, but the overall budget deficit will look smaller.

Tricks aside, there is some substance to the agreement, notably the President's agreement to spend less for defense and more for other programs. He yielded nothing on new taxes, though, and thus blocked the possibility of serious collaboration to end the deficit.

For two years despite much clamor and claims of success, the deficit has grown. If yesterday's agreement reduces it, that will be an achievement. But the vision in the Rose Garden was little more than a phantom. The budget dilemma remains.

[From the (Little Rock) Arkansas Gazette, Apr. 1, 1989]

DEFICIT IS HEADED FOR A MEXICAN STANDOFF

Liberals, conservatives and assorted free-floaters in Washington are tinkering gingerly with the 1990 budget but they are treating it the way an airport bomb squad deals with a mysterious package. President George Bush set the mood for the ritual by accepting former President Ronald Reagan's revenue-spending plan, then passing it on to Congress without bothering to examine the contents.

Sessions between representatives of Congress and the administration—designed to hold the deficit around the $100 billion permitted in the (revised) Gramm-Rudman deficit reduction limit—have produced a Mexican standoff. Both sides must know that the roughdraft budget is based on absurd assumptions, magic asterisks and an accounting system borrowed from a Texas savings and loan association.

Treasury Secretary Nicholas F. Brady, Budget Director Richard G. Darman and Bush cling to the campaign myth that the deficit can be eliminated over the next four years by freezing the total spending for a few minor domestic programs and waiting for economic growth to boost revenue. Meanwhile, defense spending, interest on the national debt and other obligated costs will continue to climb. The flexible freeze is a fraud.

On the other side of the table, negotiators proclaim, with equal conviction, that they will not reduce spending for entitlements.

The Congressional Budget Office, using widely held forecasts for economic growth and interest rates, estimated that the deficit four years down the road would be at least $100 billion—even if all of Bush's spending constraints were adopted.

Neither side is considering the consequences of other possible developments.

No provisions are made for the bailout of savings and loans. Bush has offered a proposal for committing an additional $50 billion to protecting depositors, but he budgeted $1.9 billion to the project. The trick here is to keep the $50 billion off the budget.

The Federal Reserve is following a monetary policy designed to control inflation by tightening credit and raising interest rates. A further increase in the cost of money will move more thrifts into the red and make the bailout infinitely more expensive.

The trade deficit (current accounts basis) has declined from a record of almost $160 billion in 1987 to about $135 billion last year. Now it is showing signs of resuming its rise. America's net foreign debt could reach $1 trillion by the end of 1992.

All the hazards associated with the growing national debt suggest that the time has come to resolve the Mexician standoff. The liberals will have to give some ground on favored programs; conservatives will have to break their vow on taxes. The task will not be easy.

Republicans are convinced that their position on taxes was responsible for victories in the last three presidential elections. Demo-

crats believe their defense of entitlements enabled them to regain control of the Senate in 1986 and strengthen their hands in Congress.

The odd fact is that both parties may have assessed the situation accurately. Americans know what they want—more government spending and less taxes. Still, somebody will have to break the standoff if the country is to avert disaster.

[From the Washington Times, Apr. 18, 1989]

A BUDGET, SORT OF

Call it a death wish: No sooner had Democratic leaders hammered out a compromise federal budget with President Bush than some of them began hectoring for a tax hike in the election year of 1990. Sen. James Sasser, chairman of the Senate Budget Committee, and Rep. Leon Panetta, chairman of the equivalent House panel, implied that they will push next year for new taxes. Meanwhile, House Ways and Means Committee Chairman Dan Rostenkowski and Sen. Lloyd Bentsen of the Senate Finance Committee boycotted Friday's announcement of the plan, partly for fear that Congress will get blamed next year for raising the taxes it plans to raise.

The budget document, like most budget documents, conceals at least as much as it reveals. On the bad side, the conferees agreed to take the Postal Service off-budget (a horrible idea) and to keep Social Security Trust Fund surpluses in the deficit calculations (which is misleading). The White House squeezed the budget within the Gramm-Rudman-Hollings deficit-reduction target of $100 billion for next year by adopting economic assumptions that seem a little optimistic, given the Federal Reserve Board's recent efforts to keep monetary growth slow and interest rates high. The president also seems to have given up on the idea of cutting the capital-gains tax rate, a move that would stimulate investment and enhance our entrepreneurial competitiveness with Japan, which doesn't tax capital gains at all.

The compromise also included some good news, not the least of which is that the much-maligned Department of Defense has begun to show how government might live within its means. Defense Secretary Richard Cheney plans to meet his fiduciary obligations by cutting back on the production of the Stealth Bomber, scrapping the V-22 rotating-engine craft ordered up by the Marines, spreading out the deployment of a new generation of army attack helicopters, and planning on strategically acceptable troop reductions. While the Pentagon still could use some sweeping reform, beginning within an overhaul of the procurement system, Mr. Cheney at least has done something that social-service agency heads haven't been doing: he cut out some programs that were unnecessary or that didn't work.

We hope the sense of frugality proves contagious, since many of our most prominent social programs have proven spectacularly incapable of achieving their primary aim, which is to promote self-sufficiency among America's poor. If Congress judged social services by results, rather than by propaganda value, the budget's bottom line and the American underclass both would benefit.

Congress also ought to explore a suggestion made yesterday by Sen. Chuck Robb of Virginia. He urged his colleagues to draft budgets more in conformity with generally accepted accounting principles, rather than sweeping the postal service under the "off-budget" rug or hiding other problems in various trust funds. He wants the American people to understand just how bad or good the budget situation is at any given time.

He's right: Congress must adopt standards of honesty in evaluating programs and reporting budget figures. The Bush administration meanwhile ought to develop a battle plan to cut spending and taxes. This year's genial budget talks have merely set the stage for more open guerrilla warfare in 1990.

[From the Los Angeles Times, Apr. 13, 1989]

BUDGET WITH A LEXICON ALL ITS OWN

Word has filtered out from secret Washington meetings that the White House and congressional budget-writers are near agreement on a framework for a fiscal 1990 budget. But there will be no official announcement until the deal is done. As House Majority Leader Thomas S. Foley (D-Wash.) put it: "Nothing is agreed to until virtually everything is agreed to."

Sound like double talk or obfuscation? Perhaps. But that is not unusual when Washington talks about budget matters. Ronald Reagan's Administration coined the term *revenue enhancement* as a substitute for tax increase. The Bush Administration has proposed to spend some $50 billion to bail out failed savings and loan companies without the money even showing in the budget, by simply declaring that the item is "off-budget."

And now, the Administration is trying to write a new definition for budget cuts and budget freezes. This effort attempts to institutionalize Reagan's longstanding irritation with critics who claimed he was cutting the budget when he actually saw himself as spending more money.

For some years now, Congress has used a "base-line" budget as a foundation for each year's new budget. The base-line budget reflects the work of a specific program at last year's level plus enough new money to offset inflation and to accommodate natural growth in the program.

Let's say that the federal food-stamp program cost $100 last year to serve 10 qualified recipients with $10 of benefits each. But in the new year, 15 people qualified for the program and the cost of the food to be provided went up by 5%. To maintain the program at a base-line level, Congress would have to appropriate $157.50 in the new budget year. That is last year's $100 plus $50 for the five new recipients and an additional $7.50 for inflation.

The President could budget $135 for the program and claim the budget was being increased. But this would be a cut under the base-line budget concept because one of two things would have to happen. 1) The number of recipients would have to be reduced, or 2) If all 15 recipients were included in the program, each person's benefit would have to be cut compared with the level per individual the previous year.

What emerges here is President Bush's flexible definition of his flexible budget freeze. Bush applied the "flexible freeze" to $136 billion in domestic-spending items that would be held at the previous year's dollar amount, with no increase for inflation. Under the base-line concept, that is not a freeze, but a real cut in services. Bush also claimed he was freezing the defense budget although, in fact, defense spending was adjusted for inflation.

So a freeze is not necessarily a freeze. A cut may be a cut, or it may be a freeze. While this may sound like a trivial dispute, Herbert Stein, a former chairman of the President's Council of Economic Advisers, says the Bush arguments show a disdain for serious budget analysis. Use of the base-line budget concept is an attempt to go beyond surface numbers and get an appreciation for what is really going on in the budget, said Stein, now a senior fellow at the American Enterprise Institute. This is a way to distinguish between real policy changes in a program and nominal ups and downs caused by fluctuating prices. To ignore such distinctions would render much talk about the budget meaningless, he said.

Surely so, Mr. Stein.

[From the Wall Street Journal, Apr. 10, 1989]

DUCK WATCH

The White House and Congress are deep in negotiations over the budget, so Washington is bird watching. The word is out that everyone should don their camouflage, grab their binoculars, and hide in the marsh grass of Pennsylvania Avenue to wait for the new taxes, er, ducks to arrive.

The duck watch got under way last week after word spread that President Bush's chief ornithologists, budget director Dick Darman and treasury secretary Nick Brady, had secretly agreed to the budget framework for fiscal year 1990 offered by House Budget Chairman Leon Panetta and Ways and Means Chairman Dan Rostenkowski. This means they'd entered Congress's duck blind.

The Panetta framework takes the traditional Democratic approach to "deficit reduction," dividing equally between "revenue increases" of $14 billion and spending cuts of $14 billion ($7 billion each from defense and domestic programs). It assumes that promised cuts in spending will in fact be made while new taxes will in fact raise the revenue claimed in advance. In the real budget world this never happens, as the House appropriations subcommittee proved last week by seeing Mr. Bush's $2.2 billion in proposed spending increases and raising them by $2.4 billion.

Meanwhile, the Darman-Brady capitulation to these "revenue increases" suggests the ducks have already landed. Democrats had quickly snatched up nearly $8 billion or so in "user fees," asset sales and assorted revenue raisers originally offered as part of the Bush budgets.

But they've firmly resisted the supply-side portion of Mr. Bush's proposals—the $4.8 billion revenue windfall from cuts in capital gains taxes. They've also rejected out-of-hand an additional $1.8 billion gain from applying existing Medicare laws to state and local government employees. Chaiman Rostenkowski, protector of O'Hare Airport, also nixed airport user fees. This Democratic framework means that more than $5 billion in "new revenues" (and $3 billion more to make up for expiring taxes) will have to come from somewhere—i.e., from ducks.

The two sides will agree not to call them ducks, of course, but as Mr. Darman once said, if it quacks . . . One proposal would reduce the tax deductions on corporate dividend; someone actually thinks this will raise $300 million a year. Another would treat interest payments on some leveraged buyouts as a "loophole"; some Congressional tax accountant thinks this will raise $1 billion to $2 billion. Broadening the minimum tax

base for corporations is somehow supposed to raise $2 billion as well.

President Bush could still say no to all this, but what we hear is that the Administration wants an agreement even if it means putting its capital-gains proposal into the tank. We also hear that Mr. Rostenkowski demanded complete GOP support for the deal on the House floor (including the 101 House Republicans who've signed a no-tax-increase pledge). This would help explain why the White House squelched a no-tax-increase resolution at last Wednesday's House Republican caucus meeting, lest it offend Rosty.

White House aides are already telling uneasy Republicans that "the markets" are somehow demanding a deficit-reduction deal. We can understand White House aides believing they need a deal for the sake of Beltway politics, but we can't believe anyone really thinks the markets prefer a tax increase to a capital-gains cut. Perhaps someone should tell President Bush where the duck stops.

[From the Minneapolis Star and Tribune, Apr. 20, 1989]

FEDERAL BUDGET DEAL WAS AN EMPTY PROMISE

The federal budget compromise put forward Friday as significant movement toward taming the deficit was little more than a political show, mainly for the benefit of President George Bush. By refusing to consider tax increases, Bush has blocked substantive efforts to tackle the deficit. So Friday he gathered many of the major players in the national government around him and simply proclaimed a victory.

Last week's deal to rewrite the 1990 budget allows Bush to claim he kept his election promise of no new taxes. Congress meanwhile, gets to dodge the tough matter of deciding where to cut spending while still meeting the requirements of the Gramm-Rudman budget-balancing law. But the agreement is based on unrealistically optimistic projections about the economy and inflation, and includes a fair amount of accounting gimmickry.

The compromise lays out only general spending and revenue guidelines. It is really an agreement to agree later. The two most powerful men in Congress on Tax matters, Sen. Lloyd Bentsen and Rep. Dan Rostenkowski, declined to endorse Friday's announcement, Minnesota Rep. William Frenzel, the senior GOP member of the House Budget Committee, called the compromise disappointing and said it will simply push the hard budget decisions into next year.

Friday's announcement may have been good political theater, but it was poor public policy. Federal deficits have turned the United Sates into a debtor nation, dependent on foreigners for its investment capital. They have produced a diminished dollar that makes American companies and real estate a bargain for foreign investors. The resulting fire sale of American businesses and technology raises serious questions about the country's ability to control its economic destiny. The deficits also have prevented the United States from leading the effort to solve the Third World debt crisis.

House Ways and Means Committee chairman Rostenkowski is right to press for an increase in taxes, despite Bush's threat of a veto. Real reductions in spending for both military and domestic programs are also needed, as are limitations on cost-of-living allowances for Social Security, Medicare and Medicaid.

Bush should be commended for his willingness to negotiate with congressional leaders on the deficit issue, something Ronald Reagan refused to do. But the time has come for real progress on this critical issue, not just vague promises of better things to come.

Mr. DOMENICI. Madam President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 11 minutes 43 seconds.

Mr. DOMENICI. First, I want to say that I do not intend to use all of it. I think a number of Senators want to get to vote as early as possible. Might I say, after hearing my friend, Senator ARMSTRONG's discussion, and without hearing the rebuttal which I am sure my friend from Texas is going to make, I look around to see whose budget this was, and the only person I could not see here was President George Bush. So I want to say I surely do not think you should have been so vehement against President George Bush's budget.

I yield 5 minutes to my good friend from Texas.

Mr. GRAMM. Madam President, the budget before us is like a little orphaned child. Nobody wants to claim parentage. I am not here to claim paternity myself. In fact, I cannot take any credit for having written this budget. In many ways, it can be assailed, but when we get to the bottom line, I think there are certain positives of this budget that we ought to look at. It is clear that this budget is something between kissing Sophia Loren in the moonlight and kissing your maiden aunt at the nursing home. But, Madam President, this budget does move us in the right direction.

Let me outline how. First of all, under this budget, Federal spending grows at 2 percent. Does the budget have some asset sales and cutting corners here and there? The answer is clearly yes. But the bottom line is, we are spending 2 percent more than we spent last year. For the 20 years prior to the adoption of the Gramm-Rudman-Hollings balanced budget law, Federal spending grew by more than 10 percent a year. So spending is growing at about one-fourth the rate in this budget that it grew on average for the 20 years prior to 1985.

Second, under this budget, the Federal Government is getting smaller relative to the private sector of the economy. In fact, in 3 out of the last 4 years, the Federal Government has gotten smaller relative to the private sector of the economy.

So, Madam President, this is not my budget. I am not claiming any credit for it. But the bottom line is, the deficit is coming down. The deficit is still too large. Our problem is that we have committed to eat an apple, and this is not a very large bite. It means the apple is going to be harder to eat in the next two or three bites. But anybody who claims that this budget is not moving in the right direction, that this budget does not represent a substantial change in fiscal policy, that this budget does not represent fiscal restraint, I think is simply not being accurate.

We can always do more. We should do more. I wish the deficit were coming down faster. My guess is the deficit will be $115 billion and not $100 billion under this budget, but it was $233 billion when we started. That is cutting the deficit in half. That is dramatic progress.

So this budget may not be pretty enough to want to take home and show it to your mama, but it is a dramatic change in fiscal policy, given all the proposals to spend all the money that is proposed to spend. If we live on this budget, we will have made progress.

I hope, Madam President, that all of the people who are saying we should have done more will be here on the floor of the Senate when I predict later this year there will be effort after effort to try to waive the budget constraints, to try to spend more, to try to breach these targets. All these people who wanted to do more, who wanted to take bolder steps, I hope they will be here when we try to enforce this budget. I suspect many of them will not. I will be here, and I intend to remind them of how everybody said this was so little, that this budget did not represent restraint.

I submit that when we try to live within these constraints, that there are many here who will find them more binding than they think today and will be eager to get out from under them. I will hopefully be here with many others trying to see that we do not.

Mr. HOLLINGS. Madam President, all we hear in the adoption of this budget is "This is the best we can do." Obviously, "this is the best we can do" if no one tries to do better. The President and congressional leadership in closed session conspired to save their political hides by agreeing and then announcing publicly "this is all we can do." Half the Budget Committee in the Senate voted to freeze spending, they did so in a bipartisan move but by the time it reached the floor, the White House and leadership lobbied strong to make certain "This is all we can do." This totally ignores where we are and what needs be done. Only yesterday, we had a spirited session before the Senate Finance Committee and there was a unanimous feel in the room that we should do something about the deficit. What should be done is touched on in my comments which I now submit in open session and ask to be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR ERNEST F. HOLLINGS BEFORE THE SENATE FINANCE COMMITTEE ON S. 442, MAY 17, 1989

As the Cheshire Cat told Alice in "Alice in Wonderland," before we decide where we are going, we must first find where we are.

Where we are:

1. For eight years running now, we have been spending on an average of $200 billion more than we are taking in.

2. At this moment, we are spending $300 billion more this year than we will take in.

3. The national debt has jumped from $914 billion in 1981 to $2.8 trillion at this moment.

4. Gross interest costs are at $275 billion.

5. Net interest cost this year equals $174 billion.

6. Gramm-Rudman-Hollings is not working—the deficit agreed to by the House and the Senate is nearer $150 billion than $100 billion.

7. Rather than growing out—we are growing in. While President Reagan cut $30 billion from domestic programs, interest costs have jumped from $52 billion in 1981 to $174 billion in 1989. We have started a new spending program of $122 billion for nothing.

8. This new spending program hemorrhages at the rate of $20 to $25 billion each year.

9. The best of government eliminators—Ronald Wilson Reagan—"eliminate the Department of Education and the Department of Energy"—couldn't stop the hemorrhage by cutting programs.

10. Defense accounts for 26% of the budget; entitlements for 48%. With the contracts in the pipeline that cost more to cancel than to complete, with the inflationary costs of operation and maintenance, there will be no real cuts in defense for the next few years. The same for entitlements which are increased by the Summit Agreement $32 billion. Interest cost accounts for 15%. If there is no saving in defense, entitlements and interest costs, the only chance to cut is in domestic spending—11% of the Budget. You can eliminate all domestic spending and still have a deficit. For those worried about making the government bigger—it already is bigger. We're just not paying for it.

So we need taxes. That is where we are. There is no free lunch. In trying to get by, we are depleting our trust funds and putting America up for sale at half-price. The tremendous deficits have caused us to devalue our dollar and every Governor in the land has an office in Brussels or Tokyo telling them to hurry up and buy America while they can. If not owned by foreigners, we'll soon be controlled by foreign financing. We need to finance our own debt.

Let's look at taxes. To begin with, we need a substantial tax—more on the order of a consumption tax. Excise taxes, "sin" taxes, user fees are fiddling while Rome burns. Five to six billion dollars will not do the trick when the interest hemorrhage is jumping $25 billion. Ten to fifteen cents on a gallon of gas won't do the trick. Moreover, both the Senate and the House have just resolved overwhelmingly against a gasoline tax. The reform of income taxes of 1986 is just being implemented. Obviously, Finance and Ways and Means have no idea of jimmying these figures before they have even taken effect. The only tax that other industrialized nations have used successfully that we have avoided is a consumption tax, the value-added tax. We avoided it for one main reason: it brought far more revenue than was needed. Now the need is bigger than the tax. A VAT at 5%, exempting food, housing and health care, raising $70 billion a year would still take until the year 2023 to eliminate the deficit and the debt. We need to impose such a tax and copper fasten it in a trust fund at the Department of Treasury to be used only to reduce the deficit and the debt—not to be used for any other purposes.

I'm not a tax expert; I am prepared to answer the questions as to the VAT mechanism, inflationary impact if any, the regressive nature and the like but we have better witnesses. I have attached a description of VAT. Let me just make the political case.

As Irving Zuckerman pointed out, in the Korean War we raised taxes and held interest rates down rather than raising interest and holding taxes down. With lower interest rates, the United States built over 4,000 plants while waging war and while under the highest inflationary conditions. It must be remembered that higher interest rates are virtually taxes paid to the banks instead of to the government—or in this case to Japan—over $5 billion a month. And in the Vietnam War, President Lyndon Baines Johnson paid for his guns and butter in 1968 with a 10% surtax, delivering a budget in surplus to Richard Nixon.

I testified before you on the value-added tax two years ago. We receive 8 votes out of the necessary 12 before the Budget Committee at that time—bipartisan support. VAT is an idea whose time has come. We should have done this rather than Reaganomics 8 years ago. Today, the need is overwhelming. Today, we have fiscal anarchy. We face the S&L problem—put it off-budget—say it doesn't exist. Our House colleagues have just called the CBO to have the Drexel-Burnham $600 million fine included as an offset to the G-R-H requirements of the urgent Supplemental bill. We refuse to face reality. We have stopped competing. We continue to tell each other that we are fat, rich and happy and that there is no need for government. We have started down the road that England traveled at the end of World War II. When the British withdrew from the colonies, they told her, "Don't worry—instead of a nation of brawn, you will be a nation of brains. Instead of producing products, you will provide services. Instead of creating wealth, you will handle it and become a financial center." And England has gone to hell in an economic handbasket.

It was David Ricardo who told the economic world 200 years ago that each nation should produce according to its comparative advantage. When the British suggested this to our forefathers, Alexander Hamilton wrote his famous booklet, "Report on Manufactures." He told the British to bug off. "We will not remain your colony," said Hamilton. And the first bill to pass our nation's Congress on July 4, 1789 was a tariff bill of 50% on 60 articles, beginning with steel. We used our government to produce this economic industrial giant United States of America. And now the Japanese, emulating us, have used their government to develop the state-of-the-art model of protectionist production and trade. The comparative advantage in today's trade war is government. Now, that war started 200 years ago, is about won by the Japanese. Today, they are richer than you and me. Our per capita GNP income is $19,758 (U.S. Department of Labor); Japan's is $23,356 (Government of Japan). So I appear not to bash the Japanese—you can't fuss with success—but to bash you and me. We live in a dangerous paradox. Overdeveloped Japan is taking the underdeveloped United States to the cleaners. Yes, we have the Donald Trumps and Eisners of Disney making $40 million a year. But we have our citizenry sleeping on the grates outside the Justice Department. Some justice! We have children brought into this world with undeveloped minds—minds that will never develop due to a lack of protein. We have "cities on a hill" rampant with crime and drugs. While our bridges and infrastructure collapse, we are building water lines, sewer lines and libraries in Europe. You and I are the largest employer in Western Europe. But in this country, there is no money for the environment, no money for health care—37% of the population is without—no money for teachers. Fat, rich and happy? No, we are hungry and unhappy. And before we can get happy, before we can provide for our needs, we have got to take our medicine. We have got to excise this cancer of interest cost and this can only be done with the trust fund at the Department of the Treasury that is truly a trust fund—never to be used as an offset for any other than the deficit and the debt.

Finally, let me emphasize one point—all taxes are regressive. But if used to protect, if used to develop, if used to open doors, then you have reached the fundamental of democratic government. I heard the economists 40 years ago tell me that a sales tax was regressive. At the time, South Carolina was the poorest of the poor. And we had the greatest need. We had the greatest illiteracy. We had the greatest population to be educated. We were told the poor couldn't afford to be taxed. We enacted a sales tax and allocated it to education. We developed a public school system and technical training to provide skills and today we have a veritable Fortune 500 group of industries and opportunity in South Carolina. Regressive? It's the most progressive thing I have ever done in politics.

VAT DESCRIPTION

A value added tax is a broad based consumption tax that is imposed at each stage of production of goods or delivery of services. I have proposed a "destination-based, invoice-method" VAT of 5 percent, which exempts food, housing and medical care. It is "destination-based" because the tax is paid in the country where the goods or services are consumed. This means goods consumed in the U.S. are taxed here. Those consumed in other countries are not taxed here.

The "invoice-credit method" refers to the method of calculation of the VAT. The invoice method imposes a VAT at each stage of production and the tax is listed on the invoice. As a taxpayer, I have two entries on my ledger: one for VAT paid on purchases, and one for VAT received on sales. I receive credit for tax paid on purchases and use it to offset tax due on sales. The invoice acts as a paper trail for the IRS. This is repeated at each stage of production up to the point of retail sale.

Obviously, I view the VAT as the cleanest, most efficient method of raising sufficient revenue to eliminate the deficit and debt. It is a common-sense tax that offers a number of collateral benefits. Under the invoice method, the VAT tax is substantially self enforcing. For instance, if I purchase a product from you, I pay for your value added tax in my purchase price. In order to

receive credit for the payment of that tax, I must show, by invoice, offsetting sales including payment to me. My net VAT liability is determined by subtracting the tax paid on purchases from the tax received on sales. So, in order to cheat the government, you have to cheat your customers or your suppliers, and most businessmen are very good at not getting cheated.

Also, because it is destination based, the VAT carries with it very important trade benefits. A VAT is a "border neutral" tax, which means that when a good passes out of the country in which it is produced, the VAT is rebated to the seller. In addition, when the same product is imported into the country where it is to be consumed, that importing country's VAT is added to the product. So, a country without a VAT, like the U.S., is getting the worst of both worlds: foreign goods are cheaper here because the VAT is deleted, and U.S. produced export items are more expensive because a VAT levy is included in the sale price by the importing country. Lester Thurow, Dean of the Sloan Business School at MIT, has said, with good reason, that "The rules of international trade are structured to make you stupid if you don't have a value added tax."

A VAT is also a consumption tax, and as such, has the effect of discouraging consumer binges and hence encouraging savings. The retired Senate sage Barry Goldwater has said, "If you want to discourage something, tax it. If you want to encourage it, subsidize it." Yet, in this country, we perversely tax savings and subsidize borrowing and spending. A VAT would reverse this.

The three most common criticisms of a VAT are that it is inflationary, that it is a money machine for expanding by government, and that it is regressive. The first criticism, that it is inflationary, is overblown, and the other two I have addressed in my bill. Experience shows that while modest inflation can be attributed to a VAT, it is a one-time increase which does not feed the tax-price-wage spiral that most people fear. In addition, deficit reduction made possible by a VAT, and the corresponding lower interest rates would largely offset any inflationary pressure. In fact, it will unburden taxpayers from the cruelest tax of all, the $174 billion in annual interest costs on the rising national debt.

As for the regressive nature of a VAT, my version will exempt food, housing and medical care. Since the poorest Americans spend the bulk of their income on these necessities, these exemptions substantially eliminate regressivity.

Finally, the "money machine" argument is moot under S. 442. All of the revenue from the VAT would go into a sarosanct dedicated Deficit and Debt Reduction Trust Fund. VAT revenues must not and will not go toward starting up the federal gravy train again.

RURAL DEVELOPMENT

Mr. LEAHY. Madam President, first I would like especially to thank the Senator for his excellent efforts on behalf of rural development in the budget conference. He successfully persuaded the House to recede to the Senate resolution numbers. I and my colleagues are grateful for his help. I would also like to clarify the amount of funding available for rural development in the final resolution. It is my understanding that the resolution includes $300 million in budget authority and over $100 million in outlays for fiscal year 1990. This level assumes that all other discretionary programs within the agriculture function are held to a 1989 "hard freeze" level.

Mr. SASSER. I appreciate your kind remarks and would also like to note that Senators EXON, SANFORD, CONRAD, and FOWLER have played an instrumental role in the Budget Committee to secure additional funding for rural development. While, the 1990 budget resolution contains no specific assumptions concerning the allocation of discretionary spending increases, you are correct that $300 million in budget authority and over $100 million in outlays would be available for rural development if all other programs within function 350 are held to 1989 levels. I am pleased that the House agreed to adopt the Senate resolution levels for rural development funding.

NRC FEE

Mr. DOMENICI. Madam President, I wonder if I could engage the distinguished chairman of the Budget Committee in a discussion of the assumptions underlying the reconciliation instructions in the conference report on the budget resolution. There are some significant differences between the House and the Senate reconciliation instructions which may cause our committees some confusion.

The crux of the difference is this: While the assumptions underlying reconciliation, instructions to Senate committees are generally unspecified, the assumptions, underlying reconciliation for House committees are quite specific. For example, the $450 million reconciliation instruction to the Senate Environment and Public Works Committee is denoted as "unspecified." By contrast, the House Energy and Commerce and Interior Committees are reconciled with a $299 million saving instruction which is denoted as "Nuclear Regulatory Commission [NRC] User Fees."

Because NRC fees are within the jurisdiction of the Environment and Public Works Committee on the Senate side, the question arises as to whether the conferees adopted the House NRC fee assumption of 100 percent cost recovery. Do the conference report reconciliation instructions for the Senate make this assumption? In more general terms, are the conference report assumptions for reconciling House committees applicable to the reconciliation instructions for the Senate?

Mr. SASSER. Madam President, the Senator from New Mexico raises a most important point. As the Senator knows, the assumptions that underlie reconciliation instructions are not binding on committees. The committee's responsibility is to produce legislation within its jursdiction which produces savings necessary to meet the instruction. There is no requirement that this legislation be based on the assumptions used in developing the budget resolution. Committees have the ultimate responsibility for determining the method chosen to meet their instructions.

With regard to the difference between reconciliation instructions between House and Senate committees, the answer to your question is no. Unless noted otherwise, the conference report assumptions for reconciling House committees do not apply to the Senate reconciliation instructions.

In the case of the Environment and Public Works Committee, the $450 million reconciliation instruction could be accommodated through any number of actions which do not include an increase in NRC fees to 100 percent. For example, an increase in NRC fees to 45 percent combined with the imposition of a chlorofluorocarbon [CFC] production proposal could most easily achieve the reconciliation instruction.

Madam President, I've already stated that there are very few specified assumptions underlying the reconciliation instructions to Senate committees. NRC fees are a case in point. While the House has identified its NRC fee assumption the Senate has not discussed its position on these fees. Because of the controversy over these particular fees, I feel compelled to outline the Senate's assumptions.

The Senate budget resolution and the reconciliation instruction for the Environment and Public Works Committee in the conference report assumed a cost recovery level of 45 percent for the NRC.

This level is consistent with the current fee structure and addresses concerns raised by the Senate Environment and Public Works Committee, which has repeatedly stated that a 45-percent cost represents a ceiling.

Mr. DOMENICI. I thank the Senator for this clarification.

Madam President, I ask unanimous consent that two letters from the Senate Environment and Public Works Committee regarding NRC fees be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON ENVIRONMENT
AND PUBLIC WORKS,
Washington, DC, May 8, 1989.

Hon. JAMES R. SASSER,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The House passed budget resolution for FY90 (H. Con. Res. 106) includes a reconciliation instruction to the Senate Environment and Public Works Committee to increase user fees in the amount of $299 million, equal to 100% of the budget for the Nuclear Regulatory Commission. That requirement parallels the assumption in the President's FY90 budget. As stated in the Committee's views and esti-

mates submitted to the Budget Committee in March, we are opposed to this proposal.

The issue of NRC fees has been a heavily debated and difficult matter for this Committee. Most recently, we reluctantly agreed to 45% fee recovery of the Commission's budget for FY88 and FY89 as part of the Omnibus Budget Reconciliation Act of 1987. This was one of the most contentious points in the overall reconciliation conference and one of the last to be resolved that year. It was further complicated by the fact that this Committee was directed to increase NRC fees, yet the savings were simultaneously scored to the Senate Appropriations Committee, a situation we assume will not be repeated. In terms of policy, the concerns we expressed at the time still remain. It is bad policy as well as inequitable and unfair to the regulated community to impose fees that would result in recovery of all or most of the Commission's annual budget.

The implicit assumption in the Senate budget resolution (S. Con. Res. 30) reconciliation instruction to this Committee is that the 45% level will be continued in FY90. It is too early to predict whether the Committee will agree to report corresponding legislation. however, we would view 45% fee recovery as a ceiling in our deliberations.

On behalf of the Environment and Public Works Committee, I urge you to insist upon the Senate NRC fee position when you meet with the House Budget Committee in conference on the FY90 resolution. We would be vigorously opposed to any directions to this Committee to elevate NRC fees in the order of magnitude proposed by the House.

Sincerely,

QUENTIN N. BURDICK,
Chairman.

COMMITTEE ON ENVIRONMENT
AND PUBLIC WORKS,
Washington, DC, May 9, 1989.

Hon. JAMES R. SASSER,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR JIM: We understand that you are meeting in conference tomorrow to discuss the House and Senate budget resolutions. One major issue in those discussions will be the extent to which user fees should be imposed by the Nuclear Regulatory Commission.

Current law permits the NRC to impose user fees equal to 45% of its budget, and the Senate budget resolution assumed that the 45% level would be continued in fiscal year 1990. The House budget resolution, however, calls for an increase in user fees to a wholly unrealistic amount equal to 100% of the NRC budget.

We strongly oppose the imposition of user fees above a 45% level. Therefore, we seek your assistance in firmly resisting all efforts to attempt to increase the present level of NRC user fees. Thank you in advance for your cooperation.

Sincerely,

ALAN K. SIMPSON,
Ranking Minority Member,
Subcommittee on Nuclear Regulation.
JOHN BREAUX,
Chairman,
Subcommittee on Nuclear Regulation.

THE BUDGET

Mr. COATS. Madam President, my first responsibility to the people of Indiana is to set priorities—priorities that will determine how the Federal Government can best serve their needs. And among the most important of those priorities is the need for responsible management of the Government's finances.

The past two decades have seen a faster growth rate for the Federal Government than in any other period in the Nation's history. And during that period the Federal Government has run a budget deficit each and every year. But the reason we have been operating in the red for so long is not because we lack revenue. On the contrary, during the past 8 years alone tax revenues have increased by more than $400 billion. The Federal tax burden has reached a near historic high of over 19 percent of GNP. When State and local taxes are included, Americans are giving up a bigger share of their paychecks to taxes than they ever have in our Nation's history.

No, we do not need more taxes. But we desperately need some fiscal restraint and prudent management. The problem of budget deficits is a problem of unchecked growth in spending. And the only real solution will be a substantial reduction in the growth of that spending. The budget we have outlined for fiscal year 1990 is a step in the right direction. It represents a modest triumph in our attempt to restrain spending increases—resulting in a reduction of the Federal budget deficit by $63.2 billion, almost a 39-percent decrease from the 1989 level. And with this reduction, the deficit for fiscal year 1990 will be under the $100 billion level required by Gramm-Rudman-Hollings.

Yet, while progress has been made in reducing spending, it is not nearly enough.

Part of the problem of restoring fiscal balance has been institutional. The budget process itself is badly in need of reform. And I am convinced that any successful attempt to control excessive spending might include two elements: (a) enhanced rescission or a line item veto, and (b) biennial budgeting.

Currently 43 Governors and all the CEO's of America's largest corporations have the ability to strike out budget items that they deem unnecessary or wasteful; but not the President of the United States. Current law does allow the President to cancel an appropriation or part of an appropriation through rescission. But Congress can reject a Presidential rescission proposal simply by refusing to act on it. And that is precisely what has happened to the great majority of Presidential rescission proposals since the law was enacted in 1974. By giving the President an enhanced rescission power—a proposal that would require the Congress to vote up or down on the President's rescission proposals—Congress would be made more accountable by facing that recorded vote. And this greater accountability, I believe, would lead to less pork-barrel legislation and a leaner budget.

Biennial budgeting is another vital tool of fiscal restraint. The entire budget process would be much less time consuming if it covered 2 years rather than 1. And biennial budgeting would also make for more efficient program management since funding would be assured for a reasonable amount of time into the future. Such increases in management efficiency invariably result in lower costs.

But in addition to reforms within the budget process itself, I am convinced that we need a decisive external brake on runaway spending which can only be provided by a balanced budget amendment to the Constitution. More than 30 States have already enacted legislation calling for a constitutional convention to adopt a balanced budget amendment. And no wonder, the Federal Government has been in the red for 35 of the last 40 years. With such a track record it is clear that, in the long run, only a constitutionally mandated restriction will allow us to avoid habitual budget deficits.

Fiscal responsibility is a high priority. But this budget recognizes that we have other important priorities as well. In particular, it embodies our commitment to give more attention both to the fight against drugs and efforts to strengthen America's families. In fact, the funds authorized for these functions have been increased by over $2 billion over the last budget.

In a time of tight budgets it is essential that we spend funds wisely. There is no room for waste. So when we increase funds for human services—especially those designed as investments in our children's future—we must seek out those programs that really work.

For several years I have been emphasizing this important search. When I was the Republican leader of the House Select Committee on Children, Youth, and Families, its chairman and I issued a widely distributed report titled "Cost Effective Programs for Children." That report highlighted an extraordinary fact. Certain Government programs—like Women's Infant Care [WIC], Head Start, Job Training, and Prenatal Care—actually save money when managed well.

I have also proposed that the General Accounting Office [GAO] develop a framework which would allow us to evaluate which social programs work, which do not, and why. GAO will soon be releasing to me a comprehensive followup study of the foster care system that was done to test the framework.

If our resources are going to be limited, we must use them as wisely as possible. The American Family Act, which I am introducing today, is a package of 26 bills that tries to maximize the utilization of limited re-

sources. For less than the cost of the Child Care Program allowed for in this budget, we cannot only provide low-income families with more child care dollars and more choice of who they want to care for their children, but we also fund innovative proposals to help children caught in foster care, to help fight gangs, and to provide more funds for parental choice in education.

If we act responsibly within these budget guidelines, we can do more to fight infant mortality, drug abuse, and the problems of the homeless. But we must do so intelligently. We have an obligation to keep our Nation strong—militarily, socially, and economically. And I believe that we can. But we must look for innovative, creative ways to meet needs while living within our means. We must address core problems and not simply throw money at symptoms. And if we do these things, we can progress beyond this first step in deficit reduction, while we continue to expand opportunities to all Americans.

Mr. RIEGLE. Madam President, as a supporter of this budget resolution, I would like to take a few moments to comment on its strengths and weaknesses.

On the one hand, I am encouraged that President Bush has acknowledged the need for Congress and the administration work together to solve our budget deficit problems. This is essential if we are to make the difficult decisions necessary to bring about real deficit reduction.

I am disappointed, however, that we were not able to take greater advantage of this cooperation to put the deficit on a downward course.

There are other positive aspects of this budget. Funding increases for key programs like education, research, and health programs for low-income women and children are long overdue.

The deficit continues to be a very real and serious problem. While it appears that the deficit is declining both in real terms and as a percent of GNP, we should not let ourselves be lulled into a false sense of security. The truth is that the operating budget of the Federal Government is grossly out of balance.

The true size of the deficit is masked by the Federal trust funds, and in particular the Social Security trust fund. The Social Security trust fund reserves reduce the apparent size of the deficit by $68 billion in fiscal year 1990. If all of the other Federal trust funds are excluded from the calculations, the deficit is actually $136 billion larger than is currently acknowledged. These funds are dedicated for a specific purposes. In the case of Social Security, Congress intentionally enacted legislation to build up the reserves to pay for future benefits. This funding should not be used to offset current consumption.

We could debate endlessly on the causes of the budget deficit. I would point out to my colleagues, however, that domestic programs have borne more than their share of reducing Federal spending. Since 1981, domestic discretionary programs have been cut nearly 20 percent in real terms. At the same time, defense spending has grown nearly 40 percent in real terms. Medicare, where much of the growth has occurred, has also been cut more than any other Federal program. Many people say we should cut Social Security to balance the budget. I would point out to these people that growth in Social Security has been more than offset by increases in revenues for the program.

So, Madam President, I would like to make it clear that while I support this resolution, I think this is only a first step and now is the time to develop a comprehensive solution to reduce the deficit. I think this budget is the best possible outcome for this year, but I also hope that the chairman, and the ranking member of the Budget Committee will do their best to hold the President to his promise to return to the negotiating table at the earliest possible date to find a real solution to our budget problems. In doing so, I hope that they will reevaluate our national priorities and focus their attention on making investments in our future.

HOUSING FUNDING

Mr. SANFORD. Madam President, I want to commend the distinguished chairman of the Budget Committee, the senior Senator from Tennessee, for his strong leadership and support in assuring that housing, especially rural housing, is treated as a priority in the fiscal year 1990 budget now before us.

Budgets for the past 8 years have neglected this basic need, and far too many rural families now find that housing is no longer affordable, either for rent or to own. I seek recognition to clarify an important point that I believe is assumed in this conference report.

I ask the chairman if I am correct that the Senate-passed budget resolution for fiscal year 1990 included an additional $100 million above baseline for rural housing?

Mr. SASSER. The Senator from North Carolina is correct.

Mr. SANFORD. Am I also correct that this additional funding for rural housing is assumed in this conference report on the fiscal 1990 budget now being considered?

Mr. SASSER. The Senator from North Carolina is correct that the additional funding for rural housing included in the Senate-passed budget resolution is also assumed in this conference report.

Mr. SANFORD. I thank the Senator from Tennessee for making this clear, because the rural housing crisis is no less severe than the housing problems facing our Nation's inner cities. The downturn of the natural resource and agricultural economies has contributed to serious housing affordability problems in our Nation's rural areas, and I am pleased that the conferees agreed to this important increase in funding for the rural housing programs administered by the Farmers Home Administration.

The National Housing Task Force found that, nonmetropolitan areas now have a higher rate of poverty and unemployment than metropolitan areas—and the incidence of inadequate housing is higher. The task force concluded that some 4.3 million low-income households, living in small towns and rural areas, have a serious housing problem. Approximately 2 million households live in substandard dwellings, usually with inadequate plumbing, while 1.4 million households are burdened with excessive housing costs. In addition, more than 200 nonmetropolitan counties in this country have poverty rates above 20 percent and substandard housing rates above 10 percent.

In past years, the Federal Government responded to this crisis by reducing Federal rural housing assistance by almost 50 percent. Rural housing programs have been slashed back, reducing unit production from about 100,000 to 55,000 units per year.

The absence of sufficient funding for these cost-effective programs has created a tremendous backlog of demand. In fiscal year 1988, the Farmers Home Administration deemed 100,000 single family loan applications eligible for assistance, yet only 35,000 applications received loans because of low-funding levels. Demand for rural rental housing is equally great. FmHA has on hand close to $1.5 billion in section 515 loan applications which would be approved if funding was available.

The additional funding provided in the conference report would provide desperately needed assistance to my home State of North Carolina. Twelve rural counties in North Carolina have poverty rates greater than 20 percent and substandard housing rates greater than 10 percent. In addition, North Carolina has an application backlog for section 515 rural rental housing of $159.2 million. The 502 program is also restrained by an absence of Federal assistance.

This conference report takes an important step foward for rural housing. I applaud my colleagues for supporting this $100 million increase over the baseline, or nearly $200 million over the 1989 levels. I will continue to fight for rural housing assistance throughout the appropriations process.

Mr. SASSER. Madam President, I want to congratulate my colleague, Senator SANFORD, for his efforts toward making the Congress aware of the critical rural housing problem and I commend him for the conviction with which he has pursued the increased assistance included in the budget resolution.

I would like to say that North Carolina and Tennessee share not only a common border, but common needs and problems. Our two States are among the four most rural States in the country. Forty-five percent of North Carolina's population lives in rural areas; Tennessee's population is 33 percent rural.

Madam President, the housing problems of the rural poor are as real and tragic as the problems facing the urban poor, but perhaps a little less visible. America has over 7 million nonmetropolitan households living in housing that is physically inadequate, overcrowded, or excessively expensive. Approximately half of these families have very low incomes—or less than 50 percent of the area median income. The fact that fully one-fourth of all emergency shelters nationwide are occupied by rural residents points dramatically to the extent of the housing crisis facing rural areas.

I am, therefore, proud to join my friend from North Carolina in strongly supporting the $100 million increase above the baseline for rural housing programs and again thank him for his efforts on behalf of this initiative. This increase will help put affordable decent, safe, and sanitary housing within reach for thousands of low-income families in rural areas.

FUNDING FOR THE SECURITIES AND EXCHANGE COMMISSION

Mr. SASSER. Madam President, I wish to address the issue of funding for the Securities and Exchange Commisssion. The SEC has been underfunded for a number of years relative to the importance of its mission and the enormous activity in, and growing complexity of, the Nation's securities markets.

As a member of the Securities Subcommittee of the Senate Banking Committee I have been acutely aware of this. Therefore, I am pleased that this budget resolution recognizes the urgent need for increased SEC funding and provides an appropriate level. Indeed, the SEC in this resolution is accorded budget authority of $169 million in fiscal year 1990. This is a 18.2-percent increase over 1989, and a 10.5-percent increase over a current services baseline.

Mr. DODD. As chairman of the Securities Subcommittee of the Banking Committee, as well as a member of the Budget Committee, I would like to highlight just some of the information we gathered in recent hearings on the SEC's budget authorization.

Since 1980, trading volume on the stock exchanges has grown more than 300 percent, and the over-the-counter volume has increased by 465 percent. In addition, the number of securities firms has increased 88 percent, and the number of registered representatives has increased 145 percent. While investment companies have grown by 146 percent, their assets have increased 411 percent. Their assets under management have increased 945 percent and now total $4.4 trillion—greater than the combined deposits of our Nation's banks and savings and loans.

During this same period in which we have witnessed such tremendous growth in the securities industry, the SEC staff levels have remained virtually static. In 1980, total SEC staff years were 2041. Today, those staff years have grown to only 2050.

Mr. RIEGLE. As Chairman of the Banking Committee, and as the previous Chairman of the Securities Subcommittee who has looked into the funding needs of the Commission in depth, I note that the chairman of the Budget Committee is absolutely correct in his assessment of the SEC's needs and I appreciate the work that he has done in this area. An effective SEC is vital to the capital raising process in this country.

Moreover, a special study of the securities markets similar to the one last conducted in 1961 is also long overdue. If the United States is to retain its competitive position in the international capital markets, it is extraordinarily important that we put our best minds to work to prepare for the future and review the many outstanding complex issues in the securities and financial instruments area. This requires funding which should have been appropriated some time ago.

Mr. SASSER. I thank both my colleagues for their insight and knowledge regarding the need for a strong and effective Securities and Exchange Commission. As the Senate begins debate on the conference report to the budget resolution, I would like to point out that budget has made ample room for this funding of the SEC in function 370.

Moreover, the SEC is a money making organization, and will more than pay for this apropriation level through the collection of filing fees and transaction fees. The SEC projects that it will collect fees of $263 million in 1990. The Commission also has the authority to request civil penalties for insider trading violations, and legislation has been proposed to give the SEC authority to request fines for other violations. In 1987-88, these enforcement efforts resulted in the payment of nearly $64 million in civil penalties to the U.S. Treasury. And as part of the recent Drexel settlement, an additional $350 million in civil and criminal fines will be paid to the Treasury.

For several months now, both the distinguished chairman of the Banking Committee and my colleague from Connecticut have spent countless hours working to develop a plan to bail out the savings and loan industry. This crisis has shown us what can happen when the regulator doesn't keep up with the growth of an industry. The recommended increase in SEC funding will alllow the SEC to remain a strong regulator in a continually growing industry.

I thank my colleagues for their work in ensuring that the SEC's enforcement ability keeps pace with the growth of the securities industry, and for their support of this funding level.

I yield the floor.

Mr. RIEGLE. Madam President, I would like to inquire of my good friend and chairman of the Senate Budget Committee whether the conference report on the budget resolution assumes "user fees" for Federal secondary mortgage market entities. The administration had proposed user fees on entities within the jurisdiction of the Senate Banking Committee such as the Government National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. While neither the House nor Senate budget resolution assumed those fees, I would like to clarify that the $2.7 billion assumed for user fees in the final conference report on the budget resolution do not relate to the activities of those entities.

Mr. SASSER. I can assure the Senator that the conference report on the fiscal year 1990 budget resolution before the Senate does not assume imposition of user fees on secondary mortgage market entities. To the contrary, the report accompanying the Senate-reported budget resolution included language rejecting those fees. It stated, "The funding levels specifically do not assume the imposition of user fees on Federal secondary market entities." I would add that the House Budget Committee Report contained similar language as well. This position was maintained in both the Senate-passed resolution and the House-passed resolution. There was no change in the conference, and the conference report does not include those fees.

GNMA, FHMA, and FHLMC serve a vital role in making affordable mortgage financing available to homebuyers. These entities purchase mortgages for investment or for securitization, thereby replenishing lenders' capital to originate mortgages.

The imposition of so-called housing user fees would amount to a tax on homeownership. It would impair the ability of the entities to carry their

mission. Such user fees clearly are not included in the budget resolution.

Mr. RIEGLE. I thank the Senator for his assurance.

Mr. DOLE. Mr. President, today we have before us the House and Senate conference report on the 1990 budget. The budget reductions provided in this plan are very modest, but they do meet the Gramm-Rudman-Hollings targets for fiscal year 1990 and keep us on the road to completely eliminating the deficit by 1993. Now comes the hard part—sticking with the agreement and resisting temptations to expand spending or raise taxes. Throughout this year we must keep in mind the Gramm-Rudman targets: 100 in 1990, 64 in 1991, 28 in 1992, and 0 in 1993.

Next year we will have to find a minimum of $36 billion to meet the 1991 Gramm-Rudman-Hollings target, and that's going to require some tough choices. Some programs are going to have to be cut back, others completely eliminated, and in an election year that's going to be very difficult. Maybe we can make our job a little easier by starting negotiations on the fiscal year 1991 budget right now, as called for by the bipartisan summit agreement and the President of the United States. Cutting the budget is always hard, but under the spotlight of a campaign the temptation to postpone tough choices becomes almost too great.

Unfortunately, a lot of cynics in this town are skeptical about the chances for early negotiations on the 1991 budget. They say that Congress only makes real progress on issues under the immediate threat of a crisis. Well, I think this year the budget negotiators have proven the cynics wrong. We have made a small, but significant step toward our goal of a zero deficit in 1993. I congratulate Senator DOMENICI and everyone involved in budget negotiations this year, and hope they can soon begin their work on the 1991 budget.

Mr. DOMENICI. I yield the remainder of the time I have on this resolution, Madam President.

Mr. SASSER. Madam President, I yield back the remainder of my time.

Mr. DOMENICI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The PRESIDING OFFICER (Mr. KERREY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 63, nays 37, as follows:

[Rollcall Vote No. 69 Leg.]

YEAS—63

Adams	Durenberger	McCain
Bentsen	Ford	Mikulski
Biden	Fowler	Mitchell
Bond	Glenn	Murkowski
Bradley	Gore	Packwood
Bumpers	Graham	Pell
Burns	Gramm	Pryor
Byrd	Grassley	Reid
Chafee	Hatfield	Riegle
Coats	Heflin	Rockefeller
Cochran	Heinz	Rudman
Cohen	Inouye	Sanford
Cranston	Jeffords	Sarbanes
D'Amato	Kassebaum	Sasser
Danforth	Kasten	Simon
Daschle	Kennedy	Simpson
DeConcini	Leahy	Specter
Dixon	Lieberman	Stevens
Dodd	Lott	Thurmond
Dole	Lugar	Wilson
Domenici	Matsunaga	Wirth

NAYS—37

Armstrong	Hatch	Metzenbaum
Baucus	Helms	Moynihan
Bingaman	Hollings	Nickles
Boren	Humphrey	Nunn
Boschwitz	Johnston	Pressler
Breaux	Kerrey	Robb
Bryan	Kerry	Roth
Burdick	Kohl	Shelby
Conrad	Lautenberg	Symms
Exon	Levin	Wallop
Garn	Mack	Warner
Gorton	McClure	
Harkin	McConnell	

So the conference report was agreed to.

Mr. SASSER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BRADLEY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from New Jersey.

RECOGNIZING MAY 25 CONVENING OF U.S.S.R. CONGRESS OF PEOPLE'S DEPUTIES

Mr. BRADLEY. Mr. President, on behalf of myself and Senators MITCHELL, DOLE, CRANSTON, LUGAR, CHAFEE, WIRTH, FOWLER, and LIEBERMAN, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 130) recognizing May 25 convening of U.S.S.R. Congress of People's Deputies.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BRADLEY. Mr. President, this resolution is offered on behalf of myself, Senators MITCHELL, DOLE, CRANSTON, LUGAR, CHAFEE, WIRTH, FOWLER, and LIEBERMAN.

Next week the deputies to the new Congress of the Soviet Union convenes. This resolution simply welcomes these initial steps toward institutionalizing the process in the Soviet Union. It expresses the hope this process will continue to go forward and will ultimately result in reconstituting the Supreme Soviet with access to the information needed to make policy and enact legislation, with the actual power to make laws, approve and alter budgets, appoint and change government officials, and oversee security and military services.

Mr. President, things are changing in the Soviet Union. The pace, even the direction, of that change are far from fixed. There will doubtless be setbacks and turmoil. The skill of the new leadership is bound to be severely tested. From time to time, the reformers may lose their nerve or their way. Perestroika may get bogged down in bureaucratic battles. The people's patience will be sorely tried.

Yet all over the Soviet Union, the winds of change are blowing. Embattled party bosses are struggling for their political lives. Some are winning, others losing. But the people are tasting democracy. And they want more. How do I know?

I know because I talked to them on a recent visit to the Soviet Union in Central Asia as well as Moscow. In subways, in schoolrooms, on the street, in the stores, in queues, in cafes, in churches, mosques, and synagogues. Just one example: I stopped two middle-aged women on their way to the metro and asked them the same question. One of the women was an elementary school teacher. For her, perestroika was greater freedom to teach her way. To tell the truth. To elicit questions from her students, not suppress them. Most of all, she said, "It is the freedom for you and me to talk this way, without fear."

All these hopes are focused on the elections that have been going on over the past few months and that are supposed to continue throughout 1989. The new 2,250-member Congress of People's Deputies, which meets in Moscow for the first time next week on May 25, is the concrete manifestation of the Soviet people's yearning for more democracy.

I met some of these newly elected deputies. They were insatiably curious about the nuts and bolts of how a democratic congress actually works. We talked for hours about the U.S. Congress. What its powers and responsibilities are. The legal and institutional underpinnings of its authority, like immunity and subpoena power. How the American people ensure Congress' openness and accountability. How it keeps its independence from the executive branch. They shared their concerns and their hopes.

The next day, I listened as over 100 deputies gathered to debate the mission and function of the new Congress.

Should the deputies be able to initiate legislation or should that be left to the new bicameral Supreme Soviet? Should their role be limited to an electoral college, choosing the 542 members of the Supreme Soviet? How long should they stay in session to decide these issues? How could they best avoid being steamrolled by the party bureaucrats? How could they get access to the information they would need to do their job? What resources should they require? The questions tumbled out. People waited eagerly for their turn at the microphone.

Later that day, there was a press conference where leading deputies announced the results of their deliberations. Press, constituents, deputies crowded into a brightly lit room in a building named of all things "The Hall of Enlightenment."

Will these reformers win? Who knows? In many ways, democracy in the Soviet Union is still just an abstraction. But the people I talked to were intent on making it real. I hope they succeed.

Is there reason to hope? Let us look at what has happend so far. For the first time in 70 years, the Soviet electorate has had the opportunity to participate in multicandidate, competitive, secret-ballot voting to elect a 2,250-member Congress of Deputies. According to a new electoral law passed in 1988, two-thirds of the Congress of Deputies is to be elected by the general public. There are about 184 million eligible voters. The remaining one-third of the deputies are to be filled by candidates from official organizations. Specifically, the law allots 750 seats to the republics and autonomous regions, the so-called national territorial districts, regardless of population size—that is each region is apportioned the same number of seats, as is each State in the United States, which has two Senators; 750 seats to territorial districts, based on population size—as in elections for the U.S. House of Representatives; and 750 seats to the public and professional organizations as apportioned by law: 100 for the Communist Party; 75 for the Communist Youth League [Komsomol]; 100 for the Official Trade Union Council; and 75 each for the committees of women and war veterans. The remainder is distributed by the party-dominated Central Election Commission.

What kind of preparations preceded the elections? Well, the nomination for the posts of deputy began on December 26, 1988. Meetings were held by the Communist Party, public and professional organizations, including collective farmers, artistic unions, the Academy of Sciences, and groups within election districts.

Each official organization participating in the election process collected nominations from its local chapters, then held a "Congress" to narrow the list for the final "campaign." For the 750 seats, 880 candidates were nominated. Final elections for these candidates were held on March 6, 1989, by each participating organization. Seven hundred and fifty deputies were chosen.

The Communist Party's process was not so democratic. One hundred candidates were nominated for 100 slots. Yet not all public organizations were equally cautious. For example, the trade unions and the Communist Youth Organization preserved the multicandidate nominations until the final election. And while most public organizations included their top leaders on the list of nominees, they did not load their lists with leadership candidates. Some even voted its leaders off the list.

In the representative elections, any organization in each of the geographic districts—factories, schools, informal clubs—had the right to nominate a candidate. In all, 7,531 candidates were nominated, an average of 5 for each of the 1,500 constituencies. Voter caucuses supervised by local election commissions subsequently reduced this number to about 3,000. Some of these caucuses were blatantly rigged. So much so that in some cases the Central Electoral Commission stepped in to correct the situation, even ordering local officials to repeat the registration process.

Officially registered candidates were allowed to set up 10-member campaign staffs. Despite some manipulation by the party apparatus, most were given equal time on TV and radio and equal space in the press. They met with constituents, collected contributions from outside sources, and held rallies without having to get prior permission. One deputy, still hoarse from a hotly contested race, told me he had damaged his throat addressing 2,000 Muscovites in a blinding snowstorm.

In the final analysis, 2,895 candidates completed for 1,500 seats in the 2,250 seat assembly. In 953 cases, 2 candidates ran for the same seat. In 384 cases, 1 candidate ran uncontested. In 27 cases, 4 candidates ran for the same seat. And in 14 cases, 6 or more candidates competed. Soviet voters had to cross out all the names on the ballot that they did not want until one name was left. Where there was only one candidate, a voter could cross his or her name out too—as a vote against. Among those rejected were a number of high-ranking party officials and antireformers—to their and the party's surprise and embarrassment.

Since March 6, there have been a number of run-off elections, the most recent being May 14 where Leningrad voters chose a fiery reformer running on an anticorruption platform and alleging unconstitutional interference in his attempt to expose crime in high places. The local electoral commissions did not seem to have disqualified neatly as many candidates in the run-off elections as they did in the general election. Even so, there are still loopholes in the electoral law that the new Congress might well want to close as one of their first items of business.

A big day—May 25—is drawing near. On that day, the new Congress convenes for the first time. It is still not clear what this body will do. They are trying to work that out right now. It will elect from its ranks the 542 deputies who will serve in the new bicameral Supreme Soviet. And it will convene annually, perhaps to set the legislative agenda and even rule on important issues.

However, the most important body will be the Supreme Soviet, assuming it succeeds in ensuring that it has access to the information needed for independent policymaking and legislative and the constitutional power to make laws, alter budgets, change government officials, and oversee security and military services.

It remains to be seen whether this body is more responsive and accountable to the Soviet peoples than the old Congress was. It will certainly elect a President—the new head of State—presumably Mikhail Gorbachev. If he, as General Secretary of the party as well as the President of the Supreme Soviet, tranfers to the Supreme Soviet important decisionmaking powers traditionally exercised by the party, it could become the main body for sustaining popular support for democratic reform and checking the entrenched powers of the party apparatus and state bureaucracies.

Will all of this happen? We cannot know. But I do know that I am rooting for the reformers. I urge the U.S. Senate to join me in wishing them good luck and Godspeed in their quest to institutionalize a democratic legislature.

Mr. DOLE. Mr. President, I am pleased to join the distinguished Senator from New Jersey [Mr. BRADLEY] as an original sponsor of this timely resolution.

In just a few days, the Congress of People's Deputies will convene in Moscow. It is the first-ever such Congress in the U.S.S.R. to have been elected through a multicandidate, competitive, secret ballot.

This resolution has two simple goals. First, to welcome this step—this initial step—toward "opening" the electoral process for the Soviet legislature; and, second, to say to Mr. Gorbachev and his colleagues: this is a hopeful beginning, but it is only a beginning. Keep it up.

The winds of change, real change, are blowing in the Soviet Union. No one can know, at this point, how far the changes we are seeing will go. We

must be prudent, and keep our eyes wide open.

But certainly what we have seen so far, we should welcome. And we should encourage more of the same.

Glasnost is not democracy. But it has unleashed some forces that aim at the eventual establishment of democracy in the U.S.S.R. Passing this resolution will provide encouragement to those forces, and will send this message to the Soviet leadership: It is moves in this direction, the direction of fuller democracy, that will bring a positive response from Washington; and will open the doors to broader, and even more mutually beneficial, relations.

I commend the Senator from New Jersey for this initiative, and I urge speedy adoption of this resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 130) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 130

Whereas for the first time in 70 years the Soviet people have had an opportunity to participate in multi-candidate, competitive, secret-ballot voting to elect a 2,250-member Congress of People's Deputies.

Whereas the Congress of People's Deputies will convene annually to elect from its ranks new members of the 542 seat bicameral Supreme Soviet and may also debate and influence other important issues.

Whereas the Congress of People's Deputies will also elect the President of the Supreme Soviet.

Whereas reformers are advocating that the President transfer to the Supreme Soviet important decisionmaking powers heretofore exercised by the Communist Party.

Whereas, a similar system of legislative organs is also planned for all Union and autonomous republics, and the election of peoples' deputies is scheduled for the end of 1989.

Whereas, the Soviet Union has thereby begun to develop an institutional base with the potential for representing the will of the people more openly, directly, and effectively.

Whereas, on May 25, 1989, deputies from all over the Soviet Union will meet for the first time in Moscow to hold the first session of the newly elected Congress of Deputies and will elect, by secret ballot, a 542-member Supreme Soviet. Now, therefore, be it

Resolved, That the Senate hereby:

(1) welcomes these initial steps toward institutionalizing a democratic process in the U.S.S.R., and

(2) expresses its hope that this process will continue to go forward and will ultimately result in a reconstituted Supreme Soviet with access to the information needed to make policy and enact legislation and with the actual power to: make laws; approve and alter budgets; appoint and change government officials; and oversee security and military services.

Mr. BRADLEY. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, for the information of Senators we just received this afternoon the supplemental appropriations bill from the House. I will be able to announce shortly the manner and timing of our handling of that.

Senators should be aware that there may be, and I emphasize may be, another rollcall vote this evening, although I hope to be able to indicate that definitely one way or the other shortly. In the interim, I understand there are several Senators who wish to speak as in morning business.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there be a period for morning business not to extend beyond 5 p.m. with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

CENTRAL AMERICA AND PANAMA

Mr. GRAHAM. Mr. President, if I could get the attention of the majority leader, there are four Members of the Senate who have recently returned from Central America and Panama who at this time would like to make statements relative to our recent experiences and recommendations as to future courses of action based on that observation.

Mr. President, I ask unanimous consent that there be allocated a period of 20 minutes for those four statements so that they can be given in consecutive order.

The PRESIDING OFFICER. Is there objection?

Mr. GRAHAM. I ask unanimous consent for 20 minutes of the morning business to be allocated to Senator MACK, Senator MCCAIN, Senator ROBB, and myself for purposes of statements on Central America and Panama.

The PRESIDING OFFICE. Without objection, it is so ordered.

SURRENDER POWER, GENERAL NORIEGA

Mr. GRAHAM. Mr. President, in a critical show of unity, the Organization of American States sent a powerful message of hope and democracy yesterday to the Panamanian people by telling dictator Gen. Manuel Noriega to surrender power.

OAS representatives will report back by June 5 on whether subsequent measures are necessary to ensure "the transfer of power will full respect for the sovereign will of the Panamanian people."

I commend the OAS for its determination to remove Noriega as quickly as possible. Time is critical. And that is why the June 5 deadline is so important. International attention is a potent but perishable commodity. Delay and equivocation serve no one except the interests of Noriega.

The role model of a military dictator, enriched and isolated from the suffering of his people by enormous drug profits, is a frightening prospect to emerging democracies in this hemisphere. Narco-terrorism continues to represent one of the most direct challenges to national sovereignty.

Mr. President, I also commend the Bush administration for its prudent plan to protect American lives and interests in Panama while supporting the democratic aspirations of the Panamanian people.

Panama is vital to the security and economic interests of the United States. Panama's importance to the United States is unique in this hemisphere, because of the Panama Canal and the United States military bases there.

The President's program represents a cautious mixture of increased international isolation, continuation of economic sanctions and the protection of United States citizens by their removal from general population of Panama and the addition of 2,000 troops.

President Bush has probably made the easiest decisions he will be called upon to make in the current Panamanian crisis. From here on, decisions get much more complex, dangerous, and divisive. They will be a significant determinant of the direction of American foreign policy.

There are key questions which remain to be asked and answered. Those questions include:

What if the actions of the United States and our Latin allies are insufficient to remove Noriega from power, which must be our immediate objective and the standard by which we will evaluate the success of our policy in Panama?

What steps should be undertaken to prepare for the eventuality of the failure of current initiatives to remove Noriega?

How much time can be given for our initiatives to play out before their continuation will constitute an accommodation, an acceptance of Noriega's regime?

The consequences of continued Noriega dominance over Panama are ominous.

The protection of over 40,000 United States citizens and critically important United States interests in Panama begins with the elimination of Noriega.

The advancement and consolidation of democracy in Latin America and the Caribbean will be significantly affected and influenced by the duration of Noriega's control over Panama. If Noriega can get away with stealing this election from the Panamanian people, then a destructive precedent will have been set concerning Nicaragua's election, scheduled for February of 1990.

Finally, the ability of the Panamanian people to rebuild an economy which has declined by more than 25 percent in just the last two years and to restart a democracy which has been on hold since the original takeover of power by Gen. Omar Torrijos in October 1968 can only start once Noriega has been removed.

Mr. President, as future options are considered for United States policy in Panama, I would suggest some of the following guidelines be kept in mind:

We should not forget or obscure our objective—it is the removal of Noriega from power;

We must continue to reach out to our allies in the hemisphere. This is a hemispheric problem and they have as much stake in its solution as we do;

In this reaching out, the United States must continue to speak with a single, bipartisan voice. The President has made a good start by reaching out to the Congress. He needs to enforce discipline within his own administration so that the State Department and the Department of Defense are not in disagreement as they have been in the past.

We must keep all options on the table, including the possible use of force. We cannot afford to be indecisive. If we are unwilling to use force, then big stick rhetoric should be silenced.

Since Noriega annulled the elections, hundreds have since been imprisoned and reportedly tortured. One was opposition party leader Olimpo Saez who said he was handcuffed to a basketball hoop and beaten incessantly on the legs by shifts of jailers. Others reportedly have been wrapped in American flags and beaten by jailers who yelled "Where are your gringo friends now?"

The friends of Panama were out in force yesterday at the OAS. And not just North American gringos. But Latins as well who are sick and tired of dictators like Noriega who wrap themselves in the flag of nationalism while hanging into power through intimidation and violence.

As the reports of election fraud and violence are fresh in our minds, we must rally world opinion against Noriega, keeping open all options for action.

If we let June slip into July, summer into fall, letting Noriega become more entrenched, democracies of this hemisphere will be making a statement of resigned acceptance.

Mr. McCAIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

DEATH OF AN ELECTION

Mr. McCAIN. Thank you, Mr. President. I want to begin by thanking my colleagues, Senator GRAHAM, of Florida; Senator ROBB, of Virginia; and Senator MACK, of Florida, for the bipartisan commitment that they have exhibited toward Central America and to peace and democracy in that region. They serve as an example of the kind of bipartisan approach to these very difficult issues that is critical if we are to have a consensus on a viable policy for the region.

Mr. President, in my years in Congress, I have been an election observer in a number of Central American nations. I was privileged to be present in El Salvador and Guatemala as they moved toward democracy, and to witness the commitment of people, the armed forces, and the government of those nations to a pluralistic process. I witnessed a much different scene in Panama 2 weeks ago. I cannot recall such a brazen, violent theft of an election in my lifetime. The beatings of opposition leaders witnessed by millions of Americans on television were only the most graphic example of Mr. Noriega's contempt for democracy.

Mr. President, there was a clear record of preelection fraud, manipulation of registration lists, false voter lists, changes of addresses, opposition voters removed, opposition candidates disqualified, lists inflated with regime supporters by more than 25 percent over the total who voted in 1984, and public employees being instructed to vote repeatedly.

Mr. President, public employees showed up with instructions to the election officials that they could vote basically wherever they wanted. The Panamanian Defense Forces, the army, showed up at polling place after polling place, went to the head of the line, with brand new voting cards. No one really knows how many times those army members voted on that day. The opposition was intimidated. There have been incidents ranging from beheading to arrest, beating, exile of other opposition leaders, bombing of a TV station, burning of an opposition headquarters, and threatening "disloyal" public employees with dismissal.

Mr. President, we have seen a very interesting recreation of a Castro invention—the so-called "dignity battalions,"—thugs who are carried from place to place with clubs and guns intimidating peaceful citizens who are exercising their democratic rights in opposition to what they believe is an oppressive and unfair government.

On election day, my colleagues and I watched a most fraudulent and incredibly unfair election process. Despite all that, Mr. President, so many of the people of Panama voted in favor of the opposition that the greatest fraud was perpetrated after the polling booths were closed. Members of the Panamanian defense forces went to the polling places and took the votes and the voting lists. The ballots were never seen again.

We were treated to the most bizarre experience when the Noriega government announced that the election was null and void on the grounds that there were outside observers who were present at the electoral process, certainly an interesting excuse for the results of an election.

I think the brutal treatment that has been inflicted on the Panamanian people and their opposition leaders is something which has inspired the revulsion and disgust of all freedom loving peoples.

Mr. President, our objective must be the removal of Mr. Noriega at the least possible cost in terms of American lives and prestige. We should exhaust all measures in order to remove this odious and unpleasant character. We should make a special effort to enlist the support of our Latin American friends in peaceful efforts to get rid of Noriega.

I am pleased at yesterday's actions by the OAS. Many hoped for more, but some expected less. I am hopeful that the three delegates will go to Panama, inform Mr. Noriega he must leave and, if he does not, come back and inform the Organization of American States that they must take more severe actions—along the lines of those enacted against Somoza 10 years ago.

We must, however, Mr. President, be prepared, should all other options fail, to take whatever action is necessary in order to remove Noriega. I believe that the Congress and the American people would only be supportive of extreme actions after all other options have been exhausted. I believe that this President with the bipartisan support of the Congress and the American people is pursuing those other options in a thorough wise and exhaustive manner.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. McCAIN. I hope that our combined efforts will lead to the removal of Mr. Noriega and a restoration of peace and freedom to the people of Panama.

I thank the Chair.

THE SITUATION IN LATIN AMERICA

Mr. ROBB. Mr. President, I rise today to join my distinguished colleagues, in a bipartisan discussion of the situation in Panama and, more broadly, in Latin America.

Just last week, the world watched the spectacle of Gen. Manuel Noriega thwarting the will of the Panamanian people after the May 7 Presidential election. It is widely acknowledged that the opposition candidate, Guillerma Endara, "won" by a 3-to-1 margin. Violating the hemispheric trend toward free and fair elections, and the growth of democracy, as witnessed by the two examples of the plebescite in Chile, and the recent election in El Salvador, Noriega declared the "elections" null and void.

He responded further, by unleashing his so-called "dignity battalians" upon the opposition, attacking Endara, and his running mates with pistols and iron bars.

Mr. President, this behavior by General Noriega is unacceptable. Our task now is to come up with a policy that sends an unmistakable message to General Noriega that United States-Panama relations cannot be normalized as long as he is in power, but that America has both the will and the means to help the people of Panama determine their own destiny.

If we were to fail to do so, we would be turning our back on the fundamental American commitment that the individual freedom and sovereign will of all people in their respective countries must be respected in the Western Hemisphere.

Our Government is unified in its condemnation of the Noriega effort to steal the election. We are now in the process of developing policy options around which there can be a consensus, both in this country and in Latin America.

My distinguished colleagues are addressing some of these issues. I would like to take note of one to which Senator McCAIN just referred, a remarkable event that took place yesterday, an event that cannot help but demonstrate to General Noriega that his staying in power is unacceptable.

The Organization of American States, by a resounding vote of 20 to 2, condemned Noriega for abuses warned about the consequences of the electoral crisis in Panama, and dispatched three Latin foreign ministers to seek to induce Noriega to surrender power.

It should be noted that the only dissenting votes were Panama, and the Marxist government of Nicaragua, a regime that has consistently supported Noriega in these endeavors.

This show of unity by the OAS, for which they should certainly be commended, makes clear that Noriega is the problem. Equally as important, it shows that our neighbors appreciate "democracy" as much as it is said they sometimes fear intervention. Perhaps most important of all, it signals the beginning of a concerted hemispheric policy.

It should be noted that we are working with our Latin allies, not against them, as has sometimes been the case in the past. As such, our approach is neither recklessly unilateral, nor does it consist of idle sabre-rattling.

We cannot rule out any options in dealing with Noriega. The United States obviously has vital national security interests in Panama that we will protect with whatever means, if necessary. This may or may not involve the use of force, although it is obviously our strong preference to resolve this situation through diplomatic means. We need not telegraph our hand to Noriega, save that our resolve to see a peaceful transition in Panama that provides for the transfer of power to the Panamanian people is firm.

And today this resolve has the backing of our neighbors.

This may only be the first act of a several act play, but Noriega and others who would thwart democracy must take notice. America will not turn its back on those struggling for freedom and democracy.

Mr. MACK addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

PEACE: THE PRESENCE OF FREEDOM

Mr. MACK. Mr. President, I want to, first of all, associate myself with the comments made by the Senator from Virginia [Mr. ROBB], the Senator from Arizona [Mr. McCAIN], and the Senator from Florida [Mr. GRAHAM]. I also want to take this opportunity to, in essence, frame the discussion that we are having today with respect to Panama in this sense, and I do not do it with the purpose of drawing into a debate on the Panama Canal Treaties.

But I think it is important that we go back to 1977 and understand that the message that we are given in 1977 was that if we would show compassion in our foreign policy we could gain friendship in Central America, we could bring about peace, tranquillity, and stability.

There are those who say that peace is the absence of war, but I would say that peace is, in fact, the presence of freedom. That is the objective. That is what we are talking about today. That is what we are trying to accomplish. We are trying to aid those in Panama who have voted for freedom and democracy on May 7 who now want to have the opportunity to experience that freedom and democracy.

I had the opportunity to go down to Panama several times during the past several weeks. Like my colleagues, I think we were shocked at what we saw. But let me just raise this question, because I have a feeling there are many people around this country who in their own minds said I wonder if it is possible for one individual to go to Panama to observe an election, and really see first hand fraud that would take place. I think that is a reasonable question to ask. I have to tell you. I went down there a little bit skeptical as to whether one would really be able to detect fraud. But I can tell you this: The people of Panama did not allow the fear that was imposed on them by the Panamanian Defense Forces to keep them from coming up individually, personally telling each of us of the fraud that was taking place, and of the experiences that they had.

Examples were members of the Panamanian Defense Force that went to the head of the line to cast their vote with a document that in essence said they could vote anywhere they wanted. Their names did not have to appear on registration forms. That in itself is not all bad as long as the documents that allowed them to cast those votes were either taken away from them or marked but those documents were not taken away. Those documents were not marked. So those individuals were allowed to get back onto a bus and travel to another precinct and cast another vote.

We also saw individuals that were dressed in military uniforms. I would say those individuals were in fact civilians. They were dressed in brand new uniforms, brand new boots with brand new registration forms, and when we asked them what unit, what military unit were they attached to, they could not tell us. I think probably the first thing individuals who had the experience of the military would be able to tell someone is what particular unit they had been attached to.

So, yes, we saw fraud. We saw it first hand, and it was told to us in front of members of the Panamanian Defense Force by civilians, by people in Panama that were casting their votes for freedom and democracy.

While I was there I had the opportunity also to meet with some of our troops. General Loeske and I had an opportunity to meet. I asked him some questions related to the abuses that were being experienced by United States personnel in Panama. There has been somewhat of a debate in this country as to whether there has been a coverup with respect to those abuses. General Loeske said "Rather than for me to tell you my feelings let's go out

and talk to some of the troops." So about 10:30 Sunday evening we went out to one of the barracks. We got 15, 20, 25 of our young servicemen out, and raised the question. What experience did they have? Out of this group 75 percent or more indicated to me that at one time or another on their travels around Panama they had been stopped and in essence they were being harassed by the PDF for the purpose of trying to gain money, and some of them indicated they paid $10, $15, $20 to get permission in essence to continue on their way.

Most of them did not report that kind of activity because when they came back they would have to fill out forms and go through a process. It was much easier for those individuals just to pay that $10, $15, and go on their way.

Mr. President, I ask unanimous consent to have printed in the RECORD several examples of the harrassment experienced by our personnel in Panama.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HARASSMENT OF U.S. CITIZENS AND MILITARY PERSONNEL IN PANAMA

(Summary of selected 1987-89 news articles prepared by RPC staff)

On Sept. 13, the U.S. Embassy's economic counselor, David Miller, was detained at the scene of an antigovernment demonstration and held for eight hours, in what U.S. officials charged was a violation of his diplomatic immunity.—Washington Post, 10/20/87.

When protests erupted the night of Oct. 7, the Panamanian Defense Forces police picked up nine out-of-uniform U.S. servicemen.

Under a treaty-mandated arrangement between the military forces of the two countries, Panama must notify U.S. military representatives of the arrest of a U.S. serviceman within two hours, but U.S. authorities were not informed of the identities of the nine Americans or where they were being held until six hours after they were arrested.—Washington Post, 10/20/87.

According to a U.S. military spokesman, on Oct. 11 two out-of-uniform servicemen were roughed up and robbed at dawn by Defense Forces police while waiting for a bus outside a bar popular with U.S. soldiers. One soldier's ankle was broken when he was shoved to the pavement, and a prostitute tried unsuccessfully to plant marijuana on the other soldier.—Washington Post, 10/20/87.

Panama ordered the expulsions today of 48 government workers in retaliation for U.S. reductions in its aid following a rock- and paint-throwing attack on the American Embassy in Panama City, officials said.—Washington Post, 12/03/87.

At least 13 journalists, including five Americans, were detailed and later released. Three of the journalists, including two of the Americans, were hospitalized from beatings, several others were roughed up.—Washington Post, 3/29/88.

A recent incident on a crowded Panama City, Panama, street corner illustrates why U.S. employees at the Panama Canal are afraid to leave their homes.

Members of military strongman Gen. Manuel Antonio Noriega's Panamanian Defense Forces hassle a U.S. citizen: Papers, please; what's in the package?; I will frisk you now.

A U.S. staff sergeant stops to help his fellow citizen. The PDF soldiers turn their attention to the sergeant and proceed to degrade and humiliate him, forcing him to drop his pants and jump around the street.

Another case: Two U.S. employees ventured outside the Canal Zone to buy rice. They were attacked and beaten by PDF members for their efforts.—The Journal of Commerce, 4/25/88.

On Aug. 1, a serviceman and his father were held for 24 hours by four Panamanian military officers and questioned at gunpoint, the Southern Command reported. The two Americans were robbed of $300 and of their identification cards by the Panamanians who appeared to be drunk. The father of the serviceman was beaten.

Two days later, an Air Force enlisted woman was reportedly confronted by two Panamanian officers who began to sexually abuse her. The men stopped after the servicewoman told them she was pregnant—The New York Times, 8/21/88.

On Feb. 6, a first Lieutenant who failed to stop immediately on orders from a Panamanian officer, was kicked and beaten and a revolver was placed to his head before he was charged with "fleeting" and released. The Southern Command protested "the use excessive force" but received no response.

On Feb. 17, an enlisted man and his pregnant wife got into an argument with an off-duty Panamanian officer who had been drinking. The officer hit the serviceman and his wife with a night stick, and the serviceman was subsequently charged by the Panamanian authorities with disrespect.

On May 8, an enlisted man arrested for drunken and disorderly conduct was handcuffed and taken to a police station, where he was questioned about cargo arriving at Howard Air Force Base. He was beaten on the head, back and face with a rubber club before being released without charges, and had to be hospitalized. After an official United States protest, the Defense Forces replied that he was not beaten at the station.

On June 18, the Defense Forces attempted to interfere with the U.S. Air Force's air operations by disapproving the refueling of a U.S. Air Force AC-130 aircraft.

On Aug. 9, David Ford, a civilian working on temporary duty for the Pentagon, was ordered out of his rental car by four uniformed officers with their guns drawn. When Mr. Ford told them he was a civilian, not a military officer, the officers accused him of working for the Central Intelligence Agency, which he denied. He was repeatedly kicked and beaten until he lost consciousness. When he regained consciousness, his passport, a wallet with $350 and his identification were gone. The Southern Command officially protested the incident but received no response.—The New York Times, 9/29/88.

On particularly sensitive incident involved allegations of the rape of the 18-year-old wife of a private first class. On June 16, the serviceman and his wife were assaulted by a man in military fatigues believed to be a Defense Forces official. After the private was beaten and locked in the trunk of his car, his wife was raped and beaten, according to the Southern Command documents.—The New York Times, 9/29/88.

The United States has strongly protested the severe beating and threatened killing of an American sailor by Panama's Defense Forces, Pentagon officials said today. The Panamanian government has acknowledged that the incident occurred, but made no apology.

The incident involved Mike Nieves, a petty officer with the United States Southern Command in Panama, who was detained by three highway policemen on Nov. 13, struck in the face, pulled through the window of his car by his neck and struck again, [stated a Defense Department letter to Panamanian authorities]. He "was physically and psychologically degraded" [the letter] continued.

One officer "drew his pistol, placed at next to the sailor's head, and forced him to his knees," the letter said. "He was forced to beg for his life."

A Panamanian officer who was about to kill the sailor was stopped at the last moment by one of his associates, the letter said, but still fired a shot that missed his head.

Petty Officer Nieves had been detained for allegely parking an official military vehicle in a no-parking zone at the Panama City airport.—The New York Times, 1/13/89.

In an incident involving U.S. military personnel in early March, Panamanian police stopped 21 school buses carrying children and held nine of the buses for several hours because they allegedly had improper license plates. Since then, most children attending U.S. military-run schools have been driven by their parents, with resulting heavy traffic jams.—The Washington Post 3/28/89.

Mr. MACK. I would like to move on to the meeting that took place last evening at the Organization of American States. I went down and spent several hours there last evening because I really wanted to get a flavor of what that meeting was going to be like. Frankly, there had been some advanced warning given to me that there was going to be a fair amount of America-bashing.

I came away from the Organization of American States meeting with the feeling that we must continue to reassure the Panamanian people that the United States and nations around the world are committed to their hopes and aspirations for freedom and democracy. The fact that Panama and Nicaragua were the only two member nations to vote against the resolution sent a clear message that Noriega and Ortega are alike in their pursuit of power and complete domination of their countrymen.

I believe that the resolution agreed to yesterday at the meeting of the OAS is a positive first step.

While the OAS resolution should have been stronger in its condemnation of Noriega, I believe the group's actions represent an important step in what may be a long road to a democratic Panama. We must keep the pot boiling and continue to focus world attention on the Panamanians struggle for freedom.

Contrary to the resolution agreed to by the OAS in 1979 with the condemnation of Somoza in Nicaragua, this one identified Noriega by name and

condemned his tactics and actions. Somoza's reference was to condemn his "regime."

Noriega simply cannot hold democracy hostage in Panama without the condemnation of freedom-loving people around the world.

It's clear that most Latin American nations recognize the will of the Panamanian people for democracy. Noreiga should now realize he can no longer keep freedom from his own people.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Chair for recognizing me.

ON THE NEW CHINESE DEMOCRACY

Mr. HELMS. Mr. President, on May 4, 1919, 70 years ago, 3,000 Chinese students in Beijing, representing 13 colleges, demonstrated for democracy and an end to corruption in the Chinese Government of the time. These demonstrations galvanized the Chinese people and led to a fresh determination to establish democracy in China.

Tragically for the Chinese people, the May Fourth movement was hijacked by the Communists, a small group of political opportunists who did not truly believe in democracy and human rights. They were, however, adapt at using the words "democracy" and "human rights" to achieve their goal of total power in China.

The world now knows or should know that communism in China, as everywhere it gains power, has proved to be a travesty. It has led only to state terrorism directed against the Chinese people, official corruption, and economic chaos.

In recent days the Chinese people have again demonstrated that they want and deserve what we enjoy: A government of the people, by the people and for the people. There is no Chinese physics, there is only physics. Likewise there is no Chinese democracy, only democracy.

What exactly do the Chinese people want? Ordinary things which we take for granted: An open press, freedom from observation by the secret police, the right to choose where to live or work, the right to religious worship, even such a basic right as to decide how many children to have.

Why should the Chinese people not have these ordinary freedoms? Are they somehow so inferior to other people in the Pacific region that they require some self-appointed clique to tell them what they may read or not read?

The Chinese people are the inheritors of thousands of years of continuous civilization. They do not need anyone to tell them what to do, how to live. They are perfectly capable of deciding for themselves. If China today is unstable, it is because the Chinese Communist Party is trying to cling to power when the people are telling them to get out of the way and to depart.

History will judge the Chinese Communists both by how they exercised political power and hopefully how they relinquish it. If they bend to the will of the Chinese people and depart in peace, they will be judged one way. If they go out in blood, they will be judged accordingly.

But one thing is clear: Their time is passing and they will be judged.

THE NAZI-SOVIET NONAGGRESSION PACT: THE CERTIFIED COPIES

Mr. HELMS. Mr. President, the United States Government sent messages to the diplomatic legations of Lithuania on February 16, and Estonia on February 24, on the 71st anniversaries of their respective national declarations of independence. Tragically, since 1940 these nations have been occupied colonies of the Soviet Union. The United States has never recognized the forcible incorporation of Lithuania, Estonia, and Latvia into the Soviet Union.

On March 12, 1989, 250,000 Latvians rallied in their naton's capital, Riga, to support the promises of political and economic reform offered from Moscow. The Latvian people also demonstrated that day to express the real fear they have that these reforms are nothing but another cynical lie being perpetrated by the foreign occupiers of their land.

In order to justify its occupation of the Baltic States, the Soviet Union has engaged in a series of coverups and historical falsifications so outrageous that one almost feels as though one had landed in the middle of a George Orwell novel. The Molotov-Ribbentrop Pact has been among the major targets of this campaign of disinformation.

It is well known that the aggressive actions taken by the Soviet Union in the Baltic States were a result of a series of secret protocols to the infamous Nazi-Soviet Nonaggression Pact of August 23, 1939. Following extensive correspondence with the Foreign Office archives of the Federal Republic of Germany, I am ready to present to the Senate today the chain of custody documenting the authenticity of these secret protocols, and refuting assertions to the contrary made by high-level officials in the Soviet Government.

When reviewing the occuption of the Baltic States by the Soviet Union in June 1940, one must consider a series of documents signed by the Union of Soviet Socialist Republics and by Nazi Germany on August 23, 1939, nearly 50 years ago.

Mr. President, the Nazi-Soviet Nonaggression Pact—known popularly as the Molotov-Ribbentrop Pact—and its secret supplementary protocol formalized the division of Eastern Europe into Nazi and Soviet spheres of influence. The Molotov-Ribbentrop Pact was amended by secret protocols signed on September 28, 1939, under which Nazi Germany turned Lithuania over to the Soviet Union, and on January 10, 1941, when the Soviets bought an additional section of Lithuania from Nazi Germany for 7,500,000 gold dollars. This gave the Soviets the excuse they needed to invade and occupy the western areas they had lost following the Bolshevist coup d'etat in 1917: Finland, the Baltic States, Bessarabia, and part of Poland.

The Soviet Union lost little time in taking advantage of the opportunity presented them by the Molotov-Ribbentrop Pact. Coordinating their actions to coincide with the Nazi occupation of France, the Soviet Army invaded and occupied Lithuania on June 15, 1940, Latvia on June 16-17, 1940 and Estonia on June 16, 1940. One month later, the puppet governments installed in each of the Baltic States asked to be admitted into the Union of Soviet Socialist Republics. These "applications" were accepted, and all three were incorporated into the Soviet Union: Lithuania on August 3, 1940, Latvia on August 5, 1940, and Estonia on August 6, 1940.

The only territory covered by the Molotov-Ribbentrop Pact that was able to alter its fate was Finland, whose people heroically defended their independence during the bloody Winter War of 1939. The part of Poland that the Soviets stole is now included in the Byelorussian Soviet Socialist Republic and the Ukrainian Soviet Socialist Republic. Bessarabia, stolen from Romania, is now known as the Moldavian Soviet Socialist Republic.

SOVIETS FALSIFY HISTORY

Mr. President, there should be no confusion in this body concerning the existence of the Nazi-Soviet Nonaggression Pact and its secret protocols. Soviet authorities continue to try to conceal the existence of the secret protocols to the Molotov-Ribbentrop Pact, through bald-faced lies and open disinformation propagated by leading Soviet historians. The fact that this campaign continues shows the real meaning of glasnost.

On August 16, 1988, the Soviet press agency Novosti, a cover organization of the KGB, held a press conference on the subject "The Baltic Republics: The Pre-War Years." Several Soviet historians spoke at this press conference, the purpose of which, it seems, was to act as an official buffer to the mass demonstrations expected by the authorities in connection with the up-

coming anniversary of the signing of the Nazi-Soviet Nonaggression Pact.

During his opening statement, Valentin Falin, a doctor of historical sciences and head of the Soviet press agency Novosti, made several statements which were deliberate attempts to mislead public opinion concerning the Molotov-Ribbentrop Pact, and specifically the secret protocols. Mr. Falin said, according to a report by Tass that same day:

Answering the question of secret protocol of the Soviet-German pacts of 1939, Valentin Falin noted that their authentic copies had not been discovered either in this country or in the West, although a search was conducted and is being conducted in the archives. It would be wrong yet to judge the contents of those documents by the photographic copes which appear in the press. It is hard to say accurately what in those copies corresponds to reality and what has been forged.

Commentators Feliks Kovalyov and Oleg Rzheshevsky echo Mr. Falin's views concerning the Nazi-Soviet Nonaggression Pact in an article in the September 1, 1988, edition of the Communist Party newspaper Pravda and restate a major worry of the Soviet Government concerning glasnost—a tendency by some in the Soviet Union to take glasnost at face value. This particular quote seems to be a direct reference to the publishing in an Estonian newspaper of copies of the secret protocol to the Nazi-Soviet Nonaggression Pact:

Historians and political scientists in the West claim that certain "secret protocols" were also signed along with the nonaggression pact. Such documents have not been discovered in Soviet archives. Their originals, evidently, are not to be found in Western archives either, or anywhere at all. The copies of photocopies appearing in various publications are reproduced in a highly contradictory fashion. On more than one occasion Soviet researchers have drawn attention to the fact that the confusion caused in this connection remains unanswered. Doctor of Historical Sciences V.M. Falin remarked recently that "secret protocols" were mentioned neither by Hitler himself * * * nor by J. von Ribbentrop, the chief participants in the Moscow talks * * *

Mr. President, the facts concerning the Nazi-Soviet Nonaggression Pact and its secret protocols do not support the statements made by Mr. Falin on August 16. I will now present evidence to prove the existence of these documents, and to show that the attempts made by Mr. Falin and other Soviet historians to manipulate the truth are nothing more than a cause of international fraud.

Mr. President, it is laughable for anyone, especially for an individual claiming to hold a doctorate in historical science, to challenge the existence of the secret protocols to the Nazi-Soviet Nonaggression Pact. The evidence is plain to see every time one looks at a map of the Soviet Union. Three formerly independent nations continue, nearly 50 years after the pact and its secret protocols were signed, to suffer from its consequences.

It is true that the Molotov-Ribbentrop Pact and its secret protocols no longer exist in the form which Mr. Falin seems to be searching for, that is, as original documents on paper. It is also true, however, that microfilms of these documents do indeed exist not only in West Germany, but in the United States and in Great Britain as well.

GERMAN ARCHIVES REFUTE SOVIET LIES

Mr. President, George O. Kent, a professor of history at the University of Maryland, asserts categorically that the secret protocol to the Molotov-Ribbentop Pact is an authentic document. For a public statement of Professor Kent's position on the authenticity of the secret protocol, I ask unanimous consent that an article from the September 9, 1988 issue of Newsday, written by Prof. George O. Kent of the University of Maryland, be inserted into the RECORD at the conclusion of my remarks as exhibit 1.

A microfilm archive of some of the most sensitive documents in the German Foreign Office, concerning Germany's foreign policy between the years of 1933 and 1944, was captured by Allied troops on May 14, 1945. The documents had been buried on the grounds of a country estate about 20 miles outside of Muehlhausen (Thuringia), Germany, where they had been hidden by Carl von Loesch, an official translator for the Foreign Office, who was entrusted by the Nazi government to look after these archives and, ultimately, to destroy them.

Lt. Col. Robert Currie Thomson, leader of the British Foreign Office field team dealing with item 28 of the Combined Intelligence Operations Staff [CIOS] blacklist, which dealt with the exploitation of German archival materials for the purpose of gaining intelligence for the Allied armies, was approached by Mr. von Loesch, who wanted to turn over the microfilmed archives to the British. Lieutenant Colonel Thomson, after consulting with his American counterpart on the CIOS, proceeded to go out and recover the microfilms.

Mr. President, I ask unanimous consent that the report of Lieutenant Colonel Thomson, explaining his role in the recovery of the microfilm archive and relating the claims made by von Loesch that the hidden microfilm archive contained a complete account of Germany's foreign policy between 1933 and 1944, be inserted into the RECORD at the conclusion of my remarks as exhibit 2.

The documents underwent a preliminary investigation, in which it was discovered that the claims which von Loesch had made to Lieutenant Colonel Thomson about the importance of the microfilm archives were true. Among other documents found on the microfilm were the official texts of the Molotov-Ribbentrop Pact and its secret protocols.

Mr. President, in order to establish the discovery of the authentic text of the Molotov-Ribbentrop Pact and its secret protocols, I ask unanimous consent that message 5291 of May 24, 1945, the report of U.S. Ambassador to the United Kingdom Winant to the Secretary of State, be inserted into the RECORD at the conclusion of my remarks as exhibit 3.

As can be noted from the aforementioned report from the Ambassador to the United Kingdom to the Secretary of State, provisions were made to produce two copies of the microfilm, for analysis and safekeeping in Great Britain and the United States. Copies of the microfilms can be found in the Public Records Office in London and in our own National Archives. The original microfilm archive, however, was returned to the German Foreign Office at the end of 1958, and has since been held in the Archives of the German Foreign Office.

Mr. President, I have in my possession today two certified copies of the Nazi-Soviet Nonaggression Pact and its secret protocols; one set comes from both the National Archives and the other I obtained from the German Foreign Office Archives. The certified copies will be filed with the Archives of the Senate Foreign Relations Committee, where anyone who wishes to examine them may do so.

Mr. President, I ask unanimous consent that a translation of these documents, made by the Congressional Research Service, be inserted into the RECORD at the conclusion of my remarks as exhibit 4, along with my correspondence on these matters with German officials. I wish to thank in particular Mr. Heinz Waldner, Chief Librarian of the German Foreign Office in Bonn, for his kind courtesy in furnishing the German copies.

Mr. President, I also have in my possession certified copies of transcripts, cables, and other documents of the Hitler-Ribbentrop period, again available both in the German Foreign Office Archives and in the National Archives, which offer evidence of circumstances confirming the existence and signing of the secret protocols to the Nazi-Soviet Nonaggression Pact. These documents shall join the certified copies of the Nonaggression Pact and its secret protocols in the Archives of the Senate Foreign Relations Committee.

Mr. President, I ask unanimous consent to insert translations of these documents, made by the Congressional Research Service, into the RECORD at

the conclusion of my remarks as exhibit 5.

These documents confirm that consultation did take place between German Chancellor Adolf Hitler and his Foreign Minister, Joachim von Ribbentrop, concerning the Nonaggression Pact. This evidence directly refutes Mr. Falin's earlier assertions. That no public statements were made by the two Nazi leaders about the secret protocols, which seems to surprise Mr. Falin, should not surprise anyone.

Both parties to the agreement obtained what they desired at the time. The Germans were able to prevent the Soviets from joining the Allied powers before the opening of World War II. The Soviets, in return for their neutrality, received permission from the only continental European power that could oppose them—Nazi Germany—to seize territories. Soviet expansionist desires were not, as history has shown, limited to the territories referred to in the secret protocols of the Nazi-Soviet Nonaggression Pact.

Mr. President, I believe it is time for the Soviet Union, and in particular for Soviet historians such as Valentin Falin, to own up to the fact that the secret protocols to the Nazi-Soviet Nonaggression Pact of August 23, 1939, do, in fact, exist, and that the consequences of those protocols can still be felt in Europe 50 years and a world war later.

If Mr. Falin and his colleagues in the Soviet Union need copies of the secret protocols to the Molotov-Ribbentrop Pact, they are available here in Washington, in Bonn, West Germany, and in London, England. As a matter of fact, if Mr. Falin does not have the opportunity to get into contact with Bonn or Washington, copies of the secret protocols, sent from the German Foreign Office Archives in Bonn, are also in the possession of a group of Communist Party members in occupied Lithuania, according to a report, published on February 4 of this year in the West German newspaper Frankfurter Allgemeine.

It is certainly time for the Soviets to stop lying to their own people and to the world. The deal that was made 50 years ago in Moscow is self-evident. It is time for the Soviets to stop denying the existence of the secret protocols to the Molotov-Ribbentrop Pact.

Mr. President, the best evidence the Soviet Union could offer of glasnost would be to restore the independence that Estonia, Latvia, and Lithuania lost due to these secret protocols, once they acknowledge what the rest of the world has known for nearly 50 years—that the secret protocols to the Molotov-Ribbentrop Pact do exist.

EXHIBIT 1

AS IT DENIES THE DEAL IT MADE TO SWALLOW THEM

(By George O. Kent)

In the wake of demonstrations last month in the Baltic states, the Soviet Union has charged that the secret agreement of 1939 that led to Soviet absorption of those states may never have existed.

The secret agreement was a protocol, or annex, to the Nazi-Soviet pact of Aug. 23, 1939. The pact itself was not secret, and in fact stunned the world, for it meant that two archenemies, Nazi Germany and Communist Russia, would not fight one another. The treaty assured Germany's leader Adolf Hitler that he did not need to worry about an attack on his rear in case his planned attack on Poland impelled France and England to war on him—which is just what happened. The pact made it easier to start World War II.

The protocol, however, was not then made public. After World War II, the United States, Britain and France published it in a multivolume "Documents on German Foreign Policy." Last month, the Communist Party newspaper in the Baltic state of Estonia became the first official publication in the Soviet Union to describe the documents.

The director of the Novosti press service, a former Soviet ambassador to West Germany, said that "the copies published in the press do not reflect authentic documents" and may have been fabricated in the West.

But the protocol is authentic. The original no longer exists, having been destroyed with the Nazi foreign minister's armored train during World War II. But the minister had microfilmed 10,000 pages of his most important files, including the protocol, and this film survived.

After the war, Karl von Loesch, the Foreign Office official who had secretly buried the film, met by chance the chief of the British documents team and led the team to it.

This film authenticates the protocol more positively than even a purported original. For the protocol was filmed between a great many other documents whose validity has not been questioned, and it would be harder to counterfeit a whole roll of film than a single document.

Under the terms of the protocol, the Baltic States, Poland, and southeast Europe were divided into German and Soviet spheres of influence. Finland, Estonia, Latvia, the eastern part of Poland, and Bessarabia were to go to the Soviets, and the rest—Lithuania, and the western part of Poland bordered by the Narev, Vistula and San rivers—to the Germans.

Baltic nationalists say the protocol's division of spheres of interest between Germany and the Soviet Union permitted the USSR to absorb Latvia and Estonia in 1940. It conquered Lithuania in 1944 and kept it.

Last month, demonstrators in the three countries, which are northeast of Poland, asked for independence.

While Hitler's goal was simply to keep Russia on the sidelines in a war with Poland, Stalin's goals were more complex. He believed that he could stay out of a European war and was willing to negotiate with both sides to see which one would offer him more. At the same time, he was concerned that Germany's recent incorporation of Austria and parts of Czechoslovakia—tolerated by both Britain and France—meant that Hitler was given a "free hand in the East" and that the Soviet Union might be Hitler's next victim after Poland.

In addition, the Soviet Union felt threatened by the Japanese in the Far East. Both Poland and Rumania had refused the Soviet troops permission to enter their territories to fight the Germans in case war broke out. This refusal considerably weakened the value of a possible British-French-Soviet alliance and convinced Stalin that the western powers were not serious about stopping Hitler.

For the Soviet Union, the advantages of going with Germany were many. Both countries had lost much territory following the first world war. Russia had lost Finland and the Baltic states (which became independent) and the western parts of White Russia and the Ukraine to Poland, and Besarabia to Rumania. The pact with Germany, according to the secret protocol, recovered most of these territorial losses, and would gain German influence against the Japanese.

Since the pact was a clear victory for Hitler, at least in the short term, it is hardly surprising that the Soviets prefer to deny that the protocol attached to it ever existed.

EXHIBIT 2

DISCOVERY OF SECRET ARCHIVES OF GERMAN FOREIGN MINISTRY

On May 12, I was in Muehlhausen (Thuringia) for the purpose of examining certain Foreign Ministry archives. By a fortunate coincidence I ran into Dr. Ralph Collins, of the State Department, a member of the US Team working in the closest collaboration with my own. We remained together for four days, during which time Dr. Collins' presence was not only helpful in emphasizing the co-operation existing between our two countries, but his counsel and companionship were invaluable in the unusual experiences which I am about to describe.

While returning alone from an interview with a German Foreign Ministry key man, I was approached by a man of some 36 years of age who, speaking faultless English, asked me to convey to London a letter addressed to Mr. Duncan Sandys, the British Minister for Housing and son-in-law of Mr. Winston Churchill. It transpired later that the man had no idea that I was searching for the very things which he was willing to reveal, but merely spoke to me because I was a British officer, a somewhat rare specimen in Thuringia. I told him that I could not undertake to forward the letter without some idea of the contents, whereupon the man said that I might read what he had written. I did so, and found that the writer (Herr Carl von Loesch), a former fellow-student with Mr. Sandys, offered to disclose to the latter the whereabouts of a set of microfilms of 30 boxes of the most top secret German Foreign Ministry papers, containing a complete account of Germany's foreign policy and doings from 1933 to 1944, and including correspondence and records of conversations between Hitler and Ribbentrop on the one side and Mussolini, Franco, Laval, Molotov, and Japanese and other personalities on the other, also reports by ambassadors and ministers of the most secret matters. Herr von Loesch was the understudy of the well-known Dr. Schmidt and interpreted at many meetings between Hitler and foreign statesmen. He was sent to Thuringia last February to house and look after the most secret archives. Owing to the sudden Allied advance orders were received to destroy the collection. This was done, but not before a set of microfilms was retrieved and buried in a lonely spot. The writer of

the letter asked to be transferred with two assistants to British occupied territory and put into touch with a Foreign Office representative with a view to the printing, sorting and rebuilding of the complete mass of films in rolls, at present in disorder. Von Loesch asked to be allowed to undertake the work, which would have to be done in Great Britain, and produced a British passport as evidence of his British nationality by birth in London.

The man emphasized his desire to deal with the British rather than the Americans, whereupon I stated that although a Foreign Office official, I also represented the State Department because we Allies were working in complete collaboration. There could be no question of a separate deal with one government. I would report the matter to the US Military authorities, as representing the interests of both Allies, because they were in occupation of the area. He would be informed of their decision. Dr. Collins was not present at the talk but collaborated fully in all that followed.

We decided to lay the matter the next day before the 1st Army G-2 at Weimar and to ask for their approval to negotiate with the man for the unearthing of the films and their transfer with him to our headquarters at the castle in Marburg/Lahn, which is well within American-occupied territory, whereas Thuringia is shortly due to be taken over by the Russians. At Weimar we found no G-2 Section because 1st Army had moved out and the 9th Army had not yet arrived. We managed to speak, however, with more than one responsible officer who, while disclaiming responsibility, voiced the opinion that we should go ahead and report later.

Accordingly on Monday, May 14, we motored to a village situated some 20 miles from Muehlhausen in order to see our man. I went alone into the house, leaving Dr. Collins with the driver of the jeep. I told von Loesch that I was prepared, on receiving the microfilms, to remove them and him to Marburg Castle, where he could restore the prints to order so that the whole would form a series of connected narratives. I could not agree to the transfer of his two assistants whose help he considered essential. The action taken would be reported to the allied authorities for a definitive decision as to his ultimate treatment. I emphasized that he would be treated with consideration and would certainly not starve at Marburg, but that I was only empowered to make a promise covering the immediate future. He enquired whether he would be regarded as a prisoner of war, to which I replied in the negative and promised that he would be subjected to no indignities but only to the same restrictions on liberty as Germans in general. He would naturally be under surveillance while dealing with the secret files. After a few more inquiries on his part I said that if he dealt honorably with me he could count on a like attitude on my part. He then accepted my conditions.

As a precaution, I then invited Herr von Loesch to accompany me to the jeep where in Dr. Collins' presence I summarized the arrangements made, again stressing the fact that it related to the immediate future only. Once more the man signified his acceptance.

We then proceeded some four miles by jeep to the neighborhood of a large country house named Schoeneberg in which a detachment of the 5th Armoured Division was quartered. I presented my army clearance papers at the house and asked that a representative of the US army might accompany us to the site of the alleged buried treasure. Ready compliance was expressed by Captain Albert M. Folkard who, bearing arms accompanied Dr. Collins, Herr von Loesch and myself along a private path in the estate to a point where we had to descend, rather uncomfortably, a steep ravine banked with pine trees. Our guide halted at a certain spot where he and Captain Folkard with iron bars soon scraped the soil from a waterproof cape covering a large can. This Captain Folkard brought to the top of the declivity and placed under guard in the mansion. He promised to submit to the colonel the request of von Loesch for the release of his automobile stored at an adjoining farm.

Dr. Collins and I then proceeded to Muehlhausen with Herr von Loesch. We had no difficulty in obtaining a pass for the latter's journey with his own automobile in our convoy to Marburg. We also reported the find to the C.I.C. of the Military Government and that of the Army Division, both of which scrutinized my papers, a step quite properly requested by telephone by Captain Folkard.

On our return to Schoeneberg Dr. Collins and I gladly accepted the hospitality of Colonel Douglas Page, Commanding Div. Artillery, 5th Armoured Division to be his guest overnight. Colonel Page has that rare spirit of genuine hospitality which left two tired and jaded travelers with the impression that their visit had been a genuine pleasure to him. There was not one of his officers who did not second Col. Page's efforts to make us thoroughly at home. Meanwhile Captain Folkard continued to be responsible for the can of unassuming appearance but presumably valuable contents. Von Doesch we had sent home and arranged to pick up on the following day.

On Thursday, May 15, we proceeded to Muehlhausen with Captain Folkard and reported all the the facts to Lt Col McFarland of the Army Division CIC. On returning to Schoeneberg we had the honor of meeting Major General Oliver, Commanding 5th armored Division, who was good enough to give general approval to our proceedings and to our acting at our discretion.

After lunch we proceeded in convoy to Marburg via Dentine Camp. Colonel Page had considerately provided an M. 40 armed car for our find and for the luggage of our growing party. In addition he released without demur the car of Herr von Loesch and provided petrol for its use. Captain Folkard continued to be personally responsible for guarding the can. At Dentine we met our own RAF microfilming unit and for the first time, with the help of their magnifying reading apparatus, formed a first-hand idea of the value of the unearthed films. They fully correspond to the informant's description and will undoubtedly supply information of immense value which may not be obtainable elsewhere. Our technicians advised us that they could undertake the printing work if equipment and paper could be made available in Germany, which ought to be the case, but eventually, in view of transport and communication difficulties, we decided unanimously that the best plan was for me to proceed to London, get the Air Ministry to make prints, and return with them to Marburg for sorting, etc.

On the value of the find being thus confirmed Dr. Collins and I decided to get Herr von Loesch's assistants (a man and a woman) brought to Marburg lest the Russians should put pressure on them to make disclosures. Rumours are already in circulation, as witness para. 8 of a memorandum dated April 30 by Mr. H.B. Morris to AC of S, G-2, Shaef, Goldcup HQ. Captain Folkard is accordingly arranging to bring the two individuals soon to Marburg. They will be installed in an apartment in the castle, where Herr von Loeseh already is.

The man is making interesting disclosures and is quite willing to talk about his relations with Hitler and others. I have been able to check up on some of his statements and have found them remarkably accurate. He says, for instance, that months ago the Gestapo supplied the German Foreign Ministry with copies of the Instrument of Surrender and of the Agreement for the division of Germany into Zones of Allied Occupation (with map), both of which I have seen. His description of the details is extremely like my remembrance of them. I have requested Team members to make memoranda of his statements of interest. The man may be an opportunist but he quite accepts the situation that he is in our power and to my mind seems quite prepared to be useful to us in the interests of his own future. His Germany has gone forever, and he is quite willing to adjust himself to a new state of affairs. I am seeing that he is treated with courtesy and consideration, but without tenderness, and needless to say he is under strict surveillance.

Dr. Collins' sound judgment and commonsense were of the utmost value in handling a delicate and unexpected situation and we both derived pleasure in demonstrating, in a variety of places, the identity of interests of our governments and despatching agencies. Next to him merit is due to Captain Folkard for the ungrudging assistance readily rendered in looking after our treasure trove and in convoying it over a drive of many hours. He was constantly solicitous for our comfort and for the safety of his charge, and both Dr. Collins and I feel that we must pay a warm tribute to him.

R.C. THOMSON,
Lt. Col., Leader of Foreign Office Field Team, Item 28 of CIOS Black List.

[Telegram]

THE AMBASSADOR IN THE UNITED KINGDOM,
London, May 26, 1945.

To the Secretary of State

5291. ReDepts 4091, May 24. The microfilms of German FO documents are now undergoing preliminary examination in London and prints are being made for the FO by the Air Ministry. There are 9,725 pages of documents to be gone through, and because of technical differences between the German film and British film it is not possible to make a new microfilm directly from the German one. Prints first have to be made and from these prints a new microfilm is being produced. One copy of the new film is to be left in the FO and one copy will be delivered to the Embassy, probably by May 28, for forwarding to the State Dept.

Because of the nature of these documents the FO has expressed the opinion that no further distribution should be made until after the FO and the State Dept. have had an opportunity to examine the documents fully. Dr. Perkins has made a hasty survey of approximately one-fourth of the total number of documents, and on the basis of this sampling he is convinced of their highly

secret nature. Documents he has examined contain comparatively full reports of conversations between Hitler and Ribbentrop and Matsuoka during his visit to Berlin in March and April 1941 at which time the Germans strongly urged that Japan attack Singapore. Perkins has also seen records of conversations between Hitler and Ribbentrop and Molotov in which an attempt was made to convince the Russians that the tripartite Axis aimed only at expansion to the south and was not directed against the Soviet Union. The documents contain the text of agreements made between Germany and the Soviet Union in Sept. 1939. There is also among the documents ample proof of close collaboration between Germany and the Spanish Govt. under Franco. A letter dated Feb. 26, 1941 from Franco to Hitler includes a pledge of his friendship and the urgent recommendation for the closing of the Straits of Gibraltar. There is an agreement signed in 1943 for the defense of Spanish territory and German aid in case the Allies attempted to occupy any Spanish territory as they had French North Africa.

When these films were brought to London for processing its was planned that a copy of the new microfilm would be made available to Ambassador Murphy's office. As stated above, the FO after preliminary survey of the documents feel that the original distribution should be strictly limited. This is based on the fact that the documents are of purely political character concerning the foreign policy of Germany, that they contain information regarding certain of our present Allies and that they would not be of apparent interest or use in current administration of a defeated Germany. The FO has received a request from the political section of the British element of the Control Commission similar to that received by us from Ambassador Murphy's office. According to the FO, copies of the new microfilm will not be distributed to any other British agencies until after the FO has made a thorough examination. However, it was made clear by the FO that it considers these documents a joint State Department Foreign Office find, and that if the Embassy requests an additional copy of the new film for Ambassador Murphy's office it will be made available. Before making such a request the Dept's instructions are requested.

Winant.

CRS TRANSLATION OF CERTIFIED COPY OF PACT AND OF CORRESPONDENCE BETWEEN SENATOR HELMS AND WEST GERMAN FOREIGN OFFICE ARCHIVIST MR. HEINZ WALDNER

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, September 14, 1988.

VLR I HEINZ WALDNER,
Auswaertiges Amt referat 117,
5300 Bonn 1, West Germany.

DEAR HERR WALDNER: The U.S. Senate Committee on Foreign Relations is currently conducting a study on the annexation of the Baltic States by the Union of Soviet Socialist Republics, and on the relationship between the signing of the Molotov-Ribbentrop pact in 1939 and the annexation of the Baltic States.

In this regard, we are seeking to verify the authenticity and chain of custody of the documents enumerated below. We understand from the United States Department of State that these documents were returned by the Allied powers to the German Foreign Ministry in 1949, on the condition that they be open to the public. Therefore, we would like to obtain from your office certified copies of the cited documents, as well as of any letters, memoranda, or notes relating to the provenance or chain of custody when they came into your possession.

(1) The Treaty of Nonaggression Between Germany and the Union of Soviet Socialist Republics, signed August 23, 1939, by Ribbentrop and Molotov.

(2) Secret Additional Protocol to the Treaty of Nonaggression Between Germany and the Union of Soviet Socialist Republics, signed August 23, 1939, by Ribbentrop and Molotov.

(3) Secret Supplementary Protocol to the German-Soviet Boundary and Friendship Treaty, signed September 28, 1939, by Ribbentrop and Molotov.

(4) Secret Protocol, signed January 10, 1941, by Schulenburg and Molotov.

(5) Telegram No. 204 of August 23, 1939, originating in Moscow, signed by Ribbentrop, from the Reich Foreign Minister to the German Foreign Office.

(6) Telephone copy of Telegram No. 204 of August 23, 1939.

(7) Telegram No. 205 of August 23, 1939, originating in Berlin, signed by Kordt, from the German Foreign Office to the Reich Foreign Minister.

(8) Telephone copy of Telegram No. 205 of August 23, 1939.

(9) Telegram No. 360 of September 15, 1939, originating in Berlin, signed by Ribbentrop, from the Reich Foreign Minister to the German Ambassador in the Soviet Union.

(10) Telegram No. 442 of September 25, 1939, originating in Moscow, signed by Schulenburg, from the German Ambassador in the Soviet Union to the German Foreign Office.

(11) Telegram No. 497 of October 4, 1939, originating in Berlin, signed by Ribbentrop, from the Reich Foreign Minister to the German Ambassador in the Soviet Union.

(12) Memorandum by the Reich Foreign Minister for Hitler, June 24, 1940, signed by Ribbentrop.

Thank you for your assistance. If you desire further information in this matter, please contact Martin Zvaners or Ann Smith at the Senate Foreign Relations Committee, Washington, DC 20510-6225. The telephone number is (202) 224-3941, the FAX number is (202) 224-5011.

Sincerely,

JESSE HELMS.

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC.

From Foreign Office, 117-251.09/88, Bonn Nov. 14, 1988.

Senator JESSE HELMS,
United States Senate, Committee on Foreign Relations, Washington, DC.

DEAR SENATOR: In accordance with your request of September 14, 1988, I am sending you enclosed 33 notarized photocopies of Foreign Office files from the years 1939-1941. Both the German and Russian versions of the treaties are given (Nos. 1-4 on your list).

The portion of the Foreign Office files which is now here in Bonn fell into the hands of American troops in spring of 1945 and has been under the oversight of American and English officials since then. For details, only the Foreign Office in London or the U.S. Department of State can give you information. You can also find a pertinent description in the Akten zur deutschen auswärtigen Politik 1981-1945, Serie D. Band I in the Allgemeine Einleitung and in Anhang I. The English translation appeared as Documents on German Foreign Policy 1918-1945, Series D, vol. I, General Introduction and Appendix I).

The archives had not even been returned to the Foreign Office by 1949. It was only later as a result of an exchange of notes between the /German/ Federal Administration and the ambassadors of the three Western allies in Bonn between March 14 and April 18, 1956. The text of this correspondence is pritned in United States Treaties and other International Agreements, vol. 7, Part 2, p. 2119 ff.

The documents had mostly all been returned by early 1959, and the holdings have since then been uninterruptedly in the hands of the Foreign Office.

Sincerely yours,

———— ————.

NONAGGRESSION PACT BETWEEN GERMANY AND THE UNION OF SOVIET SOCIALIST REPUBLICS

The Government of the German Reich and the Government of the Union of Soviet Socialist Republics, led by the desire to consolidate peace between Germany and the USSR, and on the basis of the fundamental provisions of the Treaty of Neutrality signed in April 1926 between Germany and the USSR, have arrived at the following agreement:

ARTICLE I.

Both parties to the treaty are obligated to refrain from any aggressive act and any attack on each other, either individually or jointly with other powers.

ARTICLE II.

In the case that one of the parties to the treaty should become the object of belligerance on the part of a third power, the other party shall not support the third power in any way.

ARTICLE III.

The Governments of both contracting parties shall in the future remain constantly in contact with each other in order to keep each other informed about their common interests.

ARTICLE IV.

Neither of the two contracting parties shall participate in any power alignment aimed directly or indirectly at the other party.

ARTICLE V.

In the case that disputes or conflicts should arise between the two contracting parties over questions of this or that kind, both parties shall settle these disputes or conflicts exclusively through a friendly exchange of opinion or, if need be, through the intermediary of an arbitration commission.

ARTICLE VI.

The present treaty shall be valid for 10 years, subject to the proviso that unless one of the contracting parties terminates it one year before this period is up, the treaty will automatically continue in force for an additional five years.

ARTICLE VII.

The present treaty shall be ratified within the shortest possible time. The documents of ratification shall be exchanged in Berlin. The treaty shall take effect immediately upon ratification.

Prepared in two versions, Russian and German.

Moscow, August 23, 1939.
VON RIBBENTROP
(For the Government
of the German Reich).
V. MOLOTOV
(For the Government of the USSR).

SECRET SUPPLEMENTARY PROTOCOL

On the occasion of the ratification of the non-aggression pact between the German Reich and the Union of Soviet Socialist Republics, the delegates of both parties, undersigned below, held a highly confidential discussion concerning delimitation of the spheres of interest of both parties in Eastern Europe. This discussion led to the following results:

1. In the case of territorial-political reorganization in the territories belonging to the Baltic States (Finland, Estonia, Latvia, and Lithuania), the northern boundary of Lithuania also forms the boundary of the spheres of interest of Germany and the USSR. The interests of Lithuania in the territory of Vilna are recognized in this connection.

2. In the event of a territorial-political reorganization of the areas belonging to the Polish nation, the spheres of interest of Germany and the USSR are approximately demarcated by the lines of the Narew, Vistula, and San Rivers.

The question as to whether bilateral interests make the maintenance of an independent Polish state seem desirable, and how this state would be demarcated, can only be determined definitively in the course of future political developments.

In each case both Governments will solve the question by amicable agreement.

3. As regards southeastern Europe, Soviet interest in Bessarabia is emphasized. The German side declares its complete lack of interest in these areas.

4. This protocol will be treated as top secret by both sides.

VON RIBBENTROP
(For the Government
of the German Reich).
V. MOLOTOV
(On the authority of
the Government of the USSR).

(Blurred stamp in upper right-hand corner says: "Return to office of the Reich Foreign Minister")

SECRET SUPPLEMENTARY PROTOCOL

The undersigned delegates establish agreement between the Government of the German Reich and the Government of the USSR concerning the following matters:

The secret supplementary protocol signed on August 23, 1939 is amended at No. 1 in that the territory of Lithuania comes under the USSR sphere of interest, because on the other side the administrative district "Woywodschaft" of Lublin and parts of the administrative district of Warsaw come under the German sphere of influence (cf. map accompanying the boundary and friendship treaties ratified today). As soon as the Government of the USSR takes special measures to safeguard its interests on Lithuanian territory, the present German/Lithuanian border will be rectified in the interests of simple and natural delimitation, so that the territory of Lithuania lying southwest of the line drawn on the accompanying map will fall to Germany.

It is further established that the economic arrangements in force at the present time between Germany and Lithuania will be in no way damaged by the aforementioned measures being taken by the Soviet Union.

Moscow, September 28, 1939.
VON RIBBENTROP
(For the Government
of the German Reich).
V. MOLOTOV
(On the authority of
the Government of the USSR).

SECRET PROTOCOL

Graf von Schulenburg, the German Ambassador, acting for the Government of the German Reich, and the Chairman of the Council of People's Commissars of the USSR, W.M. Molotov, acting for the Government of the USSR, have agreed upon the following points:

1. The Government of the German Reich renounces its claims to the portion of the territory of Lithuania mentioned in the September 28, 1939 Secret Protocol and shown on the included map.

2. The Government of the Union of Soviet Socialist Republics is prepared to compensate the Government of the German Reich for the territory mentioned in Point 1 of this protocol by payment of the sum of 7,500,000 gold dollars = 31 million 500 thousand reichsmarks to Germany.

Payment of the sum of 31.5 million reichsmarks will be accomplished by the USSR in the following way: one eighth, i.e., 3,937,500 reichsmarks, in shipments of non-ferrous metal within three months of ratification of this treaty, and the remaining seven eighths, 27,562,500 reichsmarks, in gold by a deduction from the German payments in gold which the German side was to bring up by February 11, 1941. On the basis of the correspondence concerning the February 11, 1940 economic agreement between the German Reich and the Union of Soviet Socialist Republics in the second section of the agreement between the Chairman of the German Economic Delegation, Herr Schnurre and the People's Commissar for USSR Foreign Trade, Herr A.I. Mikoyan.

3. This protocol has been prepared in both German and Russian (two originals) and goes into effect upon being ratified.

Moscow, January 10, 1941.
ILLEGIBLE, PRESUMABLY "VON
SCHULENBURG"
(For the Government
of the German Reich).
V. MOLOTOV

Diplogerma Moscow

Rush!! Tel. no. 360 from September 15.

Top secret! For the Ambassador personally.

Please inform Herr Molotov immediately of the following:

1. As can be seen from the September 14 overview of the military situation, the destruction of the Polish Army is being rapidly completed. Warsaw will probably be occupied within the next few days.

2. We have already explained to the Soviet Government that, apart from purely military operations, we are bound by, and shall, of course, continue to be bound by, the delimitation of the spheres of interest of both sides agreed upon in Moscow.

3. We assume from the messages sent you by Molotov on September 14 that the Soviet Government will now intervene militarily, and that it is now beginning this action. We are glad of this. The Soviet Government thus relieves us of the necessity of annihilating the remains of the Polish Army by pursuing it to the Russian border. In addition, this will take care of the problems which would have arisen in the absence of Russian intervention; i.e., that in the territories east of the German sphere of influence a politically empty space would have come into existence. As we have, apart from any measures occasioned by military operations, absolutely no intention of assuming any political or administrative tasks in these areas, without Soviet intervention, the pos-

sibility of the formation of new states would have existed there.

4. As for political support for the proceedings of the Soviet Army, we propose a joint communiqué with the following contents:

"In view of the evident collapse of the groups of people living in what was the State of Poland, the Government of the Reich and the Government of the USSR consider it necessary to put an end to the politically and economically untenable situation in these areas. They consider it their joint responsibility to restore law and order in these areas naturally within their spheres of influence in order to bring about a reorganization there from the standpoint of establishing natural boundaries and viable economic institutions.

5. In proposing a communiqué of this sort we are assuming that the Soviet Government has dropped the idea, already mentioned by M. in a previous conversation, of justifying Soviet action by the threat to the Ukrainian and White Russian population from Germany. Such an explanation would in fact be impossible. Objectively it would contradict real German intentions, and which are aimed exclusively at fulfilling well-known German interests, would, in addition, be incompatible with the agreements made in Moscow, and, finally, it would make both . . . nations appear to the rest of the world to be opponents to the rest of the world to be adversaries, in contradiction to the expressed wish on both sides for friendly relations.

6. Since military operations must be terminated as quickly as possible, if only due to the advanced season, we would be grateful if the Soviet Government would determine for us what day and hour its army will begin the invasion, so that we can gear ourselves to it. Moreover, in order to facilitate the requisite coordination of military action for both sides, it will also be necesary for a representative from both Governments to meet with Russian and German officers at some place in the theater of operations, we propose Bialistok, on the flight path, in order to come to an agreement about what is necessary.

Request immediate report by telegram. The textual amendment discussed by Gaus with Hilger has already been taken care of.

RIBBENTROP.

Moscow, September 25, 1939, 10:58 p.m.
Arrival "26," 12:30 a.m.
No. 442 of 9/25

TOP SECRET! RUSH!

Stalin and Molotov summoned me to the Kremlin today at 10:00 in the evening. Stalin made the following statement: In the final settlement of the Polish question, everything would have to be avoided which might cause friction in the future between Germany and the Soviet Union. From this viewpoint, allowing a remnant of an independent Poland/to continue to exist/ seemed to him a mistake. He was making, he said, the following proposal: Of the territory situated east of the line of demarcation, the whole administrative district of Lublin and part of the administrative district of Warsaw up to the Bug River should be added to our part. For this, we will renounce any claims to Lithuania.

Stalin designated this proposal as the material for the upcoming negotiations with the Reich Foreign Minister and added that, if we reach an agreement, the Soviet Union would immediately set about solving the problem of the Baltic States according to the August 23 protocol and he expected the unqualified support of the German Government. Stalin mentioned pointedly Estonia, Latvia, and Lithuania, but did not mention Finland.

I told Stalin I would notify my Government.

Rush! No. 497 dated 10/4.

TOP SECRET!

In response to today's telephone message from the Ambassador.

Consulate in Kaunas/Lithuania/receives following instructions:

1. This is only for your personal information: On the occasion of the ratification of the German-Russian Non-Aggression Pact on August 23, a top secret demarcation of separate spheres of influence in Eastern Europe was entered into with the Soviet Union. According to this, Lithuania was supposed to belong to the German sphere of influence, while in the territory which was previously the Polish state, the so-called Four-River-Line, the . . . Narew-Vistula-San, would form the boundary. Even at that time I demanded that the Vilna area go to Lithuania, which was conceded by the Soviet Government. During negotiations over the boundary and friendship treaty of September 28, the arrangement was amended to take Lithuania, including the Vilna area, into the Soviet sphere of influence, in exchange for which the administrative district of Lublin and large parts of the administrative district of Warsaw including the tip of the region, Suvalki would fall into the German sphere of influence. As including the Suvalki region in the German sphere of influence would give rise to difficulties in drawing the boundary, we agreed that in the case special Soviet measures were mounted in Lithuania, a narrow, but precisely delimited area (on the map) in southwestern Lithuania would go to Germany.

2. Today Graf von der Schulenburg has informed us that, contrary to our intentions, Molotov has informed the Lithuanian Foreign Minister of our secret arrangement. I would like to ask you to inform the Lithuanian Government about the affair verbally and in strictest confidence as follows:

As early as the occasion of the ratification of the German-Soviet Non-Aggresion Pact on August 23, in order to avoid complications in Eastern Europe between the Soviet Government and ourselves, discussions had taken place concerning the demarcation of German and Soviet spheres of influence. During these discussions I advocated that the Vilna region be given back to Lithuania, which the Soviet Government promised to do. During negotiations over the boundary and friendship treaty of September 28th, the bit of territory called Suwalki between Germany and Lithuania fell to Germany, as can be inferred from the since published German-Soviet boundary delimitation. But because this would result in a complicated and impractical boundary, I reserved a border rectification for Germany in this area, whereby a slender strip of Lithuanian territory would fall to Germany. The allocation of Vilna to Lithuania was also upheld during these negotiations. /Tell them further that/ You are now empowered to inform the Lithuanian Government that the Government of the Reich is not at the present time interested in such border rectification. We do, however, require that the Lithuanian Government treat the point as top secret. (Conclusion of the instructions to Kaunas).

Please inform Herr Molotov of our meassage to the Lithuanian Government. Also, request him, as already indicated in the previous telegram, (1) in case of deployment of Russian troops in Lithuania, to leave the strip of Lithuanian border in question free and (2) to leave it up to Germany to determine the time to come to an agreement on the question of territorial cession. These two points are to be decided in a secret exchange of letters between Molotov and you.

Ribbentrop.

Two copies,
1. For the files
2.
This is No. 2.

Note for the Führer

The text of the August 23, 1939 secret supplementary protocol is as follows:

"SECRET SUPPLEMENTARY PROTOCOL

On the occasion of the ratification of the Non-Aggression Pact between the German Reich and the Union of Soviet Socialist Republics, the undersigned agents of both parties met in top secret conference to discuss the question of delimitation of the spheres of interest of both parties in Eastern Europe. This discussion led to the following results:

1. In the case of territorial-political reorganization in the territories belonging to the Baltic States (Finland, Estonia, Latvia, and Lithuania), the northern boundary of Lithuania is to form the boundary of the spheres of interest of Germany and the USSR. The interests of Lithuania in the territory of Vilna are recognized in this connection.

2. In the event of a territorial-political reorganization of the areas belonging to the Polish nation, the spheres of interest of Germany and the USSR are approximately demarcated by the lines of the Narew, Vistula, and Sand rivers.

The question as to whether bilateral interests make the maintenance of an independent Polish state seem desirable, and how this state would be delimited can only be determined definitively in the course of future political developments.

In each case both Governments will solve the question by amicable agreement.

3. As regards southeastern Europe, Soviet interest in Bessarabia is underscored. The German side declares its complete lack of interest in these areas.

4. This protocol will be treated as top secret by both sides.

For the Government of the German Reich.

On the authority of the Government of the USSR
von Ribbentrop

V. MOLOTOV".

As far as I can recall the following took place:

In delimiting mutual spheres of interest in Eastern Europe when Southeast Europe was mentioned, the Soviet side emphasized its interest in Bessarabia. On this occasion I expressed verbally our lack of interest in the

question of Bessarabia. However, because of the possibility of committing an indiscretion, which had to be taken into account considering that at that time the nature of German-Russian relations was still completely unknown, I elected a formulation of a general sort for the Protocol in order not to fix our expressed recognition of the Russian claim to Bessarabia in writing. This was done in such a way that in discussing Southeast European problems, I stated quite generally that Germany had no political interest in "these territories;" i.e., Southeastern Europe. I did, however, explicitly point out Germany's economic interest in these southeastern territories. This was done in accordance with the general phraseology recommended by the Führer for Southeast Europe, as well as, as far as I remember, a particular directive from the Führer, which I received before I left for Moscow and in which the Führer empowered me to express Germany's lack of interest in the territories of Southeast Europe and, if I had to, even as far as Constantinople and the Straits. The latter was, however, not mentioned.

SECRET!

Contents: Secret protocol concerning the borders of Lithuania.

I have the honor of sending as an enclosure in both German and Russian the secret protocol signed by myself and the Chairman of the Council of the People's Commissars of the USSR, Mr. Molotov, on January 10, 1941 concerning the cession of the borders of Lithuania.

RIBBENTROP.

To the Foreign Office, Berlin.

NATIONAL ENDOWMENT FOR THE ARTS

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Thank you, Mr. President.

Mr. President, several weeks ago, I began to receive a number of letters, phone calls, and postcards from constituents throughout the State concerning art work by Andres Sarrano. They express a feeling of shock, of outrage, and anger.

They said, "How dare you spend our taxpayers' money on this trash." They all objected to taxpayers' money being used for a piece of so-called art work which, to be quite candid, I am somewhat reluctant to utter its title. This so-called piece of art is a deplorable, despicable display of vulgarity. The art work in question is a photograph of the crucifix submerged in the artist's urine.

This artist received $15,000 for his work from the National Endowment for the Arts, through the Southeastern Center for Contemporary Art.

Well, if this is what contemporary art has sunk to, this level, this outrage, this indignity—some may want to sanction that, and that is fine. But not with the use of taxpayers' money. This is not a question of free speech. This is a question of abuse of taxpayers' money. If we allow this group of so-called art experts to get away with this, to defame us and to use our money, well, then we do not deserve to be in office.

That is why, Mr. President, I am proud of the Members, who in literally a matter of minutes—over 20, about 25—joined me in signing a strong letter of protest to the Endowment. Here is a picture, and the title is "Piss Christ." Incredible.

To add insult to injury, after this group of so-called art experts picked this artist for this $15,000 prize—of taxpayers' money; we paid for this, our taxpayers—I do not blame people for being outraged and angered, and they should be angered at us, unless we do something to change this. If this continues and if this goes unrectified, where will it end? They will say, "This is free speech." Well, if you want free speech, you want to draw dirty pictures, you want to do anything you want, that is your business, but not with taxpayers' money. This is an outrage, and our people's tax dollars should not support this trash, and we should not be giving it the dignity. And after this piece of trash and this artist received this award, to make matters worse, the Awards in Visual Arts, this wonderful publication was put together; and who was it financed by, partially? By none other, than the National Endowment for the Arts. What a disgrace.

They not only see this garbage, they can say we did not know he engaged in this kind of filth, but then they see fit to distribute it through the Nation and brag about it and allow their names to be used, instead of calling and saying, you get our name out of that.

Mr. President, we better see to it that——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. D'AMATO. Mr. President, I ask unanimous consent that I might be permitted 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. The purpose for which the Endowment was established, and I quote, "to support the survival of the best of all forms that reflect the American heritage in its full range of cultural and ethnic diversity and to provide national leadership on behalf of the arts."

Mr. President, I submit this is a distortion of those purposes. It does not reflect on the full range of cultural and ethnic diversity; rather, it is a perversion of those principles. If people want to be perverse, in terms of what they recongize as art or culture, so be it, but not with my money, not with the taxpayers' dollars, and certainly not under the mantle of his great Nation. This is a disagrace.

Mr. President, I ask unanimous consent that the letter to the National Endowment for the Arts be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, May 18, 1989.

Mr. HUGH SOUTHERN,
Acting Chairman, National Endowment for the Arts, Washington, DC.

DEAR MR. SOUTHERN: We recently learned of the Endowment's support for a so-called "work of art" by Andress Serrano entitled "Piss Christ." We write to express our outrage and to suggest in the strongest terms that the procedures used by the Endowment to award and support artists be reformed.

The piece in question is a large and vivid photograph of Christ on a crucifix submerged in the artist's urine. This work is shocking, abhorrent and completely undeserving of any recognition whatsoever. Millions of taxpayers are rightfully incensed that their hard-earned dollars were used to honor and support Serrano's work.

There is a clear flaw in the procedures used to select art and artists deserving of taxpayers support. That fact is evidenced by the Serrano work itself. Moreover, after the artist was selected and honored for his "contributions" to the field of art, his work was exhibited at government expense and with the imprimatur of the Endowment.

This matter does not involve freedom of artistic expression—it does involve the question whether American taxpayers should be forced to support such trash.

And finally, simply because the Endowment and the Southeastern Center for Contemporary Art (SECCA) did not have a direct hand in choosing Serrano's work, does not absolve either of responsibiity. The fact that both the Endowment and the SECCA with taxpayer dollars promoted this work as part of the Awards in Visual Arts exhibition, is reasons enough to be outraged.

We urge the Endowment to comprehensively review its procedures and determine what steps will be taken to prevent such abuses from recurring in the future.

We await your response.

Sincerely,

Alphonse D'Amato, Bob Kerrey, Warren B. Rudman, Rudy Boschwitz, Dennis DeConcini, Pete Wilson, Bob Dole, Chuck Grassley, James A. McClure, John Heinz, Wendell Ford, Howell Heflin, Harry Reid, Richard Shelby, John W. Warner, Larry Pressler, Conrad Burns, Tom Harkin, Trent Lott, Jesse Helms, John McCain, Arlen Specter, Steve Symms.

Mr. HELMS. Mr. President, the Senator from New York is absolutely correct in his indignation and in his description of the blasphemy of the so-called artwork. I do not know Mr. Andres Seranno, and I hope I never meet him because he is not an artist, he is a jerk.

Let us examine exactly what this bird did to get the American taxpayer to subsidize his $15,000 award through the so-called National Endowment for the Arts. Let me first say that if the

Endowment has no more judgment than this, then it ought to be abolished and all funds returned to the taxpayer.

What this Seranno fellow did to create this blasphemy was to fill a bottle with his own urine and then he stuck a crucifix—the Lord Jesus Christ on a cross—down in the urine, set the bottle on a table, and took a picture of it.

For that, the National Endowment for the Arts contributed to a $15,000 award to honor him as an artist.

I say again, Mr. President, he is not an artist. He is a jerk. He is taunting a large segment of the American people, just as others are, about their Christian faith. I resent it, and I do not hesitate to say so.

I am not going to call the name that he applied to this work of art. By naming it he sought to create indignation, and let there be no question that he succeeded in that regard.

It is all right for him to be a jerk but let him be a jerk on his own time and with his own resources. Do not dishonor our Lord. Again, I resent it and I think the vast majority of the American people resent the National Endowment for the Arts spending the taxpayers' money to honor this individual.

The Federal program which honored Mr. Serrano, called the Awards in Visual Arts, is supported by the National Endowment and administered by the Southeastern Center for Contemporary Arts. They call it SECCA and I am sorry to say it is in my home State.

After Mr. Serrano's selection, this deplorable photograph and some of his other works were exhibited in several cities around the country with the approval and the support of the National Endowment.

Horsefeathers. If we have sunk so low in this country as to tolerate and condone this sort of thing, then we have become a part of it.

The question is obvious. On what conceivable basis does anybody who would engage in such blasphemy and insensitivity toward the religious community deserve to be honored? The answer to that is that he does not. He deserves to be rebuked and ignored because he is not an artist. Anybody who would do such a despicable thing—and get a tax-subsidized award of $15,000 for it—well, it tells you something about the state of this Government and the way it spends our hard-earned tax dollars.

So no wonder all of the people calling my office are indignant. The Constitution may prevent the Government from prohibiting Mr. Serrano's—laughably, I will describe it—"artistic expression." But the Constitution certainly does not require the American taxpayers or the Federal Government to fund, promote, honor, approve, or condone it.

Mr. President, the National Endowment's procedures for selecting artists and works of art deserving of taxpayer support are badly, badly flawed if this is an example of the kind of programs they fund with taxpayers' money.

I have sent word to the Endowment that I want them to review their funding criteria to ensure abuses such as this never happen again. The preliminary report we got from one person with whom we talked was sort of "Down, boy, we know what we are doing."

Well, they do not know what they are doing. By promoting, approving, and funding Mr. Serrano's sacrilege, the National Endowment for the Arts has insulted the very precepts on which this country was founded. I say again, that as an American and as a taxpayer, I resent it.

Mr. COATS addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. COATS. I think the Chair.

(The remarks of Mr. COATS pertaining to the introduction of S. 1057 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Ohio is recognized.

THE SHAMIR PLAN FOR ELECTIONS IN THE OCCUPIED TERRITORIES

Mr. METZENBAUM. Mr. President, the State of Israel has been the focus of abundant study, commentary and criticism over the past 1½ years. Israelis have been told in every manner imaginable that they bear responsibility for the violence in the occupied territories. Israeli security forces have been compared to everyone from the Nazis to the Khmer Rouge in their attempts to restore order in the West Bank and Gaza Strip.

What the world continues to ignore is the fact that Israel is at war. The State of Israel is faced with almost impossible alternatives regarding its relations with the Palestinians. Too many of Israel's neighbors, with the exception of Egypt, continue in their determination that there should be no State of Israel. I will not take up my colleagues' time with reviewing the strategic picture Israel has faced over the years. One only has to look at a map to understand this situation. Most Senators are already well aware of the criticals geographic problems that limit Israel's diplomatic and security options.

Mr. President, even with the majority of its population and industry crammed into a narrow corridor 9 miles wide and 25 miles long, Israel has offered a major concession to West Bank and Gaza residents. Israel has just taken a big risk in the search for peace.

Prime Minister Yitzhak Shamir has produced a viable, realistic plan which includes Palestinian self-rule and a vehicle for negotiations on a permanent solution. The Shamir plan represents an accommodation of widely divergent priorities on both sides of the issue. The plan is not what either side would love to see, but this is the essence of compromise. While not perfect, the Shamir plan is workable, it is a substantive offer, and it should be taken seriously by all parties to the conflict.

Mr. President, it is significant that the Israeli cabinet has given approval to the Shamir plan. Israeli democracy has, at times, been almost too pluralistic, creating a divided government.

But the Shamir plan is not the product of division. It is a plan that the entire Government has endorsed because the voters of Israel want peace.

For so many months, the plain fact that Israelis are ready and willing to make peace has been callously overlooked. No one has suffered more from the ravages of violence than ordinary Israelis. Many who have been calling on Israel to lay down its arms and give in to the rioters fail to see two essential truths about the conflict. The first, as I have mentioned, is that Israelis have endured a vastly greater level of war, strife and fear over time than the Palestinians.

Israelis are truly the party most in need of peace.

The second frequently overlooked truth is that no sovereign state can ever be expected to put itself in a suicidal strategic position to satisfy the fickle whims of world opinion. The PLO's so-called peace proposals are inherently insincere and cynical because they would ultimately be fatal to Israel.

One need only look at the PLO seal to see that it views all of Israel as part of its self-declared State of Palestine. This is not the emblem of an organization committed to any peace process.

The Shamir plan, on the other hand, gives something of substance to both sides in a realistic framework.

The Shamir plan will help bring a measure of stability to a turbulent area. Arafat's various ideas have simply served to stir up the plot.

Mr. President, Prime Minister Shamir has laid out a 5-year road map toward a permanent solution of the Palestinian-Israeli conflict. The plan is an attempt to identify responsible negotiating partners within the Palestinian community, and to give them the credibility to speak for their people.

The plan is intended to be a flexible vehicle for dialog—not a diplomatic straightjacket.

Upon implementation of the Shamir plan, free democratic elections will be held in the territories by secret ballot.

Mr. President, I should note, parenthetically, that if this plan is put into effect, it will represent one of the first truly free plebiscites in the Middle East.

Has anyone ever heard Mr. Arafat, or any other Arab leader, for that matter, call for free elections in Saudi Arabia, Syria, Libya, Yemen, Abu Dhabi, or any other nation in the Arab world? No.

Over the years, Israel has introduced many new ideas to its regional neighborhood, and now there is the possibility that Jeffersonian democracy will be added to this list of firsts for the Arab world.

After the Palestinians elect their own representatives, they will be given responsibility for all matters concerning their communities in the territories. Responsibility for national security will be left to Israel, however, daily police matters will be handled by Palestinians.

At any point after the elections, but no later than 3 years afterward, negotiations toward a permanent solution between Israelis and Palestinian representatives from the territories, and Egypt and Jordan, would commence.

Mr. President, the Shamir plan will allow everything, and I want to emphasize, everything, to be put on the negotiating table. Israel is not afraid to face tough issues. Of greatest importance, however, is the fact that Israel is not afraid to take the risks necessary to settle these issues.

It is unfortunate that, while Israel is taking a risk, offering a progressive idea for peace, the PLO is maintaining its intractable attitude. The PLO rejected the Shamir plan almost as quickly as it rolled off the presses.

Mr. President, the PLO's reaction to the Shamir plan illustrates several things for this Senator.

First, it clearly explains why Israel can never be reasonably expected to negotiate with the PLO.

You cannot have movement and progress when rejectionism flows like water.

Second, it seems to me that "The Three No's of Khartoum" are still the PLO's modus operandi—despite Arafat's supposed reunuciation of terrorism, violence, and the PLO charter.

Third, the PLO's "official" attitude illustrates how removed it is from the Palestinians in the West Bank. The people of the occupied territories have, for the most part, been hard working and productive. They have an interest in moving the peace process along: They are enfranchised in the economic and social sense of the word. Conversely, Arafat and his entourage—currently residing in Tunisia—are now and always have been nothing more than professional terrorists.

An interesting fact overlooked by much of the national media is that some West Bank Palestinians did have in mind to talk with the Israelis. As their reward for such initiative, they were assassinated. Not much has been made of the intimidation and brutal coercion being applied in the territories by the "Tunisian PLO." These "Tunisian Palestinians" have no interest in autonomy for the territories—they have no use for compromise. Arafat's response to the Shamir plan illustrates for me that, despite his rhetoric, he still wants to rule a Palestinian state with its capitol in Jerusalem.

Mr. President, it is time for the residents of the West Bank and Gaza Strip to take charge of their own destiny. The PLO can guarantee them only a future of continued strife and violence. It is time for these people to stand up to PLO intimidation and enter the peace process as the proud, productive Palestinians they are.

Mr. President, it is the Shamir plan that will finally allow Palestinians and Israelis to sit down and talk directly about all aspects of their future together as neighbors. I urge the people of the territories to take a risk for peace and self rule. I urge the Palestinians to join with Israel and begin to chart a new course for the future.

Mr. SYMMS addressed the Chair.

The PRESIDING OFFICER (Mr. LAUTENBERG). The Senator from Idaho.

PANAMA

Mr. SYMMS. Mr. President, I rise to make a few comments about the situation in Panama. What I am about to say is relevant to what the distinguished Senator from Ohio just said in talking about the credibility of U.S. policy. I believe the Senator made some very good points.

I look at the situation in Panama and see what happened down there. Noriega utilized these fraud squads and the tactics of Lenin to steal the elections. Moreover, he accuses the other side of what it is he is actually doing.

Noriega very clearly armed what they call the Dignity Battalions which were nothing but fraud squads. They were sent out to disrupt and steal that election from the people in Panama. They literally did that.

In my view, if the United States stands idly by and does not allow those people who won the election to actually be put in power, then our credibility will be of no value when the proposed February elections are taking place in Nicaragua. We will have no credibility.

Why would Daniel Ortega worry about whether or not his election is fair if the United States, with our military presence in the Canal Zone, does nothing to ensure the validity and fairness of Panama's election? Come February, the Sandinistas will simply thumb their noses at us.

My staff member, Andy Jazwick, was in Panama as part of an election observation team. He was 25 yards from a person who was shot by a member of the so-called Dignity Battalions, which I call the fraud squad. He saw the man hit and fall. He saw Noriega's army passing out rifles to people to go disrupt the election.

I think that is very interesting. It is also something that relates right back here at home. One of the reasons we have always had free and fair elections in the United States is because the military are not the only people that have the right of self-preservation by having the right to bear arms. We should not overlook that. In Panama, two out of every three people voted against Noriega's candidate, but the people with the guns were declared the winner.

I appreciate what my colleagues have been saying with respect to Panama. I think it is very important that we stand very squarely behind the President and give him the strength of the Congress to stand with him if he does choose to use stronger actions than has thus far been implemented.

The OAS has voted at the outrage of Noriega stealing the election. If General Noriega does not go peacefully, then I would say that is the time the United States stands behind the President to make a strong decision and use whatever force is necessary to see that the opposition party is allowed to assume power. Then, after that, I would recommend the Panamanians hold another election so there could be no question in anyone's mind that they are going to have the right to self-government.

I cosponsored the bill just introduced by Senator COATS. I compliment him for doing so. Short of that, this country would be absolutely foolish to move one step further toward the handing over of that canal to the dictators that are now in power in Panama. We should make it very clear that it is the bipartisan view of this Government that we are not going to hand over the canal to a government that has no respect for free and fair elections or human rights.

We have the military power down there to take care of the situation. We should not be intimidated by anyone anywhere in the world to use what force is necessary to see that the election results are ratified for the people of Panama.

CONSULTATION WITH LEADERS OF ALLIED COUNTRIES DURING THE NATO SUMMIT AND ECONOMIC SUMMIT MEETINGS ABOUT LOANS AND CREDITS TO THE SOVIET BLOC

Mr. SYMMS. Mr. President, I send a resolution to the desk on behalf of myself and Senator DECONCINI. Senator DOLE and Senator MITCHELL were going to do this, but the minority leader asked if I would do this now. This is a resolution that has been approved by the majority and minority.

Mr. President, I send the resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 132) expressing the sense of the Senate regarding consultation with leaders of allied countries during the NATO Summit and the Economic Summit meetings in Brussells and Paris about loans and credit to the Soviet bloc.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Idaho?

There being no objection, the Senate proceeded to consider the resolution.

Mr. SYMMS. Mr. President, I continue to read and hear of accounts that detail the efforts being made by the Kremlin to procure Western capital. These continued efforts are very alarming both in light of our national security and our economic well-being in the 1990's. The continued actions of our allies to lend money to the Soviets is an urgent situation which requires that the Senate speak on this immediately. In addition, the NATO Summit to be held in Brussels, May 29-30, and the Economic Summit to be held in Paris, July 14-16, offer forms for the President of the United States to consult with leaders of the allied countries concerning the urgency of these lending trends.

I offer this sense of the Senate resolution to urge the President to meet with the leaders of the allied countries and address the impact of Western security of tied and united loans, trade credits, direct investments, joint ventures, lines of credit, and guarantees or other subsidies to the Soviet Union and other Communist controlled nations.

President Bush recently announced the beginning of a process that could lead to waiver of the Jackson-Vanik amendment. I believe our allies may interpret the administration's statement in favor of constructive diplomacy with the Soviets as a green light for additional financial credits and loans to the Soviet Union well before our diplomatic efforts have borne fruit. Therefore, I believe it would be very useful to reassert the sense of the Senate regarding financial assistance to the Soviet Union.

Mr. President, today I also wish to make a few comments on the legislative ramifications of waiving the Jackson-Vanik amendment. The Jackson-Vanik amendment was initially adopted in the brief earlier period when we all hoped a major thaw in the Cold War might be occurring, reflecting the sober view that economic concessions to the Soviets should be conditioned on measurable Soviet changes in behavior rather than just on Western wishful thinking.

Although the legislative history of the Jackson-Vanik amendment puts it in the direct context of free emigration and the actions of Soviet authorities against Jewish citizens who sought to emigrate from the U.S.S.R., Congress hoped that by linking human rights issues with trade concessions for Communist countries, including government credits and MFN [Most Favored Nation] status, such countries, and the Soviet Union in particular, would be induced to move toward a generally more civilized socioeconomic system.

Thus, the question today—should the United States consider waiving the Jackson-Vanik amendment—requires us to ask whether its premise has been met. There is great optimism in the West about Mr. Gorbachev's administration; there is a lot of showmanship, with the recent elections and the political purges of high officials. The important question however, in regard to what action the United States should take, particularly with something as concrete as MFN status and the Jackson-Vanik amendment, is: How much of what we believe we are seeing is real? How much is simply the Machiavellian consolidation of power by a strong new leader—a new dictator?

Will United States foreign economic policy toward the Soviet Union continue to act as a strong reminder to the Soviet leadership, and for that matter as an example to our allies as the leader of the Western Alliance, that access to our markets will only come with a permanently institutionalized "modernization" of human rights, including the economic rights of free labor mobility and freedom of economic enterprise? We must not construe the Jackson-Vanik amendment's concern so narrowly as to think it concerns only a modest annual Jewish quota.

Therefore, Mr. President, I think it is appropriate to question current economic conditions within the Soviet Union and some of the real reasons behind perestroika. Identifying basic differences between Western economies and that of the Soviet Union will also shed light on reasons not to hedge on this consideration. In short, I believe an analysis of these fundamental issues will lead one to strongly oppose waiver of the Jackson-Vanik amendment.

THE REAL IMPACT OF THE JACKSON-VANIK AMENDMENT

Has and is the Jackson-Vanik amendment working? Opponents to the provision claim not; they point to the drastic drop on emigration numbers—until recently—since the amendment was adopted in 1974. In fact, until the thaw took place between the United States and the Soviet Union, annual emigration numbers did not change. Subsequently, emigration numbers have risen sharply; but the right of each Soviet citizen to emigrate has yet to be implemented as national policy. The Jackson-Vanik Amendment is central to, and symbolic of, the basic demand by the free world that the Soviets adopt the human rights standard of any civilized nation. The Soviets have yet to do anything substantive in this area.

The Jackson-Vanik amendment actually is at the heart of the ongoing bargaining with Moscow for social and economic reform. It is a point of leverage now more than ever. I think the real issue with Jackson-Vanik is not how many Soviet Jews are permitted to emigrate, but its central position is as an obstacle to the Soviets in obtaining financial assistance in the west. So long as the denial of MFN status continues to stigmatize the Soviet Union it is impossible for anyone to pretend they are a part of the international ecomomy.

Consider the current internal economic crisis Gorbachev is facing. Inflation has rendered the rupple all but worthless, the black market runs rampant with corruption, and there is growing distrust among the masses accompanied by unprecedented apathy towards the current regime. All of this is coupled with a disquieting debt owed to Western governments of $12 billion. Debt to the private sector in the West has also been growing rapidly, from $11 billion at the entrance of Gorbachev to nearly $26 billion by the end of June 1987, and a surge in credit lines last year which are yet to be used.

Enter perestroika. Gorbachev, as Judy Shelton notes in her excellent new book,"The Coming Soviet Crash," is playing a three-pronged game. First, he is calling on Soviet firms to become more productive, by cutting costs and taking in more sales revenues. The resulting profits are then to be shared with the Soviet State. Second, Gorbachev is attempting to reduce the basic cost of government through decentralization. To date, Gorbachev has fired nearly half of the previous bureaucrats of the Old Guard. He also is holding salaries at the current level and shifting retained employees to lower levels. Finally, Gorbachev is instituting price reform by decreasing government subsidies. All of these cost-saving measures are aimed at re-

ducing the burgeoning internal deficit, which is financed through the issuance of government-granted credits but hidden by craftily devised accounting methodologies.

SOVIET REFORMS ARE MOSTLY COSMETIC

When analyzed at its very core, perestroika is far from a cure to economic woes. Rather, it is best termed a sly political manuever created to pacify critics on the external front. The Western media continue to heap praise upon false reforms that simply do not exist. Gorbachev has truly established himself as a competent actor—he's nearly caused the West to forget about what happened to foreign investors after Lenin seized power, about the Soviet Government's welshing on war-time loans, and about the Soviet walkout on the International Monetary Fund and the World Bank only to form a rival organization.

When viewed in light of current Soviet economic conditions and the would-be cure-all solution named perestroika, any waiver or modification we might entertain in the MFN status of the Soviet Union depends on how the Soviet leadership reforms its own national policy, not on whether we in the United States intend to change ours.

A further reason not to waive the Jackson-Vanik amendment rests solely on the manner in which the Soviet Union utilizes funds. Fundamentally speaking, the West must realize that the Soviet Union has clearly opted for military spending even at the expense of fixed investment and consumer welfare. In fact, by the early 1980's, military spending claimed over one-fifth of total Soviet production. Even yet there is little reason to believe that the Soviet Union is changing its military spending habits. In an article published on May 8, 1989, the Washington Times reported the Soviets have boosted T-80 tank production from about 3,500 a year to more than 4,300 in the first quarter of this year.

Additionally, it seems important to note the importance the Soviet Union attaches to trade with the United States. And even more important than trade with the West—after all, what does the Soviet Union produce that anyone in the West wants to buy?—Even more important to the Soviet Union is access to Western capital markets: they need our money to buy our goods. It is simply irresponsible to ignore the benefits to Gorbachev associated with Western technology. It serves a dual purpose in that it saves on current internal resources and accelerates Soviet efficiency. The Soviets know that merely to survive, they must increase their access to Western goods. It may be that consumer goods and technology are needed catalysts in order for perestroika to even have a chance for success.

WILL LOANS AND CAPITAL INVESTMENTS EVER BE REPAID

There is great optimism in the West about reform and democratization in the Soviet Bloc—about reform of their economy and hopefully an expanding horizon for economic growth. But many Soviets themselves believe it is virtually impossible for them to meet their currency needs by simply strengthening their economy. Russia is still unable to meet the basic needs of its people despite Gorbachev's reforms. The last 3 years are witness to a Soviet economic decline. During these years, the growth rate in net material production has slipped from 4.1 percent to 2.3 percent, their terms of trade have deterioriated by 6 percent, and they are seeking financing for very small deals.

The real issue for the West is whether loans and other capital transfers to the Soviet bloc will actually be used for economic growth and investment, or whether we are looking at the beginnings of another "Debt Bomb" similar to the one that is ticking away in Latin America and the Third World. In order to evaluate whether Western capital should be transferred to the Soviets, we need to ask first: Will it ever be repaid?

Today, Congress is attempting to cope with a massive bailout of the savings and loan industry, which has come about largely because of bad investments in Texas and other parts of the nation. It is just prudent to inquire whether the enthusiasm for joint ventures in the Soviet Union (with financing to be provided by the Western partner), and bank loans to the Soviet bloc "to finance economic restructuring" are likely to produce such results—or whether the capital will simply be squandered by a badly mismanaged economic system.

My answer to that question is firmly pessimistic. The savings and investments of our people are needed in our own economies, where business ventures must withstand the tests of competition and must earn a profit sufficient to repay any borrowings with interest. Our own economic growth in the future requires us to increase our savings rate. Any Western capital that is lent or given to the Soviet bloc, particularly if it is badly invested or used inefficiently in those economies, is accordingly lost and subtracted from our own economic growth.

THE BACKWARD NATURE OF "SOCIALISM"

Although they call it socialism, the economic system of the U.S.S.R. is actually a modern example of mercantilism, most closely resembling that of 17th century France. The main characteristics of mercantilism is legally sanctioned monopoly. In the earlier period, the selling of monopoly privileges was the king's main source of revenue—and monopoly rent was the main income source for the upper class.

Under that economy, the production of marketable output was heavily regulated by the government and these regulations were enforced by paid civil servants. These regulations were designed to enforce barriers against competitive entry, but the monarchy openly sold regulations as cartel enforcement services. The revenues this created was a chief source of the monarchy's funding. It is good to keep in mind that it was this regime that built the palace of Versailles and maintained the largest standing army in Europe at the time. At least the French were honest about this, and didn't cover it up with ideological facades. The monarchy used it solely as a means of raising revenue.

Of course, there are numerous differences between the system in France and the one existing in the Soviet Union today. The French had no central planning bureaucracy, and the Soviet Union uses its army to seal its borders to potential emigrant. Some other basic differences exist. For example, positions of authority in the Soviet Union are earned through party loyalty, and are selected from approved lists drawn up by the KGB and the Communist Party.

These personnel lists may prove to be significant in continuing the system in the light of the severe market restrictions in the Soviet economy. It serves as a large, powerful, organized and cohesive interest group whose members benefit from the current system, thus giving them the incentive to continue it. The countinuing struggle the KGB fights against can be seen as the result of successful management of those in power. Unfortunately for the Soviet people they are the only ones who lose.

The Soviet society today is a "rent seeking" one in which the Government controls, or provides, monopoly profits for a privileged minority at the expense of society as a whole. The ideological claims made by the people who benefit from this system—Marxist doctrine—may play a very large role in maintaining the stability of the entire system, but that does not reflect their true economic motivations. These motives are what we must question in dealing with the Soviets.

WITHOUT FREE MARKETS, ONLY CORRUPTION CAN THRIVE

Nobel laureate economist F.A. Hayek, and his teacher Ludwig von Mises, have shown that in principle an economic system that is planned by the Government is impossible to attain and maintain. Students of the modern Soviet economy also do not believe that comprehensive central planning is actually practiced in the Soviet Union or in any other nation that practices their economic model. In

spite of this, though, their economy is still alive, maybe a little sick, but alive nonetheless and furthermore, their model is very popular in other dictatorships throughout the world. This is a clue that it is an effective model for concentrating benefits to a governing elite.

The theoretical principles of socialism require centralized government planning, in lieu of markets. Only a very small part of the Soviet economy is actually planned even though there is an incredibly high level of Government intervention within. This is economically almost undistinguishable from governments with a market economy but which control large nationalized sectors such as health care and major industries.

Practically speaking, the Soviet's "central planning" is observed almost entirely "in the breach." However, some continue to assert that predominantly the entire economy is centrally planned. I presume that this means that the central planning authorities somehow reserve the right to intervene throughout the entire economy, even if their reach exceeds their grasp. The fact, however, is that there is a large private sector in the Soviet economy. This segment cannot be planned.

The importance of private agriculture in overall agricultural output is often mentioned. What is not mentioned, however, are the various economic activities, in which many citizens take part, in what are either illegal or quasilegal activities. This sector is quite large. The estimates of this counter-economy range from between 10 to 40 percent of the Soviet GNP.

In addition to this, the legal private economy contributes between 10 to 20 percent of the GNP. This means that 20 to 60 percent of the Soviet Union's gross national product is already from private enterprise—a very large chunk. Furthermore, it has been estimated that the average Soviet citizen receives 11.5 percent of his total household income from private sources, and that he spends an average of 18 percent of his earnings on such illegal products. This private economy, however, is somewhat parasitic on the planned sector of the Soviet economy. Much of this illegal economy is based on the evasion of legal official entry restrictions.

Legal monopolies in the form of entry restrictions are very dominant in the Soviet economy, just as in 18th century mercantilism. The legal controls on price competition are the most important restrictions. This is the characteristic feature of a socialist economy—to abolish markets, it is necessary to eliminate the use of prices as economic indicators. In a free market system the government may own major industries within the market, but to be truly socialist, the free market price system must be abolished. Some analysts have argued that the central planning authorities actually do use a price system, but it is one in which every price is used solely as a tool for accounting purposes, not as a guide to supply and demand. In the latter case, the term "price" is misapplied.

CORRUPTION, EMBEZZLEMENT, AND DECEIT

In asking whether the West should contribute capital in the form of loans or joint ventures in this mercantilistic economic system, we should be concerned about whether the proposed investments will actually be profitable in an economic sense, or merely profitable in the sense that resources can be extracted from the system in the form of monoply rents. Many comparative systems analysts admit the existence of monopolistic restrictions in the Soviet Union, but fail to ask what they do with the profits from these monopolies.

I believe that the obvious answer to this is that the profits are flowing right into the hands of those officials who are capable of transferring the resources from the consumers to their own pockets. One report cites a case in which the deputy director of the supervisory board of the Ministry for the Automobile Industry and some associates countersigned requisition notes for the supply of vehicle parts at a rate of 1,000 rubles per requisition. Which, I might add, is about what a Soviet worker makes in 3 months.

Another example of the abuse of power within the Soviet hierarchy is the deputy director and chief engineer of a construction trust that supplied state farms with building materials and received 20,000 to 40,000 rubles from each farm he dealt with in order to "expedite deliveries." In still another case, an official working in the Novolipetsk Metallurgical Combine took bribes for releasing supplies of metal against dispatch notes.

Perhaps the best example of abuse of power is the 1964 KGB investigation that discovered the entire leadership of the Government and Communist Party in Kirghizia had been on the payroll of underworld racketeers for years. The gang set up a conglomeration of clandestine factories, collective farms, and plantations that grew opium and cannabis, and shared the profits with the government officials in exchange for their protection. It seems kind of strange to me that out of all of those people, only the gang and one junior deputy minister were brought to trial.

We unfortunately have no way to measure accurately how much of this actually goes on in their economy. These accounts are even questionable because they were reported by the Soviet press, and we all know what kind of free press they have. In all probability they only publicize such things to deter others from doing the same thing. But, even with this publicity, most of the officials go unpunished, and the examples are very likely publicized only because those involved have acquired enemies more powerful than they. In light of this, it is also very possible these stories were invented by the KGB. Thus, my examples cannot be taken as fact, but only as examples of "rent seeking"—the pursuit of monopoly profits—which I would argue is very widespread in the Soviet economy.

Other examples abound. The officials commanding entry barriers in the Soviet Union can easily make enormous profits from bribes resulting from their exercise of coercive restrictions on competition. You see, entry into competition is officially prohibited, but can be achieved in reality by bribing those who enforce the laws. Their system of fixed prices is an incredible incentive for bribery, by artificially raising prices, which creates gains in ligal monopoly revenues to those producers so favored. Not only are monetary bribes widespread, but, possibly more importantly, bribes in the form of transferring goods and services are common mostly because they are harder to trace.

One kind of free market system does abound in the Soviet Union: officials can easily sell documents necessary for trade to the highest bidder, keeping the profits for themselves. An example of this, which has gained some attention in the West, is the marketing by doctors of above-minimal quality care to patients who can pay more, leaving those who cannot afford this with a lower quality of medical care.

The pursuit of monopolistic gains on the part of those in a privileged position doesn't at all resemble the Marxist dream of a scientifically planned economy. Rather, as I have said, the correct description of such a system would identify it with the mercantilist economy of France under Louis XIV. It was the final breakdown of this kind of pervasive economic intervention and "rent extraction" that we today call by the name of the Industrial Revolution. The Soviet system is a Medieval throwback to feudalism, dressed up in 19th century scientistic jargon.

WE CANNOT BUY A COTTAGE IN POTEMKIN'S VILLAGE

Clearly the Soviets, as well as the Chinese and some other nations wealthy in natural resources and large populations, are able to benefit from 300 years of Western scientific progress, which 18th century mercantilist France could not. With the aid of the West, the Soviets are able to create at least in their urban centers and in military applications the semblance of a modern economy. But it is in fact just a Potemkin Village.

Grigori Potemkin once humored Tsar Catherine the Great by erecting the equivalent of Hollywood movie sets in the form of neatly painted villages, complete with actors playing the role of happy peasants, during a tour she made down the Volga River. Based on our understanding of exactly how the Soviet system works, it is clear that Western investments and joint ventures in that country are not likely to be economically productive in the same way that investing the same capital in Europe or North America or in the newly industrializing nations of the Pacific rim would be.

The bottom line remains that waiving the Jackson-Vanik amendment would simply reward Gorbachev for doing nothing except entertaining us with his showmanship. Comparatively speaking, there has never been a time when the Soviet Union has more desperately needed Western financial assistance to prop up its collapsing economy. Moreover, the Jackson-Vanik amendment is working. Without question, a clear message has been sent that access—which should not be given regardless of the human rights record—is not even a possibility without major social and economic reforms, of which the right to emigrate is simply one example. Linking economic issues with human rights presents Moscow with an ultimatum—a useful demand for reform.

Moreover, keeping the Jackson-Vanik amendment in place is a constant reminder of why the West should not be giving financial and technological assistance to the Soviet Union in the first place. Why the West would agree to assist a diametrically opposed nation, only to have to defend itself in the end, betrays a lack of common sense. If anyone in the West believes the Soviet Union is no longer a threat, perhaps we should ask them: Where are Soviet missiles aimed?

Mr. President, I urge my colleagues to support the resolution.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the resolution.

The resolution (S. Res. 132) was agreed to, as follows:

Resolved, That it is the sense of the Senate that during the NATO Summit to be held in Brussels, May 29-30, 1989, and the Economic Summit to be held in Paris, July 14-16, 1989, the President of the United States should consult with the leaders of allied countries on the potentially adverse impact on Western Security of tied and untied loans, trade credits, direct investments, joint ventures, lines of credit, and guarantees or other subsidies to the Soviet Union, Warsaw Pact countries, Cuba, Vietnam, Libya, and Nicaragua.

Mr. SYMMS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SYMMS. Mr. President, I thank the Chair and I yield the floor.

I thank my colleagues for their consideration.

EXTENDING MORNING BUSINESS UNTIL 6 P.M.

Mr. HEFLIN. Mr. President, on behalf of the majority leader, I ask uanimous consent that the period for the transaction of morning business be extended under the same conditions as previously ordered until 6 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

LATIN AMERICAN STRIKE FORCE TO OUST NORIEGA

Mr. HEFLIN. Mr. President, I rise again today to express my contempt for Gen. Manuel Noriega and his attempt to subvert the will of the Panamanian people. He has played fast and loose with the democratic process and should not be allowed to continue his violent supression of the successful opposition candidates.

I join the Organization of American States in their Wednesday condemnation of General Noriega for his abuses and election fraud in Panama. I am pleased that most of the countries in the OAS have joined the United States in placing the blame for the crisis squarely on Noriega's shoulders. I am hopeful that the foreign ministers' team sent by the OAS can indeed encourage Noriega to surrender power within 15 days.

I agree with President Bush that our first priority must be the protection of American citizens in Panama. We have a sacred duty to protect the life of every American who has ventured to Panama to help with the operations of the canal or work in any other capacity. By raising the total American troops in Panama to around 13,000, we have sent General Noriega the stern message that the United States will not permit General Noriega to abuse our citizens the way he has abused Panamanians.

After the protection of American lives, our next priority in Panama must be to remove General Noriega from power as soon as possible. Many American leaders say American military intervention against Noriega might cause serious repercussions and anti-American backlash. In a speech before the Senate last Friday, I called on President Bush to form a multinational army composed of Latin American military personnel.

Today, I have sent President Bush a letter asking him to encourage the formation of a Latin American strike force, a commando force, if you will, to take action against Noriega if necessary. This commando force would consist of extremely well trained forces comprised solely of soldiers from Latin American countries who could go in and remove General Noriega.

This strike force should be selected from the tremendous pool of Latin Americans which have been trained in this country at places like the Army training facility at Fort Benning called the U.S. Army School of the Americas [USARSA]. According to the Department of Defense, over the past 3 years, we have trained more than 4,228 Latin American and South American troops at this facility.

The USARSA has instructed these soldiers in all types of infantry training, infantry related training, battlefield intelligence, and civic action. This civic action training is specially designed to aid commando activities of the type I am suggesting. The Fort Benning facility has trained thousands of officers from throughout Latin America. These soldiers have come from Argentina, Bolivia, Brazil, Colombia, Costa Rica, the Dominican Republic, Equador, El Salvador, Guatemala, Honduras, Mexico, Panama, Paraguay, Peru, Uruguay, and Venezuela.

In addition to the soldiers trained at Fort Benning, the commando force could draw from the Navy trainees from the small craft instruction and training school [SCIATS] and from Air Force trainees from the Interamerican Air Force Academy. Both of these schools train Latin American military personnel. The U.S. Department of Defense also runs the Interamerican Defense College which is the equivalent of the U.S. War College for senior Latin American military officers.

These soldiers would be prepared to take steps which would lead to general Noriega's removal if that became necessary. This Latin American commando force would have the advantage of being Panama's neighbors. This commando force would help their neighbors from Panama remove General Noriega, thereby gaining representation by their rightfully elected officials from the opposition party.

This action of creating a Latin American commando force would provide the opportunity for the removal of General Noriega without stirring serious anti-American sentiments in Latin America. They would be ousting Noriega themselves, in an effort to help instill a stable Panamanian democracy.

Just the organization of such a commando force might cause him to step down. The formation of such a strike force would cause him to think a great deal about his own personal safety.

May we never have to use such a force. On the other hand, we may have to use it. I ask unanimous consent that my letter to President Bush

dated today be printed in the RECORD and an attached listing of Latin American trainees be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HEFLIN. I have obtained from the Department of Defense the various figures. In 1987 we trained 1,180 Latin American troops at Fort Benning. In 1988 we trained 1,466. And this year we are training 1,583 Latin American troops at Fort Benning.

This force, to me, is such a force that could be used effectively but whether or not we were to use it, the fact that it was known by Noriega that it was being organized, that it could be used, in my judgment could act as a leverage toward his removal and his voluntarily stepping down.

But, in the event that we have to use it, I think we should. I am for taking whatever steps are necessary to see that Noriega is removed from power.

I yield the floor.

EXHIBIT 1

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, DC, May 18, 1989.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: I would like to take this opportunity to congratulate you on the steps you have taken regarding the situation in Panama. I believe that sending additional troops to Panama in order to protect American citizens residing there while, at the same time, conducting talks with other Latin American allies is needed and necessary. However, I continue to remain concerned that it may not be enough toward the ultimate removal of General Manuel Noriega.

General Noriega has attempted to subvert the will of the Panamanian people and has violently attempted to suppress the successful opposition candidates. I know you agree that he should be removed as soon as possible.

Since American military intervention against General Noriega might cause serious repercussions and anti-American blacklash, I believe that it is necessary to form a multinational army, composed of Latin American military personnel, to deal with General Noriega. In that regard, I would strongly encourage you to form a Latin American strike force to take action against Noriega if necessary. This commando force would consist of extremely well-trained forces comprised solely of soldiers from Latin American countries. In fact, most of the force could be chosen from the thousands of Latin American military personnel who have been trained at the United States Army School of the Americas, located at Fort Benning, Georgia.

In my judgment, creating a Latin American commando force would provide an opportunity for the removal of General Noriega without stirring serious anti-American sentiment in Latin America.

I hope that you will consider this suggestion as an effort to help instill a stable Panamanian democracy.

With kindest regards, I am

Sincerely,

HOWELL HEFLIN.

U.S. ARMY SCHOOL OF THE AMERICAS, FORT BENNING, GA

ELECTIONS IN ISRAEL'S ADMINISTERED TERRITORIES

Mr. HELMS. Mr. President, when it comes to glorifying Yasser Arafat or denigrating Israel, the major media never miss a beat. Thie should come as no surprise. For deeds, these major media have become increasingly adept at pumping up the Soviets and their cohorts while heaping abuse upon the most fervent anti-Communist governments.

No better example exists in regards to this phenomenon that how the media has treated the recent proposal of the Israeli Government to hold elections in its administered territories. Do you know how the media have greeted this? With silence.

I dare say that not 1 percent of the American people really know what the Israeli Government has proposed.

While Yasser Arafat is jet-setting around the world attempting to get the international community to impose him upon the population of the administered territories, Israel's leaders have proposed a solution that one would think the media would embrace; that is to have free and democratic elections. But, no, the media keep focusing the other way.

The Israeli election plan represents a major step toward peace in the Middle East and fulfillment of the political and economic aspirations of the residents of the territories. The plan calls for elections of representatives of the territories who would participate in a two-stage process of negotiations similar to that outlined in the Camp David accords.

Specifically, under the plan, a free, democratic and secret election will be held among the Arab residents of Judea, Samaria, and Gaza. Immediately after the election, negotiations would commence on an interim agreement for a 5-year "transitional period."

During this transitional period, the Arab residents of the territories will be provided with a self-rule arrangement which would leave Israel responsible only for the security and foreign affairs of the territories and of all matters concerning Israeli citizens of the territories.

As envisioned by the Israeli proposal, as soon as possible—but not later than 3 years after the start of this transitional period, negotiations for a "permanent" arrangement would commence.

Despite all of his rhetoric about wanting peace, democracy, and self-determination for Palestinians, Yasser Arafat has rejected the election proposal out of hand. His reported response to the Israeli proposal, according to the Washington Post, was "Let them go to hell, they are not dealing with me, they are not dealing with my people."

The simple fact, Mr. President, is that Yasser Arafat does not want free elections in the territories and neither do his apologists in the media and the liberal "intellectual" circles. Arafat does not want to see elections because he knows that a free and secret ballot would demonstrate to the world that he and his cronies represent those who left Israel in 1948, not the Muslim and Christian Arabs who live in the territories.

Yasser Arafat will do just about anything to avoid fair, democratic elections. Shortly after the Israelis announced the plan, a wave of violence was launched by the PLO against moderate Arabs in the territories. The aim, of course, was to destroy or intimidate any alternative leadership in the territories.

And just yesterday, Arafat announced his latest scheme to obfuscate the fact that he does not represent the residents of the territories. His latest proposal is to create a "provisional" Palestinian government made up of residents of the territories selected by Arafat himself.

Arafat's proposal that he, and not the residents of the territories, select the Palestinian representatives is undemocratic. Beyond this, it would only frustrate the cause of peace, and make it even less likely that the true political and economic aspirations of the residents of the territories would be represented in the peace process.

Mr. President, the election proposal made by Israel's leaders demonstrates that they want to deal on a peaceful basis with the Muslim and Christian Arabs of the territories. Their efforts in this regard merit commendation and encouragement from the Government of the United States

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I had hoped that by now I would be able to announce the manner and timing of the disposition of the supplemental appropriations bill which we have just received this afternoon from the

House of Representatives. Unfortunately, I am not able to do that at this moment. For the benefit and information of my colleagues, we are awaiting clarification from the Veterans' Administration of what will be necessary to accommodate their most pressing needs in the coming weeks, and we expect the arrival of officials of the VA here in the Capitol momentarily.

I hope to be able to make an announcement to my colleagues shortly regarding the intended manner and disposition of this legislation following discussions with the distinguished Republican leader and officials of the Veterans' Administration, as well as the chairman and ranking Republican on the Appropriations Committee. It is my hope that we could do that shortly. I regret the inconvenience caused by this uncertainly to my colleagues but expect to have an announcement in this regard very shortly.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, in accordance with 22 U.S.C. 1928a-1928d, as amended, appoints the following Senators as members of the Senate Delegation to the North Atlantic Assembly Spring Meeting, to be held in Antalya, Turkey, May 26-30, 1989; the Senator from South Dakota [Mr. PRESSLER] and the Senator from Pennsylvania [Mr. SPECTER].

FETAL ALCOHOL SYNDROME

Mr. STEVENS. Mr. President, I would like to take this opportunity to share with the Senate another serious problem that faces the State of Alaska—the fetal alcohol syndrome [FAS].

Nationwide, FAS occurs on an average of 1.3 per 1,000 live births. In Alaska, this condition occurs in 4.3 infants per 1,000—this is the highest rate in the world. In Alaska there are many dedicated individuals and groups who have committed their time and energies to fighting this very serious problem—I commend their efforts.

Fetal alcohol syndrome is the term used to describe physical, mental, and behavioral abnormalities that infants and children experience as a result of mothers drinking alcohol heavily during pregancy. Fetal alcohol effect [FAE], while less severe, is a similar condition. Symptoms experienced by infants and children suffering from this condition include congenital defects, damage to the central nervous system, and heart defects. The consequences of this syndrome are irreversible.

Like so many of the social and health problems we face in Alaska, FAS places a tremendous strain on our already overburdened health care system. In 1986, Medicaid spent more than $4.6 million for the care of 96 infants in newborn intensive care in Alaska. During the lifetime of a child afflicted with FAS it can cost over $1 million to care for such a child. Perhaps the saddest fact of all is that this condition is 100 percent preventable through proper maternity care and education.

Alcoholism is a problem of epidemic proportions in Alaska. This heavily impacts women in their childbearing years. Treatment opportunities are practically nonexistent for Alaska native women at risk of having an alcohol-damaged child. Oftentimes the spouse of an alcoholic woman is also an alcoholic and their children are raised in a very unstable environment.

At my request language was added to Public Law 100-446, the Department of the Interior and related agencies appropriations bill, directing the Indian Health Service to determine the impact of FAS in Alaska and the feasibility of establishing a residential center for native women during their pregnancy. It is critical that there be facilities in Alaska to help combat this problem.

Education is critical. It is also very difficult in a State such as Alaska in which much of the predominant minority—Alaska Natives—population lives in remote areas with inadequate health care facilities. I am encouraged by the efforts in Alaska to educate women and families at risk and to increase public awareness of the seriousness of FAS as well as its preventability. I ask unanimous consent that the research paper on FAS prepared by the Alaska Council on Prevention of Alcohol and Drug Abuse be printed in the RECORD.

FETAL ALCOHOL SYNDROME

(By Lisa Pieper, Resource Analyst, Alaska Council on Prevention of Alcohol and Drug Abuse, March 1989)

Fetal Alcohol Syndrome (FAS) is the name given to a consistent pattern of physical, mental and behavioral deficits observed in infants of women who drink heavily during pregnancy. Fetal Alcohol Effects (FAE) describes a similar but less severe pattern of abnormalities also due to alcohol exposure in utero.

RESEARCH

When a pregnant woman drinks, the blood alcohol level of her developing child reaches the same concentration as her own. It takes approximately 48 hours for a woman's body to detoxify after alcohol ingestion. It takes nearly twice this time for the alcohol to be completely eliminated from the fetal environment.

Research shows that children born with Fetal Alcohol Syndrome have congenital defects, many of which are immediately evident. The most obvious of these are facial abnormalities, low birth weight, and microcephaly (small head) which reflects inhibited brain growth. FAS children are usually below the third to tenth percentile of weight and/or length at birth.[1] Many have malformations of the ears and eyes and cleft lip and palate. Skeletal abnormalities and aberant development of internal organs are common; one-third of these children have heart defects. FAS children are at high risk for central nervous system damage including mental retardation, and eating and sleeping disorders which lead to failure to thrive. The average IQ of FAS children generally ranges from 20 to 90; for FAE children the range is 39 to 105; the average for both groups is 68.[2] (Average normal IQ generally ranges from 95 to 105.) Parents report that as infants FAS children are overly irritable, difficult to relax, and do not respond to affection, all of which makes bonding difficult.

The effects of Fetal Alcohol Syndrome and Fetal Alcohol Effects are irreversible. At age one, FAS children are, on the average, only 38 percent normal weight and 65 percent normal height.[3] While height deficits are not overcome with increasing age, females do tend to gain weight during adolescence.

Many times intellectual and behavioral problems associated with alcohol-related birth defects are not recognized until affected children enter school and developmental delays and delays in language acquisition become apparent. Learning difficulties are evident in the areas of verbal comprehension, attention, and memory. Academic performance appears to peak at ages 12 to 15 (grades 6 to 8) and shows little improvement after this time.[4] This pattern has led many experts to describe Fetal Alcohol Syndrome children as "trainable but rarely educable".[5]

Behavioral problems and failure to develop basic living skills can make life difficult for those born with FAS/FAE. School records in early years indicate that many show symptoms of hyperactivity, poor coordination, and noncompliance. Teachers report that these children require constant supervision, have difficulty with change, require additional classroom structure, and have extremely short attention spans. A study conducted by Streissguth, et al, found that among 31 FAS/FAE children whose mean chronological age was 17, the overall level of functioning was 7 years. These children were found to be most disabled in the area of socialization skills (6 year level) and least disabled in the area of daily living skills (9 year level).[6] Low self image, poor social judgment, and a lack of understanding of appropriate social and sexual behavior puts these children at risk for victimization. As they approach adulthood, inappropirate sexual and social behavior, isolation, loneliness, and chronic depression are often reported, along with unrealistic expectations for work, schooling, and independence.

Unfortunately, along with intellectual, physical, and educational handicaps, victims of FAS/FAE are also environmentally disadvantaged. In a follow-up study of 51 persons identified with this syndrome, Dr. Ann Streissguth found that 31% of those studied were never cared for by their biological mother. Sixty-nine percent of these mothers were deceased, and of the 34 left, 38% had terminated maternal rights. The average age that these children leave the home of their natural parent is 4 years,[7] most likely due to the dysfunctional nature of alcoholic homes and the difficulties inherent in caring for children with special needs. As a result, these children often live in multi-

Footnotes at end of article.

ple environments (foster homes, institutions, etc.) which can only intensify existing adjustment problems.

In addition to the risk of alcohol related birth defects, the likelihood of miscarriage increases directly in proportion to the rate of alcohol consumption. The risk for spontaneous abortion is two times higher for women who consume 1 ounce of absolute alcohol (approximately 2 drinks) two times a week than for those who do not drink at all.[8] One of the periods of greatest risk is the first 4 to 6 weeks after conception when a woman may not be aware of her pregnancy and rapid cell division is taking place in the fetus.

PREVALENCE

The worldwide incidence of FAS is estimated to be 1.9 per 1000 live births.[9] Estimates for the United States average 1.3 per 1000 live births,[10] and in Alaska approximately 4.3 of every 1000 children are born with FAS.[11] The incidence rate for Fetal Alcohol Effects is believed to be double that of FAS. In 1985 it was estimated that 50,000 children were born in the United States with alcohol related birth defects.[12] Treatment costs for FAS children and adults exceed $1 billion annually in the United States.[13] In Alaska it can cost over $1 million to care for one FAS child in his/her lifetime.[14]

It is dangerous to assume that only alcoholic women put their babies at risk for alcohol related birth defects. Approximately 40 percent to 50 percent of babies born to alcoholic drinkers and 11 percent of those born to moderately drinking women have evidence of the prenatal effects of alcohol.[15] Research indicates that among alcoholic women, attempts to decrease modal drinking during pregnancy can result in an increase in binge drinking (five or more drinks in a short period of time) which can have equally damaging effects on the fetus.[16]

No upper level of alcohol consumption has been established that allows prediction of definite damage to the fetus, nor has a lower level been found which totally eliminates the possibility of fetal harm.[17] There are no laboratory tests which can diagnose this disorder prenatally, nor can abnormalities be detected through amniocentesis.

PREVENTION

The National Institute of Alcohol Abuse and Alcoholism in 1982 estimated that 1 of every 3 alcoholics is a woman. The highest proportion of heavy drinkers among women was between the ages of 21 and 29, the age of peak reproductive years. The second highest rate of drinking was among teenagers.[18] The rising incidence of both teenage pregnancy and alcohol/drug use creates the necessity of educating young people about the dangers of maternal alcohol consumption.

Prevention education and treatment of women at risk for delivering a child with FAS/FAE is not a simple matter. Telling an alcoholic woman that drinking may harm her baby can lead to a vicious cycle of fear, denial, guilt, resentment, despair, anger, and more drinking. An alcoholic woman has lost the ability to make healthy decisions for herself and her child. Unfortunately, alcohol use is rarely assessed as a routine part of prenatal care. A study conducted by Dr. Robert Sokol in 1981 found that the actual incidence of alcohol abuse is at least 8 % to 10% among OB/GYN patients. Additional findings suggest that clinicians mis-diagnose at least three of every four alcohol-abusing patients. According to Dr. Sokol: "It is unlikely that there is any other OB/GYN diagnosis that is missed as often." [19] Pregnancy is a time for clinicians and those working closely with these women to exercise loving confrontation. Alcohol/drug screening must become an integral part of prenatal care. Pregnant drinking women need to be counseled with compassion and non-judgment, and referred to appropriate treatment agencies and support groups.

Primary to successful treatment for women at risk is that they be assisted in building support networks of professionals, family, and friends to assist them through an already stressful time. Since many women who drink heavily are with partners who also drink, it is important that both are involved in the process of education and treatment. Finally, true primary prevention requires that men and women be educated about the risk of alcohol related birth defects and that abstinence from alcohol and other drugs be a part of planning for conception.

Fetal Alcohol Syndrome and Fetal Alcohol Effects are totally preventable. What we do does make a difference!

AMTRAK'S FUTURE

Mr. BIDEN. Mr. President, through much of the 1980's, rail passenger service, and Amtrak in particular, has been a notion under siege. In each of its budget requests of recent years, the Reagan administration called for dismantling Amtrak. On a yearly basis Congress rejected that proposal. And while the Amtrak system survived, during the Reagan years there was almost no active consideration of the role of rail service in our Nation's transportation plans. It is time for us to look to Amtrak to fill important roles in our future transportation plans.

Since its creation in 1971, Amtrak has largely been viewed as a creature of the Northeast. That is where its resources are concentrated and the region accounts for most of the system's current ridership. Indeed, efficient transportation in the Northeast

is as crucial to the economic health of that region as are water projects to California and the arid Southwest or the construction of hydropower dams were to the Northwest.

But the idea that Amtrak should be limited to the Northeast is a shortsighted one. It is a perception that is, unfortunately, a significant roadblock to development of an improved rail system in this country.

What would have happened if the Reagan administration had won its fight, if Amtrak had been terminated? For starters, billions in capital investment would have been wasted, taxpayers would have paid more, and intercity rail service in this country would have ended forever. We would have been much worse off, not only in the Northeast region, but as a nation.

Amtrak survived the constant jabs at its existence by the administration and, in fact, developed an excellent record during that time. Dependence on Federal revenues has been reduced, tracks and control systems along the Northeast corridor have been improved, and ridership is at an all-time high.

A front-page article in the New York Times earlier this year described many of the improvements Amtrak has made in service. The outmoded equipment Amtrak inherited has been updated or replaced. Passengers have noticed the difference. Amtrak carried 21.5 million passengers last year and earned over $1 billion in revenues.

The article also describes what lies ahead for Amtrak. Continuing increases in demand for passenger railroad transportation are testing the limits of Amtrak's resources. Equipment is aging. Capital needs are rising.

In the next few years, we need to look at the resources available to Amtrak so it will be able to meet increasing demands on its existing system. This must be accompanied by continued improvements in ridership, service, revenues and rate of return ratios. Improved performance is crucial for our commitment to Amtrak to be maintained in the short term.

For the long term, we need to look at Amtrak's role in our overall transportation policy. As congestion increases not only in the Northeast, but also in areas like southern California, Florida, and the Great Lakes region, we must drop our national blinders on rail as a possible solution. We cannot continue to address gridlock solely through the addition of more highway lanes or airport terminals.

In addition, we must resist the temptation to view the Nation as seven distinct and unrelated regional economies. The balkanization of our Nation which underpinned so many Reagan administration proposals is a strategy for disaster. Amtrak's failure to serve a town in every State of the Nation is no reason to scuttle the system. Indeed, it would be ludicrous to propose such a system.

There is a stark contrast between the way our national leadershp has denigrated rail transportation and how the Europeans have put it to use. As the Reagan administration was looking to put more and more Americans on the highways or in the air, the European Community was moving in the opposite direction. In fact, the EC has unveiled plans to expand dramatically its high-speed rail system to the corners of Europe, including links to Lisbon, Naples, Stockholm, and Edinburgh.

It is an ambitious plan, one that not even the strongest advocate of rail travel believes will be matched in this country. However, it does set an example of what is possible, of how much more of a role rail travel could have in this country. It is unmistakable evidence that rail is a realistic option.

Any chance of an efficient rail system in this country must recognize the following points. First, we cannot let the existing system rot in front of us. That is what happened to predecessor railroads and it took more than a decade to recover. We must maintain a solid base to build from.

Second, we must look to fully integrating the system. Passengers who arrive on time in city A but then face long delays for their connection to city B will not be passengers for long. Similarly, passengers who arrive at city B, but have dificulty gaining access to public transportation will look for alternatives.

Third, a realistic timetable for establishment of the system must be developed. An up-to-date, widespread, efficient system will not be in place in 5 years or maybe even 10. We need to look at rail in the long term and plan accordingly.

So as we look to the Federal budget for 1990, it is not unreasonable to think of our transportation needs of the next decade. Does anyone believe that Amtrak could be resurrected tomorrow if it was gutted today? Does anyone believe we can continue to simply add more and more highway lanes ad infinitum? Does anyone believe airports can be easily constructed to handle projected traffic increases?

In recent statements, Secretary of Transportation Samuel Skinner has signaled a much-needed change by this administration in our Nation's policy toward passenger rail service. After a half-decade of repeated attacks, Federal policy is beginning to recognize the role Amtrak can have in our transportation policy.

It is a start, not the end, of the development of a balanced program. Congress must make sure that it does not take the same shortsighted approach to rail transportation that the railroad companies did in the 1950's and 1960's. It is a mistake we cannot afford to repeat.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. MITCHELL. Mr. President, it is my intention to ask that the Senate stand in recess subject to the call of the Chair. Accordingly, Mr. President, I ask unanimous consent that the Senate now stand in recess subject to the call of the Chair.

There being no objection, at 5:46 p.m., the Senate recessed subject to the call of the Chair.

The Senate reassembled at 7:05 p.m. when called to order by the Presiding Officer [Mr. BRYAN].

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER (Mr. BRYAN). The Chair recognizes the majority leader.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, during the past few hours, I have consulted with the distinguished Republican leader, the assistant Republican leader, the chairman and ranking Republican member of the Appropriations Committee, the chairman of the Veterans' Affairs Committee, the Deputy Administrator of the Veterans' Administration, and the Comptroller of the Administration.

It is my hope that we will now be able to dispose of the supplemental appropriations bill promptly, and without the necessity for a rollcall vote. And in just a few moments, after briefly explaining what it is we intend to do, I will propound a unanimous consent request to that effect.

Mr. President, the House passed supplemental appropriations bill H.R. 2402. It extends funding to the Veterans' Administration through the end of the current fiscal year. Senator BYRD and Senator HATFIELD, the chairman and ranking member of the Appropriations Committee, intend to offer an amendment to that bill to extend the funding for the Veterans' Administration through June 15.

All of those whom I earlier mentioned as having been involved in the discussions were assured by the Deputy Administrator of the Veterans' Administration that enactment of the legislation as amended by the Byrd-Hatfield amendment would meet the needs of the Veterans' Administration through June 15. Accordingly, the unanimous consent request which I will propound contemplates taking up the supplemental appropriations bill with a 30-minute time limit, and with the only amendment in order to be that of Senators BYRD and HATFIELD.

It is not my intention to request a rollcall vote, and I know of no Senator who has requested one.

Mr. President, I would like to now yield to the distinguished Republican leader for such comments as he may wish to make on the subject.

Mr. DOLE. Mr. President, I would just affirm what the majority leader has said in reference to the Deputy VA Administrator and also the Comptroller, who both indicated and assured us that, if this were done this evening, it would mean that funding would be available through June 15.

We could be in a position, if we act on this amendment, to assure America's veterans that we have acted responsibly, and having the assurance from both the Deputy Administrator, the Deputy Secretary now, Under Secretary, and the Comptroller, I think we should proceed.

We have cleared everything on this side of the aisle. As far as I know, no one is requesting an amendment. There is no request for a rollcall.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Of course, Mr. President, the amendment would have to go back to the House for adoption there next week to be enacted, but accordingly, unless either the distinguished chairman of the Appropriations Committee or Senator HATFIELD with to make a comment at this time, I ask unanimous consent that when the Senate considers H.R. 2402, the supplemental appropriations bill, it be considered under the following time limitation: 30 minutes on the bill, to be equally divided between Senators BYRD and HATFIELD or their designees; that the only amendment in order be an amendment by Senator BYRD for himself and Senator HATFIELD, the time for which is to come out of the time on the bill; that no other amendments be in order; that no points of order be in order; that no motions to commit be in order; that immediately upon the completion or yielding back of the time and the disposition of the Byrd-Hatfield amendment, the Senate proceed, without any intervening action, to third reading and final passage of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. I am not sure the leader is finished yet.

Mr. MITCHELL. I am with respect to that unanimous-consent request.

Mr. STEVENS. Reserving the right to object, and I do not intend to object, I have a series of bills and statements that I will request be printed in the RECORD as though read. At an appropriate time, I would like to be able to get into this process to make that simple request. Other than that, I do not object. I ask the leader for his indulgence in this process here.

Mr. MITCHELL. That is fine. I can say to the distinguished Senator from Alaska I was just now going to move that the Chair lay before the Senate H.R. 2402, following which I would yield to you, and I am sure everyone here would agree.

Mr. STEVENS. I thank the leader for his courtesy.

THE SUPPLEMENTAL APPROPRIATIONS BILL—H.R. 2402

Mr. MITCHELL. I ask unanimous consent that the Chair lay before the Senate H.R. 2402.

The PRESIDING OFFICER. The clerk will report the bill.

The assistant legislative clerk read as follows:

A bill (H.R. 2402) making the supplemental appropriations for the Department of Veterans' Affairs for the fiscal year ending September 30, 1989, and for other purposes.

The Senate proceeded to consider the bill.

Mr. DOLE. Will the majority leader yield?

Mr. MITCHELL. Yes.

Mr. DOLE. I know there is no way with any certainty to say there will not be a rollcall. There are no requests for a rollcall on this side of the aisle. I have indicated to my colleagues that there not be a rollcall. I understand there is no request from the chairman or the majority leader on that side.

Mr. MITCHELL. That is correct. I know of no request on our side for a rollcall vote, and therefore, absent such a request, it is my intention that this matter be disposed of by voice vote, and, accordingly, there would be no further rollcall votes tonight if no rollcall vote is requested on this matter.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the senior Senator from West Virginia.

Mr. BYRD. Mr. President, I yield myself such time as I may require.

Mr. President, the pending measure, H.R. 2402, provides supplemental appropriations for the Veterans' Administration totaling $1,208,818,000.

H.R. 2072, the dire emergency supplemental appropriations bill is still pending in the House. There are many, many programs in that bill that are also in dire need of supplemental appropriations. Among the programs in need of supplemental funding are mandatory programs such as:

Guaranteed student loans	$892,428,000
Payments to States for foster care and assistance	423,345,000
Reimbursement of firefighting costs	341,669,000
Food Stamps	224,624,000
Federal unemployment benefits and allowances	56,000,000
Trade adjustment assistance	34,648,000

A key program in dire need of immediate additional funding is the essential Air Services Program. As Senators are aware, this is a program that provides essential air service to 155 small communities throughout the Nation that would otherwise have no air service at all. Despite the fact that President Reagan signed into law in 1987 a 10-year reauthorization of this program, he refused to request funding for EAS. Congress had to provide the funds for fiscal year 1989. A supplemental appropriation of $6.6 million is needed to prevent the immediate elimination of this program. Secretary of Transportation Skinner has been most cooperative in working with the committee on this matter. In response to my concern, as well as that of other Senators, Secretary Skinner delayed implementation of a partial shutdown of the program earlier this year.

He has repeatedly shown a willingness to assist the Appropriations Committee in its efforts to provide the additional $6.6 million needed to continue the program. However, in a letter to me dated May 1, 1989, Secretary Skinner states that without additional funding, he will need to notify air carriers in early June that payments to them under the EAS Program will be terminated the following month.

The supplemental appropriation bill also includes $100 million requested by the administration for immigration and refugee assistance in order to respond to an unanticipated increase in the number of Soviet refugees being permitted to leave that country.

Mr. President, title II of the bill contains urgent supplemental appropriations for various programs. The budget authority for these appropriations is offset in full by transfers among appropriation accounts. I am talking about the supplemental appropriation bill pending in the other body. The largest appropriation in title II provides for the transfer of $125 million requested by the administration for peacekeeping operations. These funds are to be used for new international peacekeeping activities in Afghanistan, the Persian Gulf, South Africa, and other areas of conflict.

So, Mr. President, we are taking care of the needs of the VA in the pending measure. But, I want to emphasize the fact that all of the other items in the dire emergency supplemental are dire emergencies. We need to move that bill just as quickly as possible.

The pending bill would make funds available to the VA for the balance of fiscal year 1989. I am concerned that if we separate out the VA from all other dire emergency items in H.R. 2072 and

fund the VA programs for the rest of the fiscal year, there may be no end to funding programs in that manner rather than passing appropriation bills containing all the dire emergencies. We would be piecemealing one appropriation at a time.

It is for this reason that I shall offer an amendment on behalf of my distinguished colleague, the ranking member of the Appropriations Committee, Mr. HATFIELD, and myself that will limit the availability of funds in this bill to June 15, 1989.

As the two leaders have already indicated we have received assurances from the VA that this will give them the funding that they need to continue present levels of services and personnel. There will be no decrease in service to the Nation's veterans during that time. Between now and June 15 we would have time to take up the dire emergency supplemental appropriations bill in the House and Senate and complete action on it and work out an acceptable agreement in conference not only for VA funding for the remainder of fiscal year 1989, but for all of the other vital programs in the dire emergency supplemental appropriations bill.

I hope, Mr. President, that the Senate will support this amendment which I will offer after the distinguished Senator from Oregon [Mr. HATFIELD] has made his statement.

Mr. President, I ask unanimous consent to print a table in the RECORD showing all of the dire emergency items, requested by the President, together with a copy of the pending measure.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Fiscal year 1989 supplemental appropriations request

	Budget authority
Mandatory:	
Food stamps	$253,000,000
Payment to judicial officers retirement fund	4,000,000
Federal unemployment benefit and allowances	92,000,000
Trade adjustment assistance	34,648,000
Payments to States for foster care and adoption	423,345,000
Guaranteed student loans	892,428,000
Forest firefighting	250,000,000
VA compensation and pensions	701,481,000
VA readjustment benefits	22,212,000
VA loan guaranty revolving fund	130,000,000
Subtotal, mandatory	2,803,114,000
Discretionary:	
USDA: ASCS salaries and expenses	50,000,000

Fiscal year 1989 supplemental appropriations request—Continued

	Budget authority
Department of Justice items	41,802,000
Judiciary items	22,175,000
MarAd: Federal ship financing fund	[515,000,000]
Uranium supply and enrichment	55,000,000
Uranium supply and enrichment—revenues	(55,000,000)
DOS: Migration and refugee assistance	100,000,000
DOE student financial assistance (reappropr.)	[4,308,000]
DOL: salaries and expenses	1,445,000
OSHA salaries and expenses	3,200,000
Legislative branch items	15,280,000
DOT: aircraft purchase loan guarantee program	1,135,000
Federal Election Commission S&E	368,000
VA medical care	303,000,000
Court of Veterans Appeals salaries and expenses	1,204,000
Subtotal, discretionary	539,609,000
Transfers In:	
NOAA operations, research and facilities	19,200,000
Contributions for international peacekeeping	125,000,000
FCC salaries and expenses	1,431,000
DC, Inaugural expenses	1,000,000
CoEngr regulatory program	3,325,000
CoEngr general expenses	2,600,000
FAA operations	40,700,000
Treasury: department salaries and expenses	2,063,000
Treasury financial management services S&E	5,500,000
IRS processing of tax returns	32,229,000
IRS investigation collection and taxpayer services	41,754,000
HUD management and administration: S&E	3,490,000
Subtotal, transfers in	278,292,000
Transfers Out:	
Economic development revolving fund	(19,200,000)
Peacekeeping transfer from defense and int'l	(125,000,000)
EDA programs	(1,431,000)
CoEngr O&M maintenance, general	(3,325,000)
CoEngr construction, general	(2,600,000)
DOT: access highways	(1,291,000)
DOT: demonstration projects	(39,409,000)
Treasury: international affairs	(2,063,000)
Treasury	(5,500,000)

Fiscal year 1989 supplemental appropriations request—Continued

	Budget authority
IRS examinations and appeals	(73,983,000)
HUD rehabilitation loan fund	(3,490,000)
GSA, Presidential transition expenses	(1,000,000)
Subtotal, transfers out	(278,292,000)

NOTE.—Numbers in brackets [ ] are non-add; in parenthesis ( ) are negative.

H.R. 2402

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are hereby appropriated, out of any money in the Treasury not otherwise appropriated, to provide supplemental appropriations for the Department of Veterans Affairs for the fiscal year ending September 30, 1989, and for other purposes, namely:

DEPARTMENT OF VETERANS AFFAIRS

VETERANS BENEFITS ADMINISTRATION

COMPENSATION AND PENSIONS

For an additional amount for "Compensation and pensions", $701,481,000, to remain available until expended.

READJUSTMENT BENEFITS

For an additional amount for "Readjustment benefits", $22,212,000, to remain available until expended.

LOAN GUARANTY REVOLVING FUND

For an additional amount for "Loan Guaranty Revolving Fund", $120,100,000, to remain available until expended.

VETERANS HEALTH SERVICE AND RESEARCH ADMINISTRATION

MEDICAL CARE

For an additional amount for "Medical care", $340,125,000: *Provided,* That of the sums appropriated under this heading in fiscal year 1989, not less than $6,800,000,000 shall be available only for expenses in the personnel compensation and benefits object classifications.

DEPARTMENTAL ADMINISTRATION

GENERAL OPERATING EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "General operating expenses", $24,900,000, of which $15,000,000 shall be derived by transfer from "Construction, minor projects": *Provided,* That in the appropriation language under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1989, insert a period after $774,316,000" and delete the language that follows.

No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Mr. BYRD. I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Oregon.

Mr. HATFIELD. I thank the Chair.

Mr. President, I support the decision of the chairman of the committee and the joint leadership of the Senate to proceed to consideration of H.R. 2042, the supplemental appropriations bill passed by the House earlier today, and

to proceed in the fashion outlined by the chairman.

I believe it is important to emphasize, however, that there are many matters of importance to the Senate and the administration that are not being addressed in this measure, and that we must address in a future vehicle.

Mr. President, the administration's request for fiscal year 1989 supplemental funding includes roughly $2 billion for mandatory programs that are not addressed in this vehicle. Those programs include $253,000,000 for food stamps, $92,000,000 for unemployment benefits and allowances, $34,468,000 for trade adjustment assistance, $423,345,000 for payments to States for foster care, $892,428,000 for guaranteed student loans, and $250,000,000 for forest firefighting.

In addition, the administration has requested $539,609,000 for numerous discretionary programs. The largest single item in that category is $303,000,000 for veterans' medical care, which is provided for in this measure. But there are other items, such as refugee assistance and peacekeeping activities, that are not included in this supplemental.

I had hoped that the other body would have been able to conclude action on their other supplemental vehicle, H.R. 2072, in time for that measure to be received by the Senate, referred to committee, debated here on the floor, and moved through conference prior to the Memorial Day recess. Unfortunately, that has not happened. It has certainly not been for a lack of trying in the other body. Our brethren in the other body were driven to this result by necessity, not by choice, and I am sure every effort will be made next week to resume consideration of the other pending supplemental, and I am hopeful the bill will be passed.

But as the experience of the past few weeks indicates, Mr. President, there are many problems attendant to that supplemental, and its eventual passage by both Houses and approval by the President may not go as smoothly as we would hope. I simply wanted to take this time to offer these reservations, and point out that there are many matters left to be considered subsequent to our action on this bill.

Mr. President, the chairman of the Senate Appropriations Committee, the Senator from West Virginia [Mr. BYRD] has very accurately and very eloquently outlined the purpose of this supplemental and the parts to it.

I would only indicate that we are covering all of the veterans' programs, the various and sundry accounts that are listed both under the mandated spending or the entitlement programs and those that are listed under the discretionary programs. I do not think one on the floor or in this body would be other than supportive of fulfilling our obligation to the veterans established both by law and by administrative policy.

I think the chairman of the committee, Senator BYRD, has very rightly pointed out that this does not conclude our responsibility or our obligation in any degree to the other programs that are listed in the dire emergency supplemental, both those listed by the administration and those which have been made to the Appropriations Committee of the Senate of Members who have brought to us legitimate and well-defined emergency requests.

Mr. President, I see no reason to pursue this matter further. I will lean on the statement as printed in the RECORD and associate myself with the chairman's statement.

I would like to add one further point. I would like very much to thank the leadership of the Senate, the majority leader, Senator MITCHELL, and the minority leader, Senator DOLE. I think anyone who has been chairman of a committee and a ranking member of a committee understands the importance of having the full support of the leadership, and I also recognize that sometimes the leadership steps aside from personal viewpoints or personal preferences to accommodate the chairman and the ranking member of committees and to give them that kind of support and backing is very much appreciated.

That has happened over the history of the Senate, and it is, I think, one of those great hallmarks of the true leadership of this body, recognizing the collective corporate responsibilities and to associate themselves in their position of leader in fulfilling those responsibilities of the committees and the leadership of the committees.

I thank Senator MITCHELL, and I thank Senator DOLE for their support of Senator BYRD as chairman of our committee and my own role as ranking minority member.

Mr. BURNS. Mr. President, I want to commend the leadership in both the House and the Senate for bringing this important measure up before we go on our Memorial day break.

The veterans of this country could not have waited any longer for us to Act. I am sure that the veterans in my State of Montana and our two Veterans' Administration hospitals are rejoicing tonight. It is unfortunate, however, that we have had to make them wait and wonder for so long.

The funding shortfall for veterans health care has hit very hard in Montana. We have one of the highest percentages of veterans in the country. In Montana, one of every eight people are veterans. When you add their dependents into that equation, that is a lot of people affected by a lack of medical care.

The Administrators of our two veterans hospitals are to be commended for the job they did in providing the best care possible under extremely tough budget constraints. In fact, I received a copy of a letter recently which the Veterans Department had sent to Jim Huff, the Administrator of the VA Medical Center in Miles City, MT, commending him for a "job well done."

I had urged both Secretary Derwinski and Richard Darman to bring forth a supplemental appropriations for VA health care, and was very pleased when they did so. I had originally asked for $635 million. Obviously the figure we are working with here is much less, but we are also left with less time in this fiscal year. I know that the leadership has conferred with the Veterans' Department to make sure that this is enough for them to get by. It is my hope that in years to come we will not find ourselves in this situation again.

Our veterans have performed an invaluable service to this country. We should not let them down like this again. It is almost Memorial Day and I for one am glad we are remembering to take care of the health needs of our veterans.

Thank you, Mr. President.

AMENDMENT NO. 105

(Purpose: To limit the period for which appropriations are available for obligation)

Mr. BYRD. Mr. President, I send an amendment to the desk on behalf of myself and Mr. HATFIELD and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] for himself and Mr. HATFIELD, proposes an amendment numbered 105.

Mr. BYRD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, strike out the matter following line 11, and insert in lieu thereof the following:

Notwithstanding any other provision of this Act, no part of any appropriation contained in this Act shall remain available for obligation after June 15, 1989.

Mr. BYRD. Mr. President, as I explained in my opening statement, this amendment will limit the availability of the funds in the bill to June 15, 1989. This will give the VA the funding needed during that period in order to continue to meet the needs of veterans. It will also give us time to consider all the other pending items of a dire emergency nature sought by the President and the Congress.

I join my distinguished Republican colleague, Mr. HATFIELD, in personally assuring the Nation's veterans that funding for the remainder of the fiscal year will be provided in a timely way.

Mr. President, I also thank the two leaders for the splendid cooperation and support that they have given in this matter. I thank my colleague Senator HATFIELD, who is a true ranking colleague in the sense that he looks at the needs of the Nation and balances those out, and stands for what is best in the interest of the Nation and supports at all times what he thinks is right. I always feel that I can act with greater certitude of my own position as being right when Senator HATFIELD joins me in the effort.

I thank all the Senators on the Appropriations Committee for their cooperation in this instance. I personally talked with each Member on this side of the aisle.

I thank particularly the chairman of the Veterans' Appropriations Subcommittee, Senator MIKULSKI. She has been a champion for American veterans, and she is committed to providing funds for our veterans for all of calendar year 1989 as soon as is possible.

I would also like to take this opportunity to commend the staff for the excellent work they provided to the committee in its preparation for Senate consideration of this bill. In particular, I would like to recognize the assistance of Jim English, staff director of the committee; Keith Kennedy, minority staff director of the committee; Kevin Kelly, clerk of the Appropriations Committee's VA, HUD, and Independent Agencies Subcommittee; and Jack Conway, the committee's budget expert.

That is the feeling of all of us. We are all supportive of fully funding the Veterans' Administration as soon as possible, and I have no doubt that that will develop. But as I have already said we see a need for moving the other dire emergency items forward also.

Mr. President, I believe that completes my statement.

I yield back whatever time remains on my side and I yield the floor.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 105) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. All time having been set aside on the bill has expired, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read a third time, the question is, Shall it pass?

So, the bill (H.R. 2402), as amended, was passed.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. I thank the Chair.

(The remarks of Mr. STEVENS pertaining to the introduction of S. 1071, S. 1072, and S. 1073 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions," and to the submission of Senate Resolution 133, under "Submission of Concurrent and Senate Resolutions.")

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 2:05 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 38. Concurrent resolution providing for a conditional recess or adjournment of the Senate from May 18 or 19, 1989, until May 31, 1989, and a conditional adjournment of the House from May 25, 1989, until May 31, 1989.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 838. An act to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission for airport purposes;

H.R. 2145. An act to provide for the withholding of United States contributions to the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations of membership as a State is granted to the Palestine Liberation Organization or any other entity that does not have the internationally recognized attributes of statehood; and

H.R. 2402. An act making supplemental appropriations for the Department of Veterans Affairs for the fiscal year ending September 30, 1989, and for other purposes.

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 63. Concurrent resolution condemning continuing violence against unarmed Tibetan demonstrators and the imposition of martial law in Tibet, and calling for a peaceful resolution of the situation in Tibet; and

H. Con. Res. 122. Concurrent resolution concerning the May 7, 1989, Presidential election in Panama.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 838. An act to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission for airport purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 2145. An act to provide for the withholding of United States contributions to the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations of membership as a state is granted to the Palestine Liberation Organization or any other entity that does not have the internationally-recognized attributes of statehood; to the Committee on Foreign Relations.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 63. Concurrent resolution condemning continuing violence against unarmed Tibetan demonstrators and the imposition of martial law in Tibet, and calling for a peaceful resolution of the situation in Tibet; to the Committee on Foreign Relations.

H. Con. Res. 122. Concurrent resolution concerning the May 7, 1989, Presidential election in Panama; to the Committee on Foreign Relations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1142. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Volunteers in the National Forests Act of 1972 to permit volunteers to be considered employees under 31 U.S.C. 3721; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1143. A communication from the deputy general counsel of the Department of Defense, transmitting a draft of proposed legislation to establish certain positions in the Department of Defense at level IV of the Executive Schedule; to the Committee on Armed Services.

EC-1144. A communication from the deputy general counsel of the Department of Defense, transmitting a draft of proposed legislation to amend titles 10 and 37, United States Code, and other authorities to extend and to make permanent certain expiring laws; to the Committee on Armed Services.

EC-1145. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, the seventh quarterly report on Federal actions taken to assist the homeless; to the Committee on Banking, Housing, and Urban Affairs.

EC-1146. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the results of an audit of the Federal Housing Administration Fund's statement of financial position as of September 30, 1987; to the Committee on Banking, Housing, and Urban Affairs.

EC-1147. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Magnuson Fishery Conservation and Management Act, as amended, to authorize appropriations for fiscal years 1990, 1991, and 1992 and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-1148. A communication from the Acting Administrator of the General Services Administration, transmitting a draft of proposed legislation to amend the requirement that long distance telephone bills be certified by agency heads; to the Committee on Governmental Affairs.

EC-1149. A communication from the Attorney General, transmitting, pursuant to law, a Department of Justice report on a 6-month study on security equipment; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FORD, from the Committee on Rules and Administration, without amendment:

S. 326. A bill to amend the Federal Election Campaign Act of 1971 to repeal a provision allowing use of excess contributions (Rept. No. 101-28).

By Mr. FORD, from the Committee on Rules and Administration, without amendment:

S. 1074. An original bill to authorize appropriations for the Federal Election Commission for fiscal year 1990, and for other purposes (Rept. No. 101-29).

S. 1075. An original bill to authorize appropriations for the American Folklife Center for fiscal years 1990, 1991, and 1992 (Rept. No. 101-30).

By Mr. FORD, from the Committee on Rules and Administration, without amendment and with a preamble:

S.J. Res. 77. Joint resolution recognizing the National Fallen Firefighters' Memorial at the National Fire Academy in Emmitsburg, MD, as the official national memorial to volunteer and career firefighters who die in the line of duty (Rept. No. 101-31).

By Mr. FORD, from the Committee on Rules and Administration, without amendment:

S. Res. 134. An original resolution to authorize printing of a collection of the rules of the committees of the Senate.

S. Res. 135. An original resolution to amend Senate Resolution 369, 98th Congress, 2d session, relating to the Senate flag, to clarify the intent of the resolution that committees and officers of the Senate are permitted to display the flag.

By Mr. FORD, from the Committee on Rules and Administration, without amendment:

S. Con. Res. 19. Concurrent resolution to authorize printing of a collection of the inaugural address of the President of the United States.

Mr. FORD. Mr. President, on May 17, 1989, the Committee on Rules and Administration met to consider 12 bills and resolutions. Of those it ordered reported 11 items and agreed to continue consideration to the remaining item, S. 874, the voter registration bill and a substitute amendment thereto, to the next meeting. That bill will be taken up for consideration and markup June 12, 1989. At this time I am reporting those resolutions that do not require written reports—all of which were ordered reported by unanimous vote. A brief explanation of each of these items follows:

SENATE CONCURRENT RESOLUTION 19

This concurrent resolution, which was introduced by Mr. STEVENS and myself, would authorize printing as a Senate document, of 16,200 copies of a collection of the inaugural addresses of the Presidents of the United States, from President George Washington to President George H.W. Bush, Each Senator would receive 50 copies; each Congressman would receive 25 copies; and copies of the allotments not used would revert to the Senate and House Document Rooms. The Government Printing Office estimates that 16,200 casebound copies of the document would cost approximately $112,153.

SENATE RESOLUTION 134

An original resolution that would authorize the printing as a Senate document of 600 copies of a compilation prepared by the Senate legal counsel of the rules of procedures of all Senate committees and other matters that relate to Senate committees. This print would include the rules of procedure of each committee, Standing Rules of interest to committees and other matters pertaining to Senate committees. It will be distributed to Members, the committees and subcommittees.

SENATE RESOLUTION 135

An original resolution to amend Senate Resolution, 369, 98th Congress, 2d session, relating to the Senate flag, to clarify the intent of the resolution that committees and officers of the Senate, as well as Members, are permitted to display the flag. It would permit the purchase of two flags by each Senator, former Senator, each Senate committee, and each officer of the Senate, subject to replacement for loss, destruction, or wear and tear.

The committee also ordered reported eight items on which reports have been, or will be, submitted by me. They are: Senate Joint Resolution 98, to establish separate appropriation accounts for the Senate and the House of Representatives for the payment of official mail costs; an original bill to authorize appropriations for the American Folklife Center for fiscal years 1990 through 1992; an original bill to authorize appropriations for the Federal Election Commission for fiscal year 1990 and for other purposes; an amendment in the nature of a substitute to S. 377, to establish a series of eight Presidential primaries at which the public may express its preference for the nomination of an individual for election to the office of the President of the United States; S. 326, to amend the Federal Election Campaign Act of 1971 to repeal a provision allowing the personal use of excess campaign contributions; S. 136, to amend title 3, United States Code, to establish a single poll closing time in the continental United States for Presidential general elections; an amendment in the nature of a substitute to S. 978, to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian, and for other purposes; and Senate Joint Resolution 77, which would recognize the National Fallen Firefighters' Memorial located of the campus of the National Fire Academy in Emmitsburg, MD, as the official national memorial in honor of the approximately 160 volunteer and career firefighters who die each year in the line of duty.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BENTSEN, from the Committee on Finance:

Sidney Linn Williams, of Virginia, to be a Deputy United States Trade Reprsentative, with the rank of Ambassador.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. BIDEN, from the Committee on the Judiciary:

Kenneth Winston Starr, of Virginia, to be Solicitor General of the United States.

● Mr. BIDEN. Mr. President, I submit this statement in connection with the nomination of Kenneth Starr to be Solicitor General of the United States.

As the chief advocate for the Federal Government in our Nation's lower courts and in the Supreme Court, the

Solicitor General is among the most important officers of the United States. It is commonly said that the Solicitor General is the only official in our Government who is required by statute to be "learned in the law." That is surely true, but to my mind, a lesser known fact better symbolizes the unique nature of the office: Although he is a member of the Department of Justice, the Solicitor General also has permanent chambers in the Supreme Court. That he keeps offices within two of the three branches of our Government—and is subject to the advice and consent of the third, I might add—truly underscores, in this Senator's mind, the broad power and unique responsibilities of the Solicitor General of the United States.

When it created the Office of the Solicitor General in 1870, the 41st Congress set a high standard. In its words:

We propose to have a man of sufficient learning, ability and experience that he can be sent * * * into any court whenever the government has an interest in litigation, and there present the case of the United States as it should be presented.

While it clearly anticipated the attributes necessary to lead the office, Congress probably did not foresee the extent of the Solicitor General's present-day power and importance.

One index of that power and importance is the degree of success the Solicitor General enjoys in litigation before the Supreme Court. That success can be measured in several different ways. Looking at the Court's 1983 Term, which is representative of other terms as well, one finds:

That the Court granted 79 percent of the Solicitor General's petitions for certiorari, compared to granting 3 percent of the petitions filed by others;

That the Solicitor General appeared in about 65 percent of the total number of cases heard by the Court, either as a party or as a "friend of the Court"; and

That the Solicitor General won a remarkable 83 percent of his cases.

Very simply, because the Solicitor General exercises considerable influence on which cases the Supreme Court hears in the first place, and on the way these cases are ultimately decided, he exercises considerable influence on the development of constitutional law. Indeed, other than the nine justices themselves, no other person—year after year, term after term—is likely to influence the development of constitutional law more than the Solicitor General.

Because of that influence and the extraordinary responsibilities the Solicitor General exercises, one of the issues about which I questioned Judge Starr was his independence. I asked him several questions about how he expected to fulfill the two roles that he must play: His policymaking role as a member of the administration, and his "quasi-judicial" role, as one commentator has termed it, as an officer of the Supreme Court. This second role is particularly important, for in very real sense, Solicitor Generals of years past have earned a permanent place at the Court because the Court has come to rely on their rigorous legal analysis, total candor, and ability to help regulate the Court's docket.

Judge Starr's answers to my questions were quite informative. He recognized that while consultation with the Attorney General and the President might be necessary in some cases, his role as an officer of the Supreme Court "will involve absolute fidelity to law, * * * scrupulous advocacy, and complete candor * * * It will also require a studious regard for the Supreme Court's docket and thus a frequent willingness to say no to requests to take cases to High Court." He also stated that "just as the conduct of the entire affairs of the Department of Justice must be independent in the sense of non-partisan and governed by fedelity to the Constitution and the rule of law, I think that responsibility is particularly heavy and pertinent to the Solicitor General by virtue of his obligation to the Supreme Court—a unique obligation, as has been noted."

Along these same lines, I asked Judge Starr what he would do if, in a case before the Supreme Court, he personally concluded that the outcome the President hoped for as a matter of policy was not legally defensible. To my satisfaction, Judge Starr answered: "I would not * * * take a position as Solicitor General that I did not feel * * * was legally defensible."

One factor critical to the Solicitor General's ability to operate with the necessary degree of independence is whether he has to submit briefs to the Attorney General or the White House for their approval. Judge Starr indicated while such submissions might occur in a "particular case," he believed that it would be "a profoundly unwise course of action, were any such customary practice to be suggested. * * * [T]he rendering of independent professional judgment by the Office cannot adequately be carried on without the assurance of the necessary latitude and professional freedom that has historically been enjoyed" by the Solicitor General's office.

I also explored with Judge Starr his views on a number of other very specific issues, not the least important of which was the subject of stare decisis. That term—translated literally to mean "to stand by things decided—connotes the notion of continuing respect for precedent. Judge Starr testified that "the principle of stare decisis is vitally important" and that "the Solicitor General should exercise great prudence and caution in the way in which he conducts the legal affairs of that office." It is my hope that Judge Starr will, when necessary, draw the important distinction between an administration's short-term interest in overruling a case and what I believe should be the Solicitor General's long-term interest in the orderly development of the law.

In order to get a sense of Judge Starr's philosophy and approach to issues of constitutional import, I asked him about several of his speeches and articles. For while he may be discarding his black judicial robes for the formal striped pants, vest, and tails traditionally donned by the Solicitor General when he presents his argument to the Court, his philosophical and constitutional views are important.

In particular, I asked Judge Starr about the interpretation of the due process clauses in the 5th and 14th amendments. He had said in a 1988 speech that a "substantial consensus" has developed on certain "basic principles," and that "first and foremost of these principles is that liberty is seen as inherent in the individual. Liberty does not derive from the Government. In the immortal words of Jefferson, the individual is endowed by his Creator with certain inalienable rights." When I asked Judge Starr whether he personally agreed with that "substantial consensus," he responded: "I believe in that as fervently as I believe in anything." He added in response to additional questions that:

> Madison and the other Framers of the Bill of Rights were very keenly mindful that there were other liberties, ancient liberties of the people protected by the common law, and that the enumeration of the specific rights identified in the first eight amendments of the Bill of Rights were not meant to be exhaustive, and that was the function of the Ninth Amendment.

Judge Starr also stated that as Solicitor General, he intended to stand within and affirm the broad, ancient traditions that he had described in his speeches. Finally, Judge Starr stated that "I believe that the Liberty Clause of the Fourteenth Amendment and of the Fifth Amendment has substantive content, and that that liberty is, in fact, protectable." I believe that Judge Starr's responses to these questions provide us with a keen insight into his approach to constitutional issues, at least with respect to the important question of how he views the due process clause of our 5th and 14th amendments.

Overall, I believe that Judge Starr's answers to my questions during the hearing and to my subsequent written questions suggest that he will bring to the Office of Solicitor General independence, competence, sound legal judgment, and due respect for the High Court that he must serve—all critical attributes for the important

position for which he has been nominated. It is my hope that he truly understands and accepts what I believe should be the creed of every Solicitor General. First spoken by Frederick Lehmann, who served as Solicitor General between 1910 and 1912, that creed is this:

The United States wins its point whenever justice is done its citizens in the courts.

Accordingly, I will vote in favor of the nomination of Kenneth Starr to be Solicitor General of the United States.●

Carol T. Crawford, of Virginia, to be an Assistant Attorney General; and

Shirley D. Peterson, of Maryland, to be an Assistant Attorney General.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. BIDEN, from the Committee on the Judiciary:

Ferdinand F. Fernandez, of California, to be United States Circuit Judge for the Ninth Circuit;

Pamela Ann Rymer, of California, to be United States Circuit Judge for the Ninth Circuit;

Robert C. Bonner, of California, to be United States District Judge for the Central District of California; and

Melinda Harmon, of Texas, to be United States District Judge for the Southern District of Texas.

By Mr. NUNN, from the Committee on Armed Services:

David J. Gribbin, III, of Maryland, to be an Assistant Secretary of Defense;

Louis A. Williams, of Wyoming, to be an Assistant Secretary of Defense; and

Sean Charles O'Keefe, of Virginia, to be Comptroller of the Department of Defense.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. KENNEDY, from the Committee on Labor and Human Resources:

Roderick Allen DeArment, of Virginia, to be Deputy Secretary of Labor.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MOYNIHAN:

S. 1033. A bill to provide duty free treatment for operatic sets, scenery and properties imported by certain nonprofit, cultural organizations; to the Committee on Finance.

By Mr. GORE (for himself, Mr. METZENBAUM, Mr. BUMPERS, Mr. SIMON, Mr. PELL, and Mr. INOUYE):

S. 1034. A bill to alleviate homelessness by expanding and preserving the supply of permanent, affordable, and decent housing.

By Mr. JEFFORDS (for himself and Mr. LEAHY):

S. 1035. A bill to restrict certain uses of chlorofluorocarbons to protect the ozone layer in the stratosphere, and for other purposes; to the Committee on Environment and Public Works.

By Mr. LEAHY (for himself, Mr. HEFLIN, Mr. MCCONNELL, Mr. PRYOR, Mr. BOREN, Mr. HARKIN, Mr. CONRAD, Mr. FOWLER, Mr. DASCHLE, Mr. BAUCUS, Mr. KERREY, Mr. MITCHELL, Mr. BURDICK, Mr. BUMPERS, Mr. SPECTER, Mr. FORD, Mr. PRESSLER, Mr. GORE, Mr. SASSER, Mr. GRASSLEY, Mr. EXON, Mr. LEVIN, Mr. BRYAN, Mr. SARBANES, Mr. LOTT, Mr. SANFORD, Mr. KOHL, Mr. SHELBY, Mr. MATSUNAGA, Mr. BENTSEN, and Mr. ADAMS):

S. 1036. A bill to improve the economic, community, and educational well-being of rural America, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. MITCHELL:

S. 1037. A bill to prohibit the implementation of certain regulations of the Secretary of Health and Human Services and the Secretary of Agriculture regarding irradiated foods, to amend the Federal Food, Drug, and Cosmetic Act to prescribe labels for such foods, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ROTH:

S. 1038. A bill to repeal medicare catastrophic coverage provisions effective in years after 1989 and the supplemental medicare premium, and for other purposes; to the Committee on Finance.

By Mr. DECONCINI:

S. 1039. A bill to restore the record-keeping requirement of the Child Protection and Obscenity Enforcement Act of 1988; to the Committee on the Judiciary.

By Mr. WILSON (for himself, Mr. D'AMATO, Mr. DECONCINI, Mr. DIXON, Mr. GRAMM, and Mr. GORTON):

S. 1040. A bill to require the Secretary of Defense to establish an Anti-Drug Task Force; to the Committee on Armed Services.

By Mr. CONRAD (for himself, Mr. DASCHLE, Mr. BOREN, Mr. HARKIN, Mr. KERREY, Mr. DIXON, and Mr. BURDICK):

S. 1041. A bill to amend the Internal Revenue Code of 1986 to provide tax relief for farmers who realize capital gain on the transfer of farm property to satisfy an indebtedness and for other purposes; to the Committee on Finance.

By Mr. DURENBERGER:

S. 1042. A bill to suspend temporarily the duty on certain in-line roller skate boots; to the Committee on Finance.

By Mr. FORD (for himself, Mr. LAUTENBERG, and Mr. MITCHELL):

S. 1043. A bill to establish a commission on aviation security and terrorism to investigate the adequacy of and compliance with aviation security procedures and Federal Aviation Administration security requirements; to the Committee on Commerce, Science, and Transportation.

By Mr. DOLE (for himself, Mr. BOREN, Mrs. KASSEBAUM, Mr. NICKLES, Mr. BENTSEN, Mr. GRAMM, Mr. BAUCUS, Mr. BURNS, Mr. PRESSLER, Mr. WIRTH, Mr. PRYOR, and Mr. DASCHLE):

S. 1044. A bill to amend the Disaster Assistance Act of 1988 to extend disaster assistance to losses due to adverse weather conditions of 1988 or 1989 for crops planted in 1988 for harvest in 1989, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SYMMS (for himself, Mr. BAUCUS, Mr. BURDICK, Mr. CHAFEE, Mr. MITCHELL, Mr. DURENBERGER, Mr. WARNER, Mr. LIEBERMAN, Mr. JEFFORDS, Mr. HUMPHREY, Mr. REID, Mr. LAUTENBERG, Mr. BUMPERS, Mr. GARN, Mr. COHEN, Mr. MOYNIHAN, Mr. CONRAD, Mr. MCCLURE, Mr. MURKOWSKI, Mr. BREAUX, Mr. GRAHAM, and Mr. SIMPSON):

S. 1045. A bill to establish a National Environmental Policy on the participation of the United States in international financing; to the Committee on Environment and Public Works.

By Mr. RUDMAN (for himself and Mr. HUMPHREY):

S. 1046. A bill to designate the Merrimack River, in the State of New Hampshire, as a river to be studied for inclusion in the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. KENNEDY (for himself, Mr. WIRTH, Mr. HATFIELD, Mr. HARKIN, Mr. CRANSTON, Mr. KERRY, and Mr. SANFORD):

S. 1047. A bill to encourage negotiations between the United States and the Soviet Union to establish mutual and verifiable restrictions on the production of plutonium and highly enriched uranium for nuclear weapons purposes; to the Committee on Foreign Relations.

By Ms. MIKULSKI (for herself and Mr. BINGAMAN):

S. 1048. A bill to amend chapter 89 of title 5, United States Code, to provide authority for the direct payment or reimbursement to certain health care professionals; to clarify certain provisions of such chapter with respect to coordination with State and local law; and for other purposes; to the Committee on Governmental Affairs.

By Mr. SPECTER (for himself and Mr. HEINZ):

S. 1049. A bill to recognize the organization known as the Montford Point Marine Association, Incorporated; to the Committee on the Judiciary.

By Mr. HEINZ (for himself and Mr. CONRAD):

S. 1050. A bill to amend the Federal Railroad Safety Act of 1970; to the Committee on Commerce, Science, and Transportation.

By Mr. BOSCHWITZ (for himself, Mr. BAUCUS, Mr. BURNS, Mr. LOTT, Mr. CONRAD, Mr. BURDICK, Mr. BOREN, Mr. PRESSLER, Mr. KASTEN, and Mr. GRASSLEY):

S. 1051. A bill to promote the development of small business in rural areas; to the Committee on Small Business.

By Mr. KERRY (for himself, Mr. LEAHY, and Mr. GORE):

S. 1052. A bill to regulate equipment for servicing motor vehicle air conditioners, to restrict the sale of chlorofluorocarbons and motor vehicles with air conditioners that use chlorofluorocarbons, to require reports on the use of chemicals which deplete the ozone layer in the stratosphere, and for other purposes; to the Committee on Environment and Public Works.

By Mr. RIEGLE (for himself, Mr. BRADLEY, Mr. MATSUNAGA, Mr. PRYOR, Mr. SIMON, Mr. DASCHLE, Mr.

DURENBERGER, and Mr. ROCKEFELLER):

S. 1053. A bill to amend title V of the Social Security Act to provide for supplemental resources to enhance the delivery of health services to pregnant women and infants; to the Committee on Finance.

By Mr. MATSUNAGA:

S. 1054. A bill to provide for the temporary suspension of duty on certain magnetic video tape recordings; to the Committee on Finance.

S. 1055. A bill to amend the Internal Revenue Code of 1986 to exempt retired public safety officers from the early withdrawal tax on pension distributions; to the Committee on Finance.

By Mr. COATS (for himself, Mr. BURNS, and Mr. GORTON):

By Mr. CRANSTON (for himself and Mr. WILSON):

S.J. Res. 139. Joint resolution to approve the designation of the Cordell Bank National Marine Sanctuary, to disapprove a term of that designation, and to direct the Secretary of Commerce to revise regulations implementing that designation to prohibit certain activities in the Sanctuary; to the Committee on Commerce, Science, and Transportation.

By Mr. GLENN (for himself, Mr. SHELBY, Mr. WILSON, Mr. GORE, and Mr. STEVENS):

S.J. Res. 140. Joint resolution designating November 19–25, 1989, as "National Family Caregivers Week"; to the Committee on the Judiciary.

By Mr. WILSON (for himself and Mr. CRANSTON):

S.J. Res. 141. Joint resolution approving the national marine sanctuary designation entitled "Cordell Bank National Marine Sanctuary"; to the Committee on Commerce, Science, and Transportation.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BRADLEY (for himself, Mr. MITCHELL, Mr. DOLE, Mr. CRANSTON, Mr. LUGAR, Mr. CHAFEE, Mr. WIRTH, Mr. FOWLER, and Mr. LIEBERMAN):

S. Res. 130. Resolution recognizing May 25 convening of U.S.S.R. Congress of Peoples' Deputies; considered and agreed to.

By Mrs. KASSEBAUM (for herself, Mr. INOUYE, Mr. DASCHLE, Mr. DODD, Mr. LUGAR, and Mr. MCCAIN):

S. Res. 131. Resolution to amend the rules of the Senate to improve legislative efficiency, and for other purposes; to the Committee on Rules and Administration.

By Mr. SYMMS (for himself and Mr. DECONCINI):

S. Res. 132. Resolution expressing the sense of the Senate regarding consultation with leaders of allied countries during the NATO Summit and the Economic Summit meetings in Brussels and Paris about loans and credit to the Soviet bloc; considered and agreed to.

By Mr. STEVENS (for himself, Mr. DOLE, Mr. HATCH, Mr. HEFLIN, Mr. LOTT, Mr. LUGAR, Mr. MURKOWSKI, and Mr. SANFORD):

S. Res. 133. Resolution to provide a point of order against unconstitutional provisions of a conference report; to the Committee on Rules and Administration.

By Mr. FORD:

S. Res. 134. An original resolution to authorize printing of a collection of the rules of the committees of the Senate; from the Committee on Rules and Administration; placed on the calendar.

S. Res. 135. An original resolution to amend Senate Resolution 369, 98th Congress, 2nd Session, relating to the Senate flag, to clarify the intent of the resolution that committees and officers of the Senate are permitted to display the flag; from the Committee on Rules and Administration; placed on the calendar.

By Mr. WILSON (for himself and Mr. CRANSTON):

S. Con. Res. 39. Concurrent resolution to commend the group of aviators known as the "Flying Tigers" for nearly 50 years of service to the United States; to the Committee on the Judiciary.

By Mr. MITCHELL (for himself, Mr. DOLE, Mr. CRANSTON, and Mr. SIMPSON):

S. Con Res. 40. Concurrent resolution to designate June 21, 1989, as Chaney, Goodman, and Schwerner Day; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GORE (for himself, Mr. METZENBAUM, Mr. BUMPERS, Mr. SIMON, Mr. PELL, and Mr. INOUYE):

S. 1034. A bill to alleviate homelessness by expanding and preserving the supply of permanent, affordable, and decent housing; to the Committee on Banking, Housing, and Urban Affairs.

PERMANENT HOUSING FOR HOMELESS AMERICANS ACT

Mr. GORE. Mr. President, today I am introducing legislation which will increase the ever-dwindling supply of permanent housing for homeless individuals and families in the United States. This bill, the Permanent Housing for Homeless Americans Act of 1989, attacks what every major study has defined as the root cause of homelessness—the lack of decent, affordable housing.

This bill would increase the supply of federally assisted housing by 140,000 units in each of the next 2 years and reserve those units for the homeless and for people in imminent danger of becoming homeless. Specifically, the bill funnels assistance through the existing public housing, section 8, rental rehabilitation and Community Development Block Grant Programs in order to expedite the availability of housing. In addition, this legislation establishes an entitlement, as a matter of right, to decent overnight shelter.

Joining me as original cosponsors of this legislation, which I believe will mark a positive and long overdue shift in the Nation's response to the crisis of homelessness, are Senators METZENBAUM, BUMPERS, SIMON, PELL, and INOUYE.

Make no mistake, Mr. President, the degree of homelessness in the United States today is a national disgrace, with some estimates placing the number of homeless as high as 3 million. One out of four homeless persons is a child, and families with children are entering the ranks of the homeless at an alarming rate.

To what can we attribute this development? It certainly is not, as some terribly unenlightened public figures have suggested, a matter of choice or preference. Nor can the great majority of cases be attributed simply to a lack of initiative or to personal irresponsibility. The fact is, a fourth of homeless people have jobs. The old image of a skid-row bum is just not valid; all sorts of people from all walks of life and many different backgrounds become homeless for any number of reasons.

But what these people have in common is a discouraging, frustrating, and ultimately dehumanizing inability to find a decent place to live. This crisis in homelessness is an inevitable result of drastic meat-ax cuts in Federal low-income housing assistance in this decade. Budget authority for housing plummeted from $30 billion in 1981 to less than $8 billion in 1989.

In addition to the homeless population, there are 3 million renter households with incomes below $5,000 who spend more than 70 percent of their incomes for housing. These families live on the edge of eviction; they are at risk of becoming homeless. A failure to act could more than double the number of homeless Americans in the very near future. Without action, more than 18 million Americans may be homeless or near homelessness by 2003.

Mr. President, I was an original cosponsor and a coauthor of the Stewart B. McKinney Homeless Assistance Act, to date the most important legislation regarding the homeless to come out of Congress. But the McKinney Act's most glaring omission is that of permanent housing for the homeless. This legislation does address that critical issue.

To achieve the goal of providing additional permanent housing, the bill I am introducing today will authorize increases in funding in the following ways:

First, for section 8 certificates, $450 million a year for 2 years, allocated with a formula that takes the homeless population into account;

Second, for the section 8 moderate rehabilitation program, $250 million a year for 2 years, allocated to applicants that best demonstrate a need for assistance;

Third, for modernization of vacant public housing, $500 million a year for 2 years for additional modernization assistance for the homeless;

Fourth, for the Rental Rehabilitation Grants Program, $500 million a year for 2 years to prevent homelessness; and

Fifth, for rehabilitation of in rem properties held by State and local governments, $300 million a year for 2 years under the CDBG to convert

these properties to provide affordable permanent housing units.

This funding totals $2 billion a year for 2 years, only a fraction of the $22 billion which was slashed from housing programs over the past 8 years. Yet, even this amount will only begin to address the problems of homelessness. An even greater commitment of resources, on an ongoing basis, will be required to create and maintain the permanent supply of housing necessary to eradicate homelessness.

Mr. President, major housing legislation will be brought before the Senate, probably this year, and I expect that a bill touching on just about every aspect of Federal housing policy will be passed. My distinguished colleagues, the Senator from California [Mr. CRANSTON] and the Senator from New York [Mr. D'AMATO], have labored long and hard and produced a comprehensive bill that I am sure will enjoy very broad bipartisan support.

Yet, I am convinced that any housing policy will be deficient if it lacks a truly significant effort to provide permanent housing for the homeless. The legislation that I am introducing today is such a provision. It is not intended to be, nor should it be viewed as, in competition with the omnibus housing legislation being considered this year. Instead, I see this bill as a supplement to that important effort.

Mr. President, I also want to commend the National Coalition for the Homeless, an outstanding advocacy organization for the homeless, for its support and attention to this legislation. In addition, I want to note that a companion bill, H.R. 140, has been introduced in the other body by Representative BRUCE F. VENTO.

I urge my colleagues in the strongest terms to support the Permanent Housing for Homeless Americans Act of 1989, and I look forward to working with them for its enactment.

At this point, Mr. President, I ask unanimous consent that a copy of correspondence I have received from the National Coalition for the Homeless and the American Psychological Association be included in the RECORD, followed by the text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL COALITION
FOR THE HOMELESS,
Washington, DC, May 18, 1989.

Hon. ALBERT GORE, Jr.,
Hon. HOWARD M. METZENBAUM,
Hon. DALE BUMPERS,
U.S. Senate, Washington, DC.

DEAR SENATORS: Today, more people are homeless in the United States than at any time since the Great Depression. In a time of unprecedented economic prosperity, about three million men, women, and children are without a place to live. Forty percent of the homeless are families.

Moreover, 3.1 million more poor renter households—45% of all poor renter households—pay at least 70% of their income for housing costs. These men, women and children daily live on the brink of homelessness, of losing the basic necessities of life: a roof over their heads, a bed to sleep in, and a meal to eat.

At the same time, there exist unused resources across the country that could provide permanent homes for the homeless. Approximately 70,000 federal public housing units stand vacant because adequate funds for their repair are not available. Similarly, tens of thousands of city-owned properties lie vacant. Waiting lists for assisted housing are years long.

The Permanent Housing for Homeless Americans Act of 1989 uses these existing resources to attack the major cause of homelessness—the lack of decent, affordable housing. This bill would provide homes—and new hope—for those who are homeless or in imminent danger of becoming homeless.

Almost two years ago, Congress acted with speed on landmark legislation for the homeless. This new law, the Stewart B. McKinney Act, provides much needed emergency relief. But even at its best—its fully-funded best—the McKinney Act can only help homeless Americans with the barest survival needs. It shows our compassion, it helps treat the symptoms, but it provides no permanent solution.

America's homeless men, women and children need more than compassion. They need permanent solutions to homelessness. The National Coalition for the Homeless wholeheartedly supports this bill as a significant step towards providing long-term answers for this national crisis. We look forward to working with the Senators to ensure early passage of this critical relief.

Sincerely,

ROBERT M. HAYES.

AMERICAN PSYCHOLOGICAL ASSOCIATION,
Washington, DC, April 19, 1989.

Hon. ALBERT GORE,
U.S. Senate, Washington, DC.

DEAR SENATOR GORE: On the behalf of the 90,000 members of the American Psychological Association, I would like to commend you for your willingness to introduce the Permanent Housing for Homeless Americans Act of 1989. We feel that this legislation is an important step towards addressing the needs of the growing number of homeless families and children.

Our members are alarmed at recent estimates that homeless families comprise one-third of the nation's homeless population. In some cities, such as New York, Los Angeles, Oakland and St. Louis, over half of the homeless population consists of families with children. It has been widely documented that the chaotic environment of the shelters and welfare hotels has severe and lasting effects on children's development. For example, one study in Boston found that the majority of these children have thought about killing themselves. Other studies have found that homeless children are twice as likely to suffer from chronic health problems than other children their age.

The Permanent Housing for Homeless Americans Act would provide tangible assistance in the effort to prevent homelessness. The Act would provide affordable and decent housing for many families with young children whose basic physical and emotional needs go unmet in shelters or on the streets. Thus, we support your efforts to insure that the federal government does not ignore its responsibility to these families.

Thank you for your consideration.

Sincerely,

BRIAN L. WILCOX, Ph.D.
Director, Office of Public Interest Legislation.

S. 1034

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Permanent Housing for Homeless Americans Act of 1989".

SEC. 2. FINDINGS AND STATEMENT OF PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) homelessness in the United States has reached alarming proportions and has become a national emergency;

(2) the greatest single cause of homelessness is the lack of decent, affordable assisted housing, and the demand for such housing is continuing to grow significantly every year;

(3) the number of homeless individuals and families has increased beyond the ability of the States and local governments to provide needed housing without Federal assistance;

(4) there is a need to reestablish and reaffirm a national goal, established in the Housing Act of 1949, of a decent home and suitable living environment for every family in the United States;

(5) without action to reverse the decline in the availability of affordable housing, more than 18,000,000 Americans may be homeless or near homelessness by 2003; and

(6) an even greater and sustained commitment of Federal resources than provided in this Act and in other existing programs will be required to create and maintain the permanent supply of housing necessary to eradicate homelessness.

(b) STATEMENT OF PURPOSE.—The purpose of this Act is to make an initial effort to alleviate homelessness through a limited, but urgently needed, effort to expand and preserve the supply of permanent, affordable, and decent housing.

SEC. 3. DEFINITIONS.

(a) HOMELESS OR HOMELESS INDIVIDUAL.—For purposes of this Act, the term "homeless" or "homeless individual" shall have the same meaning as in section 103(a) of the Stewart B. McKinney Homeless Assistance Act, with the same exclusion contained in section 103(c) of the Stewart B. McKinney Homeless Assistance Act.

(b) AT RISK OF BECOMING HOMELESS.—For purposes of this Act only, the term "at risk of becoming homeless" shall include an individual or family that—

(1) lives in substandard or inadequate conditions or accommodations, as defined by the Secretary, where such conditions are not addressed by programs under the Stewart B. McKinney Homeless Assistance Act;

(2) lives in temporary makeshift arrangements in the accommodations of others; or

(3) is on a waiting list for any lower income housing assisted by the Federal Government.

(c) SECRETARY.—The term "Secretary" means the Secretary of Housing and Urban Development.

(d) TRANSITIONAL HOUSING.—The term "transitional housing" means a project that has as its purpose facilitating the movement of homeless individuals and families to independent living within a reasonable amount of time, as determined by the project sponsor. Transitional housing includes housing

primarily designed to serve deinstitutionalized homeless individuals and other homeless individuals with mental disabilities and homeless families with children.

SEC. 4. ENTITLEMENT.

(a) DECLARATION OF ENTITLEMENT.—Every homeless individual is entitled as a matter of right to decent overnight shelter.

(b) ENFORCEMENT.—Both State and Federal courts shall have jurisdiction to enforce this right in private actions brought by, or on behalf of, homeless individuals.

SEC. 5. HOUSING ASSISTANCE FOR THE HOMELESS.

(a) IN GENERAL.—The Secretary of Housing and Urban Development shall, to the extent of amounts provided in appropriation Acts, provide financial assistance under the provisions of and amendments made by this Act to expand and maintain the permanent supply of affordable and decent housing.

(b) ELIGIBLE BENEFICIARIES.—All amounts made available under the provisions of and amendments made by this Act shall be used solely for the benefit of individuals and families—

(1) who are homeless;

(2) who are at risk of becoming homeless; or

(3) whose incomes do not exceed 50 percent of the median individual or family income for the area, as determined by the Secretary with adjustments for smaller and larger families.

SEC. 6. ADDITIONAL SECTION 8 ASSISTANCE.

Section 5(c) of the United States Housing Act of 1937 is amended by adding at the end the following new paragraph:

"(9) ADDITIONAL SECTION 8 ASSISTANCE FOR THE HOMELESS.—To increase the number of affordable and decent housing units, the budget authority available under this subsection is authorized to be increased as follows:

"(A) SECTION 8 CERTIFICATES.—

"(i) IN GENERAL.—For assistance pursuant to 15-year contracts under section 8(b)(1), by $450,000,000 for each of the fiscal years 1990 and 1991, to be used in accordance with section 5 of the Permanent Housing for Homeless Americans Act of 1989.

"(ii) ALLOCATION.—The amounts made available under this subparagraph shall be allocated by the Secretary in accordance with section 213(d)(1) of the Housing and Community Development Act of 1974, except that the formula under such section shall also be based on relative needs reflected in data included in comprehensive homeless assistance plans submitted under section 401 of the Stewart B. McKinney Homeless Assistance Act as to the number of homeless individuals and families and persons at risk of becoming homeless (as defined in section 3 of the Permanent Housing for Homeless Americans Act of 1989).

"(B) SECTION 8 MODERATE REHABILITATION PROGRAM.—

"(i) IN GENERAL.—For assistance pursuant to 10-year contracts under section 8(e)(2), by $250,000,000 for each of the fiscal years 1990 and 1991, to be used in accordance with section 5 of the Permanent Housing for Homeless Americans Act of 1989.

"(ii) ALLOCATION.—The amounts made available under this subparagraph shall be allocated by the Secretary on the basis of a national competition to the applicants that best demonstrate a need for the assistance under this subparagraph and the ability to undertake and carry out a program to be assisted under this subparagraph. No single city or urban county shall be eligible to receive more than 10 percent of the assistance made available under this subparagraph.

"(iii) APPLICATIONS.—To be considered for assistance under this subparagraph, an applicant shall submit to the Secretary a written proposal containing—

"(I) a description of the size and characteristics of the population within the jurisdiction of the applicant that would occupy the assisted dwellings;

"(II) a listing of additional commitments from public and private sources that the applicant might be able to provide in connection with the program;

"(III) an inventory of suitable housing stock to be rehabilitated within such assistance; and

"(IV) a description of the interest that has been expressed by builders, developers, and other persons (including profit and nonprofit organizations) in participating in the program.

"(iv) COST LIMITATION.—The Secretary shall establish limits on the total cost of rehabilitation of any unit assisted under this subparagraph, taking into consideration special local conditions (including high construction costs or stringent fire or building codes).

"(v) CONTRACT REQUIREMENTS.—Each contract for annual contributions entered into with a public housing agency to obligate the authority made available under this subparagraph shall—

"(I) commit the Secretary to make such authority available to the public housing agency for an aggregate period of 10 years, and require that any amendments increasing such authority shall be available for the remainder of such 10-year period; and

"(II) provide the Secretary with the option to renew the contract for an additional period of 10 years, subject to availability of appropriations.".

SEC. 7. ASSISTANCE FOR MODERNIZATION OF VACANT PUBLIC HOUSING.

Section 5(c) of the United States Housing Act of 1937 (as amended by section 6 of this Act) is further amended by adding at the end the following new paragraph:

"(10) ADDITIONAL MODERNIZATION ASSISTANCE FOR THE HOMELESS.—In addition to the other amounts authorized in this subsection, there is authorized to be appropriated for assistance under section 14 for the modernization of vacant public housing units $500,000,000 for each of the fiscal years 1990 and 1991, to be used in accordance with section 5 of the Permanent Housing for Homeless Americans Act of 1989.".

SEC. 8. RENTAL REHABILITATION GRANTS.

Section 17(a) of the United States Housing Act of 1937 is amended by adding at the end the following new paragraph:

"(4) RENTAL REHABILITATION GRANTS TO PREVENT HOMELESSNESS.—In addition to the amounts authorized in paragraph (3), there is authorized to be appropriated for rental rehabilitation under this section $500,000,000 for each of the fiscal years 1990 and 1991, to be used in accordance with section 5 of the Permanent Housing for Homeless Americans Act of 1989.".

SEC. 9. FUNDING FOR THE REHABILITATION OF STATE AND LOCAL GOVERNMENT IN REM PROPERTIES.

(a) GENERAL AUTHORITY.—Section 103 of the Housing and Community Development Act of 1974 is amended—

(1) by inserting after the section designation the following: "(a) IN GENERAL.—"; and

(2) by adding at the end the following new subsection:

"(b) ADDITIONAL ASSISTANCE FOR THE HOMELESS.—In addition to the amounts authorized in subsection (a), there is authorized to be appropriated for grants under section 106 $300,000,000 for each of the fiscal years 1990 and 1991. Amounts provided under this subsection may only be used to make grants to States and units of general local government converting in rem properties to provide affordable permanent housing units, to be used in accordance with section 5 of the Permanent Housing for Homeless Americans Act of 1988. The total cost of rehabilitation that may be funded by a grant under this subsection shall not exceed $10,000 per unit. The States and units of general local government receiving grants under this subsection may lease the properties to nonprofit organizations and permit such organizations to rehabilitate as in rem property with funds provided under this subsection.".

(b) REQUIREMENT OF ADOPTION OF ORDINANCES AND PROCEDURES.—Section 104(b) of the Housing and Community Development Act of 1974 is amended—

(1) by striking "and" at the end of paragraph (5);

(2) by redesignating paragraph (6) as paragraph (7); and

(3) by inserting after paragraph (5) the following new paragraph:

"(6) the grantee has adopted the necessary ordinances and administrative procedures to ensure that vacant properties that are taken through in rem proceedings, held by the grantee, and suitable for housing, are conveyed to public or private nonprofit agencies that—

"(A) serve homeless individuals and families or persons at risk of becoming homeless (as defined in section 3 of the Permanent Housing for Homeless Americans Act of 1989); and

"(B) can demonstrate a sound plan for rehabilitating (if necessary) and operating such properties for the purpose of providing permanent decent and affordable housing units; and".

SEC. 10. ANNUAL REPORT.

Not later than December 31 of each year, the Secretary shall submit an annual report to the Congress. The report shall include—

(1) a comprehensive and detailed description of the activities carried out and accomplishments achieved under the provisions of and amendments made by this Act;

(2) an assessment of the extent and nature of the lack of affordable housing for the homeless and persons at risk of becoming homeless;

(3) an assessment of the level of Federal assistance needed to fully meet the housing needs of the homeless and persons at risk of becoming homeless; and

(4) any recommendations of the Secretary.

SEC. 11. FUNDING AVAILABILITY.

(a) CALCULATION.—The amounts authorized in the provisions of and amendments made by this Act shall be in addition to any amount authorized or appropriated for the programs involved before the date of the enactment of this Act.

(b) AVAILABILITY UNTIL EXPENDED.—Any amount appropriated under an authorization in the provisions of and amendments made by this Act shall remain available until expended.

SEC. 12. REGULATIONS AND EFFECTIVE DATE.

(a) REGULATIONS.—No later than 60 days after the date of enactment of this Act, the Secretary shall issue any regulations that

are necessary to carry out the provisions of, and amendments made by, this Act.

(b) EFFECTIVE DATE.—This Act, and the amendments made by this Act, shall take effect immediately upon enactment.

● Mr. METZENBAUM. Mr. President, I am pleased to join my colleagues in introducing the Permanent Housing for Homeless Americans Act of 1989.

This bill attacks what every major study has defined as the primary cause of homelessness in America today—the lack of decent and affordable housing.

Some estimates place the number of homeless in the United States as high as 3 million.

They are living in campgrounds, in the streets, or in shelters that are overburdened and understaffed. Many of them have jobs, but do not make enough money to afford a simple roof over their heads.

In this day and age Mr. President, in this country with all its wealth and potential, we should be ashamed of the fact that there are 3 million of us who cannot even afford a place to sleep at night.

What's worse is the fact that one out of every four homeless persons is a child.

That is a national disgrace.

The crisis of homelessness is the inevitable result of drastic cuts in Federal low-income housing assistance over the past 8 years.

Budget authority for housing plummeted from $30 billion in 1981 to less than $8 billion in 1989.

Eight years ago, federally funded housing programs added 10,000 units of new assisted housing in my own State of Ohio alone.

Last year we built that many nationwide.

No program has been defunded, deemphasized and forgotten as has housing. In the course of 8 years, our 50 year, bipartisan commitment to housing the poor was reduced to little more than a budget cutting statistic in the textbook of Reaganomics.

In addition to the 3 million homeless, there are another 3 million renter households with incomes below $5,000. They spend more than 70 percent of their incomes for rent. These are families who live on the edge of eviction. If we fail to act in their behalf, we could more than double the number of homeless Americans in the very near future.

A new report using Census Bureau and Congressional Budget Office figures found that two-thirds of the Nation's poor renters spend more than half their incomes for rent.

The study found there are 3.7 million fewer low-cost units available than are needed.

That need is reflected in every major city in the country.

Last year, 27 of the Nation's largest cities registered an increase in the demand for assisted housing. Yet, 17 of these cities stopped accepting applications for assisted housing because of the excessive length of waiting lists.

In Ohio alone, 38,000 people wait on lists for public housing.

Mr. President, the Permanent Housing for Homeless Americans Act would increase the supply of federally assisted housing by 140,000 units in each of the next 2 years, and reserve those units for the homeless, for people in imminent danger of becoming homeless, and for families with income at or below 50 percent of the area median.

Specifically, the bill provides $700 million in each of the next 2 years for additional section 8 assistance; $500 million for rental rehabilitation grants; and $300 million under the community development block grant program to convert run-down properties held by local governments into affordable housing for the homeless.

Of paramount importance, the bill provides $500 million in each of the next 2 years to modernize vacant, boarded-up public housing units.

This is a modest bill. It is a drop in the bucket given the magnitude of the homeless problem.

Two years ago, Congress enacted the Stewart B. McKinney Homeless Assistance Act, the major piece of homeless legislation now on the books. That law provides grants for homeless shelters, alcohol and drug abuse programs, mental health services, feeding programs, and many other initiatives.

The McKinney Act is a very important legislative accomplishment.

But it does not address the critical issue of providing permanent housing for the homeless. This bill does.

The 101st Congress promises to be significiant in terms of producing new housing legislation for homeowners, moderate-income renters, disabled persons, senior citizens, residential developers and others.

But, we should not forget those who need help the most—3 million people who do not even have a roof over their heads.

We must make a major commitment to stem the tide of homelessness, and this bill is an important first step in that direction.●

By Mr. JEFFORDS (for himself and Mr. LEAHY):

S. 1035. A bill to restrict certain uses of chlorofluorocarbons to protect the ozone layer in the stratosphere, and for other purposes; to the Committee on Environment and Public Works.

STRATOSPHERIC OZONE LAYER PROTECTION ACT

Mr. JEFFORDS. Mr. President, I rise today to introduce, along with Senator LEAHY, legislation that will challenge this Congress, and our domestic automobile and air-conditioning industry, to take the necessary steps to solve our global warming crisis.

I want to give credit where credit is due for this innovative legislation. Faced with mounting evidence about the threat of global warming, Vermont proved once again that it is willing to take bold action and set an example for the rest of the Nation.

The legislation we are introducing here today is modeled upon a bill approved by the Vermont Legislature last month that is about to be signed into law.

It was the intent of the State of Vermont that this approach become part of a comprehensive strategy to address stratospheric ozone depletion. That is also my hope.

The intent is clear. This meant as a challenge to automakers and coolant manufacturers to develop substitutes to the ozone-depleting CFC's used in automobile air-conditioners. Specifically, this legislation would ban after 1993 the sale or export of domestically produced automobiles equipped with air-conditioners using destructive CFC's.

CFC-12, the compound used in mobile source air-conditioners, has the highest ozone depleting potential of any of the CFC compounds. Two factors are responsible: The large amount of CFC-12 produced and the relatively large ozone depletion potential per molecule.

According to the World Resources Instititue, 450 million tons of CFC-12 were produced worldwide in 1985. At least 75 million metric tons of this production was used in automobile air-conditioners. Motor vehicle air-conditioners are particularly worrisome because large amounts of CFC-12 are released during routine maintenance.

This legislation would attack the problem in several steps. By 1991, automotive repair shops performing service on air-conditioners would be required to install equipment to extract and reclaim coolant from motor vehicle air-conditioners. Sales of CFC coolants in small containers would also be prohibited after January 1991. Finally, beginning in model year 1993, sale or export of motor vehicles equipped with air-conditioners using CFC's would be banned.

Most of the CFC's used in automobile air-conditioners ends up in the cars on American highways. Up to 90 percent of the new cars sold in this country are equipped with air-conditioners.

The debate over whether CFC's destroy the ozone layer was resolved a decade ago, when this Nation banned the use of CFC propellants in aerosol containers. Industry met the challenge.

Since then we find that styrofoam containers manufactured without the use of destructive CFC's are available nationwide. Industry met that challenge.

We will continue to hear arguments, as did the Vermont Legislature, over whether this new challenge can be met. I predict that it will be met.

I also challenge this Congress, and indeed this country, to examine environmental policy in terms of our world leadership. I would like the challenge of good environmental diplomacy to be met. This legislation could help place our Nation on the cutting edge of research and development in the use of safer coolants.

Enactment of this legislation would put the world on notice that the United States is willing to take a leadership role in addressing global environmental problems; and indeed to meet the greatest environmental challenge we face today, that of CFC's and depletion of the ozone layer.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1035

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Stratospheric Ozone Layer Protection Act".

SEC. 2. MOTOR VEHICLE AIR CONDITIONING

(a) CERTIFICATION OF EQUIPMENT.—Within 90 days after the date of enactment of this Act, the Secretary of Commerce (hereinafter referred to as the "Secretary") shall issue regulations which provide that on or after January 1, 1991, no person shall perform service on a motor vehicle air conditioner, including installation, maintenance, and repair service, for consideration, unless such person uses equipment which is certified as meeting the standards set by the Society of Automotive Engineers for the extraction and reclamation of a refrigerant from motor vehicle air conditioners by any of the following—

(A) the National Institute of Standards and Technology,

(B) the Underwriters Laboratories, or

(C) an entity which the Secretary of Commerce determines to be comparable to the entities described in subparagraphs (A) or (B).

(b) SCHEDULE FOR ACQUISITION AND USE OF EQUIPMENT AND DOCUMENTATION OF SUCH USE.—(1) Within 90 days after the date of enactment of this Act, the secretary shall issue regulations which establish a phased schedule of deadlines which indicates the dates by which the equipment described in subsection (a) shall be acquired by entities which perform service for consideration on motor vehicle air conditioners, or by entities which intend to perform such service.

(2) In establishing the schedule under paragraph (1), the Secretary shall—

(A) set an earlier deadline for any entity which performs a high volume of service on motor vehicle air conditioners, as determined by the Secretary, and

(B) provide that all entities which perform service for consideration on motor vehicle air conditioners, or which intend to perform such service, shall, on or after January 1, 1991, have such equipment operational and in use for any such service.

(c) DOCUMENT ON REQUIREMENTS.—Within 90 days after the date of enactment of this Act, the Secretary shall issue regulations which require that any entity described in subsection (b)(1) shall document, commencing 30 days after the date of issuance of such regulations, on a form for a period of time determined by the Secretary, provided by the Department of Commerce, the following—

(A) the number of motor vehicle air conditioners repaired or otherwise serviced by such entity,

(B) the amount of chloroflourocarbons (hereinafter referred to as CFC's) purchased by such entity, and

(C) the amount of CFC's sold by such entity.

(d) RESTRICTION ON THE SALE OF CFC'S—(1) On or after October 1, 1989, or 30 days after the date of enactment of this Act, whichever is later, no person shall sell a chloroflourocarbon coolant (hereinafter referred to as a CFC coolant) in a container which contains less than 15 pounds of such coolant if such container is not marked with a warning label which indicates the danger that such CFC coolant poses to the ozone layer in the stratosphere.

(2) On or after January 1, 1991, no person shall sell or offer for sale any—

(A) any CFC coolant which is suitable for use in a motor vehicle air conditioner for any use other than commercial or industrial use, and

(B) any CFC coolant that is suitable for use in a motor vehicle air conditioner in a container containing less than 15 pounds of such coolant.

(e) RESTRICTIONS ON THE SALE OF MOTOR VEHICLES WITH AIR CONDITIONERS THAT USE CFC'S.—(1) No motor vehicle with a model year of 1993 or later may be sold to a consumer or dealer in any State or Territory of the United States if such motor vehicle contains an air conditioner that uses CFC's.

(2) No motor vehicle with a model year of 1993 or later may be exported for sale outside of the United States if such vehicle contains an air conditioner that uses CFC's.

SEC. 3. REPORTS.

(a) STUDY AND REPORT ON CHEMICALS THAT DEPLETE THE OZONE LAYER IN THE STRATOSPHERE.—The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall, not later than January 15, 1990, or 90 days after the enactment of this Act, whichever is later, conduct a study and issue a report to the Congress which contains the following:

(1) An analysis of the uses, within the United States, of chemicals which deplete the ozone layer in the stratosphere.

(2) A discussion of uses, as substitutes for the chemicals described under paragraph (1) to accomplish the uses under paragraph (1), of alternative chemicals which do not deplete such ozone layer. Such discussion shall include—a discussion of the advantages and disadvantages of such alternative chemicals in terms of—

(i) the potential impact of the use of such chemicals on the ozone layer in the stratosphere, and

(ii) other potential health and environmental impacts attributable to the use of such chemicals.

(3) Opportunities for recovery and recyling of the chemicals described in paragraph (1); and

(4) Recommendations by the Administrator, based on the information described in paragraphs (1) through (3).

(b) STUDY REPORT ON RETRIEVAL, STORAGE AND REUSE OF CFC'S.—The Administrator, shall, not later than January 15, 1991, conduct a study and issue a report to the appropriate committees of the House of Representatives and the Senate which contains recommendations concerning ways to accomplish the systematic retrieval, storage, and appropriate reuse of CFC's from refrigerators, air conditioners, and motor vehicles that face immediate disposal. Such report shall consider, but shall not be limited to, the use of the following—

(A) regional removal centers for CFC's,

(B) circuit riding removal equipment for CFC's, and

(C) other appropriate removal procedures or equipment for CFC's.

(c) STUDY AND REPORT ON THE CONDITION OF THE STRATOSPHERE.—The Administrator shall, not later than January 15, 1992, conduct a study and issue a report to the Congress. Such report shall contain the following:

(1) An assessment of the condition of the ozone layer in the stratosphere and the most current information concerning the causes of such condition.

(2) An assessment of the status of the development and completion of production of motor vehicles which employ air conditioners that use refrigerants other than CFC's by manufacturers of motor vehicles in the United States.

(3) Recommendations by the Administrator concerning the assessments under paragraphs (1) and (2).

SEC. 4. PUBLIC INFORMATION.

The Secretary and the Administrator shall consult with the following to publicize the provisions of this Act:

(1) Motor vehicle dealers.

(2) Business organizations related to the sales and use of motor vehicles.

(3) Other entities that the Secretary or the Administrator determines to be appropriate.

SEC. 5. DEFINITION.

As used in this Act, the term "motor vehicle" has the meaning given for such term under section 1(3) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1381(3)).

Mr. LEAHY. Mr. President, I wish to congratulate the distinguished Senator from Vermont [Mr. JEFFORDS], in his legislation. I think it is superb legislation. It reflects certainly a feeling in our own State of Vermont. Our legislature of Vermont has tried to take similar steps at the State level.

I would hope that the legislation of the distinguished Senator from Vermont will encourage other States to move quickly in that regard.

This is a problem where if all of us could wave a magic wand we would stop it today. The time has run out that much.

I think the distinguished Senator from Vermont deserves the strong praise throughout the country for the action he has taken today. I am pleased to be a cosponsor.

By Mr. LEAHY (for himself, Mr. HEFLIN, Mr. MCCONNELL, Mr. PRYOR, Mr. BOREN, Mr. HARKIN, Mr. CONRAD, Mr. FOWLER, Mr. DASCHLE, Mr.

BAUCUS, Mr. KERREY, Mr. MITCHELL, Mr. BURDICK, Mr. BUMPERS, Mr. SPECTER, Mr. FORD, Mr. PRESSLER, Mr. GORE, Mr. SASSER, Mr. GRASSLEY, Mr. EXON, Mr. LEVIN, Mr. BRYAN, Mr. SARBANES, Mr. LOTT, Mr. SANFORD, Mr. KOHL, Mr. SHELBY, Mr. MATSUNAGA, Mr. BENTSEN, and Mr. ADAMS):

S. 1036. A bill to improve the economic, community, and educational well-being of rural America, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL PARTNERSHIPS ACT

Mr. LEAHY. Mr. President, I stand before my colleagues today with a special pride because I am here to introduce legislation that is close to my heart and close to my home State of Vermont.

Like the other distinguished Senator from Vermont who is here, we come from one of the most rural States in the Nation.

I am especially privileged to be here today to introduce the "Rural Partnerships Act of 1989" which represents comprehensive rural development legislation under the jurisdiction of the Agriculture Committee.

Mr. President, this is a critical time. We cannot afford two Americas—one that prospers and one that does not; because today we do have a second America, an America in decline and that is rural America, the wellspring of our Nation. Our whole society came from rural America, and now we find two-thirds of this country seems to be turning its back on its heritage.

It is not enough for Presidential motorcades to make stops in our rural towns carrying candidates who make promises that will never be fulfilled. It is time to take action before it is too late. If we wait too long, the rural America we all point to as the place of our heritage will not be there.

The people will not be there because the jobs will not be there.

We have to act and act now.

It is time to invest in our future and our people. This bill makes three investments in rural America. First, it invests in small businesses by providing revolving loan funds to generate capital for new jobs in rural America.

Second, it invests in rural infrastructure by providing funds for the water and sewer needs of rural communities and for modern telecommunications.

Third, and most importantly, the bill invests in human capital needs by providing for job training, and loans to low-income facilities and organizations to improve access to health and nutrition services.

Mr. President, for too long candidates of both parties have gone into rural America and used that as a backstop to say, "Here are the values of our Nation." They get photographed and then their motorcade leaves.

We cannot allow people of either party to do that. We have to say, "Once you have come to rural America and recognized the values that we hold for this Nation—the values of honesty, neighborliness, of helping each other, of self-determination, of innovative character—once you have recognized that, you must stay and help us have it continue."

I do not want to see, Mr. President, that maybe the last generation of rural America is coming along in many parts of our Nation. The boys and girls who are graduating from high school in rural America will have to leave because nothing is there for them.

This is a critical time now that all Members of the Senate must stand up and say we really appreciate what rural America is about, and we want to preserve what is best for rural America. This legislation will really put each one of us on record: Are we here and willing to protect the best interests of rural America or are we going to turn our backs on it and have rural America unalterably changed as we go into the next century?

So I want to laud the people who have helped this effort: Senator LUGAR, who has introduced his own creative legislation; Senator HEFLIN, the chairman of the Rural Development Subcommittee, who is leading in efforts to ensure adequate water supplies; the distinguished Senator from Kentucky [Mr. MCCONNELL], a key cosponsor and ranking member of the Rural Development Subcommittee, a leader on rural development, especially for Rural Electric Cooperatives. His support has been critical.

I also want to acknowledge Senator CONRAD, who first proposed the Rural Development Task Force; Senator PRYOR, Senator BOREN, Senator DASCHLE, Senator HARKIN, and Senators BAUCUS and BOSCHWITZ who have together introduced legislation to help rural businesses and improve telecommunications, as well as Senator FORD who sponsored legislation to gather vital census data on rural income and employment.

I also thank our distinguished leader, Senator MITCHELL, who was willing to appoint a rural development task force, joined in by the distinguished Republican leader, Senator DOLE, and set aside political considerations and partisan considerations, to say that the Senate wish is to move. Thirty-four Senators have joined the task force.

The Rural Partnerships Act of 1989 represents a broad consensus in the Agriculture Committee, as well as in the Senate. Mr. President, more than 20 Senators are cosponsoring this legislation with me.

Now Senator MITCHELL has informed me that he—with the cooperation of Senator DOLE—will move this legislation onto the floor in late June.

It is, therefore, my intention to move the "Rural Partnerships Act of 1989" through the Agriculture Committee in early June in order to accommodate the floor schedule.

Mr. President, this is an ambitious schedule we are undertaking in our committee, but I believe it is essential to ensure that the Senate passes rural development legislation this year.

This legislation is designed to address a series of problems in rural America. The first problem is availability of credit for rural businesses.

The bill establishes a revolving loan fund that will help small businesses that have difficulty securing conventional bank financing get adequate financing to start or save rural businesses.

Revolving loan funds have been successful all over the country—including Vermont.

These revolving funds will be established through a Board made up of the Administrators of the Farmers Home Administration, the Rural Electrification Administration, the Extension Service, and two appointed members.

All types of entities can apply for the funds—States, local government, economic development districts, and private nonprofits, to name some of the eligible parties. Every organization involved in rural development can apply.

These partnerships will work in conjunction with State and local governments to complement ongoing development plans.

In approving applications, the Board will grant preference to applications that are consistent with State, county or local goals in economic growth and community development.

States are eligible for up to $1.2 million in funds, while other parties can receive up to $750,000.

To be eligible for a revolving fund, applicants must match these funds 100 percent with their own sources or obtain commitments from banks or other financial sources to qualify for the match requirement.

Certain exceptions exist for applicants serving economically distressed counties.

Each loan, however, made by the revolving fund must be matched 100 percent by bank financing.

Although it is difficult for some communities to match federal dollars, this requirement is very important for two reasons.

First, requiring a bank match means that a private lender will be judging the soundness of each loan.

Second, private sector funds will be leveraged in this process in a way that otherwise would not have occurred.

Because the operator of the revolving fund can also incorporate funds from other sources, the amount of lev-

eraging on each Federal dollar is actually unlimited. It could be as high as 10 to 1.

Each loan would be limited to $250,000 from the Federal share of the revolving fund, but could include unlimited financing from other sources outside the fund.

Other provisions in the bill include new authority for REA to: First, finance business incubators; second, fund water and sewer loans; third, establish telecommunications systems for rural schools, hospitals and businesses; and fourth, use cooperative funds to finance other rural development projects.

Additional water and sewer financing would be provided by: First, increasing grants for poorer communities under FmHA; second, giving the farm credit system cooperative banks the authority to originate water and sewer loans for communities; and third, providing small grants and loans for emergency water and other infrastructure problems.

I am including a summary of the legislation with my statement, Mr. President.

I am excited about the opportunities that this legislation provides for rural America. I look forward to working with my colleagues on the committee and in the Senate—and with the Senate leadership—to enact this bill. I want to thank our leadership for their support and cooperation in this bipartisan effort.

Mr. President, I ask unanimous consent that the text of the bill and a short summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1036

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Partnerships Act of 1989".

SEC. 2. TABLE OF CONTENTS.

The table of contents is as follows:

Sec. 1. Short title.
Sec. 2. Table of Contents.
Sec. 3. Findings and purpose.
Sec. 4. Definitions.

TITLE I—RURAL BUSINESS AND JOB CREATION

Subtitle A—Rural Partnerships Investment Board

Sec. 101. Rural Partnerships Investment Board.
Sec. 102. Establishment of Investment Fund.
Sec. 103. Local revolving funds.
Sec. 104. Complance and enforcement.

Subtitle B—Rural Economic Development Administered by the Rural Electrification Administration

Sec. 110. Assistant Administrator for Economic Development.
Sec. 111. Technical assistance unit.
Sec. 112. Deferment of payment on economic development loans.
Sec. 113. Water and waste facility financing.
Sec. 114. Targeting investments by electrification borrowers.
Sec. 115. Rural economic development.
Sec. 116. Promoting rural development by REA telephone borrowers.

TITLE II—ENHANCING HUMAN RESOURCES

Sec. 201. Rural star schools educational opportunities program.
Sec. 202. Rural medical link telecommunications program.
Sec. 203. Rural business link telecommunications program.

TITLE III—FOCUS ON RURAL AMERICA BY THE DEPARTMENT OF AGRICULTURE

Sec. 301. Extension Service.
Sec. 302. Rural development assistance information and availability.
Sec. 303. Report on coordination of rural development activities.
Sec. 304. Report on data processing feasibility in rural areas.

TITLE IV—RURAL BUSINESS AND EMPLOYMENT ASSISTANCE

Sec. 401. Local technical assistance grants.
Sec. 402. Providing assistance through local governments and nonprofit private corporations.
Sec. 403. Rural technology assistance grants.
Sec. 404. Rural emergency assistance loans.

TITLE V—NATIONAL RURAL INFORMATION CENTER CLEARINGHOUSE

Sec. 501. National rural information center clearinghouse.

TITLE VI—WATER AND SEWER ASSISTANCE.

Sec. 601. Water and waste facility grants.
Sec. 602. Emergency community water assistance grant program.
Sec. 603. Loan rates applicable to health care and related facilities.
Sec. 604. Rural waste water treatment circuit rider grant program.

TITLE VII—MISCELLANEOUS

Sec. 701. Monitoring the economic progress of rural America.
Sec. 702. Historic preservation requirements.
Sec. 703. Sewer and water lending by banks for cooperatives.
Sec. 704. Employment and training in rural areas.
Sec. 705. Vehicles necessary to haul fuel or water.
Sec. 706. Assistance to communities dependent on natural resources.
Sec. 707. Assisting distressed rural hospitals and health care facilities.

TITLE VIII—EFFECTIVE DATE AND IMPLEMENTATION

Sec. 801. Effective date.

SEC. 3. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) the economic well-being of rural America is vital to overall national growth and prosperity;

(2) many rural areas suffer from a lack of industrial and business diversity;

(3) rural poverty and unemployment rates are significantly higher than metropolitan rates, and rural per capita income is substantially lower than metropolitan per capita income; and

(4) a more robust rural economy will make the United States more competitive in world markets.

(b) PURPOSE.—It is the purpose of this Act to promote a national rural development strategy, through procedures flexible enough to allow for regional and local differences, to promote the growth and economic diversification of rural America, and to increase business, educational, and employment opportunities in rural America.

SEC. 4. DEFINITIONS.

As used in this Act:

(1) BOARD.—The term "Board" means the Board of Directors of the Rural Partnerships Investment Board established in section 101(b).

(2) ELIGIBLE ENTITY.—The term "eligible entity" means a corporation that—

(A) is a nonprofit private corporation or a public entity that is—

(i) the governing body of each public regional organization (such as the governing body of an economic development district) that is chartered or otherwise organized under State law for the purpose of promoting economic development;

(ii) the agency of each State that is primarily responsible for rural economic development programs within the State;

(iii) the governing body of a county or other political subdivision of a State;

(iv) the governing body of a town or township within a State;

(v) an incorporated public organization or a nonprofit private community development corporation, or similar nonprofit private organization, that is chartered or otherwise organized under State law for the purpose of promoting economic development; or

(vi) an Indian tribe (as defined in section 4(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b)), any Indian organization or entity chartered under the Act of June 18, 1934 (25 U.S.C. 1001 et seq.) commonly known as the "Indian Reorganization Act", or any tribal organization (as defined in the section 4(c) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(c)); and

(B) meets the requirements of paragraphs (3) and (5) of section 102(c);

(C) possesses the powers reasonably necessary to perform the functions and activities described in this subtitle;

(D) has a professional staff and management ability (including adequate accounting, legal, and business servicing abilities or experience); and

(E) meets any other requirements established by the Board to carry out this subtitle.

(3) INVESTMENT BOARD.—The term "Investment Board" means the Rural Partnerships Investment Board established in section 101(a).

(4) LOCAL BUSINESS.—The term "local business" means—

(A)(i) a business concern, located in a rural area, that—

(I) is incorporated under State law; and

(II) is independently owned and operated as defined by the Board; and

(ii) an individual who plans to organize and operate an entity of the type described in subparagraph (A); and

(B) that meets additional requirements that are established by the Board to carry out the intent of this Act.

(5) METROPOLITAN COUNTY.—The term "metropolitan county" means a county that contains at least a part of a metropolitan statistical area as designated by the Office of Management and Budget.

(6) RURAL AREA.—The term "rural area" means all territory of a State that is not within a metropolitan statistical area or the outer boundary of any city or town having a population of 20,000 or more based on the latest dicennial census of the United States.

(7) RURAL FUND.—The term "Rural Fund" means the Rural Business Investment Fund established under section 102(a).

(8) SECRETARY.—The term "Secretary" means the Secretary of Agriculture, unless otherwise specified in this Act.

(9) STATE.—The term "State" means any of the 50 States.

TITLE I—RURAL BUSINESS AND JOB CREATION

Subtitle A—Rural Partnerships Investment Board

SEC. 101. RURAL PARTNERSHIPS INVESTMENT BOARD.

(a) ESTABLISHMENT.—There is established a "Rural Partnerships Investment Board" to provide lines of credit to eligible entities whose applications have been approved by the Board, to enable such entities to establish, maintain, or expand revolving funds that are used for loans, or to guarantee loans, or for other investments in new or expanding rural local businesses in conjunction with loans or other investments made by banks (as defined in section 2(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(c))), savings and loan associations (as defined in title IV of the National Housing Act, as amended (12 U.S.C. 1724 et seq.)), or community development credit unions.

(b) BOARD OF DIRECTORS.—

(1) IN GENERAL.—The Board of Directors of the Investment Board shall consist of—

(A) the Administrator of the Rural Electrification Administration;

(B) the Administrator of the Farmers Home Administration;

(C) the Administrator of the Extension Service of the Department of Agriculture; and

(D) two members who shall be experienced in rural development and related matters to be appointed by the President with the advice and consent of the Senate, of which each member shall be from a separate political party.

(2) CHAIRPERSON.—The Chairperson of the Board shall be elected by the members of the Board from among the Board members who are Administrators under subparagraphs (A) through (C) of paragraphs (1), and shall serve for a 2 year period. Such Chairperson may serve consecutive terms.

(3) VACANCIES.—Vacancies on the Board shall be filled in the same manner as the vacant position was previously filled.

(4) CHIEF EXECUTIVE OFFICER.—A chief executive officer shall be selected by the Board and shall serve at the pleasure of the Board.

(5) QUORUM.—A quorum shall consist of three members of the Board. All decisions made by the Board shall require an affirmative vote of a majority of the members.

(6) COMPENSATION.—Members of the Board—

(A) appointed under subparagraphs (A), (B), and (C) of paragraph (1) shall receive reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States; and

(B) appointed under subparagraph (D) of paragraph (1) shall receive compensation for the time devoted to meetings and other activities at a daily rate not to exceed the daily rate of compensation prescribed for Level III of the Executive Schedule under section 5314 of title 5, United States Code, and reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States.

(7) RULES AND RECORDS.—The Board shall adopt such rules and procedures as it may consider appropriate for the transaction of the business of the Investment Board, and shall keep permanent and accurate records and minutes of its acts and proceedings.

(c) POWERS OF THE INVESTMENT BOARD.—The Investment Board shall be a body corporate that shall have the power to—

(1) operate under the direction of its Board;

(2) adopt, alter, and use a corporate seal, which shall be judicially noted;

(3) provide for one or more officers, employees, and agents, as may be necessary, define their duties, and require surety bonds or make other provisions against losses occasioned by acts of such persons;

(4) hire, promote, compensate, and discharge officers and employees of the Investment Board, without regard to title 5, United States Code, except that no such officer or employee shall receive an annual rate of basic pay in excess of the rate prescribed for Level III of the Executive Schedule under section 5314 of title 5, United States Code;

(5) prescribe by its Board its bylaws, that shall be consistent with law, and that shall provide for the manner in which—

(A) its officers, employees, and agents are selected;

(B) its property is acquired, held, and transferred;

(C) its general operations are to be conducted; and

(D) the privileges granted by law are exercised and enjoyed;

(6) with the consent of any executive department or independent agency, use the information, services, staff, and facilities of such in carrying out this subtitle;

(7) enter into contracts and make advance, progress, or other payments with respect to such contracts;

(8) sue and be sued in its corporate name, and complain and defend in courts of competent jurisdiction;

(9) acquire, hold, lease, mortgage, or dispose of, at public or private sale, real and personal property, and otherwise exercise all the usual incidents of ownership of property necessary and convenient to its operations;

(10) modify or consent to the modification of any contract or agreement to which it is a party or in which it has an interest under this subtitle;

(11) make such rules and regulations as the Board determines necessary and appropriate to carry out the authority vested in the Board under this act;

(12) procure the temporary (not in excess of 2 years) or intermittent services of experts or consultants or organizations thereof, and in such cases such services shall be without regard to the civil service and classification laws and without regard to section 5 of title 41, at rates not to exceed the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, including traveltime, and while such individual is away from the home or regular place of business of such individual, travel expenses as authorized under section 5703 of title 5, United States Code; and

(13) exercise other powers as set forth in this subtitle, and such other incidental powers as are necessary to carry out its powers, duties, and functions in accordance with this subtitle.

SEC. 102. ESTABLISHMENT OF INVESTMENT FUND.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established in the Treasury of the United States a fund for the use of the Board in carrying out the provisions of this subtitle that shall be known as the "Rural Business Investment Fund".

(2) AVAILABILITY.—The Fund established under paragraph (1) shall be available to the Board to provide lines of credit for revolving funds to be operated by approved eligible entities to serve local businesses in rural areas.

(b) USE.—

(1) LINES OF CREDIT.—Amounts contained in the fund established under subsection (a) shall be used by the Board to provide lines of credit in amounts determined appropriate by the Board, but in no event shall any such line of credit exceed $750,000 to an approved eligible entity. Each line of credit shall be made available over a period of time established by the Board for each such entity, but in no event shall any such period of time extend beyond the date on which the Investment Board is terminated under section 103(m).

(2) EXCEPTION.—Notwithstanding paragraph (1), if the approved eligible entity is the agency of any State that is primarily responsible for the rural economic development programs within such State, and if such agency agrees to serve all rural areas of the State regarding assistance provided under this subtitle, the Board may provide a line of credit to such agency in an amount that shall not exceed $1,250,000, to be provided in the manner described in paragraph (1).

(3) AMOUNTS DRAWN FROM LINE.—Amounts drawn from each line of credit by each approved eligible entity shall be used solely as provided under this subtitle.

(c) APPLICATIONS OF ELIGIBLE ENTITIES FOR LINES OF CREDIT.—

(1) FEDERAL REGISTER NOTICES.—The Board shall publish notices of solicitations for applications for lines of credit in the Federal Register and such notices shall contain—

(A) the application procedures established by the Board;

(B) the application requirements of paragraph (3);

(C) the deadlines for submission of applications (which in no event shall be less than 150 days after the publication of the applicable notice);

(D) a copy of all available response forms;

(E) a summary of the functions of the Board regarding applications; and

(F) other information determined appropriate by the Board.

(2) SUBMISSION AND CONSIDERATION.—An eligible entity that desires to receive a line of credit under this subtitle shall submit an application to the Board at such time, in such form, and containing such information and documentation, including a description

of the areas to be served, as the Board shall prescribe under paragraph (1), and the Board shall consider each such application based on the requirements of this subtitle.

(3) ELIGIBLE ENTITY.—

(A) MATCHING FUNDS.—In order for an application to be considered for approval by the Board for a line of credit, each eligible entity that submits an application shall—

(i) certify in writing that it shall use such funds as part of a revolving fund to invest in, lend funds to, or guarantee loans made to, local businesses in accordance with this subtitle; and

(ii)(I) agree to provide matching funds (Federal funds shall not be used to satisfy such matching requirement), in amounts that are at least equal to the amount of the line of credit to be provided by the Board, that shall be in the form of—

(aa) cash or cash equivalents; or

(bb) letters of credit in favor of the eligible entity issued or submitted by banks, savings and loan associations, insurance companies, similar Federally regulated financial institutions, local or State governments or private philanthropic foundations, as determined appropriate and acceptable by the Board; or

(II) demonstrate, through procedures determined appropriate and acceptable by the Board, that banks, savings and loan associations, or community development credit unions are prepared to participate with the eligible entity in a lending, guarantee, or investment program for the benefit of local businesses, and that the total financial commitment demonstrated by the letters of intent or other documents is at least equal to the value of the line of credit for which the eligible entity is applying.

(B) EXCEPTION FOR CERTAIN ELIGIBLE ENTITIES.—If the average per capita income level of the counties containing the rural areas served by an eligible entity is less than 70 percent of the national average per capita income for the most recent year for which such information is available, each such eligible entity shall only be required to match 50 percent of the funds provided by the Board in the same manner described in paragraph (3)(A)(ii)(I) or (II). A list of the average per capita income and population of each county in the United States that contains rural areas, and the national average per capita income for such year, shall be published in the Federal Register and otherwise made available by the Board to the public.

(4) MONITORING COMPLIANCE.—The Board shall establish procedures to monitor the compliance of each eligible entity participating in the program authorized by this subtitle with the requirements of this subtitle.

(5) ELIGIBLE ENTITY REVOLVING FUND REQUIREMENT.—To be eligible to receive a line of credit from the Rural Fund, the applicant eligible entity shall—

(A) demonstrate its ability or potential capacity to make sound business, lending and investment decisions and to provide business counseling and technical assistance;

(B) demonstrate its ability to operate consistent with the requirements of this subtitle and to increase the availability of credit in rural areas to promote the creation or expansion of viable businesses in rural areas;

(C) identify the proposed service area, which shall have common characteristics (such as a similar industrial, labor, or other markets, similar geographic or socioeconomic conditions, or other related considerations), and, to the extent that such area includes any towns or townships, such towns or townships shall be served in their entirety; and

(D) provide an assurance that its service area will consist of an area within the State whose median household income was less than the Statewide nonmetropolitan median household income for such State, except that if the exception described in subsection (b)(2) is applicable, the requirements of subparagraphs (C) and (D) shall not apply.

(6) FACTORS IN APPROVAL OF APPLICATIONS.—In determining which applications to approve, and the maximum amount of funds to be offered in each line of credit, the Board shall grant a preference to eligible entities—

(A) that have experience in serving local credit or equity needs and in making sound business and investment decisions, or that have the ability to serve such needs and make such decisions;

(B) whose boards of directors, or governing bodies if no such board exists, are composed of a cross-section of individuals (such as individuals with a business, community development or regional development background, or individuals who are State, local or county government officials, or individuals involved in banking, financial, or other investment activities);

(C) that agree, and are able, to provide funds that are in excess of the funds to be provided by the Board to such eligible entity under this subtitle;

(D) that are likely to stimulate significant job creation or retention and new business creation or business expansion per dollar of funds provided under this section;

(E) that submit applications that demonstrate the ability and willingness to provide continuing technical and management assistance, training, financial and business guidance, and planning, to approved local businesses;

(F) that demonstrate that the activities of the eligible entity are consistent with State, county or local goals, whichever is applicable, regarding long-term economic growth and community development; and

(G) that submit applications containing a comprehensive investment strategy, developed in consultation with the applicable State, regional, county or local unit of government.

(7) GEOGRAPHIC SPREAD.—

(A) IN GENERAL.—In awarding lines of credit under this section the Board shall attempt, as much as reasonably practicable and consistent with sound financial judgment, to assure that all rural regions of the United States benefit from such awards.

(B) MINIMUM AMOUNT OF FUNDS.—After considering the availability of qualified applications, and if consistent with good investment practices and the other requirements of this subtitle, the Board shall approve the application of at least one eligible entity in each of at least 45 States. The Board shall, to the maximum extent practicable and appropriate, ensure that eligible entities that are approved by the Board in any given State receive at least $750,000 (per State) out of the funds provided under subsection (d).

(C) MAXIMUM AMOUNT OF FUNDS.—The total amount of funds provided under this subtitle to eligible entities in any State shall not exceed $10,000,000.

(D) SPECIAL PROGRAM.—

(i) IN GENERAL.—The Board shall issue regulations to establish a program that targets the benefits of the Federal lines of credit provided under this section to those rural areas and residents with special needs.

(ii) FIVE PERCENT RULE.—If consistent with sound investment practices, not less than 5 percent of the funds appropriated under subsection (d) shall be issued to eligible entities that will serve—

(i) local businesses located in very distressed rural areas, as defined by the Board; and

(ii) local businesses located in rural areas that provide beneficial services to rural residents such as improved medical, hospital, or health care, licensed day care activities, improved services for the handicapped, the disabled, the elderly or other needy individuals, improved educational opportunities, improved public transportation services for needy individuals, or other related services as determined appropriate by the Board.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $100,000,000 in each of fiscal years 1990 through 1992 to be made available to the Rural Fund and the Board for the purpose of carrying out this subtitle. Amounts appropriated under this subsection shall remain available until expended or until the Board is terminated.

(e) RELOCATION AND REFINANCING.—The Board shall establish rules and procedures to prohibit eligible entities from using the assistance received under this subtitle for loans and investments, or for issuing guarantees, that would—

(1) facilitate the relocation of a local business from one community to another; or

(2) refinance the existing debt of a local business, except that such refinancing may be undertaken with such assistance if it is undertaken in conjunction with a substantial expansion effort by the local business.

SEC. 103. LOCAL REVOLVING FUNDS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Each eligible entity approved by the Board to participate in the program established under this subtitle shall establish a local revolving fund account in which to deposit—

(A)(i) amounts received from the Board under this subtitle;

(ii) any local matching funds received under section 102(c)(3)(A); and

(iii) any profits or income derived from the activities of the revolving fund established under this subsection; less

(B) reasonable operating expenses or losses incurred in administering such fund.

(2) PLACE OF ESTABLISHMENT.—Each local revolving fund established under this subsection may be established in one or more member banks of the Federal Reserve System or any Federally insured State nonmember bank (as defined in section 3(b) of the Federal Deposit Insurance Act (12 U.S.C. 1813(b)) and the funds, except as used as authorized in subsection (b), shall be held in cash and receive interest or be invested in direct obligations of the United States or in obligations guaranteed by the United States or an agency thereof.

(b) USE OF FUND.—Amounts in the local revolving fund may be used—

(1) to provide debt or equity capital, or loan guarantees, to local approved businesses as authorized in this subtitle, under procedures established by the Board;

(2) to cover the costs of providing training, business or financial planning, or management or technical assistance to local approved businesses in amounts that do not

exceed amounts or levels described in standards established by the Board;

(3) if financial investments are made in the eligible entity in accordance with section 102(c)(3)(A)(ii)(I)(aa) or (bb), to provide for a return of capital to non-Federal investors in the revolving fund, except that if such revolving fund experiences capital or other losses the share of returned capital under this paragraph shall be proportionately, or otherwise appropriately reduced to reflect such loss, under procedures established by the Board; or

(4) to cover reasonable operating or capital expenses, losses, or for other charges as prescribed in rules or standards established by the Board.

(c) DECISIONS CONCERNING FUNDING.—Eligible entities that receive a line of credit under section 102 shall make case-by-case determinations concerning applications submitted by each local business for loans, equity capital or loan guarantees, under general procedures and requirements established by the Board.

(d) REQUIREMENT OF PARTNERSHIPS FOR LOANS OR INVESTMENTS—Funds in each local revolving fund shall be loaned or invested only if one or more banks, savings and loan institutions, or community development credit unions, under procedures established by the Board, provide at least 50 percent of each investment or loan made by each such revolving fund to each such local business, or provide the funds that are guaranteed by such local revolving fund.

(e) INVESTMENT SIZE LIMITS.—

(1) IN GENERAL.—Partnership loans, investments, and any guarantees made by each eligible entity that receives assistance from the Rural Fund, shall not exceed $500,000, in total, in any given calendar year, to the same approved local business or to other local businesses that are financially connected or otherwise related to such local business as defined by the Board. The provisions of this subtitle shall not limit the total amount of loans from sources other than eligible entities that each local business may receive.

(2) INELIGIBILITY.—Any local business that employs 100 or more employees, shall not be eligible to receive assistance from a local revolving fund that receives assistance under this subtitle.

(f) SUBORDINATED INTEREST OF LOCAL REVOLVING FUND.—If a bank, savings and loan association, or a community development credit union has made an investment in a local business in conjunction with an investment made out of the revolving fund of an approved eligible entity, the amount invested by such revolving fund in such local business may be subordinated to the other investments to any degree, and in any manner.

(g) OTHER INVESTORS.—A bank, savings and loan association, or community development credit union that contributes capital to an eligible entity that receives Federal assistance under this subtitle may establish contractual arrangements with such entity concerning the return of such investments in the local revolving fund consistent with subsection (b)(3).

(h) ADDITIONAL CAPITAL.—The Board shall promulgate regulations that provide each participating eligible entity with a sufficient amount of time to obtain additional capital or lines of credit, if any investors, pursuant to the contract with the eligible entity under subsection (g), withdraw some or all of their investment.

(i) CONTINUATION OF LINE OF CREDIT.—A line of credit provided to an approved eligible entity under section 102 for use in a local revolving fund shall continue to be available to be drawn down upon until the Investment Board is terminated or until the line of credit is canceled, revoked or suspended by the Board as described in subsections (j), (k), or (l).

(j) CANCELLATION OF LINE OF CREDIT.—The Board may cancel any prospective payments to be made from any approved line of credit under this subtitle if the Board determines that the eligible entity participating in the program established under this subtitle made investments or acted in a manner that was inconsistent with the provision of this subtitle.

(k) CONTINUATION OF BUSINESS PROMOTION ACTIVITIES.—

(1) INITIAL FEDERAL CONTRIBUTION.—The Federal assistance provided to each eligible entity under this subtitle shall become the property of each such entity on the termination of the Investment Board if—

(A) the eligible entity that administers the local revolving fund has operated the fund in a manner that is consistent with this subtitle as determined by the Board; and

(B) the eligible entity contracts with the Board and the Secretary to continue to provide lending, investment, and guarantee assistance consistent with this subtitle.

(2) EXCEPTION.—

(A) DEVELOPMENT OF MONITORING PROCEDURES.—Not later than the date on which the Investment Board is terminated, the Secretary shall develop procedures to enable the Secretary to monitor the operations of eligible entities that receive Federal assistance under this subtitle which continue to exist on the date the Board is terminated.

(B) REFUND OF FUNDS.—Notwithstanding paragraph (1), if the Secretary finds that the purpose of any eligible entity is no longer to promote business development in a manner consistent with this subtitle, the Secretary shall order the eligible entity to refund to the Secretary of the Treasury an amount equal to the amount of funds drawn out of the Federal line of credit issued to the eligible entity together with an appropriate amount of interest on such amount, as determined by the Secretary.

(C) HEARINGS.—The Secretary shall establish rules and procedures—

(i) to determine the amount of interest required under subparagraph (B); and

(ii) to provide a hearing to any eligible entity aggrieved by any order of the Secretary under this paragraph if such entity requests such a hearing within 30 days after receiving the order of the Secretary.

(D) JUDICIAL REVIEW.—

(i) RIGHT.—If any eligible entity determines that it is aggrieved by any final decision of the Secretary issued under subparagraph (B), it may obtain judicial review of such decision by filing, not later than 30 days after the date of the delivery or service of the final decision, a complaint against the United States in the United States court for the district in which such entity resides or is engaged in business.

(ii) TRIAL DE NOVO.—An action commenced under clause (i) shall be by a trial de novo by the court.

(iii) EFFECT OF ORIGINAL DECISION.—During the pendency of an action for judicial review under this clause, or an appeal of a decision concerning such action, the administrative action of the Secretary contained in the decision that is under review shall be and remain in full force and effect except as provided in clause (iv).

(iv) STAY OF ACTION.—The requirement of clause (iii) shall not apply, and the court may issue a stay of such action, if

(I) an application to the court is filed not later than 10 days after the filing of the original action in such court;

(II) a hearing on such application has been held; and

(III) the court, after considering the application filed under this clause, determines that the applicant is likely to prevail on the merits of the original action and that irreparable injury will be done if a stay of such action is not issued.

(v) INTEREST.—Interest shall accrue in favor of the Secretary on any amounts determined to be due to the Secretary by the final judicial disposition.

(l) ANNUAL REPORTS TO THE BOARD.—

(1) IN GENERAL.—Each eligible entity that receives assistance under this subtitle shall annually prepare and submit to the Board, at such time, and in such form as the Board may require, a report describing the financial condition of the eligible entity, and the investments, cash revenues, income from investments, loans made, equity positions taken, guarantees issued, losses sustained or taken, operating expenses, loss rates, and such other matters as the Board determines appropriate concerning the eligible entity.

(2) POST TERMINATION.—After the Board terminates under subsection (m), the reports required under paragraph (1) shall be submitted to the Secretary who shall stand in the same position as the Board under such paragraph.

(m) TERMINATION OF BOARD.—The Investment Board established by section 101(a) shall terminate on the last day of the 5th calendar year following the date of enactment of this subtitle.

SEC. 104. COMPLIANCE AND ENFORCEMENT.

(a) REVOCATION OF LINE OF CREDIT AND REFUND.—

(1) GROUNDS FOR REVOCATION.—A line of credit shall be revoked or suspended by the Board, and a full refund of the Federal investment shall be requested by the Board—

(A) for false statements knowingly made in any written statement required under this subtitle, or under any regulation or Federal Register notice issued under this subtitle;

(B) if any written statement required under this subtitle, or under any regulation or Federal Register notice issued under this subtitle, fails to state a material fact necessary in order to make the statement not misleading in the light of the circumstances under which the statement was made;

(C) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this subtitle;

(D) for willful or repeated violation of, or willful or repeated failure to observe, any rule or regulation authorized under this subtitle; or

(E) for violation of, or failure to observe, any cease and desist order issued by the Board under this subsection.

(2) CEASE AND DESIST ORDERS.—Where an eligible entity has not complied with any provision of this subtitle, or of any regulation issued pursuant thereto, or is engaging or is about to engage in any acts or practices that constitute or will constitute a violation of such subtitle or regulation, the Board may order such entity to cease and desist from such action or failure to act. The Board may further order such entity to take such action or to refrain from such action as the Board determines necessary to ensure

compliance with this subtitle and the regulations issued thereunder.

(3) ORDER TO SHOW CAUSE, CONTENTS, AND HEARING.—

(A) ORDER.—Prior to revoking or suspending a line of credit under paragraph (1), or issuing a cease and desist order under paragraph (2), the Board shall serve on the eligible entity an order to show cause why an order revoking or suspending the line of credit or a cease and desist order should not be issued.

(B) CONTENTS.—An order to show cause under subparagraph (A) shall contain a statement of the matters of fact and law asserted by the Board and the legal authority and jurisdiction under which a hearing is to be held, and shall state that a hearing will be held before the Board at a time and place stated in the order.

(C) HEARING.—If after hearing under subparagraph (B), or a waiver thereof, the Board determines on the record that an order revoking or suspending the line of credit, or a cease and desist order should issue, or an order requiring a refund of the Federal investment in addition to reasonable interest thereon should issue, the Board shall promptly issue such order, which shall include a statement of the findings of the Administration and the reasons for such findings and specify the effective date of the order, and shall cause the order to be served on the entity.

(4) SUBPOENA OF PERSONS, BOOKS, PAPERS, AND DOCUMENTS; FEES AND MILEAGE; ENFORCEMENT.—

(A) SUBPOENA.—The Board may require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to the hearing from any place in the United States.

(B) FEES AND MILEAGE.—Witnesses summoned before the Board shall be paid by the party at whose instance such witnesses were called the same fees and mileage that are paid witnesses in the courts of the United States.

(C) ENFORCEMENT.—In the case of disobedience to a subpoena under this paragraph, the Board, or any party to a proceeding before the Board, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents.

(5) PETITION TO MODIFY OR SET ASIDE ORDER; FILING, TIME AND PLACE, ADMINISTRATION TO SUBMIT RECORD; ACTION OF COURT; REVIEW.—

(A) IN GENERAL.—An order issued by the Board under this subsection shall be final and conclusive unless not later than 30 days after the service thereof the eligible entity appeals to the United States court of appeals for the circuit in which such corporation has its principal place of business by filing with the clerk of such court a petition praying that the order of the Board be set aside or modified in the manner stated in the petition.

(B) FILING.—

(i) LEAVE OF COURT.—After the expiration of the 30-day period referred to in subparagraph (A), a petition may be filed only by leave of court on a showing of reasonable grounds for failure to file the petition prior to the expiration of such period.

(ii) CERTIFICATION.—The clerk of the court shall, on filing, cause a copy of the petition to be delivered to the Board and the Board shall certify and file in the court a transcript of the record on which the order was entered. If prior to the filing of such record the Board amends or sets aside its order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, after providing notice to the Board.

(C) STAY OR SUSPENSION OF ORDER.—The filing of a petition for review under this paragraph shall not of itself stay or suspend the operation of the order of the Board, but the court of appeals in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition.

(D) ACTION BY COURT.—The court may affirm, modify, or set aside the order of the Board.

(E) ADDITIONAL EVIDENCE.—

(i) DETERMINATION.—If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the Board to reopen the hearing for the taking of such evidence, in such manner and on such terms and conditions as the court may consider appropriate.

(ii) FINDINGS.—The Board may modify its findings as to the facts, or make new findings, by reason of the additional evidence taken under this subparagraph, and it shall file its modified or new findings and the amendments, if any, of its order, with the records of such additional evidence.

(F) CONSIDERATION OF OBJECTIONS.—No objection to an order of the Board shall be considered by the court unless the objection was argued before the Board or, if it was not so argued, unless there were reasonable grounds for failure to do so.

(G) REVIEW.—The judgment and decree of the court affirming, modifying, or setting aside any such order of the Board shall be subject only to review by the Supreme Court of the United States on certification or certiorari as provided in section 1254 of title 28.

(6) ENFORCEMENT OF ORDER.—If the entity against which or against whom an order is issued under this subsection fails to obey the order, the Board may apply to the United States Court of appeals, within the circuit where the entity has its principal place of business, for the enforcement of the order, and shall file a transcript of the record on which the order complained of was entered. On the filing of the application the court shall cause notice thereof to be served on the entity. The evidence to be considered, the procedure to be followed, and the jurisdiction of the court shall be the same as is provided in paragraph (5) for applications to set aside or modify orders.

(b) INVESTIGATIONS AND EXAMINATIONS.—

(1) AUTHORITY.—

(A) IN GENERAL.—The Board may conduct such investigations as the Board considers necessary to determine whether an eligible entity has engaged in any acts or practices that constitute or will constitute a violation of any provision of this subtitle, or of any regulation issued under this subtitle, or of any order issued under this section.

(B) FILING OF STATEMENTS.—The Board shall permit any individual to file a statement with the Board that is in writing, under oath or otherwise as the Board shall determine, as to all the facts and circumstances concerning the matter to be investigated.

(C) SUBPOENA.—For the purpose of any investigation under this subsection, the Board may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States.

(D) REFUSAL TO OBEY.—In case of contumacy by, or refusal to obey a subpoena issued to, any individual, including an entity or corporation, the Board may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such individual resides or carries on business activity, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents, and such court may issue an order requiring such individual to appear before the Board, to produce records, if so ordered, or to give testimony touching the matter under investigation.

(E) CONTEMPT.—A failure to obey an order of the court under this subsection shall be punishable by such court as a contempt thereof. All process in any such case may be served in the judicial district where such individual is an inhabitant or wherever such individual may be found.

(2) EXAMINATIONS AND REPORTS.—

(A) EXAMINATIONS.—An eligible entity under this subtitle shall be subject to examinations made by the Board through examiners selected or approved by the Board, and the cost of such examinations, including the compensation of the examiners, may in the discretion of the Board be assessed against the entity examined and when so assessed shall be paid by such entity.

(B) REPORTS.—Such entities shall prepare and submit reports to the Board at such times and in such form as the Board may require.

(3) EXAMINATIONS.—Each eligible entity shall be examined and audited at least once every 2 years, under procedures established by the Board, to determine whether or not such entity has been operated in a manner consistent with this subtitle and in an otherwise lawful manner, except that the Board may waive the examination requirement for up to 1 additional year if, in its discretion, the Board determines that such a delay would be appropriate based on the prior operating experience of the entity, the contents and results of the last examination and the management expertise of the entity.

(c) INJUNCTIONS OR OTHER ORDERS.—

(1) GROUNDS AND JURISDICTION OF COURT.—Whenever, in the judgment of the Board an eligible entity has engaged or is about to engage in any acts or practices that constitute or will constitute a violation of any provision of this subtitle, or of any regulation under this subtitle, or of any order issued under this section, the Board may apply to the proper district court of the United States or a United States court located in any jurisdiction subject to the laws of the United States, for an order enjoining such acts or practices, or for an order enforcing compliance with such provision, rule, regulation, or order. Such court shall have jurisdiction over such actions and, on a showing by the Board that such entity has engaged in or is about to engage in such acts or practices, may issue a permanent or temporary injunction, restraining order, or other order without bond.

(2) EQUITY JURISDICTION OF CORPORATION AND ASSETS.—In any proceeding under this section the court as a court of equity may, to such extent as it considers necessary, declare that such court has exclusive jurisdiction over the entity and the assets thereof, wherever located. Such court shall have ju-

risdiction in any such proceeding to appoint a trustee or receiver to hold or administer under the direction of the court the assets so possessed.

(3) TRUSTEESHIP OR RECEIVERSHIP.—The Board shall have authority to act as trustee or receiver of an entity under this section. On request by the Board, the court may appoint the Board to act in such capacity unless the court determines such appointment to be inequitable or otherwise inappropriate because of the special circumstances involved.

(d) UNLAWFUL ACTS AND OMISSIONS BY OFFICERS, DIRECTORS, EMPLOYEES, OR AGENTS.—

(1) VIOLATION OF SUBTITLE.—Wherever an eligible entity violates any provision of this subtitle or regulation issued under such subtitle by reason of such entity failure to comply with the terms thereof, or by reason of such entity engaging in any act or practice that constitutes or will constitute a violation thereof, such violation shall be considered to be a violation and an unlawful act on the part of any individual who, directly or indirectly, authorizes, orders, participates in, or causes, brings about, counsels, aids, or abets in the commission of any acts, practices, or transactions that constitute or will constitute, in whole or in part, such violation.

(2) BREACH OF FIDUCIARY DUTY.—It shall be unlawful for any officer, director, employee, agent, or other participant in the management or conduct of the affairs of an eligible entity to engage in any act or practice, or to omit any act, in breach the fiduciary duty of such individual as such officer, director, employee, agent, or participant, if, as a result thereof, the entity has suffered or is in imminent danger of suffering financial loss or other damage.

(3) DISQUALIFICATION OF OFFICERS AND EMPLOYEES.—Except on the written consent of the Board, it shall be unlawful—

(A) for any individual to take office as an officer, director, or employee of an eligible entity, or to become an agent or participate in the conduct of the affairs or management of an eligible entity, if—

(i) such individual has been convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual has been found civilly liable in damages, or has been permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust; or

(B) for any individual to continue to serve in any of the above-described capacities, if—

(i) such individual is convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual is found civilly liable in damages, or is permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust.

(e) PENALTIES AND FORFEITURES.—

(1) IN GENERAL.—Except as provided in paragraph (2), an eligible entity that violates any regulation or written directive issued by the Board requiring the filing of any regular or special report under this subtitle, shall forfeit and pay to the United States a civil penalty of not more than $100 for each and every day of the continuance of the corporation's failure to file such report, unless the entity demonstrates that such failure is due to reasonable cause and not due to willful neglect. The civil penalties provided for in this subsection shall accrue to the United States and may be recovered in a civil action brought by the Board.

(2) EXEMPTION.—The Board may through rules and regulations, or on application of an interested party, at any time previous to a failure under paragraph (1), by order, after notice and opportunity for hearing, exempt in whole or in part, any entity from the provisions of paragraph (1), on such terms and conditions and for such period of time as the Board determines necessary and appropriate, if the Board finds that such action is not inconsistent with the public interest or the protection of the Board. The Board may for purposes of this subsection make any alternative requirements appropriate to the situation.

(f) JURISDICTION AND SERVICE OF PROCESS.—Any suit or action brought under this section by the Board to enforce any liability or duty created by, or to enjoin any violation of, this subtitle, or any rule, regulation, or order promulgated thereunder, shall be brought in the district wherein the eligible entity maintains its principal office, and process in such cases may be served in any district in which the defendant maintains its principal office or transacts business, or wherever the defendant may be found.

(g) SUBSTITUTION OF SECRETARY.—On the termination of the Board, the Secretary shall possess all the powers, privileges and rights regarding compliance and enforcement as described in this section.

Subtitle B—Rural Economic Development Promoted by the Rural Electrification Administration

SEC. 110. ASSISTANT ADMINISTRATOR FOR ECONOMIC DEVELOPMENT.

The Rural Electrification Act of 1936 is amended by adding after section 11 (7 U.S.C. 911) the following new section:

"SEC. 11A. ASSISTANT ADMINISTRATOR FOR ECONOMIC DEVELOPMENT.

"(a) APPOINTMENT.—The Administrator shall appoint an Assistant Administrator for Economic Development (hereinafter referred to in this Act as the 'Assistant Administrator') to carry out the programs of the Rural Electrification Administration concerning the involvement of rural electric and telephone systems in community and economic development.

"(b) APPOINTMENT FACTORS.—In appointing an Assistant Administrator, the Administrator shall consider the degree to which candidates possess—

"(1) knowledge of and experience in community and economic development programs and strategies;

"(2) the ability to develop and manage the specific programs and responsibilities of this office, as described in this Act;

"(3) the ability to work effectively with officials of Federal, State, and local governments, private, and other officials of development programs, as well as with borrowers of the Rural Electrification Administration and their associations; and

"(4) other factors as determined by the Administrator to be important in the successful execution of the responsibilities of the office of Assistant Administrator.

"(c) RESPONSIBILITIES AND STANDING.—The Assistant Administrator shall be—

"(1) responsible, unless otherwise provided by law, for the administration of the programs of the Rural Electrification Administration not directly related to the providing of electric or telephone service; and

"(2) at a salary level that is not less than that of the Assistant Administrator for Electric and the Assistant Administrator for Telephone of the Rural Electrification Administration.

"(d) FUNDING.—Not less than 10 percent nor more than 20 percent of the salaries and expenses provided to the Administration during any fiscal year shall be used by the Assistant Administrator in carrying out the responsibilities of the Assistant Administrator as described in subsection (c), and such amounts shall remain available until expended.".

SEC. 111. TECHNICAL ASSISTANCE UNIT.

Title I of the Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 17. TECHNICAL ASSISTANCE UNIT.

"The Administrator shall establish a technical assistance unit to provide advice and guidance to borrowers concerning community and economic development activities permitted under this Act. From the amounts made available to the Assistant Administrator under section 11A(d), not less than 2 percent of the salaries and expenses of the Rural Electrification Administration shall be made available to the technical assistance unit establishment in this section.".

SEC. 112. DEFERMENT OF PAYMENT ON ECONOMIC DEVELOPMENT LOANS.

Section 12 of the Rural Electrification Act of 1936 (7 U.S.C. 912) is amended by adding at the end thereof the following new subsection:

"(b) The Administrator shall permit any borrower to defer the payment of principal and interest on any insured or direct loan made under this Act, notwithstanding any limitation contained in section 12, if the borrower agrees—

"(1) except in cases of financial hardship (as determined by the Administrator), to defer its debt service payments only in an amount equal to an investment made by such borrower in community or economic development projects;

"(2) that the amount of the deferment that will be used to provide assistance to a community or economic development project under paragraph (1), will not exceed 50 percent of the cost of the project;

"(3) that—

"(A) in the case of deferments made to enable the borrower to provide financing to local businesses, the deferment shall be repaid over the 60-month period beginning on the date of the deferment; and

"(B) in the case of deferments made to enable the borrower to provide community development assistance, technical assistance to businesses, or similar community, business, or economic development assistance, the deferment shall be repaid over the 120-month period beginning on the date of the deferment; and

"(4) that at the time of deferment, such borrower shall make a cushion of credit payment in an amount equal to the amount of the payment deferred. Such payment may not be reduced by the borrower below the level of the unpaid balance of the payment deferred. Such cushion of credit amounts and any other cushion of credit and advance payments of any borrower shall be included in the interest differential calculation provided by section 313 of this Act.".

SEC. 113. WATER AND WASTE FACILITY FINANCING.

Title III of the Rural Electrification Act of 1936 is amended by adding after section 305 (7 U.S.C. 935) the following new section:

"SEC. 305A. WATER AND WASTE DISPOSAL SERVICES.

"(a) IN GENERAL.—The Administrator is authorized to make loans to borrowers under this title, in coordination and consultation with the Administrator of the Farmers Home Administration, to enable such borrowers to provide water and waste facility services in areas served by such borrowers.

"(b) LIMITATION.—Loans made under subsection (a) shall not, unless otherwise specified by law, exceed an amount equal to 10 percent of the total amount of insured loans authorized during the fiscal year in which such loan is made for rural electrification and telephone purposes, or $40,000,000, whichever is less. Such limitations shall be in addition to the total amount of insured loans authorized for electrification and telephone purposes.

"(c) PRIORITY—In reviewing applications for loans under this section the Administrator shall consider—

"(1) whether the Farmers Home Administration is able and willing to provide loans or grants on a timely basis for the water and waste facility projects contained in the application;

"(2) whether the loan is necessary to enable the applicant to comply with applicable Federal or State environmental laws;

"(3) whether the individuals residing in the area for which service is proposed, and any local government entities, are in favor of the borrower providing such services in the area;

"(4) the income, unemployment, and other characteristics of the area to be served;

"(5) the degree of deprivation faced by residents of the area to be served as a result of the lack of safe drinking water, adequate water supplies, sewage treatment and other waste disposal facilities;

"(6) the impact that the availability of safe water supplies, waste disposal and similar services would be likely to have on enhancing the prospects for economic growth within the area to be served;

"(7) the degree to which a loan that may be provided under this subsection is necessary to ensure that water and waste disposal services are available in the area to be served by such loan at costs that do not exceed those charged in other nearby areas;

"(8) the impact of the proposed loan on the retention of the property and service territory of the borrower, or in protecting the security given on outstanding loans provided to the borrower; and

"(9) whether the water and waste facility projects described in the application will duplicate any existing facilities, and whether the borrower will coordinate its water and waste facility operations with similar operations in the area, including efforts to achieve economies of scale through joint billing, collection or other operations with nearby systems in order to reduce the costs, improve the operations, or otherwise assist such systems.

"(d) COORDINATION.—

"(1) NOTIFICATION.—Not less than 30 days prior to approving a loan under this section, the Administrator shall notify the Administrators of the Farmers Home Administration and the Environmental Protection Administration, and the Chief Executive officer of the appropriate State, and the appropriate State health and environmental officials, that an application has been received from the borrower for funding under this section.

"(2) RELATIONSHIP.—The Administrator shall attempt to coordinate lending efforts with the entities described in paragraph (1).

"(e) TERMS.—

"(1) IN GENERAL.—Loans made under this section shall be for the same repayment period as insured loans made by the Administrator to such borrowers and interest rates on loans made under this section shall not exceed the standard interest rate charged on such insured loans.

"(2) INTEREST RATE.—The Administrator shall determine the interest rate to be charged on loans made under this section on the basis of—

"(A) ensuring that the cost to consumers for water and waste disposal services financed with loans provided under this section does not, to the extent possible, exceed rates charged in areas that are near the area served by the applicant;

"(B) the income and other characteristics of the individuals to be served through the provision of such loans; and

"(C) encouraging borrowers to obtain private sector capital, as provided for in subsection (f), to supplement loans made under this section.

"(f) PRIVATE SECTOR CAPITAL.—The Administrator shall require borrowers under this section to obtain private sector capital to supplement assistance made available under this section if—

"(1) the Administrator determines that—

"(A) it is appropriate to require use of such private capital, taking into account subparagraphs (A) and (B) of subsection (e)(2); and

"(B) the borrower is able to obtain revenues from the facilities to be financed to recover its cost, including the cost of such private capital; and

"(2) the borrower is able to obtain such private capital from the banks for cooperatives, the National Rural Utilities Cooperative Finance Corporation, the National Cooperative Bank, or from other sources.

In order to facilitate the obtaining of such private capital, the Administrator shall, on a case by case basis, reduce the interest rate on loans provided under this section when such reduction is required to enable the borrower to obtain such private capital, by amounts that do not exceed 50 percent of the total cost of the project for which such loans are provided under this section, and to meet the conditions of paragraph (1) of this subsection.

"(g) APPROPRIATIONS.—The Administrator is authorized to make loans as provided under this section, except that during any fiscal year the amount of such loans, unless otherwise provided by law, shall not exceed 10 percent of the amount authorized for all insured loans under this title, or $40,000,000, whichever amount is less. Funds appropriated under this section shall remain available until expended.

"(h) REPAYMENT.—Appropriations made for purposes of this section shall be placed in a subaccount of the Rural Electrification and Telephone Revolving Fund. Advances on loans made under this section shall be made from such subaccount, and payments on such loans shall be returned to the subaccount for use by the subaccount in making advances on future loans.

"(i) FULL USE.—The Administrator shall undertake all reasonable efforts to make full use, during each fiscal year, of any funds held by the subaccount established under subsection (h), subject to limitations that loans for the purpose of this section shall not exceed 10 percent of the amount of loans made under this title during any fiscal year, or $40,000,000, whichever amount is less, and subject to any other limitations that may be imposed by law, except that any repayments made during each fiscal year shall not be considered in computing such 10 percent or $40,000,000 limit.".

SEC. 114. TARGETING INVESTMENTS BY ELECTRIFICATION BORROWERS.

Section 312 of the Rural Electrification Act of 1936 (7 U.S.C. 940b) is amended—

(1) by inserting "(a) IN GENERAL.—" before "A borrower"; and

(2) by adding at the end thereof the following new subsection:

"(b) TARGETING INVESTMENTS.—Amounts intended to be invested by a borrower under subsection (a) shall be invested in—

"(1) the Incubation Fund established under section 502 or other business incubators;

"(2) new businesses, business development centers, community development corporations, business investment corporations, business, medical or education related telecommunications or infrastructure improvements, or any related activities including technical assistance programs in rural areas; or

"(3) other community, business or economic development projects or investments.".

SEC. 115. RURAL ECONOMIC DEVELOPMENT.

The Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) is amended by adding at the end thereof the following new title:

"TITLE V—RURAL ECONOMIC DEVELOPMENT

"SEC. 501. ADDITIONAL POWERS AND DUTIES OF REA ADMINISTRATOR.

"The Administrator of the Rural Electrification Administration shall—

"(1) provide advice and guidance to electric and telephone borrowers under this Act concerning the effective and prudent use by such borrowers of the investment authority under section 312 to promote rural development;

"(2) provide technical advice, troubleshooting, and guidance concerning the operation of programs or systems that receive assistance under this Act;

"(3) establish and administer various pilot projects through electric and telephone borrowers that the Administrator determines are useful or necessary, and recommend specific rural development projects for rural areas;

"(4) act as an information clearinghouse and conduit to provide information to electric and telephone borrowers under this Act concerning useful and effective rural development efforts that such borrowers may wish to apply in their areas of operation and concerning State, regional, or local plans for long-term rural economic development;

"(5) provide information to electric and telephone borrowers under this Act concerning the eligibility of such borrowers to apply for financial assistance, loans, or grants from other Federal agencies and non-Federal sources to enable such borrowers to expand their rural development efforts;

"(6) promote local partnerships and other coordination between borrowers under this Act and community organizations, States, counties, or other entities, to improve rural development;

"(7) review the advice and recommendations of the Rural Educational Opportunities Board as established under section 601(f); and

"(8) administer a Rural Business Incubation Fund (as established under section 502) that shall provide technical assistance, advice, loans, or capital to business incubation programs or for the creation or operation of small business incubators in rural areas.

"SEC. 502. RURAL BUSINESS INCUBATION FUND.

"(a) ESTABLISHMENT AND USE.—

"(1) ESTABLISHMENT.—There is established in the Treasury of the United States a revolving fund to be known as the Rural Business Incubation Fund (hereinafter referred to in this title as the 'Incubation Fund') to be administered by the Administrator.

"(2) USE.—The Incubation Fund shall be used to make grants and reduced interest loans to electric and telephone borrowers under this Act to promote business incubation programs or for the creation or operation of business incubators in rural areas by such borrowers, and the rate of such loans shall not exceed the standard rate as provided in section 305.

"(3) BUSINESS INCUBATION.—Business incubators that receive assistance under this title shall be a facility in which small businesses can share premises, support staff, computers, software or hardware, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive technical assistance, financial advice, business planning services or other support. Business incubation programs that provide assistance of the type described in this paragraph shall be eligible for assistance under this title even where such program does not involve the sharing of premises.

"(b) APPLICATION FOR ASSISTANCE—

"(1) ELIGIBILITY TO SUBMIT.—Borrowers under this Act that operate existing business incubators or that desire to operate such incubators or business incubation programs, and that meet the requirements established by the Administrator for obtaining grants or reduced interest loans under this section, may submit applications at such time, in such form, and containing such information as the Administrator shall require, for such grants or loans.

"(2) REQUIREMENTS.—Applications submitted under paragraph (1) shall, at a minimum—

"(A) contain an assurance that any incubator established or operated to this section will be operated on a not-for-profit basis; and

"(B) contain an assurance that it will be the policy of such incubator to encourage and assist businesses in graduating from the incubator and becoming a viable business entity in the community and to inform participating businesses of this policy;

"(3) REVIEW.—In reviewing applications for assistance, the Administrator shall consider—

"(A) how effectively the incubation project will assist in the formation, growth, or improved efficiency of small businesses that will help diversify and develop the local economy; and

"(B) the amount of local support likely to exist for the incubator and the businesses to be assisted by such incubator, taking into account local contributions of business, financial, technical, technological or managerial expertise, and contributions of equipment or materials, local financial assistance, and other factors as determined appropriate by the Administrator.

"(c) FUNDING OF LOCAL INCUBATORS.—

"(1) BY BUSINESSES UTILIZING INCUBATOR.—

"(A) IN GENERAL.—Business incubators that receive assistance under this section shall, to the extent practicable and except as provided by the Administrator, require that each business entity that utilizes such incubator share, on a percentage or other basis, as determined by the Administrator, a portion of the benefit of any growth in profits, net worth, or other measure of income or growth that results during or because of such entity's entry into the incubator.

"(B) CONTRIBUTION TO INCUBATOR FUND.—At such time as the business incubator receives revenues from the business entity as provided under subparagraph (A), such incubator shall pay an amount equal to 50 percent of such revenue to the Incubator Fund established under subsection (a).

"(C) FLEXIBILITY.—In administering the requirement of this paragraph, the Administrator shall provide substantial flexibility and assistance to incubators in order to ensure that a proper balance is achieved between—

"(i) the objective that a business that benefits from an incubator should return a small portion of such benefit to the incubator for use in assisting other businesses and to the Incubator Fund established under subsection (a); and

"(ii) the requirement that such payments by a business not impose an undue burden nor interfere with the purposes of this section.

"(2) BY BORROWER ESTABLISHING INCUBATOR.—

"(A) IN GENERAL.—A borrower that establishes or assists a business incubator under this section shall purchase Capital Term Certificates issued by the Incubator Fund in amounts equal to 10 percent of the amount of the grant, or 5 percent of the amount of the reduced interest loan, provided by the Administrator under this section.

"(B) REDEMPTION OF CERTIFICATES.—Each calendar year for the 10-year period beginning on the date that a grant or reduced interest loan is provided under this section, the Administrator shall redeem an amount equal to 10 percent of the Capital Term Certificates purchased by the borrower under subparagraph (A), without any payment of interest.

"(3) BY THE SECRETARY OF THE TREASURY—

"(A) IN GENERAL.—Not later than October 1, of each fiscal year, the Secretary of the Treasury shall purchase Capital Term Certificates issued by the Incubator Fund in the amount of $10,000,000.

"(B) TERMINATION OF OBLIGATION.—The Secretary of the Treasury shall not be obligated to make any payments under subparagraph (A) to the Incubator Fund after October 1, 1995.

"(C) REDEMPTION OF CERTIFICATES.—Each calendar year for the 10-year period beginning on January 1, 2000, the Administrator shall redeem an amount equal to 10 percent of the Capital Term Certificates purchased by the Secretary under subparagraph (A), without any payment of interest.

"(d) REPAYMENTS TO INCUBATION FUND.—All payments made on loans under this section, and all amounts provided under subsection (c), shall be placed in the Incubator Fund established by subsection (a) and shall be available to carry out the purposes of this section.

"(e) FULL USE.—The Administrator shall undertake all reasonable efforts to make full use, during each fiscal year, of any funds contained in the Incubator Fund established under subsection (a), consistent with the requirement that the Incubator Fund redeem Capital Term Certificates as provided by subsection (c).".

SEC. 116. PROMOTING RURAL DEVELOPMENT BY REA TELEPHONE BORROWERS.

To promote additional rural development by Rural Electrification Administration telephone borrowers, amounts invested by any such borrower for rural telecommunications or other rural development purposes shall not be considered dividends or distribution of capital by the Rural Electrification Administration.

TITLE II—ENHANCING HUMAN RESOURCES

SEC. 201. RURAL STAR SCHOOLS EDUCATIONAL OPPORTUNITIES PROGRAM.

The Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) (as amended by section 116) is further amended by adding at the end thereof the following new title:

"TITLE VI—RURAL EDUCATIONAL OPPORTUNITIES

"SEC. 601. RURAL EDUCATIONAL OPPORTUNITIES PROGRAM.

"(a) PURPOSE.—

"(1) IN GENERAL.—It is the purpose of the program established under this section to encourage and improve the use of telecommunications, computers, and related advanced technologies, to provide electronic or telecommunications access by students and faculty at grade schools, high schools, (including vocational education schools, and adult education centers) in rural areas in order to improve educational instruction in the areas of mathematics, the sciences, computer technology, foreign languages, health sciences, and other areas of study.

"(2) GRANTS.—The program established under this section shall make grants available to telecommunications partnerships to develop and acquire, through lease or purchase, instructional programming, computer hardware and software, telecommunications facilities, telecommunications terminal equipment, audio and visual equipment, monitors and related devices, interactive video equipment, and other facilities and to obtain technical assistance for the development or use of such facilities and programming.

"(b) GRANTS.—

"(1) GENERAL AUTHORIZATION.—The Administrator of the Rural Electrification Administration (hereinafter referred to in this section as the 'Administrator') is authorized to make grants to accomplish the purposes of the program established under this section in an amount not to exceed $10,000,000 in fiscal year 1990, $15,000,000 in fiscal year 1991, and $25,000,000 in each of the fiscal years 1992 through 1994.

"(2) DISBURSEMENT.—In order to facilitate appropriate planning for, and continuity of the program established under this section, funds appropriated by the Congress during a particular year may be committed by the Administrator for disbursement in a subsequent year or years, and funds appropriated and committed during a year may exceed the limitations described in paragraph (1). Funds appropriated pursuant to this section shall remain available until expended.

"(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this title, $10,000,000 in fiscal year 1990, $15,000,000 in fiscal year 1991, and $25,000,000 in each of the fiscal years 1992 through 1994. Amounts appropriated under this subsection shall remain available until expended.

"(4) USE OF FUNDS.—

"(A) PARTNERSHIPS.—Grants under this section may be made available to partnerships organized pursuant to subsection (c) to be used by such partnerships for facilities, equipment, activities, and other uses to achieve the purpose of this section, including—

"(i) the development and acquisition of instructional programming;

"(ii) the development and acquisition, through lease or purchase, of hardware and software, audio and visual equipment, telecommunications terminal equipment, telecommunications equipment or facilities, or interactive video equipment, and other facilities that would further the purposes of the programs authorized by this section;

"(iii) providing technical assistance and instruction for the development or use of such programming or facilities; or

"(iv) other uses that are consistent with achieving the purposes of this section.

"(B) RURAL EDUCATIONAL OPPORTUNITIES BOARD.—During each fiscal year 3 percent of the funds appropriated under this section to carry out this program shall be available to the Rural Educational Opportunities Board established under subsection (f).

"(5) LIMITATIONS.—

"(A) INSTRUCTIONAL PROGRAMMING.—Not less than 25 percent of the funds appropriated under this section in any fiscal year shall be used to fund instructional programming, including programming to assist elementary and secondary schools, and adult and vocational education and training centers.

"(B) FEDERAL SHARE.—Any partnership desiring to obtain a grant under this section shall demonstrate an effort to limit the Federal share to 75 percent or less of the total cost of the project for which funding is requested. The partnership should also work with Rural Electrification Administration borrowers, other telecommunications entities and the local community in seeking donations of equipment or other hardware to local schools. Such contributions and other in-kind assistance shall be considered a portion of the non-Federal share.

"(C) WAIVER.—The limitation described in this paragraph may be waived by the Administrator based on a finding that such a waiver would facilitate the achievement of the purposes of this section, considering the specific circumstances of a project for which funding is requested, financial hardship in the area to be served, and based on other factors determined to be appropriate by the Secretary.

"(D) TELECOMMUNICATIONS FACILITIES.—

"(i) IN GENERAL.—No funds shall be made available under this section for telecommunications facilities, including fiber-optics, satellite and other facilities, to be used to receive or transmit into or out of a building, school or other facility if—

"(I) not later than 45 days after receiving a request from a partnership organized under this section—

"(aa) a local exchange carrier providing telephone service as defined in section 203(a) shall agree to provide such partnership with access to such telecommunications facilities or services as requested by the partnership for the distance learning program that is being proposed; and

"(bb) the Administrator shall agree that the cost, if any, to be charged by such local exchange carrier shall not place an undue burden on the partnership or interfere with the purpose of this section;

"(II) not later than 150 days after receiving a request as described in subclause (I), the local exchange carrier shall have provided such access to telecommunications facilities and services as described in such subclause or have taken substantial steps, as determined by the Administrator, toward providing such access; and

"(III) not later than 250 days after receiving a request as described in subclause (I), the project to provide the access referred to in subclause (I)(aa) is completed.

"(ii) EXCEPTIONS.—This subparagraph shall not apply to telecommunications terminal equipment, interactive video equipment and other hardware and software not directly required to receive or transmit into or out of a building or other facility.

"(c) RURAL EDUCATIONAL OPPORTUNITIES PARTNERSHIPS.—

"(1) IN GENERAL.—Grants made under this section shall be available to telecommunications partnerships that consist of—

"(A) Rural Electrification Administration borrowers, telecommunications corporations, or other entities that participate individually or jointly on a multicounty, regional, Statewide, or multiState basis;

"(B) an entity selected by the Rural Educational Opportunities Board which shall be a national organization (such as the National Rural Telecommunications Cooperative) that—

"(i) is organized by consumer owned electric and telephone systems who are eligible to participate in partnerships organized under this section;

"(ii) has been or will be engaged in activities designed to provide modern telecommunications and programming to individuals in rural areas who have been previously without such services; and

"(iii) on the basis of its membership and experience will, as determined by the Rural Educational Opportunities Board, serve as a central catalyst and organizer to bring distance learning programming and services under this section to individuals in rural areas, and ensure that any programming, facilities and other equipment and technical assistance financed under this section will be made available to the broadest extent possible; and

"(C) one or more educational institutions, agencies, or organizations with substantial academic and teaching capabilities, such as local education agencies, State education agencies, land grant and other universities, community colleges, and other institutions of higher education.

"(2) OTHER ORGANIZATIONS.—Other organizations may be included in the rural distance learning partnerships in order to improve the quality of programming delivered, or to increase the level of participation by rural schools, vocational or adult learning centers, health care or other organization with access to rural populations and small communities that can benefit from this program.

"(d) APPLICATION FOR GRANTS.—An application for a grant under this section shall be made to the Administrator and shall provide the following documentation:

"(1) Evidence that the application is submitted by a partnership that meets the requirements under subsection (c).

"(2) A detailed description of the rural distance learning project and the facilities and equipment for which the grant is sought.

"(3) A statement of the Federal and non-Federal shares of funding for the proposed rural distance learning project, and evidence that the partnership has worked with or will work with, Rural Electrification Administration borrowers, or other telecommunication entities, in seeking the assistance of such borrowers or entities in donating telecommunications equipment or other hardware.

"(4) A description of the rural elementary or secondary schools, or adult educational program that will participate in the rural distance learning project, including a description of—

"(A) the numbers of students that likely would benefit from each project;

"(B) the need for the project taking into consideration other alternatives;

"(C) the number of teachers and other instructors to be involved, and the subject matters covered by the project; and

"(D) the relative educational need in such area for the program;

"(5) A description of the types of instructional and other programming that will be developed or acquired as part of the rural distance learning program, and the rationale for developing or acquiring this programming.

"(6) A description, based on a survey and analysis of the area to be served, of how the project will substantially increase the educational programs provided by participating schools and the availability of instructional assistance regarding courses of instruction in mathematics, the sciences, foreign languages, computer sciences, vocational and adult training and education, health sciences and other areas of study.

"(7) A description of the teacher training policies that will be implemented to achieve the effective use of the telecommunications facilities or equipment, terminal equipment, computers, hardware and software, audio and visual equipment and monitors, interactive video equipment, and other facilities and programming for which assistance is sought.

"(8) A description of the manner in which needy or traditionally underserved students will participate in the benefits of the grants made under this section.

"(9) Assurances that the partnership will encourage participation and involvement by elementary and secondary schools, and, if applicable, other educational institutions, such as institutions of higher education, county extension services, vocational and adult training and education centers, teacher training centers, research institutes, and private industry, in order to ensure that the facilities, equipment, technical assistance, and programming for which assistance is sought will be made available to the broadest extent practical.

"(10) Assurances that the facilities, equipment, technical assistance, and programming for which assistance is sought will be made available to the broadest extent practical.

"(11) Assurances that, to the extent practical, educational programming developed or acquired by the applicant with funds provided under this section, will be made available to as many rural communities throughout the United States as practical.

"(12) Such additional assurances and reporting requirements as the Administrator may reasonably require.

"(e) INFORMATIONAL EFFORTS.—The Administrator shall establish and implement procedures to carry out informational efforts to advise elementary, secondary, and post-secondary schools and other eligible applicants located in rural areas of each State, about the program authorized by this section.

"(f) RURAL EDUCATIONAL OPPORTUNITIES BOARD.—

"(1) ESTABLISHMENT.—There shall be established an advisory board to be known as the Rural Educational Opportunities Board (hereinafter referred to in this section as the 'Board') to provide advice and guidance to grant recipients under this title.

"(2) COMPOSITION.—The Board shall be comprised of—

"(A) two individuals appointed by the Secretary of Education who are either—

"(i) a rural teacher;

"(ii) a rural principal;

"(iii) a State superintendent of education;

"(iv) a rural librarian;

"(v) a State director of the Educational Broadcasting System;

"(vi) an educational telecommunications expert;

"(vii) a state director of vocational education;

"(viii) a Director or Administrator of the State Cooperative Extension Service;

"(ix) a specialist in learning strategies for elementary education;

"(x) a specialist in learning strategies for secondary education;

"(xi) a specialist in learning strategies for adult education;

"(xii) a curriculum specialist;

"(xiii) a specialist in English as a second language; or

"(xiv) a specialist in learning disabilities or special education;

"(B) two individuals appointed by the Secretary of Agriculture who meet the requirements of subparagraph (A);

"(C) the Secretary of Education;

"(D) the Administrator of the Rural Electrification Administration;

"(E) one individual elected by Rural Electrification Administration borrowers under title I and one individual elected by Rural Electrification Administration borrowers under title II; and

"(F) one individual, who shall be a telecommunications specialist, to be appointed by the Secretary of Agriculture in consultation with telecommunication corporations which are not borrowers of the Rural Electrification Administration.

"(3) TERM OF OFFICE.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the term of office of each appointed or elected member of the Board shall be 3 years.

"(B) EXCEPTION.—The initial members of the Board who are appointed by the Secretary of Education and the Secretary of Agriculture under subparagraphs (A) and (B) of paragraph (2) shall serve a term determined by such Secretaries, except that—

"(i) one-half of such members shall serve for terms of 2 years; and

"(ii) one-half of such members shall serve for terms of 3 years.

"(4) VACANCY.—Any member appointed to fill a vacancy on the Board shall serve for the remainder of the term for which the predecessor of such member was appointed.

"(5) NUMBER OF TERMS.—No member appointed or elected to the Board may serve more than 2 consecutive terms.

"(6) RESPONSIBILITIES.—The Board shall, on an ongoing basis—

"(A) provide advice and guidance to grant recipients under this title;

"(B) evaluate the quality and effectiveness of rural distance learning programs, and the instructional and other material made available under such programs;

"(C) evaluate the degree of participation of educational institutions in the program authorized by this title, and the extent to which new educational opportunities have been or will be made available to as many rural and small communities in the United States as possible;

"(D) evaluate the technology, hardware and software, the telecommunications terminal equipment, interactive video equipment, audio and visual devices, and other facilities proposed or employed by grant recipients in order to determine its effectiveness in achieving the purposes of this section;

"(E) recommend changes in any elements of any program in order to improve the effectiveness of any program receiving funds under this section; and

"(F) consult with the Secretary of Education, and the Administrator of the Rural Electrification Administration regarding the dissemination of information concerning the program established under this section and the coordination of similar programs.

"(7) RESOURCES.—The Board may request information and staff assistance from the Administrator of the Rural Electrification Administration and the Secretary of Education who may provide such assistance. The Board shall have available not more than 3 percent of the funds appropriated each year to make grants under this section to be used for—

"(A) reasonable travel, lodging, and other direct out-of-pocket expenses of Board members in attending meetings of the Board, and for other needed purposes; and

"(B) studies, evaluations, and other information needed by the Board to fulfill its responsibilities under this section, and which cannot reasonably be made available by the Administrator or the Secretary of Education, or which the Board determines is sufficiently beneficial to justify obtaining from an independent source.

"(8) CHAIRPERSON.—The Board shall elect a Chairperson and such other officers as the Board determines are necessary, and shall establish operational rules, policies, and guidelines to govern its activities.

"(g) REVIEW AND APPROVAL OF GRANT APPLICATIONS.—

"(1) BOARD REVIEW.—The Board shall review each grant application and provide the Administrator with the recommendations of the Board concerning such application.

"(2) ADMINISTRATOR.—The Administrator shall review each grant application and the recommendations of the Board concerning such, and not later than 120 days after the receipt of such application, determine whether to approve the application, and if so, the amount of funding to be provided to the applicant.

"(h) PROGRAM EVALUATION.—

"(1) ANNUAL REPORT.—Not later than 1 year after the date of enactment of this section, and each year thereafter, the Administrator, in consultation with the Secretary of Education, shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report on the program established under this section.

"(2) CONTENTS.—The report submitted under subparagraph (A) shall include—

"(A) a full description of the projects that have received funds under this section;

"(B) a description of the number of schools, students and others who have participated in such projects;

"(C) the specific instructional programming that has been developed under the program established under this section;

"(D) an evaluation of the achievements and failures of the program; and

"(E) the long range plans to further develop the program.

"(i) EXPEDITING COORDINATED REA TELEPHONE LOANS.—The Administrator shall establish and implement procedures to assure that requests for loans and advances of funds to local exchange carriers providing telephone service as defined in section 203(a), in rural areas, as defined in the Rural Partnerships Act of 1989, to provide telephone services associated with grants under this section, receive expedited consideration and determination as compared to requests for loans and advances for other telephone purposes.".

SEC. 202. RURAL MEDICAL LINK TELECOMMUNICATIONS PROGRAM.

(a) PURPOSE.—It is the purpose of this section to establish a program to improve telecommunications and related activities between and among rural hospitals, physicians, teaching hospitals, rural primary care centers or facilities, and major medical hospitals through grants and expedited Rural Electrification Administration telephone loans.

(b) ESTABLISHMENT OF PROGRAM.—

(1) IN GENERAL.—The Secretary shall establish a program, to be administered by the Administrator of the Rural Electrification Administration (hereinafter referred to in this section as the "Administrator"), to make grants available to hospitals, primary care centers or physicians, approved by the Administrator to participate in the program established under this section, that are located in rural areas to enable such approved hospitals, centers or physicians to acquire or lease telecommunications facilities or equipment, subject to the limitations of paragraph (4), and telecommunications terminal and other necessary equipment, that will provide such hospitals, centers and physicians with the ability to communicate with teaching hospitals or medical centers to improve health care in rural areas. Grants may also be made to local exchange carriers providing telephone service, as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)), and to telecommunications facilities if such facilities are required to achieve the purpose of this section.

(2) USE.—Telecommunications equipment or facilities acquired under a grant awarded under paragraph (1) shall be used to improve on-line computer operations and the transmission of medical data, diagnostic information, radiographic, x-ray, ultrasonic or computerized tomographic images, representations of the results of any other medical scanning or diagnostic testing such as echocardiograms, cineangiograms, real-time scanning, electrocardiograms, electroencephalographs, or to facilitate communications among entities described in subsection (a), in order to improve the diagnosis or treatment of any diseases, disorders, abnormalities or medical conditions.

(3) EXPEDITING OF COORDINATED REA TELEPHONE LOANS.—The Administrator shall establish and implement procedures to assure that requests for loans and advances of funds to local exchange carriers providing telephone service as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)) in rural areas, as defined in this Act, to provide telephone services associated with grants under this section, receive expedited consideration and determination as compared to requests for loans and advances of funds for other telephone purposes.

(4) TELECOMMUNICATIONS FACILITIES.—

(A) IN GENERAL.—No funds shall be made available under this section for telecommunications facilities, including fiber-optic lines, satellite and other facilities, to be used to receive or transmit into or out of an approved hospital, primary care center or physician's office, located in a rural area, if—

(i) not later than 45 days after receiving a request from such hospital, center or physician under this section—

(I) a local exchange carrier providing telephone service as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)) shall agree to provide such hospital, center or physician with access to such telecommunications facilities or services as requested by such hospital, center or physician for the telecommunications project that is being proposed; and

(II) the Administrator shall agree that the cost, if any, to be charged by such local exchange carrier shall not place an undue burden on the hospital, center or physician or interfere with the purpose of this section;

(ii) not later than 150 days after receiving a request as described in clause (i), the local exchange carrier shall have provided such access to telecommunications facilities and services as described in such clause or have taken substantial steps toward providing such access; and

(iii) not later than 250 days after receiving a request as described in clause (i), the project to provide the access referred to in clause (ii) is completed.

(B) EXCEPTIONS.—This paragraph shall not apply to telecommunications terminal equipment, interactive video equipment and other hardware and software not directly required to receive or transmit into or out of a building or other facility.

(b) REGULATIONS.—Not later than April 15, 1990, the Administrator shall promulgate such regulations as are necessary and appropriate to carry out the provisions of this section, including establishing a priority system for awarding grants to hospitals, primary care centers and physicians located in rural areas that are most in need of enhanced communications to carry out the purposes of this section.

(c) INFORMATIONAL EFFORTS.—The Administrator shall establish and implement procedures to carry out informational efforts to advise hospitals, primary care centers and physicians located in rural areas of each State, concerning the program authorized by this section, and of the application procedures and deadlines.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, $15,000,000 in each of the fiscal years 1990 through 1994. Amounts appropriated under this subsection shall remain available until expended.

SEC. 203. RURAL BUSINESS LINK TELECOMMUNICATIONS PROGRAM.

(a) PURPOSE.—It is the purpose of this section to establish a program to improve the transmission of marketing, product ordering, inventory management, or other related business data and information through telecommunications and computer technology between businesses located in rural areas and other businesses or facilities.

(b) ESTABLISHMENT OF PROGRAM.—

(1) IN GENERAL.—The Secretary shall establish a program, to be administered by the Administrator of the Rural Electrification Administration (hereinafter referred to in this section as the "Administrator") to make grants available, as determined appropriate and approved by the Administrator, to assist rural businesses through the establishment of shared business communications or computer centers that will serve small businesses or individuals who are starting a small business by providing or making available to such businesses advanced telecommunications facilities or equipment (subject to the limitation in paragraph (2)), and computer services or equipment and telecommunications terminal equipment at charges that confer the benefit of the reduced costs of providing such services or equipment on such businesses.

(2) TELECOMMUNICATIONS FACILITIES.—

(A) IN GENERAL.—No funds shall be made available under this section for telecommunications facilities, including fiber-optic lines, satellite and other facilities, to be used to receive or transmit into or out of the business communications or computer center if—

(i) not later than 45 days after receiving a request from a business, approved by the Administrator to participate in the program established under this section, that desires to establish a communications or computer center, or from such a center approved by the Administrator to participate in the program established under this section, a local exchange carrier providing telephone service as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)) shall agree to provide such business or center with access to such telecommunications facilities or services as requested by such business or center, and approved by the Administrator, for the telecommunications project that is being proposed; and

(ii) not later than 150 days after receiving a request as described in clause (i), the local exchange carrier shall have provided such access to telecommunications facilities and services as described in such clause or have taken substantial steps toward providing such access; and

(iii) not later than 250 days after receiving a request as described in clause (i), the project to provide the access referred to in clause (ii) is completed.

(B) EXCEPTIONS.—This paragraph shall not apply to telecommunications terminal equipment, interactive video equipment and other hardware and software not directly required to receive or transmit into or out of a building or other facility.

(c) EXPEDITING COORDINATED REA TELEPHONE LOANS.—The Administrator shall establish and implement procedures to assure that loans and advance of funds to local exchange carriers providing telephone service as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)) in rural areas, as defined in this Act, to provide telephone services associated with grants under this section, receive expedited consideration and determination as compared to requests for loans and advances of funds for other telephone purposes.

(d) INFORMATIONAL EFFORTS.—The Administrator shall establish and implement procedures to carry out informational efforts to advise businesses located in rural areas concerning the program authorized by this section.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, $10,000,000 in each of the fiscal years 1990 through 1994. Amounts appropriated under this subsection shall remain available until expanded.

TITLE III—FOCUS ON RURAL AMERICA BY THE DEPARTMENT OF AGRICULTURE

SEC. 301. EXTENSION SERVICE.

Section 502 of the Rural Development Act of 1972 (7 U.S.C. 2662) is amended by adding at the end thereof the following new subsection:

"(g) RURAL ECONOMIC AND BUSINESS DEVELOPMENT.—

"(1) IN GENERAL.—The Secretary shall establish an Extension Service rural economic and business development program to enable States or counties to employ specialists as Cooperative Extension Service staff of the State or county to assist individuals in creating new businesses, or to assist existing businesses, and to assist such businesses regarding advanced telecommunications, computer technologies, technical or management assistance, business and financial planning, and other related matters, and to assist community leaders in community economic analysis and strategic planning.

"(2) FUNCTION OF SPECIALISTS.—Specialists employed under paragraph (1) shall provide economic development information and assistance concerning new business creation, business planning and advice, advanced telecommunications, business management, computer operations, and other technical assistance to community leaders and private sector entrepreneurs operating in the State or county that employs such specialist.

"(3) PROCEDURES AND LIMITATIONS.—The Secretary shall establish policies, procedures and limitations that shall apply to States and counties that desire to participate in the program established under this subsection. States and counties shall determine the types of rural economic and business development specialists that are needed by such States and counties.

"(4) PAYMENT OF SALARY.—The Secretary shall make grants to States and counties that participate in the program established under this section in an amount equal to 60 percent of the total amount of the salary paid to any specialists employed under such program, and the State or county shall provide funds for the remaining 40 percent of such salary.

"(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 in fiscal year 1990, $10,000,000 in fiscal year 1991, $15,000,000 in fiscal year 1992, and $20,000,000 in fiscal year 1993 and each subsequent fiscal year, to carry out this section. Amounts appropriated under this section shall remain available until expended".

SEC. 302. RURAL DEVELOPMENT ASSISTANCE INFORMATION AND AVAILABILITY.

The Rural Development Act of 1972 (7 U.S.C. 2651 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 509. NEED AND AVAILABILITY OF RURAL DEVELOPMENT ASSISTANCE.

"(a) ESTABLISHMENT OF PROGRAM.—Not later than 180 days after the date of enactment of this section, the Secretary shall establish a program to study economically distressed counties in a variety of States that have high concentrations of nonmetropolitan counties with low per capita income.

"(b) EVALUATION.—When conducting a study of counties under subsection (a), the Secretary shall evaluate the need of such counties for rural development assistance, the nature of the assistance needed, and the availability of such assistance.

"(c) REPORT.—Not later than September 30, of each of the fiscal years 1990 through 1993, the Secretary shall prepare and

submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the results of the studies and evaluations conducted under this section and on any action taken by the Secretary to improve economic conditions in rural counties.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

"SEC. 510. RURAL DEVELOPMENT ASSISTANCE INFORMATION.

"(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish a program, to be operated in conjunction with the National Rural Information Center Clearinghouse established within the National Agricultural Library, to provide information to local rural communities, nonmetropolitan counties, and rural areas concerning rural development matters and the availability of Federal rural development assistance.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.".

SEC. 303. REPORT ON COORDINATION OF RURAL DEVELOPMENT ACTIVITIES.

Not later than September 1, 1989, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the recommendations of the Secretary concerning better coordination of the rural development activities of the Farmers Home Administration, the Forest Service, the Soil Conservation Service, the Agricultural Research Service, the Agricultural Stabilization and Conservation Service, the Rural Electrification Administration, the Extension Service and the Office of Transportation.

SEC. 304. REPORT ON DATA PROCESSING FEASIBILITY IN RURAL AREAS.

(a) STUDY.—Not later than 90 days after the date of enactment of this Act, the Secretary shall conduct a study that—

(1) assesses the data processing functions administered by the Secretary;

(2) analyzes whether or not the current data processing functions of the Department of Agriculture, and the future processing functions, may be conducted in rural areas at similar or reduced costs; and

(3) assesses any other information that the Secretary determines appropriate to analyze the potential for locating current and expanded data processing jobs in rural areas.

(b) REPORT.—Not later than 270 days after the date of enactment of this Act, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the results of the study conducted under subsection (a).

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $250,000.

TITLE IV—RURAL BUSINESS AND EMPLOYMENT ASSISTANCE

SEC. 401. LOCAL TECHNICAL ASSISTANCE GRANTS.

(a) IN GENERAL.—The Secretary shall make grants to States, counties, towns, regional organizations, and other public bodies, nonprofit private community development corporations, or other like entities for the purposes described in subsection (b).

(b) USE OF GRANTS.—

(1) IN GENERAL.—Grants made under this section shall be used—

(A) to identify and analyze business opportunities, including opportunities in export markets, that will use local rural economic and human resources;

(B) to identify, train, and provide technical assistance to existing or prospective rural entrepreneurs and managers;

(C) to establish business support centers and otherwise assist in the creation of new rural businesses, the development of methods of financing local businesses, and enhancing the capacity of local individuals and entities to engage in sound economic activities; and

(D) for regional, community, and local economic development planning and coordination.

(2) RESTRICTION ON USE.—Funds appropriated under this section may not be used for—

(A) political activities; or

(B) any activities, the effect of which is to relocate existing jobs and businesses.

(c) ELIGIBLE PROJECTS.—Grants may be made under this section only for a project intended to benefit a rural area.

(d) APPLICATION.—To receive a grant under this section an entity of the type described in subsection (a) shall submit an application to the Secretary at such time, in such form, and containing such information as the Secretary may require.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $7,500,000 for each fiscal year.

SEC. 402. PROVIDING ASSISTANCE THROUGH LOCAL GOVERNMENTS AND NONPROFIT PRIVATE CORPORATIONS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) is amended—

(1) by inserting after "may select" the following: ", or to private nonprofit development corporations approved by the Secretary,"; and

(2) by adding at the end thereof the following new sentence: "To the extent that private nonprofit development corporations receive grants under this paragraph, such corporations shall coordinate their efforts to provide services or assistance with such grants with local, regional, and State governments as appropriate.".

SEC. 403. RURAL TECHNOLOGY ASSISTANCE GRANTS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) (as amended by section 402) is further amended—

(1) by inserting "(A)" after "(11)"; and

(2) by adding at the end thereof the following new subparagraphs:

"(B)(i) The Secretary shall make grants to States, counties, towns, regional organizations, community development corporations, or like entities, for the purposes described in clause (ii).

"(ii)(I) Grants made under this subparagraph shall be used to—

"(aa) promote the use of advanced telecommunications, related advanced technologies, and computers by the recipients of such grants in rural areas;

"(bb) assist in the creation of new rural businesses or the expansion of existing rural businesses through the provision of telecommunication and computer technology, technical assistance, and business planning to such businesses; and

"(cc) otherwise promote the purposes of this Act.

"(II) Funds appropriated under this subparagraph may not be used for—

"(aa) political activities; or

"(bb) any activities, the effect of which is to relocate existing jobs and businesses.

"(iii) Grants may be made under this subparagraph only for a project intended to benefit a rural area.

"(iv) To receive a grant under this subparagraph an entity of the type described in clause (i) shall submit an application to the Secretary at such time, in such form, and containing such information as the Secretary may require.

"(v) There are authorized to be appropriated to carry out this subparagraph $5,000,000 for each fiscal year.".

SEC. 404. RURAL EMERGENCY ASSISTANCE LOANS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) (as amended by sections 402 and 403), is further amended by adding at the end thereof the following new subparagraph:

"(C)(i) The Secretary shall establish and implement a program to make loans for the benefit of any town or city that—

"(I) has a population of less than 20,000 individuals within its outer boundaries; and

"(II) is financially unable to obtain funds as quickly as needed to correct emergency conditions or situations needing urgent attention.

"(ii) The Secretary shall promulgate regulations—

"(I) targeting the program established under this subparagraph towards needy communities in rural areas;

"(II) setting forth a definition of 'emergency conditions or situations needing urgent attention'; and

"(III) requiring that the Secretary approve or reject applications within 30 days of their receipt.

"(iii) The Secretary shall limit the amount of loans provided to the same borrower under this subparagraph to $50,000, and the term of such loans shall not exceed 2 years.

"(iv) The Secretary may respond to the credit needs of rural towns or cities eligible to participate in the program authorized under this subparagraph by making loans that are eligible for refinancing after the expiration of the 2-year period described in clause (iii), and payments under such loans may be set at a level that is at a sufficiently low level during such 2-year period so that the financially troubled town or city can participate in the program established under this subparagraph. The Secretary shall assist such borrowers in obtaining financing through existing Farmers Home Administration programs so that such borrowers are able to pay the balance due on each loan at the end of such 2-year period.

"(v) There are authorized to be appropriated $2,500,000 for fiscal year 1990, and $5,000,000 for fiscal year 1991 and for each subsequent fiscal year, to carry out the emergency lending program authorized by the program established under this subparagraph.".

TITLE V—NATIONAL RURAL INFORMATION CENTER CLEARINGHOUSE

SEC. 501. NATIONAL RURAL INFORMATION CENTER CLEARINGHOUSE.

(a) ESTABLISHMENT.—The Secretary shall establish, within the National Agricultural Library, in coordination with the Extension Service, a National Rural Information Center Clearinghouse (hereinafter referred to in this title as the "Clearinghouse") to

perform the functions specified in subsection (b).

(b) FUNCTIONS.—The Clearinghouse shall provide and distribute information and data to any industry, organization, or Federal, State, or local government entity, on request, about programs and services provided by Federal, State, and local agencies and private nonprofit organizations and institutions under which individuals residing in, or organizations and State and local government entities operating in, a rural area may be eligible for any kind of assistance, including job training, education, health care, and economic development assistance, and emotional and financial counseling.

(c) FEDERAL AGENCIES.—On request of the Secretary, the head of a Federal agency shall provide to the Clearinghouse such information as the Secretary may request to carry out the functions specified in subsection (b).

(d) STATE AND LOCAL AGENCIES AND NONPROFIT ORGANIZATIONS.—The Secretary shall request State and local governments and private nonprofit organizations and institutions to provide to the Clearinghouse such information as such agencies and organizations may have about any program or service of such agencies, organizations, and institutions under which individuals residing in a rural area may be eligible for any kind of assistance, including job training, educational, health care, and economic development assistance, and emotional and financial counseling.

(e) AUTHORIZATION.—There are authorized to be appropriated to carry out this section $500,000 for each of the fiscal years 1990 through 1994.

TITLE VI—WATER AND SEWER ASSISTANCE.

SEC. 601. WATER AND WASTE FACILITY GRANTS.

Section 306(a)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by striking out "$154,900,000" and inserting in lieu thereof "$204,900,000".

SEC. 602. EMERGENCY COMMUNITY WATER ASSISTANCE GRANT PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—Subtitle A of the Consolidated Farm and Rural Development Act is amended by inserting after section 306 (7 U.S.C. 1926) the following new section:

"SEC. 306A. EMERGENCY COMMUNITY WATER ASSISTANCE GRANT PROGRAM.

"(a) IN GENERAL.—The Secretary shall provide grants in accordance with this section to assist the residents of rural areas and small communities to secure adequate quantities of safe water—

"(1) after a sudden and significant decline in the quantity or quality of water available from the water supplies of such rural areas and small communities; or

"(2) when repairs, partial replacement, or maintenance efforts on established water systems would remedy an acute shortage of quality water.

"(b) PRIORITY.—In carrying out subsection (a), the Secretary shall give priority to projects described in subsection (a)(1), and provide at least 70 percent of all such grants to such projects.

"(c) ELIGIBILITY.—To be eligible to obtain a grant under this section, an applicant shall—

"(1) be a public or private non-profit entity; and

"(2) in the case of a grant made under subsection (a)(1), demonstrate to the Secretary that the decline referred to in such subsection occurred within 2 years of the date the application was filed for such grant.

"(d) USES.—Grants made under this section may be used for water line extensions from existing systems, laying of new water lines, repairs, significant maintenance, digging of new wells, equipment replacement, hook and tap fees, and any other appropriate purpose associated with developing sources of, or treating, storing, or distributing water, and to assist communities in complying with the requirements of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) or the Safe Drinking Water Act (42 U.S.C. 300f et seq.).

"(e) RESTRICTIONS.—No grant provided under this section shall be used to assist any rural area or community that—

"(1) includes any area in any city or town with a population in excess of 3,000 inhabitants according to the most recent decennial census of the United States; or

"(2) has a median household income in excess of the State nonmetropolitan median income according to the most recent decennial census of the United States.

"(f) MAXIMUM GRANTS.—Grants made under this section may not exceed—

"(1) in the case of each grant made under subsection (a)(1), $500,000; and

"(2) in the case of each grant made under subsection (a)(2), $75,000.

"(g) FULL FUNDING.—Subject to subsection (e), grants under this section shall be made in an amount equal to 100 percent of the costs of the projects conducted under this section.

"(h) APPLICATION.—The Secretary shall develop a nationally competitive application process to receive grants under this section. The process shall include criteria for evaluating applications, including population, median household income, and the severity of the decline in quantity or quality of water.

"(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $25,000,000 for each fiscal year.".

(b) IMPLEMENTATION.—

(1) REGULATIONS.—The Secretary shall publish—

(A) interim final regulations to carry out section 306A of the Consolidated Farm and Rural Development Act not later than 45 days after the date of enactment of this Act; and

(B) final regulations to carry out section 306A of such Act not later than 90 days after the date of enactment of this Act.

(2) FUNDS.—

(A) OBLIGATION.—The Secretary shall designate 70 percent of the funds made available for the first fiscal year for which appropriations are made under section 306A(h) of the Consolidated Farm and Rural Development Act not later than 5 months after the date such funds are appropriated.

(B) RELEASE.—The Secretary may release funds prior to the issuance of final regulations under paragraph (1)(B) for grants under section 306A(a)(1) of Consolidated Farm and Rural Development Act.

SEC. 603. LOANS RATES APPLICABLE TO HEALTH CARE AND RELATED FACILITIES.

Section 307(a)(3) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)) is amended by adding at the end thereof the following new subparagraph:

"(C) Notwithstanding the provisions of subparagraph (A), the Secretary shall establish loan rates for health care and related facilities that shall be based solely on the income of the area to be served, and such rates shall be otherwise consistent with the provisions of such subparagraph.".

SEC. 604. RURAL WASTE WATER TREATMENT CIRCUIT RIDER GRANT PROGRAM.

(a) ESTABLISHMENT.—The Administrator of the Farmers Home Administration shall establish a national rural waste water circuit rider grant program that shall be modeled after the existing National Rural Water Association rural water circuit rider program that receives funding from the Farmers Home Administration.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $4,000,000 each fiscal year to carry out the program established under subsection (a).

TITLE VII—MISCELLANEOUS

SEC. 701. MONITORING THE ECONOMIC PROGRESS OF RURAL AMERICA.

(a) BUREAU OF THE CENSUS.—The Director of the Bureau of the Census shall expand the data collection efforts of the Bureau to enable the Bureau to collect statistically significant data concerning the changing economic condition of rural counties and communities in the United States, including data on rural employment, poverty and income, and other information concerning the rural labor force.

(b) EMPLOYMENT REQUIREMENTS.—The Bureau of the Census shall, to the maximum extent practicable, employ residents of nonmetropolitan counties for the expanded rural data collection operations conducted in fiscal year 1990.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary for each fiscal year to carry out subsection (a).

SEC. 702. HISTORIC PRESERVATION REQUIREMENTS.

With respect to applications for assistance under this Act, the Secretary of the Interior, in consultation with the Assistant Secretary and the National Trust for Historic Preservation in recognition of its charter duties, shall prescribe and implement regulations concerning projects funded under this Act and their relationship with the provisions of Acts entitled—

(1) "An Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes", approved October 15, 1966 (16 U.S.C. 470 et seq.); and

(2) "An Act to provide for the preservation of historical and archaeological data (including relics and specimens) which might otherwise be lost as a result of the construction of a dam", approved June 27, 1960 (16 U.S.C. 469 et seq.).

SEC. 703. SEWER AND WATER LENDING BY BANKS FOR COOPERATIVES.

The banks of the Farm Credit System that are authorized to extend credit under title III of the Farm Credit Act of 1971 (12 U.S.C. 2121, et seq.) are authorized to make and participate in loans and commitments, and to extend other technical and financial assistance for any of the purposes specified in such title, including refinancing for such purposes, to any entity that has received or is eligible to receive a loan made or insured by the Secretary of Agriculture under section 306(a)(1) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(1)).

SEC. 704. EMPLOYMENT AND TRAINING IN RURAL AREAS.

(a) EXPANDING AVAILABILITY OF EMPLOYMENT AND TRAINING IN RURAL AREAS.—Section 6(d)(4)(E) of the Food Stamp Act of

1977 (7 U.S.C. 2015(d)(4)(E)) is amended by adding at the end thereof the following new sentence: "States may designate one or more areas of the State as areas in which the program shall operate only to serve voluntary participants, but such designations shall not excuse the State from compliance with the performance standards described in subparagraph (L).".

(b) IMPROVING SELF-EMPLOYMENT OPPORTUNITIES.—

(1) AUTHORIZATION FOR PROGRAMS.—Section 6(d)(4)(B) of the Food Stamp Act of 1977 (7 U.S.C. 2015 (d)(4)(B)) is amended—

(A) by redesignating clause (vi) as clause (vii); and

(B) by inserting after clause (v) the following new clause:

"(vi) Programs designed to increase the self-sufficiency of recipients through self-employment, including programs that provide start-up assistance for self-employment ventures.".

(2) EXEMPTION FOR RESOURCES USED IN PROJECTS.—The third sentence of section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended by inserting before the period the following: ", and any resources necessary to allow the household to carry out a plan for self-sufficiency approved by the State agency under section 6(d)".

(c) PROGRAM ACCESSIBILITY FOR PEOPLE ENGAGED IN EMPLOYMENT AND TRAINING ACTIVITIES.—

(1) STATE PLAN REQUIREMENT.—Section 11(e)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(2)) is amended by adding at the end thereof the following new sentence: "The State agency shall administer the program in a manner such that its offices and points of issuance in rural areas of each such State, as determined by the State, are open at sufficient locations and during sufficient hours to ensure that applicants and participants who are employed or who are participating in an education, training, work, or rehabilitation program under section 6(d), title IV of the Social Security Act (42 U.S.C. 601 et. seq.), or under title I of the Rehabilitation Act of 1973 (29 U.S.C. 720 et seq.) may—

"(A) comply with the requirements of the food stamp program (including reporting changes, providing verification, appearing at interviews, and submitting applications and requests for recertification); and

"(B) obtain and use certification documents and coupons without being absent for or rescheduling normal hours of employment or hours of participation in such education, training, work, or rehabilitation program.".

(2) STANDARDS.—Section 16(b)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2025(b)(1)) is amended by inserting ", and individuals participating in employment and training programs," after "employed individuals".

SEC. 705. VEHICLES NECESSARY TO HAUL FUEL OR WATER.

Section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) (as amended by section 704(b)(2)), is further amended by adding at the end thereof the following new sentence: "The Secretary shall exclude from financial resources, the value of a vehicle that each household residing in a nonmetropolitan area uses to haul water for use in such household's residence that lacks indoor running water or to haul fuel.".

SEC. 706. ASSISTANCE TO COMMUNITIES DEPENDENT ON NATURAL RESOURCES.

(a) ADDITIONAL FUNDS FOR THE REFORESTATION TRUST FUND.—Section 303(b)(2) of Public Law 96-451, relating to the Reforestation Trust Fund (16 U.S.C. 1606a(b)(2)) is amended by striking "$30,000,000" and inserting "$40,000,000".

(b) ADDITIONAL PURPOSES FOR WHICH FUND AVAILABLE.—Section 303(d) of such Act (16 U.S.C. 1606a(d)) is amended—

(1) in paragraph (1) by striking "and";

(2) by redesignating paragraph (2) as paragraph (3); and

(3) by inserting after paragraph (1) the following:

"(2) economic diversification assistance to communities which are dependent to a significant degree upon Forest Service resource management decisions for their local economic activity; and".

SEC. 707. ASSISTING DISTRESSED RURAL HOSPITALS AND HEALTH CARE FACILITIES.

The Secretary shall establish and implement a program that is similar to the program established under section 353 of the Consolidated Farm and Rural Development Act (7 U.S.C. 2001), except that the debt restructuring and loan servicing procedures shall apply to delinquent community facility program loans (rather than delinquent farmer program loans) made by the Farmers Home Administration to a hospital or health care facility under section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 306(a)). Not later than 120 days after the date of enactment of this Act, the Secretary shall promulgate regulations, as modeled after those promulgated under such section 353, that implement the program established under this section.

TITLE VIII—EFFECTIVE DATE AND IMPLEMENTATION

SEC. 801. EFFECTIVE DATE.

(a) IN GENERAL.—Unless otherwise provided in this Act, this Act shall become effective on October 1, 1989.

(b) REGULATIONS.—

(1) TITLE I.—Final regulations implementing subtitle A, of title I, shall be issued by the Rural Partnership Investment Board not later than March 30, 1990.

(2) SECTIONS 704 AND 705.—Final regulations implementing sections 704 and 705 shall be issued not later than May 1, 1990.

MAJOR CONCEPTS IN RURAL DEVELOPMENT LEGISLATION

1. Business Investment Partnerships.—Stimulate banks to greatly increase their investments in new or expanding businesses in rural America by providing federal seed money to local revolving funds to invest in conjunction with banks, or other financial institutions. These revolving funds would leverage the federal dollars, issued by a federal board, with private sector dollars and use the revolving fund for loans, guarantees or equity positions. These efforts will help diversify local rural economies, reduce rural dependence on farm support programs, and eventually increase federal and state tax revenues. States, economic development districts, counties, towns, other public bodies, and economic development corporations could apply to operate these revolving funds.

2. Focus Efforts of the Rural Electrification Administration.—Set up a Rural Economic Development Board within REA to promote new business creation through business incubators and technical assistance. Require rural electrics to target their investment activities (using their authority to invest 15% of the total utility plant) on business creation, incubator programs, and business assistance (long term planning, computer operations, telecommunications).

3. Telecommunications.—Improve rural phone lines to make rural areas more competitive (in some areas, for some businesses, there is a need for digital switching, fiber optics or satellite downlinks to permit local companies to effectively engage in on-line computer activities and the transmission of images).

4. Business Link.—Enhance rural business telecommunications links for marketing, product ordering, inventory management and other purposes.

5. Star Schools.—Improve quality of rural education through use of telecommunications links.

6. Health Link.—Improve data transmission over rural phone lines to improve health care (on-line hookups with teaching hospitals, transmission of diagnostic images and other medical information, emergency aid).

7. Require Better USDA Coordination.—Require USDA to better coordinate its rural activities and to better inform states, counties and local organizations about its rural development efforts.

8. Water and Sewer.—Assist certain rural communities in complying with Safe Drinking Water Act and Clean Water Act.

9. Rural Data Collection.—Require the Census Bureau to collect additional information on rural unemployment, poverty, business creation and per capita income.

10. National Agricultural Library Information Clearinghouse.—Require National Agricultural Library to set up a clearinghouse for rural development information and materials likely to assist rural areas.

11. Job Training.—Modify the Job Training Partnership Act to improve its operation in rural areas.

12. Nutrition.—Improve food stamp employment and training efforts in rural areas.

13. Enhance Prior Federal Investments.—Fund programs to more fully utilize and protect investments already made in rural America.

14. Extension Service.—Allow states to hire additional Extension Service staff with a 60 percent federal match, to provide information and training on business creation, computer and telecommunications applications, financial planning, business management and other related matters.

15. Historic Preservation.—Preserve historic sites in rural development efforts.

16. Community Strategy Assistance.—Require the Secretary to evaluate economically troubled counties regarding the need for rural development assistance.

Mr. HEFLIN. Mr. President, the Rural Partnerships Act, legislation that I am cosponsoring today, acknowledges that the time has come for the Federal Government to reassess its role and responsibility regarding America's 62 million rural citizens.

The 1980's have not been good for rural America. Rural problems run much deeper than agriculture, with its well-known income crisis. Rural community problems also include inadequate water and sewer systems, poor schools, lack of access to quality medical services, and a severe shortage of funds to solve these problems.

Rural economic conditions, compared to urban conditions, have also worsened significantly in the 1980's. The seriousness of these problems is

shown by these rural and urban comparisons:

Rural unemployment rates are about 31 percent higher.

Rural per capita income averages 25 percent lower.

Rural poverty is one-third higher.

Rural school dropout rates are higher.

The rural population has higher proportions of both older persons and younger persons. These groups require higher expenditures per capita on both health care and education.

The economic recovery in basic rural industries—agriculture, mining, forestry, and light manufacturing—has been very slow. These rural problems cut a wide swath across our rural communities, and center on issues of jobs, community facilities, and human development. Compounding these rural economic problems has been a reduction of nearly 50 percent in funding for Federal Government programs in rural areas in the 1980's.

The Rural Partnerships Act recognizes that rural economic development efforts must begin with local initiative, and be guided by local leadership, in both the public and private sectors. The Act also recognizes that it is essential for the Federal Government to be an active partner in these efforts. Through this act the Federal Government will help provide an environment in which local efforts can be most effective. The programs it authorizes will be a catalyst for rural economic development. The Act will help rural people create more jobs and income through revolving loan funds. It will help improve the quality of community facilities—such as water, sewer, and telecommunications—that support economic activity, through broader lending authorities. And it will strengthen educational, health, and business services that improve the skills and abilities of rural people.

This act will strengthen organizations and agencies already working to solve rural America's problems. It will build on programs that we know are working well, like the rural electric cooperatives, regional economic development agencies, and the Cooperative Extension Service. The Rural Partnerships Act will strengthen current partnerships between local, State, and Federal levels of government. It will enhance partnerships between the private sector and the public sector. And it will revitalize the partnership between rural Americans and all Americans.

Mr. President, I wish to add my special words of praise for the leadership of Senator LEAHY in moving forward with this legislation, for his work with the Budget Committee in endeavoring to get additional moneys to be made available, under our tight budgetary posture, for rural America. Senator LEAHY took the leadership in regards to his rural development idea and program last year. We had several sessions of markup. Then the drought came and the necessity of putting the rural development legislation on the back burner until we were able to deal with the drought assistance was preeminent in the minds of Senator LEAHY and others who are interested in helping rural America, whether it be in development or whether it be in drought assistance.

We have had outstanding leadership. Senator MCCONNELL, from Kentucky, has been vitally interested in this, as have a number of Senators. Senator DASCHLE has been head of a task force designed to try to bring about improvement in rural America. Senator CONRAD has worked diligently on this and had his Governor down recently who gave testimony concerning the need for rural development in the Northern States of this country.

I can attest that we need rural development in a tremendous manner in the Southern part of our country and throughout America there is a need for much enhancement in regards to rural America.

There are some 63 million rural citizens who live in rural America and the problems confronting them are many. I hope that we can move expeditiously on this and that we can do something to improve the economic plight, the social plight, the health plight, the educational plight of those that live in rural America.

Mr. MCCONNELL. Mr. President, I wish to commend the distinguished chairman of the Agriculture Committee, Senator LEAHY, and the chairman of the Rural Development Subcommittee, Senator HEFLIN, for their important leadership on this most important issue.

My State, Mr. President, is largely rural and small town, 1 of the most rural and small-town States of the 50 States. We have a vital interest in what happens or is not happening, which is currently the case in rural America.

Mr. President, we do not want everybody to live in the city. That is not good for the cities; it is not good for America. Until we provide new opportunities for rural and small-town Kentuckians and Americans to stay right where they want to stay, whether it is job opportunities or opportunities for better education, then we will continue to have nothing but an influx of folks into the cities.

So, Mr. President, I am grateful for the opportunity to participate with Senator LEAHY, Senator HEFLIN, Senator CONRAD, and others in crafting what we think will be a meaningful and truly bipartisan bill for the betterment of rural America.

Mr. MCCONNELL. Mr. President, I rise today along with the distinguished chairman of the Agriculture Committee, Senator LEAHY, and Senator HEFLIN, as an original sponsor of the Rural Partnerships Act of 1989.

For several years the combination of slower economic growth and a net loss of population has pushed rural Kentucky and rural America into a gradually worsening economic situation. The legislation we are introducing is the first step in correcting that problem and restoring a better way of life to not only the more than 1 million citizens of rural Kentucky, but the countless others across America as well.

The characteristics of rural America are changing rapidly. The long-held philosophies of how to best deal with the problems that exist in the rural communities may not still be true and now is the time for some very significant and meaningful changes in the policies and tools at all levels of government. What is not needed is yet another level of bureaucracy and our legislation will not create one. Almost every department within the executive branch of the U.S. Government already has some program that falls under the umbrella of rural development and this bill will redirect and refocus their efforts on behalf of rural America while allowing individual communities to identify their own most pressing needs and to work closely with the government.

There has been no lack of interest in developing new policy, but there has been a lack in focus and coordination of effort. If a rural development initiative is to be effective the Federal, State, and local governments must be involved and working together to the mutual benefit of those in need. There are many organizations that have a sincere interest in rural areas and most should be encouraged and allowed to participate in any rural policy that is created.

In Kentucky, for instance, we are blessed with a strong group of area development districts, a vibrant Cooperative Extension Service and rural electric cooperative that have been all working hard to make needed improvements in rural areas. They are not waiting for the Federal Government to do something—they are working hard to do the best with what already exists and our bill will facilitate their efforts. We will need their input in the efforts to come.

Mr. President, I want to see something done for rural America and I believe this bill is the place to start. This should not become a partisan issue: The problems in our rural communities span all political boundaries and the last thing we in Congress can afford to do is waste time bickering when action is needed. I know that there have already been bills introduced in this Congress that address some specific areas of rural develop-

ment and I support what many of them are designed to do. However, I believe that this body has the obligation to see that a major comprehensive rural development initiative is passed into law and the Rural Partnerships Act of 1989 is the vehicle to accomplish this.

Mr. President, I again commend my distinguished chairman for his concerted effort on this vital issue. Rural America needs help and it needs it now—what it does not need is further inaction by the Congress. I look forward to the upcoming hearings on this bill and I would strongly urge my colleagues to examine this legislation.

Mr. CONRAD. Mr. President, I am pleased to rise today as an original cosponsor of the Rural Partnerships Act of 1989.

I want to first especially commend the majority leader, Senator MITCHELL, and the chairman of the Agriculture Committee, Senator LEAHY, for their leadership in addressing the problems facing rural America. I deeply appreciate, Mr. President, their rapid response to my suggestion that a rural development task force be performed.

I also want to acknowledge the favorable response of those on the other side of the aisle, led by the Republican leader, Senator DOLE, and the ranking Republican on the Agriculture Committee, Senator LUGAR, who joined in this effort, along with Senator MCCONNELL; and, of course, Senator HEFLIN, on our side, who is chairman of the Rural Development Subcommittee of the Agriculture Committee.

The task force signals a commitment—to fashion a comprehensive rural development initiative in the 101st Congress.

We have made great progress in addressing rural issues. Today, the Senate Development Task Force has 33 members, many of whom are chairmen and senior members of key committees. The Budget Committee has included $300 million in budget authority specifically for rural development. As a Democratic vice-chairman of the task force, I intend to work with the chairmen to marshal support for a rural development bill.

Mr. President, rural America needs help. It is apparent that rural areas are facing serious economic decline. Simultaneously rural areas have faced declining support from the Federal Government.

Faced with new job opportunities and inadequate services and infrastructure, young Americans living in rural areas make an understandable choice: They leave. In North Dakota we are losing many of our best educated and our most highly trained—those who would lead their communities—because there are not opportunities for them.

Mr. President, we must put opportunity back in rural America. Yesterday, I introduced the Rural Investment Fund Act of 1989 which embraces this concept. This bill addresses a key problem for rural areas, the lack of adequate capital for business retention, creation, and expansion.

My bill promotes business growth and new job opportunities by providing Federal seed capital to establish State and local revolving investment funds. Partnerships will be funded only where local institutions, such as banks, local development organizations and others, agree to provide matching investment capital.

All levels of Government must join together, in partnership, with the private sector to foster and encourage economic growth and job opportunities in rural areas. The involvement and support of all public and private sectors is crucial to ensure economic development initiatives are successful.

I commend Senator LEAHY for including the investment fund in the legislation he is introducing today. The Rural Partnership Act is a comprehensive framework for our rural development efforts this year.

As a nation, we can no longer watch the decline of rural America. As partners, we can help. We can work as partners to revitalize the rural economy. Today we have made a step toward that partnership. I urge my colleagues to participate with the Rural Development Task Force to make the difference in rural America.

Mr. President, I ask unanimous consent that a letter that I sent to the majority leader, Mr. MITCHELL, also appear in the RECORD immediately following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, January 23, 1989.

Senator GEORGE MITCHELL,
Majority Leader,
The Capitol, Washington, DC.

DEAR MR. LEADER: I write to request your consideration of the possibility of forming a Senate Leadership Task Force on Rural Development.

As you know, rural America is facing severe economic decline. Unemployment, underemployment, poverty, and outmigration are increasingly serious problems in nonmetropolitan counties throughout the nation. The crisis was prompted by a severe agricultural recession and sharp decline in agricultural input industries, from which many parts of the country have not yet recovered. Increasing global competition has crippled rural areas, which lag behind in the technological innovation required to compete in a new global economy. Simultaneously, rural areas have faced declining support from the federal government.

Population growth in rural and small town areas has slowed greatly in the 1980's. With rural areas beset by the farm crisis, employment cutbacks in major industries, and a slow recovery from national recession, fewer people are moving to the country and more rural people are moving to the cities for work. The US Department of Agriculture estimates that rural areas lost 632,000 persons due to outmigration in 1985-86, a larger outmigration than the average of either the 1950's or 1960's and a dramatic turnabout from the 1970's, when nonmetro areas had net gains in population. Some indicators even suggest the worst is not yet over.

Those who remain in rural areas face hardship. Inadequate education, social services and housing mar the rural landscape. Consider the following alarming facts about rural America:

In 1986, more than 1,000 rural counties had an annual average unemployment of 9 percent or higher, according to the US Department of Agriculture.

The rural economy experienced a net loss of jobs between 1980 and 1987.

Rural America has 9.7 million people living in poverty—30 percent of the nation's poor.

Rural areas account for 36 percent of the nation's substandard housing.

Rural areas have 25 percent of the population aged 25 and older, but only 16 percent of the nation's college graduates.

In 1980's, 161 rural hospitals have closed and 600 more are on the brink of closure.

Deregulation has resulted in reduced rail and bus service to rural areas and substantially higher costs for air service.

Rural Americans suffer health risks from their water supply and waste disposal systems.

Most rural areas lack one or more of the tools to respond: an educated, trainable workforce, available private capital and technical assistance to support new and existing businesses, adequate infrastructure, and ample information about planning and effective economic development strategies.

As you are well aware, the Reagan years have done little to halt the economic decline of rural areas. From 1980 to 1986, the federal budget for programs important to rural communities was cut by two thirds. the Office of Rural Development Policy has been abolished.

The mandate for action is clear. Like the national and international economies, the urban and rural economies are interdependent. We cannot afford to wait—fully a quarter of Americans live in rural areas. These areas provide esential foodstuffs and are the home to some of this nation's most valuable resources. Revitalizing the rural economy must be a high priority in the 101st Congress, and I believe this requires a comprehensive approach, encompassing major improvements in agriculture, education, health care, housing, transportation and infrastructure, technological innovation and other steps to encourage investment and growth.

Because the purview of any federal action on rural development must be very wide, I propose the formation of a Rural Development Task Force, comprised of senior members of relevant Senate authorizing committee. Through such a process, we could address rural development in a thorough and cohesive manner. We must have a national strategy on rural development, not a regional one. A Senate Task Force on Rural Development, which could draw on the much-needed expertise of members from all the relevant committees, would be an appropriate starting point for the development of comprehensive legislation.

As you know, agriculture is a principal driving force in the rural economy. I pro-

pose that Senator Leahy, Chairman of the Senate Agriculture Committee, be appointed the chairman of the Senate Task Force. Senator Leahy has distinguished himself as a leader on rural development issues and would make an excellent task force chairman. Senator Heflin, Chairman of the Subcommittee on Rural Development of the Senate Agriculture Committee, is an expert on rural development and should clearly play a key role on this task force.

The Task Force concept is not a new one. Like the Anti-Substance Abuse Task Forces, which were very effective vehicles for producing and passing legislation to combat drug abuse during the 100th Congress, a Rural Development Task Force offers a viable way to pursue this multi-faceted issue.

Because the need is so urgent, and the demand for integrated, comprehensive legislation so clear, I hope you will look favorably upon my suggestion that a Rural Development Task force be formed.

Thank you for your consideration. I look forward to discussing this further with you.

Sincerely,

KENT CONRAD,
U.S. Senator.

Mr. BAUCUS. Mr. President, I am pleased today to join with my colleagues and be an original cosponsor of the Rural Partnership Act of 1989. The introduction of this bill is a critical step in developing solutions to rural America's economic crisis.

In Montana, we understand the problems of the rural economy. We understand them too well.

The last 8 years have been tough. Our basic industries have lost 12,000 jobs. Pay checks have fallen by 25 percent. More people are moving out than moving in.

Montanans work hard. Many studies show that they're the best employees in the world. But they're falling behind.

Why? Because of Federal policies that have, essentially, written us off.

Deregulate. Let the chips fall where they may. If a coastal metropolis thrives at the expense of rural America, so be it. It is the price of progress, and if people don't like it, they can pack up and move.

This heartless laissez-faire approach punishes millions of rural Americans.

And it's inconsistent with our basic values. Our national motto, after all, is not "every man for himself," but "E Pluribus Unum."

Daniel Webster put it well during his famous debate with Senator Hayne of South Carolina. Hayne argued that citizens of the South should not pay for public improvements in the West, because they derived no benefit from them. Webster replied that:

In our contemplation, [states of the South and West] are parts of the same country. States, united under the same general government, having interests, common, associated, intermingled . . . We do not impose geographical limits to our patriotic feeling or regard; we do not follow rivers and mountains, and lines of latitude, to find boundaries beyond which public improvements do not benefit us.

We need to revive this notion. That we're all in this together. That we do not impose geographic limits on our concern for the economic well-being of American families. That, to put it more bluntly, people shouldn't have to pack up and move to the Sunbelt to make a decent living.

That is what our effort here is all about.

We must help rural businesses create jobs for the 21st century. So that our kids can stay in Montana, and Alabama, and Vermont.

To accomplish this, we must concentrate on a few basic tools.

One is telecommunications. Satellites and fiberoptic cables are, today, what highways and railroads were 50 years ago. If we want to compete, we've got to have the best, and that takes aggressive efforts by both business and government.

Another tool is the most basic of all: capital. Today, we have plenty of smalltown entreprenuers. But they cannot get the seed money they need to start new businesses and create new jobs. We need to create incentives that will make this money available.

A third tool is the creation of rural small business "incubators" to help cut down on overhead costs for businesses located in rural areas.

I have introduced bills that would promote these goals. And I look forward to working with Senator LEAHY and my other colleagues to mark up and pass omnibus legislation that will go far to help bring rural America back into the economic mainstream.

With the leadership of Majority Leader MITCHELL, Chairman LEAHY, and Chairman HEFLIN, I am confident that we can develop a solid package and bring it to the Senate floor quickly.

Mr. HARKIN. Mr. President, I want to commend Senator LEAHY for his great leadership and interest in rural development legislation in years past and again this year. I also want to thank Senator HEFLIN for his efforts as chairman of the Subcommittee on Rural Development and Rural Electrification and Senator CONRAD for his strong interest and involvement in rural development.

The need for rural development legislation is clear. Small towns and rural areas often lag far behind the rest of our country in economic progress and several measures of quality of life. Across the Nation countless families have watched as their children and grandchildren leave rural communities to pursue better economic opportunities elsewhere. As people move away the lifeblood and future of these communities slips away.

Our national policy has, in recent years, been speeding headlong toward creating a bicoastal economy focused on a handful of large urban centers. Unless new approaches are taken, these urban-oriented policies will eventually result in the rest of the country becoming a vast, forgotten "flyover" area. This unhealthy trend need not and must not continue. It makes no sense for more and more people to crowd into our urban areas while once vital rural communities whither and perish.

Rural America is resisting this trend, but to revitalize rural communities we need new directions in Federal policy—new directions that help rural communities become part of America's economic mainstream again.

A strong agricultural economy is necessary to the health of rural economies and thus we must ensure that our agricultural policies provide for adequate farm income. But farm income is not by itself sufficient to ensure the economic vitality of rural communities.

We need a strong commitment to invest in the future of our rural communities, just as we have invested in urban communities over the years. Throughout our history small towns and rural communities have been a tremendous source of social and economic wealth. The right policies will help these communities contribute even more to the strength and well being of our Nation.

This legislation contains both new policy directions and investments in the future of our rural communities. We all recognize the need to minimize spending because of the budget deficit. Though the monetary investment in this bill is modest, the legislation will leverage Federal funds by combining them with local resources. The bill will help communities have the capital and information needed to rebuild local economies.

The legislation establishes a program to provide Federal seed money to State and local revolving loan funds to provide capital for business development and job creation. The Rural Electrification Administration will be given new authority and responsibilities for rural economic and business development.

The legislation recognizes the need to meet both traditional infrastructure needs, like sufficient sewer and water capacity, and the new needs of our high technology age, such as computer capable phone systems. I am also pleased that the bill contains emergency water assistance very similar to that in legislation I introduced earlier this year. The REA is given new authority to make loans for water and sewer systems, a pressing need in my State and others. The bill also provides for additional FmHA grants for water and sewer facilities.

The legislation provides for new investments in technology for rural areas, particularly for telecommunications and computer linkages to im-

prove education, health care and access to business information in rural areas.

The role of the Extension Service and USDA in rural development would be strengthened and improved.

Without Federal policies acknowledging the social and economic values of rural life and assisting to rebuild our rural infrastructure, rural America will continue to decline and a valuable part of our heritage will be lost.

The Rural Partnership Act of 1989 reflects a commitment to the enduring and valued role of rural communities in American life.

Mr. DASCHLE. Mr. President, I rise today to commend Senator LEAHY for his commitment to rural development and for his introduction of the Rural Partnerships Act of 1989. I am pleased to join as an original cosponsor of this important legislation.

As a Senator from South Dakota, I am acutely aware of the unique rewards of raising a family and working in rural communities. I am convinced, for example, that my State has a quality of life that is second to none.

I am also acutely aware of the unique problems that face many Americans living in rural communities throughout this country and threaten to rob those communities of some of their vitality. Federal policy has contributed to this unfortunate trend as policymakers struggle with the priority challenge of reducing the Federal deficit by restraining spending. This effort has hit rural programs especially hard.

For the past decade, increasing poverty and unemployment, and the deterioration of health care in rural areas have been largely ignored through the benign neglect of government policies. This year we have a rare opportunity to focus on the problems facing the residents of rural America and provide meaningful solutions that fit within current fiscal restraints.

The Rural Partnerships Act acknowledges the diversity and importance of rural needs by addressing such issues as education, health care, business and community development, and the lack of advanced technologies in rural areas. It is based on the conviction that the broad spectrum of rural problems deserve timely attention and require a multifaceted approach.

The bill also reflects existing budget realities. We can no longer view higher levels of Federal money as the answer to local problems.

The bill also places a high priority on local involvement in the determination of an individual community's basic needs. The Federal government cannot dictate results; its role should be to provide enhanced access to the resources necessary for local attention to local priorities.

We should not attempt to reinvent the wheel, and we should not add unnecessarily to the existing alphabet of programs that can address rural problems. We should, however, ensure that the limited resources available for rural development are invested wisely.

Mr. President, I am particularly pleased that this rural development package is the result of the work and ideas of so many of my collegues on the Senate Agriculture Committee. Chairman LEAHY has aggressively pursued a rural development package that is built on joint initiative and common purpose.

Once again, I commend the chairman for his industry and diligence in generating momentum for this much-needed legislation. I pledge my support to this effort and look forward to timely consideration of the Rural Partnerships Act by the Agriculture Committee.

Mr. KOHL. Mr. President, I am pleased to join many of my colleagues today in introducing the Rural Development Partnership Act. I would like to commend the members of the Agriculture Committee, and especially the chairman of the committee, Senator LEAHY, for their commitment to addressing the needs of rural Americans. I would also like to thank both the majority leader and the Republican leader for their leadership in organizing the rural development task force, which has helped to focus the attention of the Senate on this very important issue.

The problems besetting rural America are all too evident in Wisconsin. While 30 percent of the State's population is located in rural counties, per capita income in these 53 counties in 1986 was 24 percent lower than in the State's urban counties. In contrast to the State's growth in urban employment since 1979, rural employment dropped 2 percent between 1979 and 1986, putting Wisconsin in the bottom 10 States nationally in rural economic growth.

Throughout this country's history, the problems of rural Americans have traditionally been farm sector problems. And until recently, we have depended on our agricultural policy to fix these problems.

Clearly, our agricultural policy is still vitally important to the economies of rural areas—and we must keep that in mind as we begin debate on the 1990 farm bill. Yet, farm families now account for only 2 percent of our population, while 25 percent of Americans still live in rural areas. If we are to meet the needs of these citizens, we need to be innovative, responsive, and efficient in developing Federal assistance for rural America.

This legislation is a good start. It addresses the capital needs of rural businesses by providing Federal seed capital to revolving loan funds, while recognizing the need to leverage non-Federal funds. It encourages rural telephone and electric systems to expand and improve telecommunications links in rural areas. And it provides assistance to rural communities in meeting their clean water and waste disposal needs and requirements. These are all essential to the viability of rural communities.

However, I am somewhat concerned that the revolving loan fund and business incubator provisions as currently envisioned may not be the most cost-effective means of ensuring capital access and business formation in rural communities. In this respect, I would urge the Agriculture Committee to examine these provisions, along with the Rural Capital Access Program legislation introduced recently by Senator LUGAR, to ensure that they maximize leverage of Federal funds.

I am particularly pleased to see this bill address the critical problem of health services in rural areas. Specifically, the authorization of a health link fund, to improve medical information and diagnostic analyses transmittal between rural and urban areas, will be of immense benefit to rural hospitals and health professionals.

The health link fund creates the opportunities for the type of facility I recently proposed. A bill I introduced earlier this month, the Rural Health Improvement Act, authorizes health information technology centers modeled after a center proposed by the Medical College of Wisconsin. To meet the needs of managing the processing the quantity of medical information available today, these centers would link rural and urban health professionals throughout the country by means of improved communication. I look forward to working with the Agriculture Committee and with Senator PRYOR, chairman of the Aging Committee and a sponsor of similar legislation to facilitate the development of this type of facility.

Mr. President, rural development legislation is badly needed. I am hopeful that this bill will provide the basis for a strong, bipartisan rural development initiative—a package that will include not just components of this legislation, but legislation addressing rural health care costs and availability as well. And I hope that we can pass this legislation this year.

Mr. President, I again commend the Agriculture Committee for its work on this legislation, and I look forward to working with members of the committee and members of the task force in ensuring its expedient passage.

By Mr. MITCHELL:

S. 1037. A bill to prohibit the implementation of certain regulations of the Secretary of Health and Human Services and the Secretary of Agricul-

ture regarding irradiated foods, to amend the Federal Food, Drug, and Cosmetic Act to prescribe labels for such foods, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FOOD IRRADIATION SAFETY AND LABELING REQUIREMENT ACT

Mr. MITCHELL. Mr. President, today I am introducing the Food Irradiation Safety and Labeling Requirement Act of 1989. This legislation mirrors legislation I introduced in the 100th Congress on this same subject. Again this year, I'm pleased that the companion legislation is being introduced in the House by Congressman DOUGLAS Bosco of California.

The basic law regulating the additives or processes used on food sold commercially in this country is the Federal Food, Drug, and Cosmetic Act. In 1958, Congress wisely amended the act to "include any source of radiation" intended for use in processing or packaging food in the definition of a food additive (section 321), subject to the rigorous safety testing required of any new additive.

In 1986, the Secretary of Health and Human Services approved Federal Food and Drug Administration regulations that would, for the first time, allow low-level irradiation of a wide range of food products, mostly fresh fruits and vegetables.

American consumers are generally unaware of this technology. But whether or not they know about irradiation, consumers deserve to know that the processes and additives used on the foods they buy have been proven to be safe. I'm afraid, however, that if most consumers were familiar with the steps by which FDA came to support allowing an expanded use of irradiation I believe they would feel the agency's research was suspect.

In 1979, FDA established its Bureau of Foods Irradiated Food Committee [BFIFC] to review the existing agency policy concerning food irradiation. Using data showing the amount of chemical change likely to be caused in food by given levels of radiation, but with no actual feeding tests on animals, BFIFC concluded that food irradiation at low doses was wholesome and safe for human consumption, even where the irradiated food constituted a substantial portion of the diet.

In 1981, FDA's Bureau of Foods, established the Irradiated Foods Task Group to review all available toxicological data concerning foods treated by irradiation.

In phase one of the data review, all relevant toxicology studies were identified from FDA files and the open literature. In all, 441 studies were obtained in hard copy, summarized, and categorized.

Next, FDA summarized the studies and reviewed them for their scientific merit. Studies were accepted if on initial examination, they appeared to be reasonably complete. Studies were accepted with reservation if the testing, on initial summary review, appeared acceptable but had some serious deficiencies interferring with the interpretation of the study. Studies were rejected if on initial examination they for any of a number of reasons dealing with measuring the study's interpretation.

In the next phase, all studies that appeared to show adverse effects and studies that appeared to support safety were then examined in detail. In all, 69 studies that either raised questions concerning the possibility of adverse effects—there were 32 such studies—or that appeared to support a conclusion that the irradiated food studied is safe—there were 37 such studies—were examined in detail and reported.

According to the task group, on detailed examination of the 69 studies, 5 appeared to support safety, and the remaining 64 were said to be deficient because of: First, problems associated with diet and second, inadequate experimental design. Based on that review of the available research on irradiation, the task group concluded that, "studies with irradiated foods do not appear to show adverse toxicological effects."

But, the task group said:

The lack of effects however could have resulted from the dietary problems, inadequacies of experimental design, ambiguity and non-reproductivity of the available data on irradiated foods. Studies of sufficiently high quality to support the safety of irradiated foods treated at high irradiation doses which constitute major contributions to the daily diet for long-term use are also not available.

According to FDA, only 5 of the 441 studies reviewed were considered by agency reviewers to be properly conducted, fully adequate by 1980 toxicological standards, and able to stand alone in the support of safety. The reports of these five studies indicated no adverse health affects from the irradiated foods fed to test animals.

Based on its review of the studies, the task force agreed with BFIFC's conclusion that there was an adequate margin of safety for foods irradiated below 1 kGy. It also agreed that toxicology tests on these foods were not needed to support a conclusion that such foods are safe. FDA used its 1981 task force findings in promulgating the 1986 regulations.

It is on the basis of those five studies, that FDA has moved to allow a much broader use of irradiation in food processing. I do not question that the five studies cited by FDA indicate no adverse health affects from the irradiated foods fed to test animals.

But, I do not believe the American consumer can be assured of the safety of this process on such scant evidence.

Because I am not convinced that food irradiation has been sufficiently proven safe by the FDA, I'm pleased to join with Representative Bosco today in introducing legislation that would:

First, prohibit either the Secretary of HHS or Agriculture from implementing regulations allowing the expanded use of irradiation;

Second, require all irradiated foods to be so labeled, including foods sold in restaurants and foods which are ingredients of other products; and

Third, mandate a 2-year study by the National Academy of Sciences of food irradiation, including the environmental and health issues associated with irradiation facilities.

There are other troubling aspects of this technology including adverse nutritional impacts; costs; and worker safety, effectiveness and environmental impacts associated with food irradiation plants that are also of concern. But they are, I believe, secondary to the fundamental issue of safety.

Almost everything we do in our society exposes us to risk. Congress must decide two points in this debate.

First, do the benefits of food irradiation outweigh its risks?

Second are those benefits more cheaply or more safely achievable by other means.

It may be that after further examination and study, this Nation will decide that food irradiation has benefits that exceed its costs and that it is preferable to using chemical treatments or doing nothing.

But for now, we don't know enough about either the costs or the benefits of this process to make an informed judgment. I believe American consumers would be better served by a reexamination of this process prior to an expanded commercial application.

By Mr. ROTH:

S. 1038. A bill to repeal Medicare catastrophic coverage provisions effective in years after 1989 and the supplemental Medicare premium, and for other purposes; to the Committee on Finance.

MEDICARE CATASTROPHIC COVERAGE REPEAL ACT

Mr. ROTH. Mr. President, I rise today to introduce legislation that will repeal certain provisions of the Medicare Catastrophic Coverage Act of 1988. The Medicare catastrophic coverage repeal bill will repeal all new Medicare benefits and new premiums due after December 31, 1989. The sections to be repealed include the Medicare part B benefits as well as the annual supplemental premium or the tax surcharge. Medicare beneficiaries will continue to enjoy the additional benefits already in effect this year such as the extended hospital coverage, 150 days of skilled nursing home care, unlimited hospice care, and the

spousal impoverishment protection. Seniors will continue to pay the catastrophic monthly premium which is currently $4 to cover these additional benefits—this monthly premium will be $4.90 in 1990, $5.46 in 1991, and $6.75 in 1993. But seniors will not be charged with paying the current supplemental premium or tax surcharge.

My proposal will not threaten the fiscal viability of the Medicare program. Congressional Budget Office estimates indicate that the flat monthly catastrophic premium will cover the cost of the expanded acute care benefits in later years. While ensuring a continuity to Medicare beneficiaries by maintaining the current level of benefits, this legislation will also allow Congress the opportunity to develop an alternative for providing catastrophic protection to Medicare beneficiaries under part B of Medicare.

As the record shows, I did not support Senate passage of the Catastrophic Insurance Act during the 100th Congress. I believed then, and I believe now I made the correct vote. The public furor over costs associated with the act has borne out my position.

Over a year prior to the July 1, 1988, enactment of the Catastrophic Insurance Act, I had my staff conduct a survey of the retiree health benefits provided by the 20 largest employers including Federal, State, and local in my home State Delaware. The survey indicated that the vast majority provided health insurance equal to or superior to the Medicare Catastrophic Act. While the situation in Delaware may not exactly apply to all States, the Medicare changes scheduled to occur in 1990, in my view, will further duplicate what many private companies already offer to retirees on an efficient and cost-effective basis. This shift from private enterprise responsibility to greater government involvement has been a concern of mine since the catastrophic insurance legislation was reported out of the Finance Committee in 1987.

Following passage of the Catastrophic Act as news of its provisions spread home, the more the senior citizens in Delaware learned, the less the appealed to them. While arguments against the Medicare Act have varied, the consensus is that it raises premiums for Medicare beneficiaries, most of whom do not need this benefit. In short, we are seeing a ground swell of opposition from our senior citizens which demands that catastrophic insurance in its present form be repealed.

Recently, I sponsored a series of educational seminars in Delaware intended to help seniors answer questions they had on the new changes in Medicare. While these seminars were clearly publicized as informational sessions, it immediately became evident that the tremendous turnout that filled each meeting place beyond capacity was not because seniors had questions on Medicare, but because they came to protest the law. Seniors were loud and clear in their negative comments on the Medicare changes. In fact, at one point, the audience briefly chanted "repeal the bills." Reporting on these seminars, the Wilmington News Journal wrote that:

> Any Member of Congress who thought that he did the American people a favor by last year's vote for the Medicare Catastrophic Coverage Act should have been in Milford or Wilmington when well over 1,000 people came to question and protest the new law.

I believe the sentiments in Delaware go beyond the borders of my home State and extend across the country. Clearly, the concerns of my constitutents are indicative to action for change now.

I am offering an alternative to the action Congress took last year. A repeal of all the Medicare part B benefits and the supplemental premium will allow Members of Congress to develop a plan that will reflect more closely the needs of senior Americans. This proposal will allow time to study both the impact the current benefits have on Medicare enrollees and how the private sector insurance plans offered to Medicare beneficiaries are affected. While I do share the desire to protect our seniors from the devastating effect of catastrophic health care expenses, I do not believe the current Medicare package answers the needs of seniors. In my view, these changes made to Medicare must be revisited.

My proposal does not amend the Medicare Catastrophic Coverage Act in any way other than by deleting from the books any new benefits or premiums in years to come. As for this year, current benefits scheduled such as the expansion in hospital coverage effective January 1, 1989, will continue, and the effective date for the spousal impoverishment provision remains September 30, 1989.

By keeping the already effective changes in Medicare, and by eliminating those scheduled to come into effect next year, Congress will have the opportunity to fully review catastrophic insurance coverage for Medicare covered individuals. I urge my colleagues to listen to the concerns of America's seniors and support my legislation.

By Mr. DECONCINI:

S. 1039. A bill to restore the recordkeeping requirement of the Child Protection and Obscenity Enforcement Act of 1988; to the Committee on the Judiciary.

RESTORING THE RECORDKEEPING REQUIREMENT OF THE CHILD PROTECTION AND OBSCENITY ACT

● Mr. DECONCINI. Mr. President, I rise today to introduce legislation to restore a vital provision of the Child Protection and Obscenity Enforcement Act of 1988. On Tuesday a Federal District Court Judge in the District of Columbia struck down a key provision of the 1988 law. By ruling that the recordkeeping requirement of the act is unconstitutional, the court has stripped one of the most important protections of our children from the bill. Without the recordkeeping requirement of the child pornography provision of the act, prosecutors will be undermined in their efforts to prove that child pornographers were aware of and intended to commit their vile and abusive acts. I believe that the legislation that Senator THURMOND and I introduced last year is one of the most important laws ever to be enacted by this great body, but I am very concerned that one of the most vital enforcement provisions of the bill has been deleted. The legislation that I am introducing today restores that enforcement tool and does it in such a way that, I believe, is beyond constitutional challenge.

The 1988 act required that anyone who produces sexually explicit material keep records of the identity and age of the individuals depicted in such material. In addition, the producer was required to keep records of any name ever used by those individuals. Such records were required to be kept of any sexually explicit material made after February 8, 1978. The legislation I am introducing today would require that records as to identity and age be kept for any sexually explicit material produced after the effective date of the legislation.

Pornography in America is a multimillion-dollar business. The Justice Department estimates that pornography sales total nearly $4 billion annually. A major part of the pornography network is child pornography and its trappings. Child pornography has become a highly organized industry preying on the youth of our country who are either unable to protect themselves or are induced into participating by those they trust.

The sexual exploitation of any human being, especially those who are young, impressionable and vulnerable, is reprehensible. It is an affront to every individual and to every community that strives to maintain a decent society and to protect its citizens and their fundamental rights. If we are to deal effectively with the problem of pornography, it is essential that we recognize that it victimizes all members of society, regardless of sex, age, race, religion, or social status.

Perhaps the most degrading and revolting aspect of the increased pornography trade that is engulfing decency is child pornography. It is beyond the comprehension of this Senator that men and women would sexually ex-

ploit young children. Many of the victims are runaways who have fallen into criminal hands. But studies indicate that a large percentage of the children under the age of 8 who are involved are provided to the pornographers by their parents or guardians.

Mr. President, I disagree with the ruling of the Federal court that the recordkeeping provision of the 1988 act is unconstitutional. Requiring someone who displays sexually explicit activities to know whether the participants are adults or are children is hardly an unreasonable requirement. But I also believe that our children cannot afford to wait until this issue is fought out in the courts. I hope that the Federal Government will appeal the district court's decision and will ultimately prevail, thereby restoring the original act's more stringent requirements. But while this argument is taking place, the child pornographers are still out there preying on our children. We must have a mechanism in place immediately that will allow prosecutors to take these monsters into court and put them into jail. To do that, they need a provision that will allow them to prove that the pornographers knew what they were doing and intended to violate the provisions of the act or that they intentionally failed to comply with the recordkeeping requirement.

While I believe that the recordkeeping provision of the 1988 act is constitutional and that it should be restored, I am not willing to sacrifice our children while the rest of us argue academics. Let us do something immediately to restore some degree of protection to our children.

The use of children in the production of pornographic materials is extremely harmful to the physiological, emotional, and psychological health of a child. The scars of being forced to engage in such activity remain forever etched in the youthful victim's mind. Many times the trauma of having to perform in these exploits is never overcome, endlessly tormenting the helpless victim.

I urge my colleagues to join with me in swiftly enacting legislation to restore the recordkeeping requirement of the Child Protection and Obscenity Enforcement Act of 1988. While we debate and the courts consider, our children are being victimized by evil, greedy people who have only their pocketbooks in mind. Let's act immediately to put these people out of business.

I ask unanimous consent the bill be printed in the RECORD.●

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1039

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) IN GENERAL.—Chapter 110 of title 18, United States Code, is amended by adding at the end thereof the following:

§ 2257. Record keeping requirements

"(a) Whoever produces any book, magazine, periodical, film, video-tape, or other matter which—

"(1) contains one or more visual depictions made after the effective date of this Act of actual sexually explicit conduct; and

"(2) is produced in whole or in part with materials which have been mailed or shipped in interstate or foreign commerce, or is shipped or transported or is intended for shipment or transportation in interstate or foreign commerce;

shall create and maintain individually identifiable records pertaining to every performer portrayed in such a visual depiction.

"(b) Any person to whom subsection (a) applies shall, with respect to every performer portrayed in a visual depiction of actual sexually explicit conduct—

"(1) ascertain, by examination of an identification document containing such information, the performer's name and date of birth, and require the performer to provide such other indicia of his or her identity as may be prescribed by regulations;

"(2) record in the records required by subsection (a) the information required by paragraph (1) of this subsection and such other identifying information as may be prescribed by regulation.

"(c) Any person to whom subsection (a) applies shall maintain the records required by this section at his business premises, or at such other place as the Attorney General may by regulation prescribe and shall make such records available to the Attorney General for inspection at all reasonable times.

"(d)(1) No information or evidence obtained from records required to be created or maintained by this section shall, except as provided in paragraphs (2) and (3), be used, directly or indirectly, as evidence against any person with respect to any violation of law.

"(2) Paragraph (1) of this subsection shall not preclude the use of such information or evidence in a prosecution or other action for a violation of any applicable provision of law with respect to the furnishing of false information.

"(3) In a prosecution of any person to whom subsection (a) applies for an offense in violation of subsection 2251(a) of this title which has as an element the production of a visual depiction of a minor engaging in or assisting another person to engage in sexually explicit conduct and in which that element is sought to be established by showing that a performer within the meaning of this section is a minor—

"(A) proof that the person failed to comply with the provisions of subsection (a) or (b) of this section concerning the creation and maintenance of records, or a regulation issued pursuant thereto, shall raise a rebuttable presumption that such performer was a minor; and

"(B) proof that the person failed to comply with the provisions of subsection (e) of this section concerning the statement required by that subsection shall raise the rebuttable presumption that every performer in the matter was a minor.

"(e)(1) Any person to whom subsection (a) applies shall cause to be affixed to every copy of any matter described in paragraph (1) of subsection (a) of this section, in such manner and in such form as the Attorney General shall by regulations prescribe, a statement describing where the records required by this section with respect to all performers depicted in that copy of the matter may be located.

"(2) If the person to whom subsection (a) of this section applies is an organization the statement required by this subsection shall include the name, title, and business address of the individual employed by such organization responsible for maintaining the records required by this section.

"(3) In any prosecution of a person for an offense in violation of section 2252 of this title which has as an element the transporting, mailing, or distribution of a visual depiction involving the use of a minor engaging in sexually explicit conduct, and in which that element is sought to be established by a showing that a performer within the meaning of this section is a minor, proof that the matter in which the visual depiction is contained did not contain the statement required by this section shall raise a rebuttable presumption that such performer was a minor.

"(f) The Attorney General shall issue appropriate regulations to carry out this section.

"(g) As used in this section—

"(1) the term 'actual sexually explicit conduct' means actual but not simulated conduct as defined in subparagraphs (A) through (E) of paragraph (2) of section 2256 of this title;

"(2) 'identification document' has the meaning given that term in subsection 1028(d) of this title;

"(3) the term 'produces' means to produce, manufacture, or publish and includes the duplication, reproduction, or reissuing of any material; and

"(4) the term 'performer' includes any person portrayed in a visual depiction engaging in, or assisting another person to engage in, actual sexually explicit conduct.".

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 110 of title 18, United States Code, is amended by adding after the item relating to section 2256 the following:

"2257. Record keeping requirements.".

(c) EFFECTIVE DATE.—Section 2257 of title 18, United States Code, as added by this section shall take effect 60 days after the date of the enactment of this Act except—

(1) the Attorney General shall prepare the initial set of regulations required or authorized by section 2257 within 30 days of the date of the enactment of this Act; and

(2) subsection (e) of section 2257 of such title and of any regulation issued pursuant thereto shall take effect 90 days after the date of the enactment of this Act.

By Mr. WILSON (for himself, Mr. D'AMATO, Mr. DECONCINI, Mr. DIXON, Mr. GRAMM, Mr. GORTON, Mr. MACK, and Mr. MURKOWSKI):

S. 1040. A bill to require the Secretary of Defense to establish an Anti-Drug Task Force; to the Committee on Armed Services.

ANTI-DRUG TASK FORCE IN THE DEPARTMENT OF DEFENSE

Mr. WILSON. Thank you very much, Mr. President.

Mr. President, I rise today to introduce legislation on behalf of myself and my colleagues Senator D'AMATO, Senator DECONCINI, Senator GRAMM, Senator GORTON, Senator MACK, and

Senator MURKOWSKI. It is with sadness that I rise to do this because this legislation is not an implication but an expressed condemnation of what I deem to be an inadequate effort on the part of the Department of Defense in responding to the charge given to them by Congress in last year's defense authorization bill. At that point, we very clearly indicated the sense of urgency that we attach to their participation in the interdiction of drugs beyond the borders of the United States.

Mr. President, no one on this floor who has paid even casual attention to the many debates that have occurred on how we best approach the problems of drug use can be under any illusion that there is a single aspect that will respond to the total needs. To the contrary, we are bent upon on effort on many fronts to reduce demand, to educate our young people so that they will not engage in perilous experimentation. The emphasis I think perhaps is on prevention because rehabilitation has proved both costly and uncertain.

There are two ways to bring about prevention. One is education, the kind of education that does not simply teach the ills of drug use, but teaches values so that young people are armed with the kind of self-esteem that is their best weapon, their best defense when a drug pusher comes onto their school grounds offering them free drugs.

But if you talk to any law enforcement professional, you will find that they are of the belief, the fervent relief, that their task has been made needlessly difficult and dangerous because of the inordinate volume of drugs entering the United States and particularly those entering across our southern borders in both the Southeast and in the Southwest. It was for that reason that Congress spoke out in the clearest possible terms, in what necessarily must be joint effort between civilian law enforcement authorities and the military, and assigned the Department of Defense the responsibility as the lead agency to coordinate the surveillance, the monitoring, the detection, and the tracking that will so enhance our ability to deter and to prevent the aerial smuggling and smuggling upon the high seas that is increasingly the way in which this incredible volume of dangerous drugs enters our Nation.

But the sad fact, Mr. President, is that DOD has not responded as we hoped with the same urgency felt by the Congress in making that charge to them in the defense authorization bill. To the contrary, what we have seen is a largely bureaucratic response. We are told that they are planning to make plans.

It is not my purpose to pillory the Department of Defense. It is my purpose and that of my colleagues to see to it that they attach the kind of urgency to their responsibility that we have given them. For that purpose we in this legislation require that, as so often in the past when the military has been confronted with a similar challenge, they give to a flag or general officer the responsibility for coordinating the operations of a task force that can operate between regions between commands and, indeed, between services. If we had made the same response to the plight of medical students on the island of Grenada as we have to the responsibility that the military has to the interdiction of drugs, many of those young people might find themselves in confinement.

The parallel yields only a limited analogy, I am quite aware of that. But my point is simply this: The typical bureaucratic response is not good enough, and it is because those law enforcement professionals feel with abundant reason and abundant evidence that their lives have been made needlessly difficult and dangerous as have those of the citizens they are sworn to protect, that we must insist upon an urgency that the Department clearly does not yet feel.

Mr. President, what we have done is to enjoin upon the Department of Defense not congressional macromanagement, but the meeting of a certain minimal standard which is necessary if we are to be serious about their participation.

So, Mr. President, I rise today to protest and to cure the seeming inability of our Government to stem the flow of illegal drugs entering the United States. On almost every day that Congress has been in session, my colleagues and I have demanded repeatedly that we devote more technology and manpower to halting the traffic in this poison which has begun to tear apart our Nation.

We have authorized billions of dollars, created a Cabinet-level position, and amended the defense authorization bill of 1989 to require greater Defense Department participation. These actions have all been welcomed with vows of participation by the affected agencies. Studies have been chartered, advisory groups formed, and money has been spent—all with little apparent effect on the availability of illicit narcotics.

In the 100th Congress we directed the Department of Defense to get involved in the war on drugs. We authorized $300 million and directed DOD to be the lead agency for detecting smugglers in the air and on the seas, coordinating radar activities with civilian authorities, devoting resources fulltime to the interdiction mission, and expanding the role of the National Guard in these efforts.

Yet where do we now stand, Mr. President? The Defense Department tells Congress that it can soon expect a report on a communications network, and that something called a joint operational planning system, or JOPS, will aid in the war on drugs. To me, this plan sounds like a bureaucratic response to an order and a mandate for which the Department has little interest. DOD's February 1989 report on its progress in implementing the Wilson-Nunn amendment tells us that JOPS represents a "phased interaction" between the armed services and the drug enforcement agencies permitting military officials to "focus initially" on integrating detection and monitoring assets with those of the Customs Service and the DEA. This is necessary coordination, but it should not take 7 months to announce this obvious need.

The American people, Mr. President, will not tolerate high rhetoric and more studies as DOD's reply to the demand that the military participate now and participate actively in stopping the flow of drugs into our country. The Wilson-Nunn amendment did not request the Defense Department to undertake a phased interaction or an initial focus. Rather, it gave DOD a clear mandate to devote resources fulltime to the interdiction mission. A communication system and a reporting system may make a contribution somewhere along the line, but it hardly substitutes for military professionals.

The February report, Mr. President, should have listed specific plans, including level of effort assignment of forces such as aircraft, ships, communications networks, intelligence agencies, radars, and other assets that DOD had deployed or will use to assist in solving this problem. In plain words, we should have received a war plan to curb the rising tide of narcotics washing over our society.

Every day, the drug war captures an increasing percentage of American neighborhoods, families, and lives. Hours have been spent on the floor of both Chambers of Congress with Members urging action to contain this scourge. Its impact on the youth of America, its considerable contribution to family disintegration, and its foul sponsorship of vicious crime waves across our Nation's urban landscape. Yet the Defense Department's response to congressionally mandated action has been underwhelming to say the least. We get lots of words, but not much action.

The problem of drugs in America cries for action—not more studies, not more advisory groups, not more jingoisms. We need action.

In terms of our national defense, the principal threat is the Soviet Union and its surrogates. To counter that threat, the Department of Defense leads our well-equipped and capable Armed Forces. We have over 2 million uniformed personnel in the Depart-

ment of Defense whose equipment and infrastructure will cost almost $300 billion.

In the past, when faced with an external threat outside the bounds of our national defense command structure, we have created such a task force to deal with the problem. When the problem was solved, DOD either dissolved the task force or made it a permanent command. To deal with the Cuban missile crisis, for example, the Caribbean Contingency Task Force was created, directed the operation, and then disbanded. The U.S. Central Command was born out of the Rapid Deployment Joint Task Force created to address the instability in the Persian Gulf.

The magnitude of the threat posed by the drug problem in our country calls for a similar bold policy. This morning, I propose through legislation that the four military departments of DOD, in addition to the Coast Guard, form an Anti-Drug Task Force to work in concert with the newly created Office of National Drug Control Policy and the U.S. Customs Service. This bill directs the establishment of a command structure—an Anti-Drug Task Force that in concert with the previously mentioned agencies will wage war on America's drug problem. It is my intention that this legislation will motivate the Defense Department to develop a strategy—as it did with the Cuban and Persian Gulf crises—for the dedication of equipment and manpower to fighting the battle against narcotics.

Now the Defense Department, Mr. President, is no stranger to drug interdiction activities. Since 1984, DOD has received an average of 9,800 requests annually from Federal civilian authorities to lend equipment or radar devices for use in interdiction operations and honored over 99 percent of them. Customs and DEA both report that F-15, F-16, and E-2C radars loaned or purchased from DOD, as well as Blackhawk Helicopters and P-3 aircraft, have proven their worth in combating the flow of drugs into the Nation. Furthermore, the military accounted for approximately 28 percent of all U.S. Government expenditures for interdiction in fiscal year 1987. More importantly, the Defense Department has some of the world's most sophisticated radar systems to help identify and track aircraft in a very high traffic environment.

DOD can clearly do more but for some reason lacks the enthusiasm. The General Accounting Office concluded last year that "clear evidence" existed of a greater need for more aircraft, vessels, motion sensors, night-vision goggles, and radar on the part of drug interdiction law enforcement agencies. GAO went on to identify the Defense Department as a logical source for these assets. And the Rand Corp., for example, in a 1988 study generally critical of involving DOD in this mission, acknowledged that "military aircraft have, and continue to have, a role in the program to interdict air smugglers." This document further stated that E-2 and E-3 reconnaissance craft can make a vital contribution to stemming the tide of illegal drugs. It also proposed that the Air Force and the Navy conduct surveillance sorties at drug traffic saturation points identified by Customs and the Coast Guard.

No one, therefore, including the leadership of the Defense Department and the academic critics, questions the fact that the military has appropriate resources to fight drug smugglers and has actually put some of those resources to productive use. But the problem that this legislation seeks to remedy, Mr. President, is the lack of a coherent and sufficiently aggressive strategy within the Armed Forces to supplement civilian interdiction programs on a sustained basis.

Indeed, the threat is real, it is present, and it grows by the hour. I find it difficult to accept the argument that expanding DOD's role in drug interdiction will somehow detract from the mission readiness of our combat forces when the immediate combat mission is to control the attack on our borders launched by the international drug cartels. I also find it difficult to accept the argument that the Defense Department lacks the money to fight this war when it has obligated only one-sixth of the funds allocated last year by the Wilson-Nunn amendment. Yet despite this record, the Department has submitted a request for another $317 million for drug interdiction activities during fiscal year 1990.

We can ask our military to do more than study the problem. As a member of the Senate Armed Services Committee, I know full well the importance and need of a strong national defense. In no way am I suggesting the relaxation of our worldwide commitment to the cause of freedom. I am suggesting, however, that the battlefield for the moment is at our very shores. We have a challenge to conquer and a responsibility to our citizens to defeat the menace over land, on the seas, and through the skies. Let us not delay for another moment the needed mobilization of forces to defeat this very real threat to life in America as we know it.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1040

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

Congress makes the following findings:

(1) Section 1102 of the National Defense Authorization Act, Fiscal Year 1989, designates the Department of Defense as the single lead agency of the Federal Government for the detection and monitoring of the aerial and maritime transit of illegal drugs into the United States.

(2) The large volume of illegal drugs entering United States territory from foreign sources poses a direct and immediate threat to the national security of the United States.

(3) The Department of Defense, as a result of its vast air, sea, and ground reconnaissance capabilities, is the appropriate agency for identifying and tracking illegal narcotics traffickers.

(4) The Department of Defense must increase and focus its actions in implementing the drug interdiction and law enforcement support provisions of title XI of the National Defense Authorization Act, Fiscal year 1989.

(5) The Department of Defense has established task forces in the past, including task forces in connection with the Cuban missile crisis and the Persian Gulf crisis, to integrate the assets of the Armed Forces of the United States to meet more effectively threats to the security of the United States.

SEC. 2. ANTI-DRUG TASK FORCE.

(a) ESTABLISHMENT AND COMPOSITION.—Not later than 15 days after the date of the enactment of this Act, the Secretary of Defense shall establish an Anti-Drug Task Force (hereinafter referred to as the "Task Force") composed of personnel from the Army, Navy, Air Force, Marine Corps, Coast Guard, and the United States Customs Service. The Chairman of the Task Force shall be a commissioned officer of the Armed Forces in the grade of lieutenant general or vice admiral. The Chairman shall report directly to the Joint Chiefs of Staff.

(b) DUTIES.—The Task Force shall, in consultation and cooperation with the Director of National Drug Control Policy, develop a plan for the support of the drug interdiction activities of federal law enforcement agencies. The plan shall provide for the assignment of duties to Armed Forces personnel, and the use of equipment, facilities, and resources of the Department of Defense, in support of the efforts of those agencies to interdict the entry of illegal drugs into the United States by land, sea, and air.

(c) REPORT.—Not later than 30 days after the date of the enactment of this Act, the Secretary of Defense and the Director of National Drug Control Policy shall submit to Congress a joint report on the activities of the Task Force.

By Mr. CONRAD (for himself, Mr. DASCHLE, Mr. BOREN, Mr. HARKIN, Mr. KERREY, Mr. DIXON, and Mr. BURDICK):

S. 1041. A bill to amend the Internal Revenue Code of 1986 to provide tax relief for farmers who realize capital gain on the transfer of farm property to satisfy an indebtedness, and for other purposes; to the Committee on Finance.

FARM DEBT TAX REFORM ACT

Mr. CONRAD. Mr. President, today I am introducing the Farm-Debt Tax Reform Act of 1989, a bill which addresses a number of special tax problems which can arise when farm assets are liquidated to satisfy farm debts or

when farmers attempt to restructure their debts. This reform is absolutely essential to insure that the debt restructuring provisions of the Agricultural Credit Act of 1987 are implemented as Congress intended. Joining me on this legislation are Senator TOM DASCHLE, Senator DAVID BOREN, Senator TOM HARKIN, Senator BOB KERREY, Senator QUENTIN BURDICK, and Senator ALAN DIXON. I want to thank Senator TOM DASCHLE, Senator DAVID BOREN, Senator TOM HARKIN, and their staffs for their advice and assistance on this legislation. I would also like to thank the Center for Rural Affairs in Walthill, NE, for their assistance.

The Agricultural Credit Act of 1987 provided for a rational, systematic approach to handling the delinquent farm debt resulting from the farm depression of the 1980's. As many of you know, net farm income during the first 5 years of the 1980's fell to the lowest level—in real dollars—since record keeping began in 1910—lower even than the worst 5 years during the Great Depression.

The deep recession of the 1980's left thousands of farmers with huge debts which they could no longer pay. The value of assets used in farming—land and machinery—plummeted in value by 50 percent or more. As a consequence thousands of farmers' debts exceeded the value of their assets. The Agricultural Credit Act offers farmers an orderly means of restructuring farm debt when restructuring result in a greater recovery to the lender than foreclosure. This orderly process can salvage a significant portion of the outstanding debt—strengthening the Farm Credit System, reducing losses to the Farmers Home Administration, and helping farmers with a crushing financial burden.

The Agricultural Credit Act of 1987 is a wise policy approach to the farm crisis and will be an important tool in the effort to rebuild rural America. The act gave farmers across the country the hope that they would be able to rebuild their lives and their farming operations. But without some corresponding changes in the tax law, that chance for a fresh start will elude many farm families. Many farmers who have applied for relief under the Agricultural Credit Act are finding that the tax consequences of their plans can be overwhelming. Other farmers who have lost everything and are now trying to start new lives and new professions—often at the age of 50 or 60—are faced with massive tax bills—the final insult to the loss of their homes and livelihoods.

One set of problems arises for farmers when they sell or deed over property to the lenders to satisfy their debts. If the property is worth more than they originally paid for it—even though it is encumbered with debt in excess of its value when deeded back—the farmer will have to count the difference as a capital gain and pay tax on it. It is the same tax a farmer would face if he sold the land free of debt, only in this case all the proceeds or the property itself goes to the lender. This is a particular problem for older, low-income farmers whose only option is to liquidate. If they bought their farms in the 1950's, the so-called gains can be significant.

Let me provide a numerical example. Suppose a farmer purchased land for $75,000 in 1955 and subsequently borrowed $200,000 on the land for farming purposes—a harvesting machine, for example, can cost $100,000—at a time when the land was worth $300,000. Today due to the farm recession, the land is worth $150,000 but has a debt of $200,000 against it. If the farmer conveys the land back to his lender to satisfy part of his debt he will have to pay a tax bill on $75,000 capital gain and on $50,000 forgiveness of debt income even though those gains really do not exist.

To offset this income, he can draw on any tax attribute such as operating losses and carryovers that he has. He will not be able to deduct 60 percent of the capital gain as he could before the 1986 tax act, nor can he average his income over a 5-year period. He will be taxed on the remainder unless he is insolvent.

In the example above, the farmer may be scaling down his farming operation to improve his cash flow or turning back the whole farm with the intent of repurchasing his home and a few acres. In either case, if the farmer is unable to pay the resulting tax liability, he will be unable to restructure. In fact, in most cases, even bankruptcy will not relieve the farmer of this tax liability. If rural America is to recover from the farm crisis, we have to leave these people with more than a tax bill.

This legislation addresses both of these problems for farmers who clearly lack the ability to pay. The bill would provide an exclusion of capital gain or discharge of indebtedness income for taxpayers who meet the following three tests: First, 50 percent of the taxpayer's gross receipts in at least 6 of these last 10 years must be attributable to farming; second, modified adjusted gross income is less than the national median; and third, equity in all property is less than $25,000 or 150 percent of the tax liability.

The exclusion is limited to $350,000 in capital gain or discharge of indebtedness income over the taxpayer's lifetime, and is available only after remaining tax attributes have been used.

Mr. President, I believe these tests are a fair way to target this relief. They are devised to prevent abuse and the possibility of manipulation by speculative investors or wealthy individuals.

These criteria are intended to provide a fresh start to farmers of modest income and means. This legislation is a responsible approach to the tax consequences of farm liquidation and debt restructuring. Like the Agricultural Credit Act of 1987, this bill balances public costs and budget constraints against the public obligation to respond to the farm crisis. It does nothing more than put farm families in a position from which they can rebuild their lives.

To sum up, this bill is a vital complement to the Agricultural Credit Act of 1987. Debt restructuring will not provide the opportunities we envision for farmers if it results in tax liabilities that they have no hope of ever being able to pay. I urge my colleagues to examine the effects of our current tax law on restructuring and to carefully review this legislation.

I ask unanimous consent that a letter to me from the National Save the Family Farm Coalition, dated May 1, 1989, and a section-by-section analysis and the text of the bill be printed in the RECORD.

There being no objection, the material was order to be printed in the RECORD, as follows:

S. 1041

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Farm Debt Tax Reform Act of 1989".

SEC. 2. CAPITAL GAIN REALIZED FROM TRANSFER OF FARM PROPERTY IN COMPLETE OR PARTIAL SATISFACTION OF QUALIFIED FARM INDEBTEDNESS EXCLUDED FROM GROSS INCOME.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1986 (relating to items specifically excluded from gross income) is amended by redesignating section 135 as section 136 and by inserting after section 134 the following new section:

"SEC. 135. CAPITAL GAIN REALIZED FROM TRANSFER OF FARM PROPERTY IN COMPLETE OR PARTIAL SATISFACTION OF QUALIFIED FARM INDEBTEDNESS.

"(a) IN GENERAL.—Gross income of any taxpayer described in subsection (d) does not include so much of the gain from the transfer of farm property in complete or partial satisfaction of qualified farm indebtedness as does not exceed $350,000.

"(b) PRIOR GAINS AND DISCHARGES OF INDEBTEDNESS TAKEN INTO ACCOUNT.—

"(1) IN GENERAL.—If for any prior year—

"(A) gain from the transfer of farm property in complete or partial satisfaction of qualified farm indebtedness, or

"(B) a discharge of such indebtedness,

is excluded from the taxpayer's gross income under subsection (a) of this section or section 108(g), respectively, subsection (a) of this section shall be applied for the taxable year with respect to such gain by reducing the dollar amount contained in such subsection by the such excluded prior year gains and discharges.

"(2) CURRENT YEAR COORDINATION WITH SECTION 108.—Subsection (a) of this section shall be applied for the taxable year with respect to any gain by reducing the dollar amount contained in such subsection (after any reduction under paragraph (1)) by any amount excluded from gross income under section 108 for such year.

"(c) REDUCTION OF TAX ATTRIBUTES.—

"(1) IN GENERAL.—The amount excluded from gross income under subsection (a) shall be applied to reduce the tax attributes described under section 108(b)(2).

"(2) COORDINATION WITH SECTION 108.—For purposes of this subsection, the amount of tax attributes shall be determined after any reduction under section 108(b) by reason of amounts excluded from gross income under section 108(a)(1).

"(d) TAXPAYER DESCRIBED IN THIS SUBSECTION.—

"(1) IN GENERAL.—A taxpayer is described in this subsection if—

"(A) such taxpayer's modified adjusted gross income for the taxable year in which the transfer of farm property in complete or partial satisfaction of qualified farm indebtedness occurs is less than 100 percent of the national median adjusted gross income,

"(B) more than 50 percent of the gross receipts of the taxpayer for 6 of the 10 taxable years preceding such taxable year are attributable to—

"(i) the trade or business of farming (within the meaning of section 2032A(e)(5)), or

"(ii) the sale or lease of assets used in such trade or business, or

"(iii) both,

"(C) such taxpayer materially participates (within the meaning of section 2032A(e)(6)) in the trade or business described in subparagraph (B)(i), and

"(D) equity in all property held by the taxpayer after such transfer is less than the greater of —

"(i) $25,000, or

"(ii) 150 percent of the excess (if any) of—

"(I) the tax imposed by this chapter determined as if this section and section 108 did not apply to the transfer, over

"(II) the tax imposed by this chapter determined with regard to this section and section 108 (if applicable).

"(2) MODIFIED ADJUSTED GROSS INCOME.—For purposes of this subsection, the term 'modified adjusted gross income' means adjusted gross income—

"(A) determined with regard to this section and section 108, and

"(B) increased by the amount of interest received or accrued by the taxpayer during the taxable year which is exempt from tax.

"(3) EQUITY.—For purposes of this subsection, the term 'equity' means, with respect to any property, an amount equal to—

"(A) the fair market value of such property, minus

"(B) any indebtedness relating to such property.

"(e) FARM PROPERTY.—For purposes of this section, the term 'farm property' means real and personal property used by the taxpayer in the trade or business of farming (within the meaning of section 2032A(e)(5)).

"(f) QUALIFIED FARM INDEBTEDNESS.—For purposes of this section, indebtedness of a taxpayer shall be treated as qualified farm indebtedness if such indebtedness was incurred directly in connection with the operation by the taxpayer of the trade or business of farming (within the meaning of section 2032A(e)(5)).".

(b) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 of such Code is amended by striking out the item relating to section 135 and inserting in lieu thereof the following new items:

"Sec. 135. Capital gain realized from transfer of farm property in complete or partial satisfaction of qualified farm indebtedness.

"Sec. 136. Cross references to other Acts.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to transfers occurring after December 31, 1986, in taxable years ending after such date.

SEC. 3. EXCLUSION OF DISCHARGE OF QUALIFIED FARM INDEBTEDNESS FROM GROSS INCOME INCREASED FOR CERTAIN SOLVENT FARMERS.

(a) IN GENERAL.—Section 108(g) of the Internal Revenue Code of 1986 (relating to special rules for discharge of qualified farm indebtedness) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL LIMITATIONS FOR CERTAIN FARMERS.—

"(A) IN GENERAL.—With respect to a taxpayer who is described in subparagraph (C) of this paragraph—

"(i) the amount excluded under subparagraph (C) of subsection (a)(1) shall not exceed $350,000, and

"(ii) paragraph (2) of this subsection shall be applied without regard to subparagraph (B) thereof.

"(B) PRIOR DISCHARGES OF INDEBTEDNESS AND GAINS TAKEN INTO ACCOUNT.—If for any prior year—

"(i) a discharge of qualified farm indebtedness, or

"(ii) gain from the transfer of farm property in complete or partial satisfaction of such indebtedness,

is excluded from the taxpayer's gross income under this subsection or section 135, respectively, subparagraph (A) shall be applied for the taxable year with respect to such discharge by reducing the dollar amount contained in such subparagraph by the such excluded prior year discharges and gains.

"(C) TAXPAYER DESCRIBED IN THIS SUBPARAGRAPH.—A taxpayer is described in this subparagraph if—

"(i) such taxpayer's modified adjusted gross income for the taxable year in which the discharge of qualified farm indebtedness occurs is less than 100 percent of the national median adjusted gross income,

"(ii) more than 50 percent of the gross receipts of the taxpayer for 6 of the 10 taxable years preceding such taxable year are attributable to—

"(I) the trade or business of farming (within the meaning of section 2032A(e)(5)), or

"(II) the sale or lease of assets used in such trade or business, or

"(III) both,

"(iii) such taxpayer materially participates (within the meaning of section 2032A(e)(6) in the trade or business described in clause (ii)(I),

"(iv) the indebtedness of the taxpayer both before and after such discharge is equal to 70 percent or more of the equity in all property held by such taxpayer,

"(v) equity in all property held by the taxpayer after such discharge is less than the greater of—

"(I) $25,000, or

"(II) 150 percent of the excess (if any) of the tax imposed by this chapter determined as if this section and section 135 did not apply to the transfer, over the tax imposed by this chapter determined with regard to this section and section 135 (if applicable), and

(vi) such taxpayer, in transferring property in connection with the discharge of qualified farm indebtedness, transfers only farm property.

"(D) DEFINITIONS.—For purposes of this paragraph—

"(i) FARM PROPERTY.—The term 'farm property' means real and personal property used by the taxpayer in the trade or business of farming (within the meaning of section 2032A(e)(5)).

"(ii) MODIFIED ADJUSTED GROSS INCOME.—The term 'modified adjusted gross income' means adjusted gross income—

"(I) determined with regard to this section and section 135, and

"(II) increased by the amount of interest received or accrued by the taxpayer during the taxable year which is exempt from tax.

"(iii) EQUITY.—The term 'equity' means, with respect to any property, an amount equal to—

"(I) the fair market value of such property, minus

"(II) any indebtedness relating to such property.".

(b) CONFORMING AMENDMENT.—Subparagraph (A) of section 108(g)(3) of such Code is amended by striking out "The amount" and inserting in lieu thereof "Except as provided in paragraph (4), the amount".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to discharges of indebtedness occurring after December 31, 1986, in taxable years ending after such date.

FARM-DEBT TAX REFORM ACT OF 1989
SECTION-BY-SECTION ANALYSIS

Section 1: Short title. This Act may be cited as the "Farm Debt Tax Reform Act of 1989".

Section 2: Provides an exclusion for capital gains that arise when farm property is transferred to a lender in exchange for debt relief if the following conditions apply:

The exclusion of gains under this section (plus the exclusion of ordinary income in Section 2) does not exceed $350,000 over the taxpayer's lifetime;

The excluded amounts are used to reduce tax attributes to the extent possible;

The taxpayer's modified adjusted gross income is less than 100 percent of the national median adjusted gross income;

At least 50 percent of the taxpayer's gross receipts in at least 6 of the last 10 years is attributable to farming or the lease or sale of assets used in farming, and the taxpayer must have materially participated in the trade or business of farming;

The taxpayer's equity in all post-transfer property is less than $25,000 or 150 percent of the tax liability, whichever is greater.

Definitions: Modified adjusted gross income means adjusted gross income plus any tax-exempt income minus capital gains and discharge of indebtedness income;

Equity means the fair market value of property minus any indebtedness on such property;

Tax liability for the purpose of the equity test is the difference between the tax that would be owed under the current law and the tax that would be owed under the bill;

Farm property means real and personal property used in connection with the trade or business of farming; and

Qualified farm indebtedness specifies the farming purposes (cultivation of soil, han-

dling of animals, forestry, etc.) for which the debt was incurred.

Effective date: Section 1 applies to all transfers occurring after December 31, 1986.

Section 3: Provides for an exclusion of discharge of indebtedness income (ordinary income) for farmers who meet the following conditions, as an alternative to the 50 percent farm income test which now provides a limited exclusion for solvent taxpayers under section 108(g):

The exclusion is limited to $350,000 over the taxpayer's lifetime (counting any excluded gains under Section 1);

The taxpayer's modified adjusted gross income in the year of the discharge is less than 100 percent of the national median adjusted gross income;

At least 50 percent of the taxpayer's gross receipts in at least 6 of the last 10 years is attributable to farming or the lease or sale of assets used in the trade or business of farming and the taxpayer must have materially participated in the trade or business of farming;

The taxpayer's debt of equity ratio both before and after the transfer is at least 70 percent;

The taxpayer's equity in all post-transfer property is less than $25,000 or 150 percent of tax liability, whichever is greater.

Definitions: same as for Section 1.

Effective date: Section 2 applies to all transfers and restructuring occurring after December 31, 1986.

NATIONAL SAVE THE FAMILY FARM COALITION,
Washington, DC, May 1, 1989.

Hon. KENT CONRAD,
U.S. Senate, Washington, DC.

DEAR SENATOR CONRAD: On behalf of the Credit Committee of the National Family Farm Coalition representing over 40 organizations in 35 states, I would like to express our strong support for the Farmer Tax Reform Act of 1989 and to thank you for your leadership on this most important issue. The hard-fought victory for families in the Agricultural Credit Act of 1987 providing sensible debt restructuring when it is the least cost alternative will be a hollow victory if the FmHA debt is replaced by a lifetime IRS debt.

As family farmers struggling to save our farming operations through the new debt restructuring options in the Agricultural Credit Act and fair treatment under Chapter 12 bankruptcy, we view this new legislation as a top priority to achieve the goal of enabling family farmers to stay on their farms and in their rural communities.

As you are most aware Senator Conrad, the past six months have been a period of uncertainty for tens of thousands of family farmers struggling to work through the FmHA debt restructuring process. For thousands more, the Farm Credit Services have not provided farmers with the kind of debt restructuring many of us had hoped would be the outcome of the Ag Credit Act. Some farmers have received the good news that they are eligible for a debt-write down or other option as it is the least cost alternative to the federal government in resolving their debt crisis. For these farmers, the tax implications of debt-write down or past debt settlements with FmHA are unclear.

We look forward to working with you to ensure passage of this important legislation. To farmers planting this Spring, your leadership and action is a sign that there is a commitment to seeing the Agricultural Credit Act really help farmers stay on their farms and in their rural communities. We thank you for your support.

Sincerely,

BENNY BUNTING,
Chair, NFFC Credit Committee.

By Mr. DURENBERGER:

S. 1042. A bill to suspend temporarily the duty on certain in-line roller skate boots; to the Committee on Finance.

SUSPENSION OF DUTY ON IN-LINE ROLLER SKATE BOOTS

● Mr. DURENBERGER. Mr. President, I rise to introduce legislation that would temporarily suspend tariffs on certain boots that are incorporated into in-line roller skates manufactured and assembled in the United States. This legislation would help overcome an unfair competitive advantage that importers of fully assembled roller skates currently have against domestic roller skate manufacturers.

Rollerblade, Inc., a Minnesota corporation, manufactures in-line roller skates. Some of the roller skate components used by this company are domestically sourced, and others are imported from Italy, Austria, and Taiwan.

Currently, skate boots imported for the roller skate carry a 6-percent duty. These skate boots are not useable in the form in which they enter the country. Instead, they must go through a manufacturing process to have "wheel supports" attached.

Rollerblade's domestic competitors import finished roller skates from Taiwan. As a finished product, these roller skates enter the United States duty free. This clearly enables domestic competitors who import finished products to gain an unfair, and unintended, competitive advantage against a company that is creating manufacturing jobs in the United States. That makes no sense.

My legislation would redress this unfair competitive advantage by reclassifying these boots as duty-free roller skate parts.

Mr. President, I ask unanimous consent that the full text of the legislation I am introducing be reprinted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1042

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States is amended by inserting in numerical sequence the following new subheading:

"9902.64.02	Skating boots (provided for in subheading 6402.19.10) actually used in the manufacture of roller skates with in-line roller skates attached.	Free ...	No change ...	No change.. On or before 12/31/92".

SEC. 2. (a) The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of enactment of this Act.

(b) Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the appropriate customs officer within 90 days after the 15th day after the date of enactment of this Act, any entry—

(1) that was made after April 30, 1986, and before such 15th day; and

(2) with respect to which there would have been no duty if the amendment made by the first section of this Act applied to such entry;

shall be liquidated or reliquidated as though such amendment applied to such entry.●

By Mr. FORD (for himself, Mr. LAUTENBERG, and Mr. MITCHELL):

S. 1043. A bill to establish a Commission on Aviation Security and Terrorism to investigate the adequacy of and compliance with aviation security procedures and Federal Aviation Administration security requirements; to the Committee on Commerce, Science, and Transportation.

AVIATION SECURITY AND TERRORISM COMMISSION ACT OF 1989

● Mr. FORD. Mr. President, the tragic loss of Pan American Airways flight 103 over Scotland on December 21, 1988 has focused the attention of the world on the critical importance of aviation security. The resulting loss of 259 lives aboard the Boeing 747 aircraft, as well as 11 others in the town of Lockerbie, underscores the importance of our making every effort to improve the aviation security and counterterrorism activities of the United States.

Much has been done in the intervening months by the Secretary of Transportation and the Federal Aviation Administration to enhance aviation security. However, many continue to harbor concerns that these actions are too late and that more must be done. I share the belief that we must do whatever is necessary to ward off international terrorism and protect the lives of American citizens.

On April 3 of this year, the families of the victims of Pan Am 103 support group traveled to Washington at their own expense, seeking support for an independent investigation into the circumstances surrounding the bombing of Pan Am 103. Mr. President, that effort carries on today. Family members of those who lost their lives last December continue to call for a con-

gressional investigation to resolve unanswered questions, contentions, and allegations regarding the events leading up to and surrounding the Pan Am 103 incident. By their most recent count, the victims' families claim the support of 60 Senators for such an investigation.

As chairman of the Aviation Subcommittee, it is my belief that if an investigation is to be conducted into this tragic incident, it is best done by an independent group, comprised not only of Members of Congress, but experts in aviation safety and security as well. Such a group will ensure that all concerns related to this incident are addressed and, hopefully, resolved.

That is my sole motivation behind this bill. But it is my sincere hope that this effort will receive the support of the victims' family members, as well as others interested in seeing the enhancement of aviation security.

Mr. President, I'd like now to briefly summarize the major provisions of this legislation.

The Aviation Security and Terrorism Commission would be made up of nine members, including two Members of the Senate and two Members of the House of Representatives. Other members specified for the Commission include the Secretary of Transportation, the Chairman of the National Transportation Safety Board, a representative of the commercial air transportation industry, a representative from the intelligence community, and a member of the victims of Pan Am 103 family support group.

This Commission, which would have 9 months to investigate the events surrounding both the Pan Am 103 incident, as well as the 1983 shootdown of Korean Air Lines flight 007 over the Pacific Ocean, would be directed to report back to the President and the Congress on several issues related to aviation security. Specific items to be addressed include the adequacy of aviation security procedures; the adequacy of air carrier and airport compliance with FAA security requirements; the FAA's capabilities to enforce these requirements; whether aviation security procedures and requirements were adequately complied with prior to December 21, 1988; and the coordination among Federal agencies of aviation security and related counterterrorism procedures and practices involving the gathering, assessment, and distribution of intelligence. Upon completion of its investigation, the Commission is directed to make recommendations for changes in all laws, policies, and regulations relating to the security of commercial air transportation.

Importantly, this bill directs the Commission to prepare a separate report for public distribution, ensuring the needed protection of information on critical aviation security matters. This public document would therefore exclude any information that is classified or which the Commission feels would threaten the safety of air travel.

Mr. President, let me stress that this would not be an effort to duplicate or interfere with the ongoing criminal investigation into the Pan Am 103 incident. And, equally important, by proposing the establishment of this Commission, we are not calling into question the action of our European allies who have been working with the Secretary of Transportation to make improvements in aviation security. Rather, it is simply our effort to respond to the desires of those who have suffered most as a result of this incident, as well as our compelling desire to avoid its future repetition.

Mr. President, the Secretary of Transportation has said that an independent investigation of this type is not needed. Let me respond by saying that in my view, there are too many unanswered questions that need to be addressed in complete fashion before we can satisfactorily put this matter behind us.

The Aviation Security and Terrorism Commission is our effort to do that. It is also part of our overall effort to enhance aviation security. I therefore urge my colleagues support for this measure, and ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1043

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. That this Act may be cited as the "Aviation Security and Terrorism Commission Act of 1989".

ESTABLISHMENT OF COMMISSION

SEC. 2. There is established a commission to be known as the Commission on Aviation Security and Terrorism (hereinafter referred to as the "Commission").

MEMBERSHIP OF COMMISSION

SEC. 3. (a)(1) The Commission shall be composed of 9 members, who shall be as follows:

(A) The Secretary of Transportation.

(B) 2 Senators appointed by the President pro tempore of the Senate after consultation with the Majority Leader and Minority Leader of the Senate.

(C) 2 Members of the House of Representatives appointed by the Speaker of the House after consultation with the Majority Leader and the Minority Leader of the House of Representatives.

(D) The Chairman of the National Transportation Safety Board.

(E) 3 members appointed by the President, of whom 1 shall be a representative of the commercial air transportation industry, 1 shall be a representative of the intelligence community, and 1 shall be a representative of the family support group known as the Victims of Pan Am Flight 103.

(2) Appointments of members under paragraph (1)(B), (C), and (E) shall be made not later than 30 days after the date of enactment of this Act.

(b) The Commission shall elect a Chairperson from among the members of the Commission.

(c) A majority of the members of the Commission shall constitute a quorum for the transaction of business.

(d) Each member of the Commission shall be entitled to 1 vote, which shall be equal to the vote of every other member of the Commission.

(e) Any vacancy on the Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made.

FUNCTIONS OF COMMISSION

SEC. 4. (a) The Commission shall undertake an investigation into aviation security and terrorism focusing on the events leading up to and surrounding the destruction of Pan American World Airways flight 103 on December 21, 1988, and the destruction of Korean Air Lines flight 007, which was destroyed over the Pacific Ocean on August 31, 1983.

(b) The Commission shall submit a report not later than 9 months after the date of enactment of this Act, to the President and to the appropriate committees of the Congress. Such report shall include an assessment of—

(1) the adequacy of aviation security procedures and practices;

(2) the adequacy of the compliance of air carriers and airports with the security requirements of the Federal Aviation Administration;

(3) the ability of the Federal Aviation Administration to enforce such security requirements;

(4) whether these procedures and requirements were adequately complied with prior to December 21, 1988; and

(5) the coordination among Federal agencies of aviation security and related counterterrorism procedures and practices, including procedures and practices involving the gathering, assessment, and distribution of intelligence.

(c) In its report, the Commission shall make recommendations for changes in all laws, policies, and regulations relating to security of commercial air transportation.

(d) The Commission shall also prepare a separate version of its report for public distribution, excluding such information that is classified or the disclosure of which would threaten the safety of air travel.

POWERS OF COMMISSION

SEC. 5.(a) The Commission may, for the purpose of carrying out the provisions of this Act, hold such hearings, sit, and act at such times and places as the Commission may find advisable.

(b) The Commission may adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations, organizations, and personnel.

(c) The Commission may request from the head of any Federal agency or instrumentality such information, including classified information, subject to appropriate safeguards, as the Commission may require for the purpose of this Act. Each such agency or instrumentality shall, to the extent permitted by law and subject to the exceptions set forth in section 552 of title 5, United States Code, furnish such information to

the Commission, upon request made by the Chairperson of the Commission.

(d) Upon the request of the Chairperson of the Commission, the head of any Federal agency or instrumentality shall, to the extent possible and subject to the discretion of such head—

(1) make any of the facilities and services of such agency or instrumentality available to the Commission; and

(2) detail any of the personnel of such agency or instrumentality to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this Act, except that any expenses of the Commission incurred under this paragraph shall be subject to the limitation set forth in section 7.

(e) The Commission may use the United States mails in the same manner and under the same conditions as other Federal agencies.

(f) The Commission may enter into contracts with private firms, institutions, and individuals for the purpose of conducting research necessary to enable the Commission to discharge its duties under this Act, subject to the limitation on total expenses set forth in section 7.

(g) Subject to such rules and regulations as may be adopted by the Commission and subject to the limitation on total expenses set forth in section 7, the Chairperson of the Commission shall, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to General Schedule pay rates, have the power to appoint, terminate, and fix the compensation of such staff personnel as the Chairperson considers necessary.

COMPENSATION OF MEMBERS

SEC. 6. Members of the Commission shall serve without compensation, but shall be reimbursed for travel or transportation expenses under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business and engaged in the actual performance of duties of the Commission.

EXPENSES OF COMMISSION

SEC. 7. (a) Any expenses of the Commission shall be paid from such funds as may be available to the Secretary of Transportation.

(b) The total expenses of the Commission shall not exceed $1,000,000.

(c) Prior to the termination of the Commission pursuant to section 8, the Comptroller General of the United States shall conduct an audit of the financial books and records of the Commission to determine that the limitation on expenses has not been exceeded, and shall include its determination in an opinion to be included in the report of the Commission.

TERMINATION OF COMMISSION

SEC. 8. The Commission shall cease to exist on the date that is 30 days after the date on which the Commission submits its report.

● Mr. LAUTENBERG. Mr. President, I am pleased to join my distinguished colleague from Kentucky, Senator FORD, and our distinguished majority leader, Senator MITCHELL, in introducing this bill to establish a Commission on Aviation Security and Terrorism.

The goal of this Commission would be to get the answers to the lingering questions surrounding the tragic bombing of Pan Am flight 103 on December 21, 1988. Further, it would evaluate our Nation's ability to respond to the terrorist threats posed to civil aviation, and make recommendations for improving those efforts.

On March 17, I introduced Senate Resolution 86, which called on the President to appoint an independent commission to conduct this investigation and review. I was joined on that day by Senators FORD, HOLLINGS, BRADLEY, MIKULSKI, D'AMATO, HEINZ, SARBANES, and MOYNIHAN. There are now 19 cosponsors to Senate Resolution 86.

Unfortunately, the President has chosen not to appoint such a commission. The administration has taken the position that internal reviews will be sufficient to correct the problems that allowed the bombing of Pan Am 103 to take place, so that more American lives won't be lost to such terrorism.

By introducing this bill, we are saying we don't agree. Mr. President, I would say that, for this Senator, it is not a matter of not taking the administration at its word; that word being the President's stated commitment to finding the answers and improving aviation security. But rather, as I've stated before, it's a question of jurisdiction. The issues involved fall under the purview of several Federal departments and agencies. Similarly, they fall under the jurisdiction of a number of different committees in the Senate and House.

It continues to be my belief that the best way to address the serious concerns about Pan Am 103 and our aviation security programs overall is through a single, comprehensive review of the facts. A commission like that outlined in the bill we're introducing today would meet that standard.

This Commission would have nine members: two each from the House and Senate; one from the Department of Transportation; one from the intelligence community; one from the National Transportation Safety Board; one from the airline industry; and one from the victims of Pan Am 103, the group of families and friends of those killed on that flight.

I believe that this composition would allow for a thorough, fair investigation. The intention would not be to repeat or overlap ongoing criminal investigations. Its goal would not be to point fingers; but rather to point out needed changes.

Mr. President, we were all touched by the tragic destruction of Pan Am flight 103 on December 21 over Lockerbie, Scotland. That bombing was an unprecedented assault on America and American citizens. It is our responsibility to find out all we can about how the bombing happened, and do what we can to prevent such attacks in the future.

But today, almost 4 months after their loved ones were so viciously taken from them, these people still don't have the answers they deserve. They don't know who knew what, when they knew it, what was done with the information, and what should have been done. Further, there continue to be unanswered questions about whether we're doing all we can to protect the lives of the millions of Americans traveling abroad each year.

On March 14, the Subcommittee on Transportation of the Senate Appropriations Committee held a hearing to look into the Pan Am 103 bombing. At that hearing, important information was withheld from the subcommittee. It was only when press reports in Europe disclosed that there had been a security bulletin issued to our air carriers because of a possible threat from terrorists that the administration admitted to the existence of such information.

It is unacceptable to have important information continue to come out piecemeal. We must get the facts, so we can improve the efficiency of our aviation security system. This requires a close look at the events leading up to the bombing of Pan Am 103 and a comprehensive look at how our Government addresses the growing problem of aviation terrorism.

The bill Senators FORD, MITCHELL, and I are introducing today provides a means of getting such a review. I applaud Senator FORD for his efforts, and urge my colleagues to support this bill.

Mr. President, in closing I would note that the families and friends of those killed on Pan Am 103 continue to call for a full Senate investigation, separate from the Commission that would be established by this bill. They've been frustrated by the administration's refusal to agree to an independent review. I greatly respect their refusal to take "no" for an answer, and will continue to work on their behalf to request a separate Senate investigation, as well.●

By Mr. DOLE (for himself, Mr. BOREN, Mrs. KASSEBAUM, Mr. NICKLES, Mr. BENTSEN, Mr. GRAMM, Mr. BAUCUS, Mr. BURNS, Mr. PRESSLER, Mr. WIRTH, Mr. PRYOR, and Mr. DASCHLE):

S. 1044. A bill to amend the Disaster Assistance Act of 1988 to extend disaster assistance to losses due to adverse weather conditions in 1988 or 1989 for crops planted in 1988 for harvest in 1989, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DISASTER ASSISTANCE ACT

Mr. DOLE. Mr. President, today I am pleased to introduce bipartisan drought disaster assistance legislation joined by Senators BOREN, KASSEBAUM, NICKLES, BENTSEN, GRAMM, BAUCUS, PRESSLER, BURNS, WIRTH, PRYOR, DASCHLE, and DOMENICI.

Last year Congress did the right thing when it passed a major disaster assistance package for producers in many States whose crops were devastated by one of the worst droughts in the past half century. The 1988 Disaster Assistance Act received broad bipartisan support, the same kind we see here today. We were able to help farmers in their time of need without adding to the Federal budget deficit, because we were able to use savings resulting from lower deficiency payments and higher market prices.

The way the program works is we have a target price, say, $4. If you have a market price of $3.60 and a target price of $4.10, the deficiency payment is the difference, 50 cents a bushel in this example. With the drought of last year and the drought, conditions so far this year, we have had lower crop production, and the market price in some cases can approach or exceed the target price. So, in wheat, there may be no deficiency payment, or reduced payments, and we will be able to save money even beyond what we will spend for disaster relief this year because of high market prices and reduced deficiency payments for wheat.

Undoubtedly, last year's bill saved many family farmers in the corn belt and northern States, where the drought was most severe.

A RIPPLE AFFECT

We were pretty lucky in Kansas last year. We dodged the drought bullet, although I was pleased by the support and sympathy the people in my home State demonstrated to their agricultural neighbors.

Unfortunately, Kansas farmers got a jolt last year, soon after our wheat crop went in the ground. A history-making dry spell began to play havoc with our winter wheat crop, and it has persisted throughout the winter and the spring.

Our winter wheat crop has been burned, blown away and now buried. There's been no rain, no more miracles and now, no more hope.

As of Monday, 85 percent of the State's wheat crop was rated in the poor-to-very poor categories. Topsoil moisture was rated 99 percent short, and subsoil moisture was rated 100 percent short. Our projected wheat crop of 202 million bushels will be only one-half of its potential. In other words, it's a disaster.

As a result, cattle and livestock producers are also taking it on the chin. Secretary Yeutter showed his concern by coming to Kansas personally, to survey the damage in mid-April. Unfortunately, conditions have deteriorated since then. The Secretary did use his discretionary powers to provide some temporary assistance, such as haying and grazing during the principal growing months, and allowing access to livestock feeding programs. But the conditions have gotten so bad that our farmers now need a helping hand from Washington.

Kansas pastures and set-aside acres are bone dry, setting off a chain reaction of bad news on the drought front. Haying and grazing on set-aside acres may be of little benefit; access to inadequate forage and water supplies for cow herds have caused heavy runs of cattle to slaughter; and now, wheat farmers are simply plowing their crops under.

Obviously, the long-term financial impact on crop and livestock producers will be severe, with some observers estimating more than $800 million in losses in Kansas. Of course, not only farmers, but our rural businesses, up and down Main Street, will be hurt, too.

The bottom line is, we need help. Our bill is simple and straight-forward. We believe it is time to extend the 1988 relief act to crops planted in 1988 but harvested in 1989. This action will cover mostly winter wheat, the crop in the most serious trouble. If other problems develop, I assume changes could be made. The provisions would be administered under similar terms and conditions as last year with respect to payment rates, benefits, requirements on Federal crop insurance participation in future years, and so forth.

In addition, our bill would require the secretary to provide cost-share funds, on a limited basis, for transportation of livestock to areas where feed and water exist. We would also provide limited cost-share funding to livestock producers who have had to implement emergency water projects, such as revamping old wells or installing pipelines to bring scarce water to thirsty livestock.

The May 4 letter from USDA which we inserted into the CONGRESSIONAL RECORD noted that the President's January baseline estimated deficiency payment outlays would be $1 billion for wheat producers. That estimate meant we possibly would have enough savings from the decline in deficiency payments as a result of rising prices to offset relief costs, which USDA estimated to be upwards of $350 million. But we need to act soon.

It appears that the Congressional Budget Office [CBO] shares the view—that there will be a sufficient offset in fiscal year 1990 based on current crop conditions for wheat—in their preliminary analysis. Our bill specifies that funds would be made available from the reduction between the January baseline and the current crop conditions for wheat.

I would also reiterate Secretary Yeutter's comments that the most reliable long-term approach is crop insurance. Obviously, Congress will not always have the option to pass disaster bills during times of extreme budget constraints. The Federal crop insurance commission which Congress authorized last fall, has made preliminary recommendations with a final report due later this year. We hope constructive changes can be made to attract greater participation, improve administrative functions and make the program actuarially sound.

Mr. President, we have an opportunity to enact broad bipartisan legislation this year and we need to act in a timely fashion. I look forward to working with my colleagues in the House and Senate in the days ahead.

Finally, I represent both farmers and nonfarmers. It is my view that we cannot come into this Chamber every year when they have a disaster somewhere or drought and say we have to rescue the farmers because the farmers did not buy crop insurance, and crop insurance was available, and it is subsidized by the Government.

I hope that we could review the Crop Insurance Program, as I said yesterday on the Senate floor, because we are not going to have the option to come in every time there is some disaster in some State and say we need some more disaster relief, or that we have had another disaster, when farmers can take other means to prevent their economic losses with crop insurance. We authorized the appointment of a Crop Insurance Commission last year because there were a lot of shortcomings in the Crop Insurance Program.

Many farmers do not participate because it costs too much and benefits are small. It costs the Government money; sometimes it is mismanaged and sometimes it does not cover what farmers want covered, and I understand the advisory commission has already made 26 recommendations, and I hope Congress would act this year on changes in crop insurance. Sooner or later we are going to come to the point where we tell the American farmer, because of budgetary restraints, if you want to participate in the farm program, buy crop insurance and try to protect yourselves. If you do not want to participate, you do not have to buy crop insurance. We need to dress up, change, and modify the crop insurance program.

Finally, Mr. President, I want to thank my colleagues. I think there are six Democrats and seven Republicans sponsoring this legislation. I wish to include, following my statement, the bill and a summary of the bill and ask

29-059 O-90-44 (Pt. 7)

unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1044

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Disaster Assistance Act of 1989".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
TITLE I—EMERGENCY CROP LOSS ASSISTANCE
Sec. 101. Disaster assistance to producers of certain winter crops.
TITLE II—EMERGENCY LIVESTOCK ASSISTANCE
Sec. 201. Livestock transportation assistance.
Sec. 202. Water development projects.
TITLE III—RURAL BUSINESSES
Sec. 301. Disaster assistance for rural business enterprises.
TITLE IV—PLANTING OF ALTERNATE CROPS ON PERMITTED ACREAGE
Sec. 401. Planting of alternate crops on permitted acreage.
TITLE V—IMPLEMENTATION
Sec. 501. Budgetary impact.
Sec. 502. Date for providing disaster assistance.

TITLE I—EMERGENCY CROP LOSS ASSISTANCE

SEC. 101. DISASTER ASSISTANCE TO PRODUCERS OF CERTAIN WINTER CROPS.

Subtitle A of title II of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended by inserting after section 202 the following new section:

"SEC. 202A. DISASTER ASSISTANCE TO PRODUCERS OF CERTAIN WINTER CROPS.

"(a) IN GENERAL.—Effective only for producers on a farm who suffered losses due to drought, hail, excessive moisture, freeze damage, or related condition in 1988 or 1989 for a winter crop of a commodity planted during 1988 for harvest in 1989, subject to subsection (c), the Secretary of Agriculture shall make disaster assistance available to such producers under similar terms and conditions as are prescribed under this subtitle for providing disaster assistance to producers of the 1988 crop of such commodity.

"(b) DISASTER OPTIONS.—Effective only for a winter crop planted during 1988 for harvest in 1989, in the case of producers on a farm who elected prior to the date of enactment of this section to devote all or a portion of the permitted acreage of the farm for the commodity to conservation or other uses in accordance with section 107D(c)(1)(C) or 105C(c)(1)(B) of the Agricultural Act of 1949 (7 U.S.C. 1445b-3(c)(1)(C) or 1444e(c)(1)(B)), the Secretary shall allow (within 30 days after the date of enactment of this section) such producers to elect whether to receive disaster assistance in accordance with this section in lieu of payments under section 107C(c)(1) or 105C(c)(1) of such Act.

"(c) ADMINISTRATION.—Sections 201, 202, 206, 207, 211, 231, 232, 233, and 234 shall apply to assistance provided under this section, except that for purposes of providing assistance under this section—

"(1) terms and conditions of programs established for the 1989 winter crop shall apply to such assistance, including crop years, production adjustment programs, yields, acreage bases, established prices, advance deficiency payments, loan rates, crop insurance indemnities, and livestock emergency benefits;

"(2) in section 201(b)(4), 'July 31, 1990' shall be substituted for 'July 31, 1989';

"(3) in section 202(b)(1), '1988 minus acreage actually planted to the commodity for harvest in 1989' shall be substituted for '1987 minus acreage actually planted to the commodity for harvest in 1988';

"(4) in section 202(b)(2), '1986, 1987, and 1988, minus acreage actually planted to the commodity for harvest in 1989' shall be substituted for '1985, 1986, and 1987, minus acreage actually planted to the commodity for harvest in 1988'; and

"(5) in section 232(a)(2), '180 days after the date of enactment of the Disaster Assistance Act of 1989' shall be substituted for 'March 31, 1989'.

"(d) DEFINITION.—As used in this section, the term 'winter crop' means a crop of wheat or feed grains planted during 1988 for harvest in 1989.".

TITLE II—EMERGENCY LIVESTOCK ASSISTANCE

SEC. 201. LIVESTOCK TRANSPORTATION ASSISTANCE.

Section 606 of the Agricultural Act of 1949 (7 U.S.C. 1471d) is amended by adding at the end thereof the following new subsection:

"(f) Notwithstanding any other provision of law, the Secretary shall make available not less than $25,000,000 to provide livestock transportation assistance under paragraph (6) of subsection (a) for livestock emergencies in 1989.".

SEC. 202. WATER DEVELOPMENT PROJECTS.

Section 607 of the Agricultural Act of 1949 (7 U.S.C. 1471e) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding any other provision of law, the Secretary shall make available not less than $25,000,000 to provide special assistance under paragraph (2) of subsection (b) for livestock emergencies in 1989.".

TITLE III—RURAL BUSINESSES

SEC. 301. DISASTER ASSISTANCE FOR RURAL BUSINESS ENTERPRISES.

Section 331 of the Disaster Assistance Act of 1988 (7 U.S.C. 1929a note) is amended—

(1) in subsection (a), by inserting after "1988" each place it appears the following: "or (in the case of losses described in section 202A) 1989"; and

(2) in subsection (c)(1), by adding at the end thereof the following new sentence: "In the case of losses described in section 202A, no guarantee under this section may exceed 90 percent of the principal and interest payable on the loan.".

TITLE IV—PLANTING OF ALTERNATE CROPS ON PERMITTED ACREAGE

SEC. 401. PLANTING OF ALTERNATE CROPS ON PERMITTED ACREAGE.

Section 504(b)(2) of the Agricultural Act of 1949 (7 U.S.C. 1464(b)(2)) is amended—

(1) by striking out "and" at the end of clause (D);

(2) by redesignating clause (E) as clause (F); and

(3) by inserting after clause (D) the following new clause:

"(E) notwithstanding clause (C), in the case of the 1990 crop year, acreage in an amount equal to not to exceed 20 percent of the permitted acreage for a program crop, if—

"(i) the acreage considered to be planted is planted to canola, rapeseed, sunflower, safflower, flaxseed, kenaf, crambe, guayule, milkweed, or meadowfoam;

"(ii) the producers on the farm plant for harvest to the program crop at least 50 percent of the permitted acreage for such crop; and

"(iii) payments are not received by producers under section 107D(c)(1)(C), 105C(c)(1)(B), 103A(c)(1)(B), or 101A(c)(1)(B), as the case may be; and".

TITLE V—IMPLEMENTATION

SEC. 501. BUDGETARY IMPACT.

Notwithstanding any other provision of law, this Act and the amendments made by this Act may only be carried out only if, and to the extent that, funds are made available because—

(1) the amount of funds necessary to provide deficiency payments for the 1989 crop of wheat under section 107D(c)(1) of the Agricultural Act of 1949 (7 U.S.C. 1445b-3(c)(1)), as estimated by the Director of the Congressional Budget Office in the nearest estimate made on or after January 1, 1989; is greater than

(2) the amount of funds necessary to provide such payments, as estimated by the Director in the nearest estimate made before, on, or after the date of introduction of the bill that resulted in the enactment of this Act.

SEC. 502. DATE FOR PROVIDING DISASTER ASSISTANCE.

Notwithstanding any other provision of law, assistance may not be provided under this Act or an amendment made by this Act until or after October 1, 1989.

TITLE SUMMARY OF THE DISASTER ASSISTANCE ACT OF 1989

Title I. Emergency disaster payments.—Extends the 1988 Disaster Assistance Act to crops planted in 1988 for harvest in 1989.

Title II. Emergency livestock assistance.—Provides $25 million for emergency livestock transportation assistance and $25 million to reimburse producers for emergency water development projects due to drought.

Title III. Rural business loans.—Allows up to 90 percent of principal and interest to be guaranteed on guaranteed loans for rural business enterprises affected by the drought.

Title IV. Planting of alternative crops.—Extends for one year the 1985 farm bill provision allowing producers to plant up to 20 percent of permitted acres to specific nonprogram crops. Crops eligible include canola (excluding soybeans), other varieties of rapeseed, sunflowers, safflower, flaxseed, kenaf, crambe, guayule, milkweed and meadowfoam without a loss of base.

Title V. Implementation/budgetary impact.—Requires disaster payments made under this act to be offset by reduction in deficiency payments. Payments would be made on or after October 1, 1989.

Mr. BOREN. Mr. President, I am very pleased to join with several of my colleagues and especially the distinguished minority leader, Senator DOLE, in introducing this bipartisan effort to extend drought relief measures similar to those contained in the Disaster Assistance Act of 1988 to areas with severely damaged winter crops.

Last year's phonemenal drought wiped out spring-planted crops in dozens of States. Congress responded by quickly passing legislation that provided disaster payments to producers with substantial losses. The drought bill was paid for by using savings to the Federal Government as a result of higher prices, and, therefore, lower deficiency payments.

Currently, producers of winter crops, especially winter wheat, in Oklahoma and surrounding States are suffering from equally severe conditions, essentially caused by the same drought. Drought has devastated the crop in the Oklahoma Panhandle. The dry conditions have also made the wheat much more susceptible to freeze damage. Wheat farmers as far south as the Red River have suffered extensive damage from freeze damage. At this time, over a third of my State's wheat crop is rated as poor or very poor.

The legislation we are introducing today would apply the provisions of last year's bill to crops planted in 1988 for harvest in 1989. The bill would cover damage occurring in either 1988 or 1989, including freeze damage.

Second, this bill would provide assistance for emergency livestock transportation, water development projects, and drought-affected rural businesses.

Finally, this bill would extend for 1 year a provision that allows producers to plant certain alternative crops on a percentage of their permitted acreage.

It is important to note that it is almost harvest time for these winter crops. Last year's bill was passed over a month before harvest would have taken place. Congress should act expeditiously to provide similar assistance for winter crop producers. The Department of Agriculture has estimated that a winter crop disaster bill would cost around $250 to $350 million. However, the Department also estimates that because of higher prices the Government will save around $500 million in deficiency payments. This is the same method used to pay for last year's bill and I trust that Congress will decide that it is equitable to pass this legislation and provide this much-needed assistance.

Mrs. KASSEBAUM. Mr. President, I am pleased to join Senator DOLE and others in introducing legislation to extend the Disaster Assistance Act of 1988 for winter crops planted in 1988 for harvest in 1989.

There is no doubt about the severity of the drought experienced in Kansas and other major wheat and livestock regions. The Kansas wheat crop is now expected to be the smallest since 1966. The estimated production this year in Kansas is a little over 200 million bushels, less than one-half of the 450 million bushel projection. In the five major wheat States, production will be one-third of normal.

This legislation would allow farmers with up to a 35-percent loss to keep deficiency payments previously advanced. If the disaster is greater than 35 percent, 65 percent of the target price will be made. On any disaster in excess of 75 percent of program yield, disaster payments will equal 90 percent of the target price.

Although much of the attention has been on the wheat crop, livestock producers also are affected by this year's drought conditions. Dry pastures have prompted farmers in Kansas, Oklahoma, and Texas to sell an unusually large number of cattle to feedlots. This has caused the futures prices to decline steadily in the past 30 days. Those with foundation cow herds in Kansas cannot find pastures with adequate cover, and the cash market is off as much as $200 per head.

The drought relief legislation, which we have proposed, will make available up to $25 million to provide livestock transportation assistance. While this assistance to transport livestock was included in the 1988 Drought Assistance Act, the Agriculture Secretary was allowed to implement the program at his discretion. Consequently, this program was not available to producers. Our bill would mandate this assistance to transport livestock during the livestock emergency.

Another key provision in our legislation would direct the Soil Conservation Service to provide 50-percent cost-share assistance with terracing, ponds, and other practices for management of limited water supplies. The Agriculture Department would provide not less than $25 million for these water development projects.

The situation is serious, and I believe we must move expeditiously to address it, particularly since there are offsetting savings in the budget to fund this assistance.

The Agriculture Department estimates that our legislation would result in payments between $250 and $350 million for the 1989 wheat crop. Department officials also agree that with the average market price for wheat continuing to increase, there will be more than enough savings from current programs to pay for extended relief.

Reflecting changes in wheat supplies, market prices continue to rise and this is reducing Government exposure. The administration had assumed $1 billion in deficiency payments to wheat farmers participating in the 1989 program. This was based on $3.60 per bushel as the season average market price. New estimates of the average price will be closer to $4.10, which would mean very little or none of that $1 billion would be spent.

The legislation which I have sponsored is primarily directed at winter-wheat producers and those with livestock operations. However, a provision does extend the authority for the Farmers Home Administration to make guaranteed loans to qualifying rural businesses which have suffered losses due to the drought.

Mr. President, I also want to point out that Federal crop insurance still has major problems and is not effectively addressing these kinds of situations. Last year Congress recognized this fact and established a commission to ensure a thorough review of the Federal Crop Insurance Corporation. These recommendations for improvements will be submitted to Congress this July. I believe it is vital that we then take steps to improve crop insurance programs.

In the interim, I believe it is essential that we pass legislation to open they way for extended disaster assistance for farmers now facing a disaster as serious as the one that struck other parts of the Farm Belt last year.

Mr. NICKLES. Mr. President, dry weather conditions, which blasted the Northern Plains and the Midwest last year, are still being felt today across the Texas and Oklahoma Panhandles, Kansas, Colorado, and Nebraska. Unlike last year however, the crop affected is winter wheat.

Mr. President, this crop was planted in the fall of 1988 and will be harvested shortly. The effects of the drought have been substantial, with USDA's recently reporting a 19-percent decrease in Oklahoma's production from 173 million bushels last year to 140.4 million bushels this year. The dry conditions have also effected livestock herds, and under current authority, the USDA is reacting to provide assistance to help ranchers cope with stressed conditions.

On May 4, the Senate unanimously accepted an amendment to the budget resolution expressing support for legislation which would extend disaster assistance to the 1989 crop of winter wheat. The bill being introduced today by Senator DOLE, myself, and others is the legislative expression of that resolution.

This legislation extends the provisions of the Disaster Assistance Act of 1988, to crops planted in 1988 for harvest in 1989. This essentially means winter wheat, but also includes barley and oats. Affected producers would be provided with financial assistance based on the extent of their losses. Those producers with losses in excess of 65 percent would also be required to purchase Federal crop insurance for the coming crop year.

Mr. President, the bill also requires this disaster program to have no budgetary impact by using savings from estimated reductions in 1989 deficiency payments. According to USDA, 1989 Wheat Program deficiency payments will be substantially less than the $1 billion which was originally estimated.

In fact, with each nickel increase in the previously estimated $3.60 season average price, $100 million in deficiency payments is saved. USDA now estimates possible savings of $500 million or more, making it possible to fund effective, targeted disaster assistance within budget constraints. In addition, Mr. President, this bill includes crop planting flexibility provisions, which if extended to the 1990 crop could also provide budgetary savings.

When the Congress reacted to last summer's drought situation, they did so to ensure that a farmer's total crop failure would not constitute a total income failure. Congress' reaction, the Disaster Assistance Act of 1988, ended up costing $4 billion. Many of the provisions of that act were objected to by this Senator, but many others were viewed as prudent and necessary. I believe the legislation we offer today is also prudent and necessary, and I urge my colleagues to support its timely passage.

By Mr. SYMMS (for himself, Mr. BAUCUS, Mr. BURDICK, Mr. CHAFEE, Mr. MITCHELL, Mr. DURENBERGER, Mr. WARNER, Mr. LIEBERMAN, Mr. JEFFORDS, Mr. HUMPHREY, Mr. REID, Mr. LAUTENBERG, Mr. BUMPERS, Mr. GARN, Mr. COHEN, Mr. MOYNIHAN, Mr. CONRAD, Mr. MCCLURE, Mr. MURKOWSKI, Mr. BREAUX, Mr. GRAHAM, and Mr. SIMPSON):

S. 1045. A bill to establish a National Environmental Policy on the participation of the United States in international financing; to the Committee on Environment and Public Works.

NATIONAL ENVIRONMENTAL POLICY ON INTERNATIONAL FINANCING ACT OF 1989

Mr. SYMMS. Mr. President, today I am introducing a bill which establishes a national environmental policy on the U.S. involvement in development financing. This bill will set out and clearly define the goals for improving the environmental performance of the international development institutions in which we participate.

The Third World countries, where we have invested millions and millions of U.S. taxpayers dollars, also happen to be the home of the world's vast tropical forests. These countries are facing tremendous trials. Few of them have the capital to finance their own development, so they must depend on foreign lenders. The U.S. Government participates in a number of such lending institutions, specifically the multilateral development banks, or the MDB's.

More than 88 percent of the capital investment in the Third World comes from MDB's or from the commercial banks in Japan, Europe, or the United States with an MDB providing technical assistance negotiation or guarantee.

Unfortunately, the environmental record of MDB investments has been dismal. Poorly engineered dams have unintentionally flooded thousands of acres of tropical forest, while others have been rendered useless by siltation. Large-scale export agricultural projects have displaced small farmers, driving them into the rain forest where the soil cannot support them.

This has happened because these loans require such massive interest payments. For example, they have had to put in big mechanized farms to grow soybeans to sell on the world market to get the money to pay the interest payments. Then they move the farmers off those fields as they go to bigger mechanized operations and push them into the rain forest. The way they get in there, of course, is because the World Bank loans have helped them with infrastructure programs.

Of these, perhaps the most detrimental ones have been the relocation and infrastructure programs intended to address political pressures, but ill conceived from an environmental standpoint. These projects entice migration into forested areas, only to result in rampant disease, deforestation, and, in the end, greater poverty.

Mr. President, there is a growing consensus that the United States should be more conscientious about where it invests U.S. tax dollars. We should be more fully informed of the environmental impact of the loans which come before us for our vote.

That is why I have introduced the National Environmental Policy on International Financing Act. This bill:

First, expresses the goal of the United States to encourage banks and developing countries to fully assess the environment impacts of development projects in a consistent, timely way, with public involvement where possible.

Second, adds to the National Environmental Policy Act a requirement that the United States request a complete assessement of the environmental impacts of the international loans on which we vote.

Third, sets up a process to assist banks in preparing environmental assessments of their lending proposals, and encourages the U.S. Treasury to build international consensus on the need to halt tropical deforestation and other forms of unsustainable development.

Fourth, requires Treasury and the President's Council on Envionmental Quality to report to Congress on the success of these efforts.

The bill is carefully written so as not to offend the developing countries who see their tropical forests as sovereign territory. It focuses more on taking care of our own contribution to the problem, while we build consensus on the need for other countries to do the same. In the end, the citizens of developing countries control the fate of their own environment. The United States cannot "save the Amazon from Brazilians." But we can help Brazilians do the job themselves because, after all, the Amazon is Brazil's.

Mr. President, the consequences of continuing to plow money into Third World development without knowing what it is we are doing to the environment are too risky. When development proves to be unsustainable, we waste taxpayer dollars, destroy natural resources, depress underdeveloped peoples, and threaten the very global environment in which we live. I urge my colleagues to consider the bill introduced today, and lend it their full support. They are all invited to join in cosponsoring this much needed addition to our National Environmental Policy.

I might note to the distinguished President pro tempore that this bill is sponsored by all members of the Environmental and Public Works Committee. I thank these sponsors for sponsoring it. There may be others of my colleagues who wish to sponsor the bill and I urge them to do so. I ask unanimous consent to print the bill in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1045

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Environmental Policy on International Financing Act of 1989".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the United States plays a significant role in determining the projects, policies, and lending practices of international financial institutions, devoting more financial resources to such institutions than any other nation;

(2) such institutions have failed in some cases to assess the environmental consequences of their actions, resulting at times in deforestation, desertification, erosion, water pollution, water-borne disease, and other manifestations of unsustainable development;

(3) while such institutions are making some progress in their environmental performance, assessment of projects for environmental consequences is not always consistent, timely, or publicly accessible;

(4) consistent, timely assessment and public scrutiny of the environmental and social impacts of proposed international financial projects are essential to ensure sustainable development;

(5) models for the conduct of such assessments exist in various forms, including, but not limited to—

(A) the National Environmental Policy Act, its regulations, and its history in the courts of the United States;

(B) the goals and principles of Environmental Impact Assessment adopted by the Governing Council of the United Nations Environment Programme in June 1987; and

(C) the measures required to facilitate the environmental impact assessment of development assistance projects and programs recommended by the Council of the Organization for Economic Cooperation and Development at its 649th Meeting in October 1986;

(6) methods and procedures for environmental impact assessment should be adopted and utilized by borrowing countries or international financial institutions themselves, and cannot be imposed unilaterally by the United States; and

(7) the United States should encourage, to the extent possible, environmental impact assessment of the international financial activities in which it participates, with the goal of adoption by borrowing countries of their own procedures for assessing environmental impacts and alternatives.

SEC. 3. AMENDMENT.

Title I of the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4335) is amended by adding at the end thereof the following new section:

"SEC. 106. (a) On and after July 1, 1991, at least 120 days prior to a vote of the United States on a proposed action, significantly affecting the quality of the human environment, by an institution listed in section 22 of the Export-Import Bank Act Amendments of 1986, the official responsible for casting such vote shall request of the institution a detailed statement which meets the criteria set forth pursuant to subsection 106(b). All information received as a result of such request shall accompany the proposal through agency review processes, and shall be made available to borrower and donor countries and to the public.

"(b) For purposes of this section, the Council on Environmental Quality shall identify and promulgate internationally accepted criteria for environmental impact assessment of international financial activities, sufficient to facilitate the consideration of environmental impacts in lending decisions. Such criteria shall include the solicitation of public comments, review of alternatives, and any other criteria found to be internationally recognized as an element of adequate environmental impact assessment.

"(c) The responsible official identified in subsection (a) shall not be required to verify the accuracy of the content of documents obtained under this section, except as necessary to identify—

"(1) minimum criteria which are not met; and

"(2) information pertinent to environmental impact assessment absent from the statement, but available to the responsible official through means other than the institution proposing the action.

A statement of findings under this subsection should accompany the proposed action through agency review processes, and shall be made available to borrower and donor countries and to the public.".

SEC. 4. IMPLEMENTATION.

(a) Within 30 days after the date of enactment of this Act, and as necessary thereafter, officials charged with requesting a statement under section 106(a) of title I of the National Environmental Policy Act of 1969 (as added by section 3 of this Act) shall—

(1) inform the management of the institutions listed in section 22 of the Export-Import Bank Act Amendments of 1986 of the expected nature of such statements; and

(2) begin negotiations with institution management and representatives of other institution members, within the framework of international agreements, as necessary to facilitate the conduct of environmental impact assessments.

(b) The Secretary of the Treasury, assisted by the Secretary of State, the Secretary of the Interior, the Secretary of Agriculture, the Administrator of the Environmental Protection Agency, the Chairman of the Council on Environmental Quality, the Administrator of the Agency for International Development, the Administrator of the National Oceanic and Atmospheric Administration, and representatives of other interested agencies, shall, in cooperation with institutions referenced in subsection (a)(1), make available upon the request of such institutions the appropriate United States government personnel to assist in the following areas—

(1) the training of institution staff in environmental impact assessment procedures;

(2) the provision of long- and short-term advisers on environmental issues;

(3) participation in preparing environmental studies for projects with potentially significant environmental impacts; and

(4) the preparation of documents for public release, and the development of procedures to provide for the inclusion of interested nongovernmental organizations in the environmental review process;

and shall encourage other institution member countries to provide similar assistance.

(c) The Secretary of the Treasury shall take steps with both donor and borrower nations to expand international consensus on the importance of environmental issues and to focus efforts on the need for reform, with particular emphasis on developing greater agreement on standards for projects that may affect ecosystems such as, but not limited to, tropical moist forests, wetlands, savannas, and other areas, and on securing greater support for programs and policies that encourage energy efficiency and conservation and integrated pest management.

SEC. 5. REPORTS.

(a) Within the 12-month period following the date of the enactment of this Act, the Secretary of the Treasury shall prepare and submit to the Committee on Environment and Public Works of the Senate, and the Committee on Merchant Marine and Fisheries of the House of Representatives, a detailed report containing an evaluation of the progress achieved by each international financial institution in adopting and implementing procedures for systematically assessing the environmental impacts of institution activities, and in the implementation of section 4. A copy of such report shall be made available to borrower and donor countries and to the public.

(b) The Council on Environmental Quality shall submit an interim progress report not later than March 1, 1992, and a detailed report not later than January 1, 1993, to the Committee on Environment and Public Works of the Senate, and the Committee on Merchant Marine and Fisheries of the House of Representatives, on the efficacy of efforts by the United States to encourage consistent, timely environmental impact assessment within international financial institutions. The report shall be made available to borrower and donor countries and to the public.

Mr. BAUCUS. Mr. President, I am pleased to join my colleague from Idaho, Senator SYMMS, in introducing The National Environmental Policy on International Financing Act of 1989. This legislation is very similar to a measure reported by the Environment and Public Works Committee last year, S. 2753.

I chaired a subcommittee hearing on that proposal last June. We heard from a former executive director to the World Bank, several Federal Agencies, environmental organizations, and other interested groups. Generally, the witnesses supported bolstering consideration of environmental effects of multilateral development bank loans, though views varied on the best way to achieve that objective.

The main concern was that the United States not appear arrogant or heavyhanded in trying to promote environmental assessments on proposed loans. It is my belief that a fundamental element in our foreign policy should be promotion of environmentally sound and sustainable development regardless of where it takes place. As a major shareholder in the MDB's the United States has the responsibility to use every tool to achieve this purpose.

We are only too familiar with the profound global effects of deforestation, loss of productive farm land through sub-standard agricultural practices, and poorly conceived hydropower projects. The bottom line is that bad economic development projects result in incalculable human suffering and the destruction of almost irreplaceable natural resources.

Examples abound of projects financed by the international community that have gone seriously awry because of bad planning and implementation. A beef export project in Botswana has resulted in widespread desertification and destruction of wildlife populations. The cruelest irony is that despite large exports of beef, 65 percent of that country is now dependent on foreign food aid where once it was self-sufficient.

In Brazil, the Polonoreste project has been an economic and social debacle. Thousands of people were encouraged to relocate as part of a multifaceted development project. The result has been the destruction of rain forests; a failed attempt to farm land that was unsuited to agriculture; and a displaced and impoverished population.

In light of these and other failures it is time that the United States take the initiative to constructively influence reforms as a member of the World Bank and the three regional development banks.

The bill we are introducing today makes significant strides in improving the gathering and dissemination of information about environmental effects of proposed loans. Possibly the most important feature is the public access provision. Presently, it is very difficult for either donor or borrowing nations

to get access to this documentation, if it exists at all. The bill provides that all environmental information that is received at the request of the U.S. executive directors will be made available to the public.

Another important provision would enable the MDBS to request and receive staff support from relevant Federal agencies to provide technical assistance in developing environmental assessment procedures and documentation. It is my belief that by setting this example, other member countries will follow it and make such assistance available as well.

I commend the Senator from Idaho for his perseverance on this matter. I am hopeful that the Senate will act on this measure in the near future.

By Mr. RUDMAN (for himself and Mr. HUMPHREY):

S. 1046. A bill to designate the Merrimack River, in the State of New Hampshire, as a river to be studied for inclusion on the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

MERRIMACK RIVER STUDY ACT [1]

● Mr. RUDMAN. Mr. President, today I rise along with my colleague from New Hampshire [Mr. HUMPHREY] to introduce legislation directing the National Park Service to study a 22-mile segment of the Merrimack River to determine its eligibility for possible designation as a Wild and Scenic River.

My colleagues may recall legislation enacted in the 100th Congress which designated the Wildcat River in Jackson, NH a Wild and Scenic River. This action has served as an inspiration to other New Hampshire communities looking for protection of their river resources.

The Merrimack River begins in Franklin, NH at the confluence of the Pemigewasset and Winnepesaukee Rivers and flows southward into eastern Massachusetts to the Atlantic Ocean. The Merrimack is one of the 10 largest river systems in the Northeast, and the fourth largest river basin lying wholly in New England, covering an area of 5,010 square miles.

In the 19th century, this renowned waterpower stream provided power for the mills of Manchester, NH as well as Lawrence and Lowell, MA. For much of the 20th century, the Merrimack was among the most polluted rivers in the country. Today, with the help of Federal, State and local efforts, the Merrimack has seen a resurgence in its natural, scenic and recreational values, while development pressures mount on the communities along the river. A program to restore Atlantic Salmon to the river has been underway for a number of years and has seen results, shad have returned to the river, and the American bald eagle, listed by the Federal endangered species program, uses the river corridor as a wintering ground. Finally, New Hampshire residents and tourists alike use the river for fishing, canoeing, boating and birding.

This 22-mile segment of the river not only possesses outstanding natural and scenic values, but includes the remains of the world's oldest and longest timber crib dam, a 19th century power structure which is eligible for the National Register.

In 1986, a number of communities along the Merrimack River organized to protect the river from a proposed hydro facility at Sewall's Falls. The hydro facility proposal has since been withdrawn, but the interest in long term protection of the river has continued. Groups such as the Merrimack River Coordinating Committee, Friends of the Merrimack, the Merrimack River Watershed Council, the Society for the Protection of New Hampshire Forests, and the New Hampshire Wildlife Federation have been particularly active. In April 1988, the New Hampshire Office of State Planning initiated a study of the Merrimack River, which is currently underway. I envision that the Federal study will dovetail the existing State study.

As part of a 2-year effort, the Merrimack River Coordinating Committee, working with all local communities and the various interests, built a consensus on the long term protection of the Merrimack. The legislation I am introducing today represents that consensus. This measure has the support of Governor Gregg and all the communities along the proposed study segment. In addition, all local landowners have been contacted and we know of no local opposition.

The National Park Service added the 22-mile segment of the Merrimack River to the National Rivers Inventory in 1982, identifying it as a potential National Wild and Scenic River.

Mr. President, we as a Nation must protect our river resources for present and future generations. I am proud to be part of this conservation effort by introducing this legislation today and I hope to have the support of my colleagues.

I ask unanimous consent to print a letter from Governor Gregg along with letters of support from local communities in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

STATE OF NEW HAMPSHIRE,
Concord, NH, May 1, 1989.

Re Federal Study of Merrimack River.

Senator WARREN RUDMAN,
Hart Senate Office Building, Washington, DC.

DEAR WARREN: I support your efforts introducing legislation which will direct the National Park Service to study the segment of the Merrimack River from its confluence in the City of Franklin downstream to the backwater impoundment of the Hooksett dam excluding the Garvins Falls impoundment and dam.

As you know, the State of New Hampshire is presently in the process of studying the Merrimack and anticipates completing its work in the fall. The work being contemplated in the National Park Service effort should complement and enhance the State's efforts.

Thank you for your continuing efforts on behalf of the State of New Hampshire.

Sincerely,

JUDD GREGG,
Governor.

CITY OF CONCORD, NEW HAMPSHIRE,
Concord, NH, January 11, 1987.

Hon. WARREN B. RUDMAN,
U.S. Senate, Washington, DC.

DEAR WARREN: The Concord City Council respectfully requests your assistance in adding the central portion of the Merrimack River to the National Wild and Scenic Rivers Act for study and possible inclusion into the national system.

As you may be aware, the City Council appointed a River Study Committee early in 1987 to study use and protection of the river after a project which would have impounded the Merrimack at Sewalls Falls in Concord was shelved. Realizing that the proposed dam would have permanently inundated a magnificent natural resource in an urbanizing state, the City Council moved to take steps to permanently protect this resource. The Merrimack River Corridor Coordinating Committee, which was formed, represented a broad range of Concord people with interests in the river corridor. The Committee's activities, however, soon attracted interest from communities both north and south of Concord.

Citizen and political support has now solidified around efforts to protect the river in the entire central New Hampshire area. The committee determined that addition of the Merrimack River to the National Wild and Scenic Rivers Act would be the best possible opportunity for a formal study of the outstanding resources of the Merrimack River and for providing a basis for future planning in the river corridor.

This request is made by the City of Concord on behalf of itself, the City of Franklin, the Town of Northfield, the Town of Canterbury, the Town of Boscawen, the Town of Bow, and the Town of Pembroke. Each of these communities has formally endorsed this study in writing through their legislative bodies, and copies of their letters of support are enclosed.

We hope for your support and assistance in adding the Merrimack from Franklin to the Hooksett Dam to the federal act so that the proper study can be accomplished. We know that you are aware of this magnificent resource. Your support in this effort is critical to the future of the river and to those who live along it. Thank you for your assistance.

Sincerely,

JAMES R. MACKAY,
Mayor.

TOWN OF BOSCAWEN,
Penacook, NH, March 26, 1987.

Merrimack River Corridor Coordinating Committee, Louis Ungarelli, Secretary,
Concord Public Library, Concord, NH.

DEAR MR. UNGARELLI: Thank you for forwarding to us the minutes of your meeting. Due to scheduling we have been unable to attend your meetings but would like you to

know the Selectmen support your efforts and will assist you in any way we can. Please feel free to contact us at any time.

Sincerely,

DOUGLAS R. SUPRY,
RICK A. TROMBLY,
DAVID R. PLOURDE,
Chairman,
Boscawen Board of Selectmen.

TOWN OF BOW,
Bow, NH, May 26, 1987.

Representative JUDD GREGG,
Concord, NH.

DEAR CONGRESSMAN GREGG: The Board of Selectmen of the Town of Bow endorses the efforts of the Merrimack River Corridor Coordinating Committee to obtain Congressional authorization for a wild and scenic rivers program study of the Merrimack River, including that segment that lies in Bow. It is recognized that the Merrimack River and its corridor contains many outstanding and important resources, both natural and man-made. There is a definite need to plan for the future of these resources and how they will be used, and for that planning to be done by the cities and towns that share the river. The Town of Bow looks forward to joining the other communities on the Merrimack River in this study, and we intend to actively participate in this effort.

Sincerely,

SARA H. SWENSON,
ERIC E. ANDERSON,
ALFRED H. WARD,
Board of Selectmen.

OFFICE OF SELECTMEN,
Canterbury, NH, May 25, 1987.

Mr. TIMOTHY WOODMAN,
Chairman, Merrimack River Corridor Coordinating Committee, Concord Public Library, Concord, NH.

DEAR MR. WOODMAN: The Town of Canterbury endorses the efforts of your Committee to obtain Congressional authorization for a wild and scenic rivers program study of the Merrimack River, including the segment of the river that lies within Canterbury. It is recognized that the Merrimack River and its corridor represents many important and outstanding resources, both natural and man-made. There is a definite need to plan for the future of these resources and those who use them, and for the planning to be done by the cities and towns that share the river.

We look forward to joining with you and the other communities on the river in this study, and intend to actively participate in these efforts.

Sincerely,

CANTERBURY BOARD OF SELECTMEN.

CITY OF FRANKLIN, NH,
June 2, 1987.

Hon. JUDD GREGG,
U.S. Congress, Concord, NH.

DEAR CONGRESSMAN GREGG: The City of Franklin endorses the efforts of the Merrimack River Corridor Coordinating Committee to obtain Congressional authorization for a wild and scenic rivers program study of the Merrimack River, including that segment of the river that lies within Franklin.

It is recognized that the Merrimack River and its corridor represents many important and outstanding resources, both natural and man-made. There is a definite need to plan for the future of these resources and those who use them, and for the planning to be done by the cities and towns that share the river.

We look forward to joining with you and the other communities on the river in this study and intend to actively participate in these efforts.

Respectfully,

MAYOR CHESTER A. WICKENS, JR.

TOWN OF NORTHFIELD,
Northfield, NH, June 26, 1987.

JOE QUINN,
City of Concord, Merrimack River Corridor Coordinating Committee, Concord, NH.

DEAR MR. QUINN: The Board of Selectmen of the Town of Northfield endorses the efforts of the Merrimack River Coordinating Committee to obtain Congressional authorization for a wild and scenic rivers program study of the Merrimack River, including that segment of the river which lies in Northfield. It is recognized that the Merrimack River and its corridor contains many outstanding and important resources, both natural and man-made. There is a definite need to plan for the future of these resources and how they will be used, and for that planning to be done by the cities and towns that share the river. The Town of Northfield looks forward to joining the other communities on the Merrimack River in this study, and we intend to actively participate in this effort.

Very truly yours,

NORTHFIELD BOARD OF SELECTMEN.

TOWN OF PEMBROKE,
Pembroke, NH, June 4, 1987.

Hon. JUDD GREGG,
U.S. House of Representatives, Concord, NH.

DEAR MR. GREGG: The Board of Selectmen of the Town of Pembroke endorses the efforts of the Merrimack River Corridor Coordinating Committee to obtain Congressional authorization for a wild and scenic rivers program study of the Merrimack River, including that segment that lies in Pembroke. It is recognized that the Merrimack River and its corridor contains many outstanding and important resources, both natural and man-made. There is a definite need to plan for the future of these resources and how they will be used, and for that planning to be done by the cities and towns that share the river. The Town of Pembroke looks forward to joining the other communities on the Merrimack River in this study, and we intend to actively participate in this effort.

Very truly yours,

DARYL BORGMAN,
Chairman.
HAROLD PAULSEN,
ROY E. ANNIS.●

● Mr. HUMPHREY. Mr. President, I am pleased to join my colleague Senator RUDMAN, in introducing legislation to designate a 22-mile segment of the Merrimack River in New Hampshire for study under the National Wild and Scenic River Act. Identical legislation is being introduced in the House by Representatives ROBERT SMITH and CHUCK DOUGLAS, of New Hampshire.

The Merrimack River begins in Franklin and runs through the capital of New Hampshire, the cities of Manchester and Nashua, and on through northeastern Massachusetts before it flows into the Atlantic Ocean. This powerful river has played an important role in the history of New Hampshire. According to the National Park Service, the Merrimack was "the most noted waterpower stream in the world, during the 19th century industrial era." And, despite the fact that the Merrimack River runs through some of New Hampshire's most populated areas, the river banks have remained largely undeveloped providing habitat for rare plants and animals, as well as a unique spot for water recreation.

For centuries, Atlantic Salmon ran the Merrimack providing food and sport for citizens and visitors to New Hampshire. Due to construction of dams and increased industrial use of the river, the anadromous fish population dwindled down to nothing in the mid-1800's. It was not long, however, before efforts began to restore salmon to the Merrimack. At present, the Merrimack River is central to a Federal-State-private cooperative program to reestablish a self-sustaining salmon population in the Northeast. In 1987, an application for a license to construct a new dam at the Sewalls Falls site in Concord was rejected because of local opposition and concern regarding the dam's affect on the Salmon Restoration Program. At that time, the Department of Interior joined the New Hampshire congressional delegation in opposing construction of a new dam on the grounds that the project would seriously impair the ongoing efforts to restore salmon to the Merrimack.

In 1988, the mayor of Concord sent a letter to the New Hampshire congressional delegation on behalf of seven communities requesting that legislation be introduced "adding the central portion of the Merrimack to the National Wild and Scenic Rivers Act for study and possible inclusion into the national system." Concord, and each of the other communities—the city of Franklin, the town of Northfield, the town of Canterbury, the town of Boscawen, the town of Bow, and the town of Pembroke—endorsed the study bill in writing. These towns are committed to protecting what they accurately recognize as a "magnificent natural resource."

Mr. President, I share the local enthusiasm for study and protection of the Merrimack River. The Governor of New Hampshire, and local, regional and national environmental groups support this legislation. The National Park Service has included this 22-mile segment of the Merrimack on its national rivers inventory, which lists rivers that meet the minimum criteria for inclusion in the National Wild and Scenic Rivers System.

I urge my colleagues to join this effort to conserve a beautiful and unique New England river. I greatly appreciated the assistance provided to Senator RUDMAN and myself last year by Senator BUMPERS, chairman of the Energy Subcommittee on Public Lands, National Parks, and Forests, in

enacting a bill to designate the Wildcat River as New Hampshire's first wild and scenic river. I look forward to working with Senator BUMPERS and other colleagues on this important legislation.●

By Mr. KENNEDY (for himself, Mr. WIRTH, Mr. HATFIELD, Mr. HARKIN, Mr. CRANSTON, Mr. KERRY, and Mr. SANFORD):

S. 1047. A bill to encourage negotiations between the United States and the Soviet Union to establish mutual and verifiable restrictions on the production of plutonium and highly enriched uranium for nuclear weapons purposes; to the Committee on Foreign Relations.

INTERNATIONAL PLUTONIUM CONTROL ACT

● Mr. KENNEDY. Mr. President, today I am introducing, on behalf of myself and Senators WIRTH, HATFIELD, CRANSTON, HARKIN, SANFORD, and KERRY of Massachusetts, the International Plutonium Control Act.

This bill encourages negotiations for a verifiable cutoff in the production of plutonium and highly enriched uranium for weapons.

It also establishes a restriction on funding for United States resumption of plutonium production that is contingent on the President's ability to verify parallel Soviet restraint.

Mr. President, I ask unanimous consent that the text of his legislation be printed in the RECORD, along with my full statement and various explanatory materials.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1047

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "International Plutonium Control Act".

SEC. 2. FINDINGS AND DECLARATIONS OF POLICY.

The Congress finds and declares as follows:

(1) A mutual United States-Soviet ban on the production of plutonium and highly enriched uranium for weapons purposes would impose an additional constraint on a "break out" from arms limitation agreements by making it more difficult to accumulate an inventory of weapons-grade nuclear material, and thus would strengthen mutual confidence between the superpowers in the reliability of future nuclear arms reduction agreements.

(2) Such a ban would also provide evidence to non-nuclear weapon states of further progress in United States-Soviet compliance with Article VI of the Treaty on the Non-Proliferation of Nuclear Weapons, which calls for negotiations on cessation of the nuclear arms race at an early date.

(3) In view of the prospect of significantly reduced nuclear arsenals in the future and the availability of special nuclear material from dismantled weapons to meet future stockpile requirements, the United States and the Soviet Union should agree to forego further production of plutonium and highly enriched uranium for weapons purposes.

(4) A cutoff in the production of plutonium and highly enriched uranium for weapons purposes is an essential prerequisite for any long-term plan to verifiably dismantle and reduce permanently nuclear warhead stockpiles.

(5) Before the United States spends billions of dollars to ensure the future safe operation of facilities to produce plutonium and highly enriched uranium for weapons purposes, the United States and the Soviet Union should jointly explore the feasibility of—

(A) a mutual shutdown of plutonium production reactors, chemical separation facilities, and isotope separation plants dedicated to the production of plutonium for weapons purposes; and

(B) the safeguarded operation of uranium enrichment and chemical separation facilities for nonweapons purposes.

(6) National and cooperative technical means of verification, and safeguards against the diversion of weapon-grade nuclear materials from use in civilian nuclear facilities to use in the production of nuclear weapons, would detect attempts by the United States or the Soviet Union to produce or divert significant quantities of the current stockpiles of these materials.

(7) An agreement between the United States and the Soviet Union to terminate production of plutonium and highly enriched uranium for weapons purposes should be opened at the earliest possible date for signature by other nations possessing nuclear weapons.

SEC. 3. NEGOTIATIONS TO END PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR NUCLEAR WEAPONS.

The Congress urges the President to seek negotiations with the Soviet Union on a verifiable agreement for an end by both countries to the production of plutonium and highly enriched uranium for weapons purposes.

SEC. 4. VERIFICATION.

It is the sense of the Congress that the United States and the Soviet Union—

(1) should establish verification arrangements to monitor the cessation of activities called for by this Act, including mutual inspections as necessary—

(A) of the production reactors, chemical separation facilities, and isotope separation plants in each country that are dedicated to the production of plutonium for weapons purposes in order to verify, for purposes of section 6, that the Soviet Union and the United States have ceased such production; and

(B) of the production reactors, chemical separation facilities, uranium enrichment facilities, and isotope separation plants in each country in order to verify compliance with the agreement called for in section 3;

(2) should furnish the technical equipment and personnel to implement safeguards at civilian nuclear facilities in each country, and should consider eventually transferring the safeguards mission to the International Atomic Energy Agency; and

(3) should consider increasing their future respective contributions to the International Atomic Energy Agency to the level necessary to fund the assignment of additional fully trained staff inspectors to each country to assume additional safeguards responsibilities at civilian nuclear facilities in each country.

SEC. 5. EXCHANGES OF INFORMATION.

In furtherance of the purposes of this Act, the Congress urges the President to seek agreement with the Soviet Union that the United States and the Soviet Union will—

(1) exchange information on the location, mission, and maximum annual capacity of their facilities essential to the production of tritium for stockpile replenishment; and

(2) provide to each other a complete inventory of the facilities dedicated to the production of plutonium and highly enriched uranium for weapons purposes.

SEC. 6. PRODUCTION OF PLUTONIUM FOR NUCLEAR WEAPONS.

After the end of the 6-month period beginning on the date of enactment of this Act, funds may not be obligated or expended by the United States to operate a production reactor, chemical separation facility, or isotope separation plant dedicated to the production of plutonium for weapons purposes unless the President, after the end of that 6-month period, certifies to the Congress that—

(1) the Soviet Union has refused to enter in good faith into the negotiations called for by section 3; or

(2) the United States is unable to determine that Soviet production reactors, chemical separation facilities, or isotope separation plants dedicated to the production of plutonium for weapons purposes have ceased operation; or

(3) the Soviet Union is continuing to obtain plutonium by operating civilian chemical separation plants not under United States-Soviet safeguards.

SEC. 7. DEFINITIONS.

For the purposes of this Act—

(1) the term "chemical separation plant dedicated to the production of plutonium" means a facility that separates fission products from plutonium contained in reactor spent fuel and irradiated target assemblies;

(2) the term "production of plutonium and highly enriched uranium for weapons purposes" does not include—

(A) activities described in paragraph (3); or

(B) the operation of a uranium enrichment or chemical separation facility under mutually agreed safeguards to obtain—

(i) highly enriched uranium fuel for tritium production reactors and naval reactors; or

(ii) plutonium for civil purposes;

(3) the term "production of plutonium for weapons purposes" does not include activities conducted in connection with the recycling of special nuclear material from retired weapons and the recovery from scrap of the existing weapon-grade plutonium inventory; and

(4) the term "isotope separation plant dedicated to the production of plutonium for weapons purposes" does not include pilot-scale facilities utilized exclusively for the purpose of research and development.

STATEMENT OF SENATOR EDWARD M. KENNEDY ON THE INTERNATIONAL PLUTONIUM CONTROL ACT, MAY 18, 1989

Today we begin the process of terminating one of the most enduring legacies of the cold war—the production of plutonium and highly enriched uranium for nuclear weapons.

For more than four decades, the United States and the Soviet Union have contaminated their own communities in pursuit of vast stockpiles of nuclear explosive materi-

als to threaten the destruction of each other.

This buildup of nuclear explosive power has long exceeded the bounds of rationality. But the entrenched attitudes of the cold war obscured the common-sense interest of both countries in halting a production process which generates so much toxic and long-lived radioactive wastes.

The situation has changed today. As we finally face-up to the environmental damage wrought by the mutual paranoia of the past, both sides are also recognizing the need for smaller, survivable nuclear forces in the future that can be sustained at a fraction of the cost of today's arsenals. Future requirements for plutonium and highly-enriched uranium can easily be met from existing stockpiles of these materials.

In fact, this is aready the case with the supply of highly-enriched uranium for weapons. President Johnson ordered a halt to further production in 1964, and at the same time he ordered the shutdown of seven of our plutonium reactors. President Nixon continued the cutback by shutting down three more production reactors.

Over the last two decades, the U.S. nuclear weapons stockpile has shrunk by some 9,000 weapons, from some 32,000 weapons in 1967 to about 23,000 today. Were these actions unilateral? Yes, they were—in the 1960's the Soviets declined to respond to our overtures for a mutual production cutoff.

But did these actions constitute unilateral disarmament? Absolutely not. Building nuclear forces for deterrence is not the same as stockpiling ammunition for a war of attrition on the conventional battlefield. Stockpiling more nuclear bombs and warheads has long ceased to buy either side more deterrence against real world threats to its security. Instead, maintaining these oversized arsenals has become a mutually reinforcing, self-wounding ritual of cold-war symbolism, environmental contamination, economic injury, and pork-barrel politics.

Given the incentives for self-restraint arising from these harsh realities, why then are we suggesting the need for an explicit agreement limiting this aspect of the overall arms control problem? The answer is that it is easier for both nations to do the sensible thing if they agree to do it together.

A negotiated agreement to end production of plutonium and highly-enriched uranium for weapons offers a number of important benefits that are unlikely to be realized in the absence of an agreement:

A cutoff will impose an additional barrier against a Soviet "breakout" from a strategic arms reduction agreement. This benefit should have special appeal to those who have expressed skepticism about the staying power of General Secretary Gorbachev and his reforms.

A cutoff will lessen the need for building and maintaining expensive production plants on line as a "hedge" against a sudden surge in Soviet nuclear materials production. The savings from reduced construction, reduced operations, reduced waste generation, and fewer capital improvements can be devoted to cleaning-up the environment, providing a safe and secure capability for recycling existing nuclear material inventories, and meeting the stockpile maintenance requirement for tritium.

A cutoff will establish the technical basis for deep and verifiable reductions in the stockpiles of nuclear warheads themselves. This will enable the arms reduction process to move beyond the current framework, which relies on delivery systems as the basic unit of account for monitoring reductions in nuclear weapons. This aspect should have special appeal to conservatives who have long advocated "real reductions" in nuclear warheads as the proper goal of the arms control process.

A cutoff will also increase the prospect that non-nuclear weapons states will find the nuclear weapon powers in compliance with Article VI of the Nonproliferation Treaty. The renewal of that agreement comes up for consideration in 1995. Article VI calls for negotiations on cessation of the nuclear arms race at an early date, and many parties to the treaty are dissatisfied with U.S. and Soviet compliance with this provision.

The United States is not now operating any of its reactors for plutonium production. We are unlikely to be in a position to do so for several years, perhaps for as long as a decade or more. On the other hand, according to Secretary Watkins, in the wake of General Secretary Gorbachev's recent announcement of the shutdown of three production reactors, the Soviet Union continues to operate about 11 reactors, some of which are presumably producing plutonium.

The Department of Energy suggests that we respond to this asymmetry by refurbishing our chemical separation facilities, and by building a billion dollar laser isotope-separation plant in Idaho to covert fuel-grade plutonium for use in weapons. Admiral Watkins remarked yesterday that we should make these investments to "demonstrate the will of the nation" to respond to a potential Soviet "breakout" from an arms reduction treaty. A more direct and less costly way to contain this potential threat would be to eliminate the current Soviet advantage in plutonium production capability. The principal restriction imposed by the bill we are introducing today will require the shutdown of all the Soviet Union's plutonium production reactors. U.S. national security could benefit once again from the larger Soviet reductions required by such a "zero option" for plutonium production.

Our legislation will also prohibit future operation of isotope separation plants dedicated to the production of plutonium for weapons. Since a military need has yet to be identified for the weapons-grade plutonium from this type of facility, restricting the potential feedstock for this plant to civilian use is a very small price to pay for making the giant step forward we are proposing today.

The cutoff is a U.S. initiative which has a long history in the annals of arms control, dating back to the Eisenhower administration. For most of the 1980's, independent American scientists have been urging their Soviet counterparts to look again at the idea of ending production of plutonium and highly-enriched uranium for weapons. Last month in London, General Secretary Gorbachev responded in a manner which indicates Soviet willingness to proceed toward such a cutoff. The agreement urged in this legislation will take the arms control process to new levels of cooperation and mutual inspection, opening up the Soviet Union's nuclear-industrial complex as never before.

The cold war confrontation will not wither away by itself, or crumble in the wake of the General Secretary's succession of unilateral steps. Both sides need to take initiatives which demonstrate a willingness to let go of the legacy of nuclear confrontation, so that we can proceed together to fashion a new era of cooperative diplomacy and peace.

INTERNATIONAL PLUTONIUM CONTROL ACT—SUMMARY OF KEY PROVISIONS

PLUTONIUM

Effective six months after enactment, the President must certify to Congress that at least one of the following conditions applies before obligating or expanding funds to operate a production reactor, chemical separation plant, or isotope separation plant to obtain more plutonium for use in weapons [Sec. 6]:

the Soviet Union has refused to negotiate in good faith with the United States on a verifiable agreement ending production of plutonium and highly-enriched uranium for weapons;

the United States is unable to determine that Soviet production reactors, chemical separation facilities, or isotope separation plants dedicated to the production of plutonium for weapons purposes have ceased operation;

the Soviet Union is continuing to obtain plutonium by operating a civilian chemical separation plant that is not under mutually agreed safeguards.

HIGHLY-ENRICHED URANIUM

While both sides have declared that they are not producing highly-enriched uranium for weapons today, the continued operation of a uranium enrichment or chemical separation plant to obtain this material for weapons would not be formally constrained unless and until both sides negotiate and implement an agreement, called for in the Act, requiring installation of safeguards against diversion of nuclear material from these dual-use facilities [Section 2, Finding #5; Sec. 3; Sec. 4(1) par. B].

VERIFICATION

The Act urges the President to seek agreement with the Soviet Union on an exchange of data concerning the complete inventory of facilities in each country dedicated to the production of nuclear weapons materials, including the location, mission, and maximum annual capacity of their respective facilities essential to the production of tritium for stockpile replenishment.

The Act calls for "mutual inspections as necessary" to supplement national technical means in monitoring the shutdown of facilities dedicated to the production of plutonium for weapons. The Act urges both sides to furnish the technical equipment and personnel to implement safeguards at civilian nuclear facilities in each country, while considering increased resources for the International Atomic Energy Agency and the eventual transfer of the civilian safeguards mission to this international body [Sec. 4 and Sec. 5].

EXCLUDED ACTIVITIES

These activities are not limited by the Act: (1) recycling of nuclear material from retired weapons; (2) recovery from scrap of the existing weapon-grade plutonium inventory; (3) production of tritium, when conducted in declared facilities; (4) operation of a uranium enrichment or chemical separation facility to obtain highly enriched uranium fuel for tritium production or naval reactors; (5) funding for research, development, design, or construction of nuclear materials production facilities.

STATEMENT OF DAVID ALBRIGHT OF THE FEDERATION OF AMERICAN SCIENTISTS ON THE INTERNATIONAL PLUTONIUM CONTROL ACT, MAY 18, 1989

The International Plutonium Control Act enjoys the support of 23 leading national environmental, religious, and arms control organizations, as well as local and regional citizens' groups near Department of Energy weapons production sites throughout the country. These groups represent a broad range of interests whose divergent concerns can all unite on this one issue—permanently stopping the production of plutonium for weapons.

The organizations who have endorsed this legislation include: Committee for National Security, Council for a Liveable World, Energy Research Foundation, Environmental Action, Environmental Policy Institute, Federation of American Scientists, Friends Committee on National Legislation, Friends of the Earth, Greenpeace, Hanford Education Action League, Methodists United for Peace with Justice, Natural Resources Defense Council, Nuclear Control Institute, Physicians for Social Responsibility, Professionals' Coalition for Nuclear Arms Control, Public Citizens, SANE/FREEZE: Campaign for Global Security, Snake River Alliance, Union of Concerned Scientists, United Church of Christ-Office for Church in Society, Women Strike for Peace, Women's Action for Nuclear Disarmament, and Women's International League for Peace and Freedom.

Many of these groups are active participants in the Plutonium Challenge coalition. This coalition was started in late 1987 when eight leading scientific groups and citizens' organizations, in conjunction with distinguished nuclear arms analysts and nuclear scientists, issued a challenge to the Soviet Union and the United States to stop producing plutonium and highly enriched uranium for nuclear weapons. Since its inception, the Plutonium Challenge has grown dramatically and now works on all the major issues related to the current crisis in the Department of Energy's weapons production complex.

We believe that the International Plutonium Control Act is an appropriate response to General Secretary Gorbachev's recent announcement to cease the production of highly enriched uranium for nuclear weapons and to shut down two of more than ten Soviet plutonium production reactors in "yet another step towards the complete cessation" of the production of plutonium and highly enriched uranium for weapons. The current administration is unwilling to seize the initiative on this issue, as with so many others. It is therefore up to Congress to fill the void between opportunity and action.

The United States has stopped producing plutonium in reactors for weapons, primarily as the results of safety problems in its military production facilities. Since 1964, the United States has not produced any highly enriched uranium for weapons. The International Plutonium Control Act represents an opportunity to convert this U.S. halt in the production of these materials into a permanent, verifiable, bilateral ban that would end Soviet plutonium production for weapons as well.

The United States sacrifices little and has much to gain by negotiating a bilateral ban. The United States is unlikely to produce new plutonium or highly enriched uranium for weapons for several years. In any case, we already have more than enough plutonium and highly enriched uranium to maintain our weapons aresenal for the foreseeable future.

A permanent, bilateral cutoff would create many decisive national security, environmental, and economic benefits for the United States. It would reduce the amount of nuclear waste that would be produced, save billions of dollars in construction funding that could better be used for cleaning up the environmental mess at the production sites, strengthen international barriers to the spread of nuclear weapons, and create a verifiable basis for significant arms reductions.

The United States should not waste the present opportunity that now exists to halt permanently the production of plutonium and highly enriched uranium for weapons. We plan to work vigorously to pass the International Plutonium Control Act and thereby close off a dimension of nuclear arms race that has been so destructive to our own country as well as to the Soviet Union.

VERIFICATION OF A HALT IN SOVIET PLUTONIUM PRODUCTION AS REQUIRED UNDER THE INTERNATIONAL PLUTONIUM CONTROL ACT

(By David Albright, Federation of American Scientists)

The International Plutonium Control Act would require the President to make a determination six months after the legislation's enactment that Soviet production reactors, chemical separation or "reprocessing" facilities, and isotope separation plants dedicated to the production of plutonium for weapons purposes have ceased operation. This determination rests fundamentally on the long-standing ability of the United States to monitor Soviet production activities by national technical means.

DETERMINING THAT REACTORS AND ASSOCIATED CHEMICAL SEPARATION FACILITIES ARE SHUTDOWN

This determination can be based on the ability of the U.S. intelligence agencies to monitor from outer space that Soviet military reactors and chemical separation facilities dedicated to plutonium production are shutdown. The locations of these facilities are well known, and the United States regularly monitors them using national technical means.

To increase confidence that chemical separation facilities remain closed after the initial determination, each side could apply tamperproof seals at entrances into critical parts of the facilities or tamperproof meshes could be placed around key components in the plants. The seals and meshes would then be checked periodically during on-site inspections. In addition, tamperproof cameras could be installed in critical areas of the plant to monitor activities.

In the case of reactors, tamperproof metal tapes, which would become irradiated if the reactor was operated, could be threaded through a shutdown reactor and the ends fixed by specially developed seals in order to verify that a reactor remained shutdown between inspection visits. In 1966 the United States demonstrated such a technique to the representatives of 50 nations and several international institutions in a shutdown plutonium production reactor at Hanford, Washington. The demonstration involved a "fingerprinted" bimetallic tape which contained a small amount of cobalt that would become radioactive if the reactor were operated, even at very low powers.

These techniques could be applied quickly at closed facilities. In conjunction with monitoring by satellites, these techniques would be more than adequate to ensure that the facilities remained closed.

VERIFICATION AGAINST THE SECRET PRODUCTION OF PLUTONIUM IN A REACTOR DECLARED TO PRODUCE TRITIUM

The International Plutonium Control Act would require both the United States and the Soviet Union to designate to the other the location and power of reactors dedicated to the production of tritium. Without significant reductions in nuclear arsenals, both countries can be expected to continue producing tritium in order to maintain their nuclear weapons. Since a tritium production reactor can also produce plutonium, the designated tritium production reactors would have to be monitored to ensure that any plutonium produced in such a reactor is not diverted to weapons uses.

The legislation incorporates several layers of defense against secret plutonium production in military reactors dedicated to tritium production. The first relies on the requirement that both sides' chemical separation plants able to separate plutonium would be closed or under adequate bilateral safeguards. Therefore, even if plutonium were secretly produced in a tritium-production reactor, the plutonium would have to be extracted in secret, requiring the construction and operation of a secret chemical separation plant. In addition, since each side must declare its tritium production reactors, the amount of plutonium that could be produced in secret depends on the amount of excess reactor capacity above that needed for tritium production. Since each country has estimates of the other's tritium requirements, however, both countries would be inhibited from overstating their reactor requirements for tritium, and thus their capability for secret plutonium production, out of fear of being caught.

The frequency with which a reactor is reloaded could provide another indication of whether it is producing tritium or plutonium. In the United States, tritium is produced in a production reactor by irradiating lithium "targets." The reactor is typically operated for several months before the targets are unloaded. In contrast, a reactor dedicated to plutonium production operates for only about a month before the plutonium-bearing fuel rods or targets are unloaded. Therefore, frequent reactor shutdowns could be an indication of secret plutonium production and warrant further investigation.

In the long term, each side might want on-site inspection of the tritium production reactors to obtain greater assurance against illicit plutonium production. Each side could be granted the right to monitor the loading and unloading of a production reactor both visually and with passive radiation detectors to assure that the lithium targets are not in fact disguised uranium targets used for plutonium production. Camera surveillance of the reactor loading area would also add confidence that the reactors were not being used to secretly produce plutonium.

Implementing a portion of these procedures, such as camera surveillance or short notice challenge inspections of the loading or unloading of a reactor, could be accomplished quickly, and could significantly increase each side's confidence that only tritium was being produced. Later, as time permits, additional procedures could be applied, if necessary.

Even in the absence of on-site inspections at tritium production reactors, the amount

of plutonium that could be produced in secret between the time that the President makes the initial six month determination and the implementation of a final negotiated agreement would not be militarily significant. Since the plutonium would also have to be separated secretly from the targets or fuel rods, and the discovery of this activity would immediately end any prospects of achieving a cutoff agreement, the Soviet Union is unlikely to be willing to take this risk.

BILATERAL INSPECTIONS OF CIVILIAN CHEMICAL SEPARATION FACILITIES

The International Plutonium Control Act allows civilian plutonium chemical separation facilities to operate if they are under bilateral inspections. The IAEA has conducted such inspections at several civilian plutonium separation facilities in Europe and Japan, and these procedures could be applied by the United States and the Soviet Union at any civilian plutonium separation facilities that exist in either country.

Since plutonium separation facilities are often large and can involve large amounts of plutonium in liquid, solid, and powder form, the implementation of bilateral inspections might take longer than six months. As a result, until such bilateral safeguards are implemented, this legislation would require that such plants remain shutdown.

VERIFYING A U.S.-U.S.S.R. HALT TO THE PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR WEAPONS

The International Plutonium Control Act calls for a verifiable US-USSR halt to the production of plutonium and highly enriched uranium ("fissile materials") for weapons. By combining national technical means of verification with cooperative on-site inspections, such a bilateral halt can be effectively verified with a two-tiered verification regime:

I. VERIFICATION OF COMPLIANCE AT DECLARED NUCLEAR FACILITIES

Even if the United States and the Soviet Union agree to stop producing plutonium and highly enriched uranium for nuclear weapons, both countries would continue their civilian nuclear research and power programs. Therefore, one task in verifying a fissile material cutoff agreement would be to prevent the diversion of fissile materials to nuclear weapons purposes. With current safeguard provisions, total annual diversions of fissile material from the civilian facilities in each country can be detected before militarily significant quantities of materials are accumulated. Eventually, the International Atomic Energy Agency (IAEA) could take over responsibility for such inspections.

Similar bilateral monitoring procedures could verify against both the secret production of plutonium in declared tritium production reactors and the diversion of highly enriched uranium from naval reactors to nuclear weapons uses. The exhaustive verification regime established in the Intermediate-Range Nuclear Force (INF) Treaty is an important precedent for the verification of a bilateral fissile material cutoff.

II. DETECTION OF SECRET FISSILE MATERIAL PRODUCTION OPERATIONS

Verification procedures must also guard against the construction and operation of clandestine production facilities. Therefore, in addition to on-site monitoring at declared facilities, each country would use national technical means of verification to detect the production of militarily significant amounts of plutonium and highly enriched uranium in secret production plants.

With extensive civilian and military satellite surveillance and other means of information gathering, the enormous effort required to construct and operate a significant fissile material production facility could not be undertaken clandestinely for long. If secret facilities were not discovered during the construction phase, they would be exposed during operation.

VERIFYING A HALT TO THE PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR WEAPONS

The International Plutonium Control Act calls for a bilateral U.S.-U.S.S.R. halt to the production of plutonium and highly enriched uranium ("fissile materials") for weapons. Such an agreement can be effectively verified with existing technology, using a two-tiered verification regime:

(1) Since nuclear facilities would continue to operate in both countries, generating civilian power and supporting military nuclear activities not prohibited by an agreement (such as naval reactors), these activities would be monitored to ensure that nuclear material is not diverted from permitted uses to the construction of nuclear weapons;

(2) Beyond site monitoring at declared facilities, each side would use national technical means of verification to detect the production of significant amounts of plutonium and highly enriched uranium in covert facilities.

I. VERIFICATION OF TREATY COMPLIANCE AT DECLARED NUCLEAR FACILITIES

Even if the United States and the Soviet Union agreed to stop producing plutonium and highly enriched uranium for nuclear weapons, both countries would continue their civilian nuclear research and power programs. Some of the facilities, such as uranium enrichment and plutonium chemical separation ("reprocessing") plants, produce fissile materials that could be used in nuclear weapons. Therefore, one task in verifying a fissile material cutoff agreement would be to prevent the diversion of fissile materials from such facilities.

The International Plutonium Control Act states that the United States and the Soviet Union should establish bilateral verification procedures for civilian nuclear facilities. These bilateral inspections would utilize techniques and methods developed by both countries and the International Atomic Energy Agency (IAEA).

The IAEA has an established system of surveillance, seals, and on-site inspection (collectively known as "safeguards") in nuclear facilities in over 50 non-nuclear weapon states in order to verify that these countries are not using these facilities for the acquisition of nuclear explosives. These safeguards have been systematically developed during the last thirty years.

This legislation suggests that eventually the IAEA could be made responsible for the necessary verification inspections at civilian nuclear facilities. When the United States proposed a bilateral cutoff in 1969, it said that the IAEA could be responsible for on-site inspections at civilian nuclear facilities. (From 1956 to 1969 the United States repeatedly proposed a bilateral cutoff, but the Soviet Union was disinterested, probably because Soviet stockpiles were much smaller than those of the United States.)

Hans Blix, Director-General of the IAEA, said in 1983: "We now have the experience, and are increasing our experience, in safeguarding reprocessing plants and enrichment plants, which are the installations that produce weapons-grade materials. So if one day the great powers wish to ask themselves, could we have a cutoff of fissionable material for weapons purposes, the techniques are there to monitor it." (Washington Post, May 20, 1983).

The United States and the Soviet Union, in an attempt to reduce the discriminatory character of the Non-Proliferation Treaty, have already put a handful of their own nuclear facilities under direct IAEA-inspections. The United States permits the IAEA to inspect any of its more than 200 civilian nuclear facilities. The Soviet Union has also made available many of its civilian facilities to agency inspection, including its largest breeder reactor, the BN-600 at Byeloyarsk and a spent fuel interim storage facility at Novororonezh.

With current safeguard provisions, total annual diversions of fissile material from the civilian facilities in each country can be detected before militarily significant quantities of materials are accumulated. With advanced safeguards procedures for enrichment and chemical separation facilities that are under development, even smaller diversions can be detected.

Similar monitoring procedures could be applied bilaterally to ensure that highly-enriched uranium used in naval nuclear reactors was returned to the safeguarded program's custody and that tritium production reactors do not generate plutonium.

II. DETECTION OF SECRET FISSILE MATERIAL PRODUCTION OPERATIONS

On-site safeguard provisions could, of course, only guarantee that acknowledged nuclear facilities were not producing fissile materials for nuclear weapons. They would not address the problem of covert production facilities.

Today, however—with extensive civilian and military satellite surveillance, communication interception, and other means of gathering intelligence—the enormous effort required to construct and operate a significant plutonium or highly enriched uranium production facility could not be undertaken clandestinely for long. If secret facilities were not discovered during the construction phase, they would be exposed during operation.

Surveillance satellites, for example, can detect heat emanations that reveal the operation of plutonium production reactors. An unidentified, isolated heat source of the magnitude characteristic of a plutonium reactor would send a clear signal for further investigation. Any attempt to conceal the heat source by locating it near another large industrial facility or city would increase the chances of more people becoming aware of the facility's purpose and therefore raise the probability of a "leak."

A number of smaller and thus more easily concealed secret plutonium production reactors could be built; however, the advantage associated with their smaller size would be at least partially offset by the larger number which would be subject to detection. The discovery of one facility could "blow the cover" on the entire network. If fewer facilities were built, they would have to operate for a longer period of time to produce the desired amount of plutonium, significantly increasing the risk of detection.

An indication of the effectiveness of national technical means in monitoring small, clandestine reactors was revealed in an April 3, 1989 article in the trade publication Nuclear Fuel. It reported U.S. satellite surveillance of a small reactor in North Korea that

has been operating for over a year without safeguards, even though North Korea signed the Non-Proliferation Treaty in 1985. This reactor is estimated to be capable of producing about 10 kilograms of plutonium a year, enough for about two nuclear weapons. Although this amount of plutonium in the possession of North Korea would be very dangerous, it represents only about 0.01 percent of the amount of plutonium in either the U.S. or Soviet plutonium stockpile, and is therefore totally insignificant in the context of a U.S.-Soviet cutoff. Nuclear Fuel also reported that Military satellites were able to detect a small facility under construction nearby that looked suspiciously like a small plutonium separation facility.

Sustaining a clandestine effort to produce significant quantities of highly enriched uranium would involve large facilities, involving hundreds or thousands of people, and the movement of large quantities of uranium. For example, the production of about 2,500 kilograms of weapon-grade uranium per year—about 0.5 percent of the estimated U.S. inventory of weapon-grade uranium for weapons—would require a plant with a capacity of 500,000 separative work units (SWUS) a year. A British gaseous diffusion plant at Capenhurst with a similar capacity was about 0.5 kilometers long (one third of a mile) and required several large cooling towers to dissipate the residual heat. A plant this size would consume an average of almost 150,000 kilowatts of electric power, about as much as the electricity demand of an average U.S. city of 150,000 people.

Although gas centrifuge enrichment plants are smaller, more energy efficient, and therefore less conspicuous than diffusion enrichment plants, they would still be vulnerable to detection by national technical means. The construction of a 500,000 SWU plant would require the manufacture and installation of very large numbers of highly sophisticated centrifuges. Its operation would require the electricity demand of a U.S. city of roughly 10,000 people. In addition, the secret construction and operation of such a plant or other secret facilities would have to be accomplished against an industrial background that the other side has closely monitored since the early 1960s.

II. CONCLUSION

The exhaustive verification regime established in the Intermediate-Range Nuclear Force Treaty is an important precedent for the verification arrangements for a bilateral fissile material cutoff. By combining national technical means of verification with cooperative on-site inspections, a bilateral halt to the production of fissile material can be effectively verified.

Considering the huge size of each country's arsenals, any cheating on the margins by one side could not give it a military advantage over the other. What is more, when detected, the political price to pay for evasion would be prohibitive.

U.S. SENATE,
Washington, DC, April 3, 1989.

DEAR COLLEAGUE: We are writing to invite you to join us as an original sponsor of legislation that would create the opportunity for a mutual and verifiable halt to the production of additional plutonium and highly-enriched uranium for nuclear weapons.

If the United States and the Soviet Union are serious about reducing their vast stockpiles of nuclear weapons, then sooner or later the governments of both nations must come to grips with this longstanding proposal for a so-called "fissile material cutoff." The course of recent events suggests that such a "fissile material cutoff" is a reasonable near-term prospect that could facilitate solutions to a number of arms control, budgetary, and environmental problems.

As a result of a deteriorating production complex and a pressing need for tritium to replenish the existing stockpile, the Department of Energy is already planning to engage in what amounts to a unilateral halt in plutonium production over the next several years. Why not convert this De Facto U.S. Unilateral Moratorium into a Bilateral Verifiable Arms Control Regime that would halt Soviet plutonium production as well?

The production reactors and large-scale chemical separation plants needed to produce significant quantities of additional plutonium for weapons are routinely monitored by National Technical Means of verification, easing the verification of an immediate moratorium on plutonium production.

After negotiating the installation of safeguards against diversion of materials from operating non-weapons facilities—such as uranium enrichment plants—such a production halt could be extended to end the production or chemical separation of highly-enriched uranium for weapons purposes.

During last year's testimony and debate on the INF Treaty, commentators from all parts of the political spectrum mistakenly justified its lack of procedures to verify destruction of nuclear warheads on the grounds that no means exist to prevent the Soviet Union from making new warhead materials.

In fact, in 1982 the Soviet Union finally expressed its willingness to enter into an agreement—proposed by the United States from 1957 to 1970—to end the production of additional fissile material for nuclear weapons. The Reagan Administration ignored this important development, and instead turned its attention to squeezing the maximum output from our aging nuclear materials production facilities while deferring critical investments in safety and environmental restoration.

A fissile cutoff agreement now could create a verifiable basis for the permanent dismantlement of nuclear warhead stockpiles and save both nations billions of dollars in construction and operating costs for plutonium and highly-enriched uranium production facilities.

The attached bill establishes mutual and verifiable restrictions on the use of nuclear materials production reactors and chemical separation plants to produce plutonium for nuclear explosive purposes, and provides for the application of safeguards to other nuclear facilities of the U.S. and USSR that can be used for both military and civilian purposes.

Before operating a Savannah River reactor, chemical separation plant, or isotope separation plant to obtain more plutonium for weapons, the President would be required to certify that the Soviet Union has refused to negotiated with the U.S. on a verifiable agreement ending production of plutonium and highly enriched uranium for weapons.

The restriction on military plutonium production would also lapse if the President certifies that the United States is unable to determine that similar facilities in the USSR have also ceased operation, or if the USSR continues to operate civilian chemicals separation plants without appropriate international safeguards.

The bill explicitly provides that none of its provisions shall be construed to interfere with the continued operation of facilities to obtain tritium for stockpile maintenance, highly enriched uranium for naval reactor fuel, and plutonium recovered from retired weapons and scrap.

The concept of a mutual moratorium on plutonium production—the "Plutonium Challenge"—is supported by a broad coalition of national arms control and environmental groups, and it has received the endorsement of former arms negotiators, nuclear proliferation experts, knowledgeable scientists, public health officials, and environmental specialists.

This legislation will expand the horizons of the arms control debate beyond the regulation and reduction of certain types of neclear delivery systems. It will also highlight an attractive arms control dividend which could lessen the financial burdens involved in present plans to modernize the nuclear materials production complex.

Finally, the fissile cutoff represents a major and long-deferred step toward equalizing the rights and obligations of nuclear-weapon versus non-weapon states which are party to the Nonproliferation Treaty. Full-scale participation in the safeguards system of the International Atomic Energy Agency by the United States and the Soviet Union would vastly expand and strengthen the IAEA's capabilities to guard against nuclear weapons proliferation. It would also increase political pressure on nuclear weapon "threshold-states"—such as India and Pakistan—to place all their nuclear facilities under safeguards.

We hope you will join us as original sponsors of this important legislation. If you have any questions, or would like to be a sponsor, please contact Christopher Paine, 4-5109 or Kevin Knobloch at 4-5852.

Sincerely,

EDWARD M. KENNEDY.
TIMOTHY E. WIRTH.●

● Mr. WIRTH. Mr. President, today Senator KENNEDY and I, along with Senators HATFIELD, HARKIN, CRANSTON, KERRY, and SANFORD, are introducing the International Plutonium Control Act. A companion bill is being introduced in the House of Representatives by the distinguished chairman of the Foreign Affairs Committee, Representative DANTE FASCELL, and his colleague from Oregon, Representative RON WYDEN.

This bill would require the President to certify to Congress that the Soviet Union had refused to negotiate with the United States on a verifiable ban on fissile weapons materials before restarting any of the Savannah River reactors for plutonium production or operating a chemical or isotope separation plant. The restriction on military plutonium production would also lapse in the President certifies that the United States is unable to determine that similar facilities in the Soviet Union have ceased operation, or if the Soviets continue to operate civilian chemical separation plants without appropriate safeguards. Nothing in this legislation would prohibit tritium production, the production of highly enriched uranium for naval reactors, or

the use of plutonium recovered from scrap and retired weapons.

Mr. President, this measure is in fact a modest proposal. The United States has not produced any weapons-grade uranium since 1964, and currently has a stockpile of approximately 500 metric tons. This stockpile will likely increase further with the possible withdrawal from service of the W-33 nuclear artillery shells, currently being considered by NATO and SHAPE. We are currently awash in plutonium with a stockpile of roughly 100 metric tons, compared with an estimated Soviet stockpile of about 115 metric tons. Yet, we are now contemplating building new production capacity for uranium and plutonium for the sole purpose of creating an even larger surplus of these missile materials.

We do not need larger stockpiles nor can we afford them. The intent of this legislation is to make a budgetary and arms control virtue of the necessity created by the current safety-related shutdown of our three nuclear materials production reactors. By encouraging negotiated and verifiable restrictions on the production of plutonium and enriched uranium for nuclear weapons purposes, this bill can help promote strategic nuclear arms control efforts, reduce Federal expenditures for the construction and operation of new production facilities, and assure that cleanup efforts at nuclear complexes will get adequate attention and resources.

The U.S. Government has not produced any new materials for nuclear weapons for over 1 year due to serious safety concerns at Savannah River. The Department of Energy has plans to restart these reactors and to construct two new reactors and a plutonium purification facility in order to assure into the 21st century our ability to produce weapons-grade uranium, plutonium, and tritium. These efforts will be time-consuming and very expensive. DOE estimates in its recent "2010" study that we will have to spend $52 billion to modernize and consolidate nuclear production facilities and another $29 billion to clean up the currently known environmental and health hazards at production facilities. Other studies suggest that the DOE will require as much as $100 billion to clean up health and environment hazards at DOE facilities over a 40-year period.

The DOE estimates represent the most sanguine view of the costs of modernization and cleanup. With the intense pressure on the Federal budget likely to increase in the coming years, I am extremely concerned that we are not being realistic about what we can afford to do in the nuclear weapons production complex area. I am further concerned that if push comes to shove, cleanup efforts will fall victim to modernization.

The safety crisis with our production reactors is mirrored in the Soviet Union, Mr. President. According to a study released by Los Alamos National Laboratory last June, "Soviet military production reactors are old, obsolete and unsafe. They will be shut down soon." In the aftermath of the Chernobyl disaster, there is an increased awareness of and sensitivity to the dangers posed by nuclear reactors. This was no doubt reflected in Soviet President Gorbachev's announcement on April 7 that the Soviet Union would cease uranium production this year and shut down two plutonium reactors by the end of next year.

This legislation would challenge Mr. Gorbachev to go even further than his unilateral gesture last month through negotiations on a verifiable agreement banning all production of all plutonium and highly enriched uranium for nuclear weapons. Converting our current de facto unilateral moratorium into a bilateral, verifiable arms control regime would halt all Soviet plutonium and uranium production. Not only will we stand to save significant sums of money if we can reach a negotiated fissile material ban, but we also will contribute importantly to strategic nuclear arms control efforts.

Next month in Geneva, the United States and the Soviet Union will resume negotiations on Strategic Arms Reduction Talks [START]. While many obstacles to agreement remain, it is nonetheless clear that both sides are now discussing the possibility of deep reductions in their respective strategic nuclear arsenals. A negotiated ban on fissile material production would contribute enormously to the verification requirements of such a treaty. To provide confidence that withdrawn nuclear warheads would not be replaced at a later date, through overt breakout or clandestine deployment, with newly produced supplies, a verifiable regime restricting the production of fissile materials would be needed. This legislation urges the administration to begin that dialog with the Soviet Union now.

A negotiated ban on fissile material production will require intrusive monitoring provisions to assure compliance. Application of the International Atomic Energy Agency safeguards, satellite monitoring, and onsite inspection, I am convinced that we will be able to establish a fissile materials ban verification regime which would prevent any militarily significant cheating from going unnoticed. If we can contemplate the verification of a chemical weapons ban or a 23-nation conventional arms cut from the Atlantic to the Urals, we certainly can establish an effective verification regime for a fissile materials ban.

This legislation will also lend concrete meaning to article 6 of the Nonproliferation Treaty in which nuclear weapons states' efforts to reduce their dependence on nuclear weapons is tied to the nonproliferation goals outlined in the treaty. A fissile material cutoff would strengthen the nonproliferation regime, and influence other nuclear weapons states, such as China, France, and the United Kingdom, to consider a comparable ban.

Mr. President, I would like to close by noting the enormous contribution made to this debate by a coalition of arms control and environmental groups which have pursued the "plutonium challenge"—including the Council for a Livable World, Friends of the Earth, Physicians for Social Responsibility, Union of Concerned Scientists, Natural Resources Defense Council, Federation of American Scientists, and the Environmental Policy Institute.

Mr. President, I ask that a summary of the provisions of the International Plutonium Control Act appear following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

"INTERNATIONAL PLUTONIUM CONTROL ACT"—SUMMARY OF KEY PROVISIONS

Plutonium: Effective six months after enactment, the President must certify to Congress that at least one of the following conditions applies before obligating or expending funds to operate a production reactor, chemical separation plant, or isotope separation plant to obtain more plutonium for use in weapons [Sec. 6]: the Soviet Union has refused to negotiate in good faith with the United States on a verifiable agreement ending production of plutonium and highly-enriched uranium for weapons; the United States is unable to determine that Soviet production reactors, chemical separation facilities, or isotope separation plants dedicated to the production of plutonium for weapons purposes have ceased operation; the Soviet Union is continuing to obtain plutonium by operating a civilian chemical separation plant that is not under mutually agreed safeguards.

Highly-enriched uranium: While both sides have declared that they are not producing highly-enriched uranium for weapons today, the continued operation of a uranium enrichment or chemical separation plant to obtain this material for weapons would not be formally constrained unless and until both sides negotiate and implement an agreement, called for in the Act, requiring installation of safeguards against diversion of nuclear material from these dual-use facilities [Section 2, Finding #5; Sec. 3; Sec. 4(1) para. B].

Verification: The Act urges the President to seek agreement with the Soviet Union on an exchange of data concerning the complete inventory of facilities in each country dedicated to the production of nuclear weapons materials, including the location, mission, and maximum annual capacity of their respective facilities essential to the production of tritium for stockpile replenishment.

The Act calls for "mutual inspections as necessary" to supplement national technical means in monitoring the shutdown of facilities dedicated to the production of plutoni-

um for weapons. The Act urges both sides to furnish the technical equipment and personnel to implement safeguards at civilian nuclear facilities in each country, while considering increased resources for the International Atomic Energy Agency and the eventual transfer of the civilian safeguards mission to this international body [Sec. 4 and Sec. 5].

Excluded activities: These activities are not limited by the Act: (1) recycling of nuclear material from retired weapons; (2) recovery from scrap of the existing weapon-grade plutonium inventory; (3) production of tritium, when conducted in declared facilities; (4) operation of a uranium enrichment or chemical separation facility to obtain highly enriched uranium fuel for tritium production or naval reactors; (5) funding for research, development, design or construction of nuclear materials production facilities.

PLUTONIUM CONTROL ACT

As a consequence of the current surplus of plutonium and aged nuclear weapons production facilities, the United States has discontinued production of plutonium for nuclear weapons—a halt that will last several years. Why not convert this temporary halt in U.S. plutonium production into a permanent, verifiable arms control regime that would end Soviet plutonium production for weapons as well?

The specific objectives of the "The Plutonium Control Act" are to:

Establish a verifiable ban on the production of additional plutonium for weapons in both the United States and the Soviet Union;

Encourage negotiations for a bilateral, verifiable agreement to halt permanently the production of additional plutonium and highly enriched uranium ("fissile materials") for military explosive purposes.

The legislation would accomplish these goals by withholding funds for plutonium production unless the President certifies that the Soviet Union is continuing to produce plutonium for weapons. Funding for plutonium production would also be released if the Soviet Union refused to negotiate with the United States on a permanent, verifiable halt to the production of plutonium a highly enriched uranium for weapons.

This legislation does not restrict the operation of a uranium enrichment or reprocessing plant under mutually agreed safeguards to produce highly enriched uranium fuel for tritium production or naval reactors; the recycling of fissile material from manufacturing scrap or retired weapons; and the operation of facilities to produce tritium if, within 90 days of the date of enactment, both sides have designated to the other those facilities which will be used for tritium production.

REASONS FOR THE PLUTONIUM CONTROL ACT

Congress should adopt this legislation in 1989 because:

1. The United States has halted the production of plutonium for weapons, in effect initiating a unilateral moratorium that will continue for the next several years. This legislation aims to convert this unilateral action into a verifiable bilateral arms control regime that would halt Soviet plutonium and highly enriched uranium production for weapons as well.

2. The U.S. has no immediate need for the production of more plutonium for weapons. It will take 24,000 years for just half of our present stock of roughly 100,000 kgs of weapon-grade plutonium to decay. This amount is more than enough to support our present arsenal for many years, if not decades. The successful negotiation of the START treaty would greatly expand our existing plutonium surplus.

3. The U.S. has not produced highly enriched uranium for weapons in more than two decades and still does not need to. President Johnson banned highly enriched uranium production in 1964, citing an overabundance of the material. Because today's arsenal is much smaller than it was 20 years ago, we have adequate supplies of highly enriched uranium. By negotiating a ban, the U.S. would sacrifice nothing while gaining assurance that the Soviet Union would also not produce highly enriched uranium for weapons.

4. A fissile material cutoff would save tens of billions of dollars in construction and operating costs for production facilities. The funds saved could be used instead to clean up the extensive contamination at production sites.

5. A halt to the production of plutonium and highly enriched uranium would create a verifiable basis for the permanent dismantlement of nuclear warheads. Future agreements, in order to prevent clandestine deployment or overt breakout, should provide for the dismantlement of the warheads themselves and prohibit the recycling of a significant fraction of the fissile material from these warheads into new weapons. Fissile material production would have to be halted in order to provide confidence that the withdrawn materials were not replaced at a later date with newly produced supplies.

6. There is a precedent for a fissile materials cutoff agreement. From 1957 to 1970 the U.S. pursued an agreement with the Soviet Union to halt the production of fissile materials. The Soviet Union declined, in part because they were behind in production. Recently, the Soviet Union has expressed a strong interest in achieving such a agreement.

7. A fissile material cutoff agreement can be adequately verified. Through a combination of national and cooperative technical means aimed at detecting clandestine production, and International Atomic Energy Agency inspections of civilian nuclear facilities, covert production could be detected well before it reached militarily significant levels.

8. A cutoff would strengthen international barriers to the spread of nuclear weapons. By extending safeguards to all the civilian facilities in the weapons states, a fissile material cutoff would reduce the discriminatory character of the Non-Proliferation Treaty. It would also increase political pressure on nuclear weapons "threshold" states, such as India and Pakistan, to place all their nuclear facilities under international inspection.

9. A superpower cutoff could influence other nuclear weapons states—like China, France and the U.K.—to consider a comparable shutdown.

For more information about this legislation, please contact David Albright at the Federation of American Scientists (547-2363). Updated April 12, 1989.

[From the Journal of the Federation of American Scientists, Dec. 1988]

THE BURDENS OF BOMB-BUILDING: ARMS CONTROL CAN HELP

The Department of Energy (DOE) is moving forward with plans to request tens of billions of dollars from Congress over the next decade to build new facilities or repair existing ones for production of nuclear weapons materials. After decades of neglect, continued production of weapons materials under current standards for environmental contamination, safety, and health, will require the replacement or restoration of virtually the entire infrastructure of the nuclear materials production complex.

However, before the United States spends billions to modernize its nuclear materials production facilities, Congress and the public must be afforded the opportunity to assess the future need for these materials. Presently attainable treaties could dramatically reduce nuclear stockpiles and decrease the need for nuclear weapons materials. The nation has time to make careful decisions about when to restart the troubled Savannah River military production reactors and whether the United States needs to build new production facilities. In view of DOE's chronic overestimation of nuclear materials requirements and the prospects for deep reductions in US and Soviet arsenals, the Congress should not allow itself to be stampeded into premature or unnecessary decisions.

The key nuclear weapons materials are plutonium, tritium, and highly enriched uranium. Plutonium and highly enriched uranium, which can sustain a nuclear chain reaction, are called "fissile" materials, and either one or both are required in all nuclear weapons. Their long radioactive half-lives mean that they essentially last forever. Tritium, an isotope of hydrogen that is used in fusion reactions in nuclear weapons, permits the design of compact nuclear weapons with greatly reduced volume and weight for a given explosive power. Unlike plutonium and highly enriched uranium, half of a given quantity of tritium decays into other elements in 12.3 years—a rate of 5.5% per year. Tritium must therefore be replenished periodically in warheads.

REAGAN'S LEGACY: UNILATERAL DISARMAMENT?

Last summer the DOE was forced, for safety reasons, to shutdown all the Savannah River production reactors. Since these reactors were the last of the dedicated facilities remaining in operation for production of new plutonium and tritium for US nuclear weapons, the US has, in effect, imposed a temporary unilateral moratorium on the production of all nuclear materials for weapons for the first time since the nuclear age began. (With an inventory of some 500 metric tons, the United States ceased production of highly enriched uranium for nuclear weapons in 1964.)

Other facilities have also been shut down for safety reasons. The N Reactor, a graphite moderated reactor at the Hanford Reservation in the State of Washington, was placed on "cold standby" earlier this year and is not expected to restart. Similarly, plutonium and uranium processing facilities have been shutdown at Rocky Flats, Colorado and Fernald, Ohio.

DOE'S PLANS

Last summer however, the DOE informed Congress that, at least in the near-term, it wanted to restore the equivalent of two Savannah River reactors to near full-power, or three reactors operating at one-half power to produce tritium. DOE has stated that this tritium is needed to replenish the existing inventory and complete the deployment of new warheads ordered during the Reagan Administration's strategic weapons buildup. After this surge of new deployments has passed, annual tritium requirements can be met by one Savannah River reactor operat-

ing near full-power, producing an estimated 8 kilograms of tritium a year.

In addition, the DOE plans to build several new facilities, giving it the capability to produce plutonium, tritium, and highly enriched uranium well into the next century.

The DOE has submitted plans to Congress to build a single, large (about 2,500 megawatts-thermal (MWt)) Heavy Water Reactor at the Savannah River Plant, and a cluster of four Modular High Temperature Gas-Cooled Reactors at the Idaho National Engineering Laboratory (INEL) with a total power of 1,400 MWt to create a redundant capacity to produce tritium, and a backup capacity to produce plutonium. However, advanced press reports of DOE's long-range modernization plan designate INEL as the future plutonium production site, raising questions about whether the high temperature reactors would ever be used to produce tritium.

The DOE plans to build a Special Isotope Separation (SIS) facility at INEL, now scheduled to begin operation in late 1995. For seven to nine years this billion dollar plant will use lasers to remove undesired plutonium isotopes from DOE stocks of low quality "fuel-grade" plutonium, increasing the concentration of plutonium 239, to yield an estimated five to seven metric tons of weapons grade plutonium, sufficient to build about 1,200-2,300 weapons, assuming about 3 to 4 kilograms per warhead. DOE has repeatedly declined to state what it will do with the plant once the seven to nine years are up. The weapons program's access to plutonium in commercial spent fuel is barred by statute.

The DOE is planning to resume production of highly enriched uranium for weapons in the early 1990s. To this end, the DOE is rebuilding a facility at the Y-12 plant in Oak Ridge, Tennessee to convert highly enriched uranium hexafluoride gas into metal for weapons.

The department is reported to be planning to consolidate several of its facilities into supersites or "parks" focusing on one activity. The Savannah River Plant would focus on tritium; Idaho National Engineering Laboratory would be responsible for plutonium; and the Y-12 plant at Oak Ridge, Tennessee would concentrate on weapon-grade uranium for warheads. This reorganization could result in the eventual closing of the Fernald, Ohio, the Rocky Flats Plant outside Denver, and perhaps other production facilities.

The General Accounting Office (GAO) estimated in the summer of 1988 that DOE would need to spend about $20 billion to maintain its existing complex to produce and recycle nuclear materials and warheads, including the construction of a new production reactor, and to ensure that this complex is operated in a safe and environmentally acceptable manner. Upgrading the Savannah River reactors will cost $785 million; restoring and replacing elements of the plutonium separation facility at Savannah River will cost about $920 million; and safety and environmental upgrades at the Y-12 Plant "may exceed $1 billion."

Building the Special Isotope Separation facility and a second production reactor and relocating some facilities to the new supersites could cost an additional $15 to $25 billion. The GAO also estimated that the DOE would have to spend over $100 billion to clean up existing radioactive contamination, safely dispose of radioactive waste, and decommission existing nuclear facilities.

DO WE NEED MORE PLUTONIUM?

During most of the Reagan Administration the DOE said that the nation faced a plutonium "shortage" unless it dedicated at least three production reactors to plutonium production, but last February Secretary of Energy John Herrington told a House Appropriations Subcommittee hearing that the United States "is awash in plutonium. We have more plutonium than we need." He later qualified this statement in Senate testimony by noting that he was talking about the near-term supply of plutonium and that he was still concerned about meeting projected stockpile requirements for the late 1990s.

The dramatic change in plutonium requirements through the mid-1990s resulted from several factors. Budget constraints have forced the Department of Defense to reduce significantly the number of nuclear weapons it plans to build over the next several years. The retirement of additional Poseidon submarines mandated by Congress—each estimated to be carrying a warhead inventory containing about 500 kgs of plutonium [about one Savannah Reactor-year of plutonium at full power]—also contributed to eliminating plutonium shortages.

In fact, it appears that through early retirement of the remaining Poseidon missile submarines—a modest speedup of the Navy's already planned trend toward lower numbers of deployed missile submarines—could provide virtually all the plutonium needed to support the deployment of Trident missile submarines through 1995. By that year, the United States would have deployed about 17 Trident submarines, near the maximum deployable level under proposed START ceilings, without removing missile tubes from individual Trident submarines.

Accordingly, by continuing to develop more realistic projections of the number of nuclear weapons it is likely to build, accelerating the retirement of obsolete weapons while stretching out the deployment of new weapons, and reclaiming the reported backlog of some 10 metric tons of plutonium in manufacturing scrap, the United States could maintain a nuclear arsenal of roughly the present size and composition for many years, if not decades.

If the United States and the Soviet Union achieve a START treaty and agree to reduce their ballistic missile warheads by 50 percent, the United States would have no justification to produce any more plutonium, even though the START agreement is unlikely to require the United States to reduce its total stockpile of strategic warheads and bombs by more than 25 percent—about 3,500 weapons.

BILATERAL RESTRAINT

Although unilateral restraint is feasible, a negotiated, bilateral, verifiable agreement to cut off production of plutonium and highly enriched uranium would provide the greatest long term assurance of mutual restraint. It would also serve to eliminate the current asymmetry in nuclear materials production capabilities which now favors the Soviet Union.

A US/Soviet agreement to end the production of fissile material would place a ceiling on the size of nuclear weapons inventories, providing additional insurance against "breakout" from arms reduction treaties. It would also strengthen international barriers to the spread of nuclear weapons by extending safeguards to the nuclear weapon states and by reducing the discriminatory character of the Non-Proliferation Treaty.

By eliminating the "need" to build new plutonium production facilities and rebuild aged facilities, and by reducing the generation of nuclear and toxic wastes, a cutoff agreement would also save valuable capital investment and operating funds that could be used to clean up the extensive contamination created by past production of nuclear warheads.

Most important of all, if new arms control agreements are to substantially reduce the number of warheads available to each side for clandestine deployment or overt breakout, then such agreements must provide for dismantlement of the warheads themselves, and prohibit the recycling of some significant fraction of the fissile material from these warheads into new weapons. For such a genuine nuclear disarmament process to be meaningful, however, it would be essential to ensure that fissile material removed from the weapons production cycle is not replaced concurrently or at some later date by newly produced material—hence the role of the fissile cutoff as the essential backdrop for the nuclear reductions process. Moreover, since it is far cheaper to recycle nuclear weapons materials than to produce them from scratch, verifiable reductions in the nuclear weapons stockpiles will make economic sense to the military complexes on both sides only when accompanied by a ban on new production.

LATENT SOVIET INTEREST

The Soviet Union also appears to have economic and political incentives to conclude such an agreement, which has been a low key "official" position of Soviet foreign policy since 1982, but has received little attention from the Soviet leadership. It, too, has aging production reactors, and a heightened awareness of hazards associated with nuclear facilities in the wake of the Chernobyl reactor accident. It has also demonstrated a new openness towards the presence of American and international inspectors to monitor nuclear weapons activities and to safeguard civilian nuclear facilities.

A resurgence of Western scientific and public interest in a fissile material cutoff agreement in recent years is based in part on advances in national technical means of verification and International Atomic Energy Agency safeguard techniques employed at civilian nuclear facilities. Application of these techniques would be supplemented by bilateral challenge inspections at potential production sites using advanced on-site monitoring technologies. While the usual panoply of verification objections are likely to be raised against this proposal, their basic irrelevance is evident in the following example.

Had the United States and the Soviet Union agreed to a fissile cutoff in 1965, as President Johnson proposed, the amount of fissile material the Soviet Union might have produced clandestinely over the next two decades pales in comparison to the amount they actually did produce in the absence of an agreement. Over the same period the United States unilaterally reduced its stockpile from 32,000 to 23,000 weapons, while the Soviet Union increased its stockpile from a few thousand to about 25,000 weapons. From the arms control risk-benefit standpoint, it would certainly seem to have been in the US interest to sign such an agreement even without any provisions for on-site inspection. Restricted to a clandestine program geared to evade detection by national technical means, the Soviet Union would have produced far fewer nuclear

weapons than it has today. No doubt, this fact is related to the reason the Soviet Union rejected US proposals for a fissile material cutoff.

Today both nations have huge nuclear stockpiles and are contemplating reductions in their deployed forces. Until both sides reach low levels of nuclear forces, the military significance of the fissile material denied each side by a cutoff agreement would vastly outweigh the significance of the amount that might be produced clandestinely. Moreover, given the recent political changes in the Soviet Union, and the increased likelihood of disclosure from within the Soviet system itself, the analyst's traditional formalism of posting some threshold level of Soviet clandestine activity may have to be abandoned altogether.

WHAT ABOUT TRITIUM?

Under a fissile material cutoff, tritium production could continue, although tritium-production reactors would require safeguards and other on-site inspections to detect plutonium production or the diversion of any highly enriched fuel.

Tritium must be treated differently than fissile materials because it has such a short half-life, and because a country's relative dependence on tritium in nuclear weapons may reflect significant technical differences in the composition of their nuclear arsenals. Although both the United States and the Soviet Union have designed arsenals that undoubtedly depend heavily on tritium, they do not know whether they each depend on tritium to the same extent.

Tritium's relatively rapid decay also significantly increases the anxiety of military establishments when tritium production is halted. For example, officials of the Department of Defense have charged that turning off the Savannah River reactors is tantamount to unilateral disarmament, and this charge has prompted near hysteria in the conservative press—a harbinger of things to come if "disarmament by tritium decay" becomes the cutting edge of nuclear arms reduction efforts. A recent Wall St. Journal broadside, for example, blasts a recent "unilateral disarmament suit," filed by the Natural Resources Defense Council for "zeroing in on the heart of the nation's deterrent posture." (NRDC is suing merely to invoke the requirements of the National Environmental Policy Act with respect to DOE's decision to restart the Savannah River reactors). To highlight the danger, the Journal quotes former Energy and Defense Secretary James Schlesinger: "If you want the shortest route to unilateral disarmament, just shut down those reactors for a while."

RESTARTING THE SAVANNAH RIVER REACTORS

Significant safety issues surround the operation of these reactors, including earthquake resistance, emergency core cooling, the understanding of severe accident phenomena, and upgrading of operating procedures. Plans for a prompt restart however, could preempt the kinds of inspections and modifications that are needed to operate these reactors safely, including determining if the reactor vessels have developed cracks similar to those discovered in the C reactor in 1985, which is now permanently shutdown.

Fortunately, the hysterical sense of urgency surrounding restart of these reactors is unwarranted. The government has several options for meeting its short-term tritium requirements for at least one year and possibly longer. How long a delay is acceptable before restarting these reactors depends on which of the following options for extending current supplies are considered feasible:

Using a reserve of tritium which is reported to be capable of fulfilling requirements until the end of 1989.

Minimizing the size of the pipeline and eliminating any backlogs in the replenishment cycle. According to DOE officials, the DOD has not returned partially decayed reservoirs as quickly as it has received replenished reservoirs from Savannah River. This is important because most of the tritium required to fill new reservoirs comes from reservoirs returned from the field.

Keeping the reservoirs in the deployed warheads longer than normal. Whether this could result in more than a minor degradation in yield depends on the design of the warhead and the range of yields that must be maintained.

Putting in less than the full complement of tritium in the reservoirs, but replenishing the supply more often.

Accelerating the retirement of older warheads, such as those in the Poseidon submarines, gravity bombs being replaced by air-launched missiles, and warheads covered by the INF treaty.

Stretching or thinning-out the deployment of some new warheads and bombs on strategically nonessential or unreliable weapons systems, such as the nuclear tipped sea-launched cruise missiles, the B-1B penetrating bomber, and battlefield weapons.

Buying tritium from Britain. The U.S. and the U.K. have swapped weapons-usable materials in the past, so there is precedent for such action. Civilian DOE customers of tritium could buy it from Canada, which has a policy not to provide tritium for nuclear weapons.

Some of the options discussed above, such as putting in less tritium and using the reserve, invole borrowing against future production. Any decision to do that must be balanced against DOE's ability to provide tritium at a later date. However, deferring tritium production requirements to future years could be an attractive strategy for dealing with near-term shortages in light of anticipated reductions in strategic nuclear forces.

WHY RUSH NEW PRODUCTION REACTORS?

The deterioriated condition of the Savannah River reactors has accelerated demands for rapidly building new production reactors. Following completion of extensive safety modifications and tests, these reactors might be able to operate for many more years. For example, one of the Savannah River reactors, the "L" Reactor, is actually 17 years younger than the other two reactors ("P" and "K"), having been shut down from 1968 to 1985. The DOE presently plans to operate these reactors for at least another decade until a new production reactor is finished. Operating one or two at a time while keeping the remainder in standby status could assure a production capability well beyond the next decade, diminishing the urgency of building a new production reactor.

Before the summer shutdown of the Savannah River reactors, the DOE had planned to resume plutonium production in two of these reactors when they returned to near full-power by about 1990, with the third dedicated to tritium production. If plutonium production was halted, these reactors could be used to produce only tritium, allowing the reactors to be operated at lower power levels.

If the Savannah River reactors must be shutdown several years before a new reactor can be built, the DOE might have to consider using other reactors to produce tritium. It has studied the conversion of the Fast Flux Test Facility (FFTF), a 400 MWt fast reactor on the Hanford Reservation, to tritium production. This reactor can produce roughly 1.5 kilograms per year at its current power, although its conversion could take several years and would require the development of new lithium rods ("targets") which are irradiated in the reactor to produce tritium. There are also several government-owned research reactors and naval propulsion demonstration reactors that conceivably could be converted to tritium production. Combined with the FFTF, these reactors might be able to produce a significant fraction of the average future tritium requirement.

The DOE could also restart the N Reactor for tritium production, but this reactor also has severe safety problems. In comparision to the Savannah River reactors, it is a relatively poor producer of tritium. According to DOE testimony in 1981, the N Reactor can produce about 3 kilograms of tritium per year, compared to an estimated 8 kilograms per year in a Savannah River reactor operating at near full-power.

The pace of U.S. nuclear warhead reductions if tritium production was permanently halted, assuming 23,000 warheads initially and equal amounts of tritium in all weapons.

Year after cutoff in production	Weapons remaining at end of that year
1	21,740
2	20,549
3	19,423
4	18,359
5	17,353
10	13,091
20	7,452
30	4,241
40	2,414
50	1,374
100	82

WHY A SECOND NEW PRODUCTION REACTOR?

Since the proposed new heavy reactor will have sufficient capacity to supply 100% of future tritium requirements, the justification for a second new production reactor, the modular high temperature gas-cooled reactor, is based on a postulated need for both technical and geographic diversity to hedge against natural disasters or safety problems at the Savannah River Plant. In light of the tight fiscal constraints however, it hardly seems necessary to build a second reactor. Developing tritium target technology for existing research, naval, or as a last resort, commercial reactors would serve as an adequate hedge against the sudden breakdown of the new production reactor. Some observers see the second reactor more as a bargaining chip to finesse a dogfight between rival congressional delegations over who gets the new reactor, and as a device to assure that at least one new reactor is built. Others see a backdoor attempt to subsidize the development of a safer civilian power reactor technology capable of winning broad acceptance from the electric utilities and the public, thereby reinvigorating the stagnant U.S. nuclear industry.

REDUCING TRITIUM REQUIREMENTS

One of the reasons for a continuing large tritium production requirement is a shift to longer warhead replenishment cycles in newer warheads. According to administration sources cited in the New York Times re-

cently, the new generation of submarine launched weapons has maintenance cycles of ten years or longer compared to the present four to six year cycle for most of the currently stockpiled weapons. Such a shift requires a greater amount of tritium in newer warheads than in the ones being replaced, and hence a larger total tritium inventory. In view of the current production uncertainties, the shift to longer replenishment cycles, should be reexamined, and if necessary, deferred.

The most important factor affecting the requirement for a new production reactor is the potential for deep reductions in the nuclear arsenals of the United States and the Soviet Union. If the total number of US weapons decreases faster than the rate that tritium decays, the tritium needed to replenish the remaining weapons could be obtained from the dismantled weapons, assuming that all of the weapons contain equal amounts of tritium (see Table).

The START treaty is expected to be completed within about two years. We estimate from published sources that this treaty could provide the United States enough tritium from retired weapons to replenish the remaining warheads for about three years. This assumes that under such an agreement the United States would retire roughly 3,500 weapons, each containing a nominal 4 grams of tritium.

If the United States and the Soviet Union implement a nuclear weapons reductions agreement that would leave each side with only a few thousand nuclear weapons by the end of this century, the United States would not have to produce any more tritium until after the year 2030.

BILATERAL HALT TO TRITIUM PRODUCTION

Some have suggested that the United States negotiate an end to tritium production with the Soviet Union which would require that all military production reactors be shut down. The major intent of such an agreement would be to "force" reductions in the number of nuclear warheads on each side at the rate that tritium decays. Pacing nuclear reductions through tritium decay would require stringent controls, not only over tritium production, but also over existing tritium inventories.

The rapid decay rate of tritium will arouse the concerns of each military establishment regarding the size of the other's tritium inventory and its relative dependence on tritium. It is not known how to alleviate these concerns without releasing detailed information about warheads, something each side would be reluctant to do lest this information be used to exploit vulnerabilities in their warhead designs.

Controls on tritium production are not needed for START reductions. Far from playing the role of a "forcing function" in arms reduction talks, controls on tritium production would simply delay agreement on the START treaty. (See also adjoining article with regard to post-START agreements.)

All of this does not mean that tritium production capability might not be limited as a collateral effect of a post-START agreement. For example, the verification of a fissile material cutoff agreement would be eased by agreeing to limit each side to one tritium production reactor (e.g. one production reactor operating only to replenish the existing arsenal). But here the verification requirements to detect clandestine production of tritium are much less stringent because the limit on tritium production is incidental and not "forcing."

In the case of a tritium production ban, while disparities as large as 1,000 kilograms in fissile material inventories are not likely to be viewed as critical to the political-military stability of such a reductions regime for many years, the same cannot be said for even 10 kilograms of tritium, which could promptly restore the performance of thousands of "reduced" warheads. To forestall the latter eventuality brings one right back to the need for verified dismantlement of the nuclear warheads themselves and safeguarded disposition of the fissile materials.

It is worth observing, also, that the pace of reductions mandated by tritium decay, even if it could be agreed, would be significant only in the first several years of agreements to make deep cuts in both sides's nuclear arsenals. For those interested in reducing the size of each side's nuclear arsenals to a few thousand warheads by the year 2000, the pace of reductions mandated by tritium's decay is too slow.

In sum, therefore, we see no way in which the use of tritium decay could plausibly be used to compel negotiated cuts in nuclear arsenals.

CONCLUSION

The serious problems plaguing the nuclear materials production program will require the government to make drastic changes in the management of its program. At the very least, these changes should also include a thorough and independently reviewed assessment of the need for new production facilities under various assumptions about the future strategic environment.

Until the current crisis in DOE's program, the only major constraint on the production of nuclear materials was economic. Now, safety and environmental factors are playing a decisive role in the operation of DOE's Defense Programs. As the Congress begins to wrestle with the enormous requests for funds to rebuild the US production base for nuclear warfare, the attractive possibilities afforded by nuclear reductions agreements and nuclear material production controls should be accorded an important, and possibly decisive, role in shaping the future of the nuclear materials production complex.—*David Albright and Christopher Paine.*

TRITIUM AS A "FORCING MECHANISM?"

FAS specialists do not believe it is feasible to use a tritium cutoff as a way of "forcing" reductions in nuclear weapons because it is far easier to reach agreement on the reductions than it would be to secure the tritium cutoff.

As an analogy, what if one urged the two sides to agree to limit missile flight tests with, say, a quota of flight tests that declined 5% a year. To keep the missiles operational with a suitable number of flight tests from this declining quota, each side would be required, to eliminate whole classes of missiles. In this sense, a steadily declining limit on flight tests would "force" missile reductions.

But neither side would adopt this approach precisely because, if each were so eager for missile reductions, each would prefer to negotiate very precisely which missiles are being reduced and when—rather than to leave it to the vagaries of which missiles the other side decided to eliminate. In effect, the uncertainties of the "forcing" agreement in tritium are much larger than the uncertainties associated with the reduction agreement being "forced." In both cases, therefore, a "political inversion" provides us with a kind of mirage.

Indeed, cutoffs of tritium involve greater uncertainties about the relative use of the tritium on the two sides than exists concerning flight tests—and verification would be more difficult.

Much of the confusion surrounding this proposal arises from the fact that there are, really, three proposals. In the first, the "forcing" proposal espoused by the Nuclear Control Institute, there are the problems listed above.

In a second version, the tritium cutoff is hypothesized to enforce "compliance" with an existing disarmament agreement rather than to enforce agreement by negotiators. Here, in the words of Los Alamos weapons expert Carson Mark, the tritium cutoff does not "stand alone." Critiques of this approach ask "why" the two sides would bother to enforce an agreement with a tritium cutoff when the agreement itself would have much more precise methods of verification and enforcement than an overall cutoff of a vital ingredient that could be used in manifold ways.

Finally, there is a third form of the proposal which, obviously, all can support. Here the disarmament agreement stands alone and tritium production can be reduced unilaterally because less is needed to service fewer nuclear weapons.—Jeremy J. Stone.

[From the National Journal, Apr. 29, 1989]

(By David C. Morrison)

DEFENSE FOCUS

Thanks to the safety-related shutdown of its three remaining nuclear weapons material production reactors, the United States has generated no new nuclear materials for its bomb program since last April. The restart of the reactors is sure to be long delayed by environmental challenges, and the Energy Department's plan to build two more production reactors and a laser-driven plutonium purification facility will cost more than $8 billion. And so, some argue, necessity might as well be the mother of arms control. *(See NJ, 11/26/88, p. 2992.)*

"Why not convert this de facto U.S. *unilateral* moratorium into a bilateral, verifiable arms control regime that would halt Soviet plutonium production as well?" Sens. Edward M. Kennedy, D-Mass., and Timothy E. Wirth, D-Colo., proposed in an April 3 "Dear Colleague" letter touting their proposed Plutonium Control Act. Under this measure, no funds would be obligated for plutonium production if the Soviet Union agrees to a ban on the manufacture of bomb-grade fissionable materials. The production of tritium, a perishable radioactive gas essential to modern nuclear weapons, however, would be unimpeded.

The Kennedy-Wirth bill is scheduled to be introduced in early May, as is its House counterpart, sponsored by Reps. Dante B. Fascell, D-Fla., and Ron Wyden, D-Ore. The goal is "to reduce costs and get arms control and environmental benefits," said David H. Albright, a senior scientist with the Federation of American Scientists, which signed onto a similar proposal—called the Plutonium Challenge—advanced by a consortium of arms control and environmental groups in 1987. As for verification, "if you try to account for every ounce of plutonium, then, no, you can't do it," Albright said. "But if you're talking about militarily significant amounts, then it can be done," with monitoring by the International Atomic Energy Agency and surveillance by satellite for covert reactors.

Other analysts contend that the Plutonium Control Act does not go far enough. "Our feeling is that the approach should be

more comprehensive [because] tritium is the real issue," said Milton M. Hoenig, scientific director of the Nuclear Control Institute, an anti-nuclear-proliferation group. In a statement recently issued by the institute, 11 senior U.S. scientists assert that in view of the deep cuts proposed in the Strategic Arms Reduction Talks (START), the United States should move for a ban on all nuclear materials production.

Having amassed a stockpile of 500 metric tons of weapons-grade uranium, or oralloy, the United States, in fact, has not needed to produce any since 1964. Energy's plans to resume oralloy production keep getting pushed back—currently to 1991-92—and could be deferred indefinitely if 1,000 obsolete W-33 nuclear artillery shells, containing about 50 metric tons of uranium, were dismantled. With 100 metric tons of plutonium on hand, Energy has also shown little urgency about resuming production of that material, huge amounts of which are being mined from retired Poseidon missile warheads.

The chief rationale for the new production reactors, therefore, is tritium. The Pentagon has said that it can get by for 18-24 months with no new tritium. But because tritium's 5.5 per cent annual decay rate would dovetail over the next five years with the proposed START cuts, the institute says, there is no urgent need to resume production. If even deeper cuts are agreed to, it contends, the United States' 23,000 nuclear weapons contain enough tritium to feed 6,000 warheads for more than 20 years.

That the Soviets also boast large stocks of fissionable materials colored Western reaction to Mikhail S. Gorbachev's April 7 announcement that his country would stop producing bomb uranium this year and shut down two plutonium reactors by 1990. Noting that the Soviets would still have 8-10 production reactors, former Arms Control and Disarmament Agency director Kenneth L. Adelman, in a *Washington Times* op-ed column, denounced this as "bumper sticker arms control" designed to "thwart the needed start-up of our materials production." That is also the official U.S. view. "This [Soviet announcement] only diverts attention from the real issue, which is the negotiating process to reduce weapons on both sides," Energy Department spokeswoman Chris A. Sankey said.

Gorbachev described the cutbacks as "yet another major step toward the complete cessation" of bomb-grade fissionable materials production. The Soviet position on tritium has been less clear. In a March 22 meeting with the antinuclear group SANE/Freeze, however, Soviet Embassy official Sergei Chetverikov suggested that a tritium ban was feasible only in the context of a Soviet proposal, put forward in 1986, for total nuclear disarmament by the year 2000.

The superpowers have danced this particular atomic minuet before. When President Johnson was faced with the need to pare back a vastly overbuilt nuclear production complex—it then included no fewer than 14 reactors—he sought to gain some arms control credit in the process. And so, in 1965, he proposed a mutual cutoff in fissionable materials production, as well as transfer of plutonium to nonmilitary purposes—4 metric tons by the United States and 2.5 metric tons by the Soviet Union, then estimated to have only a fifth as much of the stuff as the United States had. The Soviet response was chilly, however. In any event, Johnson had lost interest in the plan by 1966, largely because Soviet plutonium production was by then catching up with that of the United States.

Today, a cutoff in the production of fissionable materials—if not of tritium—might prove less tricky. Both nations have ample stocks of highly enriched uranium. And, with an estimated 115 metric tons of plutonium, the Soviet stockpile is only marginally larger than that of the United States.

The two countries also now have something else in common in this arena—aging and dangerous nuclear weapons production infrastructures. "The Soviet production reactors are old and obsolete, and they are planning on shutting them down," Hoenig said. "We're in the same boat, so this is a unique time to talk to the Soviets about a mutual halt in all reactor production. I think we can both well use the money for other purposes, such as environmental cleanup."●

By Ms. MIKULSKI (for herself and Mr. BINGAMAN):

S. 1048. A bill to amend chapter 89 of title 5, United States Code, to provide authority for the direct payment or reimbursement to certain health care professionals; to clarify certain provisions of such chapter with respect to coordination with State and local law; and for other purposes; to the Committee on Governmental Affairs.

FEDERAL EMPLOYEES HEALTH CARE FREEDOM-OF-CHOICE ACT OF 1989

● Ms. MIKULSKI. Mr. President, I rise today to introduce the Federal Employees Health Care Freedom of Choice Act of 1989. This legislation will guarantee enrollees in the Federal employees health benefits plan [FEHBP] access to licensed, qualified health care providers of their choice.

Freedom of choice among health care plans has long been a hallmark of the FEHBP. As the largest employer-sponsored group health program in this country, the FEHBP includes 471 plans or options from which Federal employees can choose to meet their health insurance needs.

But freedom of choice is important within plans as well. Currently Federal employees have enrolled in fee-for-service plans do not always have direct access to qualified and licensed health care providers of their choice. FEHBP may currently refuse to reimburse a licensed health care professional, simply because that provider is not a physician.

My legislation corrects this inequity in reimbursement policy. It requires FEHBP plans to reimburse the full range of allied health providers. In order to be reimbursed, these professionals must be licensed under State laws where they practice.

Expanded access to health care providers increases the likelihood that FEHBP enrollees will be able to find the health care they need. In addition, greater choice among qualified providers will promote increased cost effectiveness within the FEHBP. Often, qualified allied health care providers charge fees lower than those of physicians.

To ensure that Federal law does not conflict with State statutes regarding the licensing of health care providers and the regulation of the practice of medicine, I have included language in my legislation which restates and strengthens current policy. This policy states that Federal law governing the FEHBP shall not override State or local laws which relate to the licensing or certification to practice medicine, nursing, or other health professions.

FEHBP insurance plans may not, however, impose their own requirements on practitioners in addition to those mandated by law. To do so restricts freedom of choice by denying Federal employees access to the full range of health care providers.

This legislation mandates expanded access to providers, but does not provide expanded coverage for health services. It represents an important improvement in the FEHBP, especially in medically underserved areas where insufficient access and choice have threatened the quality of health care.

Mr. President, it has become increasingly clear in recent years that the FEHBP is in need of a major overhaul. The costs to both the Government and Federal employees have skyrocketed, even as benefits were being reduced. This is the second Congress in which I have introduced this bill, and I believe we can no longer wait to fix this system. As we look toward making improvements in the FEHBP this year, it is my hope that the Government Affairs Committee will seriously consider incorporating this legislation into the overall plan.

In conclusion, this legislation has been designed to expand freedom of choice and promote cost effectiveness while protecting access to quality health care. It carries out a principle I believe in—that the Federal Government should not discriminate in its reimbursement policies among health providers licensed in their States to provide health care.

I ask unaminous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Employees Health Care Freedom-of-Choice Act of 1989".

SEC. 2. AUTHORITY TO PAY OR REIMBUSE CERTAIN ADDITIONAL HEALTH CARE PROFESSIONALS.

(a) IN GENERAL.—Section 8902(k) of title 5, United States Code, is amended—

(1) in paragraph (1), by inserting "(except if, or to the extent that, any such supervision of referral is required under State or local law, or regulations issued thereunder, as described in subsection (m)(1)(B))" after "practitioner";

(2) by redesignating paragraphs (2) and (3) as paragraphs (3) and (5), respectively;

(3) by inserting after paragraph (1) the following:

"(2) When a contract under this chapter requires payment or reimbursement for services which may be performed by a health practitioner, an employee, annuitant, family member, or former spouse covered by the contract shall—

"(A) be free to select, and have direct access to, such a health practitioner without supervision or referral by another health practitioner, except if, or to the extent that, any such supervision or referral is required under State or local law, or regulations issued thereunder, as described in subsection (m)(1)(B); and

"(B) be entitled under the contract to have payment or reimbursement made to him or on his behalf for the services performed.";

(4) in paragraph (3) (as so redesignated by paragraph (2))—

(A) by inserting "as defined by section 8901(11)(B) of this title," after "qualified clinical social worker,"; and

(B) by striking "As" and inserting "Subject to subsection (m)(1)(B), as";

(5) by inserting after paragraph (3) (as so redesignated by paragraph (2)) the following:

"(4) When a contract under this chapter requires payment or reimbursement for services of a health practitioner covered by paragraph (2) or (3), the terms and conditions governing such payments or reimbursements shall (except to the extent otherwise permitted under paragraph (3)(A)) be the same as the terms and conditions generally applicable under contracts under this chapter requiring payments or reimbursements for services of health practitioners covered by paragraph (1)."; and

(6) by amending paragraph (5) (as so redesignated by paragraph (2)) to read as follows:

"(5) The provisions of this subsection shall not apply to prepayment plans described in section 8903(4) of this title.".

(b) STATEMENT OF CONGRESSIONAL INTENT.—It is the intent of Congress—

(1) that nothing in the amendment made by subsection (a) shall interfere with applicable institutional anesthesia practice rules, or State or local law, governing supervision of a certified registered nurse anesthetist by another health practitioner; and

(2) that such amendment, as it relates to a certified registered nurse anesthetist, shall apply only with respect to a certified registered nurse anesthetist who is self-employed and licensed or certified under Federal or State law, as applicable.

(c) IMPLEMENTING REGULATIONS.—Regulations or instructions issued to carry out the amendments made by subsection (a) shall reflect the statement of congressional intent set forth in subsection (b).

SEC. 3. COORDINATION WITH STATE AND LOCAL LAW.

Section 8902(m) of title 5, United States Code, is amended—

(1) by redesignating paragraph (1) as paragraph (1)(A);

(2) by adding at the end of paragraph (1)(A) (as so redesignated by paragraph (1)) the following:

"(B) Nothing in this chapter nor in the provisions of any contract under this chapter shall be considered to supersede or preempt any State or local law, or any regulation issued thereunder, which relates to licensing or certification to practice medicine, nursing, or another health profession."; and

(3) by amending the last sentence of paragraph (2)(A) to read as follows: "In applying this paragraph with respect to a qualified clinical social worker under section 8901(11)(B) of this title, any provision of a contract relating to the condition described in subsection (k)(3)(A) of this section shall not be considered.".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall be effective with respect to contracts entered into or renewed for calendar years beginning after the date of the enactment of this Act.●

By Mr. SPECTER (for himself and Mr. HEINZ):

S. 1049. A bill to recognize the organization known as the Montford Point Marine Association, Inc.; to the Committee on the Judiciary.

MONTFORD POINT MARINE ASSOCIATION

Mr. SPECTER. Mr. President, today I am introducing legislation, the successor of S. 714 which I introduced in the 100th Congress, which would grant a Federal charter to the Montford Point Marine Association. I am joined in this effort by my colleague from Pennsylvania, Senator HEINZ.

The proud history of this organization highly qualifies it for national recognition. The group came into existence on June 25, 1941, when President Franklin Roosevelt issued Executive Order No. 8802, allowing blacks to be recruited into the Marine Corps. There was tremendous response from young men eager to serve the country in a troubled time.

However, the blacks were not trained at either Parris Island or San Diego, traditional boot camps for marines, but rather were sent to Montford Point at Camp Lejeune, NC. Nearly 20,000 blacks trained at Montford Point from 1942 until President Truman issued an Executive order integrating the Armed Forces in 1948.

The shared experiences of these distinguished and ground-breaking marines kept many in close touch. In 1965, a graduate of Montford Point, Brooks Gray, held a reunion of the first black marines in Philadelphia, which gave birth to the Montford Point Marine Association [MPMA]. Brooks was elected the first national president of the organization.

The MPMA established an open membership policy, opening itself to "all marines and veterans who honorably serve our country." Its statement of purpose reads as follows:

To promote and preserve the strong bonds of friendship borne of shared adversities; and to devote ourselves to the furtherance of these friendships as Marines through the sharing of experiences and accomplishments to ensure more specific times.

The numerous MPMA chapters throughout the United States have become actively involved in civic affairs. While their primary focus is on assisting veterans, the chapters also foster educational opportunities through college scholarships and have engaged in community action projects.

Clearly, an organization with as broad a base of support and historic significance is deserving of a congressional charter. As a Senator representing the MPMA's national headquarters in Philadelphia, I am proud to reintroduce this legislation, and am hopeful that my colleagues will join with me in seeking its prompt passage.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1049

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CHARTER

SECTION 1. The Montford Point Marine Association, Incorporated, a nonprofit corporation organized under the laws of the State of Pennsylvania is recognized as such and is granted a Federal charter.

POWERS

SEC. 2. The Montford Point Marine Association, Incorporated (hereinafter in this Act referred to as the "corporation") shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Eligibility for membership in the corporation and the rights and privileges of members of the corporation shall be as provided in the constitution and bylaws of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The composition of the board of directors of the corporation and the responsibilities of such board shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The positions of officers of the corporation and the election of members to such positions shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation may inure to the benefit of any member, officer, or director of the corporation or be distributed to any such individual during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual and necessary expenses in amounts approved by the board of directors.

(b) The corporation may not make any loan to any officer, director, or employee of the corporation.

(c)(1) The corporation may not contribute to, support, or otherwise participate in any political activity or attempt in any manner to influence legislation.

(2) No officer or director of the corporation, acting as such officer or director, may commit any act prohibited under paragraph (1) of this subsection.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or the authorization of the Federal Government for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents whenever such officers and agents have acted within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep, at its principal office, a record of the names and addresses of all members having the right to vote in any proceeding of the corporation. All books and records of such corporation may be inspected by any member having the right to vote in any corporation proceeding, or by any agent or attorney of such member, for any proper purpose at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(68) Montford Point Marine Association, Incorporated".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 13. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1986. If the corporation fails to maintain such status, the charter granted by this Act shall expire.

TERMINATION

SEC. 16. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted by this Act shall expire.

Mr. HENIZ. Mr. President, I rise today to join my colleague Senator ARLEN SPECTER in introducing legislation to extend a Federal charter to the Montford Point Marine Association [MPMA].

This organization has a proud history, one which highly qualifies it for national recognition. On June 25, 1941, President Roosevelt issued Executive Order 8802 which permitted blacks to be recruited into the U.S. Marine Corps. It was an historic advancement for civil rights for our Nation.

Thousands of black Americans volunteered for the Marine Corps. Those who entered the corps were trained at the Montford Point facilities of Camp Lejeune, NC. Nearly 20,000 black marines received training at Montford Point from 1942 until July 1948, when President Truman set in motion full integration of the Armed Forces by establishing the Presidential Committee on Equality of Treatment and Opportunity in the Armed Services.

These distinguished servicemen kept in touch after the war. In 1965, Montford Point graduate Brooks Gray held a reunion for Montford's graduates in the Philadelpha area. Shortly thereafter, the Montford Point Marine Association was born. Brooks Gray was elected the first national president of the organization.

The MPMA has always had an open membership policy for all veterans who honorably served our country. Its membership includes many distinguished servicemen. Edger R. Huff, MPMA's ceremonial officer and one of the first black drill instructors, was a corporal at Montford in 1943, and went on to serve during the Vietnam war. In January 1968, while a sergeant major of the First Military Police at Da Nang, Mr. Huff was severely wounded rescuing a radio man. For this act of heroism, he received a Bronze Star and two Purple Hearts. This injury, most unfortunately, resulted in his losing a leg in 1983.

Jack McDowell, elected in 1988 as MPMA's public relations officer, was seriously wounded in Vietnam in 1968, and received a Silver Star for his actions.

Agrippa Smith, who was a sergeant major with the First Battalion Ninth Marines at Khe Sanh, received a Presidential Unit Citation from President Johnson in May 1968. Smith was a chapter president of MMPA at Camp Lejune.

Mr. President, these are just a few examples of the outstanding members of the MPMA, which since 1965 has grown to 23 chapters in 17 States across the country.

Concerned primarily with assisting veterans, many of these chapters are involved in local civic affairs, fostering educational opportunities through college scholarships and engaging in community action projects. These projects include youth guidance programs, providing food for the impoverished, and hospital volunteer programs.

I am proud to join with Senator SPECTER in introducing this legislation. I urge my colleagues to join us in recognizing this organization's historic significance by ensuring its prompt passage.

By Mr. HEINZ (for himself and Mr. CONRAD):

S. 1050. A bill to amend the Federal Railroad Safety Act of 1970; to the Committee on Commerce, Science, and Transportation.

FEDERAL RAIL SAFETY ENFORCEMENT IMPROVEMENT ACT

● Mr. HEINZ. Mr. President, last year, Congress passed the most significant rail safety legislation in nearly 20 years. The Rail Safety Improvement Act of 1988 can and should dramatically assist the Federal Railroad Administration in making our Nation's railroads safe. It should also provide for a considerable improvement of the peace of mind of those who ride the rails and of the people who live near the tracks.

I strongly believe, however, that there are additional steps Congress must take to ensure the safety of railroad workers, passengers, and residents of communities through which rail freight and passengers pass.

Prompted by a rash of rail accidents in Pennsylvania, I commissioned a study last year by the General Accounting Office [GAO] to investigate Federal oversight of rail safety. Completed in November 1988, the report entitled, "Railroad Safety: Accidents in Pennsylvania and Related Federal Enforcement Actions," casts grave doubt about the FRA's approach to enforcement of rail safety.

The GAO found that most accidents not only are not investigated by the FRA, but that most accidents are also not followed by FRA enforcement. Out of 103 accidents that occurred in Pennsylvania in 1987, the FRA investigated only 21. Of the 21, the FRA concluded that 15 had identifiable causes and could have been prevented.

Yet, Mr. President, in only one accident, which resulted in the evacuation of 1,000 people from their homes and

property damage of more than $1 million, did the FRA impose a fine. One accident, out of a total of 103 in which 3 persons were killed, 6 injured, and property damage of $6.5 million occurred. And that does not even include train and nontrain incidents in which there were 34 killed and over 1,300 injured in my State alone.

Furthermore, in a recently completed report for the chairman of the House Committee on Energy and Commerce, the GAO found that there is "substantial underreporting and inaccurate reporting" of railroad accident and injury data to Federal regulators. The GAO concluded that the flawed data raise questions about the overall effectiveness of the FRA's safety program.

Mr. President, it overstates the case to say that there are some who are literally getting away with murder, but it is no exaggeration to state that life and limb are risked daily because there are too many loopholes in Federal enforcement procedures.

The legislation I am proposing today will close these loopholes and will help to restore the American public's confidence in Federal enforcement of rail safety. The legislation:

Directs the FRA to thoroughly investigate any accident or incident involving a collision, derailment involving the release of hazardous materials, or resulting in a fatality or injury that requires at least outpatient care.

Nationally, the FRA investigates well below 10 percent of all reportable accidents annually.

Directs the Department of Transportation to commission a study by the National Academy of Sciences to review the adequacy of Federal track maintenance and condition standards.

Six accidents in the GAO study were attributed to track irregularities, but track owners were not assessed a fine because the FRA concluded they were also within the range of deviation tolerated by Federal standards. The GAO questions the policy of permitting such wide deviations.

Directs the Department of Transportation to issue regulations requiring railroads to report operating mileage by Federal region and State.

The GAO found that the FRA does not collect this data and suggested that if this were available, FRA could use them to detect deviations from national accident rates and rail safety trends.

Reverses FRA enforcement policy that stipulates penalties against railroads will be enforced only if evidence points to prior knowledge of noncompliance with Federal regulations.

Professed ignorance of safety rules should not be an always open escape hatch for those who do not want to know.

Raises the minimum civil penalty to $500 from $250—a sum which has not been raised since 1970.

Mr. President, I urge my colleagues to join me in strengthening Federal enforcement of rail safety. Today's rail industry is one which is increasingly being relied upon to not only move people, but to also move freight and dangerous hazardous materials. Strict enforcement of safety rules must be our top priority.●

By Mr. KERRY (for himself, Mr. LEAHY and Mr. GORE):

S. 1052. A bill to regulate equipment used for servicing motor vehicle air-conditioners, to restrict the sale of chlorofluorocarbons and motor vehicles with air-conditioners that use chlorofluorocarbons, to require reports on the use of chemicals which deplete the ozone layer in the stratosphere, and for other purposes; to the Committee on Environment and Public Works.

MOTOR VEHICLE AIR-CONDITIONER OZONE DEPLETION ACT

Mr. KERRY. Mr. President, there is a movement going on throughout our country and the world. People are becoming angry, angry at the way in which we are treating our environment. Angry when they go to the beach and are prevented from swimming by medical debris, waste, and pollution. Angry when they can no longer fish in streams and rivers they once enjoyed, due to the destruction caused by acid rain. Angry at the pollution and smog which envelops our great cities.

Mr. President, this outcry is just the tip of the iceberg. Global warming, acid rain and the destruction of our protective ozone layer represent a direct health threat to all Americans and people throughout the world. If unchecked they also represent a direct threat to our food and water supply.

I rise today to introduce legislation designed to assist in halting this dangerous trend by reducing and eliminating the use of certain chlorofluorocarbons [CFC's]. For 15 years now scientists have been warning us that the release of CFC's into the atmosphere will deplete the delicate balance of ozone levels in the stratosphere. Evidence of an ozone hole over the Antarctic and the recent discovery that the conditions are right for the development of a similar hole over the Arctic, indicate that this destruction is taking place at a faster rate than originally expected.

We know what the consequences of damage to the ozone layer can be—they include increased incidences of cancer, skin cancer, cataracts, harm to marine life, and worldwide damage to agricultural crops. In addition, CFC's are greenhouse gases, and some scientists believe they will account for 25 percent of the total warming over the next half century.

Chlorofluorocarbons are very stable and can last in the atmosphere for decades. When CFC's reach the stratosphere 10 to 20 miles above the earth, CFC molecules break apart, releasing chlorine which depletes the ozone layer. One single atom of chlorine can destroy 100,000 molecules of ozone. Even if all CFC's were banned today, depletion would still continue for quite some time.

Mr. President, air-conditioners in our cars and trucks represent the largest end-use of CFC's in the United States, and as such represent the third largest use of CFC's worldwide. In addition mobile air-conditioners use one of the most destructive CFC's know as CFC-12.

My legislation would ban the domestic sale or export of automobiles which contain air-conditioners that use CFC's. Beginning with model year 1993, 25 percent of the cars manufactured with air-conditioners in the United States, or imported into the United States, must be free of CFC's. This would increase to 50 percent for model year 1994, and to 100 percent by model year 1995. Just as important, this legislation requires the certification of all equipment used to install, maintain and repair car air-conditioners, and requires that CFC's are reclaimed, recycled, or safely destroyed.

Similar legislation has already been signed into law in the State of Vermont, and I would like to commend Governor Kunin and Representative McCormick for their foresight and work in this area.

Mr. President the goal of this legislation is to insure that safe alternatives to CFC's are developed and installed as soon as possible. In this effort we must be sure that any alternatives to CFC's are environmentally safe and meet all existing safety standards. This legislation calls on the Administrator of the Environmental Protection Agency to report to Congress on the status of alternatives and recommendations for the safe disposal of CFC's. In addition, the Administrator has the opportunity to petition Congress to delay the compliance deadline should be the state of technological development prevent compliance with this legislation.

However, I believe that with current research and the creativity, innovation and commitment of auto manufacturers and producers of CFC's, we can realistically meet this target date. Helen O. Petrauskas, vice president, environmental and safety engineering for Ford Motor Co., indicated the commitment of Ford in testimony before the Commerce Committee on Corporate Average Fuel Economy Standards [CAFE]. She said, and I quote:

We believe the most promising contributions to global warming that the automotive sector can make is to reduce, and reduce quickly, the use of chlorofluorocarbons, and we have an aggressive program to identify what it will take to phase CFC's out of automotive use as soon as possible.

Mr. President, there is no doubt that there will be critics, and those who believe that this deadline cannot be met. Similar skepticism, manifested in cries of impossibility and unreasonableness, was abundant in the late 70's when Congress first considered banning CFC propellant in aerosol cans. Yet the goals were met, and with minimal if any inconvenience to the consumer.

Mr. President we have an obligation to safeguard our environment for ourselves and future generations. Leadership and bold action are needed if we are to come together to meet the challenge of this threat. Mr. President, we cannot deceive ourselves; we do not have 10 years; we may not have 5 years; and we cannot meet this challenge without sacrifice or inconvenience. This legislation would help meet this threat by eliminating one of the most widely used and dangerous uses of CFC's. It will also aid in the overall search for safe and sound alternatives to CFC's, and assist in our ongoing efforts to limit dangerous greenhouse gases.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Motor Vehicle Air Conditioner Ozone Depletion Act".

SEC. 2. FINDINGS.

(a) Chlorofluorocarbons (CFCs) are very stable and can last in the atmosphere for decades. When CFCs reach the stratosphere, 10 to 20 miles above the earth CFR molecules break apart, releasing chlorine which deplete the earths protective ozone layer. One single atom of chlorine can destroy 100,000 molecules of ozone.

(b) Mobile air conditioning represents the larget end-use of Chlorofluorocarbons (CFCs) in the United States, and as a result represents the third largest use of CFCs world wide.

(c) CFCs are also greehouse gases and some scientist estimate that they will account for 25% of the total warming over the next half century.

(d) Increased Ultra Violet (UV) radiation resulting from a decrease in our protective ozone layer will result in increased incidences of cancer, skin cancer, and cataracts. It is also widely held that increased radiation can weaken the immune system leaving individuals susceptible to a number of diseases.

(e) Evidence suggests that increased UV radiation will have an adverse effect on krill and plankton which form the bases of the marine food chain. This could have a devastating impact on marine life and a resulting decrease in the worldwide harvest of fish.

SEC. 3. MOTOR VEHICLE AIR CONDITIONING

(a) CERTIFICATION OF EQUIPMENT.—Within 90 days after the date of enactment of this Act, the Secretary of Commerce (hereinafter referred to as the "Secretary") shall issue regulations which provide that on or after January 1, 1991, no person shall perform service on a motor vehicle air conditioner, including installation, maintenance, and repair service, for consideration, unless such person uses equipment which is certified as meeting the standards set by the Society of Automotive Engineers for the extraction and reclamation of a refrigerant from motor vehicle air conditioner by any of the following—

(A) the National Institute of Standards and Technology.

(B) the Underwriters Laboratories, or

(C) an entity which the Secretary of Commerce determines to be comparable to the entities described in subparagraphs (A) or (B).

(b) SCHEDULE FOR ACQUISITION AND USE OF EQUIPMENT AND DOCUMENTATION OF SUCH USE.—(1) Within 90 days after the date of enactment of this Act, the Secretary shall issue regulations which establish a phased schedule of deadlines which indicate the dates by which the equipment described in subsection (a) shall be acquired by entities which perform service for consideration on motor vehicle air conditioners, or by entities which intend to perform such service.

(2) In establishing the schedule under paragraph (1) the Secretary shall—

(A) set an earlier deadline for any entity with performs a high volume of service on motor vehicle air conditioners, as determined by the Secretary, and.

(B) provide that all entities which perform service for consideraton on motor vehicle air conditioners, or which intend to perform such service, shall, on or after January 1, 1991, have such equipment operational and in use for any such service.

(c) DOCUMENT ON REQUIREMENTS.—Within 90 days after the date of enactment of this Act, the Secretary shall issue regulations which require that any entity described in subsection (b)(1) shall document, commencing 30 days after the date of issuance of such regulations, on a form for a period of time determined by the Secretary, provided by the Department of Commerce, the following—

(A) the number of motor vehicle air contitioners repaired or otherwise serviced by such entity,

(B) the amount of Chlorofluorocarbons (hereinafter referred to as CFC's) purchased by such entity, and

(C) the amount of CFC's sold by such entity.

(d) RESTRICTIONS ON THE SALE OF CFC'S.—(1) On or after October 1, 1989, or 30 days after the date of enactment of this Act, whichever is later, no person shall sell a Chlorofluorocarbon coolant (hereinafter referred to as a CFC coolant) in a container which contains less than 15 pounds of such coolant if such container is not marked with a warning label which indicates the danger that such CFC coolant poses to the ozone layer in the stratosphere.

(2) On or after January 1, 1991, no person shall sell or offer for sale—

(A) any CFC coolant which is suitable for use in a motor vehicle air conditioner for any use other than commercial or industrial use, and

(B) and CFC coolant that is suitable for use in a motor vehicle air conditioner in a container containing less than 15 pounds of such coolant.

(e) RESTRICTIONS ON THE SALE OF MOTOR VEHICLES WITH AIR CONDITIONERS THAT USE CFC's (1) The Administrator of the Environmental Protection Agency shall set standards limiting the percentage of motor vehicles manufactured by any single producer for sale in the United States, or export from the United States, which contain an air conditioner that uses CFC's. In establishing such standards, the Administrator shall not set a standard which requires less than the following level of performance;

(A) At least, 25% of air conditioner equipped motor vehicles produced by any manufacturer for the model year 1993 must not contain CFCs.

(B) At least, 50% of air conditioner equipped motor vehicles produced by any manufacturer for the model year 1994 must not contain CFCs.

(C) No motor vehicle with a model year of 1995 or later may be sold to a consumer or dealer in any State or Territory of the United State, or exported from the United States, if such motor vehicle contains an air conditioner that uses CFCs.

(f) Should the Administrator of the Environmental Protection Agency find that due to technological development problems this act cannot be met as enacted, he or she shall so inform the Congress and propose an alternative deadline which shall become effective if not rejected by Congress within sixty days.

SEC. 4. REPORTS.

(A) STUDY AND REPORT ON CHEMICALS THAT DEPLETE THE OZONE LAYER IN THE STRATOSPHERE.—The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall, not later than January 15, 1990, or 90 days after the enactment of this Act, whichever is later, conduct a study and issue a report to the Congress which contains the following:

(1) Any analysis of the uses, within the United States, of chemicals which deplete the ozone layer in the stratosphere.

(2) A discussion of uses, as substitutes for the chemicals described under paragraph (1) to accomplish the uses under paragraph (1), of alternative chemicals which do not deplete such ozone layer. Such discussion shall include—a discussion of the advantages and disadvantages of such alternative chemicals in terms of—

(i) the potential impact of the use of such chemicals on the ozone layer in the stratosphere, and

(ii) other potential health and environmental impacts attributable to the use of such chemicals.

(3) Opportunities for recovery and recycling of the chemicals described in paragraph (1); and

(4) Recommendations by the Administrator, based on the information described in paragraphs (1) through (3).

(b) STUDY REPORT ON RETRIEVAL, STORAGE AND REUSE OF CFC's.—The Administrator, shall, not later than January 15, 1991, conduct a study and issue a report to the appropriate committees of the House of Representatives and the Senate which contains recommendations concerning ways to accomplish the systematic retrieval, storage, and appropriate reuse of CFC's from refrigerators, air conditioners, and motor vehicles that face immediate disposal. Such report

shall consider, but shall not be limited to, the use of the following—

(A) regional removal centers for CFC's.

(B) circuit riding removal equipment for CFC's, and

(C) other appropriate removal procedures or equipment for CFC's.

(c) STUDY AND REPORT ON THE CONDITION OF THE STRATOSPHERE.—The Administrator shall, not later than January 15, 1992, conduct a study and issue a report to the Congress. Such report shall contain the following:

(1) An assessment of the condition of the ozone layer in the stratosphere and the most current information concerning the causes of such condition.

(2) An assessment of the development and completion of production of motor vehicles which employ air conditioners that use refrigerants other than CFC's by manufacturers of motor vehicles in the United States.

(3) Recommendations by the Administrator concerning the assessments under paragraphs (1) and (2).

SEC. 5. PUBLIC INFORMATION.

The Secretary and the Administrator shall consult with the following to publicize the provisions of this Act:

(1) Motor vehicle dealers.

(2) Business organizations related to the sales and use of motor vehicles.

(3) Other entities that the Secretary or the Administrator determines to be appropriate.

SEC. 6. DEFINITION.

As used in this Act, the term "motor vehicle" has the meaning given for such term under section 1(3) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1381(3)).

By Mr. RIEGLE (for himself, Mr. BRADLEY, Mr. MATSUNAGA, Mr. PRYOR, Mr. SIMON, Mr. DASCHLE, Mr. DURENBERGER, and Mr. ROCKEFELLER):

S. 1053. A bill to amend title V of the Social Security Act to provide for supplemental resources to enhance the delivery of health services to pregnant women and infants; to the Committee on Finance.

TITLE V INFANT MORTALITY REDUCTION ACT

● Mr. RIEGLE. Mr. President, as chairman of the Finance Subcommittee on Health for Families and the Uninsured, I am reintroducing, with Senators BRADLEY, MATSUNAGA, PRYOR, SIMON, DASCHLE, DURENBERGER, and ROCKEFELLER, a bill to amend title V of the Social Security Act, the Maternal and Child Health [MCH] Services Block Grant Program. S. 1053, the title V Infant Mortality Reduction Act, provides supplemental funds to the block grant and improves planning and accountability in the program. I am pleased to be joined by my colleagues, each a leader in improving access to health care in this country.

A strong bipartisan consensus has emerged in this Congress to expand and improve access to health care for low-income pregnant women, infants, and children. I recently introduced S. 949, the Medicaid Children's Health Improvement Act of 1989, to improve children's access to health care under the Medicaid Program. In addition to Medicaid, my subcommittee also has jurisdiction over the title V maternal and child health services block grant. Improvements for title V MCH services block grant would help provide access to basic health care for the most needy members of our society.

Mr. President, after 25 years of progress, U.S. efforts to reduce infant mortality have slowed. In fact, the United States ties for the worst infant mortality rate among industrialized countries. Overall, the United States has far to go but some regions face even greater problems. Michigan has an infant mortality rate of 10.9—deaths per 1,000 live births—compared to 10 for the Nation, but Detroit has a rate of 20.4, about 2 times the rate of the Nation. Detroit's infant mortality rate exceeds the rate in many Third World nations; countries which often provide only rudimentary health care.

Furthermore, racial disparaties within regions persist. The infant mortality rate for blacks in Detroit is 23.8, while the rate for whites is 9. Clearly, funds are needed for States to target these areas of great need.

The maternal and child health [MCH] block grant provides funds to States to promote the health of mothers and children. Among other purposes, funds are used to directly provide services or for program coordination, technical assistance, and program development including support for physical facilities and staff. Funds can also be targeted to specific health problems or geographic needs.

As is typical under a block grant program, the MCH block grant does not specify or require minimum services, eligibility or other measures of accountability with the funds. States must submit an annual report to the Department of Health and Human Services on their activities under the block grant, but the Department has not required the collection of data. These two facts combined have often inhibited planning and evaluation for improved maternity services because of the limited information on who receives services under the block grant and what types of services are delivered.

Mr. President, my proposal provides for more structured planning for maternity and infant care programs, yet still allows flexibility for States in designing their MCH programs. The proposal would enhance the ability of States to identify and serve areas of greatest need for pregnant women and infants. This is important for States like Michigan that still have areas of high infant mortality which we need to address.

This legislation increases title V MCH services block grant authorization by $100 million to provide for funds to supplement existing maternal and infant health care programs. To receive the supplemental funds, States must identify areas of unmet need in prenatal care and prevention of low birthweight and infant mortality, and develop a plan of action to address the needs. In addition, improved reporting requirements, similar to those as in existing law, are specified so as to monitor how well the objectives of the program are being met.

Mr. President, this proposal has the support of key national organizations representing women, infants, and children including the Children's Defense Fund, Association of Maternal and Child Health Programs, and Association of State and Territorial Health Officers. The proposal also has the support of the Michigan Council for Maternal and Child Health, a statewide network of individuals and organizations concerned with maternal and child health issues.

Improvements in Medicaid coverage for pregnant women and infants can finance care only where providers are available. The State MCH block grant programs are essential providers of maternity and infant care.

Until we address the problems of providing comprehensive health insurance for all Americans, efforts that focus on improving the current delivery of maternity and infant care in the United States are critical. As chairman of the Subcommittee on Health for Families and the Uninsured, I will be working with other members of the Finance Committee to develop a comprehensive proposal to guarantee universal access to health insurance for 37 million Americans who lack coverage.

I look forward to working with others on the Finance Committee, particularly the chairman, on enacting needed changes in the title V MCH services block grant and Medicaid programs for pregnant women, infants and children. I hope my colleagues will join us in support of this crucial improvement of the title V MCH services block grant.

Mr. President, I ask unanimous consent that a short summary and the text of S. 1053 be included in the RECORD following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1053

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Title V Infant Mortality Reduction Act of 1989."

SEC. 2. INCREASE IN AUTHORIZATION FOR SUPPLEMENTAL RESOURCES TO ENHANCE THE DELIVERY OF HEALTH SERVICES TO PREGNANT WOMEN AND INFANTS.

(a) IN GENERAL.—Paragraph (4) of section 501(a) of the Social Security Act (42 U.S.C. 701(a)(4)) is amended by striking "$561,000,000" and inserting in lieu thereof "$661,000,000".

(b) ALLOCATION AND REQUIREMENTS RELATED TO USE OF FUNDS UNDER NEW PROGRAM.—
(1) Section 502 of such Act (42 U.S.C. 702) is amended—
(A) by redesignating subsection (d) as subsection (e); and
(B) by inserting after subsection (c) the following new subsection:
"(d)(1) Of the amounts appropriated for a fiscal year in excess of $561,000,000, the Secretary shall—
"(A) retain an amount equal to 15 percent of such amounts in the same manner as the amounts retained in subsection (a); and
"(B) allot an amount equal to 85 percent of such amounts in the same manner and for the same purposes as the amounts allotted under subsection (b).
"(2) The amount retained by the Secretary under paragraph (1)(A) shall be used for carrying out (through grants, contracts, or otherwise) the purpose of section 501(a)(4).
"(3) As a condition of receipt of the amount allotted under paragraph (1)(B), a State shall provide in such State's description of intended expenditures and statement of assurances under section 505—
"(A) a statewide needs assessment (as described in section 505(1)(F)) on maternity and infant care;
"(B) a plan for meeting the needs identified by the assessment;
"(C) a description of how the funds received will be utilized for the coordination and direct provision of services under the plan; and
"(D) an assurance that amounts expended pursuant to this paragraph shall be in addition to any amounts that would have been expended from State funds for programs (including programs under this title) as in effect on the day before the date of enactment of this Act.".
(3) Section 505(1) of such Act (42 U.S.C. 705(1)) is amended—
(A) by striking "and (D)" and inserting in lieu thereof "(D)"; and
(B) by striking "such payments" and inserting in lieu thereof "such payments, and (E) a statewide needs assessment as described in section 502(d)(3) identifying unmet maternity and infant care needs including prenatal care and prevention of low birthweight and infant mortality".
(c) ANNUAL REPORTS.—Section 506(a)(1) of such Act (42 U.S.C. 706(a)(1)) is amended by inserting before the last sentence the following new sentence: "States must submit annual reports describing the extent to which funds met the objectives of the plan provided for under 502(d)(3), such reports shall fully describe the services provided, including the number of individuals served under this title and the characteristics of such individuals served, as well as statewide statistics related to the percentage of pregnant women who by the third trimester have been provided prenatal care and statistics related to the birthweight distribution and health status of infants.".
(d) CONFORMING AMENDMENT.—Paragraphs (1), (2)(A), and (3) of section 502(c) of such Act (42 U.S.C. 702(c)) are amended by striking "$478,000,000 each place it appears and inserting in lieu thereof "$478,000,000, but not in excess of $561,000,000".
(e) EFFECTIVE DATE.—The amendments made by this section shall become effective with respect to services delivered six months after the date of enactment of this Act.

SUMMARY OF S. 1053, THE TITLE V INFANT MORALITY REDUCTION ACT

1. Purpose of the Initiative.
To provide states with supplemental resources to enhance the delivery of health services to pregnant women and infants.
2. Availability of Supplemental Funds.
The Title V authorization would be increased by $100 million from $561 to $661 million to provide for funds to supplement existing maternal and infant health care programs. As under the general block grant, 85 percent of funds would go directly to State Health Agencies and 15 percent of the funds would be retained by the Secretary as provided for under 501(a)(4). States will receive funds according to the current MCH Block Grant allocation formula and will be expected to comply with the existing Federal-State matching rate.
3. Statewide Maternity and Infant Care Needs Assessment.
As condition for receipt of supplemental funds, States must submit a special section of their Report of Intended Expenditures which primarily includes:
A statewide needs assessment on maternity and infant care which identifies unmet needs with emphasis on prenatal care and prevention of low birthweight and infant mortality; and
A plan for meeting the needs identified by the assessment.
The funds are to be used in implementing the plan, for the coordination or direct provision of services. The funds are not intended to supplant funds for already existing Title V and non-Title V maternal and child health programs.
4. Improved Reporting Requirements.
In addition to the Report of Intended Expenditures, states must also submit annual reports describing the extent to which funds met the objectives of the plan. These reports must include at least a description of the services provided, the number of individuals served, and the characteristics of the population served as well as statewide statistics related to the percentage of pregnant women by the trimester they initiated prenatal care and the birthweight distribution and health outcomes of the infants.●

● Mr. SIMON. Mr. President, today I join Senator RIEGLE and several of our colleagues in introducing a bill to increase funding for the Maternal and Child Health Services Block Grant. We are proposing a $100 million supplement for existing maternal and infant health care programs.

For over 50 years, the maternal and child health programs have assured basic health services for low income women and children, and services to children with special health care needs. State programs monitor, and coordinate the quality of maternal and child health services statewide. They provide pre- and post-natal care, immunizations, treatment for minor illnesses, diagnostic testing, corrective surgery, and physical therapy.

These programs are a vital source of care to many infants and their mothers, and are effective in reducing infant mortality and low birth weight. Low birth weight is a leading cause of infant death and often contributes to life long disabling conditions and developmental problems.

In 1984, more than 9 million women of childbearing age had no health insurance. Another 5 million had insurance but lacked coverage for maternity care and services. In 1986, 12 million children, nearly 1 out 5, were not covered by private or public health insurance. Fifty percent of our Nation's poor children were not reached by Medicaid that year.

Clearly there is a need to expand publicly financed health programs for mothers and children. These programs are both effective and cost effective. A dollar spent on prenatal care can save lives and money over the long run. I hope my colleagues will join us in supporting this $100 million increase in the authorization level for the Maternal and Child Health Services Block Grant.●

By Mr. MATSUNAGA:

S. 1055. A bill to amend the Internal Revenue Code of 1986 to exempt retired public safety officers from the early withdrawal tax on pension distributions; to the Committee on Finance.

EXEMPTION FROM EARLY WITHDRAWAL TAX FOR RETIRED PUBLIC SAFETY OFFICERS

Mr. MATSUNAGA. Mr. President, today I am introducing legislation to exempt law enforcement personnel and other public safety employees from the penalty tax on early pension distributions.

Mr. President, the Tax Reform Act of 1986 imposed a 10-percent penalty tax on early distributions from any qualified retirement plan. For purposes of this penalty tax, an early distribution is defined as a distribution made to an employee before the age of 55. Unfortunately, little or no consideration was given to the fact that many State and municipal retirement systems allow or require public safety employees such as law enforcement officers, firefighters, rescue workers and correctional personnel to retire before the age of 55. In addition, certain Federal public safety employees are permitted or requested to retire before age 55.

Mr. President, public safety employees who are allowed or in fact required to retire before age 55 are unfairly affected by the 10-percent early distribution penalty tax. These individuals can face the situation of mandated retirement from an essential public service while only having access to retirement distributions subject to a penalty tax. In such instances, this penalty tax runs counter to the policy of encouraging or mandating early retirement in these special occupations.

Mr. President, the legislation I am proposing today will exempt public safety employees from this 10-percent penalty tax on early distributions from qualified retirement plans. I believe that it is inequitable to apply the penalty tax on early distributions to

public safety employees who are permitted or required to retire before the age of 55. I urge my colleagues to join me in cosponsoring this legislation which seeks to restore plain justice for a well-deserving, highly essential group of public employees who, due to the nature of their profession, place their very lives at risk for the safety of all Americans.

By Mr. COATS (for himself, Mr. BURNS, and Mr. GORTON):

S. 1056. A bill to establish programs to strengthen America's families, and for other purposes; to the Committee on Finance.

AMERICAN FAMILY ACT

Mr. COATS. Mr. President, for the past few decades, the American family has been crippled by the destructive backfire of our best intentions. Program after program, patterned after the very latest in trendy social theory, have left our families far worse than they found them. And in the face of every failure the cry has arisen, "put more money in the hands of Federal bureacrats and social planners."

The time has come to retire these exhausted notions and create a comprehensive policy to strengthen our families—those vital shelters for civilized standards. What is required is a new agenda for the American family—a rational framework for thoughtful activism.

This is exactly what the American Family Act accomplishes—a package of 26 innovative bills targeted at some of our most pressing social needs. Its provision cluster around educational reform, family support, "at risk" children, and families in need. It addresses the problem of gangs, expands parental choice, encourages diversity, targets the needy, and recognizes that the essentials of civility and patriotism are as important as the essentials of math and literature.

While it is true that these proposals are innovative, they are not hasty experiments bred of impatience or despair. They are, instead, confident reforms, rooted in tested principles of choice and excellence. They set a new course. But the direction is really a return to ideas we should never have forgotten in the first place.

By Mr. COATS (for himself, Mr. DOLE, Mr. BOSCHWITZ, Mr. SYMMS, Mr. WARNER, Mr. MCCAIN, Mr. MACK, Mr. LOTT, Mr. HELMS, Mr. BOND, Mr. GRAMM, Mr. WILSON, Mr. MCCLURE, Mr. D'AMATO, Mr. ARMSTRONG, Mr. BOREN, and Mr. HUMPHREY):

S. 1057. A bill to insure that there is a democratically elected government in Panama before the Senate gives its advice and consent to the nomination of the new Administrator of the Panama Canal Commission; to the Committee on Armed Services.

PANAMANIAN CERTIFICATION

Mr. COATS. Mr. President, Winston Churchill once observed that an exhibition of political brutality is sometimes so disturbing that "the spectators leave their comfortable seats and hasten to the work of rescue and retribution." I am convinced we are seeing just this type of exhibition in Panama—a spectacle of violence and deception, born of boundless hubris and sustained by criminal corruption.

Manuel Noriega has made it painfully obvious that he respects neither international opinion nor his own people. His actions comprise a lengthening litany of betrayal—aimed both at that unfortunate nation and our own Nation as well.

He has turned the recent Panamanian election into a sham—invalidating its results when it was clear his handpicked candidate lost by a margin of 3 to 1. A vote is the most powerful instrument and sacred right of free men, and a majority of votes is the final expression of national will and governmental legitimacy. When Noriega violated that trust, he committed a crime against democratic hope. Wielding the blunt instruments of depraved ambition, he stands as a single man against an entire nation.

But Noriega, not content merely with fraud, plunged headlong into brutality. Noriega-controlled mobs, given the Orwellian title of "dignity battalions" and armed with metal pipes, rubber hoses and nail-studded two-by-fours, commenced with attacks on opposition supporters. Presidential candidate Endara was given a 6-inch gash on the head. Opposition Vice-Presidential candidate Ford was beaten bloody in front of news cameras before being taken into custody.

All this was shocking for its crassness. But, given Noriega's history, none of it should really have surprised. The Panamanian defense forces he leads have made American troops and their dependents constant targets of harassment. The Pentagon reports 670 such major incidents in the past 14 months—including beatings, rapes, and murder threats.

And we cannot forget that Panama continues to be a principle money-laundering center for the South American cocaine trade, as well as a transit site for drugs. It has become a haven for dealers that trade their death to our children under the protection—and with the cooperation—of General Noriega. And Noriega himself remains under indictment by two U.S. grand juries for illicit drug trafficking.

There is no mistaking the grim, relentless descent into oppression we have witnessed in Panama. For we have seen it before. We have seen that type of blatant fraud which is the only way for the corrupt to simulate legitimacy. We have seen that sort of brutal violence which is the only shield for petty and vicious despots. Manuel Noriega has broken every remaining tie of good faith and wrapped a brutal reality in a gauze of unconvincing lies. He has shown himself empty of those sympathies that define the boundaries of civilized conduct.

Noriega's Panama today shares both the methods and friendship of Cuba and Nicaragua. Its leader has taken the mantel of Castro and Ortega. He has managed to earn membership in that select company of the contemptible.

There can be no excuse for complacenecy when the pained cries of that battered nation are so distinct and so insistent.

But in Panama we face something more than tragedy and betrayal. We face complex issues of strategic importance. For in just a few months we will confront the prospect of turning over control of the Panama Canal Commission to a Panamanian administrator, nominated by that nation's President. In January, 1990 we are scheduled by treaty to proceed with this next step in Panama's assumption of authority.

It is not too difficult to predict the public reaction to this scheduled transition. We Americans have little tolerance for tyrants. We have even less when they threaten our interests. The prospect of any diplomatic dealings with Noriega, on any issue, at any level will provoke outrage—pressed down and shaken together. And we will witness a drumfire of demands to scuttle the Panama Canal Treaties in their entirety.

The Senate has already given its approval to treaties. That was a controversy which was fought and decided, whether we like the results or not. Now we must seek some option that satisfies both American interests and American sensibilities. We must find an alternative that does not discredit our commitments or sacrifice our principles. So today, I am offering legislation outlining an approach I believe will meet these challenges.

The idea is really quite simple. I have proposed that no new Canal Administrator be appointed unless and until the President of the United States certifies to Congress that the Panamanian Government is elected according to the procedures of its own constitution and is in control of the Panamanian defense forces. In other words, the Canal Administrator must be selected by a legitimate government, and not Noriega's drug dictatorship. And until that condition is met, the Congress pledges to withhold its consent.

Before my distinguished colleagues begin their scrutiny, let us be clear about one thing. This proposal—embodied in my bill and called for in a

sense of the Senate resolution I hope to introduce later this week—is not a change of any sort in the Panama Canal Treaties, much less an abrogation of those treaties. It deals only with American Law—The United States Code—not provisions that have been negotiated with any foreign nation. It is simply an instrument for the expression of congressional resolve—a method to ensure that our message is not mistaken.

To Noriega it promises serious and unrelenting resistance to his illegitimate rule and illusory authority. It asserts that the nonnegotiable precondition for the normal and orderly transition of control over the canal is, quite simply, his absence.

To the democratically elected Government of Panama, it pledges the recognition of its legitimacy—rooted in the Panamanian popular will. It is only when they pick the Canal Administrator that he will be recognized. It is only when that official has their support that he will have our support as well.

I can already imagine certain objections to this legislation. Some will argue it is inconsistent with our principles because it goes back on our diplomatic word. Others will contend that it would actually threaten our interests by offending Panamanian national pride and solidifying Noriega's support. But with all due respect, I believe these objections are misplaced.

This proposal cannot possibly be construed as a violation of our word—a betrayal of principle. It simply outlines the conditions for our consent—consent it is our right to grant or reserve according to whatever criteria we choose. But this question of principle deserves further attention. For it seems to me that it is a decision of principle and integrity to deal with a legitimate government rather than some brutal pretender. It is an act of fidelity to our highest ideals to resist any concession of legitimacy to Noriega and his lawless confederates.

It is, additionally, difficult for me to imagine how this proposal might offend Panamanian pride and thereby strengthen Noriega's support. Our action would simply be a recognition of actions taken by the people of Panama less than 2 weeks ago. We are simply saying we'll only deal with the Government they just elected. It seems to me that ignoring their democratic choice would be more likely to embitter than pacify. And respecting that choice, I believe, would only invite their respect.

We have witnessed the spectacle of Manuel Noriega's brutalization of Panamanian democracy. We have seen the arrogant abuse of our soldiers and citizens. We have watched with helpless anger while a drug-running dictator has padded his pockets through our children's addiction. And now it is time to leave our comfortable seats and hasten to the work of rescue and retribution. We cannot obey the council of timidity and inaction when we have options that could make a difference. And those options, it seems to me, are clear.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1057

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, 22 U.S.C. 3613 is amended by adding before the period the following:

"; *provided,* That no Administrator may be appointed to fill a new term unless and until the President certifies to Congress that the ruling government of Panama is democratically elected according to procedures specified in the Constitution of Panama providing for a civilian government in control of all Panamanian military and paramilitary forces.".

Mr. DOLE. Mr. President, I am pleased to join Senator COATS in sponsoring this legislation; and I commend him for taking this worthwhile initiative on an issue that is as pressing as any national security matter on our agenda.

Some things can't be said too often, or too strongly. Noriega must go.

We have said so—both the President and the Congress. The OAS has virtually said so. By far most importantly, the people of Panama have said so—even in the face of the mass rigging of the recent election.

We will work to the fullest extent possible with the people of Panama and the nations of this hemisphere, to restore democracy to Panama.

And, as that process goes forward, we will insure—unilaterally, if necessary—that vital American interests in and around Panama are protected.

One such interest, clearly, is the free and unfettered operation of the Panama Canal. The Coats legislation makes the right, and the inevitable, connection between our problems with Noriega, and the issue of the canal.

Senator COATS has crafted two companion pieces of legislation—one expressing the sense of the Senate, which Senator COATS intends to move at the earliest possible moment; the other which establishes a mandated course of action, which we are introducing today. Both deal with the same matter: The next step in the process of turning over control of the canal to Panamanian authority.

That next step is due to be taken January 1, 1990. It entails the nomination of a new, Panamanian national administrator for the Canal, to replace the current, American national administrator. An additional effect of that move would be to change a current 5-to-4 American majority on the Commission, into a 5-to-4 Panamanian majority.

The Coats legislation says simply: The United States cannot assent to those changes until there is a democratically elected government in power in Panama, exercising full authority over the Panamanian military. In other words, until Noriega goes.

The sense of the Senate version says we should not assent; the binding version says we will not.

In fact, we have the leverage, here in the Senate, to back up these statements of intent under the implementing legislation for the canal treaties, the new administrator—even in the extremely unlikely event a Noriega-appointed administrator would be acceptable to our administration—must be accorded the advice and consent of the Senate before assuming his office.

As Senator COATS has made clear, this action would not constitute an abrogation of the canal treaties. We will not refuse to fulfill our obligations under the treaty. We will simply declare our intent to move to actually fulfill those obligations only under the circumstances of democratic rule which are essential to the security and stable operation of the canal by Panamanian authority.

Eleven years ago, during the canal treaties debate, I stood here in the Senate and said the following:

> The credibility and personal integrity [of Panama's leaders] will bear upon their reliability as Panama's guarantors of the new treaties.

My guess is that, were all of my colleagues here today, I could get from them a nearly unanimous "amen."

What I feared then has happened. We are moving to turn over the canal to a dictator, a drug pusher, and a money launderer.

I won't have it. And I don't think the Senate will have it.

It is time to turn the green light to amber; and to get ready to go red, unless things change in Panama.

In closing, let me again commend the junior Senator from Indiana, and urge swift and favorable Senate action of both these important pieces of legislation.

By Mr. BINGAMAN:

S. 1058. A bill requiring the use by the Federal Government of certain vehicles capable of operating on alcohol or natural gas fuels or on electricity in areas not in compliance with the Clean Air Act, and for other purposes; to the Committee on Governmental Affairs.

CLEAN AIR FUEL CONVERSION ACT

● Mr. BINGAMAN. Mr. President, I rise today to introduce the Clean Air Fuel Conversion Act, which requires the Federal Government to take the lead in the search for an effective so-

lution to one of our major sources of air pollution—vehicle emissions.

There are three important reasons for introducing this legislation today. First, there is the desire to reduce our steadily growing dependence on foreign sources of crude oil. Increased use of alternative fuels helps us reduce that dependence. Second, we can reduce farm subsidies by creating a market for alcohol fuels from agricultural products. And finally, there is the growing problem of rising levels of carbon monoxide and ozone that clearly threaten public health and safety.

Far more cities are out of compliance with EPA standards for carbon monoxide and ozone than any other pollutants. Gradually converting vehicles from gasoline to cleaner burning fuels offers one of the least intrusive means of lowering these levels and achieving healthy air.

Reducing air pollution is important to my constituents in New Mexico. The city of Albuquerque and Bernalillo County had sanctions imposed in 1987 for noncompliance with National Ambient Air Quality standards for carbon monoxide. Those sanctions were lifted last year after the city implemented a vehicle inspection and maintenance program. But such sanctions cause economic hardship to the State and local government entities in nonattainment areas. More importantly, the health of citizens residing and working in the Albuquerque metropolitan area may have been compromised over the years by continued carbon monoxide pollution.

Aggressive action and coordination by the Albuquerque City Administration, the Albuquerque City Council, the Bernalillo County Commission, environmental organizations, the business community, and civic groups produced a coordinated strategy to combat air pollution and improve air quality.

Evidence of that cooperation will be evident next week in New Mexico, during the clean air summit and clean air week. On May 25, the Senate Energy Committee's Subcommittee on Mineral Resources Production and Development, which I chair, will conduct a hearing in Albuquerque on the relationship between alternative fuels and clean air. In addition, the clean air summit will feature informational seminars and a review of recommendations by a distinguished panel of scientists in New Mexico, the Technical Advisory Group [TAG], on a strategy for a comprehensive approach to New Mexico's air quality problems.

The public and private efforts to maintain air quality and meet environmental standards are making New Mexico a leader among the States in setting a new pace toward clean air.

The legislation I introduce today will gradually convert portions of the vast Federal fleet of vehicles from gasoline to cleaner burning fuels, such as methanol, ethanol, natural gas, or electricity. Fueling vehicles with these alternatives can dramatically reduce emissions of both carbon monoxide and the hydrocarbons that contribute to our ozone and particulates problem. The current high levels of the pollutants in our nonattainment areas are a serious threat to public health and the environment.

My legislation will require Federal fleets operated in serious or severe nonattainment areas to convert to vehicles running on cleaner, alternative fuels at a rate of at least 10 percent of the fleet a year, starting in 1993.

The bill also should increase the availability and use of alternative fuels and technologies, and encourage American auto manufacturers to step up their production of alternative fueled vehicles.

This legislation creates a guaranteed market with Government fleets that should stimulate the automotive industry to develop and produce cleaner cars.

The legislation is an important step in dealing with our air pollution problem, an issue that should concern us all and a problem we must address. I believe this bill begins to attack the problem. I urge my colleagues to support it.

Mr. President, I ask unanimous consent that the text of the bill be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1058

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REQUIRED USE IN NONATTAINMENT AREAS.

(a) IN GENERAL.—With respect to any fleet of passenger automobiles and light-duty trucks owned or leased for more than 60 days by the United States for operation in an area designated under the Clean Air Act as an area of serious or severe health endangerment for ozone or carbon monoxide, or both, no less than—

(1) 10 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1993;

(2) 20 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1994;

(3) 30 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1995;

(4) 40 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1996;

(5) 50 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1997;

(6) 60 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1998;

(7) 70 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 1999;

(8) 80 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 2000;

(9) 90 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 2001; and

(10) 100 percent of the vehicles of such fleet to be used in such area shall be alternative fuel vehicles after September 30, 2002.

(b) REQUIRED OPERATION.—The Administrator of the General Services Administration and the Secretary of Defense, with the concurrence of the Secretary of Energy shall, before October 1, 1992, issue regulations to ensure that a vehicle acquired pursuant to subsection (a)—

(1) shall be supplied with alcohol, natural gas, or other gaseous hydrocarbons (for example, propane), or electricity, as appropriate, in its primary area of operation, using commercially available fueling facilities to the maximum extent practicable; and

(2) shall be operated exclusively on such fuel except when operated so as to make it impracticable to obtain such fuel.

(c) CONSIDERATION.—(1) Funds appropriated for carrying out this Act shall be applied on a priority basis, for expenditure first in areas of the United States which the Administrator of the Environmental Protection Agency determines have the most severe air pollution problems.

(2) A Federal officer or agency responsible for deciding which types of alternative fuel vehicles to acquire in order to comply with subsection (a) shall consider as a factor in such decision which types of vehicles yield the greatest reduction in pollutants emitted per dollar spent.

(d) CONSULTATION.—A Federal officer or agent responsible for deciding which types of alternative fuel vehicles to acquire in order to comply with subsection (a) shall, on an expedited and informal basis, consult with the Environmental Protection Agency and with the lead State or local agency charged with air quality planning for the area in which the vehicles will be operated. The purpose of such consultation shall be to obtain relevant information—

(1) with respect to considerations under subsection (c)(2); and

(2) to facilitate the coordination of this Act with other Federal, State, and local programs, such as any plans by a State to install alternative fuel pumps near a location where vehicles acquired under subsection (a) will be operated.

(e) AVAILABILITY TO THE PUBLIC.—At Federal facilities where vehicles acquired under subsection (a) are supplied with alcohol or natural gas or other gaseous hydrocarbons, such fuel shall be offered for sale to the public for use in other vehicles, unless—

(1) such fuel is commercially available for vehicles in the vicinity of such Federal facilities; or

(2) security considerations prevent the offering for sale of such fuel at such facility.

(f) COST OF VEHICLES TO FEDERAL AGENCY.—(1) Funds appropriated under this Act for the acquisition of vehicles under subsection (a) shall be applicable only—

(A) to the portion of the cost of vehicles acquired under subsection (a) which exceeds the cost of comparable conventional fueled vehicles;

(B) to the portion of the costs of fuel storage and dispensing equipment attributable to such vehicles which exceeds the costs for such purposes required for conventional fuel vehicles; and

(C) to the portion of the costs of operating and maintaining such vehicles which exceeds the costs for such purposes required for comparable conventional fueled vehicles.

(2) The Secretary of Energy shall ensure that the cost to any Federal agency receiving vehicle under subsection (a) shall not exceed the cost to such agency of a comparable conventional fueled vehicle.

(g) EXEMPTION.—The incremental cost of vehicles acquired under subsection (a) over the cost of comparable conventional fueled vehicles shall not be applied to any calculation with respect to a limitation under law on the maximum cost of individual vehicles which may be acquired by the United States.

(h) FLEET AVERAGE FUEL ECONOMY.—In any calculation of the average fuel economy of the fleet of passenger automobiles acquired in a fiscal year by the United States, vehicles acquired under subsection (a) shall be measured in terms of miles per Btu or per kilowatt hour, as appropriate.

(i) STUDIES.—Vehicles acquired under subsection (a) may be included in any Federal Government study of the environmental effects or military applications of vehicles operated on natural gas or other gaseous hydrocarbons, alcohol fuels, or electricity.

SEC. 2. OPERATION OF OTHER FEDERAL VEHICLES.

A gasoline powered vehicle operated in an area designated under the Clean Air Act as a nonattainment area for carbon monoxide which is not a dual energy vehicle or a natural gas dual energy vehicle shall, on and after the expiration of the 90-day period following the date of the enactment into law of this section, be supplied with fuel which blends oxygenates with gasoline at its primary fueling facility. Such vehicle shall be operated exclusively on such fuel except when operated—

(1) so as to make it impracticable to obtain such fuel; or

(2) in an area during any month in which such area is a nonattainment area for ozone under the Clean Air Act, unless the Administrator determines that the use of blended fuel in those months would improve air quality.

SEC. 3. EXEMPTIONS.

The requirements of section 1(a) of this Act shall not apply to vehicles—

(1) being operated as an experiment in the use of alternative fuels other than alcohol, natural gas or other gaseous hydrocarbons, or electricity; or

(2) with respect to which the Secretary of Defense has claimed an exemption based on national security considerations.

SEC. 4. INSTALLATION OF UNDERGROUND FUEL STORAGE EQUIPMENT.

(a) REQUIREMENT.—Any underground storage tank, along with all associated underground piping or underground equipment, installed or replaced at a designated Federal facility after July 1, 1990, shall be capable of safely storing alcohol.

(b) DEFINITION.—For purposes of this section, the term "designated Federal facility" means any Federal facility where passenger automobiles or light-duty trucks owned or leased by the Federal Government are supplied with fuel, if such facility is an area designated under the Clean Air Act as an area of serious or sever health endangerment for ozone or carbon monoxide.

SEC. 5. AIR QUALITY AND HEALTH STUDY.

(a) COMPREHENSIVE ANALYSIS.—The Administrator, in cooperation with the Department of Energy National Laboratories, shall prepare a comprehensive analysis with respect to the air pollutant emission, air quality impact, and human health risks, including toxicity to consumers at self-service fuel pumps, associated with the storage, distribution, and use of significant amounts of alcohols or natural gas or other gaseous hydrocarbons as transportation fuels as compared to diesel and gasoline fuels. The Administrator shall include an analysis of the usefulness of alcohols, natural gas or other gaseous hydrocarbons, and electricity as substitute transportation fuels to assist areas of the United States in attaining national ambient air quality standards prescribed under section 109 of the Clean Air Act.

(b) REPORT.—The Administrator shall, before October 1, 1992, submit a report to the Congress detailing the results of the comprehensive analysis prepared under subsection (a).

(c) FUNDING.—There are authorized to be appropriated to carry out the purposes of this section $975,000 for the fiscal year ending September 30, 1991.

SEC. 6. DEFINITIONS AND CRITERIA.

(a) DEFINITIONS.—For purposes of this Act—

(1) the term "acquired" means purchased or leased for a period of 60 days or more;

(2) the term "Administrator" means the Administrator of the Environmental Protection Agency;

(3) the term "alcohol" means a mixture containing 85 percent or more methanol, ethanol, or other alcohols by volume;

(4) the term "alternative fuel vehicle" means a dual energy vehicle, a natural gas dual energy vehicle, a dedicated alcohol vehicle, a dedicated natural gas vehicle, or an electric vehicle;

(5) the term "dedicated alcohol vehicle" means a vehicle designed to operate exclusively on alcohol;

(6) the term "dedicated natural gas vehicle" means a vehicle designed to operate exclusively on natural gas or other gaseous hydrocarbons;

(7) the term "dual energy vehicle" means a vehicle which—

(A) is capable of operating on alcohol and on conventional fuel;

(B) provides equal or superior energy efficiency, as calculated during fuel economy testing for the Federal Government, while operating on alcohol as it does while operating on conventional fuel; and

(C) meets the criteria set forth in subsection (b);

(8) the term "electric vehicle" means any vehicle capable of operating exclusively on energy derived from a source of electricity, including batteries capable of being charged by electric current, solar energy, and any other source of electricity;

(9) the term "natural gas dual energy vehicle" means a vehicle which—

(A) is capable of operating on natural gas or other gaseous hydrocarbons and on conventional fuel;

(B) provides equal or superior energy efficiency, as calculated during fuel economy testing by the Federal Government, while operating on natural gas or other gaseous hydrocarbons as it does while operating on conventional fuel; and

(C) meets the criteria set forth in subsection (b); and

(10) the term "vicinity" means an area the Secretary of Energy determines to be the area a commercial supplier of alcohol or natural gas or other gaseous hydrocarbon fuels would reasonably expect to serve.

(b) CRITERIA FOR VEHICLES.—No vehicle shall be considered an alternative fuel vehicle under this section unless the vehicle meets each of the following criteria:

(1) The emission rates for air pollutants, designated by the Administrator, emitted from such vehicle are less than those for comparable vehicles which do not use such alternate fuels.

(2) The vehicle emits formaldehyde at a level no greater than that which the Administrator determines to be appropriate for the protection of the public health.

SEC. 7. FUNDING.

There are authorized to be appropriated for the fiscal year ending September 30, 1993, $10,000,000; for the fiscal year ending September 30, 1994, $7,000,000; for the fiscal year ending September 30, 1995, $7,000,000; and for the fiscal year ending September 30, 1996, $5,000,000, to carry out the purposes of this Act except for the study under section 5. The authority of the Secretary to obligate amounts authorized under this Act shall be effective for any fiscal year only to the extent provided in advance by appropriation Acts.●

By Mr. HATFIELD:

S. 1059. a bill to amend and enhance existing renewable energy programs and Federal trade and export promotion programs in order to promote the United States renewable energy industry, improve the trade balance of the United States, and maintain the competitive and technical leadership of the United States in renewable energy development and trade; to the Committee on Energy and Natural Resources.

RENEWABLE ENERGY TRADE EQUITY AND PROMOTION ACT OF 1989

● Mr. HATFIELD. Mr. President, today I am reintroducing the Renewable Energy Trade Equity and Promotion Act. As some of my colleagues may recall, during the 98th Congress, I introduced legislation which established an interagency board, the Committee on Renewable Energy Commerce and Trade [CORECT]. That act, Public Law 98-370, sought to coordinate U.S. export programs and develop a unified Government approach on renewable energy exports.

Let me report that CORECT has become a visible and successful advocate of U.S. renewable energy exports. Due in part to CORECT's efforts, U.S. renewable energy export sales reached $250 million in 1987—three times the total for 1984 when CORECT was initiated.

The bill that I am introducing today is designed to build on this success. Its provisions utilize existing U.S. programs without requiring New Federal outlays by redirecting certain agency activities. The goals are to strengthen U.S. energy security, increase employment, decrease our trade deficit, maintain U.S. competitiveness, and protect our world's environment. While these may appear to be "pie in the sky" ideals, we can and should be making progress toward them. The means to help achieve them are well known: increased utilization of organic feedstocks and wastes, geothermal resources, water and wind power, and solar thermal and photovoltaic energy. However, we cannot achieve those

goals unless we enhance the alternative energy industry's ability to commercialize their products. That is the underlying purpose of the legislation which I am introducing.

The bill provides for the following:

First, require the U.S. Trade Representative to report to Congress on the extent other countries impose protective tariffs of other restrictions on U.S. energy products or services;

Second, reestablish the feasibility program of the Overseas Private Investment Corporation which provides incentives, grants, and studies for small renewable energy businesses to help them market overseas;

Third, direct both the Export/Import Bank and the Small Business Administration to set goals of awarding at least 5 percent of their energy industry export funding to renewable energy projects, and both entities to report annually on their renewable energy expenditures;

Fourth, call for information exchanges and training to help link U.S. producers with assistance programs and potential foreign customers;

Fifth, broaden the mission of the CORECT Board and authorizes $2.5 million for fiscal year 1990 to encourage renewable energy marketing overseas;

Sixth, instruct international financing agencies receiving U.S. support, such as the World Bank, to promote renewable energy projects; and

Seventh, allow the Department of Defense to use renewable energy equipment in its overseas assistance programs.

This legislation will help further a coordinated U.S. export promotion program for renewable energy technologies. As we continue to rely on finite fuel sources such as oil and coal, the day will come when we may face another energy crisis rivaling or surpassing those in the past. When that time comes, the United States must have a strong domestic alternative energy industry to help make our energy future a secure one.

Be sure, however, that the United States is not the only beneficiary of the measures listed above. Most Third World countries import most of their energy. Their domestic sources often include inefficient, scarce resources such as wood. While well intended, foreign aid often consists of environmentally damaging, expensive energy options. For instance, 80 percent of World Bank funds for electric power generation go toward diesel generators and fuel—which increase reliance on imported energy while polluting the environment. Just yesterday, a U.N. agency announced that the world population is expected to double within the next 35 years. This population explosion will largely occur in the Third World, where resources already are scarce. Renewable energy sources are one of our best defenses in the effort to halt the further degradation of the already impoverished lesser-developed countries.

Mr. President, this bill would help reverse damaging national and international energy trends while helping U.S. companies grow and prosper. It has been introduced in the House by Congressman WYDEN, and is based on legislation which he and I introduced last Congress. I urge my colleagues to support this bill and ask unanimous consent that the text be printed in the RECORD following this statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1059

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Renewable Energy Trade Equity and Promotion Act of 1989".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the world is largely dependent on finite resources for energy;

(2) global dependence on finite energy resources which are distributed unevenly create international instability and a cycle of poverty;

(3) the renewable energy industry in the United States, namely alcohol fuels, congeneration, geothermal, hydropower, passive solar, photovoltaics, solar thermal, wind, and wood, leads the world in these technologies and can transfer these technological advances to create greater access to local energy resources;

(4) the world market for renewable energy technologies has a potential to become a multibillion dollar market in the 1990's;

(5) the United States is losing its world market shares in all renewable energy technologies due to a failure to promote these industries in an aggressive and pragmatic fashion;

(6) the United States trade deficit is aggravated by the importation of petroleum; exporting renewable energy equipment and services will not only lower that trade deficit directly but also encourage the reduced use of imported petroleum in the United States; and

(7) the United States must maintain renewable energy research and development programs in order to ensure the predominance of the United States in renewable energy exports in the 1990's and thereafter.

SEC. 3. REPORT BY UNITED STATES TRADE REPRESENTIVE.

The United States Trade Representatives shall submit to the Congress, not later than 180 days after the date of the enactment of this Act, a report on—

(1) the extent to which countries impose protective tariffs and other requirements on renewable energy products or related services;

(2) a description, by country, of such tariffs and requirements; and

(3) if such tariffs and requirements are not removed, the need for the imposition by the United States of reciprocal tariffs or other actions.

SEC. 4. SPECIAL ACTIVITIES OF THE OVERSEAS PRIVATE INVESTMENT CORPORATION.

Section 234(e) of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence, by inserting after "cooperatives the following: ", and including the initiation of incentives, grants, and studies for renewable energy and other small business activities"; and

(2) by adding at the end the following new sentence: "Administrative funds may not be made available for incentive, grants, and studies for renewable energy and other small business activities.".

SEC. 5. ACCESS TO CAPITAL.

(a) LOAN SET ASIDES.

(1) EXPORT-IMPORT BANK.—Section 2(b)(1) of the Export-Import Bank Act of 1945 (12 U.S.C. 635(b)(1)) is amended by adding at the end the following:

"(H) In order to encourage the development of markets for the renewable energy industry and related services industries, the Bank shall attempt to provide, in each fiscal year, loans for the purpose of promoting renewable energy technology for export in an aggregate amount of at least 5 percent of the aggregate amount of loans provided in the previous fiscal year for all forms of energy technology. Loans under this subparagraph may be made without security for the loans. The Bank shall, not later than 90 days after the end of each fiscal year, report to the interagency working group established under section 256(d) of the Energy Policy and Conservation Act all loans made under this subparagraph during that fiscal year. For purposes of this subparagraph—

"(i) the term 'renewable energy' means any energy resource which has recently originated from the sun, including direct and indirect solar radiation such as solar thermal, passive solar, and photovoltaic energy, and intermediate solar energy forms such as wind, ocean thermal gradients, ocean currents and waves, hydropower, products of photosynthetic processes, organic wastes and resources, geothermal, and cogeneration; and

"(ii) the term 'energy' includes both mineral and nonmineral fuel resourced, including renewable energy, fossil, nuclear, electrical, and synthetic fuel energy resources.".

(2) SMALL BUSINESS ADMINISTRATION.—The Small Business Act (15 U.S.C. 601 and following) is amended by inserting after section 9 the following:

"SEC. 9A. In order to encourage the development of the domestic renewable energy industry and related service industries, the Administrator shall attempt to provide, in each fiscal year, loans to small business concerns for the purpose of promoting renewable energy technology for export in an aggregate amount of at least 5 percent of the aggregate amount of loans provided in the previous fiscal year under this Act for all forms of energy technology. Loans under this section may be issued without security for the loans. The Administrator shall, not later than 90 days after the end of each fiscal year, report on the interagency working group established under section 256(d) of the Energy Policy and Conservation Act all loans made under this section during that fiscal year. For purposes of this section—

"(1) the term 'renewable energy' means any energy resource which has recently originated from the sun, including direct and indirect solar radiation such as solar thermal, passive solar, and photovoltaic

energy, and intermediate solar energy forms such as wind, ocean thermal gradients, ocean currents and waves, hydropower, products of photosynthetic processes, organic wastes and resources, geothermal and cogeneration; and

"(2) the term 'energy' includes both mineral and nonmineral fuel resources, including renewable energy, fossil, nuclear, electrical, and synthetic fuel energy resources.".

(b) FOREIGN ASSISTANCE PROGRAMS.—

(1) FEASIBILITY STUDIES AND INFORMATION EXCHANGE.—Section 106(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151d(b)) is amended—

(A) in the second sentence of paragraph (1) by inserting after "suitable energy sources" the following: "(including funds for feasibility studies for renewable energy projects)"; and

(B) by adding at the end the following:

"(3) The agency primarily responsible for administering this part shall develop an information exchange with the renewable energy industry in the United States in order to facilitate the use of renewable energy equipment in countries receiving assistance under this chapter. The purpose of such exchange shall be to ensure that producers and representatives of the renewable energy industry receive appropriate information about assistance programs under this chapter, and to ensure that the agency receives sufficient and timely information concerning renewable energy products appropriate for such assistance programs.".

(2) TRAINING OF AID PERSONNEL.—Section 106 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151d) is amended by adding at the end the following:

"(g) Of the funds made available to carry out this section, $1,000,000 shall be available only for the training of the directors and technical advisors of the country missions of the agency primarily responsible for administering this part in the economics and applications of renewable energy technology in those countries.".

SEC. 6. DISSEMINATION OF INFORMATION: ACCESS TO FOREIGN MARKETS.

Section 256(c)(2)(D) of the Energy Policy and Conservation Act (42 U.S.C. 6276(c)(2)(D)) is amended—

(1) in clause (i) by inserting after "commerce," the following: "and to potential end users, including other industry sectors in foreign countries such as health care, rural development, communications, and refrigeration, and other,"; and

(2) in clause (ii) by striking out "export opportunities" and inserting in lieu thereof "export and export financing opportunities".

SEC. 7. AUTHORIZATION OF FUNDS FOR THE INTERAGENCY WORKING GROUP; DEVELOPMENT OF PROGRAM TO ENCOURAGE USE OF RENEWABLE ENERGY IN OTHER COUNTRIES.

Section 256(d) of the Energy Policy and Conservation Act (42 U.S.C. 6276(d)) is amended—

(1) by inserting "(1)" after "(d)"; and

(2) by adding at the end the following:

"(2) The interagency group shall establish a program to inform other countries of the benefits of policies that would allow small facilities which produce renewable energy to compete effectively with producers of energy from non-renewable sources.

"(3) There is authorized to be appropriated to the interagency working group $2,500,000 for fiscal year 1990 to carry out its activities under this subsection.".

SEC. 8. PROGRAMS IN INTERNATIONAL FINANCIAL INSTITUTIONS.

The Secretary of the Treasury shall instruct the Executive Directors of the International Monetary Fund and the Inter-American Development Bank to urge those respective international financial institutions—

(1) to provide financing for renewable energy purposes as part of their programs for financing energy projects;

(2) to submit to recipient countries plans of those respective institutions for renewable energy development; and

(3) to appoint an officer, or establish an office, for the purpose of facilitating the use of renewable energy technologies in recipient countries.

SEC. 9. ELIGIBILITY OF RENEWABLE ENERGY EQUIPMENT FOR MILITARY ASSISTANCE PROGRAM.

Section 644(d) of the Foreign Assistance Act of 1961 (22 U.S.C. 2403(d)) is amended by adding at the end the following: "Paragraphs (2), (3), and (4) include renewable energy equipment.".●

By Mr. PRYOR (for himself, Mr. BAUCUS, Mr. BOREN, Mr. BURDICK, Mr. HARKIN, Mr. STEVENS, Mr. COHEN, Mr. CONRAD, Mr. PRESSLER, and Mr. SHELBY):

S. 1060. A bill to amend the Internal Revenue Code of 1986 to provide refundable income tax credits to primary health services providers who work in rural health manpower shortage areas, and for other purposes; to the Committee on Finance.

RURAL PRIMARY CARE INCENTIVES ACT

● Mr. PRYOR. Mr. President, most of us are justifiably concerned about the plight of rural hospitals and are supporting initiatives aimed at stopping the closures of essential hospital facilities. However, we and the media have tended to give short shrift to the primary care personnel side of the rural health crisis.

In response to the need to focus more attention and action on primary care needs in rural America, I am today introducing the Rural Primary Care Incentives Act of 1989. This bill begins to meet the primary care challenge through: First, the use of tax incentives—a 3-year $12,000 tax credit; and second, the elimination of one of the current tax disincentives—the taxation of funds given to physicians through the National Health Service Corps' Loan Repayment Program. I am pleased and honored to be joined by Senators BAUCUS, BOREN, BURDICK, HARKIN, STEVENS, COHEN, CONRAD, PRESSLER, and SHELBY in introducing this important legislation.

In the United States, we have a maldistribution of primary care physicians. This is demonstrated by the fact that in urban areas there are 78 primary care physicians per 100,000 residents, while for the same number of rural residents there are only 44 of these valued providers. Furthermore, a 1987 study by University of Wisconsin Prof. David Kindig found that the greatest need for primary care providers is in rural areas with fewer than 10,000 residents. Rural countries with fewer than 10,000 residents have only one-half the physician availability than more populated rural counties. Moreover, a 1988 survey of rural physicians found that as many as 25 percent of rural physicians were considering retirement or relocation within the next 5 years.

Of particular concern is the shortage of primary care health personnel in rural areas. Community oriented primary care services may be the only health care available to people in rural medically underserved areas. These areas tend to be geographically isolated, poverty sticken, have many uninsured and underinsured populations and are in great need of primary care providers.

Seventeen percent of people living in rural areas are uninsured while 14 percent of people living in urban areas are uninsured. Additionally, only 25 percent of the rural poor qualify for Medicaid while 43 percent of the inner city poor qualify. Moreover, in 1985, 18.3 percent of rural populations lived below the poverty line as compared to 12.7 percent in urban populations. These statistics represent only some of the extraordinary barriers to health care in rural America and it seems logical to conclude that rural areas with populations under 10,000 are in even worse shape. Unfortunately and not too surprisingly, primary care physicians are understandably hesitant to move into these areas without adequate compensation—compensation that many of these communities simply cannot afford to provide.

Primary care includes nonhospital diagnostic and preventive services that range from care provided in routine checkups and prenatal care visits to managing chronic disabilities. Available and accessible primary care can help prevent or reduce aggravation of certain health problems and therefore avoid the adverse health outcomes and unnecessary hospitalizations responsible for exorbitant health care spending. Unfortunately, many of these services may be at risk of closure or service reduction due to the shortage of primary care physicians.

The legislation we are introducing today offers meaningful incentives to primary care physicians to practice in medically underserved rural areas. The first and most significant provision of the Rural Primary Care Incentives Act provides for a 3-year $12,000 per year tax credit for high priority primary care physicians based on a 5-year service incentive. The 5-year incentive is based on a graduated Internal Revenue Service recapture schedule applied to a 5-year service period. Mr. President, at this point in the RECORD, I would ask unanimous con-

sent that the schedule be printed in the RECORD.

TAX CREDIT ACCRUAL AND RECAPTURE STRUCTURE

[Tax credit schedule for primary care MD's/DO's]

Tax credit program year	Completed months worked	Tax credit	Total tax credit received and earned to date
First [1]	1–12	[1] $12,000	Up to $12,000.
Second	13–24	12,000	Up to $24,000.
Third	25–36	12,000	Up to $36,000.
Fourth	37–48	0	Up to $36,000.
Fifth	49–60	0	$36,000.

[1] 1st year is prorated to months served.

TAX CREDIT RECAPTURE SCHEDULE

Completed months worked	Percent of received tax credit protected	Amount protected
<24	0	$0.
24	25	Up to $8,750.
36	50	Up to $18,000.
48	75	Up to $27,000.
60	100	Up to $36,000.

This tax credit will be attached to the Bureau of Health Delivery and Assistance [BHCDA] criteria for a system of care guided by a mission to serve the medically underserved. This high priority site criteria that are used for determining Health Manpower Shortage Area [HMSA] designations include physician population ratios, unmet health needs, level of geographic isolation, poverty rates, and infant mortality rates. This bill will responsibly link provider incentives to the HMSA classification system. There is no need to develop a new system or administrative arm.

Practice locations and conditions that would qualify primary care physicians for the tax cerdit must satisfy conditions that require an active mission for nondiscriminatory service to the poor, minorities, underinsured, and other DHHS documented and verified determinants of medically underserved populations. These providers must accept Medicare and Medicaid assignment. The tax credit would be available to primary care physicians whose benefit qualifications have been certified by BHCDA. BHCDA will be directed to submit a plan for oversight of these designated sites.

The tax credit provision of The Rural Primary Care Incentives Act of 1989 applies to qualified physicians that chose to work in the two highest priority HMSA classifications. By targeting HMSA classes 1 and 2, this bill addresses 83 percent of all rural HMSA primary care physician need in the Nation. Furthermore, 97 percent of primary care physician need in rural HMSAs with fewer than 10,000 residents are addressed by the tax credit provision.

The second major provision will eliminate the tax liability on loan repayments for all National Health Service Crops Federal Loan Repayment Program participants. This NHSC Loan Repayment Program tax liability relief will enhance the NHSC practice opportunities for physician and nonphysician primary care providers and increase the flexibility needed to create and maintain effective quality and cost conscious provider mixes. Finally, this bill will mandate a study to determine the present and projected appropriate number and mix of all rural HMSA primary care providers in order to study the feasibility of extending the tax credit to nonphysicians.

Mr. President, I recently received a letter from the directors of Southwest Arkansas Comprehensive Care, Inc. [SWACC] of Lafayette County, AR, informing me that they have only two family practice physicians for the 10,399 residents. Thirty-two percent of the people in the Lafayette County service area fall below the Federal income poverty guidelines. What is more, 55 percent of the counties' nonwhite population are poverty stricken and the county has no services to help those vulnerable people. As a result, many of these medically-needy residents do not seek or do not have access to the physician care they need. This situation is simply unacceptable.

Like most other States under this bill, the tax credit provision of my bill addresses a significant percentage of my home State of Arkansas' need for primary care physicians in rural federally designated HMSA's—85 percent. In terms of raw numbers, since there is a need for 22 additional physicians in these high priority HMSA areas and 17 physicians currently practice in them, 39 Arkansas physicians could be eligible for this benefit. In addition, this provision targets 100 percent of the Arkansas need in geographical areas with fewer than 10,000 residents—the areas that are having the most trouble finding and keeping physicians. This bill would assist approximately 20 HMSA sites in Arkansas in counties like Lafayette, Lincoln, Montgomery, and Newton.

Currently, the responsibility for recruiting primary care providers for medically underserved populations falls primarily on individual care sites that have incorporated a charitable mission. These rural sites do not have the financial means to compete with salaries offered by HMO's and other practices that place less emphasis on serving the medically underserved. As a result, sites located in federally designated HMSA's have relied on the recruiting and placement efforts of the National Health Service Corps [NHSC]. The NHSC uses scholarships and loan forgiveness programs to recruit HMSA primary care providers. However, while over 4,000 primary care physicians are needed to remove the almost 2,000 rural HMSA designations, the NHSC has so far been able to award only 26 loan forgiveness contracts this year and has effectively phased out the scholarship program.

The NHSC has proven to be the "breeding ground" for HMSA primary care providers. The July 1985 Public Health Service, Health Resources and Services Administration report, "Survey of Factors Influencing the Location Decision and Practice Patterns," found that the NHSC experience has a large influence on the subsequent practice site choice of these alumni. For example, most young physicians who chose rural practice locations prefer counties with larger populations, more health resources, the presence of a college, and greater white-collar employment. On the other hand, NHSC alumni were more likely than nonalumni to locate in whole county HMSA's, lower populated counties, and were more accessible to the underserved than non-NHSC alumni. Without a cooperative complement of recruitment and retention efforts, we will never obtain a sufficient number of providers to ease the health care crisis in rural HMSA's.

Insufficient salaries are most often blamed for failure to retain physicians in rural medically underserved areas. Primary care service managers and associations claim that when NHSC providers finish their obligations, there is usually no significant salary increase that can be offered to give these people enough reason to stay in their present site. This bill will empower the NHSC's efforts to identify primary care providers for rural HMSA service and offer a significant benefit for continued HMSA service.

Additionally, rural primary care access and availability are significantly, but perhaps not obviously, affected by the disproportionate share of elderly people in rural areas. While 12 percent of the United States population is elderly, these older Americans account for 25.4 percent of the rural population. This is significant because the elderly are more likely than younger people to make frequent visits to a doctor. Furthermore, because chronic illnesses threaten the independence of older people, their physician visits are most often for the treatment of chronic conditions. In fact, most elderly hospitalizations are caused by an aggravated chronic condition that becomes acute. Although not all acute episodes are preventable, primary care services may avert the need for costly hospitalization and institutionalization.

Changing Medicare reimbursement rates for rural practitioners as we started to do, only addresses part of the health manpower shortage problem. That approach represents Medicare's portion of the responsibility. Because we have reached an unsatisfactory limit to the feasible benefits that can be reaped by adjusting existing payment mechanisms, I am offering

the Rural Primary Care Incentives Act of 1989 as an effective fiscally responsibile measure toward alleviating some of our critical rural health concerns. I hope all my colleagues will join me in supporting this important legislation.●

● Mr. BAUCUS. Mr. President, I am pleased to join in support of the Rural Primary Care Incentives Act being offered today by my distinguished colleague Senator PRYOR. This proposal makes an important commitment to improving the recruitment of doctors to underserved areas of rural America.

This legislation is the perfect companion for the Rural Health Manpower Assistance Act that I introduced earlier this year. My bill provides an additional 5-percent bonus for primary care services performed in rural health manpower shortage areas.

The current physician payment system sends all the wrong messages to young doctors: "Stay in overdoctored cities, do lots of expensive procedures, avoid talking with your patients for too long, and stay away from public service."

The Rural Primary Care Incentives Act makes sense. It does the right things, and, most importantly, sends the right messages.

The bill tells doctors in training: "The Federal Government understands the importance of primary care, and it's going to provide financial incentives to help you make the decision to train in primary care where you are most needed."

It tells young doctors: "If you make a commitment to practice in an underserved rural area, the Federal Government will show its appreciation."

It tells young doctors: "If you have the idealism to work in the National Health Service Corps, the Federal Government won't tax the loan repayment bonus."

Mr. President, these are the kinds of signals this Government should be sending to young physicians.

I commend Senator PRYOR for his efforts on this excellent and badly needed proposal, and I look forward to working with him on getting these messages translated into action.●

By Mr. WARNER (for himself, Mr. REID, Mr. LIEBERMAN, Mr. CHAFEE, and Mr. RIEGLE):

S. 1061. A bill to prohibit the distribution, sale, or use of daminozide for food use, to cancel the registration for daminozide for food use, to revoke the tolerance for daminozide in or on food, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

PROHIBITING THE USE OF DAMINOZIDE (ALAR)

● Mr. WARNER. Mr. President, today Senators REID, LIEBERMAN, CHAFEE, RIEGLE, and I are introducing legislation to immediately prohibit the distribution, sale, or use of daminozide—also known as Alar—for food use, to cancel the registration for daminozide for food use, and to revoke the tolerance for daminozide and its cancer-causing metobolyte, UDMH, in or on food products.

Over the course of the past several months, Members of Congress, the Environmental Protection Agency, our Nation's fruit growers and processors, and concerned parents of young children have been caught up in the controversy surrounding Alar.

Let me point out to my colleagues that Alar does not kill pests that eat on the fruit. It does not prevent disease that injures apples; its use is, in fact, for purely cosmetic purposes. People want beautiful red apples; Alar does the trick. And while it is nice to have colorful, firmer apples which do not crack or bruise as easily, that is hardly worth the possible exposure to a carcinogen.

The safety of America's greatest natural resource, its food supply, is put in question. The public's confidence in the Government's responsibility to work with industry and to assure a healthful food supply has been shaken. And a vital industry, not only to the Commonwealth of Virginia but to many States, is being injured. The industry has taken steps to rebuild consumer public confidence and the purpose of this legislation is to support those efforts.

Evidence is building that points to a link between Alar and cancer tumors in laboratory rodents. It's the job of the Federal Government to expedite its decision process to remove the potential dangers of Alar. The purpose of this legislation is to help expedite the Federal Government in doing its job.

While the Environmental Protection Agency [EPA], the U.S. Department of Agriculture [USDA], the Food and Drug Administration [FDA], the scientific community, and we in Congress are working to gather the answers, millions of young mothers and fathers are struggling with how to feed their young children safely. They need assurance we are doing our part to help.

Since the time this controversy was first reported over the airwaves and newspapers several months ago, I have spoken with and read the letters of many concerned parents and visited with fruit growers, processors, and packers in Virginia. In hearings, I have questioned witnesses coming before the Senate Environment and Public Works Subcommittee on Toxic Substances, Environmental Oversight and Research and Development, of which I am the ranking member. They ask for help.

Part of the fault for this problem rests on Congress for past actions. We have a law in place that does not meet modern standards. The consumer, the EPA, and the fruit growers are all victims of a defective law.

Doubts involving the safety of Alar first surfaced over 16 years ago. Yet, because of statutory requirements, the Environental Protection Agency has not been able to expeditiously cancel the usage of a chemical previously approved for use and thought to be safe. This cancellation has not occurred despite the fact that Alar probably would not be approved for use today if the manufacturer were to attempt to register it.

Apple growers themselves have been the victims of this statutory nightmare. News accounts failed to note that the growers were using an approved chemical and were applying it well within the established guidelines for use.

In fact, many of the growers took the initiative to stop using Alar through a voluntary ban. In their attempts to provide Americans with the world's safest and most bountiful food supply, at a cost to the consumer lower than any other industrialized nation, they have become victims of a law which moves too slowly to help them in emergency situations like this one.

A "quick fix" is seldom the answer for any problem. But we all realize that the Federal Insecticide, Fungicide, and Rodenticide Act [FIFRA] must be revisited and revised to avoid similar circumstances in the future. I believe the time has come for the Congress to order the cancellation of the registration for Alar and to being the legislative process to fix the law.

Mr. President, the apple has for years stood as the symbol of health, nutrition, and goodness. We must continue that tradition

It is a shame that after so many growers have acted responsibly to refrain from using Alar, others still seek to exploit the use of Alar to gain market advantages. That is unfortunate, for all suffer.

The spraying season for apples is nearly upon us, that is why I believe we must act now, though some may say in haste, and revoke the registration for Alar. If Alar is sprayed on this year's apple crop, traces of this chemical's residues will appear in our grocery stores on our fresh fruit as well as in juices and sauces for some time to come.

Mr. President, I have worked very closely with the EPA in crafting this legislation. While I would have preferred for this situation to have been resolved differently, I do not see any viable alternative.

For the benefit of my colleagues, I would like to briefly explain how this legislation addresses the problems I have just discussed.

First, since there are two aspects to this issue there are basically two parts to this bill.

The first part addresses the sale, distribution and use of the pesticide daminozide itself. This legislation will ban immediately upon enactment the further sale, use, or distribution of daminozide for food products.

Section 3 of the legislation requires the Administrator of the Environmental Protection Agency to require the registrant to recall this pesticide from dealers, distributors, and end users, and to provide for the proper storage and disposal of the pesticide. Section 3 also provides that the registrant shall reimburse any person who holds any quantity of daminozide at the prevailing sale price at the time the pesticide was purchased.

These provisions were crafted in order to protect distributors and end users, and to prevent further adverse economic consequences on their part.

The second aspect of the bill deals with the presence of daminozide in food products which have already been harvested, stored, or processed for retail sale. In order to adequately protect processors, retailers, and consumers from further adverse economic consequences, section 4 revokes all existing tolerances and food additive regulations for daminozide immediately upon enactment of this act. However, the bill continues the authority for the Administrator to establish an action level as provided under current law.

Mr. President, the time for apple growers to begin applying Alar to their orchards will soon be upon us. It is urgent that we in Congress take swift action to ban the use before that application begins. If we do not act swiftly and decisively now, it will take an even longer period of time before Alar and UDMH are eradicated from our food chain.

I urge my colleagues to join me and Senators REID, LIEBERMAN, CHAFEE, and RIEGLE in cosponsoring this legislation, and pressing for its swift approval by the Congress.●

● Mr. REID. Mr. President, I am pleased to join today with Senators LIEBERMAN, RIEGLE, CHAFEE, and WARNER in offering this legislation to ban Alar.

Our legislation banning Alar is a major step in the right direction, but no one should fool themselves into thinking that this action eliminates the danger of pesticides for American consumers.

There are 50,000 other pesticides and chemicals out there, and we don't know how many of them are as dangerous as Alar. This legislation banning Alar is just a beginning. Protecting American consumers will require better review procedures than the ones that allowed Alar to stay on the market so long in the first place.

Let me emphasize: Alar is just the tip of the iceberg. This legislation is only the beginning. The Environmental Protection—and I emphasize protection—Agency needs better review procedures to protect the American consumer. We in Congress have a responsibility to help eliminate the source of the Alar controversy as well as today's effort to eliminate Alar itself.●

● Mr. LIEBERMAN. Mr. President, I am pleased to join Senators REID, WARNER, CHAFEE, and RIEGLE in introducing legislation today that will ban the sale and use of Alar on food.

If we do not ban Alar from the market, American consumers, in increasing numbers, will ban apples from their diet. This bill will have a positive economic effect on the apple industry—which has itself become a victim of Alar—as well as a positive health effect on the American public.

While I personally believe the EPA has the authority to ban Alar immediately, the agency does not share that view, and intends to move administratively against the chemical. With possible court challenges to that process, it could be years before Alar is off the market. Without our law, an Alar cloud will hang over the apple crop—not just this year—but for as long as it takes for a ban to go into effect.

In specific terms, the legislation would immediately ban the sale of Alar for use on foods, such as apples, peanuts and cherries. It would also reduce the tolerance for Alar on food to zero, which will eliminate Alar-tainted food imports.

Our bill is a quick fix. But it is not panicky reaction to just one story about Alar's danger. It's a necessary reaction to years of government inaction—inaction in the face of repeated studies that link Alar to cancerous blood vessel tumors.

As a father, I don't want my 1-year-old daughter eating too much apple juice or apple sauce as long as Alar is on the market. Until it's banned, buying apple products will have a Russian Roulette quality to it; we can't have confidence that the product is Alar-free. As a Senator, I want to do all I can to remove Alar from the market so other fathers and mothers don't have to make that choice at all.

I like apples. I've eaten at least two a day for decades. I want growers to keep growing them, and I want to keep eating them. But to make the apple market, and apples, healthier, our bill is a necessary first step.

I hope this means the end of Alar. But it's only the beginning of our review of the impact of pesticides in our food supply. Alar is but one of 800 man-made chemicals on food that we must review to determine if they pose a threat to human health. Further changes in the law regulating pesticides, and in the strategy of enforcing that law, may be needed so that we can methodically review and remove any of the remaining 799 chemicals in our food supply that can potentially do us harm.●

By Mr. GORE (for himself and Mr. DANFORTH):

S. 1062. A bill to amend the Earthquake Hazards Reduction Act of 1977 to improve the Federal effort to reduce earthquake hazards, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EARTHQUAKE HAZARDS REDUCTION ACT

● Mr. GORE. Mr. President, today, I am pleased to join Senator DANFORTH, the distinguished ranking Republican member of the Commerce Committee, introducing a bill to expand and improve the National Earthquake Hazards Reduction Program. This bill will help ensure that the United States is prepared for a major earthquake.

Just last month, a magnitude 4.7 earthquake of the New Madrid fault in Missouri shook up the residents of Missouri, Tennessee, Arkansas, and Kentucky and reminded them that earthquakes pose a threat to our region of the United States.

Three weeks before that earthquake, during National Earthquake Awareness Week, the Science, Technology, and Space Subcommittee which I chair, held a hearing on strengthening the National Earthquake Hazards Reduction Program. At that hearing, the late Dr. Robert Ketter, former Director of the National Center Earthquake Engineering Research, testified that the odds of a destructive earthquake striking the Eastern United States before the year 2000 is better than 75 to 95 percent. There is a nearly 100-percent chance that such as earthquake will occur by the year 2010.

Dr. Ketter also discussed the New Madrid fault zone in Missouri, just a few miles from Memphis, TN. In 1811 and 1812, it produced three of the largest earthquakes in U.S. history, all three greater than 8.3 on the Richter scale. A repeat of the New Madrid earthquake would kill thousands of people, injure tens of thousands, and leave hundreds of thousands homeless. According to Dr. Ketter, the odds of such a quake by the year 2035 is 3 or 4 percent. That's frightening. Just as disturbing is the fact that there is about a 50-50 chance that a smaller, magnitude 6.3 earthquake will occur on the New Madrid fault zone in the next 11 years. Such a quake could result in billions of dollars of damage and thousands of deaths and injuries.

Dr. Ketter's testimony made it clear that earthquakes are not just a California problem. They pose a threat to Tennessee and the rest of the Eastern and Central United States as well.

Other witnesses at the hearing discussed how much needs to be done to improve our earthquake preparedness. Earthquake faults have to be mapped;

seismic risks have to be assessed; buildings and pipelines have to be made more earthquake resistant; and plans and resources have to be ready and available in order to respond after a catastrophic earthquake. Perhaps most importantly, the public has to be made more aware of the risks of earthquakes.

In his testimony to the Science Subcommittee, Lacy Suiter, director of the Tennessee Emergency Management Agency and head of the Central United States Earthquake Consortium, suggested that if Congress wants to improve the Nation's earthquake preparedness, it should legislate specific goals for the agencies in the National Earthquake Hazards Reduction Program. The legislation I am introducing today does just that. It provides concrete goals which need to be met if the Nation is to be prepared for a major earthquake.

The bill calls for a National Seismic Network to monitor earthquakes throughout the United States. This network will work in conjunction with existing regional seismic networks like the one that Dr. Arch Johnston runs at Memphis State University, which provides a detailed picture of the seismicity on the New Madrid fault zone.

The Federal Government has funded tens of millions of dollars of research on earthquakes. This bill will improve the way that research is utilized. For each earthquake-prone region in the Nation, better estimates of the risks of earthquakes will be developed, along with improved estimates of the expected intensities of shaking that those earthquakes would cause. The bill requires that land use planners identify those areas where unstable soils tend to amplify the shaking caused by an earthquake. The Mexico City earthquake showed the fatal results of building on such shaky ground.

This bill also mandates that American buildings and lifelines be made more earthquake-resistant. This will require educating building owners and builders about the risk of earthquakes and about how their buildings can be made more earthquake-resistant. It will also require building codes and zoning laws which take into account seismic risks.

Public education about earthquakes is another key component of this bill. Last month's National Earthquake Awareness Week helped alert more people to the danger of earthquakes. We even had "Sesame Street's" Big Bird come to Capitol Hill to spread the word about earthquakes. But more needs to be done. We cannot improve earthquake perparedness if the public does not understand the need for it. This bill calls for new educational programs, the use of the mass media, and regional clearinghouses to educate the public about earthquakes.

In spite of all these efforts to prepare for earthquakes, we must face the inevitable fact that major earthquakes will continue to kill people and cause billions of dollars of damage. Although we can greatly reduce the casualties and the property damage, we cannot eliminate them. Thus, we must be prepared to take action when a major earthquake strikes. The Federal Emergency Management Agency has responsibility for disaster planning for earthquakes and other natural and manmade hazards. This bill will accelerate efforts to develop earthquake response plans. It requires FEMA to redouble its efforts to work with State and local governments to develop earthquake response plans in every earthquake-prone region of the country. I am particularly interest in promoting the use of advanced computer and telecommunication equipment for assessing earthquake risks and for responding to major earthquakes.

In addition to helping the United States prepare for a major earthquake, this bill will assist other countries in dealing the earthquakes. The United Nations established the International Decade of Natural Disaster Eduction beginning in 1990, and the United States can assist in this effort to reduce the pain and suffering caused by natural disasters around the world. The United States is a world leader in earthquake research and in earthquake preparedness, and by sharing our knowledge with other nations we can help save thousands of lives. And we can learn from the experience of other nations as well.

Last year's Armenian earthquake proved dramatically how catastrophic even a moderate earthquake can be if a city is not prepared for it. Shortly after the Armenian earthquake, I was contacted by an official of the Soviet Embassy who was seeking more information on the measures that the United States has taken to reduce the danger of earthquakes. Unfortunately, there was not one office I could refer him to for information, since the National Earthquake Hazards Reduction Program consists of four different agencies each working on different parts of the earthquake problem.

In order to make it easier for other countries, especially countries in the developing world, to benefit from American experience and know-how concerning earthquakes, this bill will establish and Office for the International Exchange of Earthquake Information at the U.S. Geological Survey. Such an office would provide one-stop shopping for information on American earthquake research and earthquake preparedness.

This bill complements S. 629 which Senator CRANSTON introduced last March and which I cosponsored. That bill also calls for improved application of earthquake research. In addition, that bill addresses problems with the management of the National Earthquake Hazards Reduction Program. We need effective coordination of the four agencies in the earthquake program in order to accomplish the goals set out in the bill I have introduced today. In the coming weeks, the Science Subcommittee will consider both bills in detail, in order to ensure that we are not caught unprepared by the next major earthquake.

These are important bills designed to address an important problem, a problem which is too often ignored until a major earthquake strikes and everyone looks for someone to blame. Rather than waiting until after a disaster, we need to take action now.●

● Mr. DANFORTH. Mr. President, today Senator GORE and I are introducing legislation to improve this country's preparedness for the earthquake that is inevitably going to strike.

On April 27, an earthquake measuring 4.7 on the Richter scale hit New Madrid, MO. It was felt in Tennessee, Mississippi, and Illinois. Fortunately, no one was hurt, and there was only minor damage. Those of us who live in the Eastern and Central United States have been warned. Scientists predict that there is almost a 100-percent chance that a major earthquake—over 6.0 on the Richter scale—will strike somewhere east of the Rocky Mountains before the year 2010. There is a 50-percent chance that such an earthquake will occur on the New Madrid fault, which runs through my home State of Missouri, plus the States of Mississippi, Tennessee, Kentucky, Illinois, Indiana, and Arkansas.

We recently saw the horrifying destruction that can happen when a nation is unprepared for a major earthquake. The tragedy in Armenia must never happen here. When a major earthquake strikes the United States, houses will collapse and people will be trapped, communication lines will break, transportation will be interrupted, bridges will fall, and natural gas pipelines will leak. Are we prepared for what we know is coming? No. If a major earthquake hit Cape Girardeau, MO, tonight, would people there know what to do? Would they know whom to call? Where to go for rescue workers and equipment? How to transport medical personnel to the scene? Where to transport victims who need hospital treatment? If a quake struck the New Madrid fault, it would directly affect as many as seven States. We don't have an emergency response plan that coordinates the roles of the Federal and State Governments. We don't have an adequate plan for getting the necessary medical personnel, rescue personnel and equipment to the scene. We don't know whether our hospitals will still be standing after an

earthquake, or whether they will have enough beds for all of the victims.

What are we doing about preparedness before an earthquake strikes, and rescue and repair operations afterward? The bill we are introducing today answers these questions.

Last month, the Commerce Committee held a hearing on the current U.S. Earthquake Program. Testimony clearly indicated that the Federal Emergency Management Agency [FEMA], the office primarily responsible for preparedness, emergency response, and public education, must be more aggressive. This bill gives specific directions to FEMA and other Federal earthquake agencies on their responsibilities.

The Federal Government, through the National Earthquake Hazards Reduction Program, has been researching and studying earthquake data for many years. Now we need to act on this information. People must learn the steps they can take to reduce the damage of an earthquake.

For instance, the only States that have enacted seismic building codes are California, Massachusetts, and Connecticut. With the right building codes and construction practices, we can save lives and property, and minimize the amount of emergency rescue needed after the quake, the cleanup effort, and the cost to rebuild.

There are three ways to reduce damage and injury: First, increase public knowledge; second, eliminate or reduce potential hazards; and third, improve emergency preparedness. This bill addresses all three by prescribing specific activities for the principal Federal Earthquake agencies—FEMA, the U.S. Geological Survey [USGS], the National Science Foundation [NSF] and the National Institute of Standards and Technology [NIST].

First of all, the bill requires three agencies to improve public education on the dangers of earthquakes and the need to increase earthquake preparedness. Specifically, the agencies must develop programs targeted to specific geographic regions concerning the particular local earthquake hazards; establish regional clearinghouses to distribute that information; establish cooperatives among the private sector, government, and local universities to organize seminars and workships for the general public; and identify the appropriate role for television and radio stations in disseminating earthquake information.

Second, the bill requires the agencies to develop information and strategies to reduce the risk of earthquake damage. They must then share this data with State and local government officials, and private contractors, engineers, and architects. The bill's requirements include: Developing model building codes and construction guidelines; establishing construction standards for the Nation's infrastructure, such as oil and gas pipelines, bridges, roads, rail lines, and telecommunications networks; providing guidelines for land-use management to avoid future construction on high-risk sites; and estimating costs and developing procedures for retrofitting existing buildings.

Third, the bill strengthens our Nation's emergency response capabilities by requiring the agencies to assess existing emergency plans, including personnel and equipment available for rescue operations after an earthquake, and to acquire additional resources where needed; to develop a strategy for coordinating Federal, State, and local emergency plans; and to include regional earthquake consortia in federal sponsored planning and preparedness projects.

The bill requires the agency to document their progress on these duties in their annual report to Congress, beginning with the fiscal year 1989 report.

Finally, a new section is added to establish an Office for the International Exchange of Earthquake Information within the USGS, to promote the exchange of information on earthquake research and earthquake preparedness between the U.S. and other countries; to maintain a library of reports, research papers and data produced through the National Earthquake Hazards Reduction Program; to answer requests from other nations for information on American earthquake research and earthquake preparedness programs; and to direct foreign requests to the Federal earthquake agency best able to respond to the request.

We all recognize the danger of earthquakes. I recently received a letter from a constituent who lives near the New Madrid fault. She is concerned about the safety of her two young children, who attend a seismically unsafe school. She wants to know what she can do to reduce the risks of injury, death, and destruction from an earthquake. I'm glad people are becoming aware of this potential disaster. Now we must act. The Federal Government can set an example for State and local governments and the private sector with a comprehensive, effective earthquake program that includes achievable. concrete goals for reducing the hazards due to earthquakes and for getting the public involved in that effort. The bill we are introducing today provides much-needed direction for the Federal Earthquake Program. Let's not wait until it's too late.●

By Mr. LUGAR (for himself and Mr. BOSCHWITZ):

S. 1063. A bill to improve the conservation of cropland, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

CONSERVATION ENHANCEMENT AND IMPROVEMENT ACT

Mr. LUGAR. Mr. President, I rise today to introduce the Conservation Enhancement and Improvement Act of 1989.

The 1985 farm bill contained important provisions to help protect and conserve our soil and water resources. This historic measure has nearly eliminated erosion on nearly 30 million acres of highly erodible land. It has slowed the destruction of our Nation's valuable wetlands and required farmers to meet minimum soil conservation criteria in order to qualify for Federal price support benefits.

In 1985, I served as the chairman of the Agriculture Committee's Subcommittee on Conservation and Forestry. In that capacity, I was the principal author of the conservation title of the 1985 farm bill. The bill I am introducing today will build and expand upon that effort. It amends existing programs to more effectively protect groundwater quality, control wind and water erosion, improve wildlife, habitat, and enhance our forest resources.

Without question, one of the most successful aspects of the 1985 farm bill was the establishment of the 45-million acre Conservation Reserve Program [CRP]. To date, farmers have voluntarily idled nearly 28 million acres of their most highly erodible cropland under this program. It has been estimated that 574 million tons of topsoil have been saved so far as a result of this effort. The Department of Agriculture estimates that the CRP will generate $3.5 to $4 billion in water quality benefits in the form of lower sediment removal costs, less flood damage, and lower water treatment costs. A study by the American Farmland Trust estimates that the CRP will increase farm income by $2.3 billion over 5 years while saving $600 million in farm program costs.

A major priority that we are now facing in order to continue these benefits is how to preserve the acreage entered into the Reserve once the 10-year contract period expires. My legislation provides a solution by allowing farmers to extend their payment acreage base protection for an additional 5 years beyond the expiration of the contract period. This will ensure that farmers will not bring highly erodible land back into crop production simply to maintain their crop base and their current level of Federal price support benefits.

One of the major goals of the Conservation Reserve Program is to have at least one-eighth of the acreage entered into the program planted to trees. At this time, there is not adequate interest in the tree planting option to meet that goal. Moreover, most of the existing CRP tree contracts have been devoted to softwood

trees. My bill provides added incentives for hardwood tree planting in the CRP. Because hardwood trees take consideraly longer to mature than softwoods, producers would be given the option of choosing 10- to 15-year contracts, instead of the current 10 years. Also, producers, in certain circumstances, would be allowed to plant hardwoods on existing CRP acres planted to grass within reasonable cost limits.

Many landowners have shown less enthusiasm for the CRP program in the last year given significantly higher grain prices and land values. As a result, it will be more difficult and costly to reach the 45-million-acre goal of the CRP if we limit participation to highly erodible land. In this regard, my bill expands the focus of the program beyond highly erodible acres to include other areas of strategic environmental concerns.

Other provisions include making shelterbelts and windbreaks eligible for the CRP and eliminating the use of USDA loans for the significant clearing of trees, except for purposes of sustainable management or tree farming. The bill will allow sinkholes and other critical ground water contamination areas to enter the Reserve.

Public attention recently has focused on the environmental benefits of our Nation's wetlands which include water cleansing, wildlife habitat and plant habitat. My legislation would require the Secretary to create, within the Conservation Reserve Program, a Wetlands Reserve Program [WRP] to restore converted wetlands back to their natural state. A minimum of 2.5 million acres must enter the wetland reserve during 1990. However, the total combined acreage of the CRP and the WRP could not exceed the current 45-million-acre cap for the CRP.

It has been estimated that about 5 million acres of our Nation's 78 million acres of wetlands have a very high potential for conversion to agricultural uses. The WRP helps to ensure a no-net loss of wetlands policy.

As a further deterrent to further conversion of the 5 million acres of wetlands to agricultural uses, my bill also reforms the Waterbank Program to better protect enrolled wetlands. It prohibits the use of USDA loans to drain wetlands and provides additional tools to enforce the swampbuster provisions of the 1985 farm bill.

With regard to other areas of environmental concern, my bill modifies the Department of Agriculture's annual acreage reduction programs which require producers to idle land depending on supply and demand conditions. As a result of its short-term nature, producers are reluctant to make conservation and wildlife investments on annually idled land. Many producers in the past have failed to even plant a cover crop on this idled acreage. My bill would require the Secretary of Agriculture to offer 3-year contracts on a percentage of the idled land for the purpose of improving soil conservation and wildlife habitat.

In addition, the bill clarifies the intent of current law to ensure that annually idled land does not erode at greater rates than cropped land. Current law with regard to conservation compliance can be interpreted so as to only apply to cropped acreage. The bill also provides additional enforcement tools for the Secretary to more consistently enforce existing soil erosion provisions for farmers who may not participate in the crop programs but are, nevertheless, recipients of direct farm program benefits.

Current farm programs discourage sound conservation and environmental practices by distorting market signals on what crops should be planted, discouraging sound rotational practices and encouraging the production of crops that bleed the soil of important nutrients and moisture. My bill provides that it is the sense of Congress that, during the debate on the 1990 farm bill, the structure of our farm programs, including the crop acreage base system, be modified to encourage sound conservation and farming techniques.

The legislation also provides for the standardization of State programs to certify naturally grown foods. For those States interested in participating, the Secretary would be authorized to certify State programs that label foods as having been naturally grown. State programs that meet the USDA standard could display a label so indicating. Participating States would be charged a fee so that the program would be carried out at no cost to the Federal Government.

Well water contamination is also of serious concern to all rural Americans. The Environmental Protection Agency, in a study released in 1988, found residues of pesticides in well water in 26 States due to normal agricultural practices. My bill would require the Secretary to offer a voluntary, confidential well water testing program. The program would be carried out by USDA's Extension Service and would operate on a cost-share basis. This program should help to ensure that all Americans know the contents of their drinking water and can act accordingly to ensure its safety.

Mr. President, my bill is a comprehensive effort to provide farmers with strong incentives to conserve our land, water, and forest resources. It is a sound, logical next step in our conservation program. I urge my colleagues to support this bill.

Mr. President, I request unanimous consent that the text and summaries of this bill be printed in the RECORD at this time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1063

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Conservation Enhancement and Improvement Act of 1989".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
TITLE I—EROSION CONTROL
Sec. 101. CRP base protection.
Sec. 102. Multiyear conservation contracts.
Sec. 103. Application of highly erodible land protections to idled cropland.
Sec. 104. Conservation compliance and sodbuster consistency.
Sec. 105. No net loss of soil on land leaving the CRP.
TITLE II—WILDLIFE HABITAT IMPROVEMENT
Sec. 201. Multiyear wildlife habitat improvement contracts.
Sec. 202. Annually idled acres.
TITLE III—ALTERNATIVE AGRICULTURAL PRACTICES AND NEW CROPS
Sec. 301. Production of alternate crops on permitted acres.
Sec. 302. Naturally grown food certification.
TITLE IV—WATER PROTECTION AND ENHANCEMENT
Sec. 401. Critical contamination areas.
Sec. 402. Wetland reserve program.
Sec. 403. Water bank program reform.
Sec. 404. Wetland protection.
Sec. 405. Sinkhole contamination abatement.
Sec. 406. Well water testing program.
Sec. 407. Swampbuster consistency.
Sec. 408. Application of wetlands protections to idled cropland.
TITLE V—FOREST PROTECTION AND ENHANCEMENT
Sec. 501. No net overall loss of forest area.
Sec. 502. Shelterbelts and windbreaks.
Sec. 503. Tree planting incentives.
Sec. 504. Forest clearing subsidies.
Sec. 505. Urban forestry.
TITLE VI—MISCELLANEOUS
Sec. 601. Environmental protection.

TITLE I—EROSION CONTROL

SEC. 101. CRP BASE PROTECTION.

Section 1236 of the Food Security Act of 1985 (16 U.S.C. 3836) is amended by adding at the end thereof the following new subsection:

"(c) During the 5-year period beginning on the expiration of a contract entered into by an owner or operator under this subtitle, the Secretary may provide for the preservation of cropland base and allotment history in accordance with subsection (b), if the owner or operator agrees to continue to devote the cropland that was subject to the contract to conserving uses as determined by the Secretary during such period.".

SEC. 102. MULTIYEAR CONSERVATION CONTRACTS.

Effective only with respect to the 1990 crops of wheat, feed grains, upland cotton,

extra long staple cotton, or rice, section 1010 of the Food Security Act of 1985 (7 U.S.C. 1445i) is amended to read as follows:

"SEC. 1010. MULTIYEAR CONSERVATION CONTRACTS.

"(a) IN GENERAL.—The Commodity Credit Corporation (hereinafter referred to in this section as the 'Corporation') shall offer to enter into multiyear conservation contracts that extend for a period of 3 crop years for each of the 1990 crops specified in subsection (b).

"(b) ELIGIBILITY.—A contract authorized under subsection (a) shall only be entered into by the Corporation with a farm owner or operator (hereinafter referred to in this section as the 'producer') who is participating in one or more production adjustment programs in effect for the 1990 crops of wheat, feed grains, upland cotton, extra long staple cotton, or rice.

"(c) DUTIES OF PRODUCERS.—

"(1) LAND SUBJECT TO CONTRACT.—Under a contract entered into under this section, a producer shall set aside an acreage of cropland that is equal to 5 percent of the 1990 crop acreage base for the farm for the crop (determined in accordance with title V of the Agricultural Act of 1949 (7 U.S.C. 1461 et seq.)).

"(2) CONSERVATION REQUIREMENT.—A producer entering into a contract under this section shall devote acreage subject to the contract to vegetative cover in a manner that will assure that such acreage does not have an average annual rate of erosion in excess of the soil loss tolerance level, as established by the Secretary.

"(3) PROHIBITIONS.—During the term of a contract entered into under this section, a producer shall agree—

"(A) to comply with applicable State and local laws and regulations that govern noxious weed control;

"(B) not to conduct any harvesting or grazing, nor otherwise make commercial use of the forage, on land that is subject to the contract, nor adopt any similar practice specified in the contract by the Corporation as a practice that would tend to defeat the purposes of the contract, except that the Corporation may permit harvesting or grazing or other commercial use of the forage on land that is subject to the contract in response to a drought or other similar emergency; and

"(C) not to adopt any practice that is specified in the contract entered into with the Corporation as a practice that would tend to defeat the purpose of the contract.

"(d) COST-SHARING PAYMENTS FOR CONSERVATION MEASURES.—

"(1) IN GENERAL.—Subject to the cooperation and participation of States under paragraph (3), the Corporation shall offer cost-sharing incentives to producers to encourage such producers to enter into contracts for the establishment of vegetative cover under this section.

"(2) FEDERAL PAYMENTS.—Under a contract entered into under this section, the Corporation shall pay 25 percent of the cost of the establishment of vegetative cover on land that is subject to such contract in a manner that is set forth in such contract and for which the Corporation determines that cost-sharing is appropriate and in the public interest.

"(3) STATE PAYMENTS.—For a producer to be eligible to enter into a contract under this section, the State in which the farm is located in shall agree to make cost-share payments to such producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is at least 25 percent of the amount of the cost of the establishment of vegetative cover on land that is subject to such contract in a manner that is set forth in such contract and for which the Corporation determines that cost-sharing is appropriate and in the public interest.

"(e) RELATIONSHIP TO OTHER CROPS AND PROGRAMS.—

"(1) OTHER CROPS.—A producer may devote to conservation uses under the program established by this section acreage normally devoted to the production of a commodity, without regard to whether the producer enrolls in such program acreage normally devoted to the production of other program crops on the farm.

"(2) ACREAGE LIMITATION AND SET-ASIDE PROGRAMS.—Notwithstanding any other provision of law, the quantity of acreage that a producer would otherwise be required to idle under an acreage limitation program or set-aside program established under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) or under a production supply program established under the Agricultural Adjustment Act of 1938 (7 U.S.C. 1281 et seq.) as a condition of receiving loans, purchases, or payments under such programs, shall be reduced to the extent that the producer enrolls acreage in the program established by this section.

"(3) LAND DIVERSION PROGRAMS.—Acreage subject to a land diversion contract entered into under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) shall not be enrolled in the program established by this section.

"(4) BASE PROTECTION.—The crop acreage base and the farm program payment yield for a commodity shall not be reduced due to the fact that acreage on the farm was devoted to conserving uses under this section.

"(f) REGULATIONS.—The Corporation shall issue such regulations as the Corporation determines necessary to carry out this section.".

SEC. 103. APPLICATION OF HIGHLY ERODIBLE LAND PROTECTION TO IDLED CROPLAND.

(a) PROGRAM INELIGIBILITY.—Section 1211 of the Food Security Act of 1985 (16 U.S.C 3811) is amended by adding "or is considered to have planted" after "crop year produces".

(b) EXEMPTIONS.—Section 1211 of such Act (16 U.S.C. 3811) (as amended in subsection (a)) is further amended—

(1) by inserting "(a) IN GENERAL.—" before "Except as provided"; and

(2) by adding at the end thereof the following new subsection:

"(b) CONSERVATION PLAN OR SYSTEM REQUIREMENT.—Effective for the 1990 and subsequent crop years, and notwithstanding any other provision of law, the Secretary shall require that any individual who in any crop year participates in a program administered by the Secretary to reduce the production of an agricultural commodity by devoting permitted acreage to conserving use, or by setting aside, diverting or otherwise not cultivating, acreage on which highly erodible land is predominate shall, in order to maintain eligibility for benefits under such program or for any of the program benefits described in subsection (a), manage such acreage under a conservation plan or system that has been approved in accordance with section 1212.".

SEC. 104. CONSERVATION COMPLIANCE AND SODBUSTER CONSISTENCY.

Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by adding at the end thereof the following new subsection:

"(m)(1) A producer of a commodity, that receives price support under this section, who benefits directly or indirectly from such a price support for such commodity, shall be subject to the same conservation requirements on the farm of such producer (including requirements affecting highly erodible land, under subtitle B of title XII of the Food Security Act of 1985 (16 U.S.C. 3811 et seq.)) as are applicable to a producer of a commodity that receives price support under other provisions of this Act in the form of a payment or loan, as determined by the Secretary.

"(2) Notwithstanding any other provision of law, if a producer of any commodity referred to in paragraph (1), violates any conservation requirement applicable to the producer, such producer shall be ineligible for the benefits described in section 1211 of the Food Security Act of 1985 (16 U.S.C. 3811) including crop insurance, and the Secretary may impose on the producer an additional penalty that shall be an amount equal to the product obtained by multiplying—

"(A) not less than 25 percent, nor more than 50 percent, of the price support level in effect for the commodity, on the date that the producer is determined by the Secretary to be in violation of such conservation requirements; by

"(B) the average annual quantity of the commodity produced on the farm of the producer during the 5 preceding years, as determined by the Secretary.".

SEC. 105. NO NET LOSS OF SOIL ON LAND LEAVING THE CRP.

Section 1232 of the Food Security Act of 1985 (16 U.S.C. 3832) is amended—

(1) in subsection (b)(1)—

(A) by striking out "and" following the semicolon at the end of subparagraph (A); and

(B) by adding at the end thereof the following new subparagraph:

"(C) effective only with respect to contracts entered into after the date of enactment of the Conservation Enhancement and Improvement Act of 1989, the measures and practices to be utilized by the owner or operator on the land, after the expiration of the term of such contract, to limit the soil erosion of such land to not more than the soil loss tolerance level for the land in order to assure that there is no net loss of soil on such land after the contract expires, except that the Secretary may specify a different erosion rate for the land if the Secretary determines that it is technically not feasible to limit the soil erosion on such land to such soil loss tolerance level; and"; and

(2) by adding at the end thereof the following new subsection:

"(d) Notwithstanding section 1212, if an owner or operator fails to comply with the provisions of the plan implemented under subsection (a)(1) that are related to the requirement contained in subsection (b)(2)(C) after the expiration of the term of the contract to which the plan relates, the owner or operator shall be subject to section 1211.".

TITLE II—WILDLIFE HABITAT IMPROVEMENT

SEC. 201. MULTIYEAR WILDLIFE HABITAT IMPROVEMENT CONTRACTS.

Effective only with respect to contracts entered into during the 1990 crop year, section 1010 of the Food Security Act of 1985

(as amended by section 102 of this Act) is further amended—

(1) by redesignating subsections (e) through (g) as subsections (f) through (h), respectively; and

(2) by inserting after subsection (d) the following new subsection:

"(e) COST-SHARING PAYMENTS FOR WILDLIFE HABITAT IMPROVEMENT.—

"(1) IN GENERAL.—Subject to the cooperation and participation of a State in a program of wildlife habitat improvement, the Corporation shall offer cost-sharing incentives to encourage producers who participate in multiyear set asides to make improvements in wildlife habitat, including the production of wildlife feed and cover.

"(2) FEDERAL PAYMENTS.—Under a contract entered into under this section, the Corporation shall pay 25 percent of the costs of carrying out practices designed to improve wildlife habitat (including the production of wildlife feed and cover) that are contained in such contact and for which the Corporation determines that cost-sharing is appropriate and in the public interest.

"(3) STATE PAYMENTS.—For a producer to be eligible to receive cost-sharing payments under this subsection, the State in which the farm is located shall—

"(A) agree to make cost-share payments to the producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is equal to at least 25 percent of the cost of carrying out the practices referred to in paragraph (1); and

"(B) submit a plan to the Corporation to improve wildlife habitat in the State and receive the approval of the Corporation for the plan.

"(4) ADDTIONAL PAYMENTS.—Payments made by the Corporation and a State under this subsection shall be in addition to, and not in lieu of, payments made under other provisions of this section.".

SEC. 202. ANNUALLY IDLED ACRES.

(a) WHEAT.—Effective only for the 1990 crop of wheat, section 107D(f)(6) of the Agricultural Act of 1949 (7 U.S.C. 1445b-3(f)(6)) is amended—

(1) by striking out subparagraphs (A) and (B);

(2) by redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively; and

(3) by inserting after the paragraph designation the following new subparagraph:

"(A)(i) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to the improvement of wildlife habitat (including the production of wildlife feed and cover) in conformity with standards established by the Commodity Credit Corporation in consultation with State wildlife agencies.

"(ii) The Commodity Credit Corporation shall pay 25 percent of the cost of practices designed to carry out clause (i).

"(iii) For a producer to be eligible to receive cost-sharing payments under this subparagraph, the State in which the farm is located shall—

"(I) agree to make cost-share payments to the producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is equal to at least 25 percent of the cost of practices designed to carry out clause (i); and

"(II) submit a plan to the Commodity Credit Corporation to improve wildlife habitat in the State and receive the approval of the Corporation for the plan.".

(b) FEED GRAINS.—Effective only for the 1990 crop of feed grains, section 105C(f)(6) of such Act (7 U.S.C. 1444e(f)(6)) is amended—

(1) by striking out subparagraphs (A) and (B);

(2) by redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively; and

(3) by inserting after the paragraph designation the following new subparagraph:

"(A)(i) Any reduced acreage, set-aside acreage, and additional diverted acreage may be devoted to the improvement of wildlife habitat (including the production of wildlife feed and cover) in conformity with standards established by the Commodity Credit Corporation in consultation with State wildlife agencies.

"(ii) The Commodity Credit Corporation shall pay 25 percent of the cost of practices designed to carry out clause (i).

"(iii) For a producer to be eligible to receive cost-sharing payments under this subparagraph, the State in which the farm is located shall—

"(I) agree to make cost-share payments to the producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is equal to at least 25 percent of the cost of practices designed to carry out clause (i); and

"(II) submit a plan to the Commodity Credit Corporation to improve wildlife habitat in the State and receive the approval of the Corporation for the plan.".

(c) COTTON.—Effective only for the 1990 crop of upland cotton, section 103A(f)(5) of such Act (7 U.S.C. 1444-1(f)(5)) is amended—

(1) by striking out subparagraphs (A) and (B);

(2) by redesignating subparagraph (C) as subparagraph (B); and

(3) by inserting after the paragraph designation the following new subparagraph:

"(A)(i) Any reduced acreage and additional diverted acreage may be devoted to the improvement of wildlife habitat (including the production of wildlife feed and cover) in conformity with standards established by the Commodity Credit Corporation in consultation with State wildlife agencies.

"(ii) The Commodity Credit Corporation shall pay 25 percent of the cost of practices designed to carry out clause (i).

"(iii) For a producer to be eligible to receive cost-sharing payments under this subparagraph, the State in which the farm is located shall—

"(I) agree to make cost-share payments to the producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is equal to at least 25 percent of the cost of practices designed to carry out clause (i); and

"(II) submit a plan to the Commodity Credit Corporation to improve wildlife habitat in the State and receive the approval of the Corporation for the plan.".

(d) RICE.—Effective only for the 1990 crop of rice, section 101A(f)(5) of such Act (7 U.S.C. 1441-1(f)(5)) is amended—

(1) by striking out subparagraphs (A) and (B);

(2) by redesignating subparagraph (C) as subparagraph (B); and

(3) by inserting after the paragraph designation the following new subparagraph:

"(A)(i) Any reduced acreage and additional diverted acreage may be devoted to the improvement of wildlife habitat (including the production of wildlife feed and cover) in conformity with standards established by the Commodity Credit Corporation in consultation with State wildlife agencies.

"(ii) The Commodity Credit Corporation shall pay 25 percent of the cost of practices designed to carry out clause (i).

"(iii) For a producer to be eligible to receive cost-sharing payments under this subparagraph, the State in which the farm is located shall—

"(I) agree to make cost-share payments to the producer (from State appropriated funds or from private contributions received by the State from individuals other than such producer) in an amount that is equal to at least 25 percent of the cost of practices designed to carry out clause (i); and

"(II) submit a plan to the Commodity Credit Corporation to improve wildlife habitat in the State and receive the approval of the Corporation for the plan.".

TITLE III—ALTERNATIVE AGRICULTURAL PRACTICES AND NEW CROPS

SEC. 301. SENSE OF CONGRESS IN SUPPORT OF PLANTING FLEXIBILITY.

(a) FINDINGS.—Congress finds that—

(1) there is an increasing interest among farmers, agribusiness leaders and consumers to facilitate the increased use of low-input sustainable practices among farmers;

(2) Federal agricultural programs should be designed and implemented to encourage and promote sound conservation practices among farmers who participate in such programs;

(3) Federal agricultural programs should be evaluated periodically to determine whether such programs unintentionally discourage sound conservation practices; and

(4) the initial evaluation of current agricultural programs indicates that the present system for determining farm acreage bases, crop acreage bases and other allocations of acreage to farmers may be inadvertently promoting undesirable environmental effects by—

(A) creating incentives for farmers to make planting decisions based on the need to maximize deficiency payments during the current year and to preserve crop acreage bases for program participation in future years rather than in response to market signals;

(B) discouraging farmers from using sound rotational practices; and

(C) encouraging the continued planting of crops that increasingly bleed from the soil essential minerals and moisture that would be conserved or even replaced by planting other crops.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that—

(1) during the review and development of program provisions for the successor law to the Food Security Act of 1985 (Public Law 99-198), priority should be given to evaluating the effects of acreage base provisions on soil and water conservation and on the ability of producers to carry out environmentally and economically sustainable agricultural practices; and

(2) changes in the acreage base provisions provided for in the Agricultural Act of 1949 (7 U.S.C. 1441 et seq.) should be made to provide greater flexibility in planting decisions and to permit producers to pursue sound conservation practices through the facilitation of additional planting options without adverse effects on future crop acreage base calculations, in order to promote the allocation of acreage among crops based

on good farming practices instead of Federal agricultural program considerations.

SEC. 302. NATURALLY GROWN FOOD CERTIFICATION.

(a) DEFINITION.—For purposes of this section:

(1) NATURAL CONDITION.—The term "natural condition" means a condition under which a food item is produced without the aid of any man-made chemical.

(2) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(b) CERTIFICATION.—On application of a State, the Secretary shall certify a State program under which retail food items produced under natural conditions are certified as having been produced under natural conditions, if the program meets reasonable terms and conditions established by the Secretary.

(c) LABELS.—A State that maintains a program that is certified under subsection (b) may place a label on a retail food item produced under natural conditions, or a package or container of such items, that states the State program has been certified under subsection (b).

(d) FEES.—The Secretary shall collect such fees from participating States as are necessary to assure that this section is carried out at no cost to the Federal Government.

TITLE IV—WATER PROTECTION AND ENHANCEMENT

SEC. 401. CRITICAL CONTAMINATION AREAS.

Section 1231(c) of the Food Security Act of 1985 (16 U.S.C. 3831(c)) is amended by adding at the end thereof the following new paragraph:

"(3)(A) The Secretary shall include in the program established by this subtitle cropland, regardless of the erodibility of such land, if the Secretary determines that—

"(i) groundwater in the area has been contaminated;

"(ii) the contamination is having a significant adverse effect; and

"(iii) converting such cropland to a less intensive use would prevent further contamination.

"(B) The Secretary shall consider allowing minimum impact agricultural uses on land placed into the program under subparagraph (A). Notwithstanding section 1234, the Secretary shall adjust the rental payment rates for such land to such level as the Secretary determines is appropriate after considering any allowances granted for any such uses. Cost share payments under section 1234 shall not be provided if minimum impact agricultural uses are permitted on such land.".

SEC. 402. WETLAND RESERVE PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—Title XII of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.) is amended by inserting after subtitle D the following new subtitle:

"SUBTITLE E—WETLAND RESERVE PROGRAM

"SEC. 1240A. ESTABLISHMENT.

"(a) IN GENERAL.—The Secretary shall establish and carry out a wetland reservation program, in accordance with this subtitle, through contracts to assist owners and operators of converted wetlands and adjacent areas (as defined by the Secretary, except that wetlands converted after December 23, 1985, shall not be eligible for such program) in restoring such lands to their natural state.

"(b) ENROLLMENT.—

"(1) IN GENERAL.—The Commodity Credit Corporation (hereinafter referred to in this subtitle as the 'Corporation') shall enter into contracts with owners and operators of lands containing converted wetlands, or adjacent areas, to place in the wetland reserve a total of not less than 2,500,000 acres during the 1990 crop year.

"(2) CONSERVATION RESERVE.—Land entered into the program established by this subtitle shall be included in determining the number of acres entered into the conservation reserve program established by subtitle D, except that in no case shall the combined total number of acres enrolled in such programs exceed 45,000,000 acres in the 1990 crop year.

"(c) PERIOD OF CONTRACTS.—For the purpose of carrying out this subtitle, the Corporation shall enter into contracts of not less than 10, nor more than 15, years.

"SEC. 1240B. DUTIES OF OWNERS AND OPERATORS.

"Under the terms of a contract entered into under this subtitle, during the term of such contract, an owner or operator of such lands shall agree—

"(1) to implement a plan approved by the local conservation district (or in an area not located within a conservation district, a plan approved by the Corporation) for restoring converted wetlands or adjacent areas to their natural State in accordance with regulations promulgated by the Corporation;

"(2) to place converted wetlands or adjacent areas subject to a contract into the wetland reserve established under this subtitle;

"(3) not to use such land for agricultural purposes except as permitted by the Corporation; and

"(4) to provisions similar to those required under paragraphs (5) through (10) of section 1232(a).

"SEC. 1240C. DUTIES OF THE CORPORATION.

"In return for a contract entered into by an owner or operator under section 1240B, the Corporation shall—

"(1) share the cost of carrying out the restoration measures and practices set forth in the contract for which the Corporation determines that cost sharing is appropriate and in the public interest;

"(2) for a period of years not to exceed the term of the contract, pay an annual rental payment in an amount necessary to compensate the owner or operator for—

"(A) any loss of the use of land resulting from the restoration of the wetland or adjacent areas; and

"(B) the loss of cropland base and allotment history on acres that the owner or operator agrees to retire permanently under section 1240F; and

"(3) provide restoration technical assistance to the owner or operator in carrying out the contract.

"SEC. 1240D. PAYMENTS.

"(a) GENERAL DUTIES.—The Corporation shall provide payment for obligations incurred by the Corporation under a contract entered into under this subtitle with respect to any cost-sharing or annual rental payment obligation incurred by the Corporation, as soon as possible after the obligation is incurred.

"(b) COST SHARE PAYMENTS.—In making cost sharing payments to owners and operators under contracts entered into under this subtitle, the Corporation shall pay not to exceed 50 percent of the cost of the restoration measures and practices set forth in such contracts for which the Corporation determines that cost-sharing is appropriate and in the public interest.

"(c) AMOUNT OF PAYMENTS.—

"(1) ENCOURAGING PARTICIPATION.—In determining the amount of annual rental payments to be paid to owners and operators for restoring converted wetlands or adjacent areas to their natural state, the Secretary may consider, among other things, the amount necessary to encourage owners or operators to participate in the program established by this subtitle.

"(2) BIDDING.—The amounts payable to owners or operators in the form of rental payments under contracts entered into under this subtitle may be determined through—

"(A) the submission of bids for such contracts by owners and operators in such manner as the Secretary may prescribe; or

"(B) such other means as the Secretary determines are appropriate.

"(3) ACCEPTABILITY OF OFFERS.—In determining the acceptability of contract offers, the Secretary may—

"(A) take into consideration the desirability of restoring the converted wetland and adjacent areas covered by such contract offer and the extent to which such restoration will result in the loss of the use of such land for production of agricultural commodities;

"(B) establish different criteria in various States and regions of the United States to determine the extent to which converted wetlands should be restored; and

"(C) give priority to offers made by owners and operators who are subject to the highest degree of economic stress, such as a general tightening of agricultural credit or an unfavorable relationship between production costs and prices received for agricultural commodities.

"(d) METHOD OF PAYMENT.—

"(1) IN GENERAL.—Except as otherwise provided in this section, payments under this subtitle—

"(A) shall be made in cash or in commodities in such amount and on such time schedule as is agreed on and specified in the contract; and

"(B) may be made in advance of determination of performance.

"(2) IN-KIND PAYMENT.—If such payment is made with in-kind commodities, such payment shall be made by the Corporation—

"(A) by delivery of the commodity involved to the owner or operator at a warehouse or other similar facility located in the county in which the converted wetland or adjacent area is located or at such other location as is agreed to by the Corporation and the owner or operator;

"(B) by the transfer of negotiable warehouse receipts; or

"(C) by such other method, including the sale of the commodity in commercial markets, as is determined by the Corporation to be appropriate to enable the owner or operator to receive efficient and expeditious possession of the commodity.

"(3) If stocks of a commodity acquired by the Corporation are not readily available to make full payment in kind to the owner or operator, the Corporation may substitute full or partial payment in cash for payment in kind.

"(e) SUCCESSION.—If an owner or operator who is entitled to a payment under a contract entered into under this subtitle dies, becomes incompetent, is otherwise unable to receive such payment, or is succeeded by another person who renders or completes the required performance, the Corporation shall make such payment, in accordance with regulations prescribed by the Corporation and without regard to any other provision of law, in such manner as the Corporation determines is fair and reasonable in light of all of the circumstances.

"SEC. 1240E. CONTRACTS.

"The provisions of section 1235 shall apply with respect to contracts entered into under this subtitle.

"SEC. 1240F. PRESERVATION OF BASE.

Notwithstanding any other provision of law, the Corporation, by appropriate regulation, shall provide for preservation of cropland base and allotment history applicable to any converted wetlands and adjacent areas restored under this subtitle, for the purpose of any Federal program under which the history is used as a basis for participation in the program or for an allotment or other limitation in the program, unless the owner or operator agrees under the contract to retire permanently that cropland base and allotment history.".

(b) CONFORMING AMENDMENTS.—

(1) The heading for subtitle E of the Food Security Act of 1985 (16 U.S.C. 3841) (as such subtitle existed prior to the date of enactment of this Act) is amended by striking out "E" and inserting in lieu thereof "F".

(2) Section 1241 of such Act (16 U.S.C. 3841) is amended—

(A) in subsection (a), by striking out "subtitle D" each place that such appears and inserting in lieu thereof "subtitle D and E"; and

(B) in subsection (b), by striking out "(A) through (E)" and inserting in lieu thereof "A through F".

(3) Section 1242 of such Act (16 U.S.C. 3842) is amended—

(A) in subsection (a), by striking out "and D" and inserting in lieu thereof "D, and E"; and

(B) in subsection (b), by striking out "subtitle D" each place that such appears and inserting in lieu thereof "subtitles D and E".

(4) Section 1243 of such Act (16 U.S.C. 3843) is amended—

(A) in subsection (a) by striking out "subtitles A through E" and inserting in lieu thereof "A through F"; and

(B) in subsection (c)—

(i) by striking out "B through E" and inserting in lieu thereof "B through F"; and

(ii) by striking out "program established by subtitle D" and inserting in lieu thereof " programs established by subtitles D and E".

(5) Section 1244 of such Act (16 U.S.C. 3844) is amended in the matter preceding paragraph (1), by striking out "A through E" and inserting in lieu thereof "A through F".

(6) The heading for subtitle F of such Act (as such subtitle existed prior to the date of enactment of this Act) is amended by striking out "F" and inserting in lieu thereof "G".

SEC 403. WATER BANK PROGRAM REFORM.

Section 4 of the Water Bank Act (16 U.S.C. 1303) is amended—

(1) by inserting before "In the agreement" the following: "(a) IN GENERAL.—"; and

(2) by adding at the end thereof the following new subsection:

"(b) EASEMENTS.—

"(1) IN GENERAL.—In the agreement between the Corporation and an owner or operator, entered into under subsection (a) after the date of enactment of this subsection, the owner or operator shall agree to grant the Secretary a permanent easement on the wetlands or adjacent areas, as determined appropriate by the Secretary, that are the subject of the agreement.

"(2) CONTENTS OF EASEMENTS.—Easements granted under paragraph (1) shall prohibit—

"(A) commodity production on such wetlands or adjacent areas, except for authorized haying and grazing and timber harvesting as permitted by the Corporation;

"(B) destruction of such wetlands or adjacent areas; and

"(C) alteration of the wetlands or adjacent areas, except as the Secretary may permit under conditions prescribed by the Secretary.

"(3) PAYMENTS.—The Secretary shall agree to make easement payments to an owner or operator under this subsection, that may, at the option of such owner or operator, be made in the form of a lump sum payment based on the 10 year net present value of bids accepted by the Secretary for such easements.

"(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such funds as may be necessary to make payments under this subsection at levels sufficient to cover the cost of enrolling in the program at least as many acres of land as were enrolled during 1989.".

SEC. 404. WETLAND PROTECTION.

Subtitle D of the Consolidated Farm and Rural Development Act is amended by adding after section 358 (7 U.S.C. 2006) the following new section:

"SEC. 359. PROHIBITION ON USE OF LOANS FOR CERTAIN PURPOSES.

"A loan made, insured, guaranteed, or otherwise assisted under this title may not be used to drain, dredge, fill, level, or otherwise manipulate a wetland (as defined in section 1201(a)(16) of the Food Security Act of 1985 (16 U.S.C. 3801(a)(16)), including any activity that results in impairing or reducing the flow, circulation, or reach of water, except in the case of activity related to the maintenance of previously converted wetlands or in the case of such activity that is already commenced.".

SEC. 405. SINKHOLE CONTAMINATION ABATEMENT.

Section 1231(c) of the Food Security Act of 1985 (16 U.S.C. 3831(c)) (as amended by section 401 of this Act) is further amended by adding at the end thereof the following new paragraph:

"(4)(A) The Secretary shall include in the program established under this subtitle zones of vegetative cover in an area, without regard to the cropland erosion classification by the Soil Conservation Service of such area, if—

"(i) the area is underlain by a geologic formation and soil that may provide direct access to groundwater; and

"(ii) the Secretary determines that an adverse effect on groundwater quality would occur if such area remains in production.

"(B) Notwithstanding section 1232(a)(2), the Secretary may permit owners and operators of land included, under this paragraph, in the program established under this subtitle to use such land for certain minimum impact agricultural uses as determined by the Secretary. Such uses may be considered by the Secretary in determining whether to make adjustments in the rental payment rates provided to owners and operators under this paragraph. Cost share payments under section 1234 shall not be permitted if minimum impact agricultural uses are permitted on the land.".

SEC. 406. WELL WATER TESTING PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Agriculture shall establish and administer, through the applicable county extension service office, a voluntary well water testing program to enable such well owners and users to determine the extent of well water contamination and to provide confidential information on water quality to such owners and users.

(b) CONTRACTING.—The Secretary may contract with public or private testing facilities to conduct well water quality tests under this section.

(c) COST SHARING.—The Secretary shall reimburse well owners or users who request testing under this section for not less than 50 percent of the cost of such testing under terms and conditions specified by the Corporation.

(d) CONFIDENTIALITY.—Well water test results under this section shall remain confidential.

(e) SAMPLING.—The Corporation may, through the use of a random sampling technique, compile information and data concerning the well water testing program conducted under this section.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

SEC. 407. SWAMPBUSTER CONSISTENCY.

Section 201(m) of the Agricultural Act of 1949 (7 U.S.C. 1446) (as added by section 104) is amended—

(1) in paragraph (1), by striking out "under subtitle B" and inserting in lieu thereof "and wetlands under subtitles B and C"; and

(2) in paragraph (2), by striking out "section 1211 of the Food Security of 1985 (16 U.S.C. 3811)" and inserting in lieu thereof "sections 1211 and 1221 of the Food Security Act of 1985 (16 U.S.C. 3811 and 3821)".

SEC. 408. APPLICATION OF WETLANDS PROTECTIONS TO IDLED CROPLAND.

Section 1221 of the Food Security Act of 1985 (16 U.S.C. 3821) is amended by inserting "or is considered to have been planted" after "crop year produces".

TITLE V—FOREST PROTECTION AND ENHANCEMENT

SEC. 501. NO NET OVERALL LOSS OF FOREST AREA.

(a) POLICY.—It is the policy of the United States to ensure that United States forest area continues to be maintained at current levels.

(b) IMPLEMENTATION OF POLICY.—

(1) IN GENERAL.—The Secretary of Agriculture (hereinafter in this section referred to as the "Secretary"), in consultation with other appropriate Federal agencies, shall, to the maximum extent practicable, balance the destruction of forest area with the renewal of forest area.

(2) PROGRAMS.—Notwithstanding any other provision of law, for purposes of maintaining United States forest area, the Secretary is encouraged to use the following programs:

(A) The conservation reserve program established by subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.).

(B) The agricultural conservation program authorized by sections 7 through 15, 16 (a), 16 (f), and 17 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590g through 590o, 590p(a), 590p(f), and 590(g) and sections 1001 through 1008 and 1010 of the Agricultural Act of 1970 (16 U.S.C. 1501 through 1508 and 1510).

(C) The forestry incentive program established under section 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103).

SEC. 502. SHELTERBELTS AND WINDBREAKS.

(a) INCLUSION IN CRP.—Section 1234(c) of the Food Security Act of 1985 (16 U.S.C. 3834(c)) is amended—

(1) in paragraph (3)(B), by striking out "establishment of—" and all that follows through "permanently" and inserting in lieu thereof "establishment of permanently"; and

(2) by adding at the end thereof the following new paragraph:

"(4) In determining the acceptability of contract offers, the Secretary shall, under terms and conditions specified by the Secretary, accept contract offers that provide for the establishment of shelterbelts and windbreaks. The owner or operator of such land may, within the limitations prescribed under section 1231(e), specify the term of the contract. Any land designated for use in establishing a shelterbelt or windbreak shall be eligible for participation in the program established under this subtitle regardless of the soil erosion classification of such land as determined by the Soil Conservation Service. An owner or operator using land under this paragraph for the purposes of the program established under this subtitle shall grant an easement to the Corporation on such windbreak or shelterbelt for the useful life of such windbreak or shelterbelt, and any deeds on such land shall be encumbered with such easements for such useful life.".

(b) COST-SHARING PAYMENTS.—Section 1234(b) of such Act (16 U.S.C. 3834(c)) is amended by inserting after "conservation measures and practices" the following: "(including shelterbelts and windbreaks)".

(c) COUNTY CROPLAND LIMITATION.—Section 1231(d) of such Act (16 U.S.C. 3831(d)) is amended by adding at the end thereof the following new sentence: "The limitation established under the preceding sentence shall not apply to cropland that is being used for the establishment of shelterbelts and windbreaks.".

SEC. 503. TREE PLANTING INCENTIVES.

(a) TERM OF CONTRACT.—Section 1231(e) of the Food Security Act of 1985 (16 U.S.C. 3831(e)) is amended by inserting before the period at the end thereof the following: ", except that, in the case of land converted to the production of hardwood trees under a contract entered into under this subtitle, including contracts modified under section 1234(h), the owner or operator of such land may, within the limitations prescribed by this section, specify the term of the contract".

(b) COST-SHARING PAYMENTS AND PERIOD OF PLANTING.—Section 1234 of such Act (16 U.S.C. 3834(b)) is amended by adding at the end thereof the following new subsection:

"(g)(1) In the case of land converted to the production of hardwood trees under a contract entered into under this subtitle after the date of enactment of this subsection, the Secretary shall make cost-sharing payments to an owner or operator of such land for 50 percent of the reasonable and necessary costs, as determined by the Secretary, incurred by such owner or operator for maintaining new hardwood tree plantings (including the cost of replanting, cultivation, nutrient needs, and disease and insect control) during no less than the 2-year, and no more than the 4-year, period beginning on the date a tree is planted, as determined by the Secretary.

"(2) The Secretary may permit owners or operators who contract to convert at least 10 acres of land to the production of hardwood trees under this subtitle to extend the planting of such trees over a 3-year period if at least one-third of such trees are planted in each of the first 2 years.".

(c) CONVERSION OF CERTAIN ACRES.—Section 1234 of such Act (16 U.S.C. 3834(b)) (as amended by subsection (b)) is further amended by adding at the end thereof the following new subsection:

"(h) The Secretary shall permit owners and operators who have entered into contracts in effect under this subtitle on the date of enactment of this subsection to convert areas of highly erodible cropland that are planted to grass under such contract to the planting of hardwood trees, except that the owner or operator shall not require the Secretary, through such conversion, to incur any additional expense on such acres, including the expense involved in the original establishment of the vegetative cover, that is in excess of the average per acre hardwood tree planting expense in the same or similar bid pool. With respect to any contract on land to be planted to hardwood trees under the previous sentence, if the original term of such contract was less than 15 years, the owner or operator may extend such contract to a term of no more than 15 years.".

(d) COUNTY CROPLAND LIMITATION.—Section 1231(d) of such Act (16 U.S.C. 3831(d)) (as amended by section 502(c)) is further amended by inserting before the period at the end thereof "or for new hardwood tree plantings.".

SEC. 504. FOREST CLEARING SUBSIDIES.

Section 359 of the Consolidated Farm and Rural Development Act (as added by section 404 of this Act) is further amended—

(1) by inserting "(1)" after "may not be used"; and

(2) by inserting before the period at the end thereof the following: ", or (2) to clear trees, except for purposes of sustainable management of trees or harvesting trees grown for commercial purposes, if clearing trees would pose a significant adverse environmental threat on the land".

SEC. 505. URBAN FORESTRY.

(a) PURPOSE.—For purposes of stimulating forestry efforts in and around urban areas, the Secretary of Agriculture is encouraged to upgrade urban forestry research, education, and technical assistance.

(b) USE OF EXISTING FUNDS.—The Secretary of Agriculture is authorized to reallocate funds appropriated for research and assistance and use such funds for—

(1) the expansion of the current Forest Service urban forestry research program;

(2) assisting States to employ extension agents to assist in urban forestry education programs; and

(3) providing each State Forestry office with access to persons trained in the provision of urban forestry technical assistance.

TITLE VI—MISCELLANEOUS

SEC. 601. ENVIRONMENTAL PROTECTION.

Section 1231(c)(2) of the Food Security Act of 1985 (16 U.S.C. 3831(c)(2)) is amended to read as follows:

"(2)(A) The Secretary shall include in the program established under this subtitle lands that are not highly erodible but that the Secretary determines pose an on-farm or off-farm environmental threat.

"(B) The Secretary may include in the program established under this subtitle lands that are not highly erodible but would, if permitted to remain in production, pose a threat of continued degradation of productivity due to soil salinity.".

CONSERVATION ENHANCEMENT AND IMPROVEMENT ACT OF 1989

TITLE I. EROSION CONTROL

A. CRP Base Protection

For purposes of removing artificial incentives that may encourage the return of ground to crop production for which the CRP contracts have expired, the Secretary may ensure that crop acreage bases are maintained on such acres for up to 5 years after expiration of the CRP contract.

B. Multi-Year Set Asides

The Secretary shall offer incentives to participants in farm programs to idle 5% of their crop acreage base under multi-year conservation contracts (wheat, feed grains, cotton, ELS cotton, and rice).

(1) Contracts must be 3 years in duration.

(2) Incentives must include providing 25% of the cost of establishing vegetative cover.

(3) Producers will be required to meet erosion criteria of at least the soil loss tolerance.

(4) States will be required to provide at least 25% of the cost of establishing vegetative cover. The state share may include private contributions to the state for this purpose.

(5) Producers may enter into contracts on one program crop without respect to other program crops.

(6) Acres enrolled in a paid diversion are not eligible for multi-year conservation contracts.

(7) Multi-year contract acres would be in lieu of a like amount of acres that might be required to be idled under annual price and income support programs.

C. Protection of Idled Cropland

For those farms containing highly erodible land, annually idled cropland should be protected on the same basis as cropped acres. Annually idled acres must not erode at rates greater than that allowed for similar cropped land on the farm.

D. Conservation Compliance and Sodbuster Consistency

For purposes of applying conservation compliance and sodbuster provisions consistently, alternative enforcement mechanisms will be provided to the Secretary.

(1) The Secretary may impose penalties on producers in addition to revoking program participation benefits when such benefits are indirectly conferred through a cooperative marketing arrangement or other third party mechanism.

(2) Penalties may be assessed at the rate of 25-50 percent of price support level in effect on the date the Secretary determines that a producer is in violation of conservation regulations.

E. No Net Loss of CRP Soil

Upon expiration of 10-15 year Conservation Reserve Program contracts entered into after the date of enactment of this Act, producers will be required to at least meet the soil loss tolerance so as to ensure that there is not net loss of soil on lands formerly enrolled in the Conservation Reserve Program. An exception is provided for those lands that cannot technically achieve the soil loss tolerance.

TITLE II. WILDLIFE HABITAT IMPROVEMENT

A. Multi-year Set Asides

For purposes of improving wildlife habitat, the Secretary shall offer incentives to producers (participating in multi-year set asides) for wildlife habitat improvement if

states desire such a program and are willing to match the Federal share.

(1) The federal share shall be equal to 25% of the cost of implementing such wildlife habitat improvements.

(2) Federal and state wildlife habitat improvement expenditures shall be in addition to, and not in lieu of, the federal and state share of the cost of establishing vegetative cover (established under Title I, Section 102) on multi-year set aside acres.

(3) Wildlife habitat improvement incentives shall include, but not be limited to, production of wildlife feed and cover.

(4) The state share shall be equal to 25% of the cost of implementing such wildlife improvements. The state share may include private contributions to the state for this purpose.

(5) States must submit a plan to the Secretary.

B. Annually Idled Acres

The Secretary shall offer incentives to producers participating in annual acreage limitation, set-aside, or paid diversion programs to improve wildlife habitat if states desire such a program and are willing to match the federal share.

(1) The federal share shall be equal to 25% of the cost of implementing such wildlife habitat improvements.

(2) Wildlife habitat improvement incentives shall include, but not be limited to, production of wildlife feed and cover.

(3) The state share shall be equal to 25% of the cost of implementing such wildlife improvements. The state share may include private contributions to the state for this purpose.

(4) States must submit a plan to the Secretary.

TITLE III. ALTERNATIVE AGRICULTURAL PRACTICES AND CROPS

A. Alternative Agriculture

Due to the increasing interest of the part of farmers and others in low-input sustainable agricultural practices, it is the sense of Congress that impediments to the adoption of LISA practices should be explored during the debate on the 1990 farm bill. Specifically, Congress should examine our current farm programs to evaluate those requirements that unintentionally discourage sound conservation and environmental practices, such as the crop acreage base system. Congress should investigate allowing greater flexibility in the base system to allow farmers to allocate acreage among crops based on good farming practices instead of federal farm program considerations. Any such reform of our current system should be at least neutral as to federal outlays on farm support programs.

B. Labels for Naturally Grown Food

The Secretary shall initiate a program designed to standardize state programs aimed at certifying retail food products as having been produced under natural conditions.

(1) Such certification standardization shall be made public through use of an official Department of Agriculture label to be used consistently for all natural food products which have been certified by States as complying with USDA requirements.

(2) For purposes of this Act the term "natural conditions" shall be meant to describe food items produced without the aid of man-made chemicals.

(3) The Secretary shall assess fees to participating states so that federal certification of "natural" food items is achieved at no net cost to the federal government.

TITLE IV. WATER PROTECTION AND ENHANCEMENT

A. Critical Groundwater Contamination Areas

In order to cease contamination of groundwater where such contamination has been identified as having a significant adverse effect and where it is reasonable to expect that idling cropland acres would prevent further contamination, the Secretary shall make such groundwater contamination sites eligible for the Conservation Reserve Program.

(1) Critical contamination sites may be entered into the Conservation Reserve Program without regard to the cropland erosion classification.

(2) The Secretary shall consider allowing minimum impact agricultural uses on critical groundwater contamination sites entered into the Conservation Reserve Program.

(3) Minimum impact uses may be considered by the Secretary to justify CRP rental rate adjustments for critical groundwater contamination sites.

(4) Federal cost share funds to establish vegetative cover, trees or wildlife habitat shall not be available if minimum impact uses are allowed.

B. Wetland Reserve Program (WRP)

The Secretary shall enroll at least 2.5 million acres of converted wetlands in a 10-year Wetland Reserve Program. (WRP)

(1) All acres enrolled in the WRP, including adjacent upland acres will count toward the goal of enrolling 40 million acres in the CRP. However, the total of WRP and CRP acres should not exceed 45 million acres.

(2) Producers will be required to restore enrolled wetlands in accordance with rules and regulations promulgated by the Secretary.

(3) Producers will not be required to enroll cropped wetlands or uplands and will also not be required to give up farm program "base acres" for purposes of WRP participation.

(4) The Secretary shall make payments to producers for up to 50% of the expenses incurred to restore WRP wetlands and adjacent uplands to their natural state.

C. Waterbank Program Reform

For purposes of reforming the Waterbank Program, all new Waterbank contracts shall include a permanent wetland easement.

(1) Easements will prohibit commodity production except for authorized haying and grazing and timber harvest as determined by the Secretary.

(2) Easements will prohibit destruction of the wetland. Alteration of the wetland may be allowed under conditions prescribed by the Secretary.

(3) The Secretary may make easement payments in lump-sum form based on the 10-year net present value of bids accepted for such easements.

D. FmHA Direct and Guaranteed Loans

Eliminate the use of direct and guaranteed FmHA loans for purposes of draining wetlands.

E. Sinkhole Contamination Abatement

For purposes of discouraging groundwater contamination as a result of crop production on or near sinkhole formations providing direct access to groundwater sources, the Secretary shall permit such cropland to enter the Conservation Reserve Program.

(1) Sinkhole contamination sites may be entered into the Conservation Reserve Program without regard to the cropland erosion classification.

(2) The Secretary shall consider allowing minimum impact agricultural uses on sinkhole contamination sites entered into the Conservation Reserve Program.

(3) Minimum impact uses may be considered by the Secretary to justify CRP payment rate adjustments.

(4) Federal cost share funds to establish vegetative cover, trees or wildlife habitat shall not be available if minimum impact uses are allowed.

F. Voluntary Well Water Testing

For purposes of determining the extent of well water contamination and providing confidential information on water quality to well owners and users, the Secretary shall offer, through country Extension Service offices, a well water testing program.

(1) In addition to services that may be performed "in house," by the Extension Service, the Secretary may contract with public or private testing facilities to conduct water quality tests.

(2) The Secretary shall reimburse well owners or lessees for at least 50% of the cost of water testing under terms and conditions specified by the Secretary.

(3) All water well testing results shall remain strictly confidential.

(4) The Secretary may, through use of a blind random sampling technique, compile information and data with respect to the water well testing program conducted under this Section.

G. Swampbuster Consistency

For purposes of applying swampbuster provisions consistently, alternative enforcement mechanisms will be provided to the Secretary.

(1) The Secretary may impose penalties on producers in addition to revoking program participation benefits when such benefits are indirectly conferred through a cooperative marketing arrangement or other third party mechanism.

(2) Penalties may be assessed at the rate of 25-50 percent of price support level in effect on the date the Secretary determines that a producer is in violation of conservation regulations.

H. Applying Wetlands Protection to Idled Acres

The wetland conservation provisions of the 1985 farm bill shall apply to annually idled cropland as well as those acres that produce an agricultural commodity.

TITLE V. FOREST PROTECTION AND ENHANCEMENT

A. No Net Overall Loss of Forest Area

To ensure that United States forest area is maintained, the Secretary, in consultation with other appropriate agencies, shall, to the maximum extent practicable, take steps to continue the current balance in the destruction of forest area with the renewal of forest area. For purposes of maintaining United States forest area, the Secretary is encouraged to use the Conservation Reserve Program, the Agricultural Conservation Program, and the Forestry Incentive Program.

B. Shelterbelts and Windbreaks

For purposes of encouraging soil and water conservation, and wildlife habitat through the use of shelterbelts and windbreaks, the Secretary, in the proper circumstances, shall make land put into shelterbelts and windbreaks eligible for payments under Conservation Reserve Program con-

tracts with easements for the useful life of the shelterbelt or windbreak. Producers will have the option to choose a length of the contract period from 10–15 years regardless of the types of vegetation planted.

(1) The Secretary shall make available to participants 50% of the cost of establishing shelterbelts and windbreaks.

(2) Land designated for shelterbelts and windbreak establishment shall be eligible for CRP participation regardless of the soil erosion classification of such land.

(3) The Secretary shall waive the 25 percent county CRP participation cap for purposes of establishing shelterbelts and windbreaks.

(4) The Secretary shall encumber deeds with shelterbelt or windbreak easements that protect such shelterbelts and windbreaks for their useful life.

C. Hardwood Tree Planting Incentives

For purposes of encouraging use of the Conservation Reserve Program for hardwood tree planting, the Secretary shall offer producers the option of choosing the contract period length, from 10–15 years, for acres planted to hardwood trees.

(1) The Secretary may provide 50% of the cost of maintaining new CRP hardwood tree plantings for up to 4 years and must provide tree maintenance costs for at least two years after their initial planting.

(2) Hardwood maintenance cost may include, but are not limited to, replanting, cultivation, nutrient needs, and disease and insect control which the Secretary deems to be cost-effective.

(3) The Secretary shall offer current CRP participants the option of converting CRP grass acres to hardwood trees as long as such conversion does not require greater total Federal expense on such acres (including the original cost of establishing vegetative cover) than average per acre tree planting expense in the same bid pool. Producers will have the option of converting 10 year contracts to up to 15 year contracts.

(4) The Secretary may permit CRP participants who contract to plant at least 10 acres of hardwood trees to extend the planting period over 3 years as long as at least one-third of the trees are planted in each of the first two years.

(5) The Secretary shall waive the 25 percent county CRP participation cap for purposes of establishing hardwood trees.

D. Forest Clearing Subsidies

This provision would eliminate the use of direct and guaranteed FmHA loans for purposes of clearing trees if such clearing would have a significant adverse effect. There would be an exemption for sustainable management or tree farming.

E. Urban Forestry

For purposes of stimulating forestry efforts in and around urban areas, the Secretary is encouraged to upgrade urban forestry research, education, and technical assistance.

TITLE VI. MISCELLANEOUS

A. Environmental Protection

For purposes of improving general environmental quality, the Secretary shall permit lands that are not highly erodible, but which the Secretary determines poses an off or on farm environmental threat to be enrolled in the Conservation Reserve Program.

SHORT SUMMARY OF SENATOR LUGAR'S CONSERVATION ENHANCEMENT AND IMPROVEMENT ACT OF 1989

TITLE I. EROSION CONTROL

CRP Base Protection—To remove artificial incentives to return land to crop production when CRP contracts have expired, the program on CRP land will be extended for 5 years after the expiration of the CRP contract, as long as producers continue the conserving uses which had been required under the contract.

Multi-year Conservation Set Asides—Using a federal/state match for those states interested in participating, the Secretary would allow 5 percent of producers' crop bases to be set aside for 3 years to improve soil conservation.

Set Aside Conservation—For farms with highly erodible land, set aside land must not erode at rates greater than cropped land on the same farm.

Conservation Compliance and Sodbuster Consistency—Alternative enforcement mechanisms will be provided to the Secretary to use in those cases where current mechanisms are not working.

No Net Loss of CRP Soil—For contracts entered into after the date of enactment, when those CRP contracts expire, ground must meet the soil loss tolerance if it is to be cropped again.

TITLE II. WILDLIFE HABITAT IMPROVEMENT

Multi-year Wildlife Set Asides—Using a federal/state match for those states interested in participating, the Secretary would allow 5 percent of producers' crop bases to be set aside for 3 years to improve wildlife habitat.

Annually Idled Acres—Using a federal/state match for those states interested in participating, the Secretary will offer incentives to producers participating in annual acreage limitation, set aside or paid diversion programs to improve wildlife habitat.

TITLE III. ALTERNATIVE AGRICULTURAL PRACTICES AND CROPS

Alternative Agriculture—In order to eliminate the present farm program bias against adoption of alternative agricultural practices such as LISA and alternative crop production, it is the sense of Congress that the 1990 farm bill should provide farmers with increased flexibility in making planting decisions on a portion of their farm program base acres.

Labels for Naturally Grown Food—In order to standardize and legitimize labeling of organically grown food, the Secretary will initiate a program to certify state programs as meeting USDA standards. The Secretary will assess fees to participating states to ensure that the program is of no net cost to the federal government.

TITLE IV. WATER PROTECTION AND ENHANCEMENT

Critical Groundwater Contamination Areas—The Secretary shall allow areas where farming has been identified as having a significant adverse effect on groundwater quality to be entered into the CRP.

Wetland Reserve Program—In order to regain valuable wetlands, the Secretary shall enroll at least 2.5 million acres of converted wetlands into the WRP. WRP acres would count toward the goal of enrolling land into the CRP, but the combined total acreage under both programs could not exceed the current 45 million acre cap.

Waterbank Program Reform—In order to make the Waterbank Program more consistent with other conservation provisions, all new waterbank contracts would contain a permanent easement. Payments could be over a 10-year period or could be made upfront on a net present value basis.

FmHA Direct and Guaranteed Loans—In order to conform USDA lending programs with the objective of preserving wetlands, FmHA direct and guaranteed loans could not be used to drain wetlands.

Swampbuster Consistency—Alternative enforcement mechanisms will be provided to the Secretary to use in those cases where current mechanisms are not working.

Sinkhole Contamination Abatement—To discourage crop production near sinkholes that may provide direct access to groundwater, the Secretary shall permit such cropland to enter the CRP.

Voluntary Well Water Testing—Using a federal match, the Secretary shall conduct voluntary, confidential well water testing. To discover the nature of well water quality, the Secretary may, using blind random sampling, compile information on the results.

Idled Wetland Protection—Wetland protection provisions will apply to set aside land and other land considered planted.

TITLE V. FOREST PROTECTION AND ENHANCEMENT

No Net Overall Loss of Forest Area—Using all appropriate programs within his jurisdiction, the Secretary shall, to the maximum extent practicable, take steps to balance the destruction of forest area with the renewal of forest area.

Shelterbelts and Windbreaks—In order to foster conservation through the development and preservation of shelterbelts and windbreaks, shelterbelts and windbreaks shall be eligible for the CRP regardless of soil erosion classification. Producers must agree to an easement on the land for the useful life of the shelterbelt or windbreak.

Hardwood Tree Planting Incentives—To encourage greater planting of hardwood trees in the CRP, the Secretary shall give producers the option of choosing the contract period from 10 to 15 years. Also, maintenance costs for hardwoods would be cost shared for 2 to 4 years after planting and CRP grass acres could be converted to hardwoods as long as the additional federal share (combined with the original cost of establishing cover) did not exceed the cost of an initial hardwood tree planting in the same bid pool.

Forest Clearing Subsidies—The Secretary shall eliminate the use of FmHA direct and guaranteed loans for purposes of significant clearing of trees.

Urban Forestry—To stimulate forestry efforts in urban areas, the Secretary is encouraged to upgrade urban forestry research, education and technical assistance.

TITLE VI. ENVIRONMENTAL PROTECTION

On-farm Environmental Protection—To protect farm families, the Secretary shall permit non-highly erodible lands into the CRP if he determines there is an on- or off-farm environmental threat posed by further agricultural production.

By Mr. DASCHLE:

S. 1064. A bill to amend title 38, United States Code, to correct an inequity in the provision of veterans' educational assistance benefits; to the committee on Veterans' Affairs.

VETERANS EDUCATION BENEFITS AND THE WEST RIVER GRADUATE CENTER

● Mr. DASCHLE. Mr. President, I am pleased to have the opportunity today to address an inequity in the manner in which educational benefits are being provided to certain veterans and active duty military personnel in my State. The bill I am introducing is designed to ensure that eligible individuals meeting the same educational standards are provided equal benefits.

The West River Graduate Center at Ellsworth Air Force Base in South Dakota provides veterans and active duty military personnel an outstanding opportunity to pursue their graduate degrees. Excellent instruction is maintained by utilizing professors from the University of South Dakota.

The University of South Dakota campus, however, is more than 300 miles away from the West River Graduate Center. This distance, coupled with the professors duties and responsibilities at the USD campus, has brought about the need for a more creative teaching arrangement. The professors, therefore, schedule classes less frequently—usually once every 3 or 4 weeks—but for longer periods of time and more intensive study.

The requirements for passing these courses are equivalent to the demands placed on students at the Vermillion campus. Students meet for the necessary number of class hours and complete the required materials. The educational value and challenge is the same at both teaching sites.

The law, however, stipulates that for veterans or active duty military personnel to be reimbursed for these classes, instruction must be provided on a weekly basis. Therefore, even though these students are meeting the same educational standards, they are being treated very differently because of an arbitrary legal technicality. The bottom line of this distinction is that eligible individuals are not receiving the full amount of educational benefits they deserve for the class work they are accomplishing.

This simply is not fair, and I am sure my colleagues will agree with me that this discriminatory treatment is not what is intended under the law. I have been in contact with the Department of Veterans' Affairs in efforts to rectify this matter without legislation. Unfortunately, the VA maintains that this inequity cannot be remedied without legislative action.

My bill simply clarifies that these benefits should be distributed fairly—that as long as students are meeting the hourly and instructional requirements for a specific course that has been authorized for benefits, those students should be reimbursed at the same rate as those receiving instruction on a weekly basis.

I urge my colleagues to join me in the effort to correct this double standard. Students meeting equal requirements deserve to receive equal benefits.●

By Mr. PRESSLER:

S. 1065. A bill to authorize the Secretary of Transportation to carry out a highway bridge demonstration project to improve the flow of traffic between the States of Nebraska and South Dakota; to the Committee on Environment and Public Works.

IMPROVING THE FLOW OF TRAFFIC BETWEEN THE STATES OF NEBRASKA AND SOUTH DAKOTA

Mr. PRESSLER. Mr. President, I am pleased to join my colleague in the House of Representatives, Congressman DOUG BEREUTER, in introducing a bill calling for the construction of a bridge across the Missouri River between Springfield, SD, and Niobrara, NE.

Many of my constituents have contacted me over the years to complain about the lack of accessible transportation across the Missouri. In some instances, people must drive 90 miles out of their way to cross the Missouri into South Dakota from Nebraska, or vice versa.

I've worked with people of this area to find better alternatives. I sponsored an amendment to the highway bill in 1987, which provided funding for a feasibility study of ferry service across the river. Besides the obvious problems of dealing with adverse weather conditions, a ferry could not handle commercial vehicle traffic. The expense of resuming ferry service is close to the cost of building a bridge.

The legislation I am introducing today calls for a demonstration project that is 80 percent funded by the Federal Government. The States of South Dakota and Nebraska have made commitments of $1 million each toward the bridge project.

There has been much talk in this Chamber recently about rural development. Improved access between South Dakota and Nebraska across the Missouri is one way of answering the call for development. One city official has pointed out that the Missouri River cuts Springfield, SD's trade area in half. This bridge demonstration project would mean expansion of the trade area, access to a larger work pool, and an increased flow of tourists and other travelers into the area.

I am confident that construction of a bridge between South Dakota and Nebraska would be an important chapter in the history of that area. I commend my House friend colleague, Congressman BEREUTER, for his efforts on this project and look forward to working together with him and the people of our two States to ensure passage of this legislation.

This legislation is the first in a series of bills I plan to introduce as a comprehensive package dealing with critical infrastructure needs in my State.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1065

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NEBRASKA-SOUTH DAKOTA BRIDGE DEMONSTRATION PROJECT.

(a) PROJECT DESCRIPTION.—The Secretary of Transportation is authorized to carry out a highway project, to plan, engineer, and construct a bridge across the Missouri River, connecting a Federal-aid highway in the vicinity of Niobrara, Nebraska, with a Federal-aid highway in the vicinity of Springfield, South Dakota, for the purpose of demonstrating methods of improving the interstate flow of traffic, releving present and projected traffic burdens on an existing highway network, and improving economic development of this rural area.

(b) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated out of the Highway Trust Fund (other than Mass Transit Account) $5,000,000 per fiscal year for each of fiscal years 1991 and 1992 to carry out this section.

(c) APPLICABILITY OF TITLE 23.—Funds authorized by this section shall be available for obligation in the same manner as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of the project under this section shall be 80 percent and such funds shall remain available until expended. Funds authorized by this section shall not be subject to any obligation limitation.

(d) STATE SHARE.—The States of Nebraska and South Dakota or political subdivisions of such States shall each provide for the project under this section 10 percent of the cost of such project.

By Mr. CHAFEE (by request):

S. 1066. A bill to establish a domestic liability and compensation system for oil pollution from vessels and facilities and to implement the 1984 protocols to the 1969 civil liability and 1971 fund conventions concerning seagoing tanker-source oil pollution; to the Committee on Environment and Public Works.

COMPREHENSIVE OIL POLLUTION LIABILITY AND COMPENSATION ACT

● Mr. CHAFEE. Mr. President, I am today introducing, by request, the Comprehensive Oil Pollution Liability and Compensation Act, and I ask unanimous consent that a section-by-section analysis and a statement of purpose and need be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

TITLE 1—OIL POLLUTION LIABILITY AND COMPENSATION

Sec. 101. Definitions

Summary: This section defines the key terms used in the bill. The definitions gen-

erally follow other pollution liability and compensation statutes. Offshore and onshore facilities are defined separately. Inland oil barges are treated as vessels and not as tankers for liability limit purposes under the definitions.

Sec. 102. Liability

Summary: This section sets out the nature and scope of liability of responsible parties (e.g. vessel owners and operators and facility lessees or permittees), cargo owners and cargo consignee and the Fund.

Subsection (a)(1) makes responsible parties jointly, severally and strictly liable for section 102 damages.

Subsection (a)(2) sets out the removal costs, restoration costs and restoration assessment costs for which a responsible party would be liable.

Subsection (a)(3) sets out the coverage damages for economic loss: real or personal property; subsistence use; revenues; and profits and earnings capability.

Subsection (a)(4) sets up a special system for mobile offshore drilling units (MODU's). The owner of the MODU would be primarily liable up to the maximum amount of liability for a tanker, for a spill originating on or above the surface of the water. For excess liability, the MODU would be treated as a facility.

Subsection (a)(5) sets out the liability of third parties. When the discharge was caused solely by the act or omission of a third party, or in the case of the U.S. Government, the negligence of that government, then that third party is liable for costs up to applicable limitations.

Subsections (b)(1) and (b)(2) set out the defense to liability. These are that the incident resulted from an Act of God, war on a third party. Also, if a claimant's willful misconduct caused the incident, there is no liability to that claimant.

Subsection (c)(1) sets the maximum liability for a tanker (the lesser of $500 per gross ton or $78 million with a minimum of $5,000,000), other vessels (the greater of $500,000 or $300 per gross ton) and for facilities ($75 million).

Subsection (c)(2) sets out the circumstances that could prevent a responsible party from limiting its liability. These are when the incident is caused (1) primarily by willful misconduct known by or associated with the responsible party, (2) by a know violation of a safety standard, or (3) when the responsible party does not report the incident as required or fails to provide all reasonable cooperation or assistance requested by responsible officials.

Subsection (c)(3) gives the Secretary of Transportation the discretion to lower the liability limit of a facility from $75 million to as low as $8 million, taking into account size, capacity and risk factors.

Subsection (d) sets out the responsible party's liability for interest, stating that interest must be paid from the date on which the claim is presented until the claim is paid, with certain exceptions.

Subsection (e) concerns liability for injury to, destruction of or loss of natural resources. The President, when the U.S. is the trustee for the natural resource, or the representative of the State, Indian tribe or foreign government, shall act on behalf of the public and assess the damages and develop a plan to restore, rehabilitate, replace or acquire the equivalent of the damaged resource.

Subsection (e)(3) states that costs would be limited to the sums necessary for the reasonable restoration, replacement or acquisition.

Subsection (f) concerns recovery by foreign claimants. Foreign governments may recover costs and damages allowable under this subsection. This section is for the benefit of Mexico and Canada and permits recovery for spills in U.S. waters that damage foreign countries and spills from tankers traveling from the Trans-Alaska Pipeline to U.S. ports.

Subsection (g) sets out how responsible parties may recover removal and restoration costs from the Fund if entitled to a defense to liability or limitation of liability.

Subsection (h) permits actions for contribution against other potentially liable parties.

Subsection (i) concerns indemnification agreements, permitting insurance agreements but not allowing agreements that would transfer liability away from the responsible party.

Sec. 103. Uses of the Fund

The establishment of a domestic Oil Spill Liability Trust Fund to be financed by a fee of 1.3 cents per barrel of oil was authorized by earlier enacted legislation. This section provides that the Fund may be used for immediate payment of government response costs, the payment of uncompensated claims under section 102(a)(2) of the bill, administrative and enforcement costs and payment of the United States' annual contribution to the International Fund. The section establishes a per incident cap of $500 million. The President is authorized to waive the per incident cap when necessary and in the best interest of the country. It authorizes States and Indian tribes a "direct draw" of up to $50,000 against the Fund for emergency cleanup, with the requirement that the official designated by the Governor to exercise this authority notify the Secretary of Transportation within 24 hours of any obligation of payment from the Fund. The statute of limitations for claims against the Fund is three years from the date of the injury necessitating the restoration. This section also permits the Fund to be used to reimburse the Inspector General for the costs of audits required by this section.

Sec. 104. Claims Procedure

This section provides that except for certain responsible party cleanup costs, claimants must make their claims against the responsible party or guarantor before they may assert claims against the Fund. Claims for removal and restoration costs not settled within 180 days of the presentation to the responsible party may be presented to the Fund.

Sec. 105. Designation and Advertisement

This section requires the Secretary, where possible and appropriate, to designate the vessel or facility that is the source of an oil pollution incident. The responsible party for such a vessel or facility is then required to advertise the designation and to set out procedures under which a claim may be presented to the responsible party or to his guarantor. If the responsible party and guarantor both deny a designation within five days after receiving notification, if the source of the oil pollution is a public vessel or the Secretary is unable to designate the source, the Secretary is required to advertise and notify potential claimants concerning how to present removal and restoration claims to the Fund.

Sec. 106. Subrogation

This section states that any person, including the Fund, who pays compensation to claimants for costs, damages or interest shall be subrogated to all rights, claims and causes of action that the claimant has under this Act.

Sec. 107. Financial Responsibility

Subsection (a)(1) imposes on the responsible parties of vessels the requirement that they provide evidence of financial responsibility to meet their potential maximum liability as established by section 102. Inland barges that do not carry oil as cargo or fuel (e.g. sand barges) are exempted from the requirement. If a responsible party has more than one vessel, evidence of financial responsibility need be established only to meet the maximum liability limit of the largest of the vessels.

Subsections (a) (2), (3) and (4) direct the Secretary to take certain actions if these certification requirements are not met: withhold or revoke clearance of the vessel; or deny entry to the facility or detain the vessel.

Subsection (b) requires evidence of financial responsibility by responsible parties for offshore facilities. If a responsible party has more than one offshore facility, evidence of financial responsibility need be established only to meet the maximum liability applicable to one facility.

Subsection (c) lists the acceptable methods of establishing financial responsibility.

Subsection (d) permits claims directly against the guarantor, known as "direct actions." The subsection also allows the guarantor to invoke the defense of willful misconduct.

Subsection (f) establishes a civil penalty for violating the financial responsibility provisions of the bill of up to $25,000 per day.

Subsection (g) is a technical subsection providing for the continuation of regulations.

Subsection (h) allows the Secretary to issue one certificate of financial responsibility, a unified certificate, for the purposes of this Act and CERCLA.

Sec. 108. Litigation, Jurisdiction and Venue

This section provides that jurisdiction for all action is in Federal district courts. Venue exists where the injury occurred, or the defendant resides, may be found, or has its principle place of business. All claims for review of regulations promulgated under the Act must be made within 90 days of promulgation to the Circuit Court of Appeals of the United States for the District of Columbia. The statute of limitations for claims is generally three years.

Sec. 109. Relationship, to Other Law

Subsection (a) except where the Conventions apply, authorizes the cause of action established under section 111 to be brought in federal court and precludes such causes of action in state courts.

Subsection (b) preserves from preemption all State funds and permits States to continue to require contributions to their funds.

Subsection (c) preserves from preemption the authority of the United States, all States and political subdivisions to impose civil penalties for violating laws relating to an oil pollution incident.

Subsection (d) except where the Conventions apply, continues to allow states to impose and enforce financial responsibility regimes.

Sec. 110. Effective Date

The section does not permit retroactive payments and ties to the payments from the Fund to the effective date specified in section 208.

Sec. 111. Federal Cause of Action Based on State or Other Federal law

This section creates a federal cause of action based on the substantive law of the place where the injury occurred.

TITLE II—CONFORMING AMENDMENTS

Sec. 201. Trans-Alaska Pipeline Fund

This section would preserve TAPS monies for claims for costs and damages resulting from the grounding of the Exxon Valdez in Prince William Sound on March 24, 1989.

Sec. 202. Intervention on the High Seas Act

This section makes a conforming amendment to the Intervention on the High Seas Act.

Sec. 203. Federal Water Pollution Control Act

This section makes conforming amendments to the Federal Water Pollution Control Act.

Sec. 204. Deepwater Port Act

This section makes conforming amendments to the Deepwater Port Act and transfers the funds in the Deepwater Port Liability Fund to the Oil Spill Liability Trust Fund.

Sec. 205. Outer Continental Shelf Lands Act Amendments

This section makes conforming amendments to the Outer Continental Shelf Lands Act and transfers the funds in the Offshore Oil Pollution Compensation Fund to the Oil Spill Liability Trust Fund.

Sec. 206. Enforcement of the Federal Water Pollution Control Act

This section improves enforcement authority under the Federal Water Pollution Control Act. It authorizes the President to order the spiller to take removal and abatement actions and increases civil penalties. It includes several amendments to sections 308, 309, and 311 of the Federal Water Pollution Control Act in order to encourage compliance with the Act.

Sec. 207. Title 26, United States Code

This section contains conforming amendments to sections 4611 and 9509 of the Internal Revenue Code of 1986.

Sec. 208. Effective Date

This section makes this title effective on the later of the commencement date in section 4611(f)(2) of the Internal Revenue Code of 1986 or the effective date of the first Appropriations Act enacted for the purposes of section 95.09(c)(1)(A) of the Internal Revenue Code of 1986.

TITLE III—IMPLEMENTATION OF INTERNATIONAL CONVENTIONS

Sec. 301. Definitions

This section defines terms used in conjunction with the two international conventions, the International Convention on Civil Liability for Oil Pollution Damage, 1984 (Civil Liability Convention) and the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1984 (Fund Convention).

Sec. 302. Applicability of Conventions

This section specifies the period during which the Civil Liability and Fund Conventions apply. The Senate must consent to ratification.

Sec. 303. Recognition of International Fund

This section recognizes the International Fund as a legal person under the laws of the United States. It appoints the Secretary of State as the Fund's agent for service of process.

Sec. 304. Action in United States Courts

This section specifies that the International Fund must be served with copies of complaints and pleadings and that the Fund may intervene as a party as a matter of right in any action brought under the Civil Liability Convention.

Sec. 305. Contribution to International Fund

This section authorizes payments to the International Fund from the domestic Oil Spill Liability Trust Fund. It also authorizes the Secretary to require that certain receivers of oil make certain information available.

Sec. 306. Recognition of Foreign Judgments

This section declares that a final judgment rendered in a court of any country which is a party to the Civil Liability Convention or the Fund Convention will be recognized by United States court unless obtained by fraud or the defendant was not given reasonable notice and a fair hearing.

Sec. 307. Financial Responsibility

This section requires the maintenance of evidence of financial responsibility as required by Article VII of the Civil Liability Convention, authorizes the Secretary of Transportation to issue certificates of financial responsibility under the Civil Liability Convention, authorizes the Secretary of the Treasury to withhold or revoke clearances and the Secretary of the Department in which the Coast Guard is operating to deny entry or detain vessels that cannot produce a certificate demonstrating compliance with the financial responsibility requirements. Civil penalties not to exceed $25,000 per day may be assessed. The section also provides for the waiver of United States rights to sovereign immunity with respect to any controversy arising under the Civil Liability Convention and relating to a ship owned by the United States and used for commercial purposes.

Sec. 308. Regulations

The section provides the Secretary with authority to issue rules and regulations necessary to implement the two international conventions.

STATEMENT OF PURPOSE AND NEED

This legislation will strengthen and consolidate oil spill liability and compensation to provide better protection for our environment and a fast and sure system for compensating the victims of oil pollution.

Currently, four Federal and several State statutes deal with oil spill liability and compensation at the domestic level. These statutes contain many inconsistent provisions. Each provides different liability standards, legal defenses and monetary limits for spillers and means for recovery of the costs of cleaning up a spill. In addition to these statutory authorities, there are international and voluntary programs which establish oil spill liability and compensation regimes for their signatories or members.

The purpose of this legislative proposal is threefold: one, to strengthen the four existing vessel oil pollution liability and compensation regimes under the Federal Water Pollution Control Act, the Trans-Alaska Pipeline Authorization Act, the Deepwater Port Act, and the Outer Continental Shelf Lands Act and to create a unified and comprehensive program; two, to establish a domestic liability and compensation system financed by vessel and facility owners and the oil industry to compensate the United States Government, the States and our citizens for removal costs and damages associated with oil spills; and three, to provide protection from foreign and domestic tanker oil spills by implementing the 1984 Protocols to the 1969 Civil Liability and 1971 FUND Conventions.

As recently demonstrated by the Exxon Valdez oil spill in Prince William Sound, oil spills can have catastrophic and long-term effects on the environment and the livelihoods of our citizens. While an existing patchwork of laws requires potential polluters to maintain evidence of financial responsibility for certain cleanup and removal costs and to contribute to funds to cover excess costs, the liability and coverage provided is inadequate, inconsistent and outdated. This bill would establish a strict liability system with high liability limits to make certain that those responsible for oil pollution will be held responsible for the cost.

Under the domestic system established in this bill, the individual polluter is primarily responsible for removal costs and damages, up to his liability limits ($75 million for facilities, $78 million for tankers and $300 per ton for other vessels). Claims for clean-up and restoration in excess of the polluter's liability limits would be covered, up to $500 million, by a fund financed by a 1.3 cent per barrel fee on oil. This amount is substantially in excess of the cost associated with any previous oil spill, including the Amoco Cadiz and the Ashland oil spills. However, if even this is inadequate, the President may authorize waiving the $500 million Fund cap and recover the additional costs from the cargo owner or consignee. This ensures that no oil spill will be too large for a complete response. The President can order the spiller to take removal and abatement actions, backed up by stiff penalties for noncompliance. This system would shift the economic burden to the potential polluters and the oil industry and eliminate the need for appropriations from general revenues to the 311(k) fund established under the Federal Water Pollution Control Act.

Seagoing tankers, in particular, pose a threat of oil pollution to our waters and shoreline. This bill would implement the 1984 Protocols to the 1969 Civil Liability and 1971 FUND Conventions. The legislation would preempt State oil pollution liability laws, enabling United States participation in these important treaties. Compensation funds and other aspects of State programs would not be preempted. The protection provided from ratification and implementation of these treaties constitutes an important Federal interest and far outweighs the uncertain recovery of the preempted State laws.●

By Mr. GORE (for himself, Mr. JEFFORDS, and Mr. DURENBERGER):

S. 1067. A bill to provide for a coordinated Federal research program to ensure continued United Sates leadership in high-performance computing; to the Committee on Commerce, Science, and Transportation.

NATIONAL HIGH-PERFORMANCE COMPUTER TECHNOLOGY ACT

● Mr. GORE. Mr. President, I am today introducing the National High-Performance Computer Technology Act of 1989 to respond to major economic and technological challenge—the battle to ensure the United States'

leadership in advanced computing and computer networking.

High-performance computing is the most powerful tool available to those who, in an increasing number of fields, are operating at the frontiers of imagination and intellect. The nation which most completely assimilates high-performance computing into its economy will very likely emerge as the dominant intellectual, economic, and technological force in the next century.

High-performance computers will enable us to build more efficient engines and appliances, forecast the weather more accurately and further in advance, test new kinds of molecules with miraculous medical potential, and design better machine tools. Even now we can use computers to design better computer chips. But high-performance computers will never be able to do all these things in the future unless we increase access through high-speed networks right away and develop the information infrastructure to realize the potential of these electronic technologies. The real benefits of computing come from sharing scientific ideas and putting new products on the market.

In the last Congress, I chaired the first Senate hearing on the state of supercomputer technology and policy. The message I heard at that hearing was overwhelmingly clear: If the United States is going to be a supercomputer superpower in the 1990s, we had better start building a high-capacity national research and education network today. Toward that end, I am introducing the National High-Performance Computer Technology Act of 1989 and will hold a series of hearings beginning this June on high-performance computing and computer networks.

Three years ago, on the 30th anniversary of the Interstate Highway System, I sponsored the Supercomputer Network Study Act to explore a fiber optic network to link the Nation's supercomputers into one system. High-capacity fiber optic networks will be the information superhighways of tomorrow. A national network with associated supercomputers and data bases will link academic researchers and industry in a national colaboratory. This information infrastructure will cluster research centers and businesses around network interchanges, using the Nation's vast data banks as the building blocks for increasing industrial productivity, creating new products, and improving access to education. Libraries, rural schools, minority institutions, and vocational education programs will have access to the same national resources—data bases, supercomputers, accelerators—as more affluent and better known institutions.

Can we rely on the market system to provide this kind of infrastructure? We certainly couldn't where the Interstate Highway System was concerned, although private industry ultimately benefited a great deal from the Government's leadership and investment. I believe that the Federal Government must again be a catalyst, to get companies interested in those information networks and show them that there is a market out there. Clearly, the technological spinoffs and productivity gains would be enormous, from a network that would cost the Government less than one Stealth bomber.

The National High-Performance Computer Technology Act of 1989 builds on legislation I introduced last year and the 1987 Office of Science and Technology report on high-performance computing, and it takes the first critical steps to chart the Federal Government's course in maintaining U.S. leadership in high-performance computing. Last year's bill was designed to intensify the Government's engagement in developing computer technology and networks. Today's legislation is an upgraded version, based on hearings and on intensive consultations with industry leaders, Government officials, and educators in the intervening period. Furthermore, my proposed legislation recognizes that it is vital to respect the existing private networks, which, although of lower capacity than needed, can and must play a critical and ever-increasing role as the new high-volume network matures.

This legislation promotes high-performance computing in several ways:

By putting in place a three gigabit per second national research and education computer network by 1996;

By creating an information infrastructure of data bases and knowledge banks, including a National Digital Library;

By emphasizing the development of artificial intelligence projects like neural networks;

By investing in basic research and education;

By stimulating the development of hardware;

By enhancing the development and distribution of software;

By requiring the administration to develop a 5-year interagency implementation plan;

By establishing advisory committees to include the views of educators and industry.

This bill would also authorize $1.75 billion over 5 years, fiscal years 1990 through 1994, to carry out the purposes of the act. The investment is tiny and the payback enormous, even more so in light of how those Federal funds would be leveraged. I am deeply concerned about the Federal budget deficit. But the only long-term deficit solution is to get away from short-term thinking, look to the future, and invest in the people, technologies, and equipment that will ensure our standard of living and increase productivity. We must find the funds to invest in high-priority projects like computer network development that will pay for themselves many times over.

Soon, virtually all human knowledge will be translatable into a common digital code that can be acted upon by electronic processing systems based upon computers, which, in their countless mutations, will be electronically linked. Already, we have crossed the threshold of the information age.

Electronics are to our age what coal and iron were to the Industrial Revolution. However, unlike coal and iron, which are parts of the natural endowment of nations, electronics are an endowment which can be created wherever there is sufficient talent and determination. That is the lesson our competitors have taught us.

Our competitors understand the importance of developing computer networks and advanced computing. In France, for example, the Minitel network of small home computer terminals has become a national obsession. West Germany appears to be well developed in networking. In Japan, the organization that targets key technologies came up with a list of ten top priority projects that includes a 10 billion bit per second fiber optic network.

Unless we learn from them and act in time to nurture our own resources, the information age will be theirs, not ours, to lead. American technogical surpremacy, which we had thought of as a kind of national attribute, will pass. And so will its rewards.

High-performance computing is a fulcrum. Government action applied here can powerfully influence the outcome of the overall struggle. I look forward to your consideration of this legislation.

Mr. President, I ask unanimous consent that a copy of my bill be printed in the RECORD.

S. 1067

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "National High-Performance Computer Technology Act of 1989".

SEC. 2. (a) Congress finds and declares the following:

(1) Advances in computer science and technology are vital to the Nation's prosperity, national security, and scientific advancement.

(2) The United States currently leads the world in development and use of high-performance computer technology for national security, industrial productivity, and science and engineering, but that lead is being challenged by foreign competitors.

(3) Further research and improved computer research networks are necessary to maintain United States leadership in the field of high-performance computing.

(b) It is the purpose of Congress in this Act to ensure the continued leadership of the United States in high-performance com-

puter technology. This requires that the United States Government—

(1) expand Federal support for research, development, and application of high-performance computing technology in order to—

(A) establish a high-capacity national research and education computer network;

(B) develop an information infrastructure of data bases, services, and knowledge banks which is available for access over such a national network;

(C) promote the more rapid development and wider distribution of computer software;

(D) stimulate research on artificial intelligence;

(E) accelerate the development of computer systems; and

(F) invest in basic research and education; and

(2) improve planning and coordination of Federal research and development on high-performance computing.

TITLE I—NATIONAL HIGH-PERFORMANCE COMPUTER TECHNOLOGY PROGRAM

SEC. 101. The National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6601 et seq.) is amended by adding at the end the following new title:

TITLE VI—NATIONAL HIGH-PERFORMANCE COMPUTER TECHNOLOGY PROGRAM

"FINDINGS

"SEC. 601. (a) Congress finds and declares the following:

"(1) In order to strengthen America's computer industry and to assist the entire manufacturing sector, the Federal Government must provide leadership in the development and application of high-performance computer technology. In particular, the Federal Government should support the development of a high-capacity, national research and education network; facilitate the development of software for research, education, and industrial applications; continue to fund basic research; and provide for the training of computer scientists and computational scientists.

"(2) Several Federal agencies have ongoing high-performance computer technology programs. Improved interagency coordination, cooperation, and planning could enhance the effectiveness of these programs.

"(3) A recent report by the Office of Science and Technology Policy outlining a research and development strategy for high-performance computing provides a framework for a multi-agency computer technology program.

"NATIONAL HIGH-PERFORMANCE COMPUTER TECHNOLOGY PLAN

"SEC. 602. (a)(1) The President, through the Federal Coordinating Council for Science, Engineering, and Technology (hereafter in this title referred to as the "Council"), shall develop and implement a National High-Performance Computer Technology Plan (hereafter in this title referred to as the 'Plan') in accordance with the provisions, findings, and purposes of this Act. Consistent with the responsibilities set forth under subsection (c) of this section, the Plan shall contain recommendations for a 5-year national effort, to be submitted to Congress within one year after the date of enactment of this title and to be revised at least once every two years thereafter.

"(2) The Plan shall—

"(A) establish the goals and priorities for a Federal high-performance computer technology program for the fiscal year in which the Plan (or revised Plan) is submitted and the succeeding 4 fiscal years;

"(B) set forth the role of each Federal agency and department in implementing the Plan;

"(C) describe the levels of Federal funding and specific activities, including education, research activities, hardware and software development, and acquisition and operating expenses for computers and computer networks, required to achieve such goals and priorities; and

"(D) consider and use, as appropriate, reports and studies conducted by Federal agencies and departments, the National Research Council, or other entities.

"(3) The Plan shall address, where appropriate, the relevant programs and activities of the following Federal agencies and departments—

"(A) the National Science Foundation;

"(B) the Department of Commerce, particularly the National Institute of Standards and Technology and the National Oceanic and Atmospheric Administration;

"(C) the National Aeronautics and Space Administration;

"(D) the Department of Defense, particularly the Defense Advanced Research Projects Agency, the Office of Naval Research, and, as appropriate, the National Security Agency;

"(E) the Department of Energy;

"(F) the Department of Health and Human Services, particularly the National Institutes of Health; and

"(G) such other agencies and departments as the President or the Chairman of the Council considers appropriate.

"(b) The Council shall—

"(1) serve as lead entity responsible for development and implementation of the Plan;

"(2) coordinate the high-performance computing research and development activities of Federal agencies and departments and report at least annually to the President, through the Chairman of the Council, on any recommended changes in agency or departmental roles that are needed to better implement the Plan;

"(3) prior to the President's submission to Congress of the annual budget estimate, review each agency and departmental budget estimate in the context of the Plan and make the results of that review available to each agency and department and to the appropriate elements of the Executive Office of the President, particularly the Office of Management and Budget;

"(4) work with Federal agencies, with the National Research Council and with academic, State, and other groups conducting research on high-performance computing; and

"(5) consult with actual and potential users of such research by establishing an advisory board, which shall include representatives from universities and industry.

"(c)(1) The Plan shall take consideration, but not be limited to, the following missions and responsibilities of agencies and departments:

"(A) The National Science Foundation shall continue to be responsible for basic research in all areas of computer science, materials science, and computational science. The Foundation shall continue to solicit grant proposals and award grants by merit review for research in universities, nonprofit research institutions, and industry. The National Science Foundation shall also be responsible for providing researchers with access to supercomputers and providing for the establishment, by 1996, of a 3 gigabit per second national computer network, as required by section 201 of the National High-performance Computer Technology Act of 1989. Additional responsibilities include development of an information infrastructure of services, data bases, and knowledge banks connected to such computer network; facilitation of the validation of software and distribution of that software over such computer network; and promotion of science and engineering education.

"(B) The National Institute of Standards and Technology shall be responsible for ensuring interoperability between computer networks run by different agencies of the Federal Government and for establishing, in conjunction with industry, benchmark tests and standards for high-performance computers and software. Pursuant to the Computer Security Act of 1987 (Public Law 100-235; 100 Stat. 1724), the National Institute of Standards and Technology shall continue to be responsible for developing standards and guidelines for Federal computer systems, including standards and guidelines needed to assure the cost-effective security and privacy of sensitive information in Federal computer systems.

"(C) The National Oceanic and Atmospheric Administration shall continue to observe, collect, communicate, analyze, process, provide, and disseminate data about the Earth, its oceans, atmosphere, and space environment. It shall improve the quality and accessibility of the environmental data stored at the four NOAA data centers. In addition, NOAA shall perform research and develop technology to support its data handling role.

"(D) The National Aeronautics and Space Administration shall continue to conduct basic and applied research in high-performance computing, particularly in the field of computational science, with emphasis on aeronautical applications and remote sensing data processing.

"(E) The Department of Defense, through the Defense Advanced Research Projects Agency, the Office of Naval Research, and other agencies, shall continue to conduct basic and applied research in high-performance computing, particularly in computer networking, semiconductor technology, and large-scale parallel processors. Pursuant to the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.), the Department shall ensure that unclassified computer technology research is readily available to American industry. The National Security Agency, pursuant to the Computer Security Act of 1987 (Public Law 100-235; 100 Stat. 1724), shall continue to provide, where appropriate, technical advice and assistance to the National Institute of Standards and Technology for the development of standards and guidelines needed to assure the cost-effective security and privacy of sensitive information in Federal computer systems.

"(F) The Department of Energy and its national laboratories shall continue to conduct basic and applied research in high-performance computing, particularly in software development and multi-processor supercomputers. Pursuant to the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.), and other appropriate statutes, the Department of Energy shall ensure that unclassified computer technology research is readily available to American industry.

"(2) The Plan shall facilitate collaboration among agencies and department with respect to—

"(A) ensuring interoperability among computer networks run by the agencies and departments;

"(B) increasing software productivity, capability, and reliability;

"(C) promoting interoperability of software;

"(D) distributing software among the agencies and departments; and

"(E) distributing federally-funded, unclassified software to industry and universities.

"(d)(1) Each Federal agency and department involved in high-performance computing shall, as part of its annual request for appropriations to the Office of Management and Budget, submit a report identifying each element of its high-performance computing activities, which—

"(A) specifies whether each such element (i) contributes primarily to the implementation of the Plan or (ii) contributes primarily to the achievement of other objectives but aids Plan implementation in important ways; and

"(B) states the portion of its request for appropriations that is allocated to each such element.

"(2) The Office of Management and Budget shall review each such report in light of the goals, priorities, and agency and departmental responsibilities set forth in the Plan, and shall include, in the President's annual budget estimate, a statement of the portion of each agency or department's annual budget estimate that is allocated to each element of such agency or department's high-performance computing activities. The Office of Management and Budget shall ensure that a copy of the President's annual budget estimate is transmitted to the Chairman of the Council at the same time as such budget estimate is submitted to Congress.

"ANNUAL REPORT

"SEC. 603. The Chairman of the Council shall prepare and submit to the President and Congress, not later than March 1 of each year, an annual report on the activities conducted pursuant to this title during the preceding fiscal year, including—

"(1) a summary of the achievements of Federal high-performance computing research and development efforts during that preceding fiscal year;

"(2) an analysis of the progress made toward achieving the goals and objectives of the Plan;

"(3) a copy or summary of the Plan and any changes made in such Plan;

"(4) a summary of agency budgets for high-performance computing activities for that preceding fiscal year; and

"(5) any recommendations regarding additional action or legislation which may be required to assist in achieving the purposes of this title.".

TITLE II—NATIONAL RESEARCH AND EDUCATION NETWORK

SEC. 201. (a) The National Science Foundation shall, in cooperation with the Department of Defense, the Department of Energy, the Department of Commerce, the National Aeronautics and Space Administration, and other appropriate agencies, provide for the establishment of a national 3-gigabit per second research and education computer network by 1996, to be known as the National Research and Education Network, which shall—

(1) link government, industry, and the higher education community;

(2) be developed in close cooperation with the computer and telecommunciations industry;

(3) be designed and developed with the advice of potential users in government, industry, and the higher education community;

(4) have accounting mechanisms which allow users or groups of users to be charged for their usage of the network, where appropriate; and

(5) be phased out when commercial networks can meet the networking needs of American researchers.

SEC. 202. In addition to other agency activities associated with the establishment of the National Research and Education Network, the following actions shall be taken:

(1) The Federal Coordinating Council for Science, Engineering, and Technology shall—

(A) establish a National Network Advisory Committee to provide technical and policy advice from all the interests involved in the Network program, including (i) researchers from university, industry, and Federal laboratories who will use the Network; (ii) university and college educators; (iii) librarians involved in electronic data storage and retrieval; (iv) industrial organizations that develop and provide relevant technology and services; (v) managers of regional computer networks; and (vi) experts in networking and computer science who can provide technical guidance;

(B) submit to Congress, within one year after the date of enactment of this Act, a report describing and evaluating effective mechanisms for providing operating funds for the long-term maintenance and use of the Network, including user fees, industry support, and continued Federal investment; and

(C) allow recipients of Federal research grants to use grant monies to pay for computer networking and other telecommunications expenses.

(2) The Department of Defense, through the Defense Advanced Research Projects Agency, shall be responsible for research and development of advanced fiber optics technology, switches, and protocols needed to develop a gigabit computer network essential for the Network.

(3) The National Institute of Standards and Technology shall develop, in cooperation with the National Security Agency and other relevant agencies, a common set of standards to provide interoperability, common user interfaces to systems, and enhanced security for the Network.

(5) The National Telecommunications and Information Administration shall determine to what extent current Federal telecommunications laws and regulations hinder or facilitate private industry participation in the data transmission field. Within a year after the date of enactment of this Act, the Administration shall report such determination to the Congress.

SEC. 203. In addition to such sums as may be authorized to be appropriated to the National Science Foundation by other law, there are authorized to be appropriated to the National Science Foundation for the research, development, and implementation of the National Research and Education Network, in accordance with the purposes of this title, $50,000,000 for fiscal year 1990, $50,000,000 for fiscal year 1991, $100,000,000 for fiscal year 1992, $100,000,000 for fiscal year 1993, and $100,000,000 for fiscal year 1994.

TITLE III—NATIONAL INFORMATION INFRASTRUCTURE

SEC. 301. The National Science Foundation shall coordinate, in close cooperation with the Department of Commerce (in particular the National Oceanic and Atmospheric Administration, the National Institute of Standards and Technology, and the Bureau of the Census), the Department of Defense, the National Aeronautics and Space Administration, and other relevant agencies, the development of a national science and technology information infrastructure of data bases and knowledge banks accessible through the National Research and Education Network referred to in title II of this Act. The infrastructure shall include, but not be limited to—

(1) a directory of network users;

(2) provision for access to unclassified Federal scientific data bases, including weather data, census data, economic data, and remote sensing satellite data;

(3) rapid prototyping of computer chips and other devices using centralized facilities connected to the network;

(4) data bases and knowledge banks for use by artificial intelligence programs; and

(5) provision for international collaboration among researchers.

TITLE IV—SOFTWARE

SEC. 401. (a) The Office of Science and Technology Policy, as indicated in the National High-Performance Computer Technology Plan (hereinafter referred to as the "Plan") developed and implemented under title VI of the National Science and Technology Policy, Organization, and Priorities Act of 1976, as added by section 101 of this Act, shall oversee the cooperative efforts of Federal departments and agencies in the research and development of high-performance computer software, including projects focused on astrophysics, engineering, materials, biochemistry, plasma physics, and weather and climate forecasting.

(b) The National Science Foundation shall establish clearinghouses to validate and distribute unclassified software developed by federally-funded researchers and other software in the public domain, including federally-funded educational and training software. Such clearinghouses shall—

(1) maintain libraries of programs;

(2) provide funding to researchers to improve and maintain software they have developed;

(3) help researchers locate the software they need;

(4) make software available through the National Research and Education Network; and

(5) promote commercialization of software where possible.

(c)(1) The National Science Foundation shall place special emphasis on the development of artificial intelligence and shall establish joint research programs among government, industry, and the higher education community to develop artificial intelligence applications.

(2) for purposes of this section, the term "artificial intelligence" means software and hardware which can be used for computer systems that learn, exhibit knowledge of themselves and their environment, make logical inferences, display creativity, or mimic other aspects of human intelligence, and such term includes expert systems, neural networks, natural language processing programs, translation programs, and higher-level programming languages.

(d) The National Institute of Standards and Technology shall develop standards for software programs purchased or developed by the Federal Government that promote development of interoperable software systems that can be used on different computer systems with different operating systems.

(e) Procurement regulations at the Defense Department and other departments or agencies shall be changed so that contractors providing software to the Federal Government no longer are required to forfeit the proprietary software development tools that they used to develop the software.

SEC. 402. There are authorized to be appropriated to the Office of Science and Technology Policy for distribution to the National Science Foundation, the Department of Defense, the Department of Energy, the National Aeronautics and Space Administration, and other relevant agencies for computer software research and development, in accordance with the purposes of this title, $50,000,000 for fiscal year 1990, $100,000,000 for fiscal year 1991, $150,000,000 for fiscal year 1992, $200,000,000 for fiscal year 1993, and $250,000,000 for fiscal year 1994.

TITLE V—COMPUTER SYSTEMS

SEC. 501. The National Science Foundation shall ensure that the national supercomputer centers in the United States continue to have the most advanced, commercially available supercomputers produced by United States manufacturers.

SEC. 502. Where appropriate, Federal agencies shall procure prototype or early production models of new high-performance computer systems and sub-systems to stimulate hardware and software development in the American high-performance computer industry. Particular emphasis shall be given to promoting development of advanced display technology, alternative computer architectures, advanced peripheral storage divices, and very high-speed communication links.

SEC. 503. Within 60 days following the date of enactment of this Act, the Secretary of Commerce shall review export controls that hinder the development of foreign markets for United States manufacturers of supercomputers and other high-performance computer technology, and report to the Congress the results of such review.

SEC. 504. There are authorized to be appropriated to the Office of Science and Technology Policy, for distribution to appropriate agencies and departments as specified in the Plan, for research in computational science and engineering, $30,000,000 for fiscal year 1990, $60,000,000 for fiscal year 1991, $90,000,000 for fiscal year 1992, $120,000,000 for fiscal year 1993, and $150,000,000 for fiscal year 1994.

TITLE VI—BASIC RESEARCH AND EDUCATION

SEC. 601. The Office of Science and Technology Policy shall, in cooperation with relevant departments and agencies—

(1) support basic research on computer technology, including research on advanced semiconductor chip designs, new materials for chips, improved chip fabrication techniques, photonics and superconducting computers;

(2) create technology transfer mechanisms to ensure that the results of basic research are readily available to United States industry;

(3) promote basic research in computer science, computational science, electrical engineering, and material science; and

(4) educate and train more researchers in computer science and computational science.

SEC. 602. To expand its traditional role in supporting basic research in universities and colleges, and in training scientists and engineers in computer science, computational science, and electrical engineering, there are authorized to be appropriated to the National Science Foundation, $10,000,000 for fiscal year 1990, $20,000,000 for fiscal year 1991, $30,000,000 for fiscal year 1992, $40,000,000 for fiscal year 1993, and $50,000,000 for fiscal year 1994.●

By Mr. GORE (for himself, Mr. GORTON, and Mr. FORD):

S. 1068. A bill to require actions to improve competition in the delivery of television programming, to prohibit discrimination by cable programmers, and to permit telephone companies to provide video programming; to the Committee on Commerce, Science, and Transportation.

CABLE COMPETITION ACT

Mr. GORE. Mr. President, today I join with my colleagues, Senator GORTON and Senator FORD, to introduce the Cable Competition Act, legislation to address the serious problems facing cable television consumers. The point of this bill is to give cable consumers modest relief from skyrocketing rates and the pervasive anticompetitive practices within the cable/programming industry.

Precipitous rate hikes of 100 percent or more in one year have not been unusual since cable was given total freedom to charge whatever the market will bear.

To illustrate only a single case—a new multi-system operator [MSO] purchased a chain of small franchises in rural west Tennessee, using highly leveraged capital and paying inordinately high sums for small systems with already high penetration and little room for growth. The company immediately raised basic rates by 50 to 100 percent, clearly as a way to cover the huge cash flow needs created by such franchise trafficking and speculation.

Not coincidentally, these franchises are well outside the range of clear, over-the-air signals form metropolitan areas, magnifying the captive nature of cable consumers in the rural systems. Unfortunately, the west Tennessee incident is not unique.

Since cable was deregulated, we have also witnessed an extraordinary concentration of control and integration by cable operators and program services, manifesting itself in blatantly anticompetitive behavior toward those who would compete with existing cable operators for the right to distribute services. In the case of satellite dish owners, for example, program services have consistently refused to deal with distributors unless they are cable operators, shutting out almost all competition for a market that, ironically, cable itself has largely refused to serve.

Not all cable operators have exploited their position after deregulation with such total disregard for the public. And not all program services have discriminated against distributors competing with cable. However, the practices have become so widespread and egregious in certain sectors of this industry that the time has come for the Congress to begin serious debate about the problems created by cable deregulation.

The Cable Competition Act is designed to correct some of the inequities now facing cable customers, especially those with little choice.

The bill allows cable franchising authorities to regulate "lifeline" or basic service where there is no competition;

It allows telephone companies to provide cable services, with protections against cross-subsidy from regulated telephone customers, while not affecting any restrictions currently in place under the Modified Final Judgment [MFJ].

The bill requires that cable operators, including common carriers, must provide access to the system for all program services, unless precluded from doing so by channel capacity or the nature of the program content.

It requires programming services which are affiliated with cable operations to make those services available to all distributors of programming on a nondiscriminatory basis, to foster competition and choice for consumers who are mostly underserved by cable.

The bill requires the Federal Trade Commission to undertake an investigation into concentration within the cable/programming industry to determine the degree to which such concentration has resulted in higher rates for consumers and/or unfair treatment of cable competitors.

And finally, the bill requires the FCC to determine ways to improve the availability of video services in rural areas.

For my part, I take this action not as any effort to bash cable. This industry has a wonderful product, and has made a major positive contribution to entertainment and information in this country. Many cable operators and programmers are working hard to provide quality services at reasonable rates. And the industry's support for C-SPAN, for example, is to be greatly commended. I am a strong supporter of cable television.

However, too many cable operations are simply aggressive MSO's who are speculating in franchise takeovers, driving rates through the ceiling and providing poor service and the local franchising authorities must sit with their hands tied.

And too many programmers continue to deny access to distributors who

might compete with the very cable companies in which those programmers have a financial interest.

It simply isn't fair. It is time the Congress revisited the Cable Act of 1984, and begin a debate which addresses the problems facing 45 million captive consumers of cable television service, and millions of other families who cannot even receive cable.

I urge my colleagues to sponsor this bill. I ask unanimous consent that the summary and the entire text of the bill be printed following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CABLE COMPETITION ACT

Section 1. Title: Cable Competition Act.

Section 2. Findings.

Section 3. *Rate Regulation.*—The bill allows cable franchising authorities to regulate "lifeline" rates in areas where there is no competition; that is, basic service which includes local network, independent, and public broadcasting signals. If no such "lifeline" service exists, the franchising authority may regulate rates for the lowest basic tier of service which includes such local signals.

Section 4. *Telephone Company Provision of Cable Services.*—The bill allows telephone companies to provide cable services, both within and outside their service areas. However, the bill specifically states that this provision shall not affect any restrictions currently in place under the Modified Final Judgment (MFJ) controlling activities of the regional telephone companies, or other antitrust laws. The bill requires the FCC to adopt rules to ensure that telephone companies involved in cable may not subsidize cable operations from regulated telephone operations.

Section 5. *Requirements for carriage of signals.*—The bill requires that cable operators, including common carriers, must provide access to the system for all program services, unless precluded from doing so by channel capacity or the nature of the program content. Access is to be provided at non-discriminatory rates, terms, and conditions.

Section 6. *Equal consumer access by competing technologies.*—The bill requires programming services which are affiliated with cable operations to make those services available to all distributors of programming on a non-discriminatory basis. Programming services may set their own distribution standards except that such standards may not be designed to exclude distributors solely because they are not cable companies. This requirement is designed to foster competition for programming distribution among various providers of services: cable, wireless cable, satellite dishes, SMATV, etc.

Section 7. *FTC Investigations into Cable Concentration.*—Require Federal Trade Commission to undertake an investigation into concentration within the cable/programming industry, as well as the practice of speculation and trafficking in franchises, to determine the degree to which such concentration has resulted in higher rates for consumers and/or anticompetitive treatment of cable competitors.

Section 8. *Video Availability in Rural Areas.*—The bill calls for an FCC investigation to determine extent of availability of video services in rural areas, and ways to improve such availability.

S. 1068

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Cable Competition Act".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the elimination of regulation of the cable television industry has resulted in significantly higher consumer rates, without providing consumers the benefits of competition;

(2) it is in the public interest to establish a competitive market for the provision of cable television services;

(3) the growth of and increasing concentration within the cable television industry has diminished the need to protect that industry from competition from other potential providers of cable television services;

(4) competing new program distribution technologies, such as private home satellite television receivers, wireless cable, and other alternative distribution systems, offer substantial benefits to consumers, especially in rural areas, but new policies are required to provide these competing distributors with fair access to program services;

(5) cable consumers would now benefit from increased competition made possible by permitting telephone companies to provide cable television services, with adequate protections against cross-subsidization from telephone customers;

(6) while the goal of universal service stated in section 1 of the Communications Act of 1934 clearly encompasses the electronic delivery of information in any form, that goal has not been sufficiently pursued as it relates to the delivery of television programming;

(7) the goal of universal service remains an important, if not the primary, objective of United States communications policy, and that goal extends to, and should be aggressively pursued as it relates to, the delivery of television programming and advanced communications services; and

(8) universal service can and should mean that video services and advanced communications services are as readily available in rural areas as they are in urban areas.

SEC. 3. RATE REGULATION OF LIFELINE TELEVISION SERVICES.

Section 623 of the Communications Act of 1934 is amended by adding at the end thereof the following new subsection:

"(i)(1) Notwithstanding any other provision of this title, for any franchising area which is not provided with cable service by two or more cable operators, a State or franchising authority may, in accordance with State law, regulate the rates that a cable operator may charge for the provision of lifeline television services.

"(2) For purposes of paragraph (1) of this subsection, the term 'lifeline television services' means—

"(A) a service tier that provides a minimum of (i) three channels carrying the broadcasts of affiliates of the three national television networks, (ii) one channel carrying a public television station, (iii) one channel carrying each local independent television station; or

"(B) if no service tier contains each of the minimum channels described in subparagraph (A), the two or more service tiers required to provide such minimum.".

SEC. 4. PROVISION OF VIDEO PROGRAMMING BY TELEPHONE COMPANIES.

Section 613 of the Communications Act of 1934 is amended by striking subsection (b) and inserting the following:

"(b)(1) Subject to the requirements of this Act, a common carrier subject in whole or in part to title II of this Act may—

"(A) provide video programming directly to subscribers, either through its own facilities or through an affiliate owned, operated, or controlled by, or under common control with, the common carrier; and

"(B) provide channels of communication or pole line conduit space, or other rental arrangements, to any entity which is directly or indirectly owned, operated, or controlled by, or under common control with, the common carrier, if the facilities or arrangements are to be used for, or in connection with, the provision of video programming directly to subscribers.

"(2) Within 60 days after the date of enactment of the Cable Competition Act, the Commission shall prescribe such regulations as may be necessary to ensure that—

"(A) the economic risks of any line of business authorized by this subsection are not borne by telephone service ratepayers and, in the event of a business failure, investment assigned to the line of business shall not be reassigned to the telephone service, except upon a showing that the customers of telephone service will benefit from such reassignment; and

"(B) any common carrier providing video services allocates costs in a manner which protects basic telephone ratepayers from subsidizing the provision of cable service.

"(3) Nothing in this subsection shall be construed to permit any telephone company to have any ownership interest in any video programming service which it provides to subscribers, if such telephone company is otherwise restricted from owning such an interest pursuant to the antitrust laws of the United States.".

SEC. 5. ADDITIONAL CARRIAGE REQUIREMENTS FOR CABLE SYSTEMS.

Section 612 of the Communications Act of 1934 is amended by adding at the end thereof the following new subsection:

"(h)(1) In addition to the other requirements of this section, a cable operator (including a common carrier who provides cable service) shall—

"(A) provide access to the cable system to any program service, except in those instances where the cable system lacks available capacity or where a determination is made that the content of the program service is not suitable under local community standards;

"(B) provide access to the cable system to any unaffiliated program service on the same rates, terms, and conditions that it provides such access to an affiliated program service;

"(C) comply with the regulations prescribed by the Commission for the purposes of ensuring such access.

"(2) The regulations prescribed by the Commission under paragraph (1) of this subsection shall not relieve a common carrier who provides cable service of the obligation to comply with—

"(A) the requirements of title II of this Act;

"(B) the order of the Commission entitled 'Filing and Review of Open Network Architecture Plans,' CC Docket 88-2, Phase I, released December 22, 1988, and any amendment or revision thereof;

"(C) such additional regulations and orders as the Commission may from time to time prescribe concerning open network architecture plans and related requirements.".

SEC. 6. EQUAL ACCESS TO PROGRAMMING.

Part IV of title VI of the Communications Act of 1934 is amended by adding at the end thereof the following new section:

"PROGRAM DISTRIBUTION DISCRIMINATION PROHIBITED

"SEC. 640. (a) As used in this section—

"(1) the term 'affiliated person' means—

"(A) any cable operator, and

"(B) any person that, directly or indirectly, owns or controls, is owned or controlled by, or under common ownership or control with, any cable operator; and

"(2) each person who is the beneficial owner of 5 percent or more of the equitable securities (or equivalent thereof) of a person shall be considered to own or control that person.

"(b) Except as provided in subsection (c), it shall be unlawful for any affiliated person who, directly or indirectly, provides programming to any cable operator for carriage on a cable system, to engage in any unjust or unreasonable discrimination in charges, practices, regulations, facilities, or services against any person seeking to obtain such programming for distribution over another cable system or over any other medium capable of making the programming available for private viewing.

"(c) Subsection (b) shall not apply to programming that is carried as a secondary transmission of a signal broadcast by a television station.

"(d) The Commission shall prescribe such regulations as may be necessary to implement and enforce subsection (b).

SEC. 7. STUDIES BY FEDERAL TRADE COMMISSION.

(a) REVIEW OF OWNERSHIP PATTERNS REQUIRED.—(1) The Federal Trade Commission shall, within 60 days after the date of enactment of this Act, initiate a proceeding to investigate—

(A) the extent to which affiliated persons (as that term is defined in section 640(a)(1) of the Communications Act of 1934 as amended by this Act) are engaged in the business of producing and distributing video programming for carriage on cable television systems;

(B) the degree to which such operations result in—

(i) higher rates and charges for cable television service, or

(ii) unfair or anticompetitive acts or practices with respect to other producers or distributors of such programming; and

(C) the extent to which multiple-system operators of cable franchises have engaged in acquisitions of cable systems—

(i) at purchase prices in excess of national averages for similar systems,

(ii) where resulting basic service rate increases have failed to produce commensurate consumer benefits arising from such acquisitions, or

(iii) where accelerated turnover of franchises has created an upward spiral of basic rate increases as franchises are sold.

(2) The Federal Trade Commission shall submit to the Congress not later than one year after the date of enactment of this Act a report on the results of the investigation required by this subsection and shall include in such report such recommendations for legislative or administrative action as the Commission considers necessary or appropriate in the public interest.

(b) EVALUATION OF DELIVERY OF VIDEO PROGRAMMING TO RURAL AREAS.—(1) The Federal Communications Commission shall, within 30 days after the date of enactment of this Act, initiate a proceeding to investigate—

(A) the extent to which video programming is being delivered to residents of rural areas by means of cable television systems and other media;

(B) methods which might be used to improve and extend the delivery of such programming by cable television systems and other media, which shall include—

(i) methods of assuring the provision of cable television services in rural areas through a universal service fund or related mechanism; and

(ii) methods of providing finances for the construction of cable television systems in rural areas under the auspices of Federal, State, and local rural development agencies.

(2) The Federal Communications Commission shall submit to the Congress not later than one year after the date of enactment of this Act a report on the results of the investigation required by this subsection and shall include in such report such recommendations for legislative or administrative action as the Commission considers necessary or appropriate in the public interest to improve and extend the delivery of such programming in rural areas.

Mr. GORTON. Mr. President, I am pleased to join with my colleague, Senator GORE, in introducing the Cable Competition Act.

Only 5 years ago, the Congress enacted the Cable Communications Policy Act, a bill which had my support at that time. Today, we are faced with a dramatically different environment than existed when cable was a fledgling industry. Cable now controls the source of television into 55 percent of the homes in America. Yet in virtually every community, the cable company is wihtout competition. This needs to be changed. Good public policy does not allow unregulated monopolies to go unchallenged.

Today, this bill will begin a discussion on the cable competition issue. Our bill is comprehensive and includes a number of important new initiatives which I believe will benefit the consumer, both in urban and rural areas. For the city dweller, who probably already subscribes to cable, the bill allows States to regulate the rates a cable operator may charge to provide lifeline television services. This should provide welcome relief or subscribers who live in cities, and who have suffered from large price increases from their local cable companies with no possibility of redress. For people who live in rural areas, this provision is also critical, because cable is often used as an antenna service. Not only do people in our smaller towns suffer equally from unlimited rate increases by the cable industry, but in many cases, they do not even have access to over-the-air signals.

Our legislation requires programming services whih are affiliated with cable operations to be made available to all distributers of programming on a nondiscriminatory basis. This provision is aimed at addressing the complaints of satellite and wireless operators who are denied the right to purchase programming at competitive rates. The legislation also allows telephone companies to provide video services, but provides important consumer protections against cross-subsidization from revenues derived from regulated telephone operations. The bill, however, does not overturn any of the specified prohibitions of the modifid final judgment that were imposed on the regional Bell operating companies as a result of the breakup of AT&T. A decision on that subject should be addressed in separate legislation.

For the RECORD, let me state, that I do not have a 100-percent commitment to each and every word in this bill. The issues it addresses are complex and far-reaching. To me, what is more important than any single provision in the bill, is our commitment to begin to debate on these issues and to serve notice that we will no longer tolerate the status quo.

By Mr. BAUCUS:

S. 1069. A bill to amend the Internal Revenue Code of 1986 to increase the amount of nondeductible contributions to individual retirement accounts, to exempt certain distributions from such accounts from the early withdrawal tax, and for other purposes; to the Committee on Finance.

INCREASE IN NONDEDUCTIBLE CONTRIBUTIONS TO INDIVIDUAL RETIREMENT ACCOUNTS

● Mr. BAUCUS. Mr. President, today I am introducing legislation to encourage Americans to increase their savings. I believe that one of the first steps we as a nation must take toward restoring our international competitiveness is to increase our personal savings rate. It is only through our savings that we will have the pool of capital necessary for investment in new plants, new equipment, and a more productive work force.

My bill would permit individuals who have established individual retirement accounts to contribute up to $4,000 per year to their accounts. But it would not change the rules on deductions for contributions to IRA's. The maximum amount that could be deducted would remain $2,000 per year. However, the earnings on the additional nondeductible $2,000 would not be taxed until distributed. The tax rules that now apply to nondeductible contributions would apply to the additional nondeductible contributions.

Under current law, distributions from an IRA are subject to a 10-percent tax on the amount of the distribution if the withdrawal is a premature distribution. My bill would provide that premature distributions made for three preferred uses would not be subject to the 10-percent tax. The preferred uses are the education of the taxpayer, his or her spouse, or

dependents or the retraining of the taxpayer; the purchase of a home by a first-time owner; and long-term health care of the taxpayer or spouse.

I know there are people who ridicule the idea that we as a nation should or can pass legislation to improve our competitive position in international markets. But I believe those people are wrong; they are gambling with our future and with the future of our children. There are some things that we can do through legislation. For one, we can create an environment that is more conducive to growth than our current business conditions.

In some cases, that means reallocating our Federal spending priorities. In other cases, it means creating incentives for action by the private sector. One of the more effective means of creating incentives is through the Tax Code. That is what this legislation does. It creates tax incentives to encourage savings, to encourage investment, and to improve the productivity of the American worker.

During the Reagan administration, the game in Washington was to raise revenue without calling it a tax increase. The President had declared tax increases verboten. So we raised taxes but called it something else. Sometimes we called it revenue enhancement, sometimes we called it compliance measures, sometimes we called it tighteners. And, in 1986, we called it tax reform.

Now I am not here to undo those bills. I certainly am not interested in being the first to call for undoing tax reform. But I fear that in our efforts to go along with President Reagan's position against tax increases, we may have acted without enough consideration of the impact of our actions on the Nation's competitiveness. I am especially concerned that when we acted in 1986 to make the rate cuts revenue neutral, we lost some of the savings and investment incentives that would make us more competitive.

Now is the time for a full and fair debate on tax legislation to restore American competitiveness. Some of the proposals will sound familiar to you. Tax incentives are needed to increase the domestic savings rate and to encourage domestic investment in plant and equipment.

Look at our national savings rate. Since 1981, Congress and the administration have been talking about and trying to increase the national savings rate. But the rate has been falling. From 1960 to 1980, the national savings rate averaged 7.4 percent of GNP. In recent years, it has averaged 2.3 percent. In 1986, it was less than 2 percent of GNP. You heard me right; I said less than 2 percent. That is less than half the rate of England, less than a third that of Germany, and about 10 percent of the rate in Japan.

There are clear explanations for our relatively low national savings rate. We generally must have a reason to save rather than to consume. We save for old age or retirement; we save for emergencies; we save to buy a new house or new cars; or we save to leave something to our children or grandchildren.

But what happens if the Government has encouraged the development of good retirement systems, or if insurance takes care of emergencies, or if the availability of credit replaces savings for houses and cars. What happens is that there is no incentive to save. And that has happened to us. We have lost the incentive to save so we simply don't save.

Half of the decline in the U.S. rate is attributable to the rising Federal deficits. The other half is attributable to the decline in the personal savings rate. We tried in 1981 to use tax incentives to encourage private savings. But these proposals got caught up in the tax reform process and were taken out of the Code without enough consideration of the effect on our competitiveness.

The evidence on the effectiveness of the 1981 savings incentives is inconclusive. But recent work by Larry Summers of Harvard indicates that criticisms of the effectiveness of IRA's may have been premature. In fact, according to Summers, significant evidence indicates that in fact IRA's have encouraged new savings.

I find his evidence persuasive. That is why I think we need to give IRA's another chance. And because our international competitiveness depends in large part on the quality of the U.S. work force, I am introducing this legislation to allow IRA withdrawals for education and retraining.

When it comes to international competitiveness, the factors of production that we must focus on are those that develop human capital and technology. We cannot compete with developing industrial nations based on labor costs or equipment costs. But we can compete based on workers skills and technology. These are two workplace factors of production.

Productivity improvement in the workplace can take many forms. It includes basic education of managers and workers as well as programs to train or retrain them as the workplace changes. It also includes attitudes of workers and managers—a difficult area to address, but one that must be addressed. And it includes the research and development of technologies in the laboratory and the transfer of the new technologies to become new commercial products and services.

Of those I have mentioned, the most basic are education and training. Retraining is going to be become more and more important as we face a workplace that must respond to rapid technological developments. Those developments are changing the manufacturing and the services sectors.

We cannot and should not give up competing in manufacturing. But we must recognize that the solution to competing as a 21st century manufacturer does not mean matching the wages paid in Taiwan, South Korea, or Mexico. That would not raise the American standards of living. And it would add nothing to the world economy. We should not push to reclaim low-pay, low-skill manufacturing jobs. We should instead push to improve the productivity of the American worker.

We cannot compete if all we do is reclaim routine manufacturing jobs. That is not where America's future productivity growth lies, just as our economy has evolved from small farms and small manufacturing to large farms and large manufacturing we also should accept, and prepare, for the next step. That step is the evolution to more sophisticated manufacturing and service jobs. These are jobs that require better educated and more technically skilled employees. We should already be preparing for this next step. We should already be educating the next generations to lead us into the 21st century.

But we are not doing that. We are not preparing our children to compete in an interdependent world economy. Here is something to think about. Just a brief comparison of the results of the American and Japanese education systems. In the United States, an estimated 20 percent of 18-year-olds are functionally illiterate and 25 percent of our high school students drop out before graduating. Japan has the highest rate of high school completion and literacy in the world, over 90 percent. And if we look at the quality of an American high school education, it appears that we may be awarding diplomas for attendance rather than accomplishment. Two-thirds of U.S. colleges provide remedial courses to incoming students because they are not prepared for college work. Things must change. Or rather, we must change them.

We cannot abandon U.S. manufacturing, but we should prepare for the certain growth in service industries. Contrary to the cynics, these jobs will not all be in health care, education, retailing, and government. And they will require higher skill levels than are required of today's jobs. Also, in the future, many jobs are likely to change with advances in technology. The pace of technological development has already created problems for us in the obsolescence of capital equipment. Treasury's Office of Depreciation Analysis is wrestling with the problem of how to depreciate equipment that becomes technologically obsolete

before it physically wears out. But what about human capital. The same technological advances that make equipment obsolete also make employee skills obsolete. What are we doing about that? How many of your firms have begun to think about that problem?

The Federal Government needs to lead on this issue. But we need to recognize that basic skills will not be enough to maintain U.S. economic leadership. We also need to encourage advanced education. And we need to encourage continuing education—or retraining—so that U.S. workers are prepared for jobs that change with technological advances.

In the past, tax incentives were not available for education that prepared a worker for a new or different position. But if the think tanks are right in predicting that the future demands flexibility in employees and periodic retraining, then that tax policy should be revised. And the bill I am introducing today does that by exempting premature distributions from the 10 percent tax if the funds are used for education or retraining.

My bill also would allow funds to be withdrawn from IRA's to pay for the long-term health care of the taxpayer or spouse. Health care expenditures in the United States reached $500 billion in 1987 and absorbed 11.1 percent of GNP. Health care expenditures are expected to rise to 15 percent of GNP by the year 2000. The United States spends proportionately more of its GNP on health care than does any other industrialized country. In spite of the billions spent on health care, more than 37 million Americans, or 1 in 7, are not covered by health care programs. Very few insurance plans cover long-term care. This legislation is not a substitute for overhaul of the Nation's health care system. But it will, in the short run, help Americans to cope with soaring medical and health care costs. And it will create an incentive for millions of Americans to start saving for their long-term health care needs.

The third preferred use would be for first-time home buyers. As the baby boomers have reached the stage in life where they want to buy homes, they are finding that their resources are not keeping up with the cost of housing. For these individuals, the rapid increase in housing costs has quickly out-paced their ability to come up with the downpayment for a home. My bill would make it easier for the first-time home buyer to generate the necessary savings to buy a home by exempting premature withdrawals for home buyers from the 10-percent tax.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1069

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCREASE IN LIMIT ON NONDEDUCTIBLE CONTRIBUTIONS TO INDIVIDUAL RETIREMENT ACCOUNTS.

(a) IN GENERAL.—Subclause (I) of section 408(o)(2)(B)(i) of the Internal Revenue Code of 1986 is amended to read as follows:

"(I) the amount allowable as a deduction under section 219 determined without regard to section 219(g) and by substituting '$4,000' for '$2,000' in section 219(b)(1)(A), over".

(b) CONFORMING AMENDMENTS.—

(1) Section 408(a)(1) of such Code is amended by striking "$2,000" and inserting "$4,000".

(2) Subparagraph (B) of section 408(b)(2) of such Code is amended by striking "$2,000" and inserting "$4,000".

(c) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 2. EXEMPTIONS FROM EARLY DISTRIBUTION PENALTIES FOR CERTAIN DISTRIBUTIONS FROM INDIVIDUAL RETIREMENT ACCOUNTS.

(a) IN GENERAL.—Section 72(t)(2) of the Internal Revenue Code of 1986 (relating to exceptions) is amended by adding at the end thereof the following new subparagraph:

"(E) DISTRIBUTIONS FROM INDIVIDUAL RETIREMENT PLANS FOR EDUCATION, HOME PURCHASE, AND MEDICAL EXPENSES.—Distributions to an individual from individual retirement plans to the extent that the amount of such distributions (determined without regard to distributions described in subparagraph (A) or (D)) does not exceed the sum of the following amounts paid during the taxable year:

"(i) EDUCATIONAL EXPENSES.—Expenses paid during the taxable year for—

"(I) qualified tuition and related expenses (within the meaning of section 117(b)) of the taxpayer, his spouse, or his dependents for attendance at an educational institution described in section 170(b)(1)(A)(ii), including reasonable living expenses while away from home, and

"(II) retraining for purposes of obtaining or enhancing future employment.

"(ii) 1ST TIME HOME PURCHASE.—Expenses for the acquisition or construction of a principal residence (within the meaning of section 1034), but only if the taxpayer did not have a present ownership interest in such a principal residence at any time before such acquisition or construction.

"(iii) LONG-TERM HEALTH CARE.—Expenses which are incurred by the taxpayer for custodial or health care provided to the taxpayer or his spouse in a nursing home, or any goods or services provided to the taxpayer or his spouse outside of a nursing home in connection with the provision of custodial or health care to the individual."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1989.●

By Mr. KERRY:

S. 1070. A bill to amend title XVI of the Social Security Act to provide that the existing requirement for deeming a parent's income and resources to his or her children under age 18 shall not apply in the case of certain severely disabled children, and to provide that the benefit payable to such children under such title shall equal the personal needs allowance; to the Committee on Finance.

KAILEIGH MULLIGAN SSI REFORM ACT

● Mr. KERRY. Mr. President, no one would argue that children are one of our most precious resources and that as a nation, we should strive to encourage and strengthen family unity. I rise today to reintroduce legislation to overturn one aspect of the Supplemental Security Income [SSI] Program which has, on far too many occasions, served to unnecessarily separate severely disabled children from parents who are willing and able to care for their child at home.

Under current law, in certain cases disabled children are entitled to SSI benefits and therefore also eligible for Medicaid. However if the child's parent's income and assets are above $11,416, this income is deemed to the child, who then loses his or her SSI benefits and unless granted a waiver by the State also loses Medicaid eligibility. On the other hand, should the child stay in an institutional setting, they will receive total SSI and Medicaid benefits.

The legislation I am introducing today would require that the income deeming rules be waived for severely disabled children allowing them to receive SSI and Medicaid benefits regardless of their parents' income and assets. The children I am referring to are the individuals who are so disabled that they are eligible for institutional care, but who could receive the same level of care at home.

Far too often, despite the ability and desire of parents to care for their disabled child at home, they are unable to pay the prohibitive medical costs, even when home care can save the State and Federal Government considerable sums of money. But this is not what is at stake here. What is at stake is the quality of life of the individual and family. The best way this can be demonstrated is through example.

Kaileigh Mulligan is a 3-year-old from my home State of Massachusetts. She has Down's syndrome and requires frequent hospitalization and constant care. The easy alternative for her parents would be to keep Kaileigh in the hospital and let others care for her. But, although Kaileigh requires a lot of attention, her parents would rather raise and care for her at home in a loving and secure environment.

Yet the way the current law reads, keeping Kaileigh at home means that the income of her parents is deemed to be Kaileigh's and therefore she loses her eligibility for Medicaid and for SSI. What is important to note is that Kaileigh would have been fully entitled to these benefits if she were to be permanently hospitalized.

In Kaileigh's case the State of Massachusetts has granted a waiver from the income deeming rules so that she could remain at home and still be eligible for Medicaid. However, Federal law still prohibits Kaileigh from receiving SSI benefits, which for her would amount to about $1,200 a year. These funds would primarily be used to help pay for the medical supplies such as feeding tubes, which Kaileigh needs to function from day to day.

Modifying SSI eligibility is not only a morally and socially sound approach, but it is also extremely cost efficient. The Massachusetts Office of Human Services recently estimated that it costs anywhere from $48,000 to $405,000 to care for a child like Kaileigh in a hospital. This cost could be drastically reduced with home care. But more importantly, the direct social benefits to the children and their families are undeniable.

It is time to act and to remove the perverse incentive that exists for children to remain in institutions rather than at home with families. The decision to care for a severely disabled child at home is a difficult one in and of itself, and should not be based on whether or not it will jeopardize benefits. The decision should be based on the willingness and ability of the family to provide quality care and on whether or not it is in the best interests of the family.

I urge my colleagues to join me in supporting this important legislation which gives us an opportunity to reconcile Government policies with the needs of the family and ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1070

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PARENTS' INCOME AND RESOURCES NOT TO BE DEEMED TO CERTAIN SEVERELY DISABLED CHILDREN.

(a) IN GENERAL.—Section 1614(f)(2) of the Social Security Act (42 U.S.C. 1382c(f)(2)) is amended—

(1) by striking "For purposes of determining" and inserting "(A) Subject to subparagraph (B), for purposes of determining"; and

(2) by adding at the end the following new subparagraph:

"(B) Subparagraph (A) shall not apply to a child under age 18 if the Secretary determines that—

"(i) the child is disabled (as defined in subsection (a)(3)) and requires a level of care provided in a hospital, skilled nursing facility, or intermediate care facility (within the meaning of those terms as used in title XIX);

"(ii) it is appropriate to provide such care for the child outside such an institution; and

"(iii)(I) the estimated dollar amount which would otherwise be expended monthly in providing the child with such care within such an institution, exceeds

"(II) the estimated dollar amount which would be expended monthly in providing the child with such care outside such an institution, plus the benefit payable to such child monthly under section 1611(b)(3).".

(b) SSI BENEFIT EQUAL TO PERSONAL NEEDS ALLOWANCE.—Section 1611(b) of such Act (42 U.S.C. 1382(b)) is amended by adding at the end the following new paragraph:

"(3) The benefit under this title for an individual who is described by section 1614(f)(2)(B) shall be payable at a rate equal to the dollar amount specified in subsection (e)(1)(B)(i) for the calendar year 1989 and any calendar year thereafter.".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to benefits for months after the month in which this Act is enacted.●

By Mr. STEVENS (for himself and Mr. PRYOR):

S. 1071. A bill to amend chapter 53 of title 5, United States Code, to authorize the repayment of student loans for recruiting and retaining certain Federal employees; to the Committee on Governmental Affairs.

REPAYMENT OF CERTAIN STUDENT LOANS

Mr. STEVENS. Mr. President, today I am introducing legislation that will help the Federal Government become more competitive in recruiting the "best and brightest" to its ranks. The solution I propose is really quite simple. My bill would allow Federal agencies to repay all or part of the outstanding student loan of a promising college recruit, in exchange for a period of Government service. Let me briefly describe the basis for this proposal and the authorities that it would provide.

I think we all know that the Federal Civil Service is in trouble, unable to recruit, motivate, and retain those who are most critical to its continued health and vigor. This has been termed a "quiet crisis." This crisis is particularly evident in the Federal Government's apparent inability to attract the best and brightest of today's college graduates.

The National Commission on the Public Service, the Volcker commission, cites some compelling statistics in this regard, and it concludes that public service is often seen as a career of last resort. This is especially the case for those who have skills that are in demand, or those who have demonstrated leadership potential through academic excellence.

Now is not the time or place to debate the underlying reasons for this crisis. Instead, it is time to start solving the problem. My bill offers one such solution. It is designed to improve the Federal Government's ability to compete for top college graduates by allowing agencies to repay the student loans of those graduates.

This repayment authority would be limited to most loans made under the federally guaranteed student loan program. That program, established by the Higher Education Act, subsidizes and reinsures loans made by private lenders to help students meet the increasing costs of post-secondary education. Student loans made under similar State programs are covered as well. Because of the Government's acknowledged difficulty in recruiting for the health professions, I've also included student loans made under the Public Health Service Act.

The terms and conditions of those loans are set by lenders according to the various Federal and State statutes that authorize student loans, and my bill would not affect those terms and conditions in any way. Rather, it would allow a Federal agency or department to repay those loans on behalf of promising students.

It is a plain fact that the dream of a college education has become very expensive, and many students have to borrow just to attend. We have seen fit to assist in that dream by providing indirect financial support, in the form of loan guarantees and interest subsidies under the Higher Education Act and similar statutes. However, this support notwithstanding, many of our brightest young people graduate from college in debt. And, where that debt is heavy, many graduates simply cannot afford the option of Federal service.

My bill will remove that barrier from civil service. However, there are some strings attached.

For a Federal agency, this repayment authority would be at its discretion, used as it sees fit to recruit highly qualified people that are important to its mission. It would also have discretion to repay all or part of the student loan.

However, this authority is not unfettered. The agency would be required to absorb the expense of loan repayment out of its existing payroll budget—my proposal envisions no new outlays whatsoever. This has the added benefit of insuring that this authority is used sparingly and only when necessary.

Agency managers will have to make some tough decisions as a consequence, reallocating funds to use this recruiting incentive, but that's what they get paid for.

For the college recruit, loan repayment has strings attached as well. First, as a condition of repayment, my bill requires the recruit to remain in Federal Government service for not less than 3 years, and to execute a written agreement to that effect. However, an agency and a new recruit may agree on a longer service/repayment period, so long as the agreement remains consistent with the terms of the original student loan.

Second, for the Government to continue repayment, the newly appointed Federal employee would be required to maintain an acceptable level of performance, as defined under the Government's present performance appraisal system. If the employee's official performance rating falls below that level, loan repayment by the Government would stop, and the employee would resume repayment according to the terms of his or her original loan agreement with the lender.

Finally, the Government would also stop loan repayment on behalf of an employee if that employee is separated from the Federal service for any reason. As before, the employee—now ex-employee—would resume repayment.

These are stringent conditions, but they should not trouble the kinds of people this bill is intended to benefit. And, they insure the Government a return on its human resource investment.

In summary, Mr. President, my bill represents a start in dealing with the crisis that besets our civil service. I believe that it is consistent with the education and public service priorities of the President, and it is also consistent with the fiscal realities that we all must contend with. It doesn't begin to address all of the problems that we face in this area, but it will help the Federal Government compete for the best and brightest. Accordingly, I urge my colleagues to support this legislation.

I ask unanimous consent that the text of my bill and the sectional analysis be printed in the RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1071

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

REPAYMENT OF STUDENT LOANS FOR CERTAIN FEDERAL EMPLOYEES

SECTION 1. (a) Chapter 53 of title 5, United States Code, is amended by inserting after section 5375 the following new section:

"§ 5376. Repayment of student loans for certain employees

"(a) The head of any department or agency may repay all or part of a student loan, as provided in subsection (b), from funds appropriated and available at the time of such repayment for an employee appointed to a position that requires highly qualified professional, technical, or administrative personnel.

"(b) A student loan repayment under this section may be for—

"(1) any loan made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 (20 U.S.C. 1071 et seq.);

"(2) any loan made under part E of title IV of the Higher Education Act of 1965 (20 U.S.C. 1087aa et seq.);

"(3) a health education assistance loan made or insured under part C of title VII of the Public Health Service Act (42 U.S.C. 294 et seq.) or under part B of title VII of such Act (42 U.S.C. 297 et seq.); or

"(4) any student loan made, insured, or guaranteed by a State government.

"(c) An employee whose student loan is repaid under this section shall sign a written agreement that—

"(1) includes the period of Federal service to be served by such employee as determined by the head of a department or agency and such employee;

"(2) requires, as a condition of repayment, that such period of Federal service is of less than 3 years;

"(3) includes the amount of the student loan (or portion thereof) to be repaid by the department or agency, consistent with the terms of the employee's student loan agreement with the lender;

"(4) requires that an employee whose loan is repaid by a department or agency shall—

"(A) maintain an acceptable level of performance for the period of loan repayment; and

"(B) resume repayment (in lieu of the department or agency) according to the terms of the original loan agreement with the lender, if such employee fails to meet an acceptable level of performance as determined by the head of the department or agency; and

"(5) provides that if an employee is separated from Federal service before the end of the period such employee agreed to serve—

"(A) the department or agency shall cease repayment of the student loan of such employee; and

"(B) the employee shall resume repayment thereafter in accordance with the terms of the original student loan agreement with the lender.

"(d) If a portion of a loan is repaid under this section for any year, interest on the remainder of such loan shall accrue and be paid in the same manner as is otherwise required by the terms of the original student loan.

"(e) Nothing in this section shall be construed to authorize refunding any repayment of a loan.

"(f) The repayment of a loan under this section shall be in addition to any pay an employee would otherwise receive for a position and shall not be considered or construed as compensation.".

(b) The table of sections for chapter 53 of title 5, United States Code, is amended by inserting after the item relating to section 5375 the following:

"5376. Repayment of student loans for certain employees.".

A BILL TO AUTHORIZE THE REPAYMENT OF STUDENT LOANS FOR RECRUITING AND RETAINING CERTAIN FEDERAL EMPLOYEES—SECTIONAL ANALYSIS

Section 1 (a) amends chapter 53 of title 5, United States Code, by inserting a new section 5376.

§ 5376(a) provides that a Federal agency or department may repay all or part of certain student loans owed by, or made on behalf of, highly qualified recruits for professional, technical, or administrative positions in the Federal civil service. It further provides that such repayment shall be from funds already appropriated at the time of appointment.

§ 5376(b) limits this repayment authority to student loans made under parts B and E of title IV of the Higher Education Act. These parts encompass Guaranteed Student Loans (GSLs), Supplemental Loans for Students, PLUS loans (loans for parents of dependent students), and Perkins Loans (direct loans to students in institutions of higher learning). Health education assistance loans made under part C of title VII of the Public Health Service Act are also covered, as are loans made, insured, or guaranteed by a state government.

§ 5376(c) imposes certain obligations upon an individual appointed to the civil service whose student loan is to be repaid under this section.

Subsections (1) and (2) require, as a condition of loan repayment, that the individual agree in writing to a period of Federal service of not less than three years; the service commitment made by the employee corresponds to the period of loan repayment by the agency.

Subsection (3) specifies that the written agreement include the portion or amount of the student loan to be repaid by the government, and the period of its repayment. This subsection also requires that the service/repayment agreement between an agency and an employee be consistent with the terms and conditions of the employee's original student loan agreement with the lender.

Subsection (4) requires, as a condition of continued loan repayment by the goverment, that the employee agree to maintain an acceptable level of performance (as determined by the employing agency) for the period of loan repayment. If at any time during that repayment period the employee's performance is determined to be unacceptable, the agreement specifies that the employee (or in the case of a parent borrower, the parent) will repay the balance of that loan according to the terms of the original loan agreement with the lender.

Subsection (5) requires the employee (or in the case of a parent borrower, the parent) to resume loan repayment upon the employee's separation from government service, if such separation occurs before the expiration of that employee's service/repayment agreement with the government.

§ 5376(d) provides that if an agency repays a portion of an employee's loan in any given year, any interest on the remainder of that loan accrues and is paid by that agency (or, where the government stops repayment, the employee or parent borrower, whichever is applicable) according to the terms of the original student loan.

§ 5376(e) specifically precludes an employee, former employee, or parent borrower, whichever is applicable, from receiving a refund from a lender of any loan repayment (or portion thereof) made by an agency under this section.

§ 5376(f) states that an agency's loan repayment made under this section is not to be considered as part of an employee's pay, or as any part of that employee's compensation for government service.

Section 1 (b) amends the table of sections for chapter 53 of title 5 by inserting information relating to section 5376.

Mr. PRYOR. Mr. President, I rise today with my colleague, Senator STEVENS, to introduce a bill that will try to improve the Government's ability to recruit and retain highly qualified employees by allowing agencies to repay all or a portion of an employee's student loan.

The Federal Government has been having increasing trouble over the past years in hiring and keeping employees who fill the needs of the many agencies which perform such a variety

of important and necessary tasks. This is partly due to the fact that government salaries have fallen behind those of the private sector. It is also due to the fact that the Government, as a whole, has not done as good a job as it could in going out and actively recruiting highly qualified candidates.

The bill provides agencies with another tool that they can use to aid recruiting efforts. Agencies will have wide latitude to work out how much of a loan will be repaid by the agency and the length of time the employee will have to commit to staying with the agency to reap the benefit of this program. However, since agencies will be required to absorb the costs, I anticipate that agencies will exercise great discretion in using this program. The loans which can be repaid under this program are guaranteed student loans, supplemental loans for students, PLUS loans, and Perkins loans.

I view this bill not as a final solution but as a point of departure for future discussions on how to address the Government's recruitment and retention problems. Other issues which we might want to consider are improving and expanding the authority to reimburse applicants who have to travel to job interviews and increasing the instances in which the Government will pay for newly hired employees to move to their first job location.

I look forward to working with Senator STEVENS on this legislation and the many other recruitment and retention issues which need to be addressed.

By Mr. STEVENS:

S. 1072. A bill to provide that a demonstration project be conducted to test flexiplace work arrangements for Federal employees, and to provide for the establishment of a program to facilitate the exchange of information relating to job-sharing arrangements among Federal employees; to the Committee on Governmental Affairs.

FEDERAL EMPLOYEES FLEXIBLE WORK ARRANGEMENTS ACT

Mr. STEVENS. Mr. President, the shape of the American work force is changing, and today I am introducing legislation that will help the Federal civil service adapt to those changes. I join with Representative FRANK WOLF in the House in offering a bill that would authorize Federal agencies and employees to experiment with more flexible job sharing and worksite arrangements, to include the opportunity for home-based work.

This legislation is entitled the Federal Employee Flexible Work Arrangement Act of 1989. It is born out of government's need to accommodate the new American worker. As we enter the 1990's, the typical American worker will be part of a two-income family, most likely with children or dependent elderly. That worker will spend a considerable amount of time commuting to and from his or her employer's place of business, trying to balance the demands of work and family. Employers must establish human resource management policies that are sensitive to these demands. The legislation we propose is intended to foster such human resource management policies in the Federal Government.

The first title of this bill will allow agencies to set up "flexi-place" experiments, subject to regulation and oversight by the Office of Personnel Management. Under these experiments, certain Federal employees will be permitted to work at home or at some other alternative worksite. Such arrangements are made possible by advances in telecommunications and the widespread availability of personal computers.

These technologies allow a fundamental change in the nature of employment: in the past, the worker had to go to the work, and those of us who commute in Washington know how difficult that can be. Now, it is possible to bring the work to the worker—or to let the worker take it home. The employee can continue to maintain a presence in the organization, only that presence will be electronic rather than physical. In effect, the worker will commute electronically—or telecommute—to the workplace of the future.

This may be some years away, but it is not too early to begin experimenting with the concept. That is the principal purpose of the legislation we propose. Its premise is that many jobs have duties that do not need to be performed in the central office. Indeed, in many cases, these duties—such things as report writing, analytical work, et cetera—are more effectively accomplished away from the diversions of the office. By allowing these duties to be performed at home, productivity, morale, and work quality should improve. Other benefits attend as well, such as some relief from traffic congestion and the high cost of office space in our central cities.

These predictions may sound farfetched, but the advantages of flexible work-site arrangements have already been demonstrated in both public and private sectors. Over 200 private firms permit these sorts of arrangements, firms such as New York Life, Control Data, and American Express. State and local governments in California, Colorado, New Jersey, and Washington State have also begun experiments such as envisioned by this legislation.

Flexi-place is a natural outgrowth of flexible work scheduling arrangements, or flexi-time. The Congress authorized the latter on a Government-wide basis a few years ago, and I believe that it has been quite successful, benefiting employees and Federal agencies alike. That program began in much the same way as the one Mr. WOLF and I propose, with experimentation by agencies in a variety of work settings. I believe that it will net the same results.

The second title of this bill is intended to facilitate another flexibility in the management of our human resources: job sharing. Under a job sharing arrangement, two part-time employees perform the work of a single full-time position. Such arrangements accommodate the needs of those employees or applicants who desire less-then-full-time work, such as a new mother or father, or a person with a dependent parent.

In theory, employees who share a full-time position are equally skilled; thus, there is no disadvantage to the manager who agrees to such an arrangement. However, finding two people who are equally qualified, who both desire part-time work, and whose scheduling requirements adequately mesh, is no easy task.

Job sharing in the Federal Government is already authorized under chapter 34 of title 5; however, this authority provides no means of facilitating these arrangements. To date, job sharing has occurred on an ad hoc basis, and as a consequence, it has not occurred with great frequency.

The bill I am introducing today would remedy this by requiring the Office of Personnel Management to set up a job sharing data bank in appropriate geographic locations, for example, areas with a high concentration of Federal employees. Using this data bank, agencies, employees and applicants interested in a job-sharing arrangement would be able to match their respective needs and requirements. Such a data bank would allow an employee to locate a suitable job-sharing partner and identify those agency vacancies that may be filled on a shared basis.

Mr. President, the two parts of this bill are variations of the same theme. That theme centers on greater flexibility in the Federal workplace, an ability on the part of the Government, as an employer, to tailor its conditions of employment to the needs of the individuals that comprise its work force. This is something that any employer should seek to do. For the Government, this flexibility becomes an imperative if we are to compete successfully in increasingly competitive labor markets. Accordingly, I urge my colleagues to support this legislation. I ask unanimous consent that the text of my bill be reprinted in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1072

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Employees Flexible Work Arrangements Act of 1989".

TITLE I—DEMONSTRATION PROJECT

SEC. 101. DEFINITIONS.

For purposes of this title—

(1) the term "agency" has the meaning given it by section 4701(a)(1) of title 5, United States Code, except that such term also includes the United States Postal Service, the Postal Rate Commission, and a military department (as defined by section 102 of such title);

(2) the term "employee" has the meaning given it by section 2105 of title 5, United States Code;

(3) the term "Office" means the Office of Personnel Management; and

(4) the term "flexiplace work arrangement", as used with respect to an employee, means an arrangement under which the employee is allowed to perform the duties and responsibilities of such employee's position at home or another place apart from the employee's usual place of work.

SEC. 102. AUTHORITY.

(a) IN GENERAL.—Agencies may design and, upon approval by the Office, conduct experiments to test the feasibility and desirability of offering flexiplace work arrangements to their employees.

(b) PROCEDURES.—The Office shall by regulation establish procedures under which proposals for experiments under this title may be submitted. In addition to any requirements as to the required form or content of any agency proposal, the regulations shall indicate the deadline for submitting any such proposal. Regulations under this subsection shall be prescribed not later than October 1, 1989.

(c) GUIDELINES.—The Office shall prescribe guidelines with which all flexible work arrangements under this title must conform. The guidelines shall provide as follows:

(1) An agency conducting an experiment under this title shall be responsible for determining which positions or types of positions will be included. The procedures used in identifying the employees to be included in the experiment shall be consistent with—

(A) subsections (f) and (g) of section 4703 of title 5, United States Code; and

(B) the interest in having flexiplace work arrangements tested in a broad range of positions which vary on the basis of pay level, job functions, and other factors.

(2) Employees selected to test flexiplace work arrangements and the personnel who will be supervising them shall be given appropriate training, including training relating to any new or revised standards which will be used in performance evaluations.

(3) The agency may impose reasonable conditions to ensure the appropriate use and maintenance of any equipment or items provided for use at a participating employee's home or other place apart from the employee's usual place of work.

(4) The agency shall establish requirements relating to the frequency with which the employee must report to such employee's usual place of work each week or each month, as appropriate.

(5) Participation by an employee shall be voluntary. An employee may elect to cease participating in a flexiplace work arrangement at any time. The employing agency may terminate an employee's participation in such an arrangement if the employee's continued participation would not be in the best interests of the agency.

(6) Participation in the project will not adversely affect an employee's eligibility for advancement or any other rights or benefits.

(7) The limitations under section 1348 of title 31, United States Code (relating to telephone installation and charges) may be waived for participating employees in appropriate circumstances.

SEC. 103. TERMINATION DATE; REPORTING REQUIREMENT.

(a) TERMINATION DATE.—Experiments under this title shall terminate not later than September 30, 1991.

(b) REPORTING REQUIREMENT.—The Office shall review all experiments undertaken under this title and, not later than June 30, 1991, submit a written report to the Congress containing its findings. The report shall include—

(1) the Office's findings with respect to any additional costs or savings associated with flexible working arrangements, as well as their effect on productivity, job satisfaction, and morale; and

(2) recommendations for any legislation or administrative action which the Office considers appropriate.

TITLE II—JOB-SHARING PROGRAM

SEC. 201. JOB-SHARING PROGRAM.

(a) ESTABLISHMENT.—Section 3402 of title 5, United States Code, is amended by adding at the end the following:

"(c)(1) The Office of Personnel Management shall establish and operate a program designed to facilitate the use of job-sharing arrangements in agencies.

"(2) Under the program, the Office shall serve as a clearinghouse for information pertaining to individuals seeking employment under job-sharing arrangements, and any positions which may or must be filled under such an arrangement.

"(3) Any individual wishing to be included in listings furnished under the program may be required to indicate the positions or types of positions sought, personal qualifications, days or hours of availability for work, and any other information which the Office may by regulation require.

"(4) An agency having positions appropriate for listing under the program shall inform the Office as to the availability of those positions. Agencies shall provide such information as the Office may by regulation require, including information relating to how the duties and responsibilities of each position would be apportioned under a job-sharing arrangement.

"(5) Information pertaining to any particular individual shall be kept available until the earlier of—

"(A) a written request by such individual to be excluded from the program; or

"(B) such individual's being placed in a position on a job-sharing basis.

An individual may not be included in listings under the program for more than 1 year, except upon the written request of such individual for an extension. An individual may receive more than 1 extension under the program, but each such extension shall be for not to exceed 1 year."

(b) NOTICE.—The Office of Personnel Management shall take measures reasonably designed to provide continuing notice to Government employees and applicants for Government employment relating to the availability of the program established pursuant to the amendment made by subsection (a).

By Mr. STEVENS (for himself, Mr. BYRD, Mr. DIXON, Mr. ROBB, and Mr. SIMON):

S. 1073. A bill to amend chapter 83 of title 5, United States Code, to provide civil service retirement credit for service performed under the Railroad Retirement Act, and for other purposes; to the Committee on Commerce, Science, and Transportation.

RAILROAD SERVICE RETIREMENT CREDIT ACT

Mr. STEVENS. Mr. President, the legislation I am introducing today would provide retirement credit under the civil service retirement system [CSRS] for certain Federal employees with Railroad Retirement Act service.

This bill is identical to H.R. 1948 which passed the Senate in December 1987.

Under current law, individuals with service under the Railroad Retirement Act and the CSRS receive two separate annuities at retirement. This legislation would allow certain employees with post-1935 Railroad Retirement Act service who later went to work for the Federal Government to receive one annuity under CSRS rather than one from civil service and another from railroad retirement.

Since 1911, the Federal Government has employed a small number of individuals recruited from the railroad industry to implement Government rail transportation programs. These experts, all highly knowledgeable in the construction, maintenance, and operation of railroads, have been employed in the Interstate Commerce Commission [ICC], the Federal Railroad Administration [FRA], the National Transportation Safety Board [NTSB], the National Mediation Board [NMB], the Railroad Retirement Board [RRB], the General Accounting Office [GAO] and as congressional employees. In addition, the Alaska Railroad, formerly a part of the FRA, employs individuals who have Railroad Retirement Act service.

In implementing these rail transportation programs, Congress authorized the employment of these experts from the railroad industry to promote safe rail transportation. Unfortunately, those who have pursued this dual career now face a serious disadvantage at retirement.

During their years of railroad service, these employees contributed to and were vested in the railroad retirement system which was established by Congress to ensure that employees on our Nation's railroads would be amply provided for in their retirement years. Once they were recruited into the Federal Government, however, they contributed to and became vested in the civil service retirement system. When these individuals accepted Federal employment, the two federally established retirement programs required substantially equal contributions and

one could reasonably assume there would be no adverse effect on an individual's ultimate retirement annuity.

In fact, this has not proven to be the case. Those individuals who were recruited from the railroad industry into Federal employment now find that their combined annuity under the railroad retirement and civil service retirement systems is significantly less than if their total service had been covered continuously under either one of the two systems. In effect, the railroad worker is penalized for moving to the civil service.

Mr. President, the recruitment of qualified employees for the Federal Government is difficult enough without maintaining such a disincentive for accepting Federal employment. This is an anomalous situation affecting a finite number of Federal employees. With the Federal Government today, there is a small group of approximately 460 people, including about 60 employees of the Alaska Railroad, who would benefit from this legislation.

Under my bill, this small group of individuals would be allowed to deposit into the civil service retirement fund the difference between what they contributed under the Railroad Retirement Act and what they would have contributed to the fund if they had been subject to the civil service retirement system during those years of railroad service. They would then receive one retirement annuity from the civil service retirement system.

This is a just solution to what, in my judgment, is an inequitable situation for a small number of Federal employees. It is not offered without precedent. In recent years, for instance, we provided civil service retirement system credit for three similarly situated groups—certain employees of DOD nonappropriated fund instrumentalities, Federal employees with pre-1969 National Guard technician service, and cadet nurses who served during World War II.

The Congressional Budget Office estimates that the cost of enactment of this bill to the Federal Government will not exceed $300,000 per year.

Mr. President, I ask unanimous consent that the text of my bill be included in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1073

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Railroad Service Retirement Credit Act of 1989."

SEC. 2. SERVICE CREDIT COMPUTATION.

Subsection (b) of section 8332 of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (15);

(2) by striking out the period at the end of paragraph (16) and inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (16) the following new paragraph:

"(17) in the case of any individual who first becomes an employee of the Department of Transportation, the Interstate Commerce Commission, the National Mediation Board, the National Transportation Safety Board, the Railroad Retirement Board, the GAO, or an employee as defined in 5 U.S.C. 2107, on or before December 31, 1983, service performed on or after December 31, 1935, as an employee subject to the provisions of the Railroad Retirement Act of 1935, the Railroad Retirement Act of 1937, or the Railroad Retirement Act of 1974 (45 U.S.C. 231 et seq.), if such employee—

"(A) acquires 5 years or more of creditable civilian service (other than service performed on or after December 31, 1935, as an employee subject to the provisions of such Railroad Retirement Acts); and

"(B) makes a deposit to the Fund in an amount equal to the excess of the amount which would be required under section 8334(c) of this title, but for section 8334(g)(7) of this title, over the total amount contributed by such employee under such Railroad Retirement Acts."

SEC. 3. DEPOSITS.

Section 8334(g) of title 5, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(7) service creditable under paragraph (17) of section 8332(b) of this title, except to the extent provided in subparagraph (B) of such paragraph."

SEC. 4. INELIGIBILITY FOR ANNUITY UNDER RAILROAD RETIREMENT ACT OF 1974.

Section 2 of the Railroad Retirement Act of 1974 (45 U.S.C. 231a) is amended by adding at the end the following new subsection:

"(i) An individual who is entitled to an annuity under subchapter III of chapter 83 of title 5, United States Code, is not eligible to receive an annuity under this section on the basis of the same service."

By Mr. BURDICK (for himself, Mr. CHAFEE, Mr. MITCHELL, Mr. MOYNIHAN, Mr. SIMON, Mr. COHEN, Mr. CONRAD, Mr. JEFFORDS, Mr. BENTSEN, Mr. REID, Mr. LIEBERMAN, Ms. MIKULSKI, Mr. ADAMS, Mr. KASTEN, Mr. SASSER, Mr. DODD, Mr. DASCHLE, Mr. SARBANES, Mr. FOWLER, Mr. BIDEN, Mr. SANFORD, Mr. GORTON, and Mr. BAUCUS):

S. 1076. A bill to increase public understanding of the natural environment and to advance and develop environmental education and training; to the Committee on Environment and Public Works.

NATIONAL ENVIRONMENTAL EDUCATION ACT

Mr. BURDICK. Mr. President, today I am introducing legislation to renew the Federal Government's commitment to environmental education and training. I am pleased that the ranking minority member of the Environment and Public Works Committee, Senator CHAFEE, and the majority leader Senator MITCHELL, and more than 20 other Senators, are joining me in introducing this important legislation. In the years I have served on the Senate Environment and Public Works Committee, environmental problems have become increasingly complex and interrelated. In the past several years, we have seen growing evidence that we now face environmental problems on a global scale. Responding to national and global environmental issues, we developed programs to prevent and reduce pollution, such as the Clean Air Act, the Clean Water Act, Superfund, the Resource Conservation and Recovery Act, and the Safe Drinking Water Act.

Responding to environmental problems over the long run, will require more than enactment of specific environmental programs. It will require building public understanding of environmental issues and public commitment to protecting our natural environment.

The legislation we are introducing today is designed to build public awareness and understanding of environmental issues. The bill directs the Federal Government to support and encourage environmental education programs, and to work with States, local governments, and nonprofit organizations to promote existing environmental education efforts. Following the first Earth Day in 1970, Congress passed major environmental statutes, such as the Clean Air Act and the Clean Water Act, which form the foundation of our present environmental program. It is sometimes forgotten that a key part of this first round of environmental laws was the National Environmental Education Act, signed into law by President Nixon on October 30, 1970.

Unfortunately, this act was repealed in 1981 as part of the Omnibus Budget Reconciliation Act. The legislation we are introducing today renews and restates our commitment to environmental education.

The bill includes many of the key elements of the original Environmental Act as well as several new provisions. The bill establishes an Office of Environmental Education at the Environmental Protection Agency. The office would take the lead in developing environmental education, training, and related activities, and it would administer the other provisions of the legislation. The bill provides for the development and delivery of education and training programs, including classroom training, field studies and related activities.

The EPA is to establish a contractual relationship with a major univer-

sity, or a consortium of universities and nonprofit agencies, to carry out training programs on an annual basis. A key provision of the bill provides for about $5 million in grants each year to school systems, colleges, environmental agencies, and nonprofit organizations for environmental education programs and projects. Grants are to be limited to $100,000 and are to provide 75 percent of projects funds. Twenty-five percent of grant funds are to be used to make small grants of not more than $5,000.

One goal of this bill is to attract young people toward careers in environmental protection. Since it is sometimes difficult to understand the roles of the various Federal agencies involved in environmental programs, the bill provides for up 150 internships for college students at these Federal agencies. The bill also provides for a series of awards to recognize excellence in environmental education.

The Theodore Roosevelt Award would be given to recognize an outstanding career in environmental education, teaching, and administration. The Henry David Thoreau Award would recognize an outstanding contribution to literature on the natural environment. The Rachel Carson Award would recognize an outstanding contribution in print or film media to public education in environmental issues. Finally, the bill provides for a council to advise the Administrator of the EPA in implementing the Environmental Education Program.

Mr. President, given the serious financial constraints we currently face, I propose a modest authorization of $15 million for the National Environmental Education Act. This is the average authorization level we provided in the original environmental education legislation passed in 1971. In addition, I am proposing that we establish an environmental education trust fund. Half of the amount of any penalty paid by those who violate our major environmental laws would be deposited in the trust fund. The total amount of penalties under environmental laws is about $25 million, and this is expected to increase in the future.

The trust fund should come very close to covering the $15 million authorized in this bill. At the present time, most of these penalties go directly to the Treasury.

In the news we see the problems facing our environment—oilspills, global warming, ground water contamination, lead in drinking water, and radon gas in homes and schools. These problems can appear to be both intractable and overwhelming. Education can bring environmental problems into better focus and establish a foundation on which to build long-term solutions. This legislation restores the Federal Government's commitment to the environment, and to teaching new generations about our natural resources.

In closing, I want to note my gratitude to former Senator Gaylord Nelson and former Representative John Brademas, the sponsors of the original environmental education legislation. Today's legislation builds on their work. I urge my colleagues to join me in supporting this legislation, and I ask unanimous consent that a section-by-section description of the bill and a copy of the bill be printed at an appropriate place in the RECORD.

There being no objection, the material was ordered to be printed in the Record, as follows:

S. 1076

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) TITLE.—This Act may be cited as the "National Environmental Education Act".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title and table of contents.
Sec. 2. Findings.
Sec. 3. Definitions.
Sec. 4. Office of Environmental Education.
Sec. 5. Environmental education and training program.
Sec. 6. Environmental education grants.
Sec. 7. Environmental internships.
Sec. 8. Environmental education awards.
Sec. 9. Environmental Education Advisory Council.
Sec. 10. Environmental Education Trust Fund.

SEC. 2. FINDINGS.

The Congress finds that—

(1) Threats to human health and environmental quality are increasingly complex, involving a wide range of conventional and toxic contaminants in the air and water and on the land.

(2) There is growing evidence of international environmental problems, such as global warming, ocean pollution, and species diversity, and that these problems pose serious threats to human health and the environment on a global scale.

(3) Effective response to complex environmental problems requires understanding of the natural environment and awareness of environmental problems and their origins, and the skills to solve these problems.

(4) Development of effective solutions to environmental problems and effective implementation of environmental programs requires a well educated and trained, professional work force.

(5) Current Federal efforts to inform and educate the public concerning the natural environment and environmental problems are not adequate.

(6) Existing Federal support for development and training of professionals in environmental fields is not sufficient.

(7) The Federal Government, acting through the Environmental Protection Agency, should work with local education institutions, State education agencies, not-for-profit educational organizations, and private sector interests to support development of curricula, special projects, and other activities, to increase understanding of the natural environment and to improve awareness of environmental problems.

(8) The Federal Government, acting through the coordinated efforts of its agencies and with the leadership of the Environmental Protection Agency, should work with local education institutions, State education agencies, not-for-profit educational organizations, and private sector interests to develop and support methods, practices, and programs to assure the highest level of education and training, including technical and scientific skills, of professionals in environmental fields.

SEC. 3. DEFINITIONS.

For the purposes of this Act, the term—

(1) "Administrator" means the Administrator of the Environmental Protection Agency;

(2) "Agency" means the United States Environmental Protection Agency;

(3) "Federal agency" or "agency of the United States" means any department, agency or other instrumentality of the Federal Government, any independent agency or establishment of the Federal Government including any Government corporation;

(4) "Secretary" means the Secretary of the Department of Education;

(5) "local education agency" means any education agency as defined in section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 3381); and

(6) "not-for-profit" organization means an organization, association, or institution described in section 501(c)(3) of the Internal Revenue Code of 1986, which is exempt from taxation pursuant to the provisions of section 501(a) of such code.

SEC. 4. OFFICE OF ENVIRONMENTAL EDUCATION.

(a) The Administrator shall establish an Office of Environmental Education within the Office of External Affairs.

(b) The Office of Environmental Education shall—

(1) develop and support programs and related efforts to improve understanding of the natural environment, and the relationships between humans and their environment, including the global aspects of environmental problems;

(2) support development and dissemination of model curricula, educational materials, and training programs for elementary and secondary students and other interested groups;

(3) develop and disseminate, in cooperation with educational and environmental organizations, environmental education publications and audio/visual materials;

(4) develop and support environmental education seminars, training programs, and workshops for environmental professionals, as provided for in section 5 of this Act;

(5) manage Federal grant assistance provided to local education agencies, institutions of higher education, and other not-for-profit organizations under section 6 of this Act;

(6) administer the environmental internship program provided for in section 7 of this Act;

(7) administer the environmental awards program provided for in section 8 of this Act;

(8) provide staff support to the Environmental Education Council provided for in section 9 of this Act;

(9) assess the demand for professional skills and training needed to respond to current and anticipated environmental problems and cooperate with appropriate institutions, organizations, and agencies to develop training programs, curricula, and continuing

education programs for teachers, school administrators, and related professionals;

(10) assure the coordination of Federal statutes and programs administered by the Agency relating to environmental education and work to reduce duplication or inconsistencies within these programs;

(11) work with the Department of Education, the Federal Interagency Committee on Education, and with other Federal agencies to assure the effective coordination of programs related to environmental education;

(12) provide technical assistance to local education agencies, State education and natural resource agencies, and others; and

(13) otherwise provide for the implementation of this Act.

(c) The Office of Environmental Education shall—

(1) be directed by a Director who shall be a member of the Senior Executive Service;

(2) include a headquarters staff of not less than ten full-time equivalent employees; and

(3) be supported by not less than one full-time equivalent employee in each Agency regional office.

SEC. 5. ENVIRONMENTAL EDUCATION AND TRAINING PROGRAM.

(a) There is hereby established an Environmental Education and Training Program. The purpose of the program shall be to train educational professionals in the development and delivery of environmental education and training programs and studies.

(b) The functions and activities of the program shall include, at a minimum—

(1) classroom training in environmental education and studies including environmental sciences and theory, educational methods and practices, and topical environmental issues and problems;

(2) demonstration of the design and conduct of environmental field studies and assessments;

(3) training in development of environmental programs and curriculum;

(4) sponsorship and management of international exchanges of teachers and other educational professionals involved in environmental programs and issues;

(5) maintenance of a library of environmental education materials, information, and literature;

(6) evaluation and dissemination of environmental education materials, training methods, and related programs;

(7) sponsorship of conferences, seminars, and related forums for the advancement and development of environmental education and training curricula and materials; and

(8) such other activities as the Administrator determines to be consistent with the objectives of this Act.

Special emphasis should be placed on developing environmental education programs, workshops, and training tools which are portable and can be broadly disseminated including development of computer networks.

(c)(1) The Administrator shall make a grant on an annual basis to an institution of higher education or other research institution which is a not-for-profit institution (or consortia of such institutions) to establish and operate the environmental education and training program required by this section.

(2) Any institution of higher education or other research institution (or consortia of such institutions) which is a not-for-profit organization and is interested in receiving a grant under this section may submit to the Administrator an application in such form and containing such information as the Administrator may require.

(3) The Administrator shall award grants under this section on the basis of—

(A) the capability to develop environmental education and training programs;

(B) the capability to deliver training to a range of participants and in a range of settings;

(C) the expertise of the staff in a range of appropriate disciplines;

(D) the relative economic effectiveness of the program in terms of the ratio of overhead costs to direct services;

(E) the results of any evaluation under paragraph (5) of this subsection; and

(F) such other factors as the Administrator deems appropriate.

(4) No funds made available to carry out this section shall be used for the acquisition of real property (including buildings) or the construction or substantial modification of any building.

(5) The Administrator shall establish procedures for a careful and detailed review and evaluation of the education and training program to determine whether the quality of the program being operated by the grantee warrants continued support under this section.

(d)(1) Individuals eligible for participation in the program are teachers, faculty, administrators and related support staff associated with local education agencies, colleges, and universities, employees of State education, environmental protection, and natural resource departments, and employees of not-for-profit organizations involved in environmental education activities and issues.

(2) Environmental education professionals shall be selected for participation in the program based on applications which shall be in such form as the Administrator determines to be appropriate.

(3) In selecting individuals to participate in the program, the Administration shall provide for a wide geographic representation and a mix of individuals working at primary, secondary, postsecondary levels, and with appropriate other agencies and departments.

(4) Individuals selected for participation in the program may be provided with a stipend to cover travel and accommodations in such amounts as the Administrator determines to be appropriate.

SEC. 6. ENVIRONMENTAL EDUCATION GRANTS.

(a) The Administrator may enter into a cooperative agreement or contract, or provide financial assistance in the form of grants to support projects to design, demonstrate, and disseminate practices, methods, or techniques related to environmental education and training.

(b) Activities eligible for grant support pursuant to this section shall include, but not be limited to—

(1) design and demonstration of environmental curricula, including development of educational tools and materials;

(2) design and demonstration of field methods, practices, and techniques, including assessment of environmental and ecological conditions and analysis of environmental pollution problems;

(3) conduct of special projects to understand and assess a specific environmental issue or a specific environmental problem; and

(4) support of training or related education for personnel, including teachers, faculty, or administrative staff.

(c) In making grants pursuant to this section, the Administrator shall give priority to those proposed projects which will develop—

(1) a new or significantly improved environmental education practice, method, or technique;

(2) an environmental education practice, method, or technique which may have wide application;

(3) an environmental education practice, method, or technique which addresses a skill or scientific field identified as a priority in the report developed pursuant to section 9(e) of this Act;

(4) an environmental education practice, method or technique which addresses an environmental issue which, in the judgment of the Administrator, is of a high priority; and

(5) an evaluation of the content and effectiveness of environmental education and training programs and materials.

(d) The program established by this subsection shall include solicitations for projects, selection of suitable projects from among those proposed, supervision of such projects, evaluation of the results of projects, and dissemination of information on the effectiveness and feasibility of the practices, methods, techniques and processes. The Administrator shall publish regulations to assure satisfactory implementation of each element of the program authorized by this subsection.

(e) Within one hundred and eighty days after the date of enactment of this Act, and no less often than every twelve months thereafter, the Administrator shall publish a solicitation for environmental education grants. The solicitation notice shall prescribe the information to be included in the proposal and other information sufficient to permit the Administrator to assess the project.

(f) Any local education agency, college or university, State education agency or environmental agency, or not-for-profit organization may submit an application to the Administrator in response to the solicitations required by subsection (e) of this section.

(g) Each project under this section shall be performed by the applicant, or by a person satisfactory to the applicant, under the supervision of the Administrator.

(h) Federal funds for any demonstration project under this section shall not exceed 75 per centum of the total cost of such project. For the purposes of this section, the non-Federal share of project costs may be provided by inkind contributions and other noncash support. In cases where the Administrator determines that a proposed project merits support and cannot be undertaken without a higher rate of Federal support, the Administrator may approve grants under this section with a matching requirement other than that specified in this subsection, including full Federal funding.

(i) Grants under this section shall not exceed $100,000. In addition, 25 per centum of all funds obligated under this section in a fiscal year shall be for grants of not more than $5,000.

SEC. 7. ENVIRONMENTAL INTERNSHIPS.

(a) The Administrator shall, in consultation with the Office of Personnel Management and other appropriate Federal agencies, provide for internships by post-secondary level students with agencies of the Federal Government.

(b) The purpose of internships pursuant to this section shall be to provide college level students with an opportunity to work

with professional staff of Federal agencies involved in environmental issues and thereby gain an understanding and appreciation of the skills and abilities appropriate to such professions.

(c) The Administrator shall, to the extent practicable, support not less than one hundred and fifty internships each year.

(d) The internship program shall be managed by the Office of Environmental Education. Interns may serve in appropriate agencies of the Federal Government including, but not limited to, the Environmental Protection Agency, the Fish and Wildlife Service, and the National Oceanic and Atmospheric Administration, Council on Environmental Quality, Soil Conservation Service, United States Forest Service, National Park Service, and the Bureau of Land Management.

(e) Interns shall be hired on a temporary, full-time basis for not to exceed six months and shall be compensated at a rate of not less than GS-4 and not more than GS-7. Federal agencies hiring interns shall provide the funds necessary to support salaries and related costs.

(f) Individuals eligible for participation in the internship program are students enrolled at accredited colleges or universities who have successfully completed not less than four courses or the equivalent in environmental sciences or studies, as determined by the Administrator.

(g) Students shall be selected for internships based on applications which shall be in such form as the Administrator considers appropriate.

(h) In selecting individuals for internships, the Administrator shall provide for wide geographic representation and representation of a range of professions related to the environment.

SEC. 8. ENVIRONMENTAL EDUCATION AWARDS.

(a) The Administrator shall provide for a series of national awards recognizing outstanding contributions to environmental education.

(b) National environmental awards shall include—

(A) The "Theodore Roosevelt Award" to be given in recognition of an outstanding career in environmental education, teaching, or administration;

(B) The "Henry David Thoreau Award" to be given in recognition of an outstanding contribution to literature on the natural environment and environmental pollution problems; and

(C) The "Rachael Carson Award" to be given in recognition of an outstanding contribution in print or film media to public education and information on environmental issues or problems.

(c) Recipients of education awards provided for in subsection (b) shall be nominated by the Environmental Education Advisory Council provided for in section 9 of this Act.

(d) The Regional Administrator of each of the ten regional offices of the Environmental Protection Agency shall present an "Outstanding Environmental Educator Award" on an annual basis to a teacher or faculty member from a local education agency, college or university, or not-for-profit organization in that region in recognition of a specific, outstanding contribution to environmental education during the past year.

SEC. 9. ENVIRONMENTAL EDUCATION ADVISORY COUNCIL.

(a) There is hereby established a National Environmental Education Advisory Council.

(b) The Council shall advise, consult with, and make recommendations to, the Administrator on matters relating to activities, functions, and policies of the Agency under this Act. The Office of Environmental Education shall provide staff support to the Council.

(c) The Council shall consist of fifteen members appointed by the Administrator after consultation with the Secretary. Three members shall be appointed to represent primary and secondary education (one of whom shall be a classroom teacher); three members shall be appointed to represent colleges and universities; three members shall be appointed to represent not-for-profit organizations involved in environmental education, three members shall be appointed to represent State departments of education and natural resources and three representatives shall be appointed to represent business and industry. A representative of the Secretary, Department of Education, shall serve as an ex-officio member of the Council. The Office of Environmental Education shall provide staff support to the Council.

(d) The Administrator shall provide that members of the Council represent the various geographic regions of the country and that the professional backgrounds of the members include scientific, policy, and other appropriate disciplines.

(e) Each member of the Council shall hold office for a term of three years, except that—

(1) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

(2) the terms of the members first taking office shall expire as follows: five shall expire three years after the date of enactment of this title, five shall expire two years after such date, and five shall expire one year after such date, as designated by the Administrator at the time of appointment.

(f) The Council shall, after providing for public review and comment, submit to the Congress, within twenty-four months of enactment and biennially thereafter, a report which shall—

(1) describe and assess the extent and quality of environmental education in the Nation's schools, colleges, and universities;

(2) provide a general description of the activities conducted pursuant to this Act and related authorities over the previous two-year period;

(3) summarize major obstacles to improving environmental education and make recommendations for addressing such obstacles; and

(4) identify personnel skills, education, and training needed to respond to current and anticipated environmental problems and make recommendations for actions to assure sufficient educational and training opportunities in these professions.

(g) Members of the Council appointed under this section shall, while attending meetings or conferences of the Council or otherwise engaged in business of the Council, receive compensation and allowances at a rate to be fixed by the Administrator, but not exceeding the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Council. While away from their homes or regular places of business in the performance of services for the Council, members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5 of the United States Code.

(h) Section 14(a) of the Federal Advisory Committee Act relating to termination, shall not apply to the Council.

SEC. 10. ENVIRONMENTAL EDUCATION TRUST FUND.

(a) There is established in the Treasury of the United States a trust fund to be known as the "Environmental Education Trust Fund", consisting of such amounts as may be transferred to such Trust Fund as provided in this section.

(b)(1) Amounts in the Environmental Education Trust Fund shall be available, as provided in appropriation Acts, to the Administrator for the purposes of making expenditures to carry out this Act, but not in excess of $15,000,000 for each fiscal year.

(2) Of such sums appropriated in a fiscal year, not more than 40 per centum shall be available for the activities of the Office of Environmental Education, not more than 30 per centum shall be available for the operation of the Environmental Education and training program, and not more than 30 per centum shall be available for environmental education grants.

(c) There are hereby authorized to be appropriated to the Environmental Education Trust Fund, 50 per centum of any penalty paid in response to Federal enforcement action pursuant to the Clean Water Act, the Clean Air Act, the Solid Waste Disposal Act, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, and the Safe Drinking Water Act unless any such penalty is required to be used for another purpose pursuant to Federal law.

NATIONAL ENVIRONMENTAL EDUCATION ACT

Section 1: Short Title.—This act may be cited as the "National Environmental Education Act."

Section 2: Findings.—Environmental problems are increasingly complex and interrelated. Responding to environmental problems over the long term require improved public understanding of the natural environment and man's impact on it.

Section 3: Definitions.—Key terms are defined.

Section 4: Office of Environmental Education.—Establishes within the Environmental Protection Agency an Office of Environmental Education. The Office is to develop and support programs to improve understanding of the natural environment, develop curricula and related materials, and manage grant assistance and intern programs.

Section 5: National Environmental Education Program.—Establishes a national program to develop environmental education materials and curricula and to train educational professionals in the development and delivery of environmental education programs and studies. The program is to be operated by a university or other organization, or a consortium of such organizations, and would be funded with an annual grant from the ERA.

Section 6: Environmental Education Grants.—ERA is to make grants to local education agencies, colleges and universities for the development of environmental education programs. Grants are to provide 75

percent of project costs. Grants are not to exceed $100,000 and 25 percent of grants are to be for $5,000 or less.

Section 7: Environmental Internships.—The EPA and the Office of Personnel Management are to provide for not less than 150 college level internships in Federal agencies involved in environmental issues.

Section 8: Environmental Education Awards.—The EPA is to provide national and regional awards for excellence in environmental education. At the national level, awards include the "Theodore Roosevelt Award" in recognition of an outstanding career in environmental education, the "Henry David Thoreau Award" in recognition of an outstanding contribution to literature on the natural environment, and the "Rachel Carson Award" in recognition of an outstanding contribution in print or film media to education on environmental issues.

Section 9: Environmental Education Advisory Council.—A national council is established to advise the Administrator on the implementation of this Act.

Section 10: Authorizations.—A total of $15 million per year is authorized to implement the Act. A trust fund is established to support programs of the Act and is funded with 50 percent of the penalties paid by violators of environmental laws.

Mr. MITCHELL. Mr. President, I am pleased to join Senators BURDICK, CHAFEE and others in introducing legislation to support education and training concerning environmental issues and problems.

I want to commend Senator BURDICK for developing this important legislation. As a member of the Environment and Public Works Committee, I have had the pleasure of working with Chairman BURDICK and with the ranking minority member, Senator CHAFFE, to develop and expand legislation to protect the quality of our environment.

In the past several years, the Environment Committee has developed major amendments to the hazardous waste statute, the Superfund law, and the Clean Water Act. In this Congress, the committee is addressing problems ranging from air pollution to oil spills to ground water pollution.

In addition, there is a growing recognition that the United States has no obligation to work with other nations to address environmental issues on a global scale. These issues include global warming and sea level rise, loss of species diversity, marine pollution, and international transportation of hazardous wastes.

Addressing these complex domestic and international environmental issues will require that we continue to build on our foundation of environmental laws. It will also require public awareness of these environmental laws. It will also require public awareness of these environmental issues and public understanding of the need to protect the quality of our environment.

The National Environmental Education Act provides for a limited Federal investment in expanding understanding and awareness of environmental conditions and problems.

As Senator BURDICK noted, this legislation reestablishes a commitment to environmental education which the Congress made in 1970. The first Environmental Education Act was repealed as part of the budget reconciliation legislation in 1981.

I want to make several general comments about the legislation.

First, the bill proposes to direct the Federal Government to support and encourage environmental education programs. We have provided, however, that this effort will be closely coordinated with the existing efforts of States, local governments, and nonprofit organizations now involved in environmental education activities.

Second, the bill directs the Environmental Protection Agency to take the lead role in developing and implementing programs and projects related to environmental education. While the EPA is to take charge of this initiative, it is essential that the EPA work with other Federal agencies and involve these agencies in all aspects of this effort.

Finally, I am especially pleased that the bill will help young people develop careers in environmental protection. If we are to develop workable remedies to the complex environmental problems we face, we need to involve our brightest and most talented young people. As a step in this direction, the bill provides for up to 150 internships for college students at Federal agencies involved in environmental protection.

Again, I want to commend Senator BURDICK for his initiative in developing this important legislation, and I urge my colleagues to join me in supporting it.

Mr. CHAFEE. Mr. President, it is my pleasure to join the distinguished chairman of the Committee on Environment and Public Works and our majority leader in introducing The National Environmental Education Act today.

As members of the Environment Committee, we understand the national and global threat posed by such serious problems as the greenhouse effect and acid rain, and are working to find solutions. Yet our committee alone cannot find all the answers or hope to implement possible solutions without the support and active involvement of people throughout the country.

The best way to get people involved is to show them how their lives are affected directly by the environmental problems plaguing our Nation. Education is the key. Many of the problems we face today are complex and interrelated, and they cannot be adequately explained in a newspaper article or a 2 minute segment on the evening news. By expanding and improving the level of environmental education in our country, we will increase public understanding of environmental problems and help build support for measures to address them. Students all across the academic spectrum—from the early grades through postgraduate studies—would benefit from the environmental education provided by this act.

What we are proposing today is not new. The original National Environmental Education Act was approved by Congress in 1970 in response to national concerns raised about air and water pollution. Although the former Department of Health, Education, and Welfare was authorized to implement this program, not much was accomplished. This program languished, perhaps due to the sporadic nature of funding, and was repealed in 1981 as part of the Omnibus Budget Reconciliation Act.

Our proposal establishes an Office of Environmental Education within the Environmental Protection Agency and authorizes $15 million per year in funds to be awarded on a competitive basis. This should put the program on its feet and give it the visibility and vitality it lacked in the 1970's. It is fitting to note that the funds for this measure will come from the penalties paid by violators of environmental laws.

The funding will be used for the development of environmental education curricula and the training of teachers and other professionals in the presentation of these courses in classrooms and other settings. In addition, up to 150 college level internships in Federal agencies involved in environmental issues will be made available each year to students. And to recognize excellence in environmental education, our bill creates three awards in honor of these great advocates of the environment: Theodore Roosevelt, Henry David Thoreau, and Rachel Carson.

Mr. President, I represent a State whose citizens are very protective and concerned about the quality of their environment. They do not want our waters full of plastic pollution, nor our coastline fouled with medical waste. They have supported measures to preserve open space and sought funds to clean up Narragansett Bay.

This is the public awareness and support for environmental issues I hope the bill we are introducing today will help foster in every State throughout the country. I hope my colleagues will join Senators BURDICK, MITCHELL, and myself in giving their full support for this legislation.

By Mr. FORD (for himself and Mr. MCCAIN):

S. 1077. A bill to authorize the President to appoint Adm. James B. Busey to the Office of Administrator of the Federal Aviation Administration; to

the Committee on Commerce, Science, and Transportation.

AUTHORIZING THE APPOINTMENT OF THE ADMINISTRATOR OF THE FEDERAL AVIATION ADMNINISTRATION

● Mr. FORD. Mr. President, I am introducing legislation today to ensure the continuation of leadership in aviation safety.

President Bush has nominated retired Adm. James B. Busey for the position of Administrator of the Federal Aviation Administration. Under current law, the Administrator must be a civilian, in order to ensure an adequate separation between civil and military aviation. As a retired admiral in the U.S. Navy, Admiral Busey retains his rank and commission and, as such, could not be eligible for appointment to this position.

This legislation would permit an exception for Mr. Busey that would allow him to serve as FAA Administrator, while not affecting his status or rank as an officer on the retired list of the U.S. Navy. The bill applies the provisions of the Dual Compensation Act, which ensures that Admiral Busey's military retirement pay will be reduced according to formula while he serves as Administrator.

Mr. President, there is some precedent for legislation of this type. Most recently, Congress enacted a similar bill in 1984 to allow retired Navy Vice Adm. Donald D. Engen to serve as FAA Administrator. Similar legislative waivers were enacted in 1965 for retired Air Force Gen., William F. McKee, and in 1959 for the first FAA Administrator, retired Lt. Gen. Elwood R. Quesada.

The fact that Admiral Busey would retain his retired military rank while serving as Administrator should not be viewed as a change in policy. I continue to believe that the Administrator should be a civilian, which is reflected in section 3 of this legislation. Further, the bill is designed to ensure that during his time as Administrator, he will not be subject to any supervision, control, restriction, or prohibition other than would apply to any FAA Administrator.

Mr. President, we have waited far too long for this nomination. The FAA and the safety or the traveling public are too important to be without leadership any longer. I urge my colleagues to act quickly and favorably on this legislation, and ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1077

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of section 106 of title 49, United States Code, or any other provision of law, the President, acting by and with the advice and consent of the Senate, is authorized to appoint Admiral James B. Busey to the Office of Administrator of the Federal Aviation Administration. Admiral Busey's appointment to, acceptance of, and service in that Office shall in no way affect the status, rank, and grade which he shall hold as an officer on the retired list of the United States Navy, or any emolument, perquisite, right, privilege, or benefit incident to or arising out of any such status, office, rank, or grade, except to the extent that subchapter IV of chapter 55 of title 5, United States Code, affects the amount of retired pay to which he is entitled by law during his service as Administrator. So long as he serves as Administrator, Admiral Busey shall receive the compensation of that Office at the rate which would be applicable if he were not an officer on the retired list of the United States Navy, shall retain the status, rank, and grade which he now holds as an officer on the retired list of the United States Navy, shall retain all emoluments, perquisites, rights, privileges, and benefits incident to our arising out of such status, office, rank, or grade, and shall in addition continue to receive the retired pay to which he is entitled by law, subject to the provisions of subchapter IV of chapter 55 of title 5, United States Code.

SEC. 2. In the performance of his duties as Administrator of the Federal Aviation Administration, Admiral Busey shall be subject to no supervision, control, restriction, or prohibition (military or otherwise) other than would be operative with respect to him if he were not an officer on the retired list of the United States Navy.

SEC. 3. Nothing in this Act shall be construed as approval by the Congress of any future appointments of military persons to the Office of Administrator of the Federal Aviation Administration.●

By Mr. ROCKEFELLER (for himself, Mr. HARKIN, Mr. DASCHLE, Mr. BAUCUS, Mr. RIEGLE, and Mr. INOUYE):

S. 1078. A bill to amend the Social Security Act to provide for improved delivery of health services to individuals residing in rural areas by making certain modifications with respect to health clinic services provided under such act, and for other purposes; to the Committee on Finance.

RURAL HEALTH CLINIC IMPROVEMENT ACT OF 1989

● Mr. ROCKEFELLER. Mr. President, I rise today to introduce the Rural Health Clinic Improvement Act of 1989, which would improve on the innovative Rural Health Clinic Services Act of 1977. I am very pleased to be joined by Senators HARKIN, DASCHLE, BAUCUS, RIEGLE, and INOUYE in introducing this bill. They are all true rural health advocates and I am honored that they have joined me.

Congress enacted the Rural Health Clinic Act to increase the availability and accessibility of primary care services in rural communities—specifically in rural health manpower shortage areas. That legislation, for the first time, recognized the huge contribution of nurse practitioners and physician assistants in providing essential primary care services in traditionally underseved parts of the country. Under the Rural Health Clinic Act, the Medicare and Medicaid Programs were authorized to reimburse primary care services provided by midlevel healthcare professionals.

When the Rural Health Clinic Act was first introduced in 1977, it was predicted that there would be almost 2,000 rural health clinics nationwide by 1990. Unfortunately, the act has not fulfilled Congress' expectations. Today, there are only about 450 rural health clinics nationwide with huge variations between rural States.

For instance, there are no rural health clinics in Montana, North Dakota, or Arkansas even though 47 percent, 51 percent, and 48 percent, of each State's population, respectively, resides in a rural area. Alabama has four rural health clinics, Wiconsin has three, and Kentucky has eight. On the other hand, my own State of West Virginia has 32 designated rural health clinics, North Carolina has 40, and South Dakota has 21.

Low reimbursement rate was frequently cited as a major reason for low participation. Congress addressed this issue in 1987 by increasing the maximum reimbursement rate for rural health clinics from $32.10 per visit to $46, and by indexing future increases to the Medicare economic index.

Mr. President, rural health clinics play an important role in providing access to critically important primary care services. There is a great potential for more rural health clinics in other States.

There is a striking lack of awareness of the rural health clinic program in certain parts of the country on the part of providers, communities, States, and associations. It's been 10 years since the Health Care Financing Administration, which administers the program, last published information on the rural health clinic program. A 1982 GAO report, entitled "The Rural Health Clinic Services Act Has Not Met Expectations," characterized HCFA's management of the act has ridden with delays. There is no excuse for the failure of HCFA to have gotten the word out about the program.

My bill would require the newly established Office of Rural Health Policy within the Department of Health and Human Services to actively promote and publicize the rural health clinic program.

In addition to the lack of information available about the program, the same GAO study reported that clinic administrators found HCFA administrative requirements complex, time consuming, and costly. This was most recently reaffirmed by a survey conducted by the National Rural Health Association. Almost 40 percent of the rural health administrators surveyed

reported problems with intermediary processing.

Mr. President, when the Rural Health Clinic Act was first enacted, Congress stressed the importance of simplicity in the certification and reimbursement processes. Some rural health clinics have hired certified public accountants to do the necessary paperwork. Many potential providers are discouraged to even apply because of the excessively burdensome paperwork requirements.

My bill contains several provisions to carry out the intent of Congress to create a program responsive to the rural setting. First, the Office of Rural Health Policy would be required to provide technical assistance to rural health care providers interested in seeking rural health clinic certification. Second, this legislation contains provisions to make it easier for rural community health centers to become rural health clinics, and it would also allow the Governor of each State, subject to the Secretary's approval, to designate an area as medically underserved.

Mr. President, the difficulties faced by rural communities in their efforts to recruit and retain health care professionals have been well documented. My bill would give rural health clinics needed flexibility to respond to the current shortage of midlevel health care professionals. When a clinic loses a nurse practitioner or physician assistant, it can lose its certification status within 90 days. My bill would give a clinic leeway time to recruit a replacement.

The rural health clinic program provides excellent and essential healthcare services in many parts of the country. In my own State of West Virginia, we have over 30 rural health clinics. Accordingly to a GAO survey, 95 percent of patients were satisfied with the quality of care they received at a rural health clinic. Another study found that rural health clinic users have significantly fewer hospital admissions and lower hospitals expenditures than nonclinic users.

Mr. President, this bill builds on innovative and creative legislation created in the 1970's. I hope with the changes incorporated in this bill, we can finally exceed original congressional expectations on the growth of the rural health clinic program.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1078

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Health Clinic Improvement Act of 1989".

SEC. 2. INFORMATION ON RURAL HEALTH CLINIC SERVICES REQUIRED TO BE PROVIDED BY OFFICE OF RURAL HEALTH POLICY.

(a) IN GENERAL.—Section 711(a) of the Social Security Act (42 U.S.C. 912(a)) is amended—

(1) in paragraph (3) by striking "and";

(2) in paragraph (4) by striking the period and inserting in lieu thereof ", and "; and

(3) by adding at the end thereof the following new paragraph:

"(5)(A) with respect to rural health clinics and rural health clinic services (as described in section 1861(aa))—

"(A) provide technical assistance to entities seeking certification as rural health clinics, and

"(B) provide (and as necessary update to provide an accurate list of services) a brochure describing the services provided at rural health clinics and distribute such brochures in such areas as the Secretary deems appropriate.".

(b) EFFECTIVE DATE.—The amendments made by this section shall become effective upon the date of enactment of this Act.

SEC. 3. INCLUSION OF CERTIFIED NURSE-MIDWIFE SERVICES AS COVERED SERVICES IN RURAL HEALTH CLINICS.

(a) IN GENERAL.—Section 1861(aa) of the Social Security Act (42 U.S.C. 1395x(aa)) is amended—

(1) in paragraph (1)(B) by striking "or by a clinical psychologist (as defined by the Secretary)," and inserting in lieu thereof "or a clinical psychologist (as defined by the Secretary), or by a certified nurse-midwife (as defined in section 1861(gg)),";

(2) in paragraph (2)(B) by striking "physician assistants and nurse practitioners," each place it appears and inserting in lieu thereof "physician assistants, nurse practitioners, and certified nurse-midwives,";

(3) in paragraph (2)(E) by striking "or nurse practitioners," and inserting in lieu thereof ", nurse practitioners or certified nurse-midwives,";

(4) in paragraph (2)(F) by striking "or nurse practitioner" and inserting in lieu thereof "nurse practitioner or certified nurse-midwife";

(5) in paragraph (2)(J) by striking the period and inserting in lieu thereof "; or";

(6) by adding after pararaph (2)(J) the following new subparagraph:

"(K) is determined by the Secretary, based on the recommendation of the Health Resources Service Administration within the public health service to meet the requirements for funding as a health center under sections 329 or 330 or 340 of the Public Health Service Act.";

(7) in the matter following paragraph (2) by striking clause (iii) and inserting in lieu thereof the following new clause:

"(iii) employs a physician assistant, nurse practitioner, or certified nurse-midwife to furnish patient care services at least 50 percent of the time the clinic operates (unless the Secretary waives such requirement as provided in paragraph (4)),";

(8) in paragraph (3)—

(A) by striking "and the term 'nurse practitioner' " and inserting in lieu thereof ", the term 'nurse practitioner' and the term 'certified nurse-midwife' "; and

(B) by striking "or nurse practitioner" and inserting in lieu thereof ", nurse practitioner or certified nurse-midwife"; and

(9) by adding at the end thereof the following new paragraph:

"(4)(A) The Secretary shall waive for a 1-year period the requirements that a rural health clinic employ a physician assistant, nurse practitioner or certified nurse midwife or that such clinic require such providers to furnish services at least 50 percent of the time that the clinic operates as described in clause (iii) of paragraph (2) to any rural health clinic that requests such waiver if such requesting clinic demonstrates that the clinic has been unable, despite reasonable efforts, to hire a physician assistant, nurse practitioner, or certified nurse-midwife in the previous 90-day period.

"(B) The Secretary shall annually review each 1 year waiver granted under this paragraph and shall grant another 1 year waiver where a clinic is able again to meet the requirements for a waiver described in subparagraph (A).

"(C) A waiver which is requested under this paragraph shall be deemed granted unless such request is denied by the Secretary within 60 days after the date such request is received.".

(b) EFFECTIVE DATE.—The amendments made by this section shall become effective with respect to services furnished on or after January 1, 1990.

SEC. 4. AREAS IN WHICH A RURAL HEALTH CLINIC MAY OPERATE EXPANDED.

(a) IN GENERAL.—Section 1861(aa) of the Social Security Act (42 U.S.C. 1395x(aa)), as amended by this Act, is further amended in the matter following paragraph (2)—

(1) by striking "or" at the end of subclause (I) and inserting in lieu thereof a comma;

(2) by inserting at the end of clause (i) the following new subclause:

"or (III) as an area with a medically underserved population designated under section 330 of the Public Health Service Act,";

(3) by striking "and" at the end of clause (iii); and

(4) by striking the period at the end of clause (iv) and inserting in lieu thereof the following:

", (v) is located in an area designated by the Governor of the State and approved by the Secretary as an area with a shortage of personal health services.".

(b) EFFECTIVE DATE.—The amendments made by this section shall become effective with respect to services furnished on or after January 1, 1990.

SEC. 5. MODIFICATION OF REIMBURSEMENT METHOD WITH RESPECT TO RURAL HEALTH CLINICS FOR SERVICES PROVIDED UNDER MEDICAID.

(a) IN GENERAL.—Section 1902(a)(13) of the Social Security Act (42 U.S.C. 1396a(13)) is amended by striking subparagraph (E) and inserting in lieu thereof the following new subparagraph:

"(E) for payment for services described in section 1905(a)(2)(B) provided by a rural health clinic under the plan of 100 percent of costs which are reasonable and related to the cost of furnishing such services as determined by the fiscal intermediary determining such costs under title XVIII pursuant to such standards as the Secretary may prescribe,".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a) applies (except as provided under paragraph (2)) to payments under title XIX of the Social Security Act for calendar quarters beginning on or after January 1, 1990, without regard to whether or not final regulations to carry out such amendment have been promulgated by such date.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires

State legislation (other than legislation appropriating funds) in order for the plan to meet the additional requirement imposed by the amendment made by subsection (a), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet this additional requirement before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

SEC. 6. AUTOMATIC CERTIFICATION FOR CERTAIN CENTERS WHICH MEET THE STANDARDS FOR CERTIFICATION AS A RURAL HEALTH CLINIC.

(a) IN GENERAL.—Section 1910(a)(1) of the Social Security Act (42 U.S.C. 1396i(a)(2)) is amended by striking "qualified" and all that follows through the comma and inserting in lieu thereof the following: "qualified (i) as a rural health clinic under title XVIII or (ii) as a clinic under sections 329, 330 or 340 of the Public Health Service Act,".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall become effective with respect to certification made by the Secretary on or after January 1, 1990.●

By Mr. DECONCINI and Mr. McCain:

S. 1080. A bill to designate certain lands as wilderness in the State of Arizona; to the Committee on Energy and Natural Resources.

ARIZONA WILDERNESS ACT OF 1989

Mr. DECONCINI. Mr. President, today I join my colleague from Arizona, Senator MCCAIN, in introducing the Arizona Wilderness Act of 1989. We believe that we have crafted a piece of legislation that both represents our feelings on wilderness in Arizona and provides a balanced framework for a thorough and candid analysis of this issue by our colleagues and constituents.

The timing of our introduction warrants mentioning. The distinguished chairman of the House Interior Committee, Chairman UDALL, has scheduled Arizona field hearings on this issue on June 9 and 10. I commend the chairman for his leadership in this issue as demonstrated by his efforts to give those most affected by our actions sufficient opportunity to comment on not only our legislation but any bills that may be introduced prior to that time. By introducing the bill today, we are giving the participants in those hearings ample opportunity to review and prepare their comments on this legislation.

The Arizona delegation intends to follow up these hearings with a number of small, informal discussions with those individuals most concerned about this legislation as schedules permit. I am looking forward to participating in both of these forums to solicit the thoughts of my constituents.

The legislation we are introducing today designates as wilderness 895,150 acres of Bureau of Land Management and Fish and Wildlife Service lands and includes them in the National Wilderness Preservation System. With respect to the BLM areas, the legislation, for the most part, adopts the BLM recommendations to Congress on suitable acreage for wilderness designation. The one thing that has become clear in our discussions on this issue is that the BLM in Arizona has done an outstanding job on their wilderness reviews and their recommendations reflect the concept of what wilderness should be—portions of the Earth largely unaffected by the influences of man. In a few instances, we have deviated from their recommendations by either (a) designating areas as wilderness that they had not recommended as suitable or (b) releasing to multiple use management areas that they had recommended as suitable for wilderness designation. In each case, we had compelling reasons to do so and in the summary of the bill that I will include for the RECORD, those reasons are outlined.

I would, however, like to touch briefly on the areas we have included in the bill that were not in the BLM recommendations—the North Maricopa Mountains Wilderness Study Area and the Hell's Canyon Wilderness Study Area. Both of these areas present unique opportunities to preserve what appears to me to possess outstanding wilderness qualities in the face of growing urban development. The BLM did not recommend the North Maricopa Mountain WSA because they felt that wilderness designation could have impacted the development of the superconducting super collider, which was proposed to be developed within this area. However, in view of the Department of Energy's recent decision to locate the SSC in Texas, the designation of this area will provide outstanding wilderness recreational opportunities relatively close to the State's two significant urban areas—Phoenix and Tucson.

The other WSA that BLM did not recommend that is included in this bill is the Hell's Canyon WSA northwest of Phoenix. The proposed recreational development at Lake Pleasant will result in significant growth in that area. Designation of this WSA will provide outstanding primitive recreational opportunities to counterbalance the developed recreational activities associated with nearby Lake Pleasant.

An important thing to keep in mind is that this legislation is as much a nonwilderness bill as it is a wilderness bill. Currently almost 2 million areas of BLM land are held in wilderness study status. In accordance with the Federal Land Policy Management Act of 1976, these areas are to be managed as wilderness until Congress acts to release them from this status. There is language in this bill to do just that for approximately 1.25 million acres.

The legislation also addresses the issue of Federal reserve water rights. The BLM, in their wilderness reviews has identified the wilderness study areas that have perennial streams flowing through them and therefore add to the wilderness characteristics of the area. Many of the areas designated by this act typify the extreme of Arizona's desert environment. It is the lack of water that in the opinion of some adds to the wilderness characteristics of many of these areas. The language we have included in the bill states that Congress reserves a quantity of water to fulfill the purposes of the specific wilderness areas and requires the Secretary to file a claim in the appropriate stream adjudication to quantify the amount of water for this reservation. This language is virtually identical to the language included in the legislation creating the San Pedro Riparian Conservation Area enacted last year. Because of the sophistication of Arizona water law, we feel that this tried and true method will once again be sufficient to address this most important issue to those of us in the West.

An issue that this Senator feels that we need to address better is the issue of wildlife management within these wilderness areas. In many of these areas, it is precisely the lack of water that necessitates aggressive wildlife management practices and I feel that Congress needs to further clarify and define the appropriate role of wildlife managers and Federal agencies in the management of wildlife within the wilderness areas designated by this legislation. As we proceed with this bill, I intend to work with committees of jurisdiction and the Arizona Game and Fish Commission to resolve this issue of great importance to many Arizonans.

With respect to the lands administered by the Fish and Wildlife Service that are designated wilderness by this act, we feel that the qualities of the Imperial National Wildlife and the Havasu National Wildlife Refuge are deserving of the protection afforded by the wilderness designation.

However, we chose to not designate the other two—the Cabeza Prieta National Wildlife Refuge and the Kofa National Wildlife Refuge—recommended by the Fish and Wildlife Service because of the status they already enjoy. In the Arizona-Idaho Conservation Act of 1988, the Kofa was withdrawn from all forms of—

(a) entry, appropriation or disposal under the public land laws; (b) location, entry, and patent under United States mining laws; and (c) disposition under all laws pertaining to mineral and geothermal leasing.

The aforementioned withdrawal gives the Kofa de facto wilderness status while allowing the land manager the flexibility to manage the refuge for the purposes for which is was established—to enhance wildlife.

The same holds true for the Cabeza Prieta National Wildlife Refuge. The Military Lands Withdrawal Act of 1986 gave the Cabeza Prieta National Wildlife Refuge essentially de facto wilderness status by withdrawing it from all forms of disposition under public land laws—including the mining laws and the mineral leasing and the geothermal leasing laws. As a result of this withdrawal, the land manager is given the flexibility to manage the refuge for the purpose for which it was established—to enhance wildlife.

I'm looking forward to working with my colleague, Senator MCCAIN, and the other members of the Arizona delegation as we move forward with this legislation on this issue of significant importance to the State of Arizona.

I ask for unanimous consent that a copy of the bill summary also appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1080

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Arizona Wilderness Act of 1989".

TITLE I—DESIGNATION OF WILDERNESS AREAS TO BE ADMINISTERED BY THE BUREAU OF LAND MANAGEMENT

SEC. 101. DESIGNATION OF WILDERNESS AREAS.

(a) IN GENERAL.—In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), the following lands are designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) certain lands in Mohave County, Arizona, which comprise approximately 24,831 acres, as generally depicted on a map entitled "02-001 Mount Wilson" dated ——— and which shall be known as the "Mount Wilson Wilderness";

(2) certain lands in Mohave County, Arizona, which comprise approximately 28,170 acres, as generally depicted on a map entitled "02-012/042 Mount Tipton" dated ——— and which shall be known as the "Mount Tipton Wilderness";

(3) certain lands in Mohave County, Arizona, which comprise approximately 27,210 acres, as generally depicted on a map entitled "02-024 Mount Nutt" dated ——— and which shall be known as the "Mount Nutt Wilderness";

(4) certain lands in Mohave County, Arizona, which comprise approximately 90,600 acres, as generally depicted on a map entitled "02-028/029 Warm Springs" dated ——— and which shall be known as the "Warm Springs Wilderness";

(5) certain lands in Mohave County, Arizona, which comprise approximately 16,550 acres, as generally depicted on a map entitled "02-054 Aubrey Peak" dated ——— and which shall be known as the "Aubrey Peak Wilderness";

(6) certain lands in La Paz County, Arizona, which comprise approximately 13,735 acres, as generally depicted on a map entitled "05-017 East Cactus Plain" dated ——— and which shall be known as the "East Cactus Plain Wilderness";

(7) certain lands in Mohave and Yavapai Counties, Arizona, which comprise approximately 40,025 acres, as generally depicted on a map entitled "02-058 Rawhide Mountains" dated ——— and which shall be known as the "Rawhide Mountains Wilderness";

(8) certain lands in Mohave, Yavapai, and La Paz Counties, Arizona, which comprise approximately 109,523 acres, as generally depicted on a map entitled "02-059/068 Arrastra Mountains" dated ——— and which shall be known as the "Arrastra Mountain Wilderness";

(9) certain lands in Mohave and Yavapai Counties, Arizona, which comprise approximately 21,660 acres, as generally depicted on a map entitled "02-060 Lower Burro Creek" dated ——— and which shall be known as the "Lower Burro Creek Wilderness";

(10) certain lands in La Paz County, Arizona, which comprise approximately 25,287 acres, as generally depicted on a map entitled "02-075 Harcuvar Mountains" dated ——— and which shall be known as the "Harcuvar Mountains Wilderness";

(11) certain lands in La Paz and Maricopa Counties, Arizona, which comprise approximately 22,865 acres, as generally depicted on a map entitled "02-095 Harquahala Mountains" dated ——— and which shall be known as the "Harquahala Mountains Wilderness";

(12) certain lands in Maricopa County, Arizona, which comprise approximately 21,150 acres, as generally depicted on a map entitled "02-099 Big Horn Mountains" dated ——— and which shall be known as the "Big Horn Mountains Wilderness";

(13) certain lands in La Paz, Yuma, and Maricopa Counties, Arizona, which comprise approximately 78,020 acres, as generally depicted on a map entitled "02-128 Eagletail Mountains" dated ——— and which shall be known as the "Eagletail Mountains Wilderness";

(14) certain lands in Maricopa County, Arizona, which comprise approximately 15,250 acres, as generally depicted on a map entitled "02-138 Signal Mountains" dated ——— and which shall be known as the "Signal Mountains Wilderness";

(15) certain lands in Maricopa County, Arizona, which comprise aproximately 61,000 acres, as generally depicted on a map entitled "02-142/144 Woolsey Peak" dated ——— and which shall be known as the "Woolsey Peak Wilderness";

(16) certain lands in Maricopa County, Arizona, which comprise approximately 14,830 acres, as generally depicted on a map entitled "02-160 Sierra Estrella" dated ——— and which shall be known as the "Sierra Estrella Wilderness";

(17) certain lands in Maricopa and Pinal Counties, Arizona, which comprise approximately 34,400 acres, as generally depicted on a map entitled "02-172 Table Top Mountains" dated ——— and which shall be known as the "Table Top Wilderness";

(18) certain lands in Pinal County, Arizona, which comprise approximately 5,080 acres, as generally depicted on a map entitled "02-202 Coyote Mountains" dated ——— and which shall be known as the "Coyote Mountains Wilderness";

(19) certain lands in Pinal County, Arizona, which comprise approximately 2,065 acres, as generally depicted on a map entitled "02-203 Baboquivari Peak" dated ——— and which shall be known as the "Baboquivari Peak Wilderness";

(20) certain lands in Gila County, Arizona, which comprise approximately 9,021 acres, as generally depicted on a map entitled "04-001 Needle's Eye" dated ——— and which shall be known as the "Needle's Eye Wilderness";

(21) certain lands in Graham County, Arizona, which comprise approximately 10,883 acres, as generally depicted on a map entitled "04-014 Fishhooks" dated ——— and which shall be known as the "Fishhooks Wilderness";

(22) certain lands in Cochise County, Arizona, which comprise approximately 11,998 acres, as generally depicted on a map entitled "Dos Cabezas Mountains" dated ——— and which shall be known as the "Dos Cabezas Mountains Wilderness";

(23) certain lands in Graham County, Arizona, which comprise approximately 640 acres, as generally depicted on a map entitled "04-081 Galiuro Addition 3" dated ——— and which shall be known as the "Galiuro Addition 3 Wilderness";

(24) certain lands in La Paz County, Arizona, which comprise approximately 18,807 acres, as generally depicted on a map entitled "05-012 Gibralter Mountains" dated ——— and which shall be known as the "Gibralter Mountains Wilderness";

(25) certain lands in La Paz County, Arizona, which comprise approximately 16,430 acres, as generally depicted on a map entitled "05-013 Planet Peak" dated ——— and which shall be known as the "Planet Peak Wilderness";

(26) certain lands in La Paz County, Arizona, which comprise approximately 15,755 acres, as generally depicted on a map entitled "05-015A Swansea" dated ——— and which shall be known as the "Swansea Wilderness";

(27) certain lands in La Paz County, Arizona, which comprise approximately 29,095 acres, as generally depicted on a map entitled "05-023B Trigo Mountains" dated ——— and which shall be known as the "Trigo Mountain Wilderness";

(28) certain lands in Yuma County, Arizona, which comprise approximately 8,855 acres, as generally depicted on a map entitled "05-053A Muggins Mountain" dated ——— and which shall be known as the "Muggins Mountain Wilderness";

(29) certain lands in Yavapai County, Arizona, which comprise approximately 9,379 acres, as generally depicted on a map entitled "02-119 Hells Canyon" dated ——— and which shall be known as the "Hells Canyon Wilderness";

(30) certain lands in Maricopa County, Arizona, which comprise approximately 61,116 acres, as generally depicted on a map entitled "02-57 North Maricopa Mountains" dated ——— and which shall be known as the "North Maricopa Mountains Wilderness"; and

(31) certain lands in Mohave County, Arizona, which comprise approximately 38,940 acres, as generally depicted on a map entitled "02-037/043 Wabayuma Peak" dated ——— and which shall be known as the "Wabayuma Peak Wilderness".

(b) WATER RIGHTS.—For the purposes of the reservations made in paragraphs (3), (7), (8), (9), (11), (20), (21), and (26) of subsection (a), Congress reserves quantities of water sufficient to fulfill the purposes of

the wilderness areas designated in those paragraphs, and the Secretary shall file claims for the quantification of such rights in appropriate stream adjudications.

SEC. 102. ADMINISTRATION.

(a) IN GENERAL.—Subject to valid existing rights, each wilderness area designated in section 101 shall be administered by the Secretary of the Interior (referred to as the "Secretary") through the Bureau of Land Management in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness.

(b) GRAZING.—Within the wilderness areas designated in section 101, grazing of livestock that was established prior to the date of enactment of this Act shall be administered in accordance with section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)) and section 108 of the Act entitled "An Act to designate certain National Forest System lands in the States of Colorado, South Dakota, Missouri, South Carolina, and Louisiana for inclusion in the National Wilderness Preservation System, and for other purposes" (16 U.S.C. 1133 note).

(c) WILDLIFE IMPROVEMENT PROJECTS.—Within the wilderness areas designated by this title, the establishment and maintenance of wildlife improvement projects may continue, consistent with approved wildlife habitat management loans and with the Wilderness Act.

(d) AIRCRAFT.—Within the wilderness areas designated by this title, the use of aircraft for the capture of wild horses and burros may continue, consistent with the Wild Horse and Burro Act and other applicable law.

SEC. 103. MAPS AND DESCRIPTIONS.

As soon as practicable after enactment of this Act, the Secretary shall file a map and a legal description of each wilderness area designated in section 101 with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives, and each such map and description shall have the same force and effects if included in this act, except that correction of clerical errors in each such map and description may be made by the Secretary subsequent to such filings. Each such map and description shall be on file and available for public inspection in the Office of the Director of the Bureau of Land Management, Department of the Interior.

SEC. 104. WILDERNESS REVIEW.

(a) LANDS ADEQUATELY REVIEWED.—The Congress finds and directs that—

(1) all lands in Arizona administered by the Bureau of Land Management that are not designated as wilderness by this Act or previous Acts of Congress, except those described in subsection (b), have been adequately studied for wilderness designation as required by section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782); and

(2) such lands shall no longer be subject to the requirement of section 603(c) of that Act pertaining to the management of Wilderness Study Areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(b) CONTINUING STUDY OF WHITE CANYON WILDERNESS.—The White Canyon Wilderness Study Area (identified as AZ-020-187) located in Pinal County, Arizona, shall remain subject to study for designation as wilderness.

TITLE II—DESIGNATION OF WILDERNESS AREAS TO BE ADMINISTERED BY THE FISH AND WILDLIFE SERVICE

SEC. 201. DESIGNATION OF WILDERNESS AREAS.

In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136) the following lands are designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) certain lands in the Havasu National Wildlife Refuge, Arizona, which comprise approximately 3,470 acres, as generally depicted on a map entitled "———" dated ——— and which shall be known as the "Havasu Wilderness"; and

(2) certain lands in Imperial National Wildlife Refuge, Arizona, which comprise approximately 8,340 acres, as generally depicted on a map entitled "———" dated ——— and which shall be known as the "Imperial Wilderness".

SEC. 202. ADMINISTRATION.

Subject to valid existing rights, each wilderness area designated in section 202 shall be administered by the Secretary through the Fish and Wildlife Service in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness.

SEC. 203. MAPS AND DESCRIPTIONS.

As soon as practicable after enactment of this Act, the Secretary shall file a map and a legal description of each wilderness area designated in section 201 with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Represenatives, and each such map and description shall have the same force and effect as if included in this Act, except that correction of clerical errors in each such map and description may be made by the Secretary subsequent to such filings. Each such map and description shall be on file and available for public inspection in the Office of the Director of the Fish and Wildlife Service, Department of the Interior.

SEC. 204. WILDERNESS REVIEW.

The Congress hereby finds and directs that—

(1) all lands in Arizona administered by the Fish and Wildlife Service that are not designated as wilderness by this Act or previous Acts of Congress have been adequately studied for wilderness designation pursuant to section 3(c) of the Wilderness Act (16 U.S.C. 1132(c)); and

(2) such lands shall hereafter be administered under the laws applicable to units of the National Wildlife Refuge System without regard to their potential suitability for preservation as wilderness.

ARIZONA WILDERNESS ACT OF 1989 FACT SHEET

BACKGROUND

In 1964, Congress enacted the Wilderness Act to create the National Wilderness Preservation System. The purpose of this legislation is to provide special protection to federal lands of significant natural value and possessing wilderness characteristics. To qualify for wilderness designation, an area must be at least 5,000 acres "where the earth and community of life are untrammeled by man, * * * retaining its primeval character, * * * (and) affected primarily by the forces of nature".

The Federal Land Policy Management Act of 1976 (FLPMA), directed the BLM to identify lands that may be suitable for Wilderness designation and declare them Wilderness Studies Areas (W.S.A.'s). FLPMA then required the BLM to review the W.S.A.'s and make recommendations to Congress as to which ones are suitable for Wilderness designation. These wilderness reviews are to be completed by 1991. In Arizona, the BLM has completed their Wilderness reviews and out of approximately 2 million acres in study status, the BLM has recommended approx. 1 million acres suitable for Wilderness designation in Arizona.

VITAL STATISTICS OF THE DECONCINI/MCCAIN WILDERNESS ACT OF 1989

Total acres designated wilderness: 895,150 (BLM—882,940 FWS—11,810).

Total acres released to multiple use management (BLM): 1,216,554.

Total acres held in further study status (BLM): 6,698.

SUMMARY OF DECONCINI/MCCAIN WILDERNESS ACT OF 1989: TITLE 1

Sec. 101 subsection (a)—Adopts BLM recommendations for wilderness suitability with the following exceptions.

Exclusions:

New Water Mountains WSA: A proposed ½ mile wide corridor in which two interstate pipelines and two ultra-high voltage (500kV) transmission lines expected to be constructed would degradate the wilderness qualities of this WSA.

Cactus Plains WSA: Uncertainty about the possible relocation of the town of Parker and significant private inholdings necessitate not including this WSA in this legislation.

Burns Springs WSA: Designation as a wilderness area could impact the Bullhead City airport because of the 2,000 foot minimum altitude advisory for aircraft over designated wilderness areas. Also, there is extensive mineral development—one medium open-pit copper mine on public lands and one on adjacent private lands—that degradate the wilderness values of this WSA. Santa Fe Minerals retains significant patented mining claims within the WSA that could be developed regardless of Congressional action to designate Wilderness.

Black Mountains North WSA: Designation as a wilderness area could possibly impact the Bullhead City airport because of the 2,000 foot minimum advisory for aircraft over designated Wilderness Areas. Also, Santa Fe Minerals retains significant patented mining claims within the WSA that could be developed regardless of Congressional action to designate Wilderness.

Crossman Peak WSA: Extensive boundary modifications to accommodate roads into the WSA, as well as the existence of electronic sites degradate the wilderness values of this area.

Kofa 4 North WSA: The limited size (1,900 acres) precludes opportunities for solitude as well as primitive and unconfined recreation experiences. Also, within the WSA there exists a ½ mile vehicle way and a right-of-way access road which form the area's western and northern boundaries. The WSA's proximity to U.S. Highway 95, combined with these vehicle ways, provide access to the Kofa National Wildlife Refuge and wilderness designation could hamper the public's access.

Black Rock WSA: Currently, the only access to this WSA is through the San Carlos Indian Reservation or through private property. The uncertainly over access to this area should be resolved prior to any wilderness consideration.

Additions:

North Maricopa Mountains WSA: In their recommendations, the BLM felt that Wilderness designation could have impacted the development of the Super-Conducting Super Collider whose development was proposed within the WSA. However, in view of the Department of Energy's recent decision to locate the SSC in Texas, the designation of this area would provide outstanding wilderness recreational opportunities close to the state's urban areas.—Phoenix and Tucson

Hell's Canyon WSA: The proposed recreational development at Lake Pleasant will result in significant growth in that area. Designation of this WSA will provide outstanding primitive recreational opportunities to complement the developed recreational facilities at Lake Pleasant.

Section 101, subsection (b)

Water rights: The BLM has identified the WSA's that have perennial streams flowing through them. As a result, language is included which indicates that Congress reserves a quantity of water to fulfill the purpose of the Wilderness area created by this act. The amount of water required to fulfill this purpose will be quantified by the appropriate stream adjudication process. In Arizona, the Arizona Department of Water Resource's adjudication process is the appropriate arena for this to take place.

The language used in this bill is virtually identical to the language agreed to in the legislation creating the San Pedro Riparian Conservation Area.

Section 102

Subsection (a) states that the wilderness areas designated by this Act will be managed in accordance with the provisions of the Wilderness Act.

Subsection (b) allows for the continuation of cattle grazing occurring within the WSA prior to designation as a Wilderness area by this legislation.

Subsection (c) states the establishment and maintenance of wildlife areas designated by this act.

Subsection (d) states that the capture of wild horses and burros may continue in the wilderness areas established by this legislation.

Section 103

Directs that the appropriate maps and legal descriptions be filed with the Secretary of Interior and respective committees of both Houses of Congress indicating the boundaries of the Wilderness areas designated by this legislation.

Section 104

Release all of the other WSA's studied by the Bureau of Land Management for wilderness suitability, but not designated as wilderness areas by this legislation, to multiple-use management as prescribed in the Federal Land Policy and Management Act of 1976.

Section 105

States that the White Canyon WSA will remain in Wilderness Study status until the Forest Service completes a wilderness review on its lands immediately adjacent to this area.

TITLE II

Fish and Wildlife Service

Section 201—adopts the Fish and Wildlife Service's 1974 recommendations of Wilderness designation for two refuges in Arizona—The Havasu National Wildlife Refuge and the Imperial National Wildlife Refuge. It excludes two other refuges from designation as wilderness areas—Cabeza Prieta National Wildlife Refuge and the Kofa National Wildlife Refuge.

Exclusions:

Kofa National Wildlife Refuge: In the Arizona-Idaho Conservation Act of 1988, this refuge was withdrawn from all forms of—"(a) entry, appropriation or disposal under the public land laws; (b) location, entry, and patent under United mining laws; and (c) disposition under all laws pertaining to mineral and geothermal leasing." The aforementioned withdrawal gives the Kofa defacto wilderness status while allowing the land manager the flexibility to manage the refuge for the purposes for which it was established—to enhance wildlife.

Cabeza Prieta National Wildlife Refuge: The Military Lands Withdrawal Act of 1986 gave the Cabeza Prieta National Wildlife Refuge essentially de-facto wilderness status by withdrawing it from all forms of appropriation under public land laws (including the mining laws and the mineral leasing and the geothermal leasing laws.) As a result of this withdrawal, the land manager is given the flexibility to manage the refuge for the purpose for which it was established—to enhance wildlife.

Section 202—States that the lands designated by this Act will be managed in accordance with the Wilderness Act.

Section 203—Directs that the appropriate maps and legal descriptions be filed with the Secretary of Interior and respective committees of both Houses of Congress indicating the boundaries of the Wilderness areas designated by this legislation.

Section 204—Releases the refuges not designated as wilderness by this legislation to the management prescriptions set forth in the laws administering wildlife refuges.

Mr. McCAIN. Mr. President, this year marks the 25th anniversary of the Wilderness Act and creation of the National Wilderness Preservation System. The System was established to provide special protection of Federal lands of significant natural value, and to preserve them in trust for our children and those who follow.

As stated in the act, Congress wanted "* * * to assure that increasing population, accompanied by expanding settlement and growing mechanization (would) not occupy and modify all areas leaving no land designated for preservation and protection in their natural condition * * * and to secure for the American people of present and future generations the benefits of an enduring resource of wilderness." A noble and worthwhile purpose indeed.

To determine what areas should be set aside for special protection under the System, the Wilderness Act, together with the Federal Land Policy and Management Act, directed Federal agencies to assess the lands they manage and recommend to Congress areas suitable for wilderness designation. A qualified area is defined as a parcel of land consisting of at least 5,000 acres where "the earth and community of life are untrammeled by man * * * retaining its primeval character * * * [and] affected primarily by the forces of nature." As you can imagine, identifying qualified Federal lands which meet that description is a daunting and painstaking task.

With the recent completion of BLM's wilderness studies, I am happy to report that the review of Federal lands in Arizona has now been achieved. Congress has already acted on the recommendations of the U.S. Forest Service and designated over 1.3 million acres of wilderness in the State. It is now time for Congress to decide on the disposition of the remaining Federal lands in Arizona.

Today, I am pleased to join my distinguished colleague Senator DECONCINI in introducing legislation which will begin discussion on this very important topic. I want to stress that this bill is not a reflection of what we necessarily believe the final bill should be. It is intended as a vehicle for discussion which will be shaped and molded as debate and public input on the issue evolve. The bill is a starting point which will certainly be modified.

I recognize that some people question the concept of wilderness. After all, public lands belong to all Americans. As a people of many diverse interests, our lands should be open to accommodate as many of those recreational and economic uses as possible. I am a Senator who believes in the multiple use concept as a matter of fairness and equity. I also know, however, that our Nation, and Arizona in particular, has been blessed with a magnificent natural trust. Regrettably that trust is placed at ever-increasing risk as the demands upon it continue to grow.

Clearly, we have stewardwhip responsibilities which cannot be ignored. We owe it to ourselves and our children to preserve something of our natural heritage undisturbed by the activities of man. Our future countrymen will count on our foresight and wisdom in setting something aside for them, as we have depended upon the unselfish wisdom of those before us.

It is my hope that through public involvement and with the good faith and cooperation of the various interests, we can fashion a bill which will be fair to all and in the best interests of Arizona and the Nation.

The bill we introduce today to begin the process generally reflects the wilderness recommendations made by the President on behalf of the Bureau of Land Management with several notable exceptions. This seems like a responsible and logical starting point. Congress gave the agency a mandate which it has admirably and honorably fulfilled. The Bureau has reviewed its lands, received public comment and considered the factors required of them by law. They have made their recommendations and that is rightfully where debate should begin.

The Bureau began its wilderness review of the 10 million acres it man-

ages in Arizona in 1978. From that review, 75 areas comprising just over 2 million acres were identified for intensive study. The studies are now complete and the Bureau has recommended 976,000 acres for inclusion in the National Wilderness Preservation System.

As I said, Mr. President, the bill Senator DECONCINI and I introduce today generally reflects the Bureau's recommendations with several important exceptions. A number of areas recommended by the Bureau have not been included for very specific and compelling reasons. Those parcels are the BLM wilderness study areas known as Cactus Plain, New Water Mountains, Crossman Peak, KOFA 4 North, Burns Springs, Black Mountains North, and Black Rock.

I would like to briefly explain why these areas were excluded.

The Cactus Plain Wilderness Study Area was deleted because of problems involving the relocation of Parker, AZ. The town is planning to relocate due to its jurisdictional conflicts with the Colorado River Indian Tribe. We did not feel it appropriate to complicate their planning or foreclose any options for their relocation or expansion by including the study area in the bill.

New Water Mountains.—This area was excluded because an approved utility corridor and ongoing mineral development within the area significantly diminish its wilderness value.

Crossman Peak.—Situated just east of Lake Havasu City, this study area contains numerous road intrusions and electronic relay equipment which we believe seriously impairs its wilderness character and should not be included.

KOFA 4 North.—Wilderness designation is not advisable because of management problems which would result from the area's isolated location.

Burns Springs/Black Mountain North.—These areas which were recommended by the Bureau have been omitted for a number of reasons, including air safety concerns at the Bullhead City Airport. By law, a 2,000-foot ceiling advisory is to be observed over designated wilderness areas. Observation of such a ceiling would cause a safety hazard for traffic flying in and out of Bullhead. While the ceiling is "advisory" in nature, it would not be proper to designate wilderness which will routinely be violated, nor is it acceptable to endanger the safety of aircraft which attempt to observe the ceiling. In addition, substantial inholdings and probable mineral development will adversely affect the wilderness character.

Black Rock.—While the potential wilderness quality of the area is high, the only access to it is across the San Carlos Indian Reservation. The Secretary should continue to work with the Tribe to determine what arrangement can be made for guaranteed access to Black Rock prior to any wilderness consideration.

Mr. President, this bill also includes wilderness designation for a couple of areas not recommended by the Bureau of Land Management. They include Hell's Canyon and the Maricopa North Wilderness Study Areas.

The area known as Hell's Canyon is an area of spectacular beauty situated in Yavapai County, AZ, just north of the new Lake Pleasant recreation facility. Lake Pleasant will rapidly grow as a primary recreational area in the State. A wilderness area in close proximity would complement the lake nicely, creating a regional resource for outdoor recreation and wilderness opportunity.

Also included in the bill is the Maricopa Mountain North Wilderness Study Area. Because of its nearness to the Tucson and Phoenix metropolitan area, inclusion of the area would provide convenient and accessible wilderness opportunities to a large portion of the State's population. The area also maintains one of the State's densest populations of the desert tortoise which would benefit from the added protection of wilderness. Now that the question of the SSC has been settled, the area should receive serious consideration.

As the law provides, the lands not designated as wilderness will be released from further study and returned to multiple use management. The bill contains one exception involving the White Canyon Wilderness Study Area. White Canyon is a relatively small parcel of BLM-managed land which runs adjacent to an area under wilderness study by the Forest Service. The bill retains White Canyon in study status pending the completion of the Forest Service assessment. I think it would be appropriate for the Secretary of the Interior and the Secretary of Agriculture to examine possible boundary adjustments or other suitable arrangements to create an area of meaningful size for inclusion in the system if it is indeed suitable wilderness.

In 1974, the Fish and Wildlife Service made wilderness recommendations for lands they manage in Arizona. Both the Havasu and the Imperial Wildlife Refuges have been included in the bill's wilderness list. The areas are located on the Colorado River and provide valuable habitat for numerous species of plant and wildlife. Both were recommended for wilderness by the Fish and Wildlife Service.

Also recommended by the Service but not included in the bill are the KOFA and the Cabeza Prieta Wildlife Refuges located in Southwest Arizona.

The KOFA which recently celebrated its 50th anniversary is a magnificent area which hosts a variety of wildlife species including the Desert Big Horn Sheep and the Desert Tortoise. The resource has been managed with great skill, and to rave reviews by the environmental community and various user groups. One hesitates to change in any way a natural resource which is running so well. I will be interested to hear the public comment on the question of wilderness designation for the KOFA.

I will be equally anxious to receive input on the disposition of Cabeza Prieta, which is recognized in many circles as an area of classic wilderness value. Nevertheless, prior to any designation of wilderness, a number of questions and issues on the Cabeza must be considered and resolved.

First, the area is quite large. If we are to accommodate existing roads and provide some reasonable access to the interior, some cherry stemming would be required. We must also recognize that the Arizona-Idaho lands bill, passed by Congress last year, withdrew both the KOFA and Cabeza Prieta from mineral entry. Because this withdrawal provides substantial protection, we must decide whether there are any substantial benefits derived from wilderness status. We would have to weigh those benefits against any possible complications wilderness might have on the purposes for which the areas were created—wildlife management.

Any discussion of Cabeza invariably raises the question of the military's continued access to airspace for training exercises. Any changes in the area's status must accommodate the necessary training missions which are of such vital importance to our national security.

Mr. President, I would also like to say a few words on some of the issues which are always of such great relevance to the wilderness question, including grazing, mineral development, wildlife management and water rights. Concerning the issue of grazing, I understand and appreciate the importance of the cattle industry in Arizona, and the need for adequate grazing lands. It is certainly not the intent of this Senator, nor do I believe, it is the intent of the Wilderness Act to burden the cattle industry. We must recognize that the Wilderness Act expressly states that grazing shall be permitted in a wilderness area where it was allowed prior to the designation. Furthermore, ranchers are to have access to the land for the maintenance of stock ponds and other needed infrastructure, provided that the minimum or least intrusive tools are used in carrying out that work. The bill includes grazing language identical to that used in the 1984 Arizona Wilderness bill. I want to make sure that the spirit and intent of the Wilderness Act will be properly observed in order to protect the interests of the cattle industry.

Another vital issue concerning wilderness is its impact on mineral development. Here again, the law seeks to protect the right of those whose activities in the area pre-dated its wilderness designation. By law, those who have established mineral claims in a wilderness area must be allowed access to develop the holding. As with grazing rights, we must strive to ensure that the legal rights guaranteed by the Wilderness Act are not infringed.

Even so, serious concerns remain due to the fact that wilderness designation precludes the survey and development of mineral potential not claimed before the designation. In Arizona mining has played, and will continue to play a vital role in our economy. I will continue to study the impact of each proposed wilderness area to assess the potential impact of lost mineral development opportunities. Again, I hope that mining interests will work closely with us to find the right answers so that we can weigh and balance our mineral needs and development potential against our conservation goals.

On the subject of wildlife management, although the bill is silent on the issue, I recognize the importance of resolving questions on the rights and responsibilities of wildlife managers on Federal wilderness. The maintenance of a healthy, diverse, and balanced population of wildlife is a critical component of wilderness and indeed one of the primary reasons the system was established. Certainly game and fish managers must have every confidence that they can pursue their mission within wilderness, without unreasonable constraints. I believe it is the intent of the Wilderness Act to provide that protection, while ensuring that the other prerogatives of wilderness are not compromised in the process. Use of the least intrusive tools in the conduct of wildlife management is mandated by law, and Federal oversight and authority by all rights must be retained. Nevertheless, I know and appreciate the concerns which have been expressed on this subject and I look forward to working with the State authorities to resolve outstanding issues.

Finally, Mr. President, I would like to touch on the issue of water rights which is always of paramount importance in our State. Only a fraction of the areas included in the bill contain perennial streams where water rights could become an issue. For those areas, we have included language similar to that used in the legislation creating the San Pedro Riparian National Conservation Area. The language states that Congress reserves a quantity of water sufficient to fulfill the purposes for which the wilderness areas were created, on a case by case basis. Furthermore, it confirms that the priority of the reservation shall be the date the legislation is enacted, and that quantification of the right shall be accomplished in an appropriate stream adjudication. This will ensure that creation of a water right will not impact any prior appropriation or preexisting rights, and that the responsibility for quantification will rest with the State where it belongs.

In closing, Mr. President, I would again like to stress that this bill is a beginning and a vehicle for discussion. I look forward to the public comment and input which it is intended to attract and will be working with other members of the delegation to conduct appropriate public meetings to examine the issues in the near future.

I am fully confident that if we can achieve the same level of commitment and cooperation among the various interests as we did in producing the 1984 Arizona Wilderness bill, the result will be legislation in which we can all take pride.

By Mr. LAUTENBERG:

S. 1081. A bill to authorize the Secretary of Housing and Urban Development to carry out a cost-effective community-based program for housing rehabilitation and development to serve low- and moderate-income families; to the Committee on Banking, Housing, and Urban Affairs.

COMMUNITY-BASED HOUSING REHABILITATION AND DEVELOPMENT PROJECT

● Mr. LAUTENBERG. Mr. President, today I am introducing legislation, the Community Housing Partnership Act, to promote the development of affordable housing by community, religious, and other nonprofit organizations.

Mr. President, the shortage of affordable housing has reached crisis proportions. According to some estimates, up to 3 million Americans, including many working families, are homeless. Millions of others—in both urban and rural areas—live in crowded, substandard conditions. For many low- and middle-income Americans, home ownership is becoming an impossible dream.

As the Federal Government has withdrawn support for housing, thousands of community-based groups have emerged throughout the country to help meet housing needs. These grassroots organizations—churches, community development corporations, tenant groups and others—have helped rebuild neighborhoods that the public and for-profit sectors have ignored or abandoned. In a growing number of cities and towns, nonprofit developers are the primary or only producers of low-income housing.

Many nonprofits have now developed a high degree of sophistication and competence. Their boards often include business people, local officials, and experienced developers. Over time, they've learned to work with local government and the private sector, and to build housing in an efficient, cost-effective manner.

There are many reasons to give nonprofit housing organizations an important role in national housing policy. Unlike the massive and often inefficient bureaucracy at HUD, nonprofits consist largely of local people who care about their communities and who are sensitive to local needs. In part because of these close community ties, they are willing to undertake projects considered too risky, too small, or too unprofitable by financial institutions and other developers. Also, they are committed to serving low-income residents on a long-term basis.

This bill provides $500 million in matching grants to build on the nonprofit sector's already impressive record. Under the legislation, Federal money must be matched by State, local, and private contributions in a ratio of 3 to 1. States and localities are given the flexibility to decide whether grants should go for low-income rental or home ownership units.

Grants would be split three ways: 60 percent would be allocated to metropolitan cities and urban counties, and 30 percent to States. The remaining 10 percent would be administered directly by HUD.

The city, urban county, and State funds would be allocated using the Community Development Block Grant formula. Cities and urban counties would have to be allocated at least $250,000 though this procedure to receive a direct grant. Those not allocated at least that much from the formula distribution would have to apply to either the State or HUD for funds on a discretionary basis.

Once funds are allocated to cities, counties and States, they would have to be used for grants, loans, or other forms of assistance to qualified nonprofit sponsors for the development or rehabilitation of affordable housing for low-income people.

HUD's allocation would be available for direct allocation to nonprofit sponsors where the city or State is either unwilling or unable to obtain funds directly; where the city or State is unable to provide required matching funds, or where the sponsor proposes "an innovative housing development."

The legislation includes targeting provisions to ensure assistance goes to those in greatest need. Eligible rental housing projects must have either 40 percent of the units reserved for households with incomes below 60 percent of the area median income, or at least 20 percent of the units available to households with incomes below 50 percent of the area median income.

The bill also would allocate $25 million in grants to provide nonprofit groups with training and technical assistance.

The Community Housing Partnership Act is supported by many organizations, including the U.S. Conference of Mayors, the National Low-Income Housing Coalition, and community-based groups around the country. An identical House bill introduced by Congressman JOSEPH KENNEDY, H.R. 1852, has 56 cosponsors.

Mr. President, nonprofits can make an important contribution to meeting affordable housing needs. But they cannot do the job alone. Their efforts must be part of a comprehensive housing policy that involves the private, for-profit sector, and all levels of government.

I am an original cosponsor of the National Affordable Housing Act, proposed by Senators CRANSTON and D'AMATO, which includes a wide range of proposals to expand and improve Federal housing policy. I remain fully supportive of their effort, which includes a set-aside for nonprofits, and which no doubt will provide the vehicle for Senate consideration of housing policy in this Congress.

The Community Housing Partnership Act is not designed as a substitute for the more comprehensive Cranston-D'Amato legislation. Rather, it offers a detailed and targeted framework for a nonprofit partnership that can be included in a broader national housing policy.

An omnibus housing bill introduced by House Housing Subcommittee Chairman HENRY GONZALEZ, the Housing and Community Development Act of 1989 (H.R. 1180), already includes the provisions of the CHPA. Similarly, I am hopeful that the proposals in the CHPA can be applied to supplement and improve the Cranston-D'Amato bill.

Mr. President, I am introducing this legislation in the identical form as it was introduced in the House. The bill probably can be improved, and I would welcome any suggestions from housing advocates and other interested parties. I look forward to working with them, and the Housing Subcommittee, as Senate consideration of housing policy moves forward.

I ask unanimous consent that a copy of the bill and a partial list of organizations supporting the bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Community Housing Partnership Act".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title and table of contents.
Sec. 2. Findings and purpose.
TITLE I—HOUSING EDUCATION AND ORGANIZATIONAL SUPPORT GRANTS FOR COMMUNITY BASED HOUSING PROJECTS
Sec. 101. Program authority.
Sec. 102. Eligible activities.
Sec. 103. Authorization of appropriations.
TITLE II—COMMUNITY HOUSING PARTNERSHIP GRANTS
Sec. 201. Program authority.
Sec. 202. Distribution and allocation of community housing partnership funds.
Sec. 203. Eligible activities.
Sec. 204. Eligible projects.
Sec. 205. Authorization of appropriations.
TITLE III—GENERAL PROVISIONS
Sec. 301. Regulations.
Sec. 302. Definitions.

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the goals of the Federal housing laws, set out in the Housing Act of 1949 and reaffirmed in the Housing and Urban Development Act of 1968, are to provide affordable, decent, safe, and sanitary living environments for all Americans;

(2) there is an increasing number of Americans whose living environments have deteriorated over the past several years as a result of reductions in Federal assistance to low- and moderate-income families;

(3) many Americans face the possibility of homelessness unless Federal, State, and local governments work together with the private sector to develop and rehabilitate the housing stock of the Nation to provide affordable, safe, decent, and sanitary housing for low- and moderate-income families;

(4) in order to fulfill the goals of the Federal housing laws, there is a need to develop a cost-effective community based housing development program under which—

(A) the rents charged to tenants will be based on the cost of the construction and management of the housing and not upon prevailing market conditions; and

(B) the Federal, State, and local investment in low- and moderate-income housing will be preserved to ensure continuity of providing housing for low- and moderate-income families in perpetuity;

(5) an increasing number of States and cities have been successful in producing cost-effective low- and moderate-income housing by working in partnership with local community-based nonprofit sponsors, such as community development corporations, neighborhood housing services, trade unions, groups sponsored by religious organizations, limited equity cooperatives, and other tenant organizations;

(6) during the 1980s, the nonprofit sector has, despite severe obstacles caused by inadequate funding, played an increasingly important role in the production and rehabilitation of affordable housing in communities across the Nation;

(7) nonprofit sponsors need technical skills and financial resources to develop housing programs and otherwise assist low- and moderate-income families; and

(8) the success of housing development programs depends upon tenants and homeowners being fiscally responsible and able managers.

(b) PURPOSE.—It is the purpose of this Act—

(1) to develop affordable, safe, decent, and sanitary housing for low- and moderate-income families in a cost-effective manner—

(A) by providing funding to cities and States to be used to maintain the low- and moderate-income housing stock and to make new construction and substantial rehabilitation projects feasible;

(B) by encouraging the development and management of housing projects by nonprofit community based organizations such as community development corporations, neighborhood housing services, trade unions, groups sponsored by religious organizations, limited equity cooperatives, and tenant organizations; and

(C) by encouraging matching funds from private entities and State and local governments to assist in the development of low- and moderate-income housing;

(2) to ensure that Federal investment in low- and moderate-income housing—

(A) produces housing stock that is available to low- and moderate-income tenants at a cost based on the cost of the construction and management of the housing rather than the higher market rates; and

(B) remains available to serve low- and moderate-income families in perpetuity;

(3) as one part of a more comprehensive housing program (including the for-profit private sector and public housing agencies and organizations) needed to meet the housing goals of the Nation, help to steadily expand the development capacity of the nonprofit sector so that it can play an increasing role in the construction, rehabilitation, and preservation of affordable housing;

(4) encourage potential nonprofit sponsors to develop the necessary capabilities and resources to undertake the housing development programs contemplated in title II; and

(5) assist low- and moderate-income families to obtain the skills and knowledge necessary to become responsible homeowners and tenants.

TITLE I—HOUSING EDUCATION AND ORGANIZATIONAL SUPPORT GRANTS FOR COMMUNITY BASED HOUSING PROJECTS

SEC. 101. PROGRAM AUTHORITY.

In order to facilitate the education of low- and moderate-income homeowners and tenants and to promote the ability of nonprofit sponsors to maintain, rehabilitate and construct housing for low- and moderate-income families, the Secretary of Housing and Urban Development may provide housing education and organizational support grants—

(1) to eligible cities and states to assist nonprofit sponsors and nonprofit organizations; and

(2) directly to nonprofit sponsors and nonprofit organizations.

SEC. 102. ELIGIBLE ACTIVITIES.

Grants and loans made under this title may be used only for the following eligible activities:

(1) ORGANIZATIONAL SUPPORT GRANT OR LOAN.—Organizational support grants or loans shall be made by grant administrators to nonprofit sponsors to cover operational expenses and to cover expenses for training and technical, legal, engineering and other assistance to the board of directors, staff, and members of the nonprofit sponsor. Organizational support grants or loans may not be provided under this title for any project specific activity provided for in section 202(a).

(2) HOUSING EDUCATION GRANT OR LOAN.—Housing education grants or loans shall be made by grant administrators to nonprofit organizations to cover expenses for providing or administering programs for educating, counseling, or organizing homeowners and tenants who are eligible to receive as-

sistance under grants made pursuant to title II.

SEC. 103. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this title, $25,000,000 for the fiscal year 1989 and such sums as may be necessary for each succeeding fiscal year. Any amount appropriated as authorized by this section shall remain available until expended.

TITLE II—COMMUNITY HOUSING PARTNERSHIP GRANTS

SEC. 201. PROGRAM AUTHORITY.

The Secretary of Housing and Urban Development may provide the following assistance under this title to facilitate the maintenance, rehabilitation and construction of housing for low- and moderate-income families:

(1) Community housing partnership grants to eligible cities and States to assist nonprofit sponsors.

(2) Community housing partnership grants and loans directly to nonprofit sponsors.

SEC. 202. DISTRIBUTION AND ALLOCATION OF COMMUNITY HOUSING PARTNERSHIP FUNDS.

(a) URBAN COMMUNITY HOUSING PARTNERSHIP GRANTS.—

(1) SHARE OF APPROPRIATED FUNDS.—The Secretary shall allocate 60 percent of any amount appropriated for purposes of carrying out this title for community housing partnership grants to metropolitan cities and urban counties.

(2) APPORTIONMENT OF FUNDS.—(A) Except as provided in subparagraph (B), amounts allocated under paragraph (1) for community housing partnership grants shall be apportioned to metropolitan cities and urban counties in the same manner as funds are apportioned under section 106(b) of the Housing and Community Development Act of 1974.

(B) If the amount allotted in any year to any metropolitan city or urban county under paragraph (2) is less than $250,000, such city or county shall not receive a community housing partnership grant under this subsection. Such amount shall be distributed pro rata to the cities and counties otherwise receiving funding under subparagraph (A).

(b) STATE COMMUNITY HOUSING PARTNERSHIP GRANTS.—

(1) SHARE OF APPROPRIATED FUNDS.—The Secretary shall allocate 30 percent of any amount appropriated for purposes of carrying out this title for community housing partnership grants to States for use in areas that do not receive a grant under subsection (a).

(2) APPORTIONMENT OF FUNDS.—(A) Amounts allocated under paragraph (1) shall be apportioned among the States in the same manner as funds are apportioned under section 106(d) of the Housing and Community Development Act of 1974.

(c) DIRECT COMMUNITY HOUSING PARTNERSHIP GRANTS.—

(1) SHARE OF APPROPRIATED FUNDS.—The Secretary shall allocate for community housing partnership grants to nonprofit sponsors 10 percent of any amount appropriated pursuant to the authorization contained in section 205.

(2) DISTRIBUTION.—The Secretary shall make grants to nonprofit sponsors from amounts allocated under paragraph (1), with priority given to any nonprofit sponsor—

(A) that will provide services in an area where the local government or State concerned—

(i) is unwilling or unable to participate in obtaining a grant under subsection (a) or (b); or

(ii) is unable to provide matching funds; or

(B) that proposes an innovative housing development.

(d) UNUSED FUNDS.—

(1) RESERVATION OR DISTRIBUTION TO PUBLIC AGENCY SPONSORS.—A grant administrator other than the Secretary that has grant funds remaining at the end of the 12-month period beginning on the date the funds are received from the Secretary may reserve such unused funds for an additional 12-month period or make the funds available to any public agency that—

(A) is willing to act as a nonprofit sponsor; and

(B) otherwise fulfills the eligibility requirements.

(2) REALLOCATION.—A grant administrator other than the Secretary that has grant funds remaining at the end of the 24-month period beginning on the date the funds are received from the Secretary shall return such unused funds to the Secretary for reallocation under subsection (c).

SEC. 203. ELIGIBLE ACTIVITIES.

(a) PROJECT SPECIFIC TECHNICAL ASSISTANCE AND SITE CONTROL LOANS.—

(1) IN GENERAL.—A grant administrator may use funds from a grant received under section 202 to provide technical assistance and site control loans to nonprofit sponsors in the early stages of site development for an eligible project.

(2) ALLOWABLE EXPENSES.—A loan may be provided under paragraph (1) to cover project expenses necessary to determine project feasibility, including costs of an initial feasibility study, consulting fees, costs of preliminary financial applications, legal fees, architectural fees, engineering fees, and deposits to obtain options for site control.

(3) REPAYMENT.—A nonprofit sponsor that receives a loan under paragraph (1) shall repay the loan to the grant administrator from construction loan proceeds or other project income. The Secretary may waive repayment of the loan if there are impediments to project development.

(b) PROJECT-SPECIFIC SEED MONEY LOANS.—

(1) IN GENERAL.—Grant administrators may provide loans to nonprofit sponsors to cover preconstruction project expenses such as obtaining firm construction loan commitments, architectural plans and specifications, zoning approvals, engineering studies and legal fees.

(2) ELIGIBLE NONPROFIT SPONSORS.—A grant administrator may provide a loan under paragraph (1) only to a nonprofit sponsor who has, with respect to the project concerned, site control, a preliminary financial commitment, and a capable development team.

(3) REPAYMENT.—A nonprofit sponsor that receives a loan under paragraph (1) shall repay the loan to the grant administrator from construction loan proceeds or other project income. The grant administrator may waive repayment of the loan if there are impediments to project development.

(c) PROJECT-SPECIFIC MATCHING GRANT OR LOAN.—

(1) IN GENERAL.—A grant administrator may provide grants or loans to nonprofit sponsors or nonprofit sponsor partnerships to assist in the new construction or substantial rehabilitation of eligible projects. A grant or loan provided under the preceding sentence may be used to make a project feasible and to reduce rents or sales prices—

(A) by buying down long-term mortgages;

(B) by providing interest reduction payments;

(C) by covering operating deficits;

(D) by providing capital grants; or

(E) by providing other assistance to support the rehabilitation, construction, and occupancy of the eligible project by low- and moderate-income families.

(2) MATCHING REQUIREMENT.—A grant administrator may not provide a grant or loan under this subsection unless the applicant, for every 3 dollars to be provided under the grant or loan, provides 1 dollar of matching funds or commitments, on a present value basis, from—

(A) the State or unit of general local government concerned (such as grants, tax abatements, subsidized loans, tax-exempt financing, or other local subsidy programs); or

(B) a private foundation, financial institution, or other private association or organization (such as grants, below market loans, or syndication proceeds, or equity contributions).

(d) PROGRAM-WIDE SUPPORT OF NONPROFIT DEVELOPMENT AND MANAGEMENT.—Each grant administrator shall use not less than 5 percent of the funds received under the grant to provide to eligible nonprofit sponsors—

(1) technical assistance and training; and

(2) continuing support for managing and conserving properties developed under this title.

(e) USE OF AMOUNTS RECEIVED AS LOAN REPAYMENTS.—Any grant administrator that receives amounts in repayment of loans made under this title may use such amounts only to carry out the purposes of this Act.

SEC. 204. ELIGIBLE PROJECTS.

(a) ELIGIBLE RENTAL HOUSING PROJECTS.—In order to be eligible for a grant under section 202, the owner of a rental housing project shall agree to the following requirements:

(1) TYPES OF PROJECTS.—The project shall consist of—

(A) multifamily rental housing (including limited equity cooperatives) structures that contain more than 4 independent dwelling units; or

(B) single room occupancy structures that have a capacity of not less than 4 persons (and may include the sharing of common eating and bath facilities).

(2) OCCUPANCY BY LOWER INCOME FAMILIES.—In the project—

(A) at least 40 percent of the units shall be occupied, or available for occupancy by, lower income families with incomes of less than 60 percent of the area median income, adjusted for family size; or

(B) at least 20 percent of the units shall be occupied, or be available for occupancy by, lower income families with incomes of less than 50 percent of the area median income, adjusted for family size.

(3) LIMITATION ON RENTAL PAYMENTS BY LOWER INCOME FAMILIES.—In each project, tenants with incomes below 80 percent of the area median income shall not pay more than 30 percent of their monthly adjusted income toward monthly rental payments.

(4) PROHIBITION ON ASSISTANCE TO NONLOWER INCOME FAMILIES.—Assistance provided under this title may not be used in any project to reduce rental payments for families with incomes above 80 percent of the

area median income, adjusted for family size.

(5) LIMITATION ON PROFITS.—Aggregate monthly rental for each eligible project may not exceed the cost of operating the project (including debt service, management, adequate reserves, and other operating costs) plus a 6 percent return on the equity investment, if any, of the owner of the project.

(6) PERIOD OF RESTRICTIONS.—A project for which assistance is received under this title shall comply with the requirements of paragraphs (2) and (3) in perpetuity.

(7) RESTRICTIONS ON CONVEYANCE.—(A) The ownership interest in a project for which assistance is received under this title may not be conveyed unless the instrument of conveyance requires the new owner to comply with the same restrictions imposed on the original owner.

(B) A nonprofit sponsor that receives assistance under this title for a project shall agree to use any profit received from the operation, sale, or other disposition of the project for the purposes of providing low- and moderate-income housing. Profit-motivated partners of nonprofit sponsors in a nonprofit sponsor partnership may receive—

(i) not more than a 6 percent return on their equity investment from project operations; and

(ii) upon disposition of the project, not more than an amount equal to their initial equity investment plus a return on that investment equal to the increase in the Consumer Price Index for the geographic location of the project since the time of the initial investment of such partner in the project.

(8) TENANT PARTICIPATION PLAN.—A nonprofit sponsor that receives assistance for a project under this title shall provide a plan for and follow a program of tenant participations in management decisions and shall adhere to a fair lease and grievance procedure approved by the grant administrator.

(b) HOME OWNERSHIP.—

(1) ELIGIBLE UNITS.—Eligible home ownership units shall include the sale of dwellings (or in the case of a mutual housing corporation or association sponsorship, the sale of indicia of home ownership), including 1- to 4-family homes and dwelling units in a condominium project, and any townhouse or manufactured home, provided such dwelling units provide facilities necessary for independent living and comply with—

(A) applicable local building codes; or

(B) in any case in which there is not an applicable building code, a nationally recognized model building code that the Secretary determines to be acceptable.

(2) ELIGIBLE FAMILIES.—In order to be eligible to purchase an eligible home ownership unit, a family—

(A) may not have family income in excess of the greater of—

(i) 115 percent of the area median income, for a family of 4 persons; or

(ii) 115 percent of the State median income for a family of 4 persons; and

(B) may not have owned a home during the 3-year period prior to purchase of such unit.

(3) LIMITATION ON PROFITS.—Eligible nonprofit sponsors and nonprofit sponsor partnerships may not charge a purchase price for any unit built or rehabilitated with assistance under this section in excess of the cost of acquisition, construction, and rehabilitation (including soft costs such as professional fees, costs of interest and insurance, and taxes) and sale of the unit and related common costs of the development plus a development fee of 10 percent of such costs. Any development fee received by a nonprofit sponsor from the sale or other disposition of an assisted project shall be used for the purpose of carrying out a program designed to—

(A) preserve low- and moderate-income housing;

(B) manage low- and moderate-income housing;

(C) provide tenant counseling services for tenants in low- and moderate-income housing; and

(D) provide low- and moderate-income housing.

(4) RESALE.—(A) Upon resale of an assisted unit, the homeowner may not charge a sales price in excess of the aggregate of—

(i) the purchase price that the homeowner paid;

(ii) an amount equal to the increase in the purchase price based upon the Consumer Price Index for the geographic location of the unit since the time of the purchase of the unit by the eligible homeowner; and

(iii) a 1 percent annual return on capital improvements made to the property.

(B) The restrictions described in subparagraph (A) shall be contained in the instrument of conveyance with respect to the assisted unit. The grant administrator shall use best efforts to have the assisted unit resold to a family that would have qualified for an initial purchase of the assisted unit.

(5) HOUSING COOPERATIVES.—Housing cooperatives shall be structured to limit the equity appreciation similar to the formula set forth in paragraph (4) to ensure continued affordability of cooperative units for households meeting the criteria established in subsections (a)(2) and (a)(3).

(c) COORDINATION WITH OTHER SOURCES OF FUNDING.—

(1) IN GENERAL.—Amounts may be provided to a project under this title in addition to other amounts provided to such project under local, State, or other Federal housing or community assistance programs.

(2) LIMITATION.—Other amounts (as described in paragraph (1)) provided to a project assisted under this title shall be reduced to the extent necessary to ensure that the monthly rental paid to the project owner for each unit assisted under this title does not exceed the maximum rent permitted to be paid for such unit as determined under subsection (a)(3).

(3) SECTION 8 ASSISTANCE.—The Secretary or any local housing authority may allocate assistance under section 8 of the United States Housing Act of 1937, including rent certificates and vouchers, to a rental project assisted under this title for a term determined by the Secretary or such authority to be necessary to assist such project to obtain adequate financing or to maintain financial viability.

(d) TAX TREATMENT OF ELIGIBLE PROJECTS.—

(1) RENTAL OF ELIGIBLE UNITS NOT TREATED AS PASSIVE ACTIVITY.—

(A) Section 469(c) of the Internal Revenue Code of 1986 is amended by adding at the end of paragraph (2) the following new sentence: "Notwithstanding the foregoing, the term 'passive activity' does not include any rental activity involving units in an eligible project (as such term is defined in section 42(i)(6))."

(2) ELIGIBLE PROJECTS ALLOWED MAXIMUM LOW- AND MODERATE-INCOME HOUSING TAX CREDIT.—Section 42(b)(1)(A) of the Internal Revenue Code of 1986 is amended to read as follows:

"(A) 9 percent for—

"(i) new buildings that are not federally subsidized for the taxable year, and

"(ii) eligible projects as defined in section 42(i)(6), or".

(3) DEFINITION OF ELIGIBLE PROJECT.—Section 42(i) of the Internal Revenue Code of 1986 is amended by adding at the end the following:

"(6) ELIGIBLE PROJECT.—The term 'eligible project' means any building that is eligible for and has received, or has a commitment to receive, a community housing partnership grant pursuant to section 201 of the Community Housing Partnership Act.".

(e) AFFIRMATIVE ACTION REQUIREMENTS.—Each nonprofit sponsor that receives assistance for a project under this title shall develop and follow an affirmative action program approved by the grant administrator to maximize the participation of minorities in construction, management, and maintenance employment opportunities arising from this program, particularly minority residents of the communities in which the project is located.

(f) NONDISCRIMINATION.—No person shall on the grounds of race, color, national origin, or sex be excluded from participation in, be denied the benefit of, or be subjected to discrimination under any program or activity assisted under this title.

SEC. 205. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this title $500,000,000 for fiscal year 1989 and such sums as may be necessary for each succeeding fiscal year. Any amount appropriated under this section shall remain available until expended.

TITLE III—GENERAL PROVISIONS

SEC. 301. REGULATIONS.

The Secretary shall issue any regulation necessary to carry out this Act.

SEC. 302. DEFINITIONS.

For purposes of this Act:

(1) The terms "area median income" and "State median income" mean the area median income and the State median income, respectively, as determined by the Secretary.

(2) The term "grant administrator" means any city or State receiving funds under this Act, including any entity, authority, or agency designated by such city or State to act as grant administrator. To the extent the Secretary directly administers the funding under this program under section 102(c)(3), the term includes the Secretary.

(3) The term "low- and moderate-income families" includes families and individuals who are at or below the income levels for eligibility for the assistance set forth in this title.

(4) The term "nonprofit organization" means any not-for-profit corporation that—

(A) is organized under State or local laws;

(B) is qualified under section 501(c)(3) of the Internal Revenue Code; and

(C) has as one of its purposes the counseling, education, or organizing of low- or medium-income homeowners or tenants.

(5) The term "nonprofit sponsor" means—

(A) any not-for-profit corporation that is—

(i) organized under State or local laws;

(ii) qualified under section 501(c)(3) of the Internal Revenue Code of 1986; and

(iii) has as one of its purposes the preservation and production of affordable housing; or

(B) any nonprofit cooperative corporation that is—

(i) organized under local law; and

(ii) approved by the Secretary.

(6) The term "nonprofit sponsor partnership" means a limited partnership in which a nonprofit sponsor is a controlling general partner.

(7) The term "Secretary" means the Secretary of the Department of Housing and Urban Development.

(8) The term "State" means each of the several States or any instrumentality of a State approved by the Governor of such State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, any other territory or possession of the United States, and any Indian tribe.

(9) The term "substantial rehabilitation" means rehabilitation of a project with a cost, including soft costs (such as professional fees, costs of interest and insurance, and taxes), equal to at least 30 percent of the fair market value of the building. Substantial rehabilitation shall require that the structure be rehabilitated (other than a cosmetic repair) so that it is in compliance with the building standards as prescribed by the Secretary.

By Mr. McCLURE (for himself, Mr. SYMMS, Mr. SIMPSON, Mr. WALLOP, Mr. BURNS, and Mr. BAUCUS):

S. 1082. A bill relating to the treatment of a certain project for purposes of the energy tax credit; to the Committee on Finance.

TREATMENT OF A CERTAIN PROJECT UNDER THE ENERGY TAX CREDIT

● Mr. McCLURE. Mr. President, today I am introducing legislation calling on Congress to remedy a problem which it created. I was promised at the end of last Congress during consideration of the technical corrections bill that this problem would receive fair attention at the earliest possible time. The bill I introduce today will extend the hydroelectric tax credit for the Island Park hydro project which would have been placed in service but for an act of Congress which delayed the project. The bill is cosponsored by five Senators from those States affected by the project. Senators SYMMS, SIMPSON, WALLOP, BURNS, and BAUCUS all share my concern that the Congress should act quickly to remedy this situation.

In 1986, Congress approved the Electric Consumers Protection Act [ECPA]. ECPA included a rider which cited the Island Park hydroelectric project by name and FERC project number. It imposed new and additional new and additional licensing criteria for this project which is not required of any other hydroelectric project. This action occurred during the middle of the ongoing FERC licensing process. The act mandated that in addition to the requirements of part I of the Federal Power Act, "* * * such license only if the Commission determines that significant and permanent alteration of streamflow, habitat, water temperature, and quality will not occur as a result of the project."

The intent of Congress when dealing with the Island Park project was to allow the project to be built, but we did not foresee the licensing delay that would occur due to the additional requirements we imposed. The project met all the requirements of the law and was timely filed; however, the delay imposed by Congress pushed the project back so it was impossible to place it in service by the end of last year when the tax credit expired. Thus, all we are asking today is for Congress to treat this hydro project the same as it has every other project.

When I offered this amendment to the technical corrections bill last fall, some argued our amendment was a rifle shot, legislation that benefits one taxpayer while ignoring others similarly situated. I believe that tax breaks should be legislated for classes of taxpayers, rather than benefiting a special interest, but I also believe that the provision included in ECPA created a new class of taxpayer with respect to the energy tax credits. Namely, a class of taxpayer whose ability to meet the energy tax credit expiration deadline has been thwarted by the requirement of an act of Congress.

In passing the technical corrections act I realized the importance of keeping the bill free of too much baggage in order for it to pass through conference and be signed by the President in the time we had remaining. I withdrew the amendment after being assured that this worthy project would be taken care of at the earliest possible moment.

This bill should be passed because it does not discriminate or distinguish among those similarly situated, it merely treats the Island Park project the same way any other project would be treated but for the congressional delay. The Congress created the delay and it is only just that the Congress correct this problem.

Mr. President, if this problem is not resolved, it is likely that the thousands of hours of private work that have gone into meeting the requirements of the congressional act will go for naught. Close to $1 million have been invested which will go for naught. This would be a tremendous waste of time and effort, and result in abandonment of an opportunity to generate 4.8 megawatts of nonpolluting energy. Also, the nonprofit Fall River Rural Electric Cooperative would lose a key future generating component.

I believe the time is now to act on this measure, to allow the Island Park hydroelectric project to be treated as other similar projects are treated, and to remedy a problem that was created by Congress. I urge the passage of this bill, and hope my colleagues will act on this at the earliest possible moment.

Mr. President. I ask unanimous consent that a copy of my bill appear in the RECORD following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1082

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONGRESSIONAL FINDINGS.

The Congress finds that—

(1) in addition to the normal licensing requirements of the Federal Power Act, section 15A(c)(1) of the Electric Consumers Protection Act of 1986 (Public Law 99-945) imposed new, unique, and project-specific licensing requirements on one particular hydropower project in Idaho—the Island Park Dam Hydropower Project (FERC No. 2973);

(2) these additional project-specific requirements which were imposed by the Congress in 1986 in the middle of the ongoing Federal Energy Regulatory Commission licensing process for the Island Park Dam Hydropower Project have resulted in a lengthy delay in license issuance for the project;

(3) the delay in license issuance for the project was unforeseen by Congress in 1986, but has made it impossible for the project to be constructed and placed in service in time to qualify for certain energy tax credits which are essential to the project's financing, and which were enacted by Congress to encourage nonpolluting energy development projects such as the Island Park Dam Hydropower Project; and

(4) an extension of the energy tax credits for the Island Park Hydropower Project is justified in this one particular instance to mitigate the unintended and unforeseen delays in project licensing and construction caused by Congress' action, and to afford the Island Park Dam Hydropower Project the same relative tax status shared by hydropower projects that were not disadvantaged by Congress' imposition of project-specific licensing criteria.

SEC. 2. EXTENSION OF ENERGY CREDIT.

In recognition of the findings set forth in section 1 of this Act, with respect to the Island Park Dam Hydropower Project, the date substituted under section 46(b)(2)(D) of the Internal Revenue Code of 1986 shall be "December 31, 1991" in lieu of "December 31, 1988".●

By Mr. KASTEN:

S.J. Res. 137. Joint resolution designating January 7, 1990, through January 13, 1990, as "National Law Enforcement Training Week"; to the Committee on the Judiciary.

NATIONAL LAW ENFORCEMENT TRAINING WEEK

● Mr. KASTEN. Mr. President, I am pleased to introduce today a joint resolution to designate January 7, 1990, through January 13, 1990, as "National Law Enforcement Training Week."

In every community throughout the United States, we see headlines just about daily concerning the problems our society faces in the law enforcement area. These problems include the terrible drug crisis which faces this Nation, and the resulting violence in the streets that we have seen in our major cities.

I believe that sometimes the great attention given to the drug crisis and the law enforcement problems associated with it overshadow many of the important daily functions of our law enforcement personnel as they work to keep our society free from fear and protect the law-abiding citizens as they go about their daily lives.

The law enforcement personnel of this Nation, including our local police forces, county sheriff departments, State police organizations, and other State and Federal law enforcement personnel, deserve and must have the best available training for their jobs. This is necessary to protect the lives of these people who are on the front lines of law enforcement. It is also necessary so that our society is protected by the best trained personnel that we can put into the field.

Therefore, I am pleased to introduce this legislation to recognize the efforts and contributions of those persons and organizations who are assisting in the Nation's fight against crime by assuring that our law enforcement people are properly trained in the increasingly complex areas which impact upon their ability to protect our law-abiding citizens.

Companion legislation is being introduced today in the House of Representatives by Representative ASPIN and we look forward to the cosponsorship of our colleagues on these two pieces of legislation.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 137

Whereas law enforcement training and sciences related to law enforcement are critical to the immediate and long-term safety and well-being of this Nation because law enforcement professionals provide service and protection to citizens in all sectors of society;

Whereas law enforcement training is a critical component of national efforts to protect the citizens of this Nation from violent crime, to combat the malignancy of illicit drugs, and to apprehend criminals who commit personal, property and business crimes;

Whereas law enforcement training serves the hard working and law abiding citizens of this Nation;

Whereas it is essential that the citizens of this Nation be able to enjoy an inherent right of freedom from fear and learn of the significant contributions that law enforcement trainers have made to assure such right;

Whereas it is vital to build and maintain a highly trained and motivated law enforcement work force that is educated and trained in the skills of law enforcement and sciences related to law enforcement in order to take advantage of the opportunities that law enforcement provides;

Whereas it is in the national interest to stimulate and encourage the youth of this Nation to understand the significance of law enforcement training to the law enforcement profession and to the safety and security of all citizens;

Whereas it is in the national interest to encourage the youth of this Nation to appreciate the intellectual fascination of law enforcement training; and

Whereas it is in the national interest to make the youth of this Nation aware of career options available in law enforcement and disciplines related to law enforcement: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That January 7, 1990, through January 13, 1990, is designated as "National Law Enforcement Training Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate exhibits, ceremonies, and activities, including programs designed to heighten the awareness of all citizens, particularly the youth of this Nation, of the importance of law enforcement training and related disciplines.●

(By Mr. LEAHY (for himself, Mr. DANFORTH, Mr. LUGAR, Mr. MATSUNAGA, Mr. SARBANES, Mr. BOND, Mr. BOSCHWITZ, Mr. BUMPERS, Mr. BURDICK, Mr. CHAFEE, Mr. COCHRAN, Mr. CONRAD, Mr. CRANSTON, Mr. D'AMATO, Mr. DASCHLE, Mr. DODD, Mr. DOLE, Mr. DURENBERGER, Mr. FOWLER, Mr. GLENN, Mr. GORTON, Mr. GRAHAM, Mr. HEFLIN, Mr. INOUYE, Mr. JOHNSTON, Mr. KENNEDY, Mr. LEVIN, Mr. PELL, Mr. PRYOR, Mr. SHELBY, and Mr. SIMPSON):

S.J. Res. 138. Joint resolution designating October 16, 1989, and October 16, 1990, as "World Food Day"; to the Committee on the Judiciary.

WORLD FOOD DAY

Mr. LEAHY. Mr. President, today I will be introducing a joint resolution to designate October 16, 1989, and October 16, 1990, as "World Food Day."

These will mark the eighth and ninth consecutive years that Congress has set aside a day to remember the world's hungry.

There are many commemoratives being offered on the floor this year. It is very important that the Senate strongly support this resolution.

Hunger and poverty remain daily facts of life for millions of Americans, and hundreds of millions of people throughout the world.

It is the world's children who suffer the most serious effects of hunger. Millions of children die each year from hunger-related illness and disease—most before their first birthday. Scores of others suffer permanent physical or mental damage from nutritional deficiencies.

As the richest, most powerful nation in the world, I believe it is our responsibility to do everything we can to alleviate the chronic conditions of hunger and malnourishment in the world. This issue goes well beyond questions of economics or politics. It is a moral issue.

This important commitment by the Congress of the United States will help to provide the recognition and leadership antihunger efforts need to

establish year-round drives for food and health programs and policies.

I urge Senate support for this important resolution.

By Mr. CRANSTON (for himself and Mr. WILSON):

S.J. Res. 139. Joint resolution to approve the designation of the Cordell Bank National Marine sanctuary, to disapprove of a term of that designation, and to direct the Secretary of Commerce to revise regulations implementing that designation to prohibit certain activities in the sanctuary; to the Committee on Commerce, Science, and Transportation.

CORDELL BANK NATIONAL MARINE SANCTUARY

Mr. CRANSTON. Mr. President, today I introduce a Senate joint resolution to approve the designation of the Cordell Bank National Marine sanctuary, to disapprove a term of that designation, and to direct the Secretary of Commerce to revise regulations implementing that designation in order to prohibit offshore oil drilling in the sanctuary.

Mr. President, tomorrow the administrationwill designate the Cordell Bank National Marine sanctuary, off the coast of northern California, as directed by legislation the Congress enacted late last year. The administration, however, has proposed to leave the sanctuary open to offshore oil drilling—an outrageous betrayal of the meaning and purpose of the marine sanctuary program.

Cordell Bank is the northernmost seamount along the California continental shelf. It is a fragile, sensitive environment, home to a large number of marine bird and mammal species. The endangered humpback and blue whales feed in surrounding waters. This rocky underwater island is a living marine garden of fish and invertebrate species.

The dangers of offshore oil drilling to a sensitive marine environment are clear and present. Such drilling involves the use and dumping at sea of many toxic materials, especially drilling muds laden with heavy metals and toxics. Oilspills—both chronic small spills and possible catastrophic spills—pose additional threats, smothering and poisoning bottom marine life. Noise and drilling pollution also threaten endangered whales and other marine mammals.

We are designating Cordell Bank as a National Marine sanctuary in order to protect it against exactly the kind of ruin and exploitation offshore oil drilling would bring. This is a bad decision by the administration, and a sorry first test of its commitment to protecting our coastal environment.

I urge the Congress to act promptly on this matter. A resolution has been previously introduced in the House by my California colleagues, Congressman Bosco and Congresswomen BOXER and PELOSI.

By Mr. GLENN (for himself, Mr. SHELBY, Mr. WILSON, Mr. GORE, and Mr. STEVENS):

S.J. Res. 140. Joint resolution designating November 19-25, 1989, as "National Family Caregivers Week"; to the Committee on the Judiciary.

NATIONAL FAMILY CAREGIVERS WEEK

● Mr. GLENN. Mr. President, today, I am introducing Senate Joint Resolution 140 to designate the week of November 19-25, 1989, as "National Family Caregivers Week." I am pleased to be joined by my colleagues, Senators SHELBY, WILSON, GORE, and STEVENS, in recognizing and encouraging the dedicated and often heroic efforts of those who provide support and care to their family members who are frail and no longer able to fully care for themselves. An identical House joint resolution is being introduced by Congresswoman OLYMPIA SNOWE.

The fastest growing segment of our population is the age 85 and older group—the group most likely to suffer multiple chronic ailments, thus requiring the assistance of caregivers. Over 80 percent of this care for the elderly is provided by family members—most often wives, daughters, and daughters-in-law—and not by the Government or other programs. Studies have shown that caregiving is very stressful. It is often an around-the-clock responsibility that leaves the caregiver emotionally and physically exhausted. Many caregivers are forced to sacrifice employment opportunities to provide care, thus jeopardizing their current and future economic status. Caregivers who do work outside the home face a stressful situation in attempting to balance the demands of their jobs, their families, and their caregiving responsibilities.

"National Family Caregivers Week" recognizes the vital role of family caregivers who provide the bulk of personal care for the elderly in our communities. It also highlights our Nation's need for an in-home and community-based system of long-term care that includes respite services to assist family caregivers. Because Americans are living longer, more and more of us will find ourselves responsible for the care of an elderly loved one. I urge my colleagues to join in passage of this resolution which will help highlight the contributions of family caregivers and increase awareness of their needs.●

ADDITIONAL COSPONSORS

S. 100

At the request of Mr. ROCKEFELLER, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 100, a bill to amend title XVIII of the Social Security Act with respect to coverage of, and payment for, services of psychologists under part B of Medicare.

S. 110

At the request of Mr. KENNEDY, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 110, a bill to revise and extend the programs of assistance under title X of the Public Health Service Act.

S. 115

At the request of Mr. INOUYE, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 115, a bill to amend titles XVIII and XIX of the Social Security Act to provide that nurse practitioner or clinical nurse specialist services are covered under part B of Medicare and are a mandatory benefit under Medicaid.

S. 119

At the request of Mr. INOUYE, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 119, a bill to amend titles XVIII and XIX of Social Security Act to provide that pediatric nurse practitioner or pediatric clinical nurse specialist services are covered under part B of Medicare and are a mandatory benefit under Medicaid.

S. 120

At the request of Mr. KENNEDY, the names of the Senator from North Dakota [Mr. BURDICK] and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 120, a bill to amend the Public Health Service Act to reauthorize adolescent family life demonstration projects, and for other purposes.

S. 148

At the request of Mr. PRESSLER, the names of the Senator from Iowa [Mr. GRASSLEY] and the Senator from New Hampshire [Mr. HUMPHREY] were added as cosponsors of S. 148, a bill to require the Secretary of the Treasury to mint coins in commemoration of the golden anniversary of the Mount Rushmore National Memorial.

S. 169

At the request of Mr. HOLLINGS, the name of the Senator from New Hampshire [Mr. RUDMAN] was added as a cosponsor of S. 169, a bill to amend the National Science and Technology Policy, Organization, and Priorities Act of 1976 in order to provide for improved coordination of national scientific research efforts and to provide for a national plan to improve scientific understanding of the Earth system and the effect of changes in that system on climate and human well-being.

S. 189

At the request of Mr. MATSUNAGA, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 189, a bill to amend

title 38, United States Code, to authorize the Secretary of Veterans Affairs to provide funeral transportation, remains transportation, and living expense benefits to deceased Medal of Honor recipients and their families.

S. 231

At the request of Mr. MOYNIHAN, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 231, a bill to amend part A of title IV of the Social Security Act to improve quality control standards and procedures under the Aid to Families With Dependent Children Program, and for other purposes.

S. 329

At the request of Mr. DIXON, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 329, a bill to amend the United States Warehouse Act to specifically allow States to require grain elevators with Federal warehouse licenses to participate in State grain indemnity funds or to require collateral security.

S. 335

At the request of Mr. MCCAIN, the names of the Senator from Rhode Island [Mr. PELL] and the Senator from Delaware [Mr. ROTH] were added as cosponsors of S. 335, a bill to amend title XVIII of the Social Security Act and other provisions of law to delay for 1 year the effective dates of the supplemental Medicare premium and additional benefits under part B of the Medicare Program, with the exception of the spousal impoverishment benefit.

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 335, supra.

S. 342

At the request of Mr. DANFORTH, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 342, a bill to amend the Internal Revenue Code of 1986 to provide that certain credits will not be subject to the passive activity rules, and for other purposes.

S. 355

At the request of Mr. RIEGLE, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 355, a bill to amend the Internal Revenue Code of 1986 to extend through 1992 the period during which qualified mortgage bonds and mortgage credit certificates may be issued.

S. 369

At the request of Mr. BOSCHWITZ, the names of the Senator from Florida [Mr. GRAHAM], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of S. 369, a bill to seek the eradication of the worst aspects of poverty in developing countries by the year 2000.

S. 375

At the request of Mr. HOLLINGS, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 375, a bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

S. 377

At the request of Mr. DIXON, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 377, a bill to establish a series of five Presidential primaries at which the public may express its preference for the nomination of an individual for election to the office of President of the United States.

S. 384

At the request of Mr. CHAFEE, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 3841, a bill to amend title XIX of the Social Security Act to assist individuals with a severe disability in attaining or maintaining their maximum potential for independence and capacity to participate in community and family life, and for other purposes.

S. 412

At the request of Mr. MOYNIHAN, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 412, a bill amend the Internal Revenue Code of 1986 to increase the amount of the credit for expenses with respect to child care for dependent children, to make such credit refundable, to amend the Social Security Act to increase the funds for available child care, and for other purposes.

S. 435

At the request of Mr. REID, the name of the Senator from Illinois [Mr. DIXON] was added to a cosponsor S. 435, a bill to amend section 118 of the Internal Revenue Code to provide for certain exception from certain rules determining contributions in aid of construction.

S. 488

At the request of Mr. FOWLER, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 468, a bill to provide Federal assistance and leadership to a program of research, development and demonstration of renewable energy and energy efficiency technologies, and for other purposes.

S. 519

At the request of Mr. LAUTENBERG, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 519, a bill to prohibit smoking on any scheduled airline flight in intrastate, interstate, or overseas air transportation.

S. 533

At the request of Mr. REID, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 533, a bill to protect the rights of victims of crime and to establish a Federal victim's bill of rights for children.

S. 563

At the request of Mr. MATSUNAGA, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 563, a bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the Armed Forces to receive retired pay concurrently with disability compensation after a reduction in the amount of retired pay.

S. 570

At the request of Mr. DANFORTH, the names of the Senator from North Carolina [Mr. HELMS], the Senator from Wisconsin [Mr. KOHL], the Senator from Montana [Mr. BURNS], the Senator from Vermont [Mr. JEFFORDS], and the Senator from Washington [Mr. ADAMS] were added as cosponsors of S. 570, a bill to amend the Internal Revenue Code of 1986 to enhance the incentive for increasing research activities.

S. 578

At the request of Mr. DANFORTH, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 578, a bill to amend title 10, United States Code, to provide for consideration of whether certain defense agreements adversely impact the international competitive position of U.S. industry.

S. 670

At the request of Mr. ARMSTRONG, the names of the Senator from Minnesota [Mr. BOSCHWITZ], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of S. 670, a bill to recognize the organization known as the Retired Enlisted Associated, Incorporated.

S. 704

At the request of Mr. RIEGLE, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 704, a bill to increase the authorization under title XX of the Social Security Act for block grants to States for social services.

S. 714

At the request of Mr. MCCLURE, the names of the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Washington [Mr. ADAMS], the Senator from Alabama [Mr. SHELBY], the Senator from Arizona [Mr. MCCAIN], and the Senator from California [Mr. WILSON] were added as cosponsors of S. 714, a bill to extend the authorization of the Water Resources Research Act of 1984 through the end of fiscal year 1993.

S. 892

At the request of Mr. MOYNIHAN, the names of the Senator from Maine [Mr. MITCHELL], the Senator from Rhode Island [Mr. PELL], the Senator from South Dakota [Mr. DASCHLE], and the

Senator from Iowa [Mr. HARKIN] were added as cosponsors of S. 892, a bill to exclude agent orange settlement payments from countable income and resources under Federal means-tested programs.

S. 895

At the request of Mr. BOREN, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 895, a bill to extend disaster assistance to losses due to adverse weather conditions in 1988 or 1989 for those crops planted in 1988 for harvest in 1989.

S. 933

At the request of Mr. HARKIN, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 933, a bill to establish a clear and comprehensive prohibition of discrimination on the basis of disability.

S. 969

At the request of Mr. MOYNIHAN, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of S. 969, a bill to establish the President's Award for Addiction Research.

S. 978

At the request of Mr. INOUYE, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 978, a bill to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian, and for other purposes.

S. 982

At the request of Mr. REID, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 982, a bill to repeal a provision of Federal tort claim law relating to the civil liability of Government contractors for certain injuries, losses of property, and deaths and for other purposes.

S. 990

At the request of Mr. WILSON, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 990, a bill to restrict the use of congressional frank for mass mailings and newsletters.

S. 999

At the request of Mr. HOLLINGS, the names of the Senator from Colorado [Mr. WIRTH], and the Senator from Kentucky [Mr. FORD] were added as cosponsors of S. 999, a bill to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes.

S. 1001

At the request of Mr. GORE, the name of the Senator from Vermont [Mr. JEFFORDS] was added as a cosponsor of S. 1001, a bill to establish policies and procedures necessary to develop, as a domestically based industry in the United States, a high definition television enterprise in the United States, together with ancillary products and services.

S. 1017

At the request of Mr. FORD, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 1017, a bill to enhance the ability of the Bureau of the Census to gather information concerning rural areas for Congress, to improve historic preservation efforts, and for other purposes.

SENATE JOINT RESOLUTION 67

At the request of Mr. DOMENICI, the names of the Senator from Connecticut [Mr. DODD], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Joint Resolution 67, a joint resolution to commemorate the 25th anniversary of the Wilderness Act of 1964 which established the National Wilderness Preservation System.

SENATE JOINT RESOLUTION 79

At the request of Mr. REID, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of Senate Joint Resolution 79, a joint resolution to require display of the POW/MIA flag at Federal buildings.

SENATE JOINT RESOLUTION 85

At the request of Mr. ARMSTRONG, the names of the Senator from Missouri [Mr. BOND], the Senator from New York [Mr. D'AMATO], the Senator from Utah [Mr. GARN], the Senator from Texas [Mr. GRAMM], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Idaho [Mr. MCCLURE], the Senator from New Hampshire [Mr. RUDMAN], the Senator from Wyoming [Mr. SIMPSON], the Senator from Pennsylvania [Mr. SPECTER], the Senator from California [Mr. WILSON], the Senator from New Jersey [Mr. BRADLEY], the Senator from Alabama [Mr. HEFLIN], the Senator from Massachusetts [Mr. KERRY], the Senator from Wisconsin [Mr. KOHL], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Maryland [Ms. MIKULSKI], the Senator from New York [Mr. MOYNIHAN], the Senator from Michigan [Mr. RIEGLE], the Senator from Rhode Island [Mr. PELL], the Senator from Tennessee [Mr. SASSER], the Senator from Illinois [Mr. SIMON], the Senator and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of Senate Joint Resolution 85, a joint resolution to designate the week of July 24-30, 1989, as the "National Week of Recognition and Remembrance for Those Who Served in the Korean War."

SENATE JOINT RESOLUTION 86

At the request of Mr. RIEGLE, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of senate joint resolution 86, a joint resolution designating November 17, 1989, as "National Philanthropy Day."

SENATE JOINT RESOLUTION 91

At the request of Mr. ROCKEFELLER, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of Senate Joint Resolution 91, a joint resolution designating April 28, 1989, as "Flight Attendant Safety Professionals' Day."

SENATE JOINT RESOLUTION 95

At the request of Mr. MCCLURE, the names of the Senator from Colorado [Mr. ARMSTRONG], the Senator from Virginia [Mr. WARNER], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Washington [Mr. ADAMS], the Senator from Indiana [Mr. COATS], the Senator from Tennessee [Mr. GORE], the Senator from Missouri [Mr. DANFORTH], the Senator from New Jersey [Mr. BRADLEY], the Senator from Ohio [Mr. GLENN], the Senator from Iowa [Mr. GRASSLEY], the Senator from Connecticut [Mr. DODD], the Senator from Utah [Mr. HATCH], the Senator from New York [Mr. MOYNIHAN], the Senator from California [Mr. WILSON], the Senator from Michigan [Mr. LEVIN], and the Senator from Connecticut [Mr. LIEBERMAN] were added as cosponsors of Senate Joint Resolution 95, a joint resolution to designate the week of September 10, 1989, through September 16, 1989, as "National Check-Up Week."

SENATE JOINT RESOLUTION 105

At the request of Mr. DOLE, the names of the Senator from Washington [Mr. ADAMS] and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of Senate Joint Resolution 105, a joint resolution to designate October 7 through October 14, 1989, as "National Week of Outreach to the Rural Disabled."

SENATE JOINT RESOLUTION 112

At the request of Mr. GRASSLEY, the names of the Senator from Georgia [Mr. NUNN], the Senator from Michigan [Mr. LEVIN], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Utah [Mr. HATCH], the Senator from West Virginia [Mr. BYRD], the Senator from Wyoming [Mr. SIMPSON], the Senator from Nebraska [Mr. KERREY], the Senator from Alabama [Mr. HEFLIN], and the Senator from Utah [Mr. GARN] were added as cosponsors of Senate Joint Resolution 112, a joint resolution designating May 29, 1989, as the "National Day of Remembrance for the victims of the U.S.S. *Iowa*."

SENATE JOINT RESOLUTION 126

At the request of Mr. PELL, the names of the Senator from North Carolina [Mr. SANFORD], the Senator from Georgia [Mr. FOWLER], the Sena-

tor from South Dakota [Mr. DASCHLE], the Senator from New Mexico [Mr. DOMENICI], the Senator from Alabama [Mr. HEFLIN], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Joint Resolution 126, a joint resolution commemorating the bicentennial of the U.S. Coast Guard.

SENATE JOINT RESOLUTION

At the request of Mr. DOLE, the names of the Senator from Ohio [Mr. GLENN] and the Senator from Nebraska [Mr. EXON] were added as cosponsors of Senate Joint Resolution 129, a joint resolution to provide for the designation of September 15, 1989, as "National POW/MIA Recognition Day."

SENATE JOINT RESOLUTION 130

At the request of Mr. SARBANES, the names of the Senator from Ohio [Mr. GLENN], the Senator from Indiana [Mr. COATS], the Senator from Hawaii [Mr. INOUYE], the Senator from Nebraska [Mr. EXON], the Senator from Vermont [Mr. JEFFORDS], the Senator from New York [Mr. D'AMATO], and the Senator from Connecticut [Mr. DODD] were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week."

SENATE CONCURRENT RESOLUTION 18

At the request of Mr. ROTH, the name of Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of Senate Concurrent Resolution 18, a concurrent resolution expressing the sense of Congress that Federal laws regarding the taxation of State and local government bonds should not be changed in order to increase Federal revenues.

SENATE CONCURRENT RESOLUTION 26

At the request of Mr. HATFIELD, the name of Senator from Maryland [Mr. SARBANES] was added as a cosponsor of Senate Concurrent Resolution 26, a concurrent resolution urging first asylum countries of the Association of Southeast Asia Nations [ASEAN] to reinstate the practice of providing refuge to all asylum-seekers from Vietnam, and for other purposes.

SENATE CONCURRENT RESOLUTION 37

At the request of Mr. HARKIN, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of Senate Concurrent Resolution 37, a concurrent resolution expressing the sense of the Congress that the differential in Medicare payments made to urban and rural hospitals be eliminated.

SENATE RESOLUTION 13

At the request of Mr. DOLE, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of Senate Resolution 13, a resolution to amend Senate Resolution 28 to implement closed caption broadcasting for hearing-impaired individuals of floor proceedings of the Senate.

SENATE RESOLUTION 114

At the request of Mr. GRAHAM, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of Senate Resolution 114, a resolution concerning the restoration of Eastern Airlines.

SENATE RESOLUTION 119

At the request of Mr. WILSON, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Resolution 119, a resolution concerning the 1986 agreement between the United States and Japan regarding the Japanese semiconductor market.

SENATE CONCURRENT RESOLUTION 39—SUBMISSION OF A CONCURRENT RESOLUTION COMMENDING THE "FLYING TIGERS"

Mr. WILSON submitted the following concurrent resolution, which was referred to the Committee on the Judiciary:

S. CON. RES. 39

Whereas the merger of Tiger International with the Federal Express Corporation led to the transfer of the international air cargo routes from Flying Tiger Line, Inc., a subsidiary of Tiger International, to the Federal Express Corporation, will bring to a close one of the most remarkable and distinguished chapters in United States aviation history;

Whereas the pilots of the Flying Tiger Line, Inc., bear a name which represents members of a proud and distinguished group of aviators (properly known as the "Flying Tigers");

Whereas approximately 50 years ago the Flying Tigers initially operated in the jungles of Burma, with the operations of the American volunteer group under the command of General Clair Chennault;

Whereas the tradition of proud and distinguished service by the Flying Tigers to the United States began under the direction of Robert W. Prescott;

Whereas for more than 4 decades such proud and distinguished group of aviators has steadfastly served the specialized air transportation needs of the United States; and

Whereas the Flying Tigers have provided assistance with rescue efforts in Korea, Hungary, Vietnam, Cambodia, and Ethiopia, and have conducted many other humanitarian missions: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress commends the group of pilots that bear the name Flying Tigers, a distinguished group of aviators, for nearly 50 years of valued and competent service to the United States.

Mr. WILSON. Mr. President, along with my colleague from California, Senator CRANSTON, I rise today to introduce a resolution commemorating the proud and distinguished service of the pilots of the Flying Tigers.

This group of pilots, first organized by Gen. Clair Chennault, has provided the American public and people all over the world with continuous service for almost 50 years. Their heroics on behalf of our Armed Forces and humanitarian relief efforts are well documented and merit our recognition.

Mr. President, we all know of the heriocs performed by these courageous pilots in the defense of freedom. What is less known is how 12 members of the famed group of World War II combat pilots, the Flying Tigers, formed what was once a small airline. They were at once pilots, mechanics, and shippers.

In the days following World War II, the pilots of Flying Tigers flew the largest airlift ever performed by a single contractor—the supply of General MacArthur's occupational forces in Japan. Ever since that time, these pilots have given great service to the Armed Forces for cargo and passenger services.

The pilots of Flying Tigers have risked their lives many times on behalf of the world's underprivileged and oppressed. During the 1970's, the airline participated in several mercy charter flights flying supplies to needy Cambodian refugees. On Thanksgiving Day in 1979, history was made when the pilots delivered $1.5 million in food and medical supplies in the first direct mercy flight from the United States to Phnom Penh—4 years after the famed "ricelift" to Cambodia in 1975.

Life saving supplies were also delivered to refugee camps along the Thailand/Cambodian border, and passenger charter flights were commissioned to carry refugees to the United States. In March 1982, the Flying Tigers flew a charter flight into Warsaw, delivering over 40 tons of medical supplies, staple foods, and relief goods—the first airlift of relief supplies to reach Poland since the imposition of martial law the previous November.

Clearly, Mr. President, the pilots of Flying Tigers deserve the recognition of this Congress. They have performed valiantly and with great skill during both war and peace. I urge the Senate to consider this commemorative legislation quickly and to ensure its passage.

SENATE CONCURRENT RESOLUTION 40—DESIGNATING JUNE 21, 1989, AS CHANEY, GOODMAN, AND SCHWERNER DAY

Mr. MITCHELL (for himself, Mr. DOLE, Mr. CRANSTON, and Mr. SIMPSON) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 40

Whereas on June 21, 1964, James Chaney, Andrew Goodman, and Michael Schwerner gave their lives at a young age in an effort to guarantee the rights that are the birthright of every citizen of the United States, particularly the right to vote;

Whereas James Chaney, Andrew Goodman, and Michael Schwerner were part of a

movement that helped to achieve the passage of the Civil Rights Act of 1964, the Voting Rights Act of 1965, and other milestones in the progress of this Nation toward achieving the goal of ensuring equal rights, equal opportunities, and equal justice for all;

Whereas during the quarter century after the deaths of James Chaney, Andrew Goodman, and Michael Schwerner this Nation has benefitted tremendously from the removal of many barriers to full participation by every citizen of this Nation in political, educational, and economic life;

Whereas the lives and resultant deaths of James Chaney, Andrew Goodman, and Michael Schwerner have come to symbolize the dream of brotherhood and sisterhood among citizens of this Nation from all races, religions, and ethnic backgrounds.

Whereas the memory of the struggle of James Chaney, Andrew Goodman, and Michael Schwerner and the sacrifice of such men will encourage all citizens of this Nation, in particular young citizens, to be rededicated to the ideals of justice, equality, citizenship, and community;

Whereas the State of Mississippi and the City of Philadelphia, Mississippi, are joining with citizens from throughout this Nation to commemorate the contributions that James Chaney, Andrew Goodman, and Michael Schwerner made to this Nation; and

Whereas the lifework of James Chaney, Andrew Goodman, and Michael Schwerner remains unfinished until all barriers are removed that bar the full participation of every citizen of this Nation in the democratic process of this Nation, especially in the electoral process, Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) June 21, 1989, is designated as Chaney, Goodman, and Schwerner Day,

(2) it is the sense of the Congress that the Voting Rights Act of 1965 has helped to fulfill the promise of democracy in this Nation, and

(3) the Congress reaffirms the goal of removing remaining barriers to full voter participation in this Nation.

Mr. MITCHELL. Mr. President, not often does the Senate pause to recognize individuals who have made eternal contributions to this country. I am honored to join my colleagues today to commemorate three brave Americans who forsake personal considerations to advance the cause of freedom for all.

Michael Schwerner and Andrew Goodman traveled to unfamiliar Mississippi from the relative comfort of their homes in Pennsylvania to fight injustice leveled at people they have never met. James Chaney, a native of the State, worked with them in hopes of bringing a new reality to people he knew deserved it. They must have known hostility awaited them. They could not have imagined their expressions of support for the right of all citizens, regardless of their color, to participate in American dream would cost them their lives. Surely, they did not know what their ultimate contribution would mean to this country.

Mr. President, these men are symbols of the civil rights movement which remains vigilent—that no individual, no organization—no matter what its philosophical bent—weakens this Republic. As long as we continue to protect the fundamental, inalienable rights of all Americans, we can proudly state that Chaney, Goodman, and Schwerner efforts were triumphant.

Mr. DOLE. Mr. President, I rise today—along with the distinguished majority leader—to introduce a resolution commemorating the 25th anniversary of the deaths of James Chaney, Andrew Goodman, and Michael Schwerner—three young men from very different backgrounds, who gave their lives in the struggle to guarantee voting rights for all Americans. This resolution would honor their memories by declaring June 21, 1989 as Chaney Goodman Schwerner Day.

The deaths of these young men, though tragic, have come to represent one of the great milestones in America's long journey toward racial justice. Obviously, much has been accomplished in the area of civil rights since that fateful day in 1964. And I think that James Chaney, Andrew Goodman, and Michael Schwerner would be proud of America for these accomplishments.

So I think it is entirely appropriate for Congress to honor the memories of these three young men. They have played a large role in bringing the reality of full citizenship to so many Americans, and they have certainly paid a very heavy price.

Finally, I would like to make one small point: The resolution states that Congress reaffirms the goal of removing remaining barriers to full voter participation in this Nation. I agree with this statement. But the statement should not be taken as an implicit endorsement on my part of any of the voter registration bills that have been introduced this session.

Mr. CRANSTON. Mr. President, I am pleased to join with the majority leader, Senator MITCHELL, the minority leader, Senator DOLE, and the Republican whip, Senator SIMPSON, in introducing this resolution to commemorate on June 21, 1989, the deaths 25 years ago of three courageous civil rights workers—James Chaney, Andrew Goodman, and Michael Schwerner.

The brutal murders of these three young Americans drew the Nation's attention to the struggle for racial justice and voting rights. These young men were part of the national movement which led to the passage of the Civil Rights Act of 1964 and the Voting Rights Act of 1965 and helped set our country on the path toward achievement of the goal of equality of rights and opportunities.

Next month, there will be a series of commemorative events in Mississippi, Washington, DC, and New York City, marking the 25th anniversary of their deaths, as part of an effort to help rekindle the idealism and dedication represented by these young men and the thousands of others who contributed so much to our Nation during the civil rights struggles of the 1960's.

I am proud to join in remembering the sacrifice made by these young Americans and their families, so that our Nation could move forward, and in the effort to reaffirm our commitment to the purposes for which they gave their lives.

SENATE RESOLUTION 130—RECOGNIZING THE CONVENING OF THE U.S.S.R. CONGRESS OF PEOPLES' DEPUTIES

Mr. BRADLEY (for himself, Mr. MITCHELL, Mr. DOLE, Mr. CRANSTON, Mr. LUGAR, and Mr. CHAFEE) submitted the following resolution; which was considered and agreed to:

S. RES. 130

Whereas, for the first time in 70 years the Soviet people have had an opportunity to participate in multi-candidate, competitive, secret-ballot voting to elect a 2,250-member Congress of Peoples' Deputies.

Whereas, the Congress of Peoples' Deputies will convene annually to elect from its ranks new members of the 542 seat bicameral Supreme Soviet and may also debate and influence other important issues.

Whereas, the Congress of Peoples' Deputies will also elect the President of the Supreme Soviet.

Whereas, reformers are advocating that the President transfer to the Supreme Soviet important decision-making powers heretofore exercised by the Communist Party.

Whereas, a similar system of legislative organs is also planned for all Union and autonomous republics, and the election of peoples' deputies is scheduled for the end of 1989.

Whereas, the Soviet Union has thereby begun to develop an institutional base with the potential for representing the will of the people more openly, directly, and effectively.

Whereas, on May 25, 1989, deputies from all over the Soviet Union will meet for the first time in Moscow to hold the first session of the newly-elected Congress of Deputies and will elect, a 542-member Supreme Soviet. Now, therefore, be it

Resolved, That the Senate hereby:

(1) welcomes these initial steps toward institutionalizing a democratic process in the USSR, and

(2) expresses its hope that this process will continue to go forward and will ultimately result in a reconstituted Supreme Soviet with access to the information needed to make policy and enact legislation and with the actual power to:

—make laws
—approve and alter budgets
—appoint and change government officials
—oversee security and military services.

SENATE RESOLUTION 131—AMENDING THE STANDING RULES OF THE SENATE TO IMPROVE LEGISLATIVE EFFICIENCY

Mrs. KASSEBAUM submitted the following resolution; which was referred to the Committeee on Rules and Administration:

S. RES. 131

Resolved, That rule XXV of the Standing Rules of the Senate is amended to read as follows:

"STANDING COMMITTEE

1. The following standing committees shall be appointed at the commencement of each Congress, and shall continue and have the power to act until their successors are appointed, with leave to report by bill or otherwise on matters within their respective jurisdictions:

(a)(1) Committee on National Priorities, to which committee shall be referred all concurrent resolutions on the budget (as defined in section 3(a)(4) of the Congressional Budget Act of 1974) and all other matters required to be referred to committee under Titles III and IV of that act, and messages, petitions, memorials, and other matters relating thereto.

(2) Such committee shall have the duty—

(A) to report the matters required to be reported by committee under Title III and IV of the Congressional Budget Act of 1974;

(B) to make continuing studies of the effect on budget outlays of relevant existing and proposed legislation and to report the results of such studies to the Senate on a recurring basis;

(C) to request and evaluate continuing studies of tax expenditures, to devise methods of coordinating tax expenditures, policies, and programs with direct budget outlays, and to report the results of such studies to the Senate on a recurring basis; and

(D) to review on a continuing basis, the conduct by the Congressional Budget Office of its functions and duties.

(b)(1) Committee on Agricultural Policy, to which committee shall be referred all proposed legislation, message, petitions, memorials, and other matters relating primarily to the following subjects:

1. Agricultural economics and research.
2. Agricultural extension services and experiment stations.
3. Agricultural production, marketing, and stabilization of prices.
4. Agriculture and agricultural commodities.
5. Animal industry and diseases.
6. Crop insurance and soil conservation.
7. Farm credit and farm security.
8. Food from fresh waters.
9. Inspection of livestock, meat, and agricultural products.
10. Pests and pesticides.
11. Plant industry, soils, and agricultural engineering.
12. Rural development, rural electrification, and watersheds.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subject specified in paragraph (b)(1), except as provided in subparagraph (a).

(c)(1) Committee on Defense Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Aeronautical and space activities peculiar to or primarily associated with the development of weapons systems or military operations.
2. Common defense.
3. Department of Defense, the Department of the Army, the Department of the Navy, and the Department of the Air Force, generally.
4. Maintenance and operation of the Panama Canal, including administration, sanitation, and government of the Canal Zone.
5. Military research and development.
6. National security aspects of nuclear energy.
7. Naval petroleum reserves, except those in Alaska.
8. Pay, promotion, retirement, and other benefits and privileges of members of the Armed Forces, including overseas education of civilian and military dependents.
9. Selective service system.
10. Strategic and critical materials necessary for the common defense.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (c)(1), except as provided in subparagraph (a).

(d)(1) Committee on Commercial Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Coast Guard.
2. Coastal zone management.
3. Communications.
4. Construction and maintenance of highways, and highway safety.
5. Inland waterways, except construction.
6. Interstate commerce.
7. Marine and ocean navigation, safety, and transportation, including navigational aspects of deepwater ports.
8. Marine fisheries.
9. Merchant marine and navigation.
10. Nonmilitary aeronautical and space sciences.
11. Oceans, weather, and atmospheric activities.
12. Regulation of consumer products and services, including testing related to toxic substances, other than pesticides.
13. Regulation of interstate common carriers, including railroads, buses, trucks, vessels, pipelines, and civil aviation.
14. Science, engineering, and technology research and development and policy.
15. Sports.
16. Standards and measurement.
17. Transportation.
18. Transportation and commerce aspects of Outer Continental Shelf lands.
19. Regional economic development.
20. Financial aid to commerce and industry.
21. Public works, bridges, and dams.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (d)(1), except as provided in subparagraph (a).

(e)(1) Committee on Economic Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Bonded debt of the United States, except as provided in the Congressional Budget Act of 1974.
2. Deposits of public moneys.
3. Revenue measures generally, except as provided in the Congressional Budget Act of 1974.
4. Revenue measures relating to the insular possessions.
5. Banks, banking, and financial institutions.
6. Deposit insurance.
7. Federal monetary policy, including the Federal Reserve System.
8. Issuance and redemption of notes.
9. Money and credit, including currency and coinage.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (e)(1), except as provided in subparagraph (a).

(f)(1) Committee on Energy Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Coal production, distribution, and utilization.
2. Energy policy.
3. Energy regulation and conservation.
4. Energy-related aspects of deepwater ports.
5. Energy research and development.
6. Extraction of minerals from oceans and Outer Continental Shelf lands.
7. Hydroelectric electric power, irrigation, and reclamation.
8. Mining education and research.
9. Mining, mineral lands, mining claims, and mineral conservation.
10. Naval petroleum reserves in Alaska.
11. Nonmilitary development of nuclear energy.
12. Oil and gas production and distribution.
13. Solar energy systems.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (f)(1), except as provided in subparagraph (a).

(g)(1) Committee on Environmental Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Air pollution.
2. Environmental aspects of Outer Continental Shelf lands.
3. Environmental effects of toxic subtances, other than pesticides.
4. Environmental policy.
5. Environmental research and development.
6. Fisheries and wildlife.
7. Flood control and improvements of rivers and harbors, including environmental aspects of deepwater ports.
8. Noise pollution.

9. Nonmilitary environmental regulation and control of nuclear energy.
10. Ocean dumping.
11. Solid waste disposal and recycling.
12. Water pollution.
13. Water resources.
14. Forestry, and forest reserves and wilderness areas.
15. National parks, recreation areas, wild and scenic rivers, historical sites, military parks and battlefields, and on the public domain, preservation of prehistoric ruins and objects of interest.
16. Public lands and forests, including farming and grazing thereon, and mineral extraction therefrom.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (g)(1), except as provided in subparagraph (a).

(h)(1) Committee on Foreign Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Acquisition of land and buildings for embassies and legations in foreign countries.
2. Boundaries of the United States.
3. Diplomatic service.
4. Foreign economic, military, technical, and humanitarian assistance.
5. Foreign loans.
6. International activities of the American Red Cross and the International Committee of the Red Cross.
7. International aspects of nuclear energy, including nuclear transfer policy.
8. International conferences and congresses.
9. International law as it relates to foreign policy.
10. International Monetary Fund and other international organizations established primarily for international monetary purposes.
11. Intervention abroad and declarations of war.
12. Measures to foster commercial intercourse with foreign nations and to safeguard American business interests abroad.
13. Trusteeships of the United States, including territorial possessions of the United States.
14. Oceans and international environmental and scientific affairs as they relate to foreign policy.
15. Protection of United States citizens abroad and expatriation.
16. Relations of the United States with foreign nations generally.
17. Treaties and executive agreements.
18. United Nations and its affiliated organizations.
19. World Bank group, the regional development banks, and other international organizations established primarily for development assistance programs.
20. Foreign trade promotion, export, and export controls.
21. Interoceanic canals generally, unless otherwise provided.
22. Customs and ports of entry and delivery.
23. Reciprocal trade agreements.
24. Tariffs and import quotas, and matters related thereto.
25. Organization and management of United States nuclear export policy.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (h)(1), except as provided in subparagraph (a).

(i)(1) Committee on Governmental Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Archives of the United States.
2. Budget and accounting measures, except as provided in the Congressional Budget Act of 1974.
3. Census and collection of statistics, including economic and social statistics.
4. Congressional organizations, except for any part of the matter that amends the rules of order of the Senate.
5. Federal Civil Service.
6. Government information.
7. Intergovernmental relations.
8. Municipal affairs of the District of Columbia.
9. Organization and reorganization of the executive branch of the government.
10. Postal Service.
11. Status of officers of the United States, including their classification, compensation, and benefits.
12. Renegotiation of governmental contracts.
13. Public buildings and improved grounds of the United States generally, including federal buildings in the District of Columbia.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (i)(1), except as provided in subparagraph (a).

(j)(1) Committee on Judicial Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Apportionment of Representatives.
2. Bankruptcy, mutiny, espionage, and counterfeiting.
3. Civil liberties.
4. Constitutional amendments.
5. Federal courts and judges.
6. Holidays and celebrations.
7. Immigration and naturalization.
8. Interstate compacts generally.
9. Judicial proceedings, civil and criminal, generally.
10. Local courts in the territories and possessions.
11. Measures relating to claims against the United States.
12. National penitentiaries.
13. Patent Office.
14. Patents, copyrights, and trademarks.
15. Protection of trade and commerce against unlawful restraints and monopolies.
16. Revisions and codification of the statutes of the United States.
17. State and territorial boundary lines.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (j)(1), except as provided in subparagraph (a).

(k)(1) Committee on Social Policy, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Measures relating to education, labor, health, and public welfare.
2. Arts and humanities.
3. Biomedical research and development.
4. Child labor.
5. Domestic activities of the American Red Cross.
6. Equal employment opportunity.
7. Gallaudet College, Howard University, and Saint Elizabeths Hospital.
8. Handicapped individuals.
9. Labor standards.
10. Mediation and arbitration of labor disputes.
11. Occupational safety and health, including the welfare of miners.
12. Private pension plans.
13. Public health.
14. Railroad retirement program.
15. Regulation of foreign laborers.
16. Student loans.
17. Wages and hours of labor.
18. Food stamp programs.
19. Human nutrition.
20. School nutrition programs.
21. Public housing.
22. Nursing homes including construction.
23. National social security.
24. Public health programs, including health programs under the Social Security Act.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (k)(1), except as provided in subparagraph (a).

(l)(1) Committee on Native American Programs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to Native Americans generally, and Native American Programs.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (l)(1), except as provided in subparagraph (a).

(m)(1) Committee on Senior American Programs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to Senior Americans generally, and to the Older Americans Act.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (m)(1), except as provided in subparagraph (a).

(n)(1) Committee on Veteran American Programs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Compensation of veterans.
2. Life insurance issued by the government on account of service in the Armed Forces.

3. National cemeteries.
4. Pensions of all wars of the United States, general and special.
5. Readjustment of servicemen to civil life.
6. Soldiers and sailors civil relief.
7. Veterans' hospitals, medical care and treatment of veterans.
8. Veterans' measures generally.
9. Vocational rehabiltation and education of veterans.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, or revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (n)(1), except as provided in subparagraph (a).

(o)(1) Committee on Entrepreneurial American Programs, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating to the Small Business Administration.

(2) Any proposed legislation reported by such committee which relates to matters other than the functions of the Small Business Administration shall, at the request of any standing committee having jurisdiction over the subject matter extraneous to the functions of the Small Business Administration, be considered and reported by such standing committee prior to its consideration by the Senate; and likewise measures reported by other committees directly relating to the Small Business Administration shall, at the request of the Committee on Entrepreneurial American Programs for its consideration of any portions of the measure dealing with the Small Business Administration, be considered and reported by this committee prior to its consideration by the Senate.

(3) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriation, or revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraphs (o)(1) and (o)(2), except as provided in subparagraph (a).

(p)(1) Committee on Senate Rules, to which committee shall be referred all proposed legislation, messages, petitions, memorials, and other matters relating primarily to the following subjects:

1. Administration of the Senate office buildings and the Senate wing of the Capitol, including the assignment of office space.
2. Congressional organization relative to rules and procedures, and Senate rules and regulations, including floor and gallery rules.
3. Corrupt practices.
4. Credentials and qualifications of members of the Senate, contested elections, and acceptance of incompatible offices.
5. Federal elections generally, including the election of the President, Vice President, and members of Congress.
6. Government Printing Office, and the printing and correction of the *Congressional Record*, as well as those matters provided under rule XI.
7. Meetings of the Congress and attendance of the members.
8. Payment of money out of the contingent fund of the Senate or creating a charge upon the same (except that any resolution relating to substantive matter within the jurisdiction of any other standing committee of the Senate shall first be referred to such committee).
9. Presidential succession.
10. Purchase of books and manuscripts and erection of monuments to the memory of individuals.
11. Senate Library and statutory, art, and pictures in the Capitol and Senate office buildings.
12. Services to the Senate, including the Senate restaurant.
13. United States Capitol and congressional office buildings, the Library of Congress, the Smithsonian Institution (and the incorporation of similar institutions), and the Botanic Gardens.

(2) There shall also be referred to such committee all proposed legislation, messages, petitions, memorials, and other matters relating to the appropriation, or to the rescission of the appropriations, of revenue for the support of government programs, projects, or activities relating primarily to the subjects specified in paragraph (p)(1), except as provided in subparagraph (a).

2. (a) Except as otherwise provided by paragraph 4 of this rule, the Leadership Committee, known as the Committee on National Priorities, shall consist of not less than 28 senators nor more than 33 senators.

(b) Except as otherwise provided by paragraph 4 of this rule, each of the following standing committees shall consist of not more than the number of senators set forth in the following table on the line on which the name of that committee appears:

Legislative policy committees

Committee:	Members
Agricultural Policy	17
Defense Policy	17
Commercial Policy	17
Economic Policy	17
Energy Policy	17
Environmental Policy	17
Foreign Policy	17
Governmental Policy	17
Judicial Policy	17
Social Policy	17

(c) Except as otherwise provided by paragraph 4 of this rule, each of the following standing committees shall consist of not more than the number of senators set forth in the following table on the line on which the name of that committee appears:

Legislative program committees

Committee:	Members
Native American Programs	9
Veteran American Programs	11
Senior American Programs	19
Entrepreneurial American Programs	19

(d) Except as otherwise provided by paragraph 4 of this rule, each of the following committees and standing committees shall consist of the number of senators set forth in the following table on the line on which the name of that committee appears:

Administrative committees

Committee:	Members
Senate Rules	15
Senate Ethics	6
Senate Intelligence	15

3. (a) Notwithstanding the provisions of paragraph 4, and except as otherwise provided by this paragraph—

(1) each senator shall serve on no more than two committees listed in subparagraph 2(b).

(2) each senator serving as either a chairman or a ranking member on any committee listed in subparagraph 2(b) shall not serve on any other committee listed in subparagraph 2(b) but shall serve on the committee listed in subparagraph 2(a).

(3) each senator serving as either a chairman or a ranking member of any committee listed in subparagraph 2(c) shall also serve on the committee listed in subparagraph 2(a).

(4) in addition to those senators serving on the committee listed in subparagraph 2(a) by virtue of their serving as chairman or ranking member of a committee listed in subparagraph 2(b), not more than 5 senators shall be appointed by the majority leader of the senate to serve on the committee listed in subparagraph 2(a) for the purpose of making the overall balance of majority and minority members on the committee the same as the relative balance between the majority and minority members of the Senate.

(5) service by a senator on any committee listed in subparagraph 2(c) shall not limit the ability of such senator to serve on any other committee or standing committee.

(b) By agreement entered into by the majority leader and the minority leader, the membership of one or more standing committees may be increased temporarily from time to time by such number or numbers as may be required to accord to the majority party a majority of the membership of all standing committees. Members of the majority party in such numbers as may be required for that purpose may serve as members of three standing committees listed in subparagraph 2(b). No such temporary increase in the membership of any standing committee under this subparagraph shall be continued in effect after the need therefore has ended. No standing committee may be increased in membership under this subparagraph by more than two members in excess of the number prescribed for that committee by paragraph 2(b).

(c) No senator shall serve at any one time as chairman of more than one subcommittee of each standing committee of the Senate.

4. Notwithstanding any provision of rule XXIV of the standing rules of the Senate, the appointment of committees or standing committees as prescribed by this title shall be on this basis of each senator's continuous service in the senate, except that such appointment shall be in accordance with the following limitations:

(a) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Agriculture, Nutrition, and Forestry or who were serving on the Subcommittee on Agriculture, Rural Development, and Related Agencies of the Committee on Appropriations may serve on the Committee on Agricultural Policy.

(b) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Armed Services or who were serving on the Subcommittee on Defense or the Subcommittee on Military Construction of the Committee on Appropriations may serve on the Committee on Defense Policy.

(c) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Commerce, Science, and Transportation or who were serving on the Subcommittee on Transportation and Related Agencies of the Committee on Appropriations may serve on the Committee on Commercial Policy.

(d) Only those senators who on the day preceding the effective date of this title

were serving as members of the Committee on Finance or the Committee on Banking, Housing and Urban Affairs may serve on the Committee on Economic Policy.

(e) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Energy and Natural Resources or who were serving on the Subcommittee on Energy and Water Development of the Committee on Appropriations, may serve on the Committee on Energy Policy.

(f) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Environment and Public Works or who were serving on the Subcommittee on Interior and Related Agencies of the Committee on Appropriations may serve on the Committee on Environmental Policy.

(g) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Foreign Relations or who were serving on the Subcommittee on Foreign Operations of the Committee on Appropriations may serve on the Committee on Foreign Policy.

(h) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Governmental Affairs or who were serving on the Subcommittee on Treasury, Postal Service, and General Government or the Subcommittee on District of Columbia or on the Subcommittee on HUD-Independent Agencies of the Committee on Appropriations may serve on the Committee on Governmental Policy.

(i) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on the Judiciary or who were serving on the Subcommittee on Commerce, Justice, State, the Judiciary, and Related Agencies of the Committee on Appropriations may serve on the Committee on Judicial Policy.

(j) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Labor and Human Resources or who were serving on the Subcommittee on Labor, Health and Human Services, Education, and Related Agencies of the Committee on Appropriations, may serve on the Committee on Social Policy.

(k) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Rules and Administration or who were serving on the Subcommittee on Legislative Branch of the Committee on Appropriations may serve on the Committee on Senate Policy.

(l) Only those senators who on the day preceding the effective date of this title were serving as members of the Select Committee on Indian Affairs may serve on the Committee on Native American Programs.

(m) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Veterans Affairs may serve on the Committee on Veteran Programs.

(n) Only those senators who on the day preceding the effective date of this title were serving as members of the Special Committee on Aging may serve on the Committee on Senior American Programs.

(o) Only those senators who on the day preceding the effective date of this title were serving as members of the Committee on Small Business may serve on the Committee on Senior American Programs.

5. Upon the effective date of this title, the Select Committee on Ethics shall become the Committee on Senate Ethics, and the Select Committee on Intelligence shall become the Committee on Intelligence Oversight. However, the membership, functions, and duties of such committees shall remain unchanged.

Sec. 2. Paragraphs 1, 2, 3, 4, 6, and 7 of rule XVI of the Standing Rules of the Senate are repealed, and paragraphs 5 and 8 are renumbered as paragraphs "1" and "2," respectively.

Sec. 3. Subparagraph (b) of paragraph 4 of Rule XVII of the Standing Rules of the Senate is amended by striking out "(except the Committee on Appropriations)".

Sec. 4. Rule XXVI of the Standing Rules of the Senate is amended—

(a) by striking out "(except the Committee on Appropriations)" in each instance where it appears.

(b) by striking out "(except the Committee on Appropriations and the Committee on the Budget)" in each instance where it appears, and inserting in lieu thereof the following "(except the Committee on National Priorities)",

(c) by striking out "the prohibition contained in the preceding sentence shall not apply to the Committee on Appropriations or the Committee on the Budget," in subparagraph 5(a) and inserting in lieu thereof "The prohibition contained in the preceding sentence shall not apply to the Committee on National Priorities.",

(d) by striking out the last sentence of subparagraph 10(b), and

(e) by striking out "(except those by the Committee on Appropriation)" in subparagraph 11(b).

Sec. 5. The provisions of this resolution shall take effect on the first day of the first Congress following the date of enactment.

Mrs. KASSEBAUM. Mr. President, today, I am joining with Mr. INOUYE, Mr. DASCHLE, Mr. DODD, Mr. LUGAR, and Mr. MCCAIN in resubmitting legislation identical to Senate Resolution 260, which was submitted in the 100th Congress on the subject of congressional reform.

I believe comprehensive reform is vital to the effective deliberations of this body. Included in such reform, although outside of the scope of the measure I am submitting today, must be an overhaul of the congressional budget process, including a 2-year congressional budget cycle of the type advocated in past legislation sponsored by the Senator from Kentucky [Mr. FORD], and the Senator from Delaware [Mr. ROTH]. I am pleased to be a cosponsor of the Ford-Roth bill this Congress, as I was in the past Congress. I believe the reforms they advocate, in combination with the reforms of the Kassebaum-Inouye resolution, are long overdue.

Much has been written lately about the level of discontent around this body. The bulk of that commentary has focused on the so-called "quality of life" issue. While I agree that quality of life is important, I believe there are much more basic and compelling reasons why reform is imperative.

If Congress hopes to function effectively as a coequal branch of Government, institutional reform is a necessity. Unlike the executive branch, which acts on the authority of the President, Congress can only act through consensus. Finding consensus among 535 people is never an easy undertaking. The process used to achieve consensus should not make the task more difficult.

The Senate must, of course, have rules and procedures. Without structure, orderly deliberations would be impossible. However, if those rules ignore the need for efficient action, the Senate will be largely limited to a role of reacting to administration policy initiatives rather than fulfilling our constitutional obligation, which is setting policy. That is the primary reason why I believe reform is not only necessary but imperative.

The task is not impossible. Given a workable legislative format, 100 Senators can participate in making policy. I would suggest, however, that there is no conceivable format under which 100 Senators can lead in making policy. Unfortunately, I believe that is exactly what we are trying to achieve under existing rules and procedures.

All of us may have been created equal, but all U.S. Senators cannot hold equal power. We elect leaders—majority and minority leaders, committee chairmen, and ranking members—but some of us don't want to let them lead.

Mr. President, I realize the Senate has a long tradition of affording procedural protections to all Members. That practice, perhaps more than any other, serves to distinguish the Senate from other legislative bodies. As a member of a minority party, I fully appreciate the importance of such protections. I would suggest, however, that there is a distinction between accommodating divergent views and accommodating dilatory intent.

In "pre-Watergate reform days," when this balance was lost, the Senate—tradition notwithstanding—usually acted to assert itself on the side of legislative efficiency. Even the most sacred of traditional Senate protections—the filibuster—was modified in the name of efficiency in 1975, when the vote required to invoke cloture was reduced from two-thirds to three-fifths.

Today, we face a legislative crisis much more serious than the one that precipitated the modification of cloture. Put simply, Congress is losing its ability to make policy. That failure does not mean that Government policymaking will cease. As long as we have an executive branch we will have national policies. The Pentagon, for example, is fully capable of formulating and implementing national defense policy. Our failure to act simply means Congress will neither prescribe nor

oversee Government policies. That, I suggest, has begun to happen.

It is vital that Congress begin reasserting its constitutional prerogatives in the area of policy formulation and oversight. That, I believe, can only happen if we are willing to modify our framework of procedures and practices to increase the efficiency of the deliberative process. It is in the hope of furthering that objective that we are introducing this legislation.

Our measure attempts to improve legislative efficiency by, first, vesting responsibility for setting policy priorities with a leadership committee. Those who serve as chairmen and ranking members of legislative committees will serve on the Leadership Committee. They will assume the duties and functions currently performed by the Budget Committee.

The Budget Committee, by virtue of the fact that it produces and enforces the congressional budget resolution, has de facto control over setting policy priorities for the Senate. This task is the proper province of the Senate leadership. For that reason we have eliminated the Budget Committee and vested its duties with the Leadership Committee.

Second, under the Kassebaum-Inouye resolution, the responsibilities for authorizations and appropriations are consolidated under individual legislative committees. Authorizing legislation would be reported to the floor with appropriations language included. The need for repetitious debate would be greatly reduced. This would not only speed up the legislative process, it would also reduce opportunities for narrow, special interest amendments which tie up floor action.

Third, the measure resturctures committee jurisdictions. Standing committees are reorganized so that they cover, to the greatest extent possible, a single, broad policy area. This restructuring uses existing committee jurisdictions as a starting point and attempts to protect the central core of existing committee jurisdictions from reshuffling.

For a committee like Armed Services, committee jurisdiction would remain virtually unchanged. For other committees, like Finance, for example, the restructuring would be much more dramatic.

The Finance Committee would become the Committee on Economic Policy. It would be responsible for all areas of revenue and bonded debt which are now under Finance jurisdiction, as well as all areas relating to banking, monetary policy, coinage, and the Federal Reserve, which are currently under the Banking Committee. Finance would lose jurisdiction over Social Security, Medicare, and Medicaid, which would be transferred to the Committee on Social Policy—the reconstituted version of the Labor and Human Resources Committee.

Significant bipartisan support for structural changes of this general nature has been expressed by Members of the Senate for a number of years. For example, in testimony before the Quayle Commission, Senator HATFIELD said he felt the Budget Committee should be composed of the chairmen of the authorizing committees.

Senator STEVENS, also addressing the Quayle Commission, voiced support for combining the budget and appropriations process as well as the authorizing and appropriating processes.

Consolidation was also supported by Senator NUNN in the form of a combined Budget/Appropriations Committee with enhanced authority to enforce committee decisions once sanctioned by the Senate. Howard Baker indicated that, although he no longer favored eliminating authorizing committees and assigning their duties to a "super appropriations committee," he had considered the possibility of providing for authorizations and appropriations in the same bill.

While I would not propose to suggest that all those who voiced opinions about the need for procedural reform would support the Kassebaum-Inouye approach, I believe they would find much to recommend it. Our proposal follows the suggested general direction of their recommendations. In doing so, it recognizes what I believe was strongly alluded to in much of their testimony: that congressional efficiency cannot be significantly improved without an increase in the centralization of power in Congress.

Enactment of the reforms we are proposing would provide Congress with an opportunity to regain a prominent position in the formulation of national policy. It would also provide a real opportunity for making the fiscal policy deliberations of the 101st Congress a meaningful exercise. We could, once again, actually make decisions of substance on the floor of the Senate.

Mr. President, I ask unanimous consent that a brief description of the provisions of the Kassebaum-Inouye resolution appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATE COMMITTEE AND PROCEDURAL REFORM

PURPOSE

To revise Senate committee structure to increase the influence of the leadership of standing committees in setting overall national priorities and to consolidate authorizing and appropriating responsibilities within individual legislative committees.

Restructured Legislative Committees, known as Policy Committees and Program Committees, will be responsible for implementing policy priorities, as determined by a Leadership Committee, through legislative authorizations and appropriations for programs, projects, and activities within their jurisdiction.

LEADERSHIP COMMITTEE

The Committee on National Priorities

The Committee on National Priorities will establish overall policy direction for the Senate by setting spending priorities for Legislative Committees through its jurisdiction over the Budget Act and its responsibility for reporting and enforcing annual budget resolutions.

Those who chair or serve as ranking members of Legislative Committees will serve on the Committee on National Priorities and will, therefore, have direct influence over formulation of policy priorities and spending levels for the Senate legislative agenda. Broad policy decisions will flow from the leadership level to the legislative level where such decisions will be transformed into legislative programs.

LEGISLATIVE COMMITTEES

Legislative Committees would be of two types: Legislative Policy Committees and Legislative Program Committees.

LEGISLATIVE POLICY COMMITTEES

Legislative Policy Committees will have legislative, oversight, and appropriations responsibilities for substantive areas of national policy and for national programs of importance to the Senate. These committees will perform both the authorization and appropriation functions for programs within their jurisdiction. Their exercise of the appropriation function, however, must conform to the national policy decisions of the Leadership Committee. Legislative Policy Committees are:

Committee on Agricultural Policy

The jurisdiction of the Committee on Agricultural Policy would include all existing responsibilities of the Committee on Agriculture, except those relating to nutrition and forest lands.

Those eligible for membership on the committee would include current members of the Committee on Agriculture and current members of the Subcommittee on Agriculture, Rural Development, and Related Agencies of the Committee on Appropriations.

Committee on Commercial Policy

The jurisdiction of the Committee on Commercial Policy would include all existing responsibilities of the Committee on Commerce, Science, and Transportation except those relating to interoceanic canals generally, plus responsibility for highway programs and for regional economic development.

Those eligible for membership on the committee would include current members of the Committee on Commerce, Science, and Transportation and the Subcommittee on Transportation and Related Agencies of the Committee on Appropriations.

Committee on Defense Policy

The jurisdiction of the Committee on Defense Policy would include all existing responsibilities of the Committee on Armed Services.

Those eligible for membership on the committee would include current members of the Committee on Armed Services and the Subcommittees on Defense and on Military Construction of the Committee on Appropriations.

Committee on Economic Policy

The jurisdiction of the Committee on Economic Policy would include all areas relat-

ing to revenue and bonded debt currently under the jurisdiction of the Committee on Finance and all areas relating to banking, monetary policy, coinage, and the Federal Reserve currently under the jurisdiction of the Committee on Banking, Housing, and Urban Affairs.

Those eligible for membership on the committee would include current members of the Committee on Finance, the Committee on Banking, Housing, and Urban Affairs, and the Committee on the Budget.

Committee on Energy Policy

The jurisdiction of the Committee on Energy Policy would include all current responsibilities of the Committee on Energy and Natural Resources except those relating to national parks, wilderness lands, historical lands in general, public lands, and territorial possessions of the United States.

Those eligible for membership on the committee would include current members of the Committee on Energy and Natural Resources and the Subcommittee on Energy and Water Development of the Committee on Appropriations.

Committee on Environmental Policy

The jurisdiction of the Committee on Environmental Policy would include current Committtee on the Environment areas of jurisdiction except those relating to highways, public buildings, public works, and regional economic development. In addition, the committee would have responsibility for forest lands, public lands, national parks and historical and scenic areas.

Those eligible for membership on the committee would include current members of the Committee on the Environment and the Subcommittee on Interior and Related Agencies of the Committee on Appropriations.

Committee on Foreign Policy

The jurisdiction of the Committee on Foreign Policy would include all current areas of responsibility of the Committee on Foreign Relations plus responsibility for foreign trade, including reciprocal trade agreements, export promotion and export controls, interoceanic canals, territorial possessions and trusteeships of the United States, and U.S. nuclear export policy.

Those eligible for membership on the committee would include current members of the Committee on Foreign Relations and the Subcommittee on Foreign Operations of the Committee on Appropriations.

Committee on Governmental Policy

The jurisdiction of the Committee on Governmental Policy would include all areas currently under the jurisdiction of the Committee on Governmental Affairs, plus responsibility for renegotiation of government contracts, public buildings, and improved grounds of the United States.

Those eligible for membership on the committee would include current members of the Committee on Governmental Affairs, plus members of the Subcommittee on Treasury, Postal Service, and General Government of the Committee on Appropriations.

Committee on Judicial Policy

The jurisdiction of the Committee on Judicial Policy would include all current responsibilities of the Committee on the Judiciary.

Those eligible for membership on the committee would include current members of the Committee on the Judiciary and the Subcommittee on Commerce, State, Justice, and Related Agencies of the Committee on Appropriations.

Committee on Social Policy

The jurisdiction of the Committee on Social Policy would include all current responsibilities of the Committee on Labor and Human Resources except the discretionary spending programs under the Older Americans Act, plus responsibility for nutrition programs generally, including school nutrition and food stamp programs, public and private housing, social security and railroad retirement, and health programs under the Social Security Act.

Those eligible for membership on the committee would include current members of the Committee on Labor and Human Resources and the Subcommittee on Labor, Health and Human Services, Education, and Related Agencies of the Committee on Appropriations.

LEGISLATIVE PROGRAM COMMITTEES

Legislative Program Committees will have legislative, oversight, and appropriations responsibilities for specific program areas of national concern. These committees will perform both the authorization and appropriations functions for programs within their jurisdiction. Their exercise of the appropriation function, however, must conform to the national program decisions of the Leadership Committee. Legislative Program Committees are:

Committee on Native American Programs

The jurisdiction of the Committee on Native American Programs would include all existing responsibilities of the Select Committee on Indian Affairs. The committee would become a standing committee.

The membership on the committee would be composed of all current members of the Select Committee on Indian Affairs.

Committee on Veteran American Programs

The jurisdiction of the Committee on Veteran American Programs would include all existing responsibilities of the Committee on Veterans Affairs.

The membership of the committee would be composed of all current members of the Committee on Veterans Affairs.

Committee on Senior American Programs

The jurisdiction of the Committee on Senior American Programs would include all existing responsibilities of the Special Committee on Aging, plus legislative responsibility for all discretionary spending programs under the Older Americans Act. The committee would become a standing committee.

The membership of the committee would be composed of all current members of the Special Committee on Aging.

Committee on Entrepreneurial American Programs

The jurisdiction of the Committee on Entrepreneurial American Programs would include all existing responsibilities of the Committee on Small Business.

The membership of the committee would be composed of all current members of the Committee on Small Business.

ADMINISTRATIVE COMMITTEES

Administrative Committees have basically nonlegislative functions. The chairman and ranking members of administrative committees would not serve on the leadership committee—unless such service should happen to be as an at-large member.

Committee on Senate Rules

Serves the same function as the Committee on Rules and Administration, with members drawn from that committee.

Committee on Senate Ethics

Serves the same function as the Committee on Ethics, with members drawn from that committee.

Committee on Intelligence

Serves the same function as the Committee on Intelligence, with members drawn from that committee.

COMMITTEE CHAIRMEN

Chairman and ranking-member status would be based on seniority, as would the integration of the entire membership of each new committee. Those selected to chair legislative committees would, consistent with provisions of the rules of the Senate allowing for election of committee chairmen, be the senior-ranking chairman and ranking members of the merged committees and subcommittees forming each new committee.

COMMITTEE ASSIGNMENTS

Leadership Committee

All chairmen and ranking members of legislative policy committees and legislative program committees would automatically be accorded membership on the leadership committee. In addition, a specified number of members of the Senate at large will be appointed to the committee to bring party balance on the committee to correspond with party balance in the Senate.

Legislative Policy Committees

Committee assignments would be based on prior committee service with members allowed to select the committees on which they desire to serve, subject to the limitations below and to the maximum committee membership limitation (17 members for each legislative policy committee).

Legislative Program Committees

Committee assignments would be based on prior committee service with the membership of predecessor committees transferring in total to each new legislative program committee.

Administrative Committees

Committee assignments would be based on prior committee service with the membership of predecessor committees transferring in total to each new legislative program committee.

COMMITTEE MEMBERSHIP LIMITATIONS

Members could serve on no more than two legislative policy committees. Service on either a legislative program committee or an administrative committee would not limit a member's ability to serve on any other committee.

Any member who either chairs or serves as the ranking member of a legislative policy committee will not serve on another legislative policy committee, although they may serve on legislative program committees or administrative committees without restriction.

SENATE RESOLUTION 132—RELATING TO LOANS AND CREDIT TO THE SOVIET BLOC

Mr. SYMMS (for himself and Mr. DECONCINI) submitted the following resolution; which was considered and agreed to:

S. RES. 132

Resolved, that it is the sense of the Senate that during the NATO Summit to be held in Brussels, May 29-30, 1989, and the Economic Summit to be held in Paris, July 14-16 1989, the President of the United States should consult with the leaders of allied countries on the potentially adverse impact on Western Security of tied and untied loans, trade credits, direct investments, joint ventures, lines of credit, and guarantees or other subsidies to the Soviet Union, Warsaw Pact countries, Cuba, Vietnam, Libya, and Nicaragua.

SENATE RESOLUTION 133—PROVIDING FOR A POINT OF ORDER AGAINST UNCONSTITUTIONAL PROVISIONS OF A CONFERENCE REPORT

Mr. STEVENS (for himself, Mr. DOLE, Mr. HATCH, Mr. HEFLIN, Mr. LOTT, Mr. LUGAR, Mr. MURKOWSKI, and Mr. SANFORD) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 133

Resolved, That rule XXVIII of the Standing Rules of the Senate is amended by adding at the end thereof the following:

"7. (a) When the Senate is considering any conference report, upon a point of order being made by any Senator that a specified provision of the conference report is unconstitutional, the Presiding Officer shall submit the question to the Senate for decision. Any such point of order shall be debatable for not more than ten hours. If any such point of order is sustained, the specified provision contained in such conference report, against which such point of order was made, shall be deemed stricken.

"(b) If any such provision has been stricken pursuant to subparagraph (a), after final disposition of all points of order under subparagraph (a), the question then pending before the Senate shall be whether the Senate shall recede from its amendment and concur with a further amendment, or concur in the House amendment with a further amendment, as the case may be, which further amendment shall consist of only that portion of the conference report, not stricken pursuant to subparagraph (a). Any such motion in the Senate shall be debatable for not more than two hours. In any case in which a point of order under subparagraph (a) is sustained against a conference report, no amendment or motion to recommit shall be in order with respect to the Senate amendment derived from such conference report by operation of this paragraph.".

Mr. STEVENS. Mr. President, I am today submitting a resolution amending the Standing Rules of the Senate to enable the deletion of unconstitutional provisions from conference reports. I am joined by Senators DOLE, HATCH, HEFLIN, LOTT, LUGAR, MURKOWSKI, and SANFORD. The resoluton is identical to Senate Resolution 500, which I first introduced on October 17, 1988.

Under our current rules, when a Senator raises a constitutional point of order against a conference report, if the Senate sustains the point of order, the entire conference report falls. When voting on such points of order, Senators are therefore faced with the dilemma of weighing the merits of the constitutional issue against the possibility that if the conference report falls, the legislation will be dead for the remainder of that Congress.

Our standing rules should allow Senators a mechanism for striking unconstitutional provisions from conference reports. There should be an opportunity at every stage of our legislative process to raise objections to provisions which we believe violate the Constitution. This is especially important because conference reports often contain provisions which have not been considered by the Senate at any earlier stage of the legislative process.

Moreover, the Senate should not have to resort to reintroducing a measure in order to strike unconstitutional provisions from a conference report. This can be difficult, especially at the end of a Congress, when time is short and unanimous consent is difficult to obtain.

The resolution I am introducing would afford Senators an opportunity to challenge the constitutionality of specific provisions contained in a conference report. It provides that when the Senate is considering any conference report, upon a point of order being made by any Senator that a specified provision of the conference is unconstitutional, the Presiding Officer shall submit the question to the Senate. If the point of order is sustained by the Senate, the specified provision contained in the conference report is automatically stricken. The remaining provisions of the conference report would then be considered to be a Senate amendment, and upon the Senate's approval, would be sent to the House for their concurrence.

Mr. President, we have no higher responsibility in this Senate than maintaining the integrity of the Constitution—even if it means altering a conference report. Moreover, the procedure I have drafted has precedents both in the Senate and the House of Representatives.

In the Senate, we have Senate Resolution 509 (99th Cong.), known by many as the "Byrd Rule," which provides that during consideration of a budget reconciliation conference report, a point of order may be raised against matter which is extraneous to the conference report. Under that procedure, if the Presiding Officer sustains the point of order, the extraneous matter is automatically stricken.

In the House, rule 28 permits Representatives to raise a point of order that matter in a conference report is nongermane. If the Chair sustains the point of order, the House may then vote to reject the nongermane matter, and send the remaining provisions back to the Senate, as a House amendment.

This resolution makes sense from a constitutional perspective, as a matter of congressional precedent, and as a sensible addition to our legislative procedures.

SENATE RESOLUTION 134—ORIGINAL RESOLUTION REPORTED AUTHORIZING THE PRINTING OF A COLLECTION OF THE RULES OF THE COMMITTEES OF THE SENATE

Mr. FORD, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 134

Resolved, That a collection of the rules of the committees of the Senate, together with related materials, be printed as a Senate document, and that there be printed six hundred additional copies of such document for the use of the Committee on Rules and Administration.

SENATE RESOLUTION 135—ORIGINAL RESOLUTION REPORTED CLARIFYING PREVIOUS RESOLUTION RELATING TO DISPLAY OF THE FLAG BY OFFICERS AND COMMITTEES OF THE SENATE

Mr. FORD, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 135

Resolved, That section 2 of Senate Resolution 369, agreed to September 7, 1984 (98th Congress, 2nd Session), is amended by striking paragraph (1) and inserting the following:

"(1) purchase of the flag shall be limited to—

"(A) two flags for each Senator, or former Senator, subject to replacement for loss, destruction, or wear and tear;

"(B) two flags for each Senate committee, as determined by the chairman and ranking member, subject to replacement for loss, destruction, or wear and tear; and

"(C) two flags for each officer of the Senate, subject to replacement for loss, destruction, or wear and tear; and".

AMENDMENTS SUBMITTED

SUPPLEMENTAL APPROPRIATIONS FOR THE DEPARTMENT OF VETERANS' AFFAIRS

BYRD (AND HATFIELD) AMENDMENT NO. 105

Mr. BYRD (for himself and Mr. HATFIELD) proposed an amendment to the bill (H.R. 2402) making supplemental appropriations for the Department of Veterans' Affairs for the fiscal year ending September 30, 1989, and for other purposes; as follows:

On page 3, strike out the matter following line 11, and insert in lieu thereof the following:

Notwithstanding any other provision of this Act, no part of any appropriation contained in this Act shall remain available for obligation after June 15, 1989.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. JOHNSTON. Mr. President, I would like to announce for the public that the time for the afternoon session of hearings on June 2, 1989, before the Committee on Energy and Natural Resources, has been changed.

The afternoon session, originally scheduled to begin at 2 p.m., will begin instead at 1:30 p.m. in room SH-216 of the Senate Hart Office Building in Washington, DC. This will be the conclusion of 2 days of hearings to receive testimony concerning S. 710, S. 711, and S. 712, legislation to provide for a referendum on the political status of Puerto Rico.

For further information, please contact Pat Temple at (202) 224-4756.

Mr. President, I would like to announce for the public that hearings have been scheduled before the Committee on Energy and Natural Resources.

The hearings will take place July 11, at 9:30 a.m., and July 13 and July 14 at 10 a.m., in room SD-366 of the Dirksen Senate Office Building in Washington, DC.

The purpose of the hearings is to receive testimony from the administration on S. 710, S. 711, and S. 712, legislation to provide for a referendum on the political status of Puerto Rico.

For further information, please contact Pat Temple at (202) 224-4756.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. FORD. Mr. President, I would like to announce for the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources.

The purpose of the hearing is to receive testimony on the Department of Energy's role in the area of magnetic fusion and inertial confinement fusion research and development and demonstration. The subcommittee will hear testimony on the Department of Energy's fiscal year 1990 budget request for the Office of Fusion Energy and on the relevant provisions of Senate bill S. 964, a bill to authorize appropriations to the Department of Energy for civilian energy programs for fisal year 1990 and fiscal year 1991 and for other purposes.

The hearing will take place June 13, 1989, at 2 p.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to submit written testimony for the printed hearing record should send it to the Committee on Energy and Natural Resources, Subcommittee on Energy Research and Development, U.S. Senate, Washington, DC 20510. Written comments must be received by June 20, 1989.

For further information, please contact Ben Cooper or Teri Curtin at (202) 224-7569.

Mr. President, I would like to announce for the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy Research and Development on the Committee on Energy and Natural Resources.

The purpose of the hearing is to receive testimony on Senate bill, S. 488, a bill to provide Federal assistance and leadership to a program of research, development, and demonstration of renewable energy and energy efficiency technologies, and for other purposes; the relevant provisions in Senate bill S. 964, a bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991, and for other purposes; and the Department of Energy's fiscal year 1990 budget request for conservation and renewable energy programs.

The hearing will take place June 15, 1989, at 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to submit written testimony for the printed hearing record should send it to the Committee on Energy and Natural Resources, Subcommittee on Energy Research and Development, U.S. Senate, Washington, DC 20510. Written comments must be received by June 22, 1989.

For further information, please contact Ben Cooper or Teri Curtin at (202) 224-7569.

Mr. President, I would like to announce for the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources.

The purpose of the hearing is to receive testimony on the Department of Energy's recent activities in the area of fossil energy R&D and the Clean Coal Technology Program. The subcommittee will hear testimony on the Department of Energy's fiscal year 1990 budget request for the Fossil Energy Program and the relevant provisions in Senate bill S. 964, a bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991, and for other purposes.

The hearing will take place July 11, 1989, at 2:30 p.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Those wishing to submit written testimony for the printed hearing record should send it to the Committee on Energy and Natural Resources, Subcommittee on Energy Research and Development, U.S. Senate, Washington, DC 20510. Written comments must be received by July 25, 1989.

For further information, please contact Cheryl Moss or Ben Cooper at (202) 224-7569.

Mr. President, I would like to announce for the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources.

The purpose of the hearing is to receive testimony on the Department of Energy's nuclear reactor research and development programs and on commercial efforts to develop advanced nuclear reactor technologies. The subcommittee will also hear testimony on the reactor R&D provisions contained in Senate bill S. 964, a bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991 and for other purposes; and on other pending legislation.

The hearings will take place on July 18, at 9:30 a.m., and July 20 at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building in Washington, DC.

Those wishing to submit written testimony for the printed hearing record should send it to the Subcommittee on Energy Research and Development, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510.

For further information, please contact Mary Louise Wagner at (202) 224-7569.

SUBCOMMITTEE ON MINERAL RESOURCES DEVELOPMENT AND PRODUCTION

Mr. JOHNSTON. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Mineral Resources Development and Production Subcommittee of the Committee on Energy and Natural Resources.

The hearing will take place Wednesday June 7, 1989, at 2:30 p.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The purpose of this hearing is to receive testimony concerning the mining law of 1872.

Those wishing to submit written testimony for the printed hearing record should write to the Committee on Energy and Natural Resources, U.S. Senate, Dirksen Senate Office Building, room 364, Washington, DC 20510. For further information, please contact Lisa Vehmas of the subcommittee staff at (202) 224-7555.

29-059 O-90-47 (Pt. 7)

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, May 18 at 2 p.m. to hold a hearing on Soviet Defense and Arms Control Policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Thursday, May 18, 1989, at 4 p.m. to conduct an executive session for the consideration of the nomination of Roderick Allen DeArment, to be Deputy Secretary of Labor.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER AND POWER

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 2 p.m., May 18, 1989, for a hearing to relieve testimony on S. 635, a bill to prevent the unintended licensing of federally nonjurisdictional pre-1935 unlicensed hydroelectric projects.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, May 18, 1989, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGING

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Aging, of the Committee on Labor and Human Resources, be authorized to meet during the session of the Senate on Thursday, May 18, 1989, at 2:30 p.m. to conduct a hearing on Administration on Aging.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEES ON STRATEGIC FORCES AND NUCLEAR DETERENCE, CONVENTIONAL FORCES AND ALLIANCE DEFENSE, AND PROJECTION FORCES AND REGIONAL DEFENSE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittees on Strategic Forces and Nuclear Deterrence, Conventional Forces and Alliance Defense, and Projection Forces and Regional Defense of the Committee on Armed Services be authorized to meet on Thursday, May 18, 1989, at 2 p.m. in closed session to receive a review of DOD classified programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON READINESS, SUSTAINABILITY AND SUPPORT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Readiness, Sustainability and Support of the Committee on Armed Services be authorized to meet on Thursday, May 18, 1989, at 2 p.m. in open/closed session to receive testimony on the ammunition programs in the amended Defense authorization request for fiscal years 1990 and 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS, NATIONAL PARKS AND FORESTS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate May 18, 1989, 9:30 a.m. for a hearing to receive testimony on S. 737, a bill to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of the Rocky Mountain National Park in the State of Colorado; S. 267, a bill to authorize the Secretary of the Interior to convey certain lands in Idaho to Mr. and Mrs. Kenneth Belvins of Kuna, ID; H.R. 310, a bill to remove a restriction on land in Roanoke, VA, in order for that land to be conveyed to the State of Virginia for use as a veterans' nursing home.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSERVATION AND FORESTRY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Conservation and Forestry of the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, May 18, 1989, at 1:30 p.m. to hold a hearing on the appeals process used by the Forest Service, USDA.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON INVESTIGATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Special Committee on Investigations of the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on May 18, 1989 at 10 a.m. to hold hearings pursuant to Senate Resolution 66, section 21, agreed February 28, 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON AGING

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Special Committee on Aging, be authorized to meet during the session of the Senate on Thursday, May 18, 1989, at 10 a.m. to hold a hearing to examine the role the Health Care Financing Administration [HCFA] has/has not played in implementing the nursing home reform provisions that were included in the Omnibus Budget Reconciliation Act [OBRA] of 1987.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

GREGORY PECK

● Mr. LEAHY. Mr. President, recently, Gregory Peck received the American Film Institute's 17th Annual Life Achievement Award. The institute has made some fine choices, but none better than this.

I have watched Mr. Peck in so many movies over the years that it is difficult to single out favorites, but if I did, it would have to be as Atticus Finch in "To Kill a Mockingbird." The book made a major impression on me, and seeing the movie as a young law student only added to that impression.

In Mr. Peck's acceptance speech, he spoke of disturbing trends in movies today, and I find myself in complete agreement. I ask that an article about Mr. Peck from the New York Times be included in the RECORD at this point.

The article follows:

REFLECTIONS BY (AND PLAUDITS FOR) GREGORY PECK

(By Aljean Harmetz)

HOLLYWOOD, March 10.—With the usual pomp and more than the usual respect, Hollywood crowded into a ballroom Thursday night to honor Gregory Peck, whose screen image—from his first starring role as a priest in "Keys of the Kingdom" to his Academy Award-winning role as a small-town Southern lawyer defending a black man in "To Kill a Mockingbird"—has been composed of equal parts of decency, virtue and moral strength.

In accepting the American Film Institute's 17th annual Life Achievement Award, Mr. Peck went beyond the usual gratitude and platitudes. In a speech that was interrupted by applause more than half a dozen times, he questioned what movies have become.

"There has been a lot of glamorous financial news in the papers lately," the 72-year-old actor said. "Multimedia conglomerates. . . . It may be that, in a few years, all pictures and all television will be made by two or three of these behemoths who happen also to own magazines, newspapers and cable stations, and to manufacture and distribute video cassettes.

"If these Mount Everests of the financial world are going to labor and bring forth still more pictures with people being blown to bits with bazookas and automatic assault rifles, with no gory detail left unexploited, if they are going to encourage anxious, ambitious actors, directors, writers and producers to continue their assault on the English language by reducing the vocabularies of their characters to half a dozen words, with one colorful but overused Anglo-Saxon verb

and one unbeautiful Anglo-Saxon noun covering just about every situation, then I would like to suggest that they stop and think about this: making millions is not the whole ball game, fellows. Pride of workmanship is worth more. Artistry is worth more."

THE IMAGE AND THE REALITY

Sitting in the living room of his Holmby Hills house earlier in the day, pouring coffee from a silver service in a room so full of roses that it was hard to breathe, Mr. Peck talked about image and reality.

"In my case the image is the man of honor," he said.

Gregory Peck was indeed the epitome of honor as the reporter who exposes anti-Semitism in "Gentleman's Agreement," the lawyer who fights racism in "To Kill a Mockingbird," the heroic "Captain Horatio Hornblower," the Air Force general pulling together a demoralized bomber group in "Twelve O'Clock High," the reporter who showed a princess her duty in "Roman Holiday" and the captain of an atomic submarine facing a dying world in "On the Beach."

WHAT MIGHT HAVE BEEN

"I don't see myself as a man of probity," he said, "but part of it, the social concerns, is me. I went to college at Berkeley in the 30's. I believed in F.D.R.'s social program. It formed my character and though I may have adjusted from time to time, I have seen no reason to change it radically."

He has mixed feelings about the institute's award. "I don't like nostalgia, looking back," he said. "'Life achievement' has a slightly ominous ring. Is that all there is?"

He said he wondered what his screen career would have been "if I hadn't been cast in the heroic mold as soon as I came here, if my first three or four pictures had been comedies. In the theater I played a lot of crazy comedy. But in films they saw me as the fellow who could carry the plot, so I had to be dependable and carry the plot."

The picture that he calls "closest to my heart, the high point of my career" is "To Kill a Mockingbird." The role of Atticus Finch "seemed to fit like a comfortable pair of shoes," he said. "Atticus was the town lawyer. My dad was the town druggist in La Jolla. It gave me an opportunity to have my say about racial intolerance."

RECALLING A MAN OF CLASS

At the awards ceremony, held at the Beverly Hilton Hotel, Mary Badham, who played Mr. Peck's 6-year-old daughter in "Mockingbird" in 1962, spoke of how their relationship has lasted through 27 years. Lauren Bacall told of Mr. Peck, her co-star in "Designing Woman," stopping by her house a few days after the death of her husband, Humphrey Bogart, to leave a letter "about Bogie and me and our children." He is, she said, "a man of class."

Audrey Hepburn, the then-unknown actress who played the princess in "Roman Holiday," told of his insistence that she receive co-star billing on the movie. And Jane Fonda, his co-star in the forthcoming film "Old Gringo," said: "I think I got him at his ripest. I thought, 'Maybe he's gotten soft. Maybe the edge is gone. Maybe he'll phone it in.' But the first day he had to do a scene three pages long, and it was his rawness, his skill, his tenacity, his fear that maybe he wouldn't be able to do it this time."

In his speech, Mr. Peck referred to the fact that "Old Gringo" was his "first film in six years, if the truth were to be told."

ORCHIDS AND EXERCISE

If the new conglomerates are not battering at the walls of his four-acre estate, his life is pleasant and full of family. There is the greenhouse filled with orchids that he "plays with," and he does enough exercise to keep from getting "creaky," he said. "I'm not looking for the body beautiful. I just want to get out of a chair without struggling."

Mr. Peck was the first chairman of the American Film Institute, and he follows John Ford, James Cagney, Orson Welles and 13 others as the winner of its major award. The awards banquet, which is the institute's major fund-raising event, was taped and will be shown on NBC on March 21.

In his acceptance speech, Mr. Peck used a joke that the actor James Mason liked to tell, about a woman in Dublin who asked him, "Wouldn't you be James Mason in his later years?"

"'Later years,'" said Mr. Peck. "It's candid, it's accurate, it's dispassionate, but it's comfortable—allowing for the possibility of more to come."●

FSX TRADE AGREEMENT

● Mr. GORTON. Mr. President, last week when I spoke in favor of the FSX agreement, I said the real issue is our huge trade deficit with Japan, and I said we must designate Japan for priority negotiations under the Super 301 provisions of the 1988 Omnibus Trade and Competitiveness Act.

This week, the President and his Cabinet are discussing exactly which countries and trade practices should be so designated. I have spoken to Ambassador Hills and Secretaries Mosbacher and Yeutter. I urged them all to designate Japan, and in particular, the web of practices and policies that prevent fair foreign competition in wood products. This may not be the final answer to our trade deficit problems, but it is a useful start.

In urging this action, I am by no means alone. I wish to thank my colleague from Montana, Senator BAUCUS, for taking the lead this week on a joint letter to the President urging this same course.

Wood products provide a perfect example of the kind of unfair and unreasonable trade practices and trade deficit conditions the Super 301 provisions of the 1988 trade law were designed to address.

Recently Japan's barriers to wood products imports were extensively studied by the International Trade Administration. They list 14 specific obstacles to increased wood use and increased wood product imports.

It will surprise no one that Japan imposes high tariffs on most wood products, and admits raw logs free. It may surprise to learn, however, that Japan even tariffs wood products that have no Japanese competition, and those that are in short supply. Tariffs, however, are but the tip of the iceberg where Japan is concerned. To quote the report:

Japan has a very complicated system of subsidies, low interest loans, tax incentives, and antibankruptcy measures for the forest products industry.

* * * * *

These programs allow Japanese companies that would otherwise be noncompetitve to continue to produce.

Mr. President, given Japan's economic strength, such blatant protectionism is unacceptable.

Of course, Mr. President, the international prominence of our forest products industry was obtained at great private and personal cost—not by taxpayer subsidy. Mills have closed. Those still open have permanently cut their work force, and those workers remaining have in many cases accepted lower wages. But innovation, modernization, and cost cutting has reestablished the U.S. forest products industry as the world's preeminent competitor.

Japan protects its own for a variety of reasons. Inability to compete is obviously one of them. But does Japan spare itself injury through this protection? The answer is a resounding "No."

Japan maintains one of the world's most complex and expensive distribution chains of any industrial country; it is the epitome of the insider's game. Its building code is in part vastly outdated, which effectively prevents the introduction of many new wood products. Japan clearly aims to minimize the use of wood in construction, despite the clear preference of Japanese consumers for wood. And Japan's land-use policies effectively force consumers to live in cramped, multifamily structures, although the Japanese possess the land, wealth, and desire to live otherwise.

And what is the effect of these policies? Frustrated Japanese consumers who must pay too much money for inadequate wood products in undesirable residential conditions delivered by a subsidized, protected, uncompetitive Japanese wood products industry. And frustrated U.S. wood products producers denied the opportunity to compete fairly in an open market.

The net effect—and the clear intent—of this web of protection is at every turn to minimize imports of wood products. And therein lies the real problem with our trade dealings with Japan: we cannot expect to make real improvements in this relationship so long as we deal with the Japanese on a barrier-by-barrier basis.

Mr. President, I do not take lightly the effect of designating a country or its trade practices for priority negotiation. Nor, apparently, does Japan.

After some initial concessions on wood products in 1985, the Japanese not only declined to continue these talks, they provided over $1 billion in relief to their wood products industry,

specifically to offset the very concessions they had made.

Now that they face the prospect of Super 301 designation, Japan has proposed to resume wood products talks, although only at a "technical level." Wisely, the Department of Agriculture countered that the talks should be at the level required by their commitment to the MOSS process. And Tuesday, the Japanese agricultural attaché responded informally that the Japanese decline to discuss forest products at any level other than technical.

Mr. President, this case illustrates precisely why the United States has a trade deficit with Japan, and precisely why Congress passed the Super 301 provision. I call upon the President to designate Japan—and its closed forest products market—as a negotiating priority under the new trade law. I urge my colleagues to do likewise.●

ERIS FIELD

● Mr. BOSCHWITZ. Mr. President, it is with great pleasure that Senator WILSON and I join in bringing to the attention of our colleagues one of California's outstanding women—Eris Field, of Beverly Hills.

Soon this extremely active and generous woman will be completing her 2-year term as the president of the Brandeis University National Women's Committee. Though she has done a great deal of work on behalf of Brandeis University, much of her volunteer efforts have been directed toward her own community as well. For example, she was instrumental in developing a discussion group for youngsters called Rap Sessions at Beverly Vista Elementary School.

Eris Field has spent most of her life dedicating her time and resources to community activities. One example of her sense of community is Eris' service as a founding member and trustee of the Beverly Hills Meals on Wheels and as a board member for a home for the aged. Further exemplifying her dedication to community is Eris, work with the Variety Clubs Childrens Charities.

Mr. President, our country has always taken pride in its generous nature and the spirit of volunteerism. It is with that in mind that we commend Eris Field for all of her good works, and to express our best wishes for her and her family in the future.●

ENVIRONMENTAL AND ENERGY STUDY INSTITUTE

● Mr. HEINZ. Mr. President, the Environmental and Energy Study Institute was formed to generate innovative policy discussions on the pressing environmental and energy issues of our day. With keen analysis and bipartisan objectivity, EESI has acted to make a significantly more informed Congress. EESI has recently shared with President Bush, its recommendations about issues of environmental priority. I share this letter with my colleagues today because it highlights problems we can no longer ignore. Enhancing energy efficiency, securing the U.S. diplomatic leadership in the upcoming battle against global warming, and bringing about sustainable development are issues this Congress is increasingly conscious of and working hard to address. With the continued help of organizations such as EESI, we stand a much better chance of succeeding.

I ask that the letter be printed in the RECORD.

The letter follows:

ENVIRONMENTAL AND ENERGY STUDY INSTITUTE,
Washington, DC, May 8, 1989.

Hon. GEORGE BUSH,
The White House, Washington, DC.

DEAR MR. PRESIDENT: On behalf of the Board of Directors of the Environmental and Energy Study Institute, we are writing to give you our recommendations on what we believe should be your early priorities and actions in environmental and energy policy.

Our recommendations represent the consensus of our Board—a diverse group of Republicans, Democrats, environmentalists and business executives. A short list of recommended actions follows, which we are ready to help you develop and implement.

We first want to commend you on your many positive statements relating to environmental and energy policy and your choice of William Reilly to head the Environmental Protection Agency. We also applaud the strong statements he and Secretary James Baker have already made on global warming, clean air and international cooperation. And we are impressed with Energy Secretary James Watkins' desire to revitalize his department to deal with the nation's environmental and energy challenges.

Overall, our recommendations would serve to promote environmentally sustainable development both here and abroad.

Specifically, we urge you to:

Make a major commitment to enhance the energy efficiency of the United States and to advance renewable energy. In the near term, energy efficiency is the cheapest way to meet the multiple objectives of increasing energy security and international competitiveness, while reducing conventional air pollution, greenhouse gas emissions and our balance of payments deficit. Past experience has shown the power of the market to produce efficiency gains. However, the government must act to insure that prices reflect the environmental and related costs of energy use so that efficiency can fairly compete, and we specifically recommend that you support pollution trading, carbon users fees and other market-based mechanisms to that end. In addition, we recommend that you redirect federal energy research and development to place the highest priority on efficiency and renewable energy technologies.

Support in words and deeds the current international process leading to negotiations to reduce greenhouse gases. Secretary Baker's statements and EPA's recent report are an excellent start. We believe the prospect of global warming is serious enough to warrant beginning negotiations and taking action while the science is clarified.

Mediate an end to the long-running stalemate over acid rain control and the reauthorization of the Clean Air Act. A key feature of your clean air plan should be energy efficiency, which can cut control costs significantly.

Strengthen programs to prevent groundwater contamination, first by proposing comprehensive federal legislation stressing source reduction and state-led implementation, and second by proposing reforms in federal farm programs which would reduce rural groundwater contamination and simultaneously cut federal spending. Preventing groundwater contamination makes good environmental sense, and as the huge pricetag for toxic waste cleanup amply demonstrates, prevention makes good economic sense.

Revitalize the process of cooperation with the developing world to help them achieve the twin imperatives of economic development and environmental protection. The most serious environmental degradation, and not coincidentally economic deterioration, is occurring in the developing and newly industrialized countries. We urge you to develop a new legislative charter for U.S. cooperation with these countries to help them achieve their aspirations to grow and prosper without destroying their natural resources.

In order to carry out these five recommendations, we urge you to take the following organizational actions. First, continue to give Administrator Reilly the same influence and access as members of your cabinet. Second, in the Executive Office of the President, give the Council on Environmental Quality a prominent and clear mission and vigorous leadership. Third, name an Ambassador-at-Large to coordinate your administration's international environmental negotiations.

We know that some of these proposed actions are not easy, but we believe that they are all feasible if you will take the lead on them. We believe they will generate bi-partisan support. And we believe they all make good economic and environmental sense.

We stand ready to help you develop these recommendations, and we commit ourselves to working with you for their realization.

Thank you.

Sincerely yours,

ROGER W. SANT,
Chairman.
JAMES GUSTAVE SPETH,
Vice Chairman.
RUSSELL E. TRAIN,
Director.●

GIVING PEACE IN THE MIDDLE EAST A CHANCE: THE IMPORTANCE OF ISRAEL'S NEW PEACE PLAN

● Mr. McCAIN. Mr. President, it is always easy to find obstacles for peace and reasons not to negotiate. This is particularly true in the case of the peace negotiations necessary to create a lasting peace in the Middle East. The issues involved are extraordinarily difficult and intractible, and they must be resolved in a way that produces a true peace, not simply an agreement on paper or the kind of peace that does not guarantee both

sides full security and allow the kind of cultural and economic relations that will ensure peace lasts and that the economy of the region can be viable.

The Government of Israel has proposed a new peace initiative that I feel deserves close study by every Member of this body, by every nation in the world, and by every Palestinian. I fully realize that this initiative does not meet the expectations of many Palestinians, and I do not believe it should be my role to endorse or criticize its details. I do believe, however, that we should all recognize that this proposal is a serious and important step forward.

I believe that we in the United States should do everything possible to build upon this initiative to create a negotiation process that can lead to peace. I believe that it is important that both the international community and the Palestinians should make every effort to explore what can be done to build upon this initiative. And, I believe that the Government of Israel should listen closely to the reactions to its proposals.

The one thing we cannot let happen is a situation where either side rejects the views and proposals of the other—supported by the usual host of outside analysts and critics. It is already clear that far too many people are rushing to declare that his initiative means the cup is half empty—often without reading it in full or by focusing on the most difficult issues that must be negotiated rather than to take advantage of the fact that this peace initiative clearly means the cup is half full.

I believe that history has clearly and painfully demonstrated that such an exercise in taking sides will do nothing for the Palestinians, and it is certain to prong the agony of the current strife on Gaza and West Bank and to reduce the prospects for a lasting peace. The problem today is not how the next steps in the journey to peace will end, but how they can begin. I believe that the new peace initiative of the Government of Israel is an important part of this beginning.

I ask that a background paper on the peace initiative be printed in the RECORD.

The material follows:

A PEACE INITIATIVE BY THE GOVERNMENT OF ISRAEL

GENERAL

1. This document presents the principles of a political initiative of the Government of Israel which deals with the continuation of the peace process; the termination of the state of war with the Arab States; a solution for the Judea, Samaria and the Gaza district; peace with Jordan; and a resolution of the problem of the residents of the refugee camps in Judea, Samaria and the Gaza district.

2. The document includes:

A. The principles upon which the initiative is based.

B. Details of the processes for its implementation.

C. Reference to the subject of the elections under consideration. Further details relating to the elections as well as other subjects of the initiative will be dealt with separately.

BASIC PREMISES

3. The initiative is founded upon the assumption that there is a national consensus for it on the basis of the basic guidelines of the Government of Israel, including the following points:

A. Israel yearns for peace and the continuation of the political process by means of direct negotiations based on the principles of the Camp David accords.

B. Israel opposes the establishment of an additional Palestinian state in the Gaza district and in the area between Israel and Jordan.

C. Israel will not conduct negotiations with the PLO.

D. There will be no change in the status of Judea, Samaria and Gaza other than in accordance with the basic guidelines of the government.

SUBJECTS TO BE DEALT WITH IN THE PEACE PROCESS

4. A. Israel views as important that the peace between Israel and Egypt, based on the Camp David accords, will serve as a cornerstone for enlarging the circle of peace in the region, and calls for a common endeavor for the strengthening of the peace and its extension, through continued consultation.

B. Israel calls for the establishment of peace relations between it and those Arab States which still maintain a state of war with it, for the purpose of promoting a comprehensive settlement for the Arab-Israel conflict, including recognition, direct negotiations, ending the boycott, diplomatic relations, cessation of hostile activity in international institutions or forums and regional and bilateral cooperation.

C. Israel calls for an international endeavor to resolve the problem of the residents of the Arab refugee camps in Judea, Samaria and the Gaza district in order to improve their living conditions and to rehabilitate them. Israel is prepared to be a partner in this endeavor.

D. In order to advance the political negotiation process leading to peace, Israel proposes free and democratic elections among the Palestinian Arab inhabitants of Judea, Samaria and the Gaza district in an atmosphere devoid of violence, threats and terror. In these elections a representation will be chosen to conduct negotiations for a transitional period of self-rule. This period will constitute a test for coexistence and cooperation. At a later stage, negotiations will be conducted for a permanent solution, during which all the proposed options for an agreed settlement will be examined, and peace between Israel and Jordan will be achieved.

E. All the above mentioned steps should be dealt with simultaneously.

F. The details of what has been mentioned in (D) above will be given below.

THE PRINCIPLES CONSTITUTING THE INITIATIVE

Stages:

5. The initiative is based on two stages:

A. Stage A—a transitional period for an interim agreement.

B. Stage B—permanent solution.

6. The interlock between the stages is a timetable on which the plan is built; the peace process delineated by the initiative is based on resolutions 242 and 338, upon which the Camp David accords are founded.

Timetable.

7. The transitional period will continue for 5 years.

8. As soon as possible, but not later than the third year after the beginning of the transitional period, negotiations for achieving a permanent solution will begin.

9. The parties participating in the negotiations for the first stage (the interim agreement) shall include Israel, and the elected representation of the Palestinian Arab inhabitants fo Judea, Samaria and the Gaza district. Jordan and Egypt will be invited to participate in these negotiations if they so desire.

10. The parties participating in the negotiations for the second stage (permanent solution) shall include Israel and the elected representation of the Palestinian Arab inhabitants of Judea, Samaria and the Gaza district, as well as Jordan; furthermore, Egypt may participate in these negotiations. In negotiations betwen Israel, and Jordan, in which the elected representation of the Palestinian Arab inhabitants of Judea, Samaria and the Gaza district will participate, the peace treaty between Israel and Jordan will be concluded.

Substance of the transitional period:

11. During the transitional period the Palestinian Arab inhabitants of Judea, Samaria and the Gaza district will be accorded self-rule, by means of which they will, themselves, conduct their affairs of daily life. Israel will continue to be responsible for security, foreign affairs and all matters concerning Israeli citizens in Judea, Samaria and the Gaza district. Topics involving the implementation of the plan for self-rule will be considered and decided within the framework of the negotiations for an interim agreement.

Substance of the permanent solution:

12. In the negotiations for a permanent solution, every party shall be entitled to present for discussion all the subjects it may wish to raise.

13. The aim of the negotiations should be:

A. The achievement of a permanent solution acceptable to the negotiating parties.

B. The arangements for peace and borders between Israel and Jordan.

DETAILS OF THE PROCESS FOR THE IMPLEMENTATION OF THE INITIATIVE

14. First and foremost, dialogue and basic agreement by the Palestinian Arab inhabitants of Judea, Samaria and the Gaza district, as well as Egypt and Jordan if they wish to take part, as above mentioned, in the negotiations on the principles constituting the initiative.

15. A. Immediately afterwards will follow the stage of preparations and implementation of the election process in which a representation of the Palestinian Arab inhabitants of Judea, Samaria and Gaza will be elected. This representation:

I. Shall be a partner to the conduct of negotiations for the transitional period (interim agreeement).

II. Shall constitute the self-governing authority in the course of the transitional period.

III. Shall be the Central Palestinian component, subject to agreement after three years, in the negotiations for the permanent solution.

B. In the period of the preparations and implementation there shall be a calming of the violence in Judea, Samaria and the Gaza district.

16. As to the substance of the elections, it is recommended that a proposal of regional elections be adopted, the details of which shall be determined in further discussions.

17. Every Palestinian Arab residing in Judea, Samaria and the Gaza district, who shall be elected by the inhabitants to represent them—after having submitted his candidacy in accordance with the detailed document which shall determine the subject of the elections—may be a legitimate participant in the conduct of negotiations with Israel.

18. The elections shall be free, democratic and secret.

19. Immediately after the election of the Palestinian representation, negotiations shall be conducted with it on an interim agreement for a transitional period which shall continue for 5 years, as mentioned above. In these negotiations, the parties shall determine all the subjects relating to the substance of the self-rule and the arrangements necessary for its implementation.

20. As soon as possible, but not later than the third year after the establishment of the self-rule, negotiations for a permanent solution shall begin. During the whole period of these negotiations until the signing of the agreement for a permanent solution, the self-rule shall continue in effect as determined in the negotiations for an interim agreement.●

REGARDING ESTABLISHING A DEPARTMENT OF VETERANS AFFAIRS COMMISSION TO EXAMINE VA MEDICAL FACILITIES

● Mr. MURKOWSKI. Mr. President, today I had intended to introduce historic legislation which is needed to improve the efficiency of Department of Veterans Affairs [VA] health-care facilities. Although I have worked hard on my proposal during the past 5 months, I have agreed to withhold its introduction until after the Memorial Day recess.

Let me explain. Yesterday I met with VA Secretary Ed Derwinski to discuss, among other things, the concept of a VA Medical Facility Realignment Commission. VA staff have been working on a similar proposal and are in the process of discussing it with veterans service organizations. Secretary Derwinski and I agreed in our meeting yesterday that I would not introduce my bill until Secretary Derwinski had heard the views of the service organizations and conveyed their concerns to me in a meeting to take place after the Memorial Day recess.

Although I am not introducing my legislation today, I intend to insert in the RECORD the draft bill and a brief summary of the legislation. This statement will outline certain reasons why I believe such legislation is necessary.

My bill—to be modeled after the defense authorization amendments and Base Closure and Realignment Act—would establish a similar Commission to examine VA medical facilities to determine whether realignments or mission changes are needed. Let me be clear, the purpose of establishing such a Commission is not to reduce the budget of VA's health-care system or to necessarily close VA facilities, but rather to shift available resources where they can most efficiently provide care to the most veterans.

The committee and ultimately the entire Congress are aware of funding problems within VA's health-care system. There is no disagreement among members of the Veterans' Affairs Committee that more money is needed if the level of services provided in the past is to be maintained. As a result of the funding situation, certain programs or care to veterans have been restricted or eliminated.

Due in large part to the efforts of VA Secretary Ed Derwinski, on March 24, 1989, the President sent forth to Congress a request for fiscal year 1989 supplemental funding of over $300 million for VA medical care. That request was passed today by the House and may be considered by the Senate today.

The Commission is needed for a variety of reasons. As previously noted, we can no longer afford to operate the VA system as we have in the past. We must closely examine each Government program—including each VA facility—to determine if change is needed. For example, we have four VA hospitals in Chicago. Why is this so? Are all these facilities needed? These are the types of questions that need to be asked.

The practice of medicine is constantly changing due to advances in medical technology and sometimes as a result of efforts to control the cost of health care. The delivery of care has shifted from a system which relied on inpatient hospitalization to increases in outpatient care.

Additionally, VA will see an increase in veterans age 65 or older in the next 10 years. By the year 2000, over 9 million veterans will fit this over-65 age category. This is an increase of 6 million from 1980. Because our older Americans tend to move to warmer climates once they retire, this has caused an influx of veterans into such States as Florida, New Mexico, and Arizona. Yet these States lack the capacity to meet the demand for health-care services.

It is no secret that when VA desires to modify the size or mission of VA facilities its efforts are met with a great deal of resistance from the Members of Congress who represent those districts or States. A VA facility not only represents care and treatment to veterans but plays an important economic role in the community. Frankly, a VA facility means jobs—not only Federal ones but private sector support services as well.

There is no question in my mind that an independent review of the functions and missions of each VA facility is vitally needed. And a mechanism to remove political considerations from discussions of mission changes and consolidations is desperately needed. For these reasons, I believe that this is legislation whose time has come.

Mr. President, I ask consent to insert in the RECORD my draft legislation and a summary of its provisions.

The material follows:

SUMMARY OF PROVISIONS WHICH WILL BE INCLUDED IN LEGISLATION TO BE INTRODUCED BY SENATOR MURKOWSKI IN JUNE

The legislation which I intend to introduce is so closely modeled after the DOD Base Closure legislation, I will not go into the details of each provision. I would, however, like to highlight a few specific points.

This bill will require the Secretary of Veterans Affairs to establish a commission to review VA medical facilities to determine if realignment or mission changes are needed. This commission—which will be required to be established within 45 days after enactment—would be composed of between 9 and 12 members. The Secretary will have complete discretion to name members of the commission; however, the bill will require representatives—in certain cases from those nominated by the respective organizations—of the following organizations to be on the commission: Department of Defense, Association of American Medical Colleges, VA's Special Medical Advisory Group, Health and Human Services, and veterans' service organizations. Other members should have expertise or experience in management of health service in the private sector, health-care economics, health-care policy, VA medical care, long-term care, and rural health-care services.

The bill will also require that the Secretary approve or disapprove—without change—all the recommendations contained in the report which is required to be submitted to the Secretary. There will be no discretion to approve a partial list or modify any recommendations. Basically, it is an "all-or-nothing" proposition. Unless a joint resolution disapproving the recommendations is enacted by Congress within a specified deadline, the Secretary will be required to begin implementation efforts within a year after receipt of the report and complete those actions within 3 years.

S. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Department of Veterans Affairs Medical Facilities Realignment Act of 1989".

SEC. 2. REALIGNMENT AND MISSION CHANGES OF DEPARTMENT OF VETERANS AFFAIRS MEDICAL FACILITIES.

(a) IN GENERAL.—The Secretary of Veterans Affairs shall—

(1) within 45 days after the date of the enactment of this Act, issue a charter establishing the Commission provided for in section 4 and containing the terms, conditions, and mandates for its operation to achieve its objectives under this Act, including provision for the appointment of staff and any other support and expenses the Commission considers necessary;

(2) realign all medical facilities recommended for realignment by the Commission

in the report to the Secretary of Veterans Affairs pursuant to the charter establishing the Commission;

(3) change the major missions of medical facilities as recommended by the Commission in its report to the Secretary; and

(4) initiate all such realignments and major mission changes not later than one year after receipt of the Commission's report by the Secretary, and complete all such realignments and all actions required for such mission changes not later than three years after receipt of such report by the Secretary.

SEC. 3. CONDITIONS.

(a) IN GENERAL.—(1) The Secretary of Veterans Affairs may not carry out any realignment or major mission change of any medical facility under this Act unless—

(A) not later than 15 days after receiving the report referred to in section 2, the Secretary of Veterans Affairs transmits to the Committees on Veterans' Affairs of the Senate and the House of Representatives a report containing a statement that the Secretary has approved, and the Department of Veterans Affairs will implement, all of the medical facility realignments and major mission changes recommended by the Commission in that report; and

(B) the Commission has recommended, in the report referred to in section 2, the realignment or major mission change as the case may be, of the medical facility, and has transmitted to the Committees on Veterans' Affairs of the Senate and the House of Representatives a copy of the report and the statement required by section 4(d)(2)(B).

(2) The Secretary may not initiate any realignment or major mission change recommended by the Commission in the report referred to in section 2 within 45 days after the committees referred to in paragraph (1) receive the Secretary's report pursuant to such paragraph.

(b) JOINT RESOLUTION.—The Secretary of Veterans Affairs may not carry out any realignments or major mission changes under this Act if, within 45 days after the committees receive the Secretary's report under subsection (a)(1), a joint resolution is enacted, in accordance with the provisions of section 9, disapproving all the recommendations of the Commission. The days on which either House of Congress is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the 45-day period.

SEC. 4. THE COMMISSION ON MEDICAL FACILITY REALIGNMENT AND MAJOR MISSION CHANGE.

(a) NAME OF COMMISSION.—The Commission established pursuant to the charter issued by the Secretary of Veterans Affairs pursuant to section (2)(a)(1) shall be known as the "Commission on Medical Facility Realignment and Major Mission Change".

(b) MEMBERSHIP.—The Commission shall be appointed by the Secretary of Veterans Affairs and shall consist of not less than 9 and not more than 12 members, as follows:

(1) One member from among persons, if any, nominated by the Association of American Medical Colleges.

(2) One member from among persons knowledgeable about sharing Department of Veterans Affairs and Department of Defense health-care resources who are nominated by the Secretary of Defense.

(3) One member who is a member of the special medical advisory group established pursuant to section 4112(a) of title 38, United States Code.

(4) One member from among persons, if any, nominated by veterans service organizations chartered by Congress.

(5) One member from among persons knowledgeable about the Medicare and Medicaid programs who are nominated by the Secretary of Health and Human Services.

(6) The remaining members from among persons who, by reason of education, training, and experience, are experts in (A) the management of health services in private enterprise, (B) health care economics, (C) health care policy, (D) medical care furnished by the Veterans Health Services and Research Administration, except that no such member may be an employee of the Department of Veterans Affairs, (E) long-term health care services, and (F) rural health care services.

(c) CHAIRMAN AND VICE CHAIRMAN.—The Secretary of Veterans Affairs shall designate a Chairman and Vice Chairman from among the members of the Commission.

(d) DUTIES.—The Commission shall—

(1) transmit the report referred to in section 2(a) to the Secretary within one year after the date of the enactment of this Act and shall include in such report the Commission's recommendations regarding the medical facilities to which functions should be transferred as a result of the realignments and major mission changes recommended by the Commission; and

(2) on the date on which the Commission transmits such report to the Secretary, transmit to the Committees on Veterans Affairs of the Senate and the House of Representatives—

(A) a copy of such report; and

(B) a statement certifying that the Commission has reviewed all medical facilities, including all medical facilities under construction and all those planned for construction, and has identified the medical facilities recommended for realignment or major mission changes.

(e) STAFF AND SUPPORT.—Not more than one-fourth of the professional staff of the Commission shall be individuals who have been employed by the Department of Veterans Affairs within one year before the date of the enactment of this Act.

(f) RECORDS AND MEETINGS.—(1) The records, documents, and other materials prepared by or for the Commission are not subject to section 552 of title 5, United States Code.

(2) Meetings of the Commission are not subject to the provisions of section 10 of the Federal Advisory Committee Act (5 U.S.C. App.).

SEC. 5. IMPLEMENTATION.

(a) IN GENERAL.—In realigning or changing the major mission of a medical facility under this Act, the Secretary of Veterans Affairs, subject to the availability of funds, including funds in the Account—

(1) may carry out actions necessary to implement such realignment or major mission change, including the acquisition of such land, the construction of such replacement facilities, the performance of such activities, and the conduct of such advance planning and design as may be required to transfer functions from such medical facility to another medical facility;

(2) may provide—

(A) economic adjustment assistance to any community located near a medical facility being realigned or whose major mission is to be changed, and

(B) community planning assistance to any community located near a medical facility to which functions will be transferred as a result of such realignment or major mission change,

if the Secretary determines that such assistance is needed and that the financial resources available to the community (by grant or otherwise) for economic adjustment and community planning are inadequate; and

(3) subject to the availability of funds referred to in clause (1), may carry out activities for the purpose of environmental restoration, including reducing, removing, and recycling hazardous wastes and removing unsafe buildings and debris.

(b) MANAGEMENT AND DISPOSAL OF PROPERTY.—(1) The Administrator of General Services shall delegate to the Secretary of Veterans Affairs, with respect to excess and surplus property located at a medical facility realigned under this Act—

(A) the authority of the Administrator to utilize excess property under section 202 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483);

(B) the authority of the Administrator to dispose of surplus property under section 203 of that Act (40 U.S.C. 484); and

(C) the authority of the Administrator to grant approvals and make determinations under section 13(g) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(g)).

(2)(A) Subject to subparagraph (B), the Secretary of Veterans Affairs shall exercise authority delegated to the Secretary pursuant to paragraph (1) in accordance with—

(i) all regulations in effect on the date of the enactment of this Act governing utilization of excess property and disposal of surplus property under the Federal Property and Administrative Services Act of 1949; and

(ii) all regulations in effect on the date of the enactment of this Act governing the conveyance and disposal of property under section 13(g) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(g)).

(B) The Secretary of Veterans Affairs, after consulting with the Administrator of General Services, may issue regulations that are necessary to carry out the delegation of authority required by paragraph (1).

(C) The authority required to be delegated by paragraph (1) to the Secretary of Veterans Affairs by the Administrator of General Services shall not include the authority to prescribe general policies and methods for utilizing excess property and disposing of surplus property.

(D) Before any action may be taken with respect to the disposal of any surplus real property at a medical facility in connection with a realignment under this Act, the Secretary of Veterans Affairs shall consult with the Governor of the State and heads of the local governments concerned for the purpose of considering any plan for the use of such property by the local community concerned.

(E) The provisions of this paragraph and paragraph (1) are subject to paragraphs (3) and (4).

(3)(A) Before any action is taken with respect to the disposal or transfer of any real property at a medical facility in connection with a realignment or major mission change under this Act, the Secretary of Veterans Affairs shall notify all other departments, agencies, and instrumentalities (including nonappropriated fund instrumentalities) of the United States Government of the availability of such property, or portion thereof, and may transfer such property or portion, without reimbursement, to any such depart-

ment, agency, or instrumentality. In carrying out this paragraph, the Secretary shall give a priority, and shall transfer, to any such department, agency, or instrumentality that agrees to pay fair market value for the property or portion. For the purposes of this paragraph, the fair market value shall be the fair market value as of the date of the transmittal to the Secretary of the report referred to in section 2(a).

(B) This paragraph shall take precedence over any other provision of this Act or other provision of law with respect to the disposal or transfer of any real property at a medical facility in connection with a realignment or major mission change under this Act.

(4)(A) Except as provided in subparagraph (B), all proceeds—

(i) from any transfer under paragraph (3), and

(ii) from the transfer or disposal of any other property made as a result of a realignment or major mission change under this Act,

shall be deposited into the Account.

(B) In any case in which the General Services Administration is involved in the management or disposal of such property, the Secretary of Veterans Affairs shall reimburse the Administrator of General Services from the proceeds of such disposal, in accordance with section 1535 of title 31, United States Code, for any expenses incurred in such activities.

SEC. 6. WAIVER.

The Secretary of Veterans Affairs may carry out this Act without regard to—

(1) any provision of law restricting the authority of the Secretary or the use of funds for realigning medical facilities or changing the major missions of medical facilities, other than any provision of this Act;

(2) any provision of title 38, United States Code; and

(3) the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

SEC. 7. REPORTS.

As part of each annual budget request for the Department of Veterans Affairs, the Secretary of Veterans Affairs shall transmit to the Committees on Veterans Affairs and Appropriations of the Senate and the House of Representatives—

(1) a schedule of the realignment or major mission change actions to be carried out under this Act in the fiscal year for which the request is made and an estimate of the total expenditures required and cost savings to be achieved by each such realignment or major mission change and of the time period within which such cost savings are to be achieved in each case, together with the Secretary's assessment of the environmental effects of such actions; and

(2) a description of the medical facilities, including those under construction and those planned for construction, to which functions are to be transferred as a result of such realignments or major mission changes, together with the Secretary's assessment of the environmental effects of such transfers.

SEC. 8. FUNDING.

(a) ESTABLISHMENT OF ACCOUNT.—There is hereby established on the books of the Treasury an account to be known as the "Department of Veterans Affairs Medical Facility Realignment Account" which shall be administered by the Secretary of Veterans Affairs as a single account.

(b) DEPOSITS TO THE ACCOUNT.—There shall be deposited into the Account—

(1) funds appropriated to the Account for fiscal years beginning after the date of the enactment of this Act;

(2) any funds that the Secretary may, subject to approval in an appropriation Act, transfer to the Account from funds appropriated to the Department of Veterans Affairs for any purpose, except that such funds may be transferred only after the date on which the Secretary transmits written notice of, and justification for, such transfer to the Committees on Veterans Affairs and Appropriations of the Senate and the House of Representatives; and

(3) proceeds described in section 5(b)(4)(A).

(c) USE OF FUNDS.—(1) The Secretary may use the funds in the Account only for the purposes described in section 5(a).

(2) When a decision is made to use funds in the Account to carry out a major medical facility project (as defined in section 5004(a)(3)(A) of title 38, United States Code) under section 5(a)(1) of this Act, the Secretary shall notify in writing the Committees on Veterans Affairs and Appropriations of the Senate and the House of Representatives of the nature of, and justification for, the project and the amount of expenditures for such project.

(d) REPORT.—Not later than 60 days after the end of each fiscal year in which the Secretary carries out activities under this Act, the Secretary shall transmit to the Committees on Veterans Affairs and Appropriations of the Senate and the House of Representatives a report on the amount and nature of the deposits into, and the expenditures from, the Account during such fiscal year and of the amount and nature of other expenditures made pursuant to section 5(a) during such fiscal year.

(e) FINAL ACCOUNTING AND CERTIFICATION.—When the Secretary completes all actions necessary for the realignments and major mission changes required pursuant to this Act, the Secretary shall—

(1) transmit to the Committees on Veterans Affairs and Appropriations of the Senate and the House of Representatives a report containing an accounting of—

(A) all funds deposited into and expended from the Account or otherwise expended under this Act; and

(B) any amount remaining in the Account; and

(2) transmit to the Secretary of the Treasury a certification that all such actions have been completed.

(f) DISPOSITION OF UNOBLIGATED FUNDS.—Upon receipt of a certification pursuant to subsection (e)(2), the Secretary of the Treasury shall transfer all unobligated funds remaining in the Account to the miscellaneous receipts account in the United States Treasury.

SEC. 9. CONGRESSIONAL CONSIDERATION OF COMMISSION REPORT.

(a) TERMS OF THE RESOLUTION.—For purposes of section 3(b), the term "joint resolution" means only a joint resolution—

(1) which is introduced within 45 days after the date on which the committees referred to in section 3(a) receive a report by the Secretary of Veterans Affairs pursuant to section 3(a)(1)(A), and—

(2) which does not have a preamble;

(3) the matter after the resolving clause of which is as follows: "That Congress disapproves the recommendations of the Commission on Medical Facility Realignment and Major Mission Change established by the Secretary of Veterans Affairs as submitted to the Secretary of Veterans Affairs on _____," the blank space being appropriately filled with the date; and

(4) the title of which is as follows: "A joint resolution disapproving the recommendations of the Commission on Medical Center Realignment and Major Mission Change".

(b) REFERRAL.—A resolution described in subsection (a) introduced in the House of Representatives shall be referred to the Committee on Veterans Affairs of the House of Representatives. A resolution described in subsection (a) introduced in the Senate shall be referred to the Committee on Veterans Affairs of the Senate.

(c) DISCHARGE.—If the committee to which a resolution described in subsection (a) is referred has not reported such resolution (or an identical resolution) within the 45-day period beginning on the date on which such resolution is introduced, such committee shall be discharged from further consideration of such resolution as of the day after the last day of such period, and such resolution shall be placed on the appropriate calendar of the House involved.

(d) CONSIDERATION.—(1) On or after the third day after the date on which the committee to which such a resolution is referred has reported, or has been discharged (under subsection (c)) from further consideration of, such a resolution, it is in order (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution (but only on the day after the calendar day on which Member announces to the House concerned the Member's intention to do so). All points of order against the resolution (and against consideration of the resolution) are waived. The motion is highly privileged in the House of Representatives and is privileged in the Senate and is not debatable. The motion is not subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the respective House shall immediately proceed to consideration of the joint resolution without intervening motion, order, or other business, and the resolution shall remain the unfinished business of the respective House until disposed of.

(2) Debate on the resolution and on all debatable motions and appeals in connection therewith shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the resolution. An amendment to the resolution is not in order. A motion further to limit debate is in order and not debatable. A motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to is not in order.

(3) Immediately following the conclusion of the debate on a resolution described in subsection (a) and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the appropriate House, the vote on final passage of the resolution shall occur.

(4) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution described in subsection (a) shall be decided without debate.

(e) CONSIDERATION BY OTHER HOUSE.—(1) If, before the passage by one House of a resolution of that House described in subsection (a), that House receives from the other House a resolution described in subsection (a), then the following procedures shall apply:

(A) The resolution of the other House shall not be referred to a committee and may not be considered in the House receiving it except in the case of final passage as provided in subparagraph (B)(ii).

(B) With respect to a resolution described in subsection (a) of the House receiving the resolution—

(i) the procedure in that House shall be the same as if no resolution had been received from the other House; but

(ii) the vote on final passage shall be on the resolution of the other House.

(2) Upon disposition of the resolution received from the other House, it shall no longer be in order to consider the resolution that originated in the receiving House.

(f) RULES OF THE SENATE AND HOUSE.—This section is enacted by Congress—

(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of a resolution described in subsection (a), and it supersedes other rules only to the extent that it is inconsistent with such rules; and

(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

SEC. 10. DEFINITIONS.

In this Act:

(1) The term "Account" means the Department of Veterans Affairs Medical Facility Realignment Account established by section 8 of this Act.

(2) The term "major mission change" means any substantive change in clinical programs or patterns of delivery of medical care at a medical facility, or part thereof, pursuant to the terms and limitations contained in the charter referred to in section 2(a).

(3) The term "medical facility" means a Department of Veterans Affairs facility referred to in section 601(4)(A) of title 38, United States Code.

(4) The term "realignment" means closure, consolidation, and any other action which both reduces and relocates functions and civilian personnel positions.●

TIBET HUMAN RIGHTS

● Mr. LEAHY. Mr. President, last August, I had the privilege of leading a delegation of Senators to China. With me were my dear friend of many years and senior colleague at that time, Bob Stafford, and my good friend and colleague on the Agriculture Committee, TOM DASCHLE. As part of that trip, our delegation made the first visit by Senators to Tibet. Our principal reason in going to Tibet was to examine firsthand the human rights situation there, and to make known to Chinese and Tibetan authorities our very strong views about the need for China to observe internationally recognized standards of human rights. We had received many reports of Chinese human rights abuses against Tibetans who favor independence from China, and Chinese suppression of the traditional Tibetan culture based on the Lamaistic sect of Buddhism. In preparation for the trip, we received briefings from administration officials and others on Chinese behavior in Tibet. We were particularly concerned about widespread and highly credible reports of arrests, torture and indefinite detention without trial of Tibetan political dissidents and religious activists.

We had many discussions in Lhasa with Tibetan leaders, Mr. President, and I thought we made real progress on human rights. We carefully distinguished between our concerns about Chinese treatment of Tibetan dissidents, which were based on China's obligations under international law, and the political issue of China's sovereignty over Tibet. Our delegation got new information from the Chinese about certain political prisoners, and in followup meetings later here in Washington, they gave us even more details. I was encouraged by what seemed to be an evolving Chinese attitude about the legitimacy of international human rights concerns, and sensitivity toward world opinion regarding their behavior in Tibet.

Then came new proindependence demonstrations and violence last March in Lhasa. Many Tibetan demonstrators were killed, many, many more were arrested or just disappeared. Martial law was imposed on Lhasa, the foreign press barred, foreign tourists asked to leave, U.S. diplomats refused entry to carry out their normal duties to protect American citizens, and a veil of secrecy came down on Tibet.

Mr. President, I do believe extraordinarily important changes are happening in China. We watch awestruck as a million Chinese students, workers and intellectuals demonstrate for democracy, freedom of the press, and basic political rights in Tienanamen Square in front of Chairman Mao's gigantic picture. China's leadership is confronting massive demands for political reform and a far-reaching loosening of the Communist Party's control over people's lives. Chinese activists are demanding political as well as economic reforms.

There is every reason to believe that change in Beijing can effect events in Lhasa as well. Greater democracy, political reform, and respect for fundamental human rights in Han China can and should mean greater respect for Tibetan political, religious, and cultural autonomy—exactly as is provided the Tibetan Autonomous Republic in China's Constitution. But, I do not think those changes will come without continued expressions of concern by those of us in the West who want to advance and defend the cause of human rights everywhere, including in Tibet. China must keep hearing from supporters of human rights abroad that we expect internationally recognized standards of human rights to be observed in the farthest reaches of Tibet as much as in downtown Shanghai.

Mr. President, I daresay every member of the Senate has written and signed numerous letters to the leaders of the Soviet Union on behalf of named political, religious and cultural dissidents in that country denied their rights by the Soviet Government. We have been writing those letters and sending those telegrams for many, many years now. And, it has paid off. Think of the Soviet refuseniks, dissidents, internal exiles, political prisoners, and inmates of pychiatric wards who have finally been allowed to emigrate or to receive their liberty inside the Soviet Union as a result of the hundreds or thousands of letters, telegrams, calls, and visits of Members of Congress to Soviet leaders.

I believe very strongly that the same kind of long-term commitment to the cause of human rights in Tibet is urgently needed. Senators need to begin to write to Chinese authorities with the same persistence, diligence, and forcefulness as we have all these years on behalf of Soviet citizens mistreated by their government. The human rights situation in Tibet is acute; hundreds of people are imprisoned without charge or trial because of their political or religious beliefs and activities. Many have been held for years without trial. Families are denied information about their loved ones in prisons, and often it is impossible even to learn in which prison detainees are held. There are extremely disturbing reports of physical abuse, even torture, of some prisoners.

Mr. President, working closely with Tibet groups and international human rights organizations, I have compiled a list of names and identifying information about a number of Tibetan political prisoners. I emphasize it is far from a complete list of those held for political or religious activities. But, it is a list which has been checked and rechecked for accuracy. Now, it is ready to be used to try to help the cause of human rights in Tibet.

I urge every Senator to make use of this list to write letters to Chinese and Tibetan authorities on behalf of those persons identified on it. And, I hope Senators will not stop at sending one letter or one telegram. We need to keep a flow of Dear Colleagues circulating for signatures in support of the rights of these detainees, just as we have done so successfully for many years.

The partial list follows:

PARTIAL LIST OF TIBETAN POLITICAL PRISONERS IN LHASA AREA PRISONS

[April 5, 1989]

Name of prisoner	Arrest date [1]	Prison [2]	Tortured [3]	Demonstration [4]
1. Yulo Dawa Tsering (see attached)	AI–Mar. 14, 1988	Sangyip	X	
2. Lobsang Tenzing, age 28, student at Lhasa University, voted best student at the university by his peers. Sentenced to death on Jan. 19, 1989.	Apr. 16, 1988 AI–Apr. 22, 1988	Gutsa		Mar. 5, 1988.
3. Sonam Wangdu a.k.a. Shuden, age 27, businessman, husband of Dolma Yangzom, resident Jebun Gang, Lhasa. Arrested at Nyalam while fleeing from Tibet. Firsthand account of severe torture as witnessed by his wife when she visited him in prison because the Chinese wanted a confession.	do	do		Mar. 5, 1988.
4. Ven. Palden Gyatso age 56, born in Nagchu in 1933, from Drepung Monastery. He is serving an 8 year prison sentence imposed April, 1984 for writng and displaying wall-posters for Tibetan independence. Palden Gyatso was arrested on Aug. 26, 1983 during a wave of arrests of people suspected of being active Tibetan nationalists because of their political or religious activities. At the time of his arrest he was reportedly accused of having been in contact with Geshe Lobsang Wangchuk, who died of prison ill-treatment on 4 November, 1987. Ven. Palden Gyatso had been first imprisoned in 1959 for his alleged part in the Tibetan Uprising against the Chinese occupation of Tibet. He then spent 16 years in prison and was released in 1975.	Aug. 26, 1983 AI/prisoner of conscience ASA May 17, 1987.	Sangyip	X	
5. Tanak Jigme Sangpo age 56, born in Lhasa in 1933. Before 1959 he was a teacher at Sesing School. He was arrested in 1960 for posting a wall-poster denouncing Mao Tse-tung in a school. He was charged with instigating students to dissent and was therefore sentenced to 3 years imprisonment at Sangyip. In 1969 he was again arrested by Chinese authorities for encouraging many Tibetan youths to flee Tibet. He was imprisoned for 10 years at Sangyip. When he was released in 1979 he was sent to Nyethang Labor Camp, during which time he became "mentally retarded" evidenced by his shouting "Down with Deng Shiao Peng." For this he was again arrested in September 1983 and imprisoned at Sangyip where he remains today.	September 1983	do	X	
6. Shol Dawa, age 54, born at Lhasa, son of Mr. Namgyal, resident of Lhasa. In 1979 during the visit of the first delegation of HHDL, he had shouted "Long Live HHDL," "Tibet for Tibetans," and "Chinese quit Tibet." In 1980 he was arrested and imprisoned for 3 years at Sangyip. He was later shifted to Nyethang Brick Factory to work and was released in 1984. On Aug. 20, 1985 he was arrested without charge during the "20th TAR celebration" in Lhasa. Since then he has been in Gutsa prison, although released later and again arrested in 1986.	1986	Gutsa	X	
7. Gyaltsen Choesang, from Garu Nunnery, situated to the north west of Lhasa. She was arrested during the Dec. 10, 1988 demonstration from the Garu Nunnery.	Dec. 10, 1988	do	X	Dec. 10, 1988.
8. Ven. Kunsang Tsering, age 27, born in Gyama, near Lhasa (Toelung), monk of Ganden Monastery, arrested at the monastery	Dec. 15, 1987	do	X?	
9. Choezed Tenpa Chophel, age 66, reason for arrest: possessed a Tibetan copy of "My Land and My People". Visited India in 1985 and returned to Lhasa in 1986 (exact date unknown). Husband of Tsering Lhamo who resides in Dharamsala, India. Tsering Lhamo is considered a staunch Tibetan national, who escapted Tibet in 1985. The arrest of Choezed Tenpa Chopel clearly shows reprisals against family members of outspoken dissidents.				
10. Tsering Drakpa	AI–1985	Takse	X	
11. Gyaltsen Choephel, age 27, carpenter, mother's name Phurbu, resident of Garu Shar, (Barkhor area), Lhasa. His only sister, Tsamla is a nun of Tsamlung Nunnery situated to the east of Lhasa.	Apr. 16, 1988	Gutsa	X	Mar. 5, 1988.
12. Ms. Tsering Dolkar, born in Lhasa. She was a teacher at sasing School to the east of Lhasa. She went to India in 1988 and was arrested upon her return to Lhasa in May 1988.	May 1988			
13. Gyaltsen Tinley, from Garfu Nunnery. She was arrested during the Dec. 10, 1988 demonstration	Dec. 10, 1988	do	X	Dec. 10, 1988.
14. Ven. Lobsang Tsundu, age 51, born in Toelung, monk of Drepung Monastery, arrested on Mar. 7, 1988	Mar. 7, 1988	Sangyip		Mar. 5, 1988.
15. Lobsang Tenzin, age 59, arrested in Lhasa City. He is a retired teacher		Gutsa	X	
16. Gyaltsen Tendar, from Garu Nunnery, arrested during the Dec. 10, 1988 demonstration	Dec. 10, 1988	do	X	Dec. 10, 1988
17. Tamdin Sithar a.k.a. Kunsang Tse born in 1945, father Kunsang Tse Rigdor, arrested on August 26, 1983 profession: Labor Production Brigade No. 1; he was a storekeeper there. In 1965 he was accused of being a "reactionary" and was sent to Labor Production Brigade. His first arrest was in 1971 when he was acknowledged, by the Chinese of being, a known Tibetan nationalist. In 1975 he was transferred to Sangyip Labor Brigade and in the same year was again transferred to Drapchi Branch Labor Camp No. 5. The date of his release is unknown. However, in 1983 he was rearrested and again sent to Sangyip. In August/September 1986 he was sentenced to 12 years imprisonment by the Chinese Authorities. He is serving that sentence in Sangyip.	AI/prisoner of conscience ASA May 17, 1987, June 1987.	Sangyip	X	
18. Ven. Jamyang Choedhe, age 23, born in Tsang, monk of jokhang Temple, arrested during Mar. 5, 1988 demonstration	AW July 1988 No. 254	do	X	Mar. 5, 1988.
19. Migmar Tsering, age 21, born in Lhasa, resident of Lhasa city, arrested on Sept. 27, 1988 for throwing stones at Chinese video cameramen who were filming the Sept. 27, 1988 demonstration to commemorate the demonstration of Sept. 27, 1987.	Sept. 27, 1987	Gutsa	X	
20. Ven. Ngawang Gedun, age 31, born in Yamdrog, monk of Drepung Monastery, arrested in May 1988	May 5, 1988			
21. Ven. Tsering Dhondup, age 26, born in Nyethang, monk of Ratoe Monastery, arrested at the monastery, arrested for speaking against the Chinese Socio-Economic Questionnaire regarding Tibet (see attached). Sentenced on Jan. 19, 1989 to 18 years imprisonment. Listed below are four additional monks who were arrested at Ratoe Monastery along with Ven. Tsering Dhondup. However, these four were arrested for refusing to listen to Chinese Communist indoctrination. The names are: Ven. Chonjor, born in Nyethang, arrested on Oct. 3, 1988, Ven. Annan, age 21, born in Nyethang, arrested on Oct. 4, 1988, Ven. Lobsang, born in Nyethang arrested on Oct. 4, 1988, and Ven. Dorjee, born in Nyethang, arrested on Oct. 4, 1988. Reports of their arrest were given by ICT to the State Department, and reported in the Washington Post on Nov. 1, 1989 (see attached).	Oct. 3, 1988	do	X	
22. Ms. Yeshi Yangchen, age in thirty's, arrested on the night of Oct. 3, 1987	AW July 1988 No. 55	Gutsa? No. 55	X?	Oct. 1, 1987.
23. Tenpa Paljung, age 59, arrested on Dec. 22, 1987 for having posters in his possession	AW July 1988, No. 154			
24. Ven. Lobsang Namgyal, age 61, arrested on March 10, 1988, he was a former monk of Gyutoe Monastic college at Ramoche Temple, Lhasa.	AW July 1988, No. 162			
25. Tsering Dorjee age 27, resident of Barkhor area, Sang-lam road No. 2, North Lhasa. Sentenced to 3 years' imprisonment on Jan. 19, 1989 for damaging public property. (He could have been arrested on the 29th.).	Sept, 28, 1988	Sangyip	X	Sept. 27, 1988.
26. Ven. Tenpa Wangdak, age 51, born at Lhoka Danang, monk of Ganden Monastery, arrested at the monastery on Mar. 7, 1988. He is reported to be held in the Sitru section of Sangyip prison as of November, 1988.	Mar. 7, 1988	do		
27. Lhakpa Tsering age 33, born in Lhasa, resident of Lhasa, arrested for sticking wall-posters denouncing Chinese occupation of Tibet. He was supposedly pasting wall-posters during his night-patrol around the bank where he was caught red-handed (see attached).	Sept. 29, 1988 according to Radio Lhasa broadcast on same day.	Gutsa	X	
28. Mrs. Lhakpa Tsamchoe age 31, born in Lhasa, arrested on May 30, 1988	May 30, 1988	do	X	Mar. 5, 1988.
29. Ven. Lobsang Dhargyal a.k.a. Wangdu, age 22, born in Toelung, near Lhasa, was severely injured during the shooting of peaceful demonstrators on Dec. 10, 1988. Monk of Ganden Monastery.				Dec. 10, 1988.
30. Sonam Gyalpo, age 35, born in Tongrachu,, District Lhokha Gongkhar. He was participating in Sept. 27, 1987 demonstrations and was arrested on the same day. His arrest was confirmed by his younger brother Wangdhak who had fled Tibet and is studying in India.	Sept. 27, 1987	do	X	Sept. 27, 1987.
31. Ms. Pema Dolma no details available, arrested on Oct. 1, 1987	AW July 1988, No. 133	Gutsa?	X	Oct. 1, 1987
32. Ven Thupten Tsering, age 26, born in Markham, kham, son of Mr. Nyima and Mrs. Tsomo, arrested in Lhasa City during the Mar. 5, 1988 demonstration, monk of Sera Monastery.	Mar. 5, 1988			Mar. 5, 1988.
33. Ven. Ngawang Zegyal age 21, born in Toelung, monk of Drepung Monastery and arrested on Oct. 7, 1988	Oct. 7, 1988			
34. Jamyang, a postal worker from Kham region. Arrested in 1985	Congress, Senator Leahy	Drapchi	X	
35. Ven. Ngawang Topchen age 21, born in Dripung Lungshou, monk of Drepung Monastery. Arrested on Mar. 5, 1988	Mar. 5, 1988			Mar. 5, 1988.
36. Bhumo Pasang, age 21, no details	AW July 1988, No. 139	Gutsa?	X	
37. Ven. Thupten Kelsang Thalutsogentsang age 45, former Tibetan monk and horse-cart driver. He is detained since 1981 for shouting slogans in favor of the independence of Tibet. Thubten Kelsany was an educated monk before his first arrest in 1959. How long he was imprisoned at that time is not known, but he is said to have been assigned to the Nachen Corrective Labor Unit. Work under surveillance is a common form of punishment in Tibet. It usually involves deprivation of certain rights, restriction of freedom of movement and the requirement that those concerned report regularly to the police or other local authorities. He is reported to have been rearrested on Dec. 3, 1981 for shouting slogans supporting Tibetan independence. (see attached).	Dec. 3, 1981 AI, ASA, May 17, 1987, June 1987.	Sangyip	X	
38. Penpa Tsering age 17, resident of Banak Shol, Lhasa. Reason for arrest according to Radio Lhasa broadcast on Mar. 10, 1988 was for burning public property.	Oct. 6, 1987	Sangyip?	X	Oct. 6, 1987.
39. Ven. Tsering Sonam age 27, born in Tsangtok near Ganden Monastery, was a monk there.	Mar. 7, 1988	Sangyip		Mar. 5, 1988
40. Jigme Gyatso age 19, profession: driver. Son of Paljor Norbu, resident of Jayang Nub area, Lhasa, Father's profession: scripture publisher. Reason for arrest according to Lhasa Radio broadcast on Mar. 10, 1988: burning public property.	Oct. 6, 1987	do	X	Oct. 6, 1987
41. Ven. Thupten Namdrol, age 62, born in Dagpo near Kongpo, monk of Jokhang Temple, arrested on Mar. 5, 1988. He was earlier arrested on Dec. 14, 1987 when he was the care-taker of Da-ra Lhupug a.k.a. Youth Temple which came into Jokhang administration in 1986. Monks of this temple are considered by Chinese authorities to be "known nationalists".	AW July 1988, No. 227?			Mar. 5, 1988.
42. Ms. Tseten Dolkar, age 34–36, arrest date unknown	AW July 1988, No. 51	Gutsa	X?	
43. Ven. Tsondu Tharchin, age 31, born in Meldro Getong, near Lhasa, arrested from Ganden Monastery on Mar. 7, 1988	Mar. 7, 1988	Sangyip	X	Mar. 5, 1988.
44. Tsering Dhondup, age 29, student at Buddhist College located at Nechung Monastery. Imprisoned for participation in the demonstration and alleged by Chinese authorities to have killed a well-armed Chinese policeman, Yuan Shi Sheng. Not yet reported to have been sentenced though arrested with Lobsang Tenzin for the same reason.	Apr. 16, 1988, AI–Apr. 22, 1988	Gutsa	X	Mar. 5, 1988.

PARTIAL LIST OF TIBETAN POLITICAL PRISONERS IN LHASA AREA PRISONS—Continued

[April 5, 1989]

Name of prisoner	Arrest date [1]	Prison [2]	Tortured [3]	Demonstration [4]
45. Lobsang Norbu a.k.a. Choezed Lobsang Norbu, age 54, former monk who spent many years in Chinese prisons and labor camps, arrested September 18 or 19, 1987 for posting nationalists wall posters.		Gutsa	X	
46. Ven. Jampel Wangchuk, age 21, born in Toelung, monk of Drepung Monastery, arrested on Oct. 7, 1988	Oct. 7, 1988			
47. Tenzin Phuntsok, age 34, born in Lhasa, son of Jhampa, resident of Lhasa	Nov. 26, 1988			
48. Ven. Lobsang Thapkey, age 22, born in Nagchu, monk of Sera Monastery, arrested from the monastery on Mar. 5, 1988	AW July 1988, No. 206	Sangyip	X	Mar. 5, 1988.
49. Anu a.k.a. Ngawang Drupchok, age 28, born in Phenbo, monk of Drepung Monastery, was severely injured during Dec. 10, 1988 demonstration.				Dec. 10, 1988.
50. Tsering Chophel, no details, arrested on Oct. 1, 1987	AW July 1988, No. 134	Gutsa	X	Oct. 1, 1987.
51. Ven. Ngawang Namgyal, age 36, born in Toelung, near Lhasa. Monk of Drepung Monastery	May 1988	Gutsa		Mar. 5, 1988.
52. Thupten, Jamyang's (#35) younger brother was arrested at the same time	Congress, Senator Leahy	Drapchi	X	
53. Ven. Ngawang Palkar, age 21, born at Toelung, near Lhasa, monk of Drepung Monastery, arrested on Mar. 5, 1988	Mar. 3, 1988			Mar. 5, 1988.
54. Amdo Lungtok, age 64, arrested on Mar. 8, 1988 in Lhasa	AW July 1988, No. 171			
55. Ven. Chungdak a.k.a. Chungdak Turing ("turing" is a Chinese title for a monastery official), age 21, monk of Ganden Monastery, arrested on Mar. 5, 1988 in Lhasa City during the demonstration on Mar. 5, 1988, He has been known to have been severely tortured. He was appointed as an official by the Chinese authorities before his arrest.	Mar. 5, 1988	Sangyip	X	Mar. 5, 1988.
56. Tenzin Norbu, age 29, a carpenter by profession, arrested on Mar. 5, 1988	AW July 1988, No. 236	Drapchi	X	Mar. 5, 1988.
57. Ven. Woeser Tulku a.k.a. Sermey Tsawa Tulku, age 23, born in Markham, Kham, arrested at Sera Monastery on Mar. 5, 1988 at midnight. Woeser Tulku reportedly did not participate in any demonstration, but spoke up at a "re-education" session held by Chinese authorities before Monlam, 1988, in Sera Monastery. He refused to take part in the Monlam festival. Confirmation of Woeser Tulku's arrest and continued imprisonment has come through at least seven sources. He is one of the most frequently cited political prisoners in part because he is a highly revered religious figure.	AW July 1988, No. 226	Sangyip	X	
58. Lobsang Wangchuk, age 25, no details available, arrest date not known	AW July 1988, No. 186			
59. Ven. Tashi Shapsil, age 20, born in Gyama, Toelung, near Lhasa, monk of Ganden Monastery and arrested in Lhasa City on Mar. 7, 1988.	Mar. 7, 1988	Sangyip	X	Mar. 5, 1988.
60. Phuntsok Tsering, age 19, arrested in December 1987	AW July 1988, No. 158	Gutsa	X	
61. Ven. Jampal Sherab, age 24, born in Lhoka, monk of Drepung Monastery, arrested on Oct. 7, 1988	Oct. 7, 1988			
62. Yeshi Phuntsok, no details available, arrested on Mar. 5, 1988	AW July 1988, No. 240			
63. Ven. Ngawang Thosam, age 22, monk of Drepung Monastery, arrested on Oct. 7, 1988	Oct. 7, 1988			
64. Lobsang Ngodup, age 18, arrested on Mar. 5, 1988 in Lhasa	AW July 1988, No. 239			
65. Ven. Tsering Phuntsog, monk of Nechung Monastery, arrested on Mar. 3, 1988	Mar. 3, 1988			
66. Ms. Dolma Yangzom, no details available	AW July 1988, No. 140			
67. Ven. Ngawang Samphel, age 24, born in Phenbo, monk of Drepung Monastery, arrested on Oct. 7, 1988	Oct. 7, 1988			
68. Do Tse, born in Lhasa, arrested from his house in Lhasa on Aug. 10, 1988. He was a teacher at "TAR" University in Lhasa for 3 years and at the time of arrest was working at the TV station in Lhasa.	Aug. 8, 1988			
69. Ven. Ngawang Chime, age 20, monk of Drepung Monastery, arrested on Oct. 7, 1988	Oct. 7, 1988			
70. Tenpa Lhodoe, no details available, arrested on Dec. 20, 1987	AW July 1988, No. 156			
71. Ngawang Phuntsok, a.k.a. Ven. Lobsang Tenpa, age 29, from Sera Monastery. Born in Toelung, was severely injured during Dec. 10, 1988 demonstrations.				Dec. 10, 1988.
72. Nyima Tsering, no details available, arrested on Dec. 20, 1987	AW July 1988, No. 157			
73. Gyaltsen Chosang, age 24, nun from Garu Nunnery. Born in Namtsokhang. Arrested following Dec. 10, 1988 demonstration				Do.
74. Gyaltsen Wangchuk, age 25, nun from Garu Nunnery. Born in Drikung Lungshoe. Arrested following Dec. 10, 1988 demonstration				Do.
75. Gyaltsen Tendar, age 27, nun from Garu Nunnery. Born in Penpo Lhundrup. Arrested following Dec. 10, 1988 demonstration				Do.
76. Gyaltsen Wangmo, age 22, nun from Garu Nunnery. Born in Damshung. Arrested following Dec. 10, 1988 demonstration.				Do.
77. Gyaltsen Trinley, age 22, nun from Garu Nunnery. Born in Damshung. Arrested following Dec. 10, 1988 demonstration				Do.
78. Lobsang Wangmo, age 20, nun from Garu Nunnery. Born in Damshung. Arrested following Dec. 10, 1988 demonstration				Do.
79. Ngawang Lhakdon, age 18, nun from Garu Nunnery. Born near West Lhasa. Arrested following Dec. 10, 1988 demonstration				Do.
80. Gyaltsen Shoetso, age 23, nun from Garu Nunnery. Born in Taktse Dzong. Arrested following Dec. 10, 1988 demonstration. It should be noted that this was her second arrest.				Do.
81. Gyaltsen Chokyi, age 18, nun from Garu Nunnery. Born in Nyakra (Ngiara) Arrested following Dec. 10, 1988 demonstration				Do.
82. Gyaltsen Lhosel, age 18, monk from Drepung Monastery. Born in Lhokha Yarlung. Arrested following Dec. 10, 1988 demonstration.				Do.
83. Lobsang Tenzin, age 16, monk from Drepung Monastery. Born within Lhasa. Arrested following Dec. 10, 1988 demonstration				Do.
84. Dongar Wangdu, age 20, monk from Nechung Monastery. Birthplace unknown. Arrested following Dec. 10, 1988 demonstration				Do.
85. Tsering Jhongnar, age 47, monk from Nechung Monastery. Born in Lhasa. Known to have been tortured and arrested following Dec. 10, 1988 demonstration.			X	Do.
86. Tsering Shel-Kyokpa, age 47, formerly a monk from Sera Monastery. At the time of his arrest he was a carpenter. He was wounded in the head and kidneys on Dec. 10, 1988. Imprisoned at Gutsa.				Do.
87. Tenzin Phuntsok, age 30, employed at the General Mixed Products Factory No. 1. Previously arrested and imprisoned with Geshe Lobsang Wangchuk. Upon his release from prison he tried to become a monk, but was not allowed to do so. In 1985 he went to the south of India and took refuge at Sera Monastery. Later, his mother, Yutso, who lives north of Lhasa near Reting Monastery wrote and asked him to return to Tibet because his father had died. He did so and was picked up by the Public Security Bureau. A number of Tibetans witnessed him being beaten by the PSB. He was arrested at 2 a.m. from his home. He is presently imprisoned.				Do.
88. Ngawang Namgyal, age 28, monk from Drepung Monastery. Born in Doeling Yamste. Arrested after Monlam (March) 1988. Believed to have been taken to Sangyip for re-education.	March 1988	Sangyip		
89. Ngawang Gendun, age 29, monk from Drepung Monastery (he was the treasurer of Drepung) Born in Lhoka. Arrested after Monlam (March) 1988. Believed to have been taken to Sangyip for re-education.	March 1988	do		
90. Ngawang Topgyal, age 25, monk from Drepung Monastery. Born in Phondo. Arrested after Monlam (March) 1988. Believed to have been taken to Sangyip for re-education.	March 1988	do		
91. Phurbu Tsering, age 27, a house painter for Office Project No. 1 in Lhasa, was accused of participating in burning a Chinese restaurant on March 6. Phurbu's wife had a shop right next to the restaurant. Phurbu had initially been arreseted on the 6th or 7th, and badly beaten for one day in a police station, then released. He was rearrested on the 8th or 9th and sent to Gutsa. Phurbu was stripped naked and hung from the ceiling for an entire night. Later, he was brought to the Utitod section of Sangyip prison.	Mar. 6, 1988	do		March 5, 1988
92. Lodol Rabsang, age 65, born in Toelung, arrested on Oct. 1, 1987	AW July 1988, No. 144	do	Oct. 1, 1987	
93. Shango Shenan, age 64, also known as Choepel, born in Toelung, a caretaker at the Jokhang Temple. He is also believed to have been arrested on Oct. 30, 1987.	AW July 1988, No. 93	Mar. 5, 1988		Mar. 5, 1988
94. Tsam, age 50, female, used to work at the Lhasa city transportation office. She had not been involved in the recent demonstrations. She went to Lhasa on March 15th and was arrested the same day. Ostensibly she was arrested for instigating the demonstrations. She spent a year in Dharamsala, India in 1985–86. She is considered to have been politically active some years earlier during visits by one of the Tibetan delegations to Tsetang and Ganden.	Mar. 15, 1989	Gutsa		
95. Pemba Tsering, age 30, male, shop-owner from Lhasa (Banakshol). He was arrested shortly after the March 1989 demonstrations when he refused to let a policeman use his shop to make calls on his walkie-talkie. Tibetan delegations to Tsetang and Ganden.		Sangyip (or Outhridu)	March 1989.	
96. Pemba Tsering, age 30, male, shop-owner from Lhasa (Banakshol). He was arrested shortly after the March 1989 demonstrations when he refused to let a policeman use his shop to make calls on his walkie-talkie.		Sangyip (or Outhridu)		March 1989.
97. Dekyi, age 15 or 16, female, student from No. 2 Middle School. She lived in the Banaksl area of Lhasa. Arrested during the night for being involved in a demonstration.	Mar. 7, 1989	Sangyip		Do.
98. Jampa Drolkear, age 16, female from No. 2 Middle School. She lived in Lhasa (Banakshol). Also arrested during the night for involvement in a demonstraton. Mother's name: Tsamje.	do	do		Do.
99. Yeshe, age 20, male, house painter from Lhasa (Banakshol). Arrested during the night in the Kirey (Banakshol) area. Mother's name: Sonam Chodrun.	do	do		
100. Sonam Waznqdu, age 31, male, arrested during the night in the Kirey (Banakshol) area for involvement in a demonstration. Mother's name: Migmar.	do	do		Do.
101. Kelsang, age 27, female, unmarried and living in Kirey (Banakshol) area. Arrested at demonstration though she too, was not actually involved. Her family was allowed to give her a change of clothes at Sangyip prison.		do		

[1] Where indicated, Amnesty International or Asia Watch has also listed, mentioned or adopted the prisoner and often confirmed the date of arrest.
[2] The prison listed here is the last known prison where the prisoner was kept, however prisoners are sometimes moved between prisons.
[3] It is widely accepted that torture of recently arrested Tibetans is routine; however the "X" denotes those prisoners who are known to have been severly tortured.
[4] This column indicates the date of a demonstration in which the prisoner is believed to have taken part, whether actively or passively.

Note.—Numbers 96–100 were arrested as a result of information given by informants. ICT has been advised that the informers were paid 300 yuan for each name given.

APPENDIX I

Appendix I refers to some individuals who were imprisoned on or following the March 5, 1988 demonstration. They are included herewith since the source of this information is considered very reliable. We do not, however, know where they are in prison.

1. Tsering Nyima—age 26, from Phenpo.
2. Tang Mai Ha—age 30, from Kham, Khentse.
3. Gyaltsen Chopel—age 26, from Lhasa (Garushar-Barkhor).
4. Nyima Dorjee—age 24, from Phenpo, Rading.
5. Tsering Dorjee—age 26, from Lhasa. Worked at the Food Supply Department.
6. Jampa Phuntsok—age 20, from Lhasa, Yabshi Phunkhang.
7. Phuntsok Thondu—age 20, Lhasa, Yabshi Phunkhang.
8. Dorjee Tsering—age 36, from Lhasa. Worked at the Lhasa Electricity Department.
9. Pema Tenzin—age 30, from Phenpo, Rading.
10. Lhakpa Thondup—age 19, Lhasa, Kyangseb.

APPENDIX II

Appendix II refers to monks from Ganden Monastery. We believe all, except numbers 11 and 12, are imprisoned in Sangyip prison. Lobsang Dawa (#11) and Dakpa Tengye (#12) are imprisoned in Gutsa. Also, we believe they were arrested on or around December 10, 1988.

1. Tenpa Wangdak—from Lhasa (Nyethong Dzong). Reciter of texts. (lay name Sonam)
2. Dakpa Tashi—from Taktse Dzong. Leader. (lay name Chungdak)
3. Phuntsog Gyantsen—from Mendrol. Master of Embroidery. (lay name Lobsang Yeshe)
4. Tenzin Tsultim—from Taktse Lhamo-Chawa. Reciter of texts. (lay name Tsering Sonam)
5. Drakpa Sonam—from Mendrol Gyama-Takjug. In charge of discipline. (lay name Palden)
6. Lobsang Chunjor—from Mendrol Gyama-Tung-nye. Geshe or Doctor of Philosophy. (lay name Kunsang Tsering)
7. Lobsang Palden—from Chamdo, Kham. Cook. (lay name Gyetar)
8. Drakpa Tsultim—from Mendrol-Gegu. Junior Secretary. (lay name Tsondup)
9. Tsondup Gyaltsen—from Mendrol-Gyama-Tung-Gyama. Reciter of texts. (lay name Sonam)
10. Lhendup Kelden—from Mendrol-Gyama-Lhok-da. Reciter of texts. (lay name Tashi)
11. Lobsang Dawa—from Mendrol-Gyama-Lhok-da. Musician, trumpet. (lay name Sangye)
12. Dakpa Tengye—from Mendrol-Gyama-Tung-Nge. Reciter of texts. (lay name Tsering)

YULO DAWA TSERING

CHINA

Case Profile

Yulo Dawa Tsering, a 53 year-old Ganden Monastery monk, was arrested on December 26, 1987 for, according to government sources, his "reactionary statements in favour of Tibetan independence" and his speeches to foreigners aimed at "obtaining worldwide support in bringing about Tibetan independence as soon as possible." He is believed to have remained in custody until he was formally charged on March 9, 1988 with "counter-revolutionary" propaganda and agitation.

Amnesty International believes that Yulo Dawa Tsering is being punished for comments he made during lunch with an Italian friend, Dr. Stefano Dallari, and a resident of the Tushita Dharma Centre in Italy, Geshe Sherab Gyatso. The conversation, which was videotaped by the visitors, has Tsering describing the current situation in Tibet as well as him voicing his hopes for the Dalai Lama's return to an independent Tibet.

Tsering, considered by Tibetans to be a "Living Buddha," was publicly tried on January 19, 1989 (along with 27 other Tibetans) for what is believed to be the first trial for pro-independence activists since the September 27, 1987 demonstrations which marked the beginning of the current unrest. He was convicted of "counter-revolutionary" activity and was sentenced to 14-years imprisonment.

Yulo Dawa Tsering has been adopted as a "prisoner of conscience" by Amnesty International.

---

(1) Name; Lobsang Tenzin, Age; 22, Birthplace; Lhasa, Sex; Male.

(2) Address; East Lhasa, Phudel Nagshol, Road No. 5, Outer Door No. 11. The family has lived at this address for the past 80 years.

Mother's Name; Dolker. There are ten members in the family.

(3) Lobsang Tenzin was a student at Lhasa University.

(4) Date of Arrest; 5th March 1988/17th of 1st Month of the Tibetan Calendar, Earth Dragon Year.

Place of Arrest; He was arrested by the Police at East Barkhor, Lhasa.

(5) When I visited him in the prison, he informed me, that when he was arrested by the police, he was severely beaten by the police with sticks and iron rods. There were four cuts on this head.

(6) He was taken to Gutsa Prison on the same day.

(7) He has been kept at Gutsa, ever since.

(8) We came to know of his arrest on 16th April 88, when it was announced on television, Radio and in newspapers. His feet were shackled.

(9) He has not been tried.

(10) It is not clear whether, he will be tried by the Political Office * This sentence is not very clear, What is the Political office?

(11) The reasons for arrest was on 5th of March (17th of 1st month of Earth Dragon Year,) he threw stones and fought with Chinese for the cause of Tibet. He was linked with a death of a Chinese. However, he has no political connections with any Tibetans abroad.

(12) Since his arrest on 5th of March, I was allowed to visit him twice. The first visit was on 11th of June, and was allowed to stay for only 20 minutes. He looked thin and his head was shaved and scars on this head were visible. His feet were shackled and he had difficulty in walking when he came to the visiting area. During the visiting period a prison official was present all of the time and listened to our conversation.

The second time was on 14th September, during that visit many members of his family were allowed to meet him. That day his feet were not shackled.

Since May we have been allowed to take a new change of clothing on the 15th of every month. However, we were not allowed to give him any food of any kind.

(13) We do not clearly know how he is looked after in prison. He speaks of being tortured and beaten during the interrogation. He is fed three times a day but this barely suffices him. He is suffering from all kinds of illnesses however, the wounds are healing and the pain is less.

(14) Not clear.

(15) On April after the arrest of Lobsang Tenzin, the leader of the local area and people from the work unit came to the house and made inquiries.

(16) Includes a photo of Lobsang Tenzin. From Lobsang Tenzin's family.●

MIDDLE EAST PEACE PROCESS

● Mr. GRASSLEY. Mr. President, I rise to commend the Government of Israel for its recent approval of Prime Minister Shamir's peace initiative. The cornerstone of this plan calls for elections of Palestinian leadership from the West Bank and Gaza so that negotiations may begin. This represents an important first step in the peace process.

Our Government is playing an important role in moving the peace process forward. Over the last several months, President Bush has met with President Mubarak, Prime Minister Shamir, and King Hussein. This week Israeli Foreign Minister Arens and next week Defense Minister Rabin arrive to continue the dialog. And a State Department delegation, dispatched by Secretary Baker to explore the peace initiative further, recently returned from the Middle East.

Egypt and Jordan gave qualified endorsement to the election plan. And now, with their latest vote, the Israeli Government is committed to moving forward. Israel is making a sincere effort to find some accommodation with the Palestinians who live in the occupied territories. There is momentum behind the peace process, the first we have seen in a long time, and we need to continue offering our support and encouragement.

Israel's initiative calls for self-rule by the Palestinians living in the occupied territories for a 5-year period. After 3 years have elapsed, negotiations for a permanent solution would begin. Participants in the final stage negotiations would include Israel, the elected representatives of the Palestinians living in the territories, Jordan and Egypt. Israel has attached no preconditions to the final stage negotiations. The Government's plan states:

In the negotiations for a permanent solution, every party shall be entitled to present for discussion all the subjects it may wish to raise. The aim of the negotiations should be: The achievement of a permanent solution acceptable to the negotiating parties;

the arrangements for peace and borders between Israel and Jordan.

I am hopeful that this initiative will be favorably received by Egypt, Jordan and the Palestinians and that Israel, with the help of our Government will continue its diligent quest for peace. Thank you, Mr. President.●

GOOD-BYE RUSS

● Mr. DURENBERGER. Mr. President, I rise to say goodbye to a dear friend, Russell W. Berry, Jr. After serving as superintendent of Voyageurs National Park for the last 7 years, Russ will become superintendent of Denali National Park and Preserve in Alaska. Voyageurs as well as those of us who have worked with Russ these many years will miss him. But we know that this move is good for him, the National Park Service, and certainly Denali National Park and are happy for him.

Voyageurs National Park, located near International Falls, MN, just west of the famous Boundary Waters Canoe Area Wilderness, was established in northern Minnesota on the Canadian border 14 years ago. Nestled in the northern woods, Voyageurs is a park of extraordinary natural resources and recreational opportunities; of tranquil lakes and isolated islands; and of stunning beauty and enchanting wildlife. It attracts visitors from all over the world.

Since its creation Voyageurs, like all treasured lands, has faced numerous challenges. And Russ Berry as superintendent has been the person in the hot seat for the last 7 years. It was not an easy task as he preserved Voyageurs' delicate natural resources and developed the park into one of the recreational jewels in the country. Nor was the task without controversy. Because of the park's importance, many concerned citizens watched over Russ' shoulder. Yet, this is where he excelled. Russ painstakingly worked with concerned citizens to reach consensus. And Mr. President, as those of us in the Senate know, this is not easy or fun. But it is necessary if something is to be achieved that is good and lasting.

Russ Berry's accomplishments—the Rainy Lake Visitor Center, Kettle Falls Hotel renovation, adoption of summer and winter trail plans—show that the work he has done is good and lasting. For this we are very grateful and indebted to Russ. And now, Mr. President, as Russ moves on, I want to express the gratitude of all Minnesotans to Russell W. Berry, Jr., for the work that he did at Voyageurs. He has left the park better than when he found it, and his accomplishments there will be cherished for generations to come. We will miss him and wish him good luck at Denali National Park.●

FINANCIAL STATEMENT AND INCOME TAX INFORMATION

● Mr. KASTEN. Mr. President, I ask that my 1988 financial statement, my Federal income tax form 1040 for 1988, and my Wisconsin income tax form 1 for 1988 be printed in the RECORD.

The material follows:

Robert W. Kasten, Jr., financial statement December 31, 1988

Assets:	
Washington, D.C. home	$195,000
Household goods/personal property	25,000
Automobile (Ford '86 Taurus)	7,800
Life insurance policy (net cash value)	3,300
Credit union account	10,275
Checking accounts	6,675
Stocks	40,825
IRA	4,650
Offset Civil Service Retirement Program	26,730
Total	320,255
Liabilities:	
Perpetual Savings Bank Alexandria, VA	92,367
First Wisconsin National Bank Milwaukee, WI	99,716
First Wisconsin National Bank Milwaukee, WI	1,744
Key Point Properties Promissory Note	7,500
Total	201,327
Net worth	118,928
1988 taxes paid:	
Federal	32,807
State (Wisconsin)	9,708
1988 income:	
Senate salary	89,500
Honoraria	33,900
Total	123,400

ROBERT W. KASTEN, JR., AND EVA J. NIMMONS KASTEN INDIVIDUAL INCOME TAX RETURN 1988

Filing Status:

Exemptions: Yourself, spouse—2; Nora Kasten, daughter—1; total number of exemptions claimed—3.

Income: Wages, salaries, tips, etc., $138,563.

Taxable interest income (also attach Schedule B if over $400), $4,644.

Dividend income (also attach Schedule B if over $400), $2,034.

Taxable refunds of state and local income taxes, if any, $1,400.

Business income or (loss), $35,150.

Capital gain or (loss), $3,000.

Other income, $81.

Total income, $178.872.

Adjustments to Income: None.

Adjusted gross income: $178,872.

Tax computation:

Your standard deduction (from page 17 of the instructions), $49,539.

Your itemized deductions (from Schedule A, line 26), $49,539.

Subtract line 34 from line 32. Enter the result here, $129,333.

Multiply $1,950 by the total number of exemptions claimed on line 6e, $5,850.

Taxable Income. Subtract line 36 from line 35. Enter the result (if less than zero, enter zero), $123,483.

Tax Rate Schedules, $33,287.

Total, $33,287.

Credits: Credit for child and dependent care expenses, $480.

Total, $480.

Subtract line 46 from line 40. Enter the result (if less than zero, enter zero), $32,807.

Other taxes: Alternative minimum tax, none.

Add lines 47 through 52. This is your total tax, $32,807.

Payments: Federal income tax withheld (if any is from Form(s) 1099, $31,180.

1988 estimated tax payments and amount applied from 1987 return, $6,400.

Add lines 54 through 60. These are your total payments, $37,580.

Refund or amount you owe: If line 61 is larger than line 53, enter amount overpaid, $4,773.

Amount of line 62 to be refunded to you, $2,773.

Amount of line 62 to be applied to your 1989 estimated tax, $2,000.

WISCONSIN INCOME TAX FORM I

Federal adjusted gross income (from line 31 of federal Form 1040 or line 13 of Form 1040A), $178,872.

Additions. Complete Schedule 1 on page 2, $2,500.

Add lines 1 and 2, $181,372.

Subtractions (state income tax refunds, etc.), $1,400.

Subtract line 4 from line 3. This is your Wisconsin income, $179,972.

Tax, $12,231.

Fill in number of dependents, 1, $50.

Wisconsin itemized deduction credit, $1,853.

School property tax credit: a. Renters: Rent paid in 1988—heat included, $2,400.

Find credits from table, $7.

b. Home owners: Property taxes paid on home in 1988, $1,910.

Find credit from table, $163.

Add lines 7 through 10b, $2,073.

Subtract line 11 from line 6. If line 11 is larger than line 6, fill in zero (0), $10,158.

Alternative minimum tax, none.

Add lines 12 and 13, $10,158.

Married couple credit, $450.

Subtract line 15 from line 14. If line 15 is larger than line 14, fill in zero (0). This is your net tax, $9,708.

Add lines 16 through 19, $9,708.

Wisconsin income tax withheld, $6,546.

Net income tax paid to other states, $4,043.

Add lines 21 through 26, $10,589.

This is the amount of your refund, $881.●

SENIORS OPINION ON THE MEDICARE CATASTROPHIC COVERAGE ACT

● Mr. McCAIN. Mr. President, there was a significant development this week regarding the Medicare Catastrophic Coverage Act of 1988.

The Wirthlin Group, a nationally recognized polling firm, sampled the opinion of 1,008 seniors across the country about the act. This is the only poll I know of, conducted since the act's adoption, that samples the general senior population that will be both the payors and consumers under the act. It contains some very significant findings regarding the opinions that our nation's seniors hold about the Catastrophic Coverage Act.

It is the Retired Officers Association, and several other members of the 40-member Coalition for Affordable Health Care that funded this poll. As you may know, the coalition, which is composed of seniors groups spanning the political spectrum, formed over a joint concern they had with the act.

I think every Member of Congress recognizes that the passage of the Catastrophic Coverage Act has set off a firestorm among our Nation's seniors. We have all received tens of thousands of letters, postcards, and phone calls from seniors expressing their frustration with the act.

In the last year and a half, I personally have received over 50,000 letters on the subject of catastrophic illness protection. Since the passage of the act, I have received about 20,000 letters, with only about 10 being in support of the act.

Our Nation's seniors are upset.

No, upset is the wrong word—they are mad.

Some have identified the level of the premiums, or the act's financing methodology, as the sole source of seniors frustration, over the act. For some time now, some of us have had the sense that the frustration of seniors really goes beyond the financing methodology and is aimed at the core of the act itself. This poll confirms just that.

Of the 59 percent who were aware of the act, only 31 percent of them support it.

More than half believe the benefits are not worth the cost.

By a margin of 65 to 19 percent, seniors prefer something in the area of long-term care over the Medicare Catastrophic Coverage Act.

We are not talking about rich seniors here—the vast majority of those polled were in the lower- to middle-income range. At least 72 percent had a combined family income under $30,000.

This poll confirms what seniors have been saying for quite some time—that Congress missed the mark in passing the Medicare Catastrophic Coverage Act of 1988, that the act consumes a significant number of dollars, but leaves untouched the catastrophic illness issue that concerns seniors most—long-term care.

It is out of this belief that I introduced, on February 2, S. 335, the Medicare Catastrophic Coverage Revision Act of 1989. S. 335 is cosponsored by Senators BOREN, BURNS, COCHRAN, GORTON, HATCH, HEFLIN, HOLLINGS, MCCLURE, MCCONNELL, SHELBY, and WILSON. This legislation would delay, for a year, implementation of those provisions in the act not already implemented—with the exception of spousal impoverishment. This would allow Congress ample time to fully review the act through public hearings. This is important, because if we permit all of the act's provisions to be implemented before we complete the process of determining what, if any, changes ought to be made to the act, it will be virtually impossible to make any changes.

Protected during this 1-year review period would be the long-term hospitalization, skilled nursing, and spousal improverishment benefits. These are the very benefits that seniors, in this poll, rank as the most important benefits in the act. These benefits would be funded with the flat part B premium increase that has already gone into effect.

Changing the act so that it more adequately reflects the catastrophic health coverage needs of the elderly is not going to be easy, particularly if we determine that it is essential that we move down the course of long-term care.

Providing something in the way of long-term care protection is both complicated and expensive. We cannot afford to charge head-long into a comprehensive program. Yet, I think seniors recognize, if the act stays as is, we cannot even afford to get to first base with long-term care.

Mr. President, I believe this poll confirms the fact that we have got to take the time to consult with seniors about what role they think the public sector ought to play in helping them protect themselves from the financial ravages of a catastrophic illness. This only seems reasonable, however, given the fact that the act was designed to benefit them and that they are required to pay for it.

We need to thoroughly reexamine the act. This ought to be done through extensive congressional hearings to determine what, if any, changes ought to be made to the act. Indeed, the distinguished chairman of the Senate Finance Committee, Senator BENTSEN, has agreed to hold hearings in the near future. It would be my hope that these hearings go beyond merely reexamining the act's financing to thoroughly review the entire act.

Mr. President, I hope that my colleagues will take the opportunity to examine the poll I spoke of at the beginning of my remarks. It is very revealing of the breadth of seniors' concerns about the act adopted last year. In doing so, I hope my colleagues will consider the value of doing a thorough review of the act before all of the provisions are implemented, and I hope they will support S. 335.

Mr. President, I ask that a summary of the poll results be inserted in the RECORD following my remarks.

The summary follows:

MEDICARE CATASTROPHIC COVERAGE ACT SURVEY KEY POINTS

METHODOLOGY

One thousand and eight Americans at least sixty-five years of age were interviewed by telephone by the Wirthlin Group on May 9–11 for this project. The respondents represent a random selection of older Americans from all parts of the country and all income levels.

The margin of error for this survey is ±3.1% meaning that should this survey be repeated, 95 times out of 100, the results for each question would be within three percentage points of our findings.

The questionnaire was twenty questions long, and the interviews averaged about thirteen minutes in length.

Demographically, the sample of 1,008 senior citizens included 59% women, 41% men, and had the following characteristics:

	Percent
Age:	
65–69	32
70–74	27
75–79	21
80+	19
Region of country:	
Northeast	26
South	31
Midwest	23
West	20
Partisan affiliation:	
Republican	31
Independent	28
Democratic	40
Income:	
Under $5,000	12
$5,000, but less than $10,000	19
$10,000, but less than $15,000	17
$15,000, but less than $20,000	12
$20,000, but less than $25,000	9
$25,000, but less than $30,000	4
Over $30,000	10
Refused	18

MOST IMPORTANT PROBLEM FACING SENIOR CITIZENS

Forty-five percent of older Americans believe that health care issues are the most important problem facing seniors, with the leading single problem being health care costs (29%).

The concern over health care cuts across every demographic group tested on this survey—of the 29 demographic and geographic groups tested, all cite health care as their top issue.

General economic concerns (totalling 17%), such as inflation (14%) and taxes (2%) were the next most often mentioned problems, followed by social security/medicare (11%). Thirteen percent of older Americans commented that they had no major concerns or problems.

Lower income seniors stand out on this question as rating economic concerns (especially inflation—20%) especially high.

ATTITUDES TOWARD RESPONSIBILITY FOR PAYMENT OF HEALTH CARE COSTS

By a 52%–35% margin, older Americans believe that "the elderly should share the responsibility with the federal government for paying health care costs," rather than the federal government assuming "the complete responsibility for the payment of health care costs for the elderly." Thirteen percent of seniors were undecided on this issue.

Income plays a major role in seniors' attitudes on this question. The lower the income level (especially those with income levels of less than $10,000 per year), the more divided they are on this question, with a plurality (48%–41%) believing that the federal government should assume the complete responsibility for the payment of health care costs.

On the other hand, sixty percent of seniors with household incomes of at least $10,000 believe that the elderly should share the costs.

Other key points on this question include:

A majority of both Republicans (59%) and Independents (52%), and a plurality of Democrats (47%) believe that the elderly should share the responsibility with the federal government.

Those seniors who are not covered under any additional insurance program like Blue Cross-Blue Shield (14% of entire sample) favor the federal government assuming the complete responsibility for the health care costs (46%-39%).

AWARENESS AND SUPPORT FOR MEDICARE CATASTROPHIC COVERAGE ACT

Fifty-nine percent of seniors interviewed said that they are aware of the Medicare Catastrophic Coverage Act.

Those most likely to say they are aware of the Act include men (64%), higher income seniors (82%), and those seniors under the age of 80 (61%). Those seniors without additional insurance coverage were least likely to have heard of the new law, with just 34% saying they were aware of it.

When those who were aware of the new law were asked whether they favored or opposed the legislation, 51% were in opposition to it, 31% in support of it, and 15% undecided.

Interestingly, 39% of this group said that they were strongly opposed to the new law—indicating a strongly felt opposition to the law.

Of the 29 demographic and geographic groups tested, every one opposed the new law, including Republicans (59%-27%) and Democrats (49%-33%), lower income seniors (41%-35%), and those without additional insurance (48%-31%).

IMPORTANCE OF BENEFITS OF THE MEDICARE CATASTROPHIC COVERAGE ACT

Seniors were asked to rate the importance to them of a number of benefits provided by the Act on a scale from 1-10, with 1 being "not at all important," and 10 being "extremely important."

As you can see below, coverage for mammography screening, unlimited hospitalization, and skilled nursing care topped the list of benefits rated by seniors, with 52%-53% of respondents rating them as highly important (rating "8," "9," or "10").

Coverage for women undergoing mammography screening. (53% rating as highly important)

Unlimited hospitalization coverage after you pay an annual $560 deductible. (52% rating as highly important)

150 days of skilled-nursing care for a year, after the individual pays the first $170. (52% rating as highly important)

A benefit that increases the amount of income and property a spouse may retain when their husband or wife goes to a nursing home at Medicaid expense. (47% rating as highly important)

50% coverage for prescription drugs after the individual pays the first $600 per year in 1991. (31% rating as highly important)

$1,370 annual out of pocket limit on how much Medicare recipients will have to pay for "reasonable and proper" Medicare-approved physician and other outpatient service in 1990. (27% rating as highly important)

Although there isn't a great deal of difference between how men and women rank the importance of these benefits (men do rate mammography screening highly), there is some difference by income level. The findings show that both skilled nursing care and mammography screening are rated higher by lower income seniors than they are by those with higher incomes.

Furthermore, it should be noted that the catastrophic benefits already in effect and mammography screening are consistently rated higher by all demographic groups than prescription drug coverage or the $1,370 out of pocket limit.

CHOICE BETWEEN CATASTROPHIC COVERAGE OR PRIVATE COVERAGE

After having reviewed the key benefits of the catastrophic coverage, seniors were asked the following question:

The Catastrophic Coverage Act applies to all Medicare enrollees whether or not they choose to participate in the plan. In some cases, this includes duplication in existing coverages. If given a choice, would you prefer the catastrophic coverage or would you prefer private coverage?

Seniors opt for private coverage by a 42%-33% margin, with 22% being undecided and another 3% respond "neither."

The crosstabs indicate that while the overall margin is just nine points, the sentiment in favor of private coverage is widespread—only two of the groups tested favor catastrophic coverage rather than private coverage (those with incomes under $10,000, and women with incomes under $20,000).

Other key findings on this question include:

Republicans (49%-30%), Democrats (39%-35%), and Independents (37%-33%) all favor private coverage.

Those seniors who do not have additional insurance coverage are divided on the question (36%-36%).

Respondents who earlier said that the federal government should assume the complete responsibility for the payment of health care services to the elderly favor private coverage by a narrow 38%-37% margin.

LONG-TERM CARE

When seniors are informed that the 1988 Medicare Catastrophic Coverage Law and its previously mentioned benefits does not cover long-term care, and subsequently asked whether they would prefer the current law or a new long-term care program, they choose the new program by a wide 65%-19% margin.

The sentiment in favor of a new program cuts across every group tested, with at least 58% of all groups opting for a new long-term care program. Even those seniors who are aware of and favor the current legislation believe it should be replaced by a new long-term care program (61%-31%).

MEDICARE CATASTROPHIC COVERAGE ACT BENEFITS WORTH THE COST?

When seniors are informed that in order to fund this new program, they will be required to pay a surtax on their federal income tax payment of 15% for each $150 owed up to a maximum of $800 in 1989, they do not believe that the benefits of the coverage are worth the cost by a 55%-22% margin.

It is important on this question to also note that 44% of the seniors said that they feel very strongly that the benefits are not worth the cost of the program.

Again, this sentiment cuts across all groups, with the spread between the two sentiments never getting closer than 18 points.

Key findings on this question include:

Even 45% of lower income seniors say that the benefits are not worth the costs involved.

Republicans (55%), Democrats (56%), and Independents (56%) all agree that the benefits are not worth the costs of the program.

Those seniors who were aware of the legislation and favored it previously now say it's not worth the cost (42%-38%).●

ADM. LANDO ZECH

● Mr. JOHNSTON. Mr. President, on June 30, Adm. Lando Zech will leave the chairmanship of the Nuclear Regulatory Commission and enter retirement. He will be sorely missed. He will be very, very difficult to replace.

The NRC has come a very long way under Admiral Zech's leadership. The credibility of the agency is, in my opinion, at an all-time high with persons on both sides of the nuclear debate. The Commission has solid accomplishments to its credit. If the nuclear option has not achieved complete merchantability, the foundation for it has been established.

We will need new electricity capacity in the 1990's. That is a given. There are going to be shortages of electricity. Demand growth is occurring, at rates twice official forecasts. New capacity needed to meet this growth cannot be made available in time and the energy efficiencies that might slow this growth will not take hold as fast as we might like. A new look at the nuclear option will follow in the wake of these shortages.

But this is not the only reason for a new look at the nuclear option. The greenhouse effect and the issue of global climate change have entered the political consciousness of the Nation. There is simply no feasible response to the challenge of the greenhouse effect that does not involve serious consideration of the nuclear option. No program to reduce the use of fossil fuels to address the issue of global climate change can be credible unless that program includes elements addressing the nuclear option.

The NRC will be at the center of our efforts to meet this challenge. Thanks to Admiral Zech, the Commission enters this period well prepared to assume its role. The nuclear option will not revive automatically. We will have to win back the public, the regulators, the financial community, and the utilities themselves. Issues will have to be addressed openly and openly resolved. A credible Commission will be absolutely essential to this process.

A credible Commission is what Admiral Zech is leaving us. In addition, it is a Commission of considerable accomplishment.

Under Admiral Zech the Commission adopted a final rule providing for early reactor site permits, certification of standard reactor designs, and combined construction and operating licenses. This rule will provide greater certainty to the nuclear reactor con-

struction process, increase the safety and reliability of nuclear powerplants through the use of standard designs, and enhance public participation in the process through early resolution of licensing issues. We should give this rule a chance to work. I hope to see its application tested soon.

Under Admiral Zech's leadership, the Commission has resolved the impasse that had developed in situations where State and local governments refuse to participate in emergency planning. The NRC's emergency planning rule ends a decade of uncertainty about whether the Federal Government would permit parochial opposition to nuclear power to stalemate the nuclear reactor licensing process. The NRC's rule provides for an adequate emergency plan to protect the public health and safety.

Under Admiral Zech's leadership, the Commission has adopted a sensible rule providing for fitness-of-duty programs at licensed facilities that include random, preaccess, and for-cause testing for drugs and alcohol.

Finally, in April of last year, Admiral Zech signed a memorandum of cooperation with his Soviet counterparts that will begin a new era of cooperation to enhance nuclear safety worldwide through exchanges, seminars, cooperative analyses, and site visits.

Mr. President, I congratulate Admiral Zech on a career of service to his country that is crowned by outstanding leadership at the NRC. He represents the best that this country has to offer, both in terms of the value of his service to the country and the selflessness of his dedication to it.

I wish him well in his retirement.●

NANCY "NANA" LAMPTON

● Mr. McCONNELL. Mr. President, I want to bring to the attention of my colleagues an article in a recent Business First that acknowledges the accomplishments of a remarkable woman and a good friend of mine, Nancy "Nana" Lampton.

Nancy Lampton, better known as Nana, spent her childhood learning about the insurance business and it seemed only natural that when she graduated from college she would join the family insurance business. Nana worked her way up through the ranks and today she is the chairman and chief executive officer of American Life and Accident Insurance Co. Her father, Dinwiddle Lampton, Jr., is the president of American Life and over the years they have formed a close partnership to successfully run the company. Under Nana's leadership American Life is moving from a company dominated by agent sales to one that is targeting people through direct marketing of insurance policies. Nana has a simple philosophy for the future of the company. She wants it to be a self-sustaining, profitable company that adds a lot to Louisville, KY.

I do not want my colleagues to believe that Nana's whole life is her job at American Life. She is a multidimensional woman who loves to ride horses, paints, writes poetry, edits a magazine, and is chairman of several business and civic organizations. Gayle Walters Warren, executive director of the Leadership Louisville Foundation was recently quoted as saying, "Nana is always available to take on a task and goes above and beyond what the job calls for." Her civic activities include being chairwoman of Louisville's Downtown Development Corp., the Leadership Louisville Foundation, and the Hard Scuffle Steeplechase which raises money for the Kentucky Opera Association. She is also southeast regional chairman for the Committee of 200, a national group of businesswomen who promote involvement in several important national issues and is the Federal liaison from Kentucky for the National Federation of Independent Business. Creative pursuits are an important part of Nana's life. She was commissioned to write and illustrate a children's book about Thomas Jefferson and his grandchildren by the Monticello historical home. Nana is a published poet and is the editor of the High Roads Folio, a magazine which features articles and photos about the land, heritage, and values. Despite her busy schedule, Nana continues to be active in politics.

Nana was recently quoted as stating, "Being able to make a difference in the city is one of the reasons I wanted to return to Louisville after graduation." I truly believe that Nana has made a big difference to the city of Louisville and its residents. She is a fine example for men and women in Kentucky and throughout the Nation. I commend Nana Lampton for her contributions and I encourage my colleagues to read the Business First article which I am inserting into the RECORD at this time.

The article follows:

[From Business First, Mar. 13, 1989]

NANCY LAMPTON GREW UP IN THE INSURANCE BUSINESS—AMERICAN LIFE CEO ESTABLISHES HER ROLE

(By Alan Chitlik)

During Nancy Lampton's childhood, learning about the life insurance business came as naturally as eating dessert.

"After dinner every night we talked about some aspect of business—what profit was, how people sold things, just the basics," says Lampton, recalling conversations with her father, Dinwiddie Lampton Jr. "I can remember many dinners lasting well into the night.

"I think that my interest was born of those discussions, but I never knew for a fact that I would be able to come into the company. I didn't have any idea I'd be in this role."

"This role" is chairman and chief executive officer, the positions she assumed in 1971 upon the death of her grandfather, Dinwiddie Lampton Sr., who founded American Life & Accident Insurance Co. of Kentucky in 1906. Though her father, president of the firm, is sometimes more visible because of his appearance in television ads, Nancy "Nana" Lampton, 46, runs the company with him and is poised to eventually take full control of it. Some observers already give her credit for many of the company's recent moves.

She's a multi-dimensional woman who can frequently be found riding a thoroughbred, editing a magazine or painting a picture after a busy day at work.

Lampton brings a creativity and sensitivity to her positions, say co-workers. And she is involved in several civic activities, including chairing the Downtown Development Corp., the Leadership Louisville Foundation, and the Hard Scuffle Steeplechase.

American Life sells term life insurance policies to a target market of people whose income is between $20,000 and $30,000 a year. The company had revenues of more than $10 million in 1988 and has fewer than 100 employees.

Lampton is overseeing the transformation from a company dominated by agent sales to one that emphasizes direct marketing, where people send insurance applications directly to the company's offices at 3 Riverfront Plaza.

"I just enjoy the way her mind works," says Jessica Schikler of Citizens Fidelity Bank and Trust Company. She calls Lampton politically conservative, but considers her to be progressive and open-minded.

Dinwiddie Lampton Jr., says of his daughter, "She is conclusive proof that the breed's improving."

He said growing up in the company was natural for his daughter—the business was a way of life for the entire family, he said. "She's been bred on the business. She's had a teaspoon full every hour on the hour," he said. "I knew she'd find some role here."

Lampton was nicknamed Nana as a child, partly to distinguish her from her mother, who is also named Nancy, and partly after the word banana, she said.

After growing up in Louisville, Lampton received a bachelor's degree in English from Wellesley College in 1964 and a master's in English from the University of Virginia in 1965.

She had worked at her family's company during earlier summer vacations and asked for a job after earning her master's degree.

There was no such thing as a training program, and she didn't receive special treatment because of her position in the family. "It was, I think, a trial by fire. I did everything. I was the maker of the coffee often. I also studied with each person in the company."

The business was not highly computerized then, and she and others had to calculate the value of various policies. She reviewed and approved applications for insurance and processed death claims.

Kay Allen, assistant vice president at American Life, has known Lampton since she was born. She said she remembers Lampton as constantly trying to learn all she could about the company. "She works hard at everything," Allen said.

Lampton said those years were discouraging, in part because the base of the company's business—policies sold by agents—was eroding and there was no clear direction for the company to grow.

After her grandfather died eighteen years ago, she assumed her present titles. But, she said, it was very clear that her father was in

control of the company and would be for a long time.

Her brothers, both younger, had followed her into the company and had become vice presidents several years later, but they decided to leave in the mid-1970s to pursue other interests. Dinwiddie Lampton III is a partner in Lampton-Williams & Associates Inc., an insurance company, and Mason Lampton owns Hardaway Construction Co. in Columbus, Ga.

Because of the changing nature of the life insurance industry, changes also were necessary at American Life.

"The way of home service has gone down the tubes," she said. "I've tried to replace it with direct marketing."

American Life's staff of some 300 agents has dwindled to only a few who remain to service those accounts.

American Life responded by offering insurance through newspaper ads, direct mail, and television ads. The main client base continues to be in the Louisville area with some customers in Indiana and Ohio.

But Lampton admits she isn't sure all Americans are ready to buy insurance by clipping a newspaper ad. "I don't think that the market is ready for the thought of direct marketing of life insurance. So who knows what will happen?"

If the going is tough, American Life has the benefit of many years of strong reserves, she said.

American Life had premium income of $2.0 million and investment income of $8.7 million in 1988, for a total of $10.7 million, according to company filings with the Kentucky Department of Insurance. The company's net income after expenses and income tax was $5.8 million. In addition, the company had capital gains of $5.3 million, primarily from the sale of common stock.

Lampton said she views her role as a fiduciary agent keeping abreast of all aspects of the company.

"How am I going to keep it together for the next 50 years, that's the thing I think about," she says. "I don't want it to be sold. I don't want it to become a miniscule part of a giant company. I want it to be a self-sustaining, profitable company that adds a lot to Louisville, Kentucky."

Lampton, who doesn't have any children, said it is too early to know who the next generation might be. She said she hopes to find a young successor or perhaps a team to take over. Lampton has been married twice—to Millard Cox III from 1970 to 1980 and to Ronald Ray from 1981 to 1988. Both marriages ended in divorce.

Lampton says she and her father make major company decisions and noted that they agree on the basics. They work together in deciding on the company's investments. But on the insurance side, she is responsible for the newspaper and direct-mail advertising, and he is more involved with television and radio.

"What's happened is we've become a very good partnership. And that's been the great achievement on both our parts," she said.

The relationship has been typical of a person working with his or her parent in business, she says.

"The young person sees the whole world out there and says, 'We can be big, we can be fast, we can go farther, we can expand, we can borrow.' And the parent says, 'Well, I've seen lots of dips. Now let's ride through here and let's not expand so much.'

"And so there evolves a compromise. We have not expanded at the rate I wanted to 10 years ago. And we have made money and we have survived very well. So even though I had to eat a few of my dreams in the interim, maybe I put that energy someplace else, maybe on the outside," she said.

Putting that energy on the outside has meant a wide array of civic activities.

"Among Louisville leaders, I think she's right up there with the David Grissoms," says Gayle Walters Warren, executive director of the Leadership Louisville Foundation.

"Nana has the position and she has the power to get things done in this community. She's not one of those folks who has a long resume, but no meat to it," Warren says. "She's always available to take on a task and goes above and beyond what the job calls for."

Louisville Mayor Jerry Abramson said, "She's an extremely bright, aggressive woman."

He said her organizational skills were one of the reasons he appointed her chairman of the Downtown Development Corp. "She's a facilitator in making things happen," he said.

Being able to make a difference in the city is one of the reasons Lampton says she wanted to return to Louisville after graduation, rather than moving to a larger city such as Boston or San Francisco.

"She is genuinely concerned about this community and wants to make a difference," said Barry Alberts, the executive director of the Downtown Development Corp.

Both at her company and in her civic activities, Lampton says her skill is sparking an idea in a group and helping set up a team so the group can reach its creative potential.

Abramson said, "She's a bridge-builder. She's a good listener, and she has a good appreciation for others' opinions."

Schikler agrees, saying Lampton leads in a quiet kind of way, building a consensus from members. "She doesn't come into a room and try to throw her weight around," she says.

Lampton was a member of the Broadway Project and was named the first chairman of the Downtown Development Corp. following Thomas Simons' death last summer.

Alberts said that in the meetings she's run so far, she's worked hard to illicit the views of other people. And the board members respect her and know she's not trying to promote some hidden agenda, he said.

She was integral in the founding of the Leadership Louisville program. As the vice president of Human Resources for the Chamber of Commerce, she approached three community leaders about starting the program in 1979. She has been involved with it ever since and is now chairman of the Leadership Louisville Foundation.

She also serves as the Southeast Regional chairman for the Committee of 200 Women, a national group of prominent businesswomen who promote active involvement in business, economic, educational, social and political issues.

She is an advocate of small business and is the federal liaison from Kentucky of the National Federation of Independent Business.

"I think the real strength of the whole country is the ability of a person to go into business and to build that business and pass it on to his children," she says. Especially in this era of many takeovers, she says, small businesses "keep that long-term view that is so often lost in big business when quarterly earnings are everything."

Since 1976, Lampton has been the race chairman for the Hard Scuffle Steeplechase, which benefits the Kentucky Opera Association. In 1979, she made the decision to include international horses in the event. Unfortunately, because of the transportation costs and the costs of quarantine, the move ended up costing $55,000, which Lampton says she felt obligated to pay because it was her decision. But she was only earning $30,000 and couldn't afford the money out of her salary. So at the suggestion of another businesswoman, she started a magazine, called High Roads Folio, which features articles and photos about the land, heritage and values.

Advertising revenue from the magazine helped her pay off the debt in three years and Lampton continues to publish the magazine each year.

Lampton is the publisher and she compiles the articles and sells the ads. The 20,000 copies are sent free across that nation each year. "The magazine gives me a whole lot of joy," she says.

Her love of writing had been shown earlier, when in 1973, officials at the Monticello historical home in Virginia commissioned her to write and illustrate a children's book about Thomas Jefferson and his grandchildren. She has also had poetry published in the Green River Kentucky Poetry Review.

Lampton also speaks frequently about her love of the land. She lives on the 600-acre Tirbracken Farm, which overlooks the Ohio River in Oldham County. She lives in a house that was built during the civil war era and has six dogs, cattle, horses and ponies on the farm.

"Nana's attention to her farm and that life adds a dimension that many other businesspeople may not have," Schikler says.

Lampton loves to ride her horse. Mike Davidson, who is adjutant general for the state of Kentucky, says they ride together occasionally and he describes her as "fearless and tireless" on a thoroughbred. He says he rides a large 16½-hands-high horse named "Baggins," that he considers half-mad. But Lampton will often jump 4-foot-high fences at a full gallop on the horse, he says.

Lampton also has been active in politics, switching from the Democratic to the Republican party during Ronald Reagan's second term, because she said she believed the Republicans were the party best able to allow individuals to reach their potential.

She was co-chairman of George Bush's finance committee in Kentucky during the 1988 presidential election and a member of his national steering committee. She also has worked for Republican U.S. Senator Mitch McConnell and Democratic Mayor Jerry Abramson, and she plans to work for John Heyburn, a Republican candidate for county judge executive.

Some of her peers in the business community consider Lampton to be a pioneer among Louisville businesswomen. They said they know of no other woman in Louisville heading a larger independent company.

"I think she has been a trailblazer for women who have come behind her," Abramson said.

Lampton says when she came to Lousiville in 1966, she couldn't find another woman in management training to have lunch with. Now she can count hundreds of them.

"It's been one of the biggest revolutions our country has seen. And I've been right in the middle of it."●

EASTERN AIRLINES STRIKE

● Mr. GRAHAM. Mr. President, the strike at Eastern Airlines has lasted

over 2 months now. Unfortunately, we are not much closer to an acceptable resolution of this situation than we were back on March 4 when the strike began.

This body has made a deliberate effort to allow the marketplace and the involved parties time to resolve the situation. But with every day that passes, passengers are being inconvenienced, employees livelihoods are being jeopardized, and a once-thriving company is being weakened.

Clearly it is the public sentiment that Eastern Airlines should return to the air as quickly as possible. I have proposed that the Senate voice public sentiment by expressing its sense that the Bankruptcy Court and all involved parties should facilitate the prompt and safe restoration of Eastern Airlines to full operations through all appropriate action, which may include appointment of an independent trustee pending sale of the company.

This sense of the Senate resolution is cosponsored by Senators BURDICK, DODD, ADAMS, METZENBAUM, KENNEDY, HEFLIN, KERRY, ROBB, SIMON, INOUYE, NUNN, FOWLER, BRYAN, LEVIN, and MOYNIHAN.

My home State of Florida, of which Eastern is a major corporate citizen, suffers from the effects of the dispute daily. The public is affected not only from the lack of service, but also the economic devastation caused by thousands of employees out of work and millions of dollars of lost revenues to tourism and other industries which depend on Eastern's continued survival.

For example, one small travel agent reported a loss of $18,000 in ticket refunds to passengers for which Eastern has not yet reimbursed.

Travelers report, and other airlines confirm that the number of discount fares available has dropped significantly. In fact, the average price per ticket for corporate travel has increased from $290 to $433 since December.

Why do we recommend that the bankruptcy judge appoint a trustee? The answer is simple. The current management has been unable to successfully negotiate a contract extension with the workers. Prospects for the two parties returning to the table are dim at best. As a result, the company now faces liquidation.

Appointment of an unbiased, independent trustee could facilitate the end of the strike, making Eastern more attractive to both potential buyers and to customers.

Mr. President, the slow and painful deterioration of labor and management relations at Eastern Airlines has dragged on too long. To quote Judge Burton Lifland, Eastern "has remained too long in the emergency room and is hemorrhaging $1 million a day."

Any further delay in the restoration of the airlines could render full return to operations impossible. I encourage my colleagues to join me in representing public sentiment by the simple act of encouraging expeditious action on the behalf of all the involved parties.

I am disappointed that an appropriate vehicle on which to consider this legislation was not forthcoming. It is important to the Eastern employees that the Senate go on record in support of a speedy resolution to this situation.●

TRIBUTE TO REV. JOHN A. CUNICO

● Mr. HEINZ. Mr. President, I would like to call the attention of the Senate to a significant milestone in the life of one of Washington's truly outstanding religious leaders and community servants. I rise today to pay tribute to Rev. John A. Cunico as he celebrates the 25th anniversary of his ordination to the priesthood. Father John's joy and pride will be shared by the community at large in a special celebration, a mass of thanksgiving on Sunday, May 21, 1989. To show the depth of their appreciation for his many contributions to the richness of parish life at St. Francis de Sales, the parishioners will have a grand reception in his honor immediately following the mass.

Father John is a man of great dedication and commitment. At a very early age he knew he was called by God to serve his community. He responded to his divine call soon after he graduated from St. Charles High School/College in 1958. In 1960 he completed his B.A. in philosophy at St. Mary's Seminary in Baltimore and then went on to earn his STL from the Theological College, Washington, in 1964. He officially entered the permanent vocation on May 23 that same year with his ordination to the priesthood by Archbishop O'Boyle at St. Matthew's Cathedral here in Washington, DC.

Father John's first appointment was to Holy Name Parish in Washington, DC, as assistant pastor from 1964 to 1972. He became well known to be a man with the gift of great energy and personal strength. During those years he also served as assistant pastor at St. Martin's and Assumption parishes in Washington. In 1979 he went west to St. Anthony of Padua in Denver, CO, but returned to Washington in 1980 to St. Francis de Sales, serving the congregation that knows him today as a spiritual leader with the noblest qualities of selfless dedication. He began at St. Francis as administrator and was soon appointed associate pastor the same year. By June 1982 Father John was honored with his appointment as pastor.

Father John has always been an active and vital participant in the community at large. In addition to his responsibilities as pastor, he has reached out, contributing enthusiasm, leadership, and hope to every facet of St. Francis Parish. He has touched the lives of hundreds, perhaps thousands of teens and young adults, helping organize sports programs, youth/family counseling, and serving as moderator of high school CCD classes. Father John provided a vital boost to the Ward 6 Model Cities Program, a neighborhood rehabilitation effort to revive neighborhoods through education, jobs, and renovation of houses. He is also an active member of the Ward 6 Ecumenical Group Ministry.

Father John promotes the value of Catholic education as a developmental building block in the life of a young person, helping the adults of tomorrow to achieve the solid grounding in Christian Catholic morals and values to overcome any and all earthly obstacles.

Father John helps in many secular activities, supporting community programs for the needy, the unemployed, the elderly and those hobbled by addictions.

My own remarks are a humble indicator of the outpouring of affection and respect that friends, family, and parishioners hold for Father John as the entire community celebrates his 25 years in the priesthood. We all are thankful and greatly blessed that his life has crossed ours. His compassion, his contagious devotion to his faith, and his boundless love for his fellow man and woman has enriched us all.

I particularly want to thank Verdell Simmons for bringing many of the details of Father John's remarkable work to my attention, and I ask my colleagues to join me in congratulating this esteemed pastor, exemplary clergyman, and great American for 25 years of service to the people of his church and the community.●

NEW JERSEY VIETNAM VETERANS MEMORIAL

● Mr. LAUTENBERG. Mr. President, last week I was honored to participate in the groundbreaking for the memorial to New Jersey's Vietnam veterans.

The New Jersey memorial will stand as a permanent reminder of the New Jersey heroes who died for their country in Vietnam. Engraved with the names of the 1,484 New Jerseyites who never returned from the war, the black granite panels will serve as a simple yet eloquent symbol of the sacrifices New Jersey made for America. A circular design of the panels will enable the visitor to enter the circle and symbolically embrace all the names at once.

The memorial is a long overdue tribute to those who served in Vietnam. In a small but meaningful way, it will

help us acknowledge the vast debt we have to our Vietnam veterans.

When our country called, those brave individuals went willingly, and were prepared to pay any price to serve. But for a long time, Vietnam veterans were overlooked by our country.

When thanks was given out, they did not receive them and were denied the recognition they deserved. The sacrifices they made, and are still making as a result of that service, went unacknowledged.

Today there are those who suffer from exposure to agent orange or from posttraumatic stress disorder. There are those whose loved ones remain missing in action in Vietnam. These individuals understand that in many ways, society still has not fully acknowledged their losses.

The New Jersey Vietnam Veterans Memorial is one small step in rectifying that mistake. To those fallen heroes who died defending democracy, the memorial says publicly and permanently, we thank you. To those who returned from Vietnam as unsung heroes, the memorial says that as a State, we are proud. And to those still listed as missing in action or prisoners of war, the memorial says that until we learn their fate, we will not rest.

I am proud that my State pulled together to make the memorial a reality. I hope New Jerseyites will continue to make the symbolic "thank you" expressed by the memorial a concrete reality for those Vietnam veterans who did return from the war.

Most of all, I hope that in the future, America will be free and at peace. That no more memorials will be needed because no more Americans will have died in war.

But until that time, I will rest easier knowing that those who were called on to serve their country, did so willingly, and with pride. That upon their return, or their death, they got a heroes tribute, and that America continues to honor their memory by remaining true to what they died for.●

CATASTROPHIC HEALTH INSURANCE

● Mr. DOMENICI. Mr. President, I rise today to discuss the increasingly controversial catastrophic illness law. The first thing I want to do is commend Senator BENTSEN and the Finance Committee for holding hearings on this legislation.

There are many reasons to review the law. There's uncertainty over how much revenue the surtax will bring in. Likewise, there's a lot of uncertainty about how much some of the benefits—particularly the prescription drug benefit—will cost. Most importantly, many, many seniors question whether all these benefits are really worth the costs—costs which Medicare beneficiaries alone pay.

In retrospect, when catastrophic illness insurance passed as a costly, expanded law last summer, I expected some—but perhaps not all—of the controversy now occurring.

When I voted for the law last June, I had only two choices—no catastrophic coverage at all, or this expensive bill. I thought the protection this bill offered was very important, so I voted in favor of the costly version. Even so, I expressed my reservations on the Senate floor at that time:

> I must say I am amazed at the extent to which new benefits have been added . . . benefits that are not necessarily related to catastrophic health expenses . . . These benefits have clearly increased the cost of the program.
>
> I am quite concerned that there will be a backlash from older Americans when they find out exactly how costly these new benefits are. In the end, my concern is that the underlying financing structure—particularly the income related premium that will be administered through the tax system—will prove unsustainable.
>
> The huge tax increase is going to surprise many older Americans.
>
> Catastrophic care is not the only health care need of the elderly or the American people generally. Indeed, by most estimates it represents a rather modest extension. . . .

Last month, I sent many older New Mexicans a description of the catastrophic illness law and a ballot asking for their opinion of the law. Almost all who responded supported some major change in the law. Many urged that we return to a simpler, less costly bill, similar to the one I sponsored in 1987.

I also will tell my colleagues that I plan to cosponsor S. 335, originally introduced by Senator MCCAIN. S. 335 delays the implementation of the surtax. There is no reason that seniors should pay this burdensome tax while Congress is reviewing the catastrophic illness law.

S. 335 also delays some of the benefits, many of which are unrelated to a catastrophic illness. We cannot leave every benefit in place while delaying the financing for those benefits.

S. 335 does not necessarily eliminate these benefits. It simply puts them on hold for 1 year while the overall law and its financing are being reviewed.

However, S. 335 retains without delay the key provisions of improved hospitalization coverage in the catastrophic law. Prior to the passage of catastrophic illness insurance, a Medicare beneficiary who faced an extended hospital stay could easily face bankruptcy for him/herself and family. That was not acceptable. We cannot delay these critical improvements.

S. 335 also implements this summer the key provision that protects the person at home from becoming impoverished if a spouse enters a nursing home. Older Americans have consistently expressed their support for these provisions.

I should also note that many organizations representing senior citizens support Senator MCCAIN's bill.

In summary, S. 335 is an appropriate place to start. It doesn't commit Congress to anything. It just gives us more time to assess all the complaints we are hearing about this law. For example, S. 335 is consistent with Senator BENTSEN's intent to assess the revenue stream flowing into catastrophic coverage.

As my last point, I also plan to reintroduce the main substance of the catastrophic illness bill I sponsored in 1987. As the Finance Committee reviews the catastrophic law, I hope it will heed the views of many older Americans in New Mexico, and give serious consideration to the legislation I plan to offer. It will be relatively inexpensive, and it will be financed without a mandatory surtax.

I also plan to modify my original bill, to include some features that older Americans I talk with feel are most important and clearly worth the cost. Most notably, I refer to financial protection for a spouse at home when someone enters a nursing home, the so-called spousal impoverishment law.

Once again, I express my appreciation to the Finance Committee for holding a hearing to review the catastrophic law. I look forward to it. ●

THE RURAL PRIMARY CARE INCENTIVES ACT OF 1989

● Mr. CONRAD. Mr. President, I rise today to join my distinguished colleague, Senator PRYOR, as an original cosponsor of the Rural Primary Care Incentives Act of 1989. This is an important initiative, which will go far to fill the gaps in our health care system.

Senator PRYOR's bill will hopefully serve as an incentive for physicians to locate in underserved rural areas. This bill will provide a $12,000 tax credit for 3 years for participating physicians. The bill provides incentives for physicians to stay as long as 5 years. Finally, grants and loans made by the National Health Service Corps will be made nontaxable by this legislation—this taxation has served as an impediment to attracting participants to the corps.

Mr. President, the United States actually is experiencing rapid growth in physician supply—yet rural areas still struggle to attract and retain doctors to serve in their communities. We must find a way to bring doctors to rural America. The bill is an important step in that direction.

Mr. President, I ask that an article from the Devils Lake Journal from May 9 be inserted in the RECORD. It details the enormous manpower needs of communities in North Dakota. Fully

30 towns are searching for physicians and other health professionals. Rural Americans are critically threatened by this lack of physicians and other health professionals.

I commend Senator PRYOR for his innovative legislation. I urge my colleagues to carefully consider its merits and hope it and other rural health manpower initiatives will succeed this year.

The article follows:

ATTRACTING DOCTORS TOUGH FOR SMALLER RURAL CLINICS—LAKE REGION CLINIC SAID COMPETITIVE

(By Kris Fehr)

Attracting physicians to a rural area, especially rural North Dakota, is no easy task.

The Lake Region clinic staff knows. They have been searching for another primary care physician—a family practitioner with an interest in obstetrics would be ideal—for about two years.

The past nine months "we've turned up the jets" in the search, according to administrator Joel Rotvold.

The clinic is aggressively pursuing both family practice residents and physicians with established practices in the upper Midwest—North Dakota, South Dakota, Nebraska, Minnesota, Iowa and Wisconsin. They've created a data base in order to contact about 4,000 doctors, and are now in the process of contacting about that many residents.

The responses are as good as can be expected, Rotvold said. Physicians responding are "noncommittal," wanting to "look at the practice at arm's length."

Most clinics use recruiting firms to assist them in finding physicians and, although the Lake Region Clinic has contacted a few as a contingency, Rotvold isn't ready to give in.

Finding the right physician for the practice occupies a good chunk of Rotvold's eight- to 10-hour day. "We're probably doing more than any other clinic in trying to recruit," he said. "It's better than sitting on our hands and waiting for someone to walk through the door."

The extra work and effort seem to be worth it. "In a community this size, it only takes one (doctor) to make a significant difference," he said. "We've got to keep turning over stones."

The Lake Region Clinic has a shortage of doctors. Rotvold said that some patients are being treated over the telephone, which the doctors don't like. "If there was more time, they could see more patients," he said.

For many reasons, rural communities have shortages of health care personnel. According to a 1988 report to the U.S. Senate's Special Committee on Aging, reasons for the shortage include:

First, inadequate and inequitable reimbursement rates and the difficulty in developing a successful practice in low population areas. Medicare reimbursements to physicians in rural areas are less than those practicing in urban areas.

Second, fear of professional isolation and a lack of modern medical facilities, equipment or local referral laboratories.

Third, inability to find acceptable employment for a professional spouse.

Fourth, the fear that practice in rural areas may prove to be a 24-hour job with inadequate back-up support.

Another problem in attracting doctors to Devils Lake is that there are fewer family practice or primary care physicians available. Following a nationwide trend, this is the second year fewer family practice residency positions were filled during the National Residency Matching Program match day, held on March 22.

The fill rate was 7.1 percent, compared to 73.3 percent last year, according to the April 1989 issue of the American Academy of Family Physicians (AAFP) Reporter. The publication said that, prior to 1988, the family practice fill rate in the match averaged 82 percent.

This year's match results reflect the continuation of a downward trend in the number of medical students desiring family practice careers. About 10.78 percent of U.S. medical students who graduated between July 1987 and June 1988 were in the family practice residencies as of October 1988—a drop from 12 percent in the previous year.

Rural areas have 22 percent of the nation's doctors, 14 percent of its pharmacies and 18 percent of its nurses, yet they contain 30 percent of its total population, according to a 1988 report to the U.S. Senate's Special Committee on Aging.

Further, one-fourth of the U.S. population—and one-third of its elderly—live in rural America. Many rural doctors are nearing retirement. A recent study for the National Rural Health Association predicts that the number of rural practitioners could drop by 25 percent within the next five years.

Several factors influence a doctor's decision to settle in a certain area. According to the winter 1988 issue of FOCUS on Rural Health, a publication of the Center for Rural Health at the University of North Dakota in Grand Forks, physicians from rural areas are more likely to practice in rural areas than are physicians raised in non-rural areas and vice versa.

Other factors include the number of contacts with other physicians, continuing medical education opportunities, professional growth opportunities, and the availability of medical facilities.

The preference of a physician's family are also a contributing factor. Four physicians have interviewed at the Lake Region Clinic within the past six months, according to Rotvold. He said that, of the four, one was living in a large city and didn't want to give up the social opportunities. Another physician's family felt close ties to the community they were already in.

Rotvold said that recruiting physicians is often a "sales job. It's like attracting a business to Devils Lake," he said. "If there's not progressive educational opportunities, for example, that could be a deterrent."

Rural communities have been forced to offer physicians bonuses or guaranteed salaries to entice them to relocate. Although Rotvold refused to reveal the Lake Region Clinic's compensation package, he said it is "competitive. Whenever we've talked to physicians about a benefit package, they've never said it's not enough for a first year guarantee," he said.

The clinic has 13 doctors on staff including five family practitioners, four general internists, an internistgastroenterologist, an obstetriciangynecologist and two surgeons. Other nonaffiliated physicians include an ophthalmologist and two hospital-based radiologists.

Specialists from larger clinics also see patients here. Patients are generally referred by their own doctor.

Three doctors handle all deliveries at Mercy Hospital, which last year amounted to about 350 babies. Rotvold said that another family practitioner with an interest in obstetrics would "take a lot of the pressure off."

That individual may be hard to find, however. Malpractice insurance premiums for those physicians who handle obstetrics is rising, resulting in many doctors dropping obstetrics from their practices. Several practices in the Lake Region area have done that, which may account for the high demand for obstetrical services in Devils Lake.

The clinic is also interested in a pediatrician and a non-invasive cardiologist who would also do some internal medicine work.

"Even if we had these three, we'd still have to fill any vacancies due to retirement," Rotvold said. "The physicians here have loyalty to the group and their patients. If they feel they're leaving the group tremendously short, they'll not do that (retire)."

Medicare reimbursements which are on a fixed fee payment schedule, affect the clinic, Rotvold said, but it is not a great concern. "The doctor treats the patient; they're not really affected by Medicare."

However, the clinic has written off about a third of a million dollars in bad debts each year, according to Rotvold. That figure is "possibly on the low side, he said, and reflects Medicare and Medicaid write offs, uncompensated health care and uncollectible debts.●

TRIBUTE TO MARION AND NORMAN HEINE

● Mr. LAUTENBERG. Mr. President, I rise to pay tribute to a distinguished couple, Marion and Norman Heine. Judge and Mrs. Heine will be honored at the first annual tribute dinner of the South Jersey Chapter of American Associates, Ben-Gurion University of the Negev on June 6 at Congregation Beth El in Cherry Hill.

Committed to Israel and with a strong belief in a Jewish education, the Heines are currently involved in the leadership of the American Associates, Ben-Gurion University of the Negav. They have been an inspiration to others and helped found the new South Jersey chapter.

Judge Heine is a distinguished lawyer. After passing the bar exam in 1933, he formed a partnership with his brother Aaron. He served as a judge of the New Jersey Superior Court, as Camden County prosecutor and Camden city attorney.

His political involvements date back to 1927. He was president of the New Jersey County Prosecutors' Association and the New Jersey Institute of Municipal Attorneys. Today Judge Heine pursues his profession of counsel with the law firm of Katz, Lane, Ettin, Levine & Kurzweil of Cherry Hill and Judicate, a company that settles cases privately.

Norman has actively participated in Jewish life as president of the Jewish Federation of Camden County, chairman, Bureau of Jewish Education, vice president of the Jewish Geriatric

Home, and president of Woodcrest Country Club. He was a recipient of the Camden County Community Service Award.

Judge and Mrs. Heine have been married since 1939 and recently celebrated their 50th wedding anniversary. The former Marion Zeller of Wilkes Barre, Mrs. Heine is a member of the National Council of Jewish Women, ORT and Hadassah. She was past chairman of the Women's Division of Allied Jewish Appeal and is a life member of the Jewish Geriatric Home Women's Association. The Heines have a son, Michael, a daughter, Joan Feinberg and son-in-law Henry Feinberg and three grandchildren.

The Heines are an exemplary couple and are most deserving honorees of the first annual tribute dinner. Through their efforts and love of Israel, Jewish life and education, many have benefited. I commend them for their many contributions and extend my warmest wishes and congratulations. May they have continued happiness in the future.●

COMMEMORATING THE 450TH ANNIVERSARY OF THE LANDING OF SPANISH EXPLORER HERNANDO DESOTO IN FLORIDA

● Mr. GRAHAM. Mr. President, in just a few days, on May 30, we will observe the 450th anniversary of one of the most significant events in the history of the Americas—the landing in Florida of Hernando DeSoto, to begin the first major exploratory expedition of North America by Europeans.

To commemorate this anniversary, Florida will dedicate the newly completed DeSoto trail markings. This project will allow Floridians, and all Americans, to enjoy and appreciate the magnitude of the task undertaken by these Spanish explorers, the lessons they learned from the New World, and the contributions they made to it in charting its wilds and uncovering its promise.

The significance of DeSoto's voyage, however, is not to be found in Florida alone. DeSoto's forces marched through what is now Georgia, the Carolinas, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, and Texas, as well. Hernando DeSoto himself died on the banks of the Mississippi River. This heritage of exploration, discovery, challenge, and courage is one that Florida shares with all the States of the southeastern United States; its legacy is one we share with all Americans.

For this reason, several of my esteemed Senate colleagues and I have introduced legislation to establish the DeSoto Trail Commission, to mark the historic path of this great expedition and expand archaeological and historical research related to its explorations. The DeSoto expedition laid a path to America's future; it is a part of the past that all Americans—not just Floridians—share.

I urge my colleagues to work together to speedily enact this legislation, so that we can more fully commemorate and appreciate the contributions and hardships of the explorers who came to our shores May 30, 1539. They launched the Age of Discovery that led to our Nation's founding; we must now enable more Americans to discover them and their age—and thus better understand our own.●

THE DEMOCRATIC REVOLUTION

● Mr. LUGAR. Mr. President, I had the pleasure earlier this month of participating in a fascinating conference on the Democractic Revolution which was sponsored by the National Endowment for Democracy. Democracy has made dramatic gains in the past decade, and many of the individuals who have been on the frontlines of those gains gathered together in the House of Representatives to review them and explore future prospects.

Most of these individuals are associated with Endowment programs. If they are but a sampling of the dedicated and committed individuals with whom the Endowment works throughout the world, than I am even more convinced that the Endowment's tiny budget is going very far and that the future of democracy and democratic institutions is bright.

The Democratic Revolution Conference did not go unnoticed in the press, and I am pleased to bring to the attention of my colleagues a New York Times article by Michael Kauffman which summarizes the event and follows:

The article follows:

[From the New York Times, May 5, 1989]

TYRANTS' FOES HERALD DAWN OF A NEW DAY

(By Michael T. Kaufman)

WASHINGTON, May 2.—For two days, better- and lesser-known strugglers against tyranny—among them former prisoners, banned writers and men and women forced into exile—gathered in the halls of Congress to discuss, and for the most part celebrate, what many described as a revolution extending democracy through Latin America, Eastern Europe and China.

They had been brought here by the National Endowment for Democracy, a Congressionally created body that gives funds to groups working to advance democratic institutions. A tone of general and jubilant optimism was set early when a telegram was read from Umberto Rubin, a campaigner for Paruguayan democracy. He apologized for not coming, noting that two years ago when the Endowment had staged a similar gathering he was also absent. Then he was kept in Asunción by a Government that refused to issue him a passport; now, he was at home to take part in what he thought would be free elections.

Similar dramatic changes in political climate were alluded to over and over. "Think how confusing it would be for a modern Rip Van Winkle—one who had fallen asleep, say, in 1969," Senator Lloyd Bentsen, Democrat of Texas, said as he greeted and saluted the participants. "He reads that demonstrators are complaining about police brutality in the Soviet Union, and Chinese students are calling for Premier Li's resignation because he is going too slowly toward democracy. It's quite a change, and from our point of view, quite a victory. An incomplete victory, a fragile victory, but a victory nevertheless."

READ DJILAS BOOK

The sense of jubilation extended beyond the formal panel discussions. At one point during a recess, Liang Heng, the founder of an independent journal, The Chinese Intellectual, raced over to introduce himself to Milovan Djilas, the Yugoslav political writer who was imprisoned for nine years after he broke with Tito. "I am here because I read your 'New Class.' "

"Thank you very much," said Mr. Djilas, who had come from Belgrade, where young people still generally shun him.

"Yes, it was at the end of the Cultural Revolution," the Chinese dissident continued. "My mother had been imprisoned and I approved the act. Then my father was sent to the countryside. I had been a Communist, but I lost my family and I lost my faith. I was 14 wandering around and I did try to kill myself. I could not understand how the system I had been taught to love was so different from the reality I saw. Then someone gave me a copy of 'The New Class' that was copied by hand from a book printed in Hong Kong. You explained the reality I was living in."

"Thank you," said Mr. Djilas again.

"Thank you," said Mr. Liang.

RUNNING FOR POLISH SENATE

Another twist was apparent in the appearance of Jacek Kuron, a key adviser to the Solidarity movement, who had spent 10½ years in Poland's prisons for challenging the state monopolies over information, organization and decision making. He was among the Solidarity delegation that negotiated with the Communist authorities on measures to broaden citizen rights and currently he is one of the independent candidates running for the newly established Polish Senate.

Mr. Kuron was given the Endowment's Democracy Award along with Monica Jimenez de Barros. She founded the Crusade for Citizen Participation, which mobilized millions of Chileans to take part in a plebiscite last October in which voters refused to extend the rule of Gen. Augusto Pinochet.

In his talk as part of a panel on East European developments, the raspy voiced Mr. Kuron gave a history of the events that led the Polish Government's turnaround on Solidarity and its appeals for greater pluralism. "When I think of how that revolution began, it seems somehow so simple. What did we do? We spoke freely, we read, we loaned books to each other and we raised money for people who needed help. These were the simplest human actions, to organize such simple acts turned out to be like putting a time bomb under totalitarianism."

But amid the proclamations there were warnings that the democratic innovations, particularly those related to Mikhail S. Gorbachev's retreat from earlier Soviet policies, could yet capsize. Jean-Francois Revel, the French political thinker who has written on

totalitarianism and democracy, noted, "Democratic euphoria is as dangerous as democratic pessimism."

THREATS TO DEMOCRACY

On a related note, Leszek Kolakowski, a philosopher who has taught at Oxford and the University of Chicago, said that while recent gains were worth celebrating, he wanted to concentrate on existing threats to democracy. Among these, he identified malignant nationalism, theocratic tendencies and terrorism which might lead states to abandon citizens' rights.

He also said that another threat was certain to come from "the phenomena of endless expectations," in which people all over the world want more than they have. Mr. Kolakowski said that as governments will be forced to repair damage to the planet there will be less and less to apportion, a situation that could imperil democratic efforts.

And Mr. Kuron warned against certain temptations of smugness. "There is a kind of thinking that I would call ideological racism which holds that we are all inherently good people, and they, the Communists, are inherently bad," he said. "The struggle should not be seen as people against people, but rather people against systems. We really should take the view that everywhere most people would prefer to show good will and what we should concentrate on is building institutions that make it easy as possible to do that."●

ISO POLICY CHANGES

● Mr. HARKIN. Mr. President, I would like to direct the attention of my colleagues to the recent policy changes undertaken by the Insurance Services Offices [ISO] which I believe to be very positive. ISO, the insurance industry's actuarial data-gathering body, will no longer provide final advisory rates to the 1,400 insurance companies which participate in their services.

The final advisory rate is an actuarial calculation which includes such things as overhead, litigation expenses, and a profit margin. The elimination of advisory rates means that insurance companies will have to set rates based on their own calculations, without the assistance of ISO. Participating companies will continue to receive information on losses and trends in loss payments. State insurance regulators have testified recently before the Senate Judiciary Committee that they will seek to make these major changes in insurance ratemaking a permanent feature of State law and regulations.

It is my view that during the months ahead, we should carefully monitor the impact the ISO policy changes are having on the industry, the State regulatory systems and policyholders and that such scrutiny precede and legislative activity with regard to the McCarran-Ferguson Act granting insurers limited antitrust immunity. Given these significant changes, I believe that a rush to judgment on legislation seeking to modify or repeal McCarran would create chaos in an industry so important to individual consumers as well as our entire economy.

Mr. President, the ISO changes are evidence that the property/casualty industry and State insurance regulators are acting to address public policy concerns over insurance pricing. Let us give them a chance to work and monitor carefully to see that they are fully implemented.●

IN RECOGNITION OF MAY 1989, "OLDER AMERICANS MONTH"

● Mr. MATSUNAGA. Mr. President, I rise today in my capacity as the chairman of the Subcommittee on Aging of the Labor and Human Resources Committee to point out that May 1989 is being observed throughout the United States as "Older Americans Month." Over the past 26 years, Older Americans Month has become a celebrated tradition serving to recognize the many contributions made by senior citizens to our great Nation. Observance of Older Americans Month also contributes to a better understanding of aging and the aged.

There is a visible trend occurring in America today—a greying trend—which is expected to continue well into the 21st century. By the year 2020, it is predicted that the number of older Americans will nearly triple—from 7 percent of our population today to 20 percent.

The Older Americans Act of 1965, one of the most effective laws ever passed by Congress, has helped older Americans become healthier, more independent, and less isolated than they were a mere 25 years ago. Better nutrition, preventive health care, job training, and transportation are but a few of the services provided for America's senior citizens under this comprehensive act. In 1987, along with other members of the Aging Subcommittee, I was privileged to help shepherd through Congress legislation to reauthorize the Older Americans Act. The $1.5 billion reauthorization passed the Senate unanimously in a demonstration of the importance which Congress attaches to the welfare of senior citizens.

The refined and improved Older Americans Act of 1987 is a major vehicle for the organization and delivery of services to older Americans. By greatly enhancing existing programs for older citizens and authorizing additional programs, we respond to the needs of the growing population.

The gerontocracy of America dictates change. As a nation we are becoming more and more dependent on the labor, services, and expertise older citizens provide. In the upcoming years, fewer people will be entering the work force. The resulting labor shortage will particularly affect the specialized areas of the job market.

The act recognizes the tremendous growth in the oldest segment of the elderly population and the projected demand for community-based, long-term care services. It is to our benefit to further ensure that all older citizens can have jobs, adequate housing, medical care, and retirement and community services to which they are entitled.

Smooth passage of this legislation is evidence that Government can provide essential services without sacrificing fiscal responsibility. Mr. President, I have always believed that the greatness of a nation can be accurately measured by the degree to which it cares for its elderly citizens. Older Americans Month offers an opportunity to rededicate our great Nation to the proposition that every older American is entitled to a healthy, happy, and dignified life in old age.●

TERRY ANDERSON

● Mr. MOYNIHAN. Mr. President, today marks the 1,524th day of captivity for Terry Anderson in Beirut.

I ask that the article from the October 13, 1986, Newsweek be printed in the RECORD.

The article follows:

NEXT, THE BEIRUT HOSTAGES—REAGAN RESPONDS TO A VIDEO PLEA

Peggy Say had tears in her eyes and watched from the edge of her chair as her brother, American hostage Terry Anderson, appeared on American television. "It hurts to see the propaganda with which the administration solved the case of Mr. Daniloff, a citizen like us who was in prison only for a short time," Anderson said in a videotape that was delivered by his Islamic Holy War captors to news agencies in West Beirut, then beamed by satellite to U.S. networks. His sister agreed. "Why isn't the same effort being exerted for them that's been exerted in every other hostage situation, most recently Mr. Daniloff?" she asked. Even U.S. News & World Report's Nicholas Daniloff weighed in with concern, singling out Anderson, a fellow journalist, as he vowed: "We shall not forget you." President Reagan was stung by the criticism. "There is no comparison," he said, visibly angry. "They were not seized by a government. We don't know who's holding them."

Last week, however, the administration appeared to be more anxious than ever to find out. "If those who were holding [the hostages] would step forward for discussion, that might move the thing forward," said White House spokesman Larry Speakes. That remark signaled a shift in emphasis in the administration's policy which rejects any negotiations over the kidnappers' demands for the release of 17 Shiite terroists who are jailed in Kuwait. Last week American officials seemed to be willing at least to talk directly to the kidnappers, as Secretary of State George Shultz made clear in an unsolicited comment to reporters: "We are ready to discuss with anyone the situation of our hostages in Lebanon."

UNDER DURESS?

The administration pushed harder for help from Syria, which has troops and observers in much of Lebanon. Shultz raised

the issue when he met with Syrian Foreign Minister Farouk al Sharaa in New York last week, Sharaa also spoke privately with Say. In an interview (box), Sharaa declared: "The Syrian government is committed to doing what it can in gaining the release of the remaining hostages."

Were Anderson and fellow hostage David P. Jacobsen coerced into making the videotaped appeal? "I have a feeling that they were doing this under the orders of their captors," the president said. "There is no way," Say responded in an interview on Cable Network News. "I know my brother very well. He has refused to make a tape for 18 months and borne some pain for that. I can promise you if they had held a gun to his head and told him to make a statement he would have said, 'Shoot'."

Family members found at least slight consolation the messages from Beirut. Say said her brother, a former Middle East bureau chief for the Associated Press, appeared "fit but thin" after being held for a year and a half. Eric Jacobsen said his father, former director of the American University Hospital in Beirut, looked healthy, despite his chilling description of 16 months of captivity. "the pain is real and ever-present 24 hours a day," David Jacobsen said. "The government does not know when they might hear of our death. They apparently don't care." There was no word from the third hostage also known to be held by Islamic Holy War, American University of Beirut Dean Thomas M. Sutherland.

DEATH THREAT

Jacobsen reminded viewers that one of the hostages, U.S. Embassy political officer William Buckley, already has been killed. His body has never been found. And another Islamic extremist group claimed it killed American University librarian Peter Kilburn, whose body was dumped in West Beirut last April in retaliation for the American raid on Libya. Whether or not the hostages' pleas were coerced, the death threat hanging over them was quite real.●

ISRAELI PEACE INITIATIVE

● Mr. LIEBERMAN. Mr. President, yesterday the Israeli Parliament endorsed Prime Minister Shamir's plan to hold elections in the West Bank and Gaza. This is a significant step toward peace in the Middle East. I applaud the Israeli Government for taking this imaginative and far-reaching step.

Under the Israeli plan, the 1.7 million West Bank and Gaza Palestinians would elect representatives to hold peace talks with Israel. Those representatives would first negotiate a 5-year period of self-rule. After 3 of those years passed, they would sit down again to negotiate the final status of the occupied territories.

This proposal enjoys widespread support among Israelis. As Defense Minister Rabin recently said:

After many years of different stages in the national unity Government, there is a unity Government peace initiative that I believe will be received widely and with great support by the Israeli people.

The election plan also has won the interest of a significant number of Palestinian leaders in the West Bank and Gaza. Although these leaders have publically rejected the election idea, many say in private that they would go along if the Palestine Liberation Organization approved.

Unfortunately the PLO has yet to accept the election proposal. It may, in fact, be actively discouraging it. In recent weeks, there has been an upsurge of killings of independent, non-PLO Palestinians which may be part of a campaign to prevent the emergence of candidates with moderate views. That kind of intimidation must end if there is to be peace in the Middle East.

It is important to remember that the last elections that were held under Israeli auspices on the West Bank and Gaza, in 1976, were conducted fairly. Even the PLO's strongest supporters have not disputed that fact.

The Israeli election plan could begin a process of genuine negotiations that will lead to compromises on both sides. The process of elections has a dynamic of its own. Elections do not guarantee success. But they do hold out the possibility of diplomatic progress. For Americans in particular, elections have a special meaning that confers legitimacy on officials. The only thing that boycotts guarantee is failure.

Today we need to see some of the courage that President Anwar Sadat displayed when he decided to break with the taboos of the past and come to Israel. Hardline PLO leaders can either exhaust themselves in maneuvers or realize that this is the first good chance for progress in years. They can concentrate on the past or look to the future. They can make propaganda or try to make progress.

The alternative to the new Israeli election plan is a continuation of the tragic violence that is creating grieving parents and children on both sides of the conflict. It is time for all that to end.●

MESA AZ, SCOUT TROOP ATTAINS HISTORIC HONOR

● Mr. McCAIN. Mr. President, it is a rare and special occasion when a member of the Boy Scouts of America is elevated to the rank of Eagle Scout. I am certain, however, that each Senator is familiar with a number of young people in their State earning this significant honor. It is a distinct pleasure for me to report on the accomplishments of an entire troop of Scouts in my State that have simultaneously achieved the status of Eagle Scout.

On June 3, 26 young men in Mesa, AZ will be jointly honored in a single Eagle Scout Court of Honor. The Boy Scouts of America, Troop 430 are to my knowledge the first troop to be jointly elevated from Life Scout to Eagle Scout. It is my understanding that this is the first troop of its size to have this number of Scouts reach the rank of Eagle Scout in one ceremony. I applaud these fine young people for their achievements in reaching this level of scouting, and I believe we can all learn something from the teamwork and selflessness exhibited by a group that works together toward such a lofty goal.

These Scouts have exhibited both hard work and perseverance in performing an incredible range of services to their community in order to earn this high honor. They have been supported by their families, and have been aided by members of the community that place a priority on helping develop our leaders of the future. I commend the dedication and diligence of these young men and the people that have helped them attain this rank.

The projects these Scouts have performed include designing and building equipment for disabled individuals, planting trees in local parks and National Forests, clearing wilderness areas of debris, organizing blood drives, planning events to benefit needy members of the community, designing and constructing recreational facilities, organizing food drives for poor individuals in Arizona and Mexico, and helping to restore cultural landmarks.

Following is a list of the individuals that will be honored in the Eagle Court of Honor next week in Mesa, AZ:

Jason A. Jennings, Keith L. Millett, Jordan T. Flake, Damien W. Budge, J. Noah Haynes, Michael G. Merrill, Thomas L. Young, R. Nathaniel Clarkson, Quin A. Gardner, David A. Haynes, Kreg D. Lulloff, Nathan D. Stringfellow, Chad J. Merrill, David L. Thompson, Michael S. Boren, Darren P. Nicoll, Stephen R. Flake, David D. Lee, Jeff L. Wimmer, Dale E. Andersen, Jr., Karl C. Conover, Russell J. Gould, Sterling W. Jackson, Treg J. Ripley, Douglas W. Thompson, and Jaron J. Fischbeck.

Thank you, Mr. President.●

UNITED STATES-ISRAEL ALLIANCE

● Mr. HATCH. Mr. President, since the founding of the Jewish state in 1949, Americans and Israelis have solidified a relationship based on the fundamental belief that democratic self-government is the best guarantee of peace and freedom. While there are many differences among us, and we may disagree on the most effective way to bring peace, America and Israel need each other for a number of reasons: To ensure security throughout the region, to promote democracy and freedom, and to advance the cause of peace.

The dynamics of the Middle East and the changes taking place throughout the world bring renewed hope and

opportunity for the peace process in the Middle East. At the outset, I would like to examine some of these developments and their impact on the relationship between Israel and the United States.

Yasser Arafat's recent efforts to broaden support for a Palestinian state by declaring the Palestinian charter "null and void," and his acceptance of American conditions for initiating a dialog are actions the United States should continue to encourage. But there are many reasons for looking long and hard at Mr. Arafat's statements before changing our policy. Do these conciliatory public statements by the PLO match the content of their speeches, writings, and charter? Do they want "Jericho or Jerusalem"? We need to see concrete actions by the PLO to support their dialog—positive steps toward peace rather than continued actions in terrorism.

Congress must not forget the PLO is an organization made up of a number of political groups, some of which have made it clear they continue to reject Israel's right to exist regardless of what Mr. Arafat may say or do. To these groups, terrorism remains central to their activities.

Even among Mr. Arafat's supporters we hear statements contrary to Mr. Arafat's peaceful remarks. Yet these assertions are not rebutted nor are these individuals disciplined for their actions. Moreover, what are we to make of Mr. Arafat's recent threats on Palestinian leaders who have offered to begin a dialog or make peace with Israel? We must keep a close watch on Mr. Arafat and his organization—to look carefully behind his words before coming to any conclusions.

The Congress, unfortunately, does not always have a long attention span. It sometimes forgets the historical context of present day circumstances. And Congress forgets the train of events leading to, and the immediate reason for, the Israeli presence on the West Bank and Gaza. We have to do a better job of reminding the American people of pertinent facts.

Given this context, it is understandable why Israel will not negotiate with the PLO. Yet Israel yearns for peace, and Prime Minister Yitzhak Shamir showed the world that Israel is ready to explore new options.

While in Washington last month, the Prime Minister unveiled a plan to address both the short- and long-term status of the occupied territories. The proposal allows for free and democratic elections among the Palestinian residents in the occupied territories. From these elections, representatives would be chosen to conduct negotiations for a transitional period of self-rule. This period would serve as a time to test whether peaceful coexistence and cooperation can exist between Palestinians and Israelis. At a later date, but within 3 years, negotiations would be conducted for a permanent solution.

Just this week, the Israeli Cabinet and Parliament approved the election proposal, but not without heated debate. Foreign Minister Moshe Arens and Defense Minister Yitzhak Rabin will soon be arriving in Washington to provide answers to many of the Bush administration's questions and concerns. But this addresses only half of the issue.

As the self-proclaimed spokesman for the Palestinians in the occupied territories, the PLO has formally rejected Israel's election proposal. They view the proposal as an attempt to preclude PLO leadership of a Palestinian state.

For Israel's part, any comprehensive proposal meeting long-term needs must go beyond the Palestinian question and include the establishment of peace relations between Israel and those Arab States which still maintain a state of war with Israel. Fully comprehending this scenario, Mr. Arafat has focused the PLO's last stand on leadership of a Palestinian state.

In the short term, the PLO and the Palestinian question remain the most immediate source of friction between Israel and peace with her Arab neighbors. Yet in the long term, solving the PLO problem only addresses part of the broader issue of Arab-Israeli peace. This is the dilemma Israel faces.

How then should Israel proceed and what should be the proper role for the United States in shaping the Middle East peace? Israel has come forward with a plan to elect a local Palestinian leadership and establish an interim test period. Local Palestinians should be encouraged to open a dialog with the Israeli Government. They should not feel bound to blindly follow the rhetoric of the PLO but follow what is in their best interests. Where the United States can assist, every effort should be made.

While the dynamics of the Middle East are changing, the United States will always be obligated to assist efforts for peace, freedom, and democracy. Moreover, our loyalty, friendship, respect, and love for Israel remain rock solid and continue to grow. We are committed to the existence of the Jewish state, a land of democratic values and traditions. Our destinies, for moral, humanitarian, democratic, and security reasons remain inexorably linked.

Knowing all this, what should be the proper role for the United States in shaping the Middle East peace? We continue to believe negotiations and compromise can be reached, but they must begin with dialog. Where the United States can facilitate this dialog every effort must be made. But this cannot and must not substitute for a direct dialog between the parties to the conflict. We must stand by Israel and help her make the decisions that are in her best interest, not dictate peace on our terms. They and they alone have the responsibility for making the compromises and finding the solutions.

I am confident the United States-Israel alliance will continue to grow and prosper. While our two countries may have their differences, the United States love for Israel's land and her people; the United States commitment to Israel's security both militarily and economically; and the United States faith in the justice of Israel's cause will never yield.●

THE CENTENNIAL OF THE CITY OF DAVISON

● Mr. LEVIN. Mr. President, today I would like to join the people of Davison, MI, in celebrating the city's 100th birthday.

Those Senators who have not been lucky enough to visit Michigan have not had the chance to find out just how special a place Davison is. Anyone who has ever visited Davison cannot help but be struck by how friendly a community it is. This spirit has been captured by the city's centennial motto, "A Century of Hometown Friendliness."

In 1889, when the village of Davison was first incorporated, E.W. Rising, the first village president, and the first trustees, W.M. Knapp, Howard Howes, and Bryon Moss, probably had little idea what a bright fututre lay in store. Davison has grown into a vibrant community of 6,000, now led by Mayor Dennis Ryan, city councilors Kay Adair, Frederick Rappuhn, M. Sue Csutoras, David Horton, Timothy Coleman, and Geoffrey Roberts, and city manager Jack Abernathy.

Davison's economy is growing. New businesses are opening all the time. Davison is also home to some special businesses. Genova Products, founded in 1965, is a major producer of plastic plumbing. And Davison is home to one of the Nation's first manufacturers of geodesic domes.

Davison also prides itself on its patriotism. It has long been known as the City of Flags, a nickname which started when a visitor noticed that all the stores on Main Street proudly displayed Old Glory. The city has taken this nickname to heart, becoming the only Michigan city to fly the flags of all 50 State permanently. Ken Morrow, a son of Davison, represented our country proudly at the 1980 Winter Olympics, playing a key role in helping the U.S. hockey team bring home the Gold Medal.

The Davison Centennial Committee has planned a gala celebration to mark

this anniversary. The festivities planned for this Saturday, May 20, include parades, period shows, a concert by the U.S. Marine Band, and a centennial ball. The highlight of the day will be the commemoration of Davison as the City of Flags: 2,000 people will join in making a human flag. I am happy to join in this celebration.

Happy birthday, Davison. Congratulations on a great 100 years, and best wishes for the next hundred.●

PRIME MINISTER SHAMIR'S PEACE PLAN

● Mr. LAUTENBERG. Mr. President, I rise to make clear my support for Prime Minister Shamir's recent peace initiative to hold elections among the Palestinians of the West Bank and Gaza Strip.

This proposal is a bold move by Prime Minister Shamir. It provides a real opportunity for the Palestinians to move beyond the violence and bloodshed of the last 17 months. It provides a chance for them to put their hopes for peace and for a genuine political voice on a fast track again through genuine dialog with Israel.

This proposal challenges all those who claim they have the best interests of the Palestinians at heart. Israel's Arab neighbors have long ignored or rejected opportunities for peace while all around them violence and bloodshed continue. Lebanon is but one example of the needless loss of innocent life that occurs every day in the Arab world. Yet little action is taken to end this violence and brutality.

Now, Israel's neighbors have the chance to make a real move toward peace. They can do so by urging the Palestinians to participate in the elections called for by this plan. While neither Egypt nor Jordan has rejected Shamir's proposal outright, their voices could be instrumental in persuading the Palestinians to accept this offer.

Yet every day that goes by more Palestinians die while the only real proposal to provide Palestinians with a role in determining their future is criticized as "deceitful" and worse. The only plan that could truly save lives and put an end to the ongoing violence is rejected out of hand. Many Palestinian leaders in the West Bank and Gaza who publicly reject the election idea say in private that they would accept if the PLO did. Jordan and Egypt could be helpful there too.

Under this election plan, the 1.7 million Palestinians in the West Bank and the Gaza Strip would elect representatives to hold peace talks with Israel. First, they would negotiate a 5-year period of limited self-rule, and then, in 3 years, they would sit down again to negotiate the final status of the territories. The interim 5-year period would serve as an essential test of cooperation and coexistence.

The aim of elections is to bring about a process of political negotiations and to locate legitimate representatives of the Palestinians. These elections will permit the development of an authentic representation that is not self-appointed from the outside, comprised of people chosen by the population in free elections.

Democratic elections provide a real opportunity to begin the peace process after years of stalemate and 17 months of ongoing riots and disturbances. By enabling the Palestinians to choose their own representatives for negotiations with Israel over their fate, these elections could provide the needed catalyst for restarting the peace process. They could lead to the first measure of self-government in the West Bank and Gaza for 22 years. And they could be a real first step toward a comprehensive peace settlement in the region.

This election plan may not be perfect from the Palestinians point of view. It may not answer all the questions they want answered, nor resolve their fate in the ultimate sense. But every journey of 1,000 miles begins with a single step. This proposal can be the first step on the long journey toward peace between Israel and the Palestinians and the other Arab countries who have repeatedly made war on Israel. It is the best option the Palestinians have. And it provides a real window of opportunity through which the Palestinians may be heard.

To reject it now is to put peace on the backburner and violence on the front. It is to acknowledge that more lives will be lost before any are saved. It is an acknowledgment that Chairman Arafat is not really interested in peace, but only a settlement on his terms.

I have urged the Arab countries to put their weight behind this proposal. And I urge the United States, as the leading democracy in the free world, to do so as well, in order to support the development of democracy in a part of the world where, aside from Israel, none exists.●

THE ISRAELI ELECTIONS PROPOSAL

● Mr. LEVIN. Mr. President, I want to take a brief moment to discuss the recent Israeli initiative for elections in the West Bank and Gaza Strip.

The PLO has thus far rejected the plan out-of-hand. I urge the Palestinians in the West Bank and Gaza to seriously consider the proposal.

The initiative deserves more than a knee-jerk, negative response. It could provide the basis for an eventual resolution of the ongoing crisis that has had such dire consequences for so many people, a crisis which has sparked debate here, in Arab lands, and in Israel itself.

The Israeli proposal envisions a two-stage process. First, the Israelis propose a 5-year "transitional period," during which Palestinians in the West Bank and Gaza—without any outside interference—would enjoy a form of self-rule by representatives they would select themselves in democratic elections.

Those elected officials would negotiate with the Israelis on the exact terms of the 5-year transitional period. Within the first 3 years, discussions would begin on the second stage—the final status of the West Bank and Gaza.

The process, it should be noted, is based on U.N. Resolutions 242 and 338. This is in keeping with U.S. policy.

No one should underestimate the power of free elections. I hope Palestinians in the West Bank and Gaza will realize the potential benefits of a democratic process and will come forward and work with Israel at moving the peace process forward.●

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations reported today by the Committee on Finance, Committee on the Judiciary, Committee on Armed Services and Committee on Labor and Human Resources:

Sidney L. Williams to be a Deputy U.S. Trade Representative, with the rank of Ambassador;

Melinda Harmon to be a U.S. district judge for the southern district of Texas;

Ferdinand F. Fernandez to be a U.S. circuit judge for the ninth circuit;

Robert C. Bonner to be a U.S. district judge for the central district of California;

Pamela A. Rymer to be U.S. circuit judge for the ninth circuit;

Carol T. Crawford to be an Assistant Attorney General;

Shirley D. Peterson to be an Assistant Attorney General;

Kenneth Winston Starr to be Solicitor General of the United States;

Louis S. Williams to be an Assistant Secretary of Defense;

David J. Gribbin III to be an Assistant Secretary of Defense;

Sean C. O'Keefe to be Comptroller of the Department of Defense; and

Roderick A. DeArment to be Deputy Secretary of Labor.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

Sidney Linn Williams, of Virginia, to be a Deputy U.S. Trade Representative, with the rank of Ambassador.

Melinda Harmon, of Texas, to be U.S. district judge for the southern district of Texas.

Ferdinand F. Fernandez, of California, to be U.S. circuit judge for the ninth circuit.

Robert C. Bonner, of California, to be U.S. district judge for the central district of California.

Pamela Ann Rymer, of California, to be U.S. circuit judge for the ninth circuit.

Carol T. Crawford, of Virginia, to be Assistant Attorney General.

Shirley D. Peterson, of Maryland, to be Assistant Attorney General.

Kenneth Winston Starr, of Virginia, to be Solicitor General of the United States.

Louis A. Williams, of Wyoming, to be an Assistant Secretary of Defense.

David J. Gribbin III, of Maryland, to be an Assistant Secretary of Defense.

Sean Charles O'Keefe, of Virginia, to be comptroller of the Department of Defense.

Roderick Allen DeArment, of Virginia, to be Deputy Secretary of Labor.

STATEMENT ON THE NOMINATION OF SEAN O'KEEFE TO BE COMPTROLLER OF THE DEPARTMENT OF DEFENSE

Mr. INOUYE. Mr. President, I strongly support the nomination of Sean O'Keefe to be the Comptroller of the Department of Defense. I say this with mixed emotion because the Senate, and especially my Subcommittee on Defense Appropriations, will be losing one of the most capable and likeable professional staff members ever to serve in this institution.

I have worked closely with Sean since he joined the Appropriations Committee staff in 1981. He came to the committee with sterling credentials—a graduate degree in public administration, a former Presidential management intern, and 3 years of financial management service with the Navy, Office of the Secretary of Defense and the Office of Management and Budget. I might also note with some pride that he attended high school in my home State of Hawaii while his father, a Navy captain, was stationed at Pearl Harbor.

Sean O'Keefe developed a reputation as one of the Defense Subcommittee's most talented staff and become subcommittee clerk in 1986. He supported all members of the Appropriations Committee, whether Republican or Democrat, with the same outstanding professionalism. Above all else, he became known on the floor of the Senate as the right hand man of my good friend from Alaska, Senator TED STEVENS.

The Senate's loss will be Secretary Cheney's gain. With the current pressures on the Defense budget, the President and the Secretary need a first-rate professional who can "hit the ground running." They need a comptroller who possesses sound managerial skills and who can motivate the career budget staff. They need a comptroller who will motivate the career budget staff. They need a comptroller who will give attention to the less glamorous financial management issues like accounting policy, as well as budget formulation and execution. In Sean O'Keefe, President Bush and Dick Cheney have found the right man for the job.

As chairman of the Defense Appropriations Subcommittee, I will get to watch Sean's career continue to flourish. I expect that he will continue to work closely with my subcommittee. Sean has a big challenge ahead—and I am sure that he will create the same outstanding record of achievements at the Pentagon that he has here in the Senate.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to consider the following nominations:

Calendar 125. Galen J. Reser to be an Assistant Secretary of Transportation;

Calendar 129. Alan C. Raul to be General Counsel of the Department of Agriculture;

Calendar 136. Frank H. Habicht II to be Deputy Administrator of the Environmental Protection Agency;

Calendar 138. John C. Monjo to be Ambassador Extraordinary and Plenipotentiary of the United States to the Republic of Indonesia;

Calendar 139. Ivan Selin to be Under Secretary of State for Management;

Calendar 141. Donald B. Rice to be Secretary of the Air Force;

Calendar 142. Gen. Robert T. Herres for reappointment as Vice Chairman of the Joint Chiefs of Staff;

Calendars 143, 144, 145. Promotions in the Army;

Calendars 146, 147. Promotions in the Marine Corps; and

All nominations placed on the Secretary's desk in the Air Force and Navy.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF TRANSPORTATION

Galen Joseph Reser, of Virginia, to be an Assistant Secretary of Transportation.

DEPARTMENT OF AGRICULTURE

Alan Charles Raul, of New York, to be General Counsel of the Department of Agriculture.

ENVIRONMENTAL PROTECTION AGENCY

Frank Henry Habicht II, of Virginia, to be Deputy Administrator of the Environmental Protection Agency.

DEPARTMENT OF STATE

John Cameron Monjo, of Maryland, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Indonesia.

Ivan Selin, of the District of Columbia, to be Under Secretary of State for Management.

DEPARTMENT OF DEFENSE

Donald B. Rice, of California, to be Secretary of the Air Force.

The following-named officer for reappointment as Vice Chairman of the Joint Chiefs of Staff under Title 10, United States Code, Section 154.

To be Vice Chairman of the Joint Chiefs of Staff

Gen. Robert T. Herres [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant General

Lt. Gen. Frederic J. Brown [redacted], U.S. Army.

The following-named officer for appointment to the grade indicated, under the provisions of title 10, United States Code, section 601(a), in conjunction with assignment to a position of importance and responsibility designated by the President under title 10, United States Code, section 601(a):

To be lieutenant general

Maj. Gen. Frederick M. Franks, Jr., [redacted] U.S. Army.

The following-named officer for appointment to the grade indicated, under the provisions of title 10, United States Code, section 601(a), in conjunction with assignment to a position of importance and responsibility designated by the President under title 10, United States Code, section 601(a):

To be lieutenant general

Maj. Gen. James R. Hall, Jr. [redacted], U.S. Army.

IN THE MARINE CORPS

The following-named officer for assignment as Assistant Commandant of the Marine Corps and Chief of Staff, under title 10, United States Code, section 601:

To be general

Gen. Joseph J. Went [redacted] /9903 USMC.

The following-named officer, under the provisions of title 10, United States Code, section 601, for assignment to a position of importance and responsibility in grade as follows:

To be lieutenant general

Maj. Gen. Norman H. Smith, [redacted] 9903 USMC.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, NAVY

Air Force nominations beginning Wayne E. Balcom, and ending Stephen M. Valentine, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 1, 1989.

Air Force nominations beginning James E. Mullen, and ending Leo H. Fox, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 2, 1989.

Air Force nominations beginning Major Alan V. Box, [redacted], and ending Major Maureen E. Newman, [redacted], which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 2, 1989.

Air Force nominations beginning Jon M. Owings, and ending Vicente U. Yap, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 2, 1989.

Air Force nomination of Robert J. Frink, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of May 16, 1989.

Navy nominations beginning Kriss B. Stanley, and ending Linda S. Taylor, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 1, 1989.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now resume legislative session.

CORRECTING THE ENROLLMENT—S. RES. 130

Mr. MITCHELL. Mr. President, I ask unanimous consent that the enrollment of Senate Resolution 130 be corrected to reflect the changes I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPRESSING THE SENSE OF CONGRESS WITH RESPECT TO THE HEALTH OF THE NATION'S CHILDREN

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Labor Committee be discharged from further consideration of Senate Joint Resolution 104 expressing the sense of Congress with respect to the health of the Nation's children and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 104) to express the sense of the Senate with respect to the health of the Nation's children.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on passage of the joint resolution.

The joint resolution (Senate Joint Resolution 104) was passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 104

Whereas children are our precious resource;

Whereas the future of this great country depends on their healthy development, in a safe environment, with a sound education which meets their individual needs and allows them to achieve their maximum potential;

Whereas our national commitment to this Nation's children and pregnant women is not commensurate with our resources or our knowledge;

Whereas we recognize that the health needs of our children are changing, with health problems intertwined with behavioral and psychological disturbances often related to social and economic conditions;

Whereas there are alarming trends in preventable diseases and deaths among our children, as evidenced by the increase in childhood diseases, injuries, and substance abuse;

Whereas despite our technological advances in the treatment of newborns, the United States ranks 18th among industrialized nations in infant mortality and our position has not improved since 1980;

Whereas we know that low birth weight is the major contributor to infant deaths, 34 percent of all pregnant women receive insufficient or no prenatal care, with infants born to teens significantly more likely to be born at low birth weight;

Whereas children ages 21 and under represent only 33 percent of the total United States population, they constitute nearly half of the uninsured, with gaps particularly profound for children 0–2 and adolescents 18–21;

Whereas the majority of children who are uninsured have parents that work full or part time, only 12 percent of all uninsured children live in nonworking families;

Whereas Congress has sought to improve and expand Medicaid, fewer than half of poor children are currently receiving Medicaid coverage, and even those who are, encounter significant barriers of limited benefits and frequent periods of discontinuity;

Whereas a wide variety of children's programs are administered at many different levels of Federal and State bureauracies, they have resulted in fragmentation and duplication of services, especially for chronically ill children: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That we declare that access to quality health care is a goal for every child and pregnant women.

SEC. 2. It is a shared responsibility of both the public and private sectors at the Federal, State, and local levels, and that we collectively commit ourselves to take the necessary steps to remove existing barriers toward that end.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY FOR COMMITTEES TO FILE REPORTS

Mr. MITCHELL. Mr. President, I ask unanimous consent that committees may file reported Legislative and Executive Calendar business on Thursday, May 25, from 12 noon to 3 p.m., with the exception of the Senate Foreign Relations Committee reporting out the nomination of Richard Reeves Burt to be Ambassador during his term as head of the delegation on the START negotiations.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR THE MAJORITY LEADER TO TAKE CERTAIN ACTIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the majority leader may be authorized to sign duly enrolled bills and resolutions during the Memorial Day recess of the Senate referenced in Senate Concurrent Resolution 38.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I yield to the distinguished Republican leader.

Mr. DOLE. Mr. President, I understand, first of all, there will be no session tomorrow; is that correct?

Mr. MITCHELL. Yes.

Mr. DOLE. I also thank the chairman of the Appropriations Committee, Senator BYRD, and the ranking member, Senator HATFIELD, for their efforts in resolving what could have been a problem. I assure America's veterans I am certain we will take care of their needs. If the House does not accept the amendment then there is still the possibility that OMB could make provisions that would provide relief until June 30.

I would say for the record that, as far as I was concerned, I was prepared to act on the House-passed bill. But that was not the wishes of those who were primarily responsible and I think we have acted responsibly. I thank the majority leader.

Mr. MITCHELL. I thank the distinguished Republican leader.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 4355(a) appoints the following Senators to the Board of Visitors to the U.S. Military Academy: The Senator from New York [Mr. D'AMATO], from the Appropriations Committee, and the Senator from Montana [Mr. BURNS], at large.

The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 9355(a), appoints the following Senators to the Board of Visitors to the U.S. Air Force Academy: The Senator from Mississippi [Mr. COCHRAN], from the Appropriations Committee, and the Senator from Iowa [Mr. GRASSLEY], from the Appropriations Committee.

The Chair, on behalf of the Vice President, pursuant to 10 U.S.C. 6968(a) appoints the Senator from

Oregon [Mr. HATFIELD], from the Appropriations Committee, to the Board of Visitors to the U.S. Naval Academy.

The Chair, on behalf of the Vice President, pursuant to 14 U.S.C. 194(a) appoints the Senator from Missouri [Mr. DANFORTH], from the Committee on Commerce, Science, and Transportation, to the Board of Visitors of the U.S. Coast Guard Academy.

The Chair, on behalf of the Vice President, pursuant to 46 U.S.C. 1295(b) appoints the Senator from South Dakota [Mr. PRESSLER], from the Committee on Commerce, Science, and Transportation, to the Board of Visitors of the U.S. Merchant Marine Academy.

RECESS UNTIL WEDNESDAY, MAY 31, 1989 AT 2:15 P.M.

Mr. MITCHELL. If the Republican leader has no further business and no other Senator is seeking recognition, I ask unanimous consent that the Senate stand in recess under the provisions of Senate Concurrent Resolution 38 until 2:15 p.m. on Wednesday, May 31. There being no objection, the Senate, at 7:47 p.m., recessed until Wednesday, May 31, 1989, at 2:15 p.m.

NOMINATIONS

Executive nominations received by the Senate May 18, 1989:

FEDERAL EMERGENCY MANAGEMENT AGENCY

ANTONIO LOPEZ, OF TENNESSEE, TO BE AN ASSOCIATE DIRECTOR OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY, VICE GEORGE WOLOSHYN, RESIGNED.

IN THE ARMY

THE FOLLOWING-NAMED OFFICER TO BE PLACED ON THE RETIRED LIST IN GRADE INDICATED UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. JAMES E. MOORE, JR., xxx-xx-xxxx U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 601(A), IN CONJUNCTION WITH ASSIGNMENT TO A POSITION OF IMPORTANCE AND RESPONSIBILITY DESIGNATED BY THE PRESIDENT UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A):

To be lieutenant general

LT. GEN. WILLIAM H. HARRISON, xxx-xx-xxxx U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 601(A), IN CONJUNCTION WITH ASSIGNMENT TO A POSITION OF IMPORTANCE AND RESPONSIBILITY DESIGNATED BY THE PRESIDENT UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A):

To be lieutenant general

LT. GEN. CALVIN A. H. WALLER, xxx-xx-xxxx U.S. ARMY.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 18, 1989:

DEPARTMENT OF JUSTICE

KENNETH WINSTON STARR, OF VIRGINIA, TO BE SOLICITOR GENERAL OF THE UNITED STATES.

DEPARTMENT OF STATE

JOHN CAMERON MONJO, OF MARYLAND, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF CAREER MINISTER, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF INDONESIA.

IVAN SELIN, OF THE DISTRICT OF COLUMBIA, TO BE UNDER SECRETARY OF STATE FOR MANAGEMENT.

DEPARTMENT OF AGRICULTURE

ALAN CHARLES RAUL, OF NEW YORK, TO BE GENERAL COUNSEL OF THE DEPARTMENT OF AGRICULTURE.

DEPARTMENT OF LABOR

RODERICK ALLEN DEARMENT, OF VIRGINIA, TO BE DEPUTY SECRETARY OF LABOR.

EXECUTIVE OFFICE OF THE PRESIDENT

SIDNEY LINN WILLIAMS, OF VIRGINIA, TO BE A DEPUTY U.S. TRADE REPRESENTATIVE, WITH THE RANK OF AMBASSADOR.

DEPARTMENT OF JUSTICE

SHIRLEY D. PETERSON, OF MARYLAND, TO BE AN ASSISTANT ATTORNEY GENERAL.

DEPARTMENT OF TRANSPORTATION

GALEN JOSEPH RESER, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF TRANSPORTATION.

DEPARTMENT OF JUSTICE

CAROL T. CRAWFORD, OF VIRGINIA, TO BE AN ASSISTANT ATTORNEY GENERAL.

DEPARTMENT OF DEFENSE

DAVID J. GRIBBIN III, OF MARYLAND, TO BE AN ASSISTANT SECRETARY OF DEFENSE.

LOUIS A. WILLIAMS, OF WYOMING, TO BE AN ASSISTANT SECRETARY OF DEFENSE.

ENVIRONMENTAL PROTECTION AGENCY

FRANK HENRY HABICHT II, OF VIRGINIA, TO BE DEPUTY ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY.

DEPARTMENT OF DEFENSE

DONALD B. RICE, OF CALIFORNIA, TO BE SECRETARY OF THE AIR FORCE.

SEAN CHARLES O'KEEFE, OF VIRGINIA, TO BE COMPTROLLER OF THE DEPARTMENT OF DEFENSE.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

THE JUDICIARY

FERDINAND F. FERNANDEZ, OF CALIFORNIA, TO BE U.S. CIRCUIT JUDGE FOR THE NINTH CIRCUIT.

PAMELA ANN RYMER, OF CALIFORNIA, TO BE U.S. CIRCUIT JUDGE FOR THE NINTH CIRCUIT.

ROBERT C. BONNER, OF CALIFORNIA, TO BE U.S. DISTRICT JUDGE FOR THE CENTRAL DISTRICT OF CALIFORNIA.

MELINDA HARMON, OF TEXAS, TO BE U.S. DISTRICT JUDGE FOR THE SOUTHERN DISTRICT OF TEXAS.

DEPARTMENT OF DEFENSE

THE FOLLOWING-NAMED OFFICER FOR REAPPOINTMENT AS VICE CHAIRMAN OF THE JOINT CHIEFS OF STAFF UNDER TITLE 10, UNITED STATES CODE, SECTION 154.

To be vice chairman of the Joint Chiefs of Staff

GEN. ROBERT T. HERRES, xxx-xx-xxxx FR, U.S. AIR FORCE.

IN THE ARMY

THE FOLLOWING-NAMED OFFICER TO BE PLACED ON THE RETIRED LIST IN GRADE INDICATED UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. FREDERIC J. BROWN, xxx-xx-xxxx U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 601(A), IN CONJUNCTION WITH ASSIGNMENT TO A POSITION OF IMPORTANCE AND RESPONSIBILITY DESIGNATED BY THE PRESIDENT UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A):

To be lieutenant general

MAJ. GEN. FREDERICK M. FRANKS, JR., xxx-xx-xxxx, U.S. ARMY.

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 601(A), IN CONJUNCTION WITH ASSIGNMENT TO A POSITION OF IMPORTANCE AND RESPONSIBILITY DESIGNATED BY THE PRESIDENT UNDER TITLE 10, UNITED STATES CODE, SECTION 601(A);

To be lieutenant general

MAJ. GEN. JAMES R. HALL, JR., xxx-xx-xxxx U.S. ARMY.

IN THE MARINE CORPS

THE FOLLOWING-NAMED OFFICER FOR ASSIGNMENT AS ASSISTANT COMMANDANT OF THE MARINE CORPS AND CHIEF OF STAFF, UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be general

GEN. JOSEPH J. WENT, xxx-xx-xxxx/9903 USMC.

THE FOLLOWING-NAMED OFFICER, UNDER THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 601, FOR ASSIGNMENT TO A POSITION OF IMPORTANCE AND RESPONSIBILITY IN GRADE AS FOLLOWS:

To be lieutenant general

MAJ. GEN. NORMAN H. SMITH, xxx-xx-xxxx/9903 USMC.

IN THE AIR FORCE

AIR FORCE NOMINATIONS BEGINNING WAYNE E. BALCOM, AND ENDING STEPHEN M. VALENTINE, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF MAY 1, 1989.

AIR FORCE NOMINATIONS BEGINNING JAMES E. MULLEN, AND ENDING LEO H. FOX, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGESSIONAL RECORD OF MAY 2, 1989.

AIR FORCE NOMINATIONS BEGINNING MAJOR ALAN V. BOX, xxx-xx-xxxx AND ENDING MAJOR MAUREEN E. NEWMAN, xxx-xx-xxxx WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF MAY 2, 1989.

AIR FORCE NOMINATIONS BEGINNING JON M. OWINGS AND ENDING VICENTE U. YAP, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF MAY 2, 1989.

AIR FORCE NOMINATION OF ROBERT J. FRINK, WHICH WAS RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF MAY 16, 1989.

IN THE NAVY

NAVY NOMINATIONS BEGINNING KRISS B. STANLEY, AND ENDING LINDA S. TAYLOR, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF MAY 1, 1989.

EXTENSIONS OF REMARKS

BREASTFEEDING PROMOTION: LESSONS FROM DEVELOPING COUNTRIES

HON. MICKEY LELAND
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. LELAND. Mr. Speaker, on April 27, 1989, the House Select Committee on Hunger conducted a hearing to examine child health improvement interventions utilized in many developing countries and how these practices might be applied here in the United States. We received testimony from Dr. Sandra Huffman, president of the Center to Prevent Childhood Malnutrition, on how breastfeeding promotion can be used as an agent to improve the health and nutrition status of infants and children in this country. I commend this statement to your attention.

While we are a society which focuses on technological advancements in the field of medicine, in our efforts to develop and implement comprehensive programs for disease prevention and health promotion, we must not overlook those simple strategies that are efficient, cost-effective, and easily practiced. I believe the potential benefits outlined in Dr. Huffman's testimony merit our strong consideration.

TESTIMONY PRESENTED TO THE SELECT COMMITTEE ON HUNGER, APRIL 27, 1989, BY DR. SANDRA HUFFMAN, PRESIDENT, CENTER TO PREVENT CHILDHOOD MALNUTRITION

Breastfeeding has unmatched health benefits for infants in both developing and developed countries. Many programs in developing countries have led to large increases in breastfeeding rates, with substantial benefits for child health and significant savings in health costs. This testimony summarizes successful programs to promote breastfeeding throughout the world, and discusses how the U.S. could benefit from similar activities to increase breastfeeding in our own population.

Children who are breastfed have fewer cases of diarrhea, respiratory tract infections, allergies and other diseases. In recognition of these benefits of breastfeeding, the Surgeon General's report on Health Promotion and Disease Prevention set one of the U.S. health objectives of increasing the proportion of women who breastfeed their babies at hospital discharge to 75% and the percentage of women still breastfeeding at 6 months postpartum at 35% by the year 1990.

In 1985, nearly 60% of U.S. infants were ever breastfed, with about 30% still breastfeeding at 3-4 months. While breastfeeding rates in the U.S. among middle and upper income women now approach the objective for 1990, rates of breastfeeding among low income women remain far below. In 1985, only 35% of women with incomes below $7,000 ever breastfed and only 10% were breastfeeding at 5-6 months. In the U.S., women with higher educations are more likely to breastfeed than women with lesser educations; in 1985, 49% of women with grade school or highschool education breastfed compared to 76% of college graduates.

In developing countries, the pattern is reversed. Usually it is the more highly educated, higher income women who bottle feed—as they consider it a more modern way to feed their infants. Unfortunately, these women serve as role models for other women, and thus often lead the population into reduced rates of breastfeeding—a damaging situation for all sectors.

Besides helping to prevent health problems and their related detrimental effects to individuals and families, breastfeeding has cost implications for the federal government. It has been conservatively estimated that in the U.S., $25 million could be saved through increased rates of breastfeeding due to reductions in illness and associated physician visits and hospitalization.

Decreases in costs for health care have been observed in many developing countries that have had programs to promote breastfeeding. Lessons learned from developing countries can be helpful for the U.S. Programs that have been successful in increasing rates of breastfeeding have focused on: (1) Training and education of health professionals; (2) Establishment of appropriate hospital practices surrounding delivery and the immediate postpartum period; (3) Peer support for breastfeeding mothers; (4) Public education through mass media; and (5) Health programs and policies, such as maternity leave and restricted advertising of breastmilk substitutes.

Training and education of health professionals in the advantages of breastfeeding and techniques to help mothers breastfeed have proven productive in Indonesia, Thailand, Panama, and the U.S., among others. Such training is needed because current medical education both in developing and developed countries does not usually address lactation management, nor provide sufficient information on the benefits of breastfeeding. Medical texts in the U.S. generally contain more information on preparation of formula than on lactation management. Too often wrong advice is given by pediatricians to breastfeeding mothers. For example, if the infant cries, a poorly trained pediatrician may suggest an additional bottle. This only interferes with breastfeeding, setting up a cycle of reduced milk output, an infant crying more, more bottles, and even less milk production. Properly trained health professionals will help the mother increase her milk supply by suckling the infant more frequently, which results in greater milk production.

An innovative program was started at the University of California at San Diego, which is currently a separate training institute known as Wellstart. This program trains health professionals from developing countries in lactation management. The program has resulted in an ever widening alumni of trainees who return to their own countries to promote increases in breastfeeding with high rates of success. In addition to training, Wellstart operates a lactation clinic where new mothers with breastfeeding problems can be seen by health professionals who have been trained in lactation management. This program is one of the few in the U.S. that includes clinical experience. Unfortunately, there are few funds for such programs.

Changing hospital practices surrounding delivery are also effective measures to increase the rates of initiation of breastfeeding. Appropriate practices have included keeping the mother and infant together after delivery and suckling by the infant soon after delivery. Mothers who have immediate contact with their infants following birth are more likely to continue breastfeeding. Elimination of water, glucose water, or other supplements to the infant while in the hospital have also been shown to be important practices in increasing breastfeeding. Allowing mothers to breastfeed on demand rather than by a schedule also helps increase successful milk production. Infants who are given bottles often exhibit subsequent nipple confusion since sucking at the breast requires different movements than sucking a bottle nipple. The use of milk supplements or water make the infant less willing to suckle because he is less hungry. Continued sucking at the breast helps promote increased milk production and is therefore essential for successful breastfeeding. On-demand feeding is one of the principal means of promoting increased milk production, since usually infants fed on demand will suckle about every 2 hours during the first few weeks following birth.

A particularly important measure shown to be effective in the Philippines, Costa Rica, Brazil and the U.S. is allowing the mother and infant to stay together continuously while in the hospital. Known as rooming-in, this is one of the most important measures to be taken, since it promotes many of the other conditions needed for successful breastfeeding (on-demand feeding, no bottles, and no replacement of breastmilk by water or other supplements).

The extent to which hospital practices can influence breastfeeding in the U.S. has been illustrated here in the nation's capital. Breastfeeding rates in hospitals vary from over 80% at Georgetown University Hospital to less than 10% in another local hospital. While much of this difference is due to the socio-economic characteristics of the populations served by the two hospitals, it also reflects practices in the two hospitals which either promote or hinder breastfeeding. For example, in Georgetown no supplemental bottles of glucose water are routinely given, while at the other hospital glucose is commonly given. Georgetown operates a Lactation Center, while no such service is available at any other hospital in the D.C. area. The Lactation Center staff provide breastfeeding education and support for postpartum mothers, and training of nurses and other health professionals on lactation management. They also offer a telephone counseling service to help women with problems breastfeeding. Distribution of formula at discharge is common at most local hospitals, while at Georgetown the policy is not to distribute packets.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

A recent study in the Washington, D.C. metropolitan area of three hospitals illustrated that when socio-economic factors were controlled, the use of supplements for infants in the hospital was the major factor associated with whether the mother continued to breastfeed. When infants are routinely separated from their mothers and given bottles at night, milk supply is adversely affected and mothers get the impression that their milk is not sufficient to feed their infants. They are then more likely to continue using bottles at home, with subsequent detrimental effects on breastfeeding.

Hospitals that have encouraged breastfeeding have seen large savings from decreased illness rates in newborns, decreased purchases of bottles of infant formula and drugs, and reductions in nursing staff. This has been documented in Honduras, Costa Rica, India and Indonesia.

In rural areas of developing countries, where breastfeeding is common and successful, there is a support network in the community that helps new mothers breastfeed. There are numerous neighbors, relatives and local midwives available to help a new mother learn how to breastfeed successfully. Contrary to popular assumption, breastfeeding is a skill that must be learned, and that can be learned easily with advice and support from others.

In urban areas of developing countries, however, where urban migration has led to disruption of extended families, and subsequent less cohesive urban groups, peer support needs to be encouraged through more formal methods. In the US, informal support is often not available, because breastfeeding rates were quite low in the 1950's and 1960's and many current grandmothers did not breastfeed or did so for short durations. The La Leche League was started over 25 years ago during a time when breastfeeding rates were quite low among middle class women. It has been an important source of peer support among women with similar middle class background within the community to help women overcome cultural constraints to breastfeeding and lack of knowledge. Such peer support has generally not been available to lower income, Black, Hispanic, or American Indian women. The cultural constraints to breastfeeding among the poor have not been able to be countered through normal health care programs, nor through La Leche League projects aimed at low income groups. Programs that promote breastfeeding among low income women need to be particularly sensitive to the constraints of income, time, and child care that these women face.

Low income women who have been able to successfully breastfeed have had support from other mothers, relatives and friends. Several peer support programs have been developed through WIC programs that have been shown to be successful in increasing rates of breastfeeding. In addition, these programs have resulted in enhanced confidence and self-esteem among mothers involved in the programs. The Center to Prevent Childhood Malnutrition is working with the Tennessee State Health Department and the D.C. Department of Public Health to help low income women develop their own peer support projects to promote breastfeeding in their communities. We envision that these projects will have benefits for infant feeding and will also lead to other social benefits including enhanced self esteem of mothers, and improved parenting skills.

Public education through mass media and school systems has been used in several developing countries to enhance the image of breastfeeding, to educate the public about its health benefits, and to support corollary programs in breastfeeding promotion described above. Little is seen in the media about breastfeeding in the U.S. The use of public figures, such as singers and actresses, has been shown to be successful in increasing the acceptance of breastfeeding in developing countries that have breastfeeding mass media campaigns. The U.S. population needs to be sensitized to the importance of breastfeeding as the best form of infant feeding as well as understand that all women can successfully breastfeed. Currently most brands of infant formula state "breastmilk is the best form of infant feeding, however when breastmilk is insufficient, then (their product) is the next best". This message gives the implicit information that breastfeeding may be insufficient. In the U.S. there is no information given to the public or the woman trying to breastfeed that counteracts this assumption.

An example of an excellent social marketing project is one that the Southeast Region Breastfeeding Promotion Program is developing. Several states and counties within the Southeast Region are pooling resources to support a mass media campaign in conjunction with production of training materials for health professionals and for mothers to promote breastfeeding among economically disadvantaged women. This program is struggling at the moment because of limited funds, even though in the long run states and the federal government would save funds through the benefits in costs that increased breastfeeding would have.

The U.S. is one of the few countries throughout the world that does not have a law requiring maternity leave or nursing breaks to allow working mothers to continue breastfeeding. The U.S. is also the only country, other than Japan, that distributes infant formula as part of its program to support nutrition of young children. Most countries provide prenatal counseling to all mothers. In many developing countries, pamphlets and posters produced by infant formula companies are prohibited in health centers. In the U.S., however, it is common to have such literature given to prenatal and postpartum mothers. Such a practice gives implicit support by the health sector for the contents (which often provides information contrary to appropriate breastfeeding).

Nearly $2 billion are spent on WIC each year, which covers nutrition education and supplementary food for low income women, infants and children. Of this, nearly one-third, or over $500 million are spent on infant formula. WIC serves an average of 1.1 million infants each month. It has been estimated that over $30 million of savings in formula expenditures could occur annually if WIC mothers would breastfeed for just one month. With much more modest inputs to enhance training and education of health professionals, to change hospital practices in hospitals serving low income populations, and by providing peer support for breastfeeding women rates of breastfeeding could be increased substantially among women served by WIC. This would result in savings thereby allowing more women and children to be served by WIC, reduce costs for health care due to reductions in illness, and lead to benefits for mothers and infants in other areas.

In the U.S. there is a need to focus funding on breastfeeding promotion among low income populations. Funds set aside within the WIC program and within other health projects would be an impetus to help states and local communities develop effective programs. Such programs could include training of health professionals, supporting changes in hospital practices, developing community based peer support programs, and supporting mass media projects to educate the public. As recommended by the National Committee on improving breastfeeding strategies in the WIC program, Congress should:

1) Establish a separate line item for breastfeeding promotion efforts to be added to the WIC reauthorization legislation;

2) Include a national evaluation component in the legislation to monitor and evaluate the effectiveness of the use of such funds;

3) Set the funding level for this breastfeeding promotion effort at $10 per woman to be distributed to WIC state agencies according to their caseload count; and

4) Establish a national advisory panel charged with assisting state WIC agencies in the development of program plans which meet the lcoal needs, minimizing duplication of efforts while assuring that the plan is nationally coordinated;

Internationally, there is a need to allocate more funds in U.S. AID programs to support breastfeeding promotion. While over $170,000,000 are budgeted for child survival programs each year, AID reports roughly only $2 million are spent annually on breastfeeding in developing countries. The impact of breastfeeding promotion on child survival is so great that WHO estimates mortality during the first 5 years of life would be reduced by 25% if even modest increases in breastfeeding were obtained. Continued and enhanced funding for breastfeeding promotion projects and their evaluations in developing countries would facilitate replication of successful projects and show how these programs work to combat infant morbidity and mortality.

LEONARD MARKS AT THE CSCE LONDON INFORMATION FORUM

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. FASCELL. Mr. Speaker, the London Information Forum, one of a variety of followup meetings that take place within the Helsinki process, concluded last week after 4 weeks of interesting and stimulating discussions. The forum was an outstanding success and brought new achievements to the increasingly productive Helsinki process. The chairman of the U.S. delegation was Leonard Marks, a distinguished Washington lawyer and former director of the U.S. Information Agency.

He did an outstanding job in providing leadership for the Western delegations and creative new ideas which resulted in a new and unprecedented openness in CSCE. Mr. Marks is to be congratulated for his performance. Many of the achievements of the London Information Forum are recounted in Mr. Marks' closing statement which was given last Friday in London. At this point, I would like to place his remarks in the CONGRESSIONAL RECORD and commend them to my colleagues.

CLOSING STATEMENT BY LEONARD H. MARKS

As the London Information Forum nears its end, we can take pride in our achievements.

Much was accomplished, but much more remains to be done to realize the commitments we made in Helsinki, Madrid and Vienna.

We come away with a firmer resolve to enlarge the means by which information travels between East and West.

And we come away with a sharper vision of the world we aspire to create for ourselves and our children.

We hope the close of this Forum is not an end but a prelude to an era of greater understanding, reduced international tensions, and closer bonds among our societies. Indeed, all of us leave London enriched by personal ties that developed during the course of our work here.

Mr. Chairman, change is in the wind. The growing thrust toward democracy reminds us of what men and women can accomplish when their minds are free to explore all areas of knowledge—unrestricted by arbitrary constraints on information.

Change is before us. We feel it. Diversity is no longer a pretext for criticism, but a key to greater understanding.

Change is no longer viewed as a threat, but an opportunity. It is not to be feared, but welcomed. The power of these changes could be felt throughout the Forum.

The high quality of our dialogue here has been matched by the professional tone of our exchanges. Open and frank discussions have replaced confrontation.

We examined in detail participating states' records of implementation of CSCE principles. We did this in an honest, forthright manner. Where we disagreed, we said so.

But, Mr. Chairman, we did more. Despite our differences, all of us listened. And we showed respect. Not just in a pro forma, diplomatic manner. But in a way that enhances dignity.

We know that no country, political system, or particular group has a monopoly on truth. Our cultural backgrounds are different. We speak different languages; but we share a common heritage—the desire of the human race to survive and to be free in a peaceful world.

As changes occur, as diversity is appreciated, as our comprehension of other societies expands, trust grows.

And it is trust, Mr. Chairman, that is the foundation on which our framework for the free flow of information rests.

It was the Greek philosopher Aeschylus who said: "For somehow this is tyranny's disease, to trust no friends."

When this conference began, many felt it would achieve little.

How wrong the cynics were.

We have heard some astounding proposals from countries that only a few years ago would not have countenanced what we in the West consider the free expression of ideas.

Let me list some of the accomplishments of this conference:

1. We met in an open forum. Members of the press and other private sector representatives took part in all deliberations. I am proud to have suggested this fundamental change and honored that other states supported this move.

That's a big step forward that will hopefully serve as a guideline in satisfying the public's right to know. This unprecedented decision demonstrated our intent to breathe life into our Vienna commitment to ensure the "freest and widest dissemination of information."

Equally important was the inclusion of experts in the field of information. They have firmly grounded our discussions in the here-and-now of their working experiences, and several of their proposals merit follow-up by our governments.

2. The fact that journalists from the participating states exchanged views is, in and of itself, an accomplishment. An abundance of refreshing, new, and practical ideas emerged from the working groups. They are reflected in the list of proposals that will be submitted to Helsinki in 1992.

Throughout the conference we heard the universal complaint that delays in issuing visas and burdensome travel restrictions impede the free flow of information.

Accordingly, I shall recommend to the Secretary of State that the U.S. Government re-examine our own policies in this area. I am mindful that national security considerations must be taken into account. But I believe it is time for the U.S. to take a fresh look at these procedures.

3. During our deliberations, we had bilateral conversations with countries from Eastern Europe to discuss mutual problems. Let me refer to one: currency nonconvertibility. In informal discussions with the Soviet Union, we found them to be responsive, in principle, to our proposal to permit inconvertible sales proceeds earned by foreign media organizations to be used for their in-country expenses. We look forward to follow-up conversations regarding this initiative.

4. There has been a growing recognition that technological developments have made instantaneous communications possible in all parts of the world. Satellites, cable link-ups, and advanced transmission means have bridged chasms which geography created and political leaders have made permanent. Any two points on the globe are now instantly in touch.

Yet, we have not taken advantage of some of these developments because of a lack of cooperation between governments. These impediments can and must be removed.

Mr. Chairman, I have highlighted a few of our achievements. We must not be misled, however, into believing that our job is done.

Some countries have failed to abide by the Spirit of Helsinki. Their restrictions on the free flow of information retard progress rather than further it.

Fortunately, there are encouraging signs that a better future depends on pluralism in all aspects of life. For example, Hungary and Poland are easing the way for citizens of divergent views to participate in a meaningful way in political and social life. The Soviet Union, too, is embarking on this road, and we hope it will go far along it.

The presentations made here by the Hungarian, Polish, and Soviet delegations, as well as the variety of perspectives represented by their delegates, are a step in the right direction. We welcome these changes and encourage them.

We have set the stage here for such joint undertakings through both the content and form of our meetings. Our wide-ranging and intense discussions examined many of these areas where mutual efforts could be productive.

In conclusion, my delegation joins me in thanking the Secretariat staff for their outstanding support throughout the Forum. They and our British hosts made our stay in this magnificent city a truly memorable experience.

Finally, my sincere thanks to the interpreters who—as much as anyone at this conference—have made a significant, and tangible contribution to the free flow of information.

CONGRESSMAN HAMILTON FISH, JR., ADDRESS TO NAACP

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of Texas. Mr. Speaker, I was privileged to be present last night at the NAACP Walter White Award Dinner commemorating the 35th anniversary of the U.S. Supreme Court decision in Brown versus Board of Education.

The annual award presentation was made to Congressman HAMILTON FISH, JR., a Republican from the 21st District of New York.

Congressman FISH is only the second Member of the U.S. House to be so honored, and the first Republican to receive this award.

I am honored to be able to place in the RECORD the remarks made by Congressman HAMILTON FISH to the NAACP after his acceptance of the award.

REMARKS BY THE HONORABLE HAMILTON FISH, JR., AT THE NAACP WALTER WHITE AWARDS DINNER

It is customary on occasions like this to express one's gratitude to the sponsors of an award, but the usual expressions of gratitude are completely unequal to the emotions I feel this evening.

I want to do more than just thank you. I want to do more than tell you how proud you have made me. I want to tell you the simple truth: That this is one of the proudest moments of my life–

To receive an award bearing the name of Walter White, that steadfast soldier in the decades of struggle before Montgomery, before *Brown* vs. *Topeka*, before the great victories of the 1950's and 1960's,

To be honored by the NAACP, which under the leadership of Dr. Benjamin Hooks, continues to be the advance guard of the civil rights movement in America,

And to be numbered in a select company that includes Hubert H. Humphrey, President Lyndon B. Johnson, Sir Arthur Lewis, Arthur Fleming, and my colleagues Ted Kennedy and Peter Rodino,

In all honesty, I would never have had the presumption to place myself in such company.

When I think of "uncommon achievements in civil rights" I think of colleagues I have known in the Senate and House—leaders in the legislative battles of the last quarter century. I think of the giants in the Senate, my heroes, Jack Javits of New York, and Mac Mathias of Maryland. And I think of Senators Lowell Weicker and Arlen Specter.

And in the House, New York's Emanuel Celler who steered our Judiciary Committee through the 50's and 60's. And I think of the champions who occupied the position I now hold—Bill McCullogh of Ohio and Robert McClory of Illinois. And I think of John Anderson of Illinois who so often took the House floor to remind his Republican colleagues that they were the party of Lincoln.

Tonight, I think of myself as representing this Honor Guard who helped achieve historic gains in human rights.

These were leaders in the great national consensus that has emerged in America. A consensus that says, at long last—the time has come to keep the promise of American democracy; a consensus that has produced the greatest peaceful revolution in human history—but a revolution that we have yet to complete.

I need not remind this audience that this revolution, while peaceful, was neither painless nor bloodless; that before the legal triumphs and the legislative victories, there were years of heroic acts of witness, from those who marched in the streets to those who sat at the lunch counters, from those who rode the buses from State to State, black and white together, to those who refused to step to the back of the bus.

And, always, there was the NAACP, the bulwark of the cause, the fighter of the day-to-day battles, the organization that always knew the central test of our democracy in the twentieth century would be its capacity to keep its promise to black Americans.

I was raised far away from these battles, but I was raised to believe that true American democracy depends upon it becoming a reality for all of our citizens.

My children understand this. And have asked to share tonight with me. I thank them for being here.

When my father fought to defend our democracy in World War I, it was in a segregated army; an army where whites and blacks were kept rigidly separate. So my father led the black 369th Infantry—the most decorated American unit in all of World War I. At the outset of our entry in that war, the 369th was assigned to the French 4th Army, I am told to avoid integration with the American forces. Thereafter, he fought in Congress for laws against the poll tax and against lynchings and segregation in the Armed Forces.

In 1922 my father collaborated with Walter White and James Weldon Johnson on the Dyer anti-lynching bill. While it did not pass, it is significant as an early effort to incorporate the bill of rights into the 14th amendment. Incorporation was realized by a series of Supreme Court cases including *Brown* vs. *Board of Education.*

Of course, my father had someone to remind him of his commitment to human rights. He had the greatest lobbyist the Constitution every had, your legendary advocate Clarence Mitchell.

When I entered the Congress in 1969, Clarence Mitchell was there to welcome me. And he told me how he had enlisted my father at the outbreak of World War II as a leader in the fight to desegregate the military.

Today what Clarence Mitchell was to my father and his generation, Althea Simmons has been to me—and to the House and the Senate of the 1980's—sometimes the voice of moral outrage; invariably, the voice of experience and expertise; and always the voice of conscience.

Tonight, in the shadow of the great giants in the struggle, in the company of so many soldiers in the struggle, and on the anniversary of so many victories in the struggle, it is an appropriate moment to assess where we've come and where we're going.

On the 35th anniversary of *Brown* vs. *Topeka*—and 25 years after the passage of the Civil Rights Act—we can look back with satisfaction at the great victories that forever destroyed the legal basis for segregation, disenfranchisement and discrimination in America.

These victories were the work of a biracial and bipartisan consensus. They were the product of a moment of history when the vast majority of Americans had at long last realized that simple justice was an idea whose time had come. Now, a quarter of a century later, that consensus has held, these legal and legislative gains have emerged intact.

I can report to you that, for the past decade, a bipartisan consensus in Congress has kept the faith, has protected and even built upon the accomplishments of the 1960's.

We kept the faith and extended the Voting Rights Act; and throughout America, politicians compete for the support of people who were disenfranchised little more than two decades ago.

We kept the faith and enacted the Martin Luther King Holiday—a bill that had languished in the House for years—and now our schoolchildren are learning the story and the struggles of one of the greatest leaders of our times.

We kept the faith and repudiated tax breaks for segregated schools. We repudiated bills to strip the courts of their jurisdiction over fundamental issues of justice. And we enacted sanctions against the racist regime in South Africa.

And the most recent Congress—the 100th—may well be the best civil rights Congress since the sessions of 1964 and 1965.

When we enacted the Fair Housing Amendments Act of 1988, when we overturned a Presidential veto of the Civil Rights Restoration Act of 1988, we proved beyond a doubt that the bipartisan consensus for civil rights is as alive and well now as it was during the glory days we commemorate tonight.

But this is not the time to congratulate ourselves—this is the time to challenge ourselves. As you know so well—we have come a long way; we still have a long way to go.

The ultimate measure of justice is not what is written on paper in our lawbooks, but what we experience as human beings everyday—in our neighborhoods, in our workplaces and in our schools. As Dr. King might have asked—what good is it to have the *legal right* to sit down at a lunch counter, if you can't afford the price of a hamburger?

Now and forever, we need to defend and expand the legal structure of civil rights. Now and forever, we need to enforce these laws vigorously and rigorously. Now and forever, we need to select judges at every level of the Federal bench, who are unshakably committed to the principle of equal justice for all.

There are new civil rights frontiers of the 1990's. They are economic opportunity, economic empowerment and economic equality. And we must meet these challenges with the same determination that we met the challenges of desegregating public accommodations and public schools and polling places.

We must not be complacent when the gap between black and white incomes is wider than it was a decade ago. We must not be complacent when the poverty rate for blacks is three times the poverty rate for whites. We must not be complacent when the number of black students in college may actually be decreasing. And we certainly must not be complacent when a black baby born here in our Nation's Capital has less of a chance of living to its first birthday than a baby born in Trinidad and Tobago or in Costa Rica.

As surely as the 1950's and 1960's were a time for action, this is a time for action, for all Americans, not just some Americans.

This is the time to take the wonderful consensus that has protected the gains from the 1950's and 1960's, and put it to work to meet the challenges of the next decade and the next century.

My message tonight is one of hope.

In the slow and painful progress of human rights in America, it seems to me that progress comes when what was morally necessary becomes a practical necessity as well—when there is that powerful convergence of common decency and common sense that we call enlightened self interest.

I suggest that today is such a moment in history—a time when moral urgency and practical necessity coincide. And there is the opportunity—to take new strides to the fulfillment of the American dream—the promise of equal rights, equal justice and equal opportunity to all our people.

Today we are challenged by a global economy. The nations of Western Europe will become one economic entity in just three years—a single market that will be the largest trading bloc in the world—a formidable competitor. The Soviet Union, China and Eastern Europe are shaking the cobwebs out of their systems and experimenting with economic and political freedom; the nations of East Asia—Japan, Korea and Taiwan—are outcompeting us even today.

Our future as a major world economic power—our continued competitiveness—will depend on whether, at long last, we provide first-class education and opportunities for all our citizens. That is the reality for our most pragmatic leaders—in business, academia and government.

The Work Force 2000 Report by the Hudson Institute confirms what many have been saying:

Of the Americans entering the work force in the coming decade, the overwhelming majority will be women, African-Americans, Hispanic-Americans, Asian-Americans—historically the victims of discrimination, who have never had the opportunity to reach their full potential. Thus, the vast majority of those who will be entering the American work force are also the least prepared for the rapidly changing technology of the workplace.

If every American does not have the chance to reach his or her full potential, then America will not reach her full potential. If every American does not enjoy first class opportunities, then America will not remain a first-class economic power.

For America to survive and prosper and compete we need the talents of all our people—not just a few of our people—but all our people. This is the new reality that can build a new political consensus in the 1990's and beyond.

It is our common challenge to look beyond the barriers of race and partisanship and ideology to appeal to the enlightened self-interest of all citizens in building an America that brings out the best in all our people because it is the only kind of America that will meet the challenges of the twenty-first century.

When I was preparing these remarks, I thought about the name NAACP, and what those letters stand for. And I fastened on the word "advancement."

The advancement of African-Americans, not only to formal legal equality but also to real economic equality has always been a moral necessity. And, now—more than ever before—it is a practical necessity—for every

American—because, now, more than ever before, the advancement of all of us depends upon the advancement of each of us.

Not just as a Republican, but as an American, I am encouraged when President Bush wants to be the education President, and promises that it will be his mission to fulfill the dream of Dr. King—and when New Jersey's Governor Kean preaches and practices the "politics of inclusion."

Our challenge should not—and must not—be insurmountable. No more insurmountable than the challenge that faced the forerunners of the NAACP who had to meet on the Canadian side of the Niagara Falls because they could not find accommodations on the United States side. No more insurmountable than the challenge that faced those who dared to ask the Supreme Court to overturn the obscence euphemism "separate but equal." No more insurmountable than the challenges that faced Walter White, Clarence Mitchell, Roy Wilkins and Thurgood Marshall when an American apartheid prevailed in the Armed Forces and in the Nation's Capital.

I believe that some day in the next century, our children and our grandchildren will look back at the second half of this century as the second American Revolution.

I hope and pray they will see it as the period when America fulfilled the promises of its first revolution; when America righted the wrongs of generations of racism and discrimination; and when America demonstrated to the world that it is possible to create a nation of justice and equality out of the descendants of people from every continent on this Earth.

And tonight I accept not just an award but a responsibility; to join you, not just in hoping and praying, but in working and struggling to bring about that day when the dream of equality is no longer a dream deferred.

APPLIED TECHNOLOGY EDUCATION AMENDMENTS OF 1989

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. OWENS of New York. Mr. Speaker, as a member of the Education and Labor Committee, I submit these remarks which pertain to H.R. 7, the Applied Technology Education Amendments of 1989, which would amend the Carl D. Perkins Vocational Education Act of 1984 and passed the House on Tuesday, May 9.

The work force of the future increasingly will consist of special populations, including people with disabilities. Current law under the Carl D. Perkins Vocational Education Act contains a 10 percent set-aside, about $80 million to fund the excess costs eligible institutions in providing access to vocational education services for people with disabilities. This bill eliminates four of the six set-asides contained in current law, retaining those that apply to women. In their place, the bill requires recipients to provide a set of assurances that special populations, including people with disabilities, will be served. Thus, although 20 percent of a secondary institution's grant size will be determined by its count of handicapped children served in the preceding school year, there is no connection between this figure and the amount of money a recipient must spend on handicapped children. The history of vocational education legislation shows that the set-asides were adopted in the first instance precisely because special populations were not being served by grant recipients. I wish that I could rest more secure in the belief that the language in this legislation was strong and would serve to accomplish the purpose of ensuring access to quality applied technology education programs for people with disabilities and other special populations. As set out in the bill, there is no requirement that so much as a single individual with disabilities will be served. State monitoring requirements to assure both access for special populations and quality are weak, and language setting forth an appeals procedure for aggrieved parties is sparse and ambiguous.

I have in committee discussions concerning this legislation and in subcommittee and full committee markup sessions, expressed other reservations about the wisdom and the workability of this legislation in actually accomplishing its noble, ambitious and necessary goals for improving applied technology education programs in our Nation. In particular, placing heavy new demands on grant recipients requiring sweeping applied technology education program overhaul, while at the same time cutting the amount of State discretionary money for curriculum development, technical assistance, teacher training and other critical support activities from 13 percent total Perkins Act funding to 5 percent, strikes even the most committed advocates for reform among us as unpragmatic.

Special populations, including people with disabilities, are likely to be harmed the most from the lack of adequate support mechanisms for schools which must implement reforms as a condition for the receipt of Federal funds. Meeting the education and training needs of special populations is not a special interest, somehow opposed to or in tension with the national interest. Our ability to adapt successfully to the changing world economy depends on the improvement of applied technology programs. Special populations currently comprise over one-half of the work force and will make up an increasing percentage of the labor force in the future. If the quality of applied technology education programs does not improve dramatically for them, our Nation will be ill-prepared to meet the international competitive challenges which we are facing.

In this light, one of the most welcome provisions of this bill is a mandated comparative study by the General Accounting Office of the effects of these amendments on both access and quality for special populations, relative to the current law provisions. In particular GAO will be asked to compare the proportion of those enrolled in applied technology education programs who are members of special populations in the final school year under the current Perkins Act provisions with the same data for the first school year under the new provisions. This is the only rigorous way I know of to evaluate any changes produced by the provisions in the new legislation which are designed to assure access to applied technology education programs for special populations. I would hope that GAO could have data available to the Congress shortly after the completion of the first school year to which the new legislation applies. In examining this issue concerning access for special populations, I believe GAO should also be asked to look for any evidence that special populations are being tracked into poorer quality applied technology education programs. Additionally, GAO is required under the provisions of this bill to examine a number of issues with respect to the quality of applied technology education programs for special populations.

Given the sweep of changes proposed in this legislation, and the critical importance to the Nation of actually accomplishing the improvements in applied technology education sought in this legislation, it would be my hope that the House will ensure that the GAO study is retained in whatever legislation finally passes the Congress.

THE NEED FOR SAFER HAZARDOUS LIQUID PIPELINES

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SKELTON. Mr. Speaker, 5 months ago, 78-year-old Herman Shanks, of Paydown Landing, MO, did not have a merry or a white Christmas when he awoke to find, not a blanket of snow, but a thick black blanket of crude oil covering the waterway by his farm.

On Christmas Eve last year, 860,000 gallons of crude oil spurted from the Ozark pipeline into Missouri's Gasconade River. The spill endangered thousands of fish and wildlife, leaving an indelible impression on nature and setting the stage for an examination of the Federal Government's pipeline transportation safety policy.

This spill represents three glaring problems with current pipeline safety regulations: One is the lack of testing of older pipelines, another is inadequate training of pipeline operators, and, finally, the use of out-of-date equipment.

The Office of Pipeline Safety within the Department of Transportation just completed their investigation of the accident. Their findings indicate that the spill was primarily due to a manufacturing flaw in the electric resistance weld of the pipeline seam and was magnified by operator error and out-of-date equipment.

Today, I am offering legislation which will require periodic testing of all pipelines and, on an expedited basis, initial testing of pre-1970 pipe manufactured by the electric resistance weld process [ERW].

Extremely conservative estimates indicate that there are approximately 150,000 miles of hazardous liquid pipelines throughout the Nation, the bulk of which crisscross the Midwest. About 30 percent of these pipelines were in place before 1970. These lines were grandfathered into the 1970 regulatory requirements and, therefore, not tested in accordance with present standards for new pipelines. This means that approximately 45,000 miles of older pipelines have not been tested for flaws, strengths, or weaknesses. In the last few years there have been several accidents involving these ERW hazardous liquid pipe-

lines which still are not required to be tested. My bill requires these ERW pipelines to be tested within 1 year.

The Secretary is to issue regulations for periodic integrity assessments based on numerous factors such as the location of the pipeline facilities; the type, size, age, and manufacture of the pipeline construction; the nature, volume, and pressure of materials transported; the climatic, geologic, and seismic characteristics and conditions including soil conditions; and finally, population and demographic characteristics.

Another key element of this bill mandates additional training and testing for pipeline operators. Particularly, training to recognize and appropriately react to abnormal operating conditions which may indicate a dangerous situation.

To coincide with additional training the bill also requires the Secretary to conduct a study of advanced hazardous liquid pipeline facility leak detection equipment and techniques that have been or are being developed. Upgrading the control systems will enhance the safety of the line. Included in the study will be a review of the economic feasibility of requiring such equipment and techniques.

The environmental damage of one of the Nation's largest inland oil spills may not be fully realized until later this year, however, we in Missouri are fortunate to have over half of the oil recovered and minimal environmental damage due to the Shell Oil Co.'s responsive actions and the perseverant oversight of the State government officials. As a result of this spill, it is our responsibility in the Federal Government to make pipeline transportation safer for all of us. That is the purpose of this bill.

PEPSI-COLA CO. DROPOUT PREVENTION INITIATIVE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. RANGEL. Mr. Speaker, I rise today to give unwavering support to those corporations who are formulating responsible programs to assist our country in combating the escalating problem of dropouts. I bring your attention to an article that appears in today's New York Times regarding the Pepsi-Cola Co. dropout prevention initiative that will give over $2 million in awards to students and teachers who participate in the program.

According to the Department of Education, our national dropout rate is close to 30 percent. In some of our inner cities, this rate is as high as 50–70 percent. We are witnessing the effect that lack of education is having on the quality of American life as we constantly hear or read of examples where those who don't have an education are leading lives of despair. A great majority of our prison population is made up of dropouts, and close to half of the teenagers who become pregnant drop out of high school never to return. In 1985, less than 24 percent of men and 56 percent of women without high school diplomas were employed. About 40 percent of the children born to parents who dropped out of high school are poor. The Department of Justice estimates that as of 1986, 61.6 percent of prison inmates have not completed 12 years of education. Moreover, the reality is that many students who drop out of high school are already caught in the false glamor and quick demise of drugs. Many of these students would be able to become productive members of society if properly rehabilitated and given a second shot at an education. It is estimated that the total lifetime earnings loss of the dropouts from the class of 1981 are $228 billion, with an approximate tax revenue loss of $68.4 billion.

What is important to remember when discussing the dropout problem is that the business community is also greatly affected by this growing phenomenon. Within the last year, in places like New York City for example, businesses have been unable to find enough high school graduates to fill available work positions thereby resulting in a problematic labor shortage. It is my sincere hope that other major corporations will follow the lead of the Pepsi-Cola Co. and commit themselves to making a difference, not only in the life of the potential dropout student, but in our labor market as well.

It is becoming increasingly clear, that if our students today do not get adequate and complete educations, our Nation's capacity to compete and survive in a highly technological world is greatly threatened.

Thus programs like the one that Pepsi-Cola has started are desperately needed and can be successful. I congratulate the Pepsi-Cola Co. for their innovation and courage in attempting to ameliorate a national problem.

[From the New York Times, May 18, 1989]

A $2 MILLION AWARDS PROGRAM AIMS TO CUT SCHOOL DROPOUTS

(By Doron P. Levin)

The Pepsi-Cola Company announced today that it would spend at least $2 million over the next four years here and in Dallas on a pilot program to reduce dropout rates in inner-city schools. Under the program, students would receive tuition credits for higher education and teachers would receive cash.

The company said the "Pepsi School Challenge" would be the largest financial award program ever granted to a public school by a corporation in this country. The two schools selected are Southwestern High School in Detroit and L.G. Pinkston High School in Dallas.

A spokeswoman, Verla Martinson, said the company hoped to expand the program to 15 major metropolitan cities if the pilot program increased the number of graduates by 25 percent. She said it was too early to name the other cities.

Pepsi-Cola, a subsidiary of Pepsico, is the latest company to make a public issue of declining standards of youth education and to offer money or other support to selected schools.

"The uneducated or undereducated are simply not capable of operating the systems and machinery of an increasingly advanced high technology society," the company said in a statement.

UP TO $2,000 IN CREDITS

Under the program, students will be eligible for $250 in tuition credits a semester, up to a total of $2,000 over four years, for accredited post-secondary education, vocational or other training after high school. The requirements for receiving the awards would be to maintain a C average, to fulfill state-mandated attendance requirements and to have no "formal record or documented use of mood-altering substance."

Fifty faculty members at Southwestern will be designated "program mentors," the company said. Each of the teachers will receive $1,000 a year for expenses and compensation. The school will receive $4,000 to administer the program, the company said.

Chris Sinclair, president of the Pepsi-Cola division covering the central United States, told Southwestern students at an assembly today: "Each school dropout is a loss to us and to society. We want each of you to succeed. We're here to help make today's Southwestern student tomorrow's success."

Southwestern has an enrollment of 1,492 students, 82 percent of whom are from minority groups. The annual dropout rate at Southwestern, averaged over the past four years, is 33 percent.

Two weeks ago, Alfred S. Warren Jr., vice president of the industrial relations staff of the General Motors Corporation, estimated in a speech to Society of Manufacturing Engineers that lack of basic skills and education has cost American businesses and employees $20 billion in lost wages, productivity and profit. Mr. Warren cited estimates that 20 million to 27 million workers, a quarter of the nation's labor force, lacked basic reading, writing and math skills.

Last year the Standard Oil Company of Ohio, a subsidiary of BP American Inc., started a five-year $1.9 million program in the Cleveland schools designed to improve educational performance. The program awarded $40 in tuition credits for each A, $20 for a B and $10 for a C to pupils in grades seven to 12.

IN SUPPORT OF DESIGNATING SEPTEMBER 14, 1989, AS NATIONAL D.A.R.E. DAY

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. WOLF. Mr. Speaker, I join today with my distinguished colleague, Mr. LEVINE, in introducing a joint resolution to designate September 14, 1989, as "National Drug Abuse Resistance Education Day."

I would like to bring particular attention to the strong D.A.R.E. Program in the 10th District of Virginia, a progam that effectively teaches children how to resist the pressure to experiment with alcohol and drugs through the discussion of such important concepts as development of high self-esteem and self-worth.

The D.A.R.E. Program originated in Los Angeles in 1983, and the first statewide progam began in Virginia in 1985; 14 Virginia jurisdictions were originally chosen to participate in the program and that number now tops 90. Arlington County, the city of Falls Church, and Loudoun County have all implemented successful D.A.R.E. Programs in their school systems.

Since attending one of the D.A.R.E. classes, reviewing the course material offered, and

hearing positive feedback from children and adults who have participated in the D.A.R.E. Program in some way, I am convinced more than ever that the D.A.R.E. Program, on both a local and national level, is an extremely positive approach to equipping our youngsters with the skills necessary to recognize and resist the pressure that influence them to experiment with and use harmful drugs.

I salute the school districts and police departments around the country who have taken the D.A.R.E. concept and turned it into a working, effective substance abuse education program for the areas in which they live. I hope that through this resolution individuals will come to know how positive a program this is so that more children around the country will have the opportunity to participate in D.A.R.E.

I urge my colleagues to join Mr. LEVINE and me in supporting this important resolution.

NATIONAL D.A.R.E. DAY

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. LEVINE of California. Mr. Speaker, I rise to introduce, along with my distinguished colleague FRANK WOLF, legislation designating September 14, 1989, as "National Drug Abuse Resistance Education Day." This resolution commends D.A.R.E. as an outstanding drug abuse education program. Similar legislation has been introduced in the other body.

The D.A.R.E. Program consists of a 17-week curriculum, taught once a week over the course of a semester, on subjects including drug use and misuse, decisionmaking and risk taking, resistance techniques, and assertive response styles. Other D.A.R.E. units help students understand self-image, recognize stress and manage it without taking drugs, and analyze and resist media presentations about alcohol and drugs. The semester-long program is targeted to fifth and sixth graders, but a separate program has been developed to introduce younger grades to D.A.R.E. Additionally, followup instruction has been introduced for junior high and high school classrooms.

The D.A.R.E. Program is taught by veteran police officers, who have direct experience with the tragedies and crimes caused by drug abuse. Each police officer completes a special 2-week training program which includes instruction on teaching techniques, officer-school relationships, development of self-esteem, child development, and communications skills.

The D.A.R.E. Program provides the opportunity for law enforcement, teachers, and school administrators to work together to reduce drug abuse.

The D.A.R.E. Program is now being taught in more than 50,000 classrooms in 48 States and the District of Columbia. The Department of Defense Dependent Schools have also adopted D.A.R.E. Program for use internationally. Additionally, the D.A.R.E. Program is taught in Australia, Canada, New Zealand, and American Samoa. This year, a projected 3 million students will be taught the D.A.R.E. Program.

Independent research has confirmed the success of the D.A.R.E. Program. D.A.R.E. graduates are less accepting of drug use and more able to resist peer pressure to use drugs. The D.A.R.E. Program also contributes to improved study habits and grades, decreased vandalism and gang activity, and a more positive attitude toward the police and school.

The success of D.A.R.E. is also demonstrated in a student-parent survey taken in the Los Angeles Unified School District. Before taking the D.A.R.E. Program, 51 percent of the students surveyed equated drug use with having more friends. After completing the D.A.R.E. Program, only 8 percent of the students made this association. Similarly, before witnessing the D.A.R.E. presentation, 61 percent of parents thought that there was nothing parents could do to prevent their children from using drugs. However, after the D.A.R.E. presentation, only 5 percent of the parents believed this.

I commend law enforcement for its willingness to sponsor innovative and effective programs like D.A.R.E. It is making an important contribution to fighting the abuse of drugs by our young people. I am pleased to have the opportunity to recognize this outstanding program. A copy of the bill follows.

H.J. RES. 276

Whereas D.A.R.E. (Drug Abuse Resistance Education) is a semester-long program that teaches fifth and sixth grade children how to resist pressure to experiment with drugs and alcohol;

Whereas the D.A.R.E. program is also provided to kindergarten and junior high school students and their parents;

Whereas D.A.R.E. targets children when they are most vulnerable to tremendous peer pressure to try drugs and alcohol and teaches the skills to make positive decisions and resist pressure to engage in negative behaviors;

Whereas more than 1,200 communities in 48 States now conduct the D.A.R.E. program in their local schools, and a pilot program has been implemented for use internationally in the Department of Defense Dependent Schools;

Whereas almost 3 million students have been reached through D.A.R.E.;

Whereas because school children are frequently much more sophisticated about substance abuse than are classroom teachers, the D.A.R.E. program is taught by veteran police officers with direct experience in cases involving criminal activity and ruined lives caused by substance abuse;

Whereas each police officer who teaches the D.A.R.E. program completes an 80-hour training course that includes instruction in teaching techniques, officer-school relationships, development of self-esteem, child development, and communication skills;

Whereas the D.A.R.E. curriculum, developed by the Los Angeles Police Department and the Los Angeles Unified School District, helps students understand self-image, recognize stress and manage it without taking drugs, analyze and resist media presentations about alcohol and drugs, evaluate risk-taking behavior, resist gang pressure, apply decision making skills, and evaluate the consequences of the choices available to them;

Whereas independent research shows that the D.A.R.E. program has exeeded its goal of helping students combat peer pressure to use drugs and alcohol, by contributing to improved study habits and grades and decreased vandalism and gang activity and by generating greater respect for police officers; and

Whereas the D.A.R.E. program has achieved outstanding success teaching positive and effective approaches to what is one of the most difficult problems facing our young people today, namely drug abuse: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 14, 1989, is designated as "National D.A.R.E. Day", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.

THE AMERICAN LANDSCAPE IN THE 21ST CENTURY

HON. SAM GEJDENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. GEJDENSON. Mr. Speaker, today I had the privilege to take part in the first of a series of hearings to be carried out by the Subcommittee on Oversight and Investigations of the House Committee on Interior and Insular Affairs to examine the issue of open space preservation in our Nation.

The loss of open space is of vital concern to many of us in Congress, Mr. Speaker, especially those of us that represent districts in the populous and evergrowing Northeastern corridor stretching from Boston to Washington.

I can think of no more important issue to be examined by the Oversight and Investigation Subcommittee, which, incidentally, I chaired until this year.

I would like to commend my colleague and good friend Mr. KOSTMAYER, the new chairman of the panel, for examining this important subject.

I would also like to share with my colleagues Mr. KOSTMAYER'S insightful opening statement delivered this morning.

OPENING REMARKS OF CONGRESSMAN PETER H. KOSTMAYER—THE AMERICAN LANDSCAPE IN THE 21ST CENTURY

Today's hearing is the first in a series to occur throughout the 101st Congress and perhaps beyond.

These hearings, to be conducted by the Subcommittee on General Oversight and Investigations, and entitled "The American Landscape," will explore just that, the national landscape, its natural as well as man-made features, its style as well as character, and efforts to preserve and protect it, as well as those, unhappily, far more successful to destroy and degrade it.

The subcommittee will consider how America is handling its growth—whether we are balancing our genuine need for economic development with the equally important need to preserve and protect our natural and historic legacy.

Since coming to Congress more than a decade ago, I have been concerned about the seemingly haphazard way in which growth moves into our countryside and affects the neighborhood values of our great

cities. In our rush to build on lands that were once farms and forests we fail to consider the price we pay for the loss we suffer as a society. We have forgotten too often that old and historic buildings serve our cities, too, not just enormous glass and steel towers that obscure the sun, casting whole neighborhoods into shadows.

Much of the country is in the throes of a development binge that threatens the quality of American life. Since 1960, for example, Bucks County, Pennsylvania, in my own Congressional District, has lost 73 percent of its farms to development. That figure grows each week. In many parts of America, open space is becoming a thing of the past while development buries everything from apple orchards to revolutionary-era farmhouses. In Pennsylvania, we still lose between 70,000 and 90,000 acres per year of farmland.

The destruction of our natural and historical heritage is a national trend. According to the President's Council on Americans Outdoors, since World War II, the United States has lost between 70 and 100 million acres of open space. Much of this loss has occurred in the corridor stretching from Boston to Washington, already our Nation's most populous region. Estimates of the annual losses of open space in the Boston to Washington corridor run as high as one million acres.

For most of our history, it has been our Nation's policy to promote growth on every front. Beginning with the Homestead Act in 1862 and the Mining Act in 1872 and continuing with scores of statutes enacted over the next half-century, the Federal Government encouraged expansion.

Now the time has come to reassess this longstanding national policy. We now must find out what role the Federal Government can play in protecting communities against runaway overdevelopment. And so the idea of a national landscape, its values and standards, does not contradict national diversity. Rather, it enhances it and elevates the Nation's natural and built environment to subjects of national concern.

Actually the federal role in protection and preservation began more than a century ago. Beginning in 1872 with the designation of a national park at Yellowstone, Congress exercised its authority to protect lands in the national interest.

More than a century later, at Lowell Historic Site in Lowell, Massachusetts in 1978, Congress began designating areas of cultural and social significance as well.

Federal efforts to guard our national legacy expanded with the idea that our great battlefields should be protected, too, and later our monuments and memorials as well as trails and rivers and seashores and lakeshores.

All of these efforts have become part of our expanding national landscape and our exanding efforts to protect it.

While the Federal Government has played and will continue to play a major role in protecting this legacy, the task of managing garden variety development has fallen so far to the states, the counties, and municipalities.

This is as it should be. Civic pride, concern for one's neighborhood and neighbors, doesn't come from Washington. It can't be achieved long distance.

Often it seems the Federal Government has been the enemy, however well intentioned, and not the ally of those struggling to save our countryside and our neighborhoods.

As Roberta Brandes Gatz writes in The Living City, "Government agencies . . . staffed with experts who neither love nor really understand the places they plan for, tend to promote grandiose, abstract and largely symbolic ideas . . ."

Writes Ms. Gatz, "We are accustomed to accepting change in the name of progress without a questioning look backward."

Around the country, community and neighborhood groups are struggling to protect the individuality and values of their neighborhoods against the oppressive sameness brought on by so much development.

In the countryside and suburbs, citizens are working to protect vanishing open space and farmland against harsh economic realities.

Through these hearings, the subcommittee hopes to find how best to integrate the strong history of federal land protection efforts with the new wave of local initiatives carried out by interested citizens with the help many times of developers and others with a financial interest in growth. These cooperative efforts need to be promoted. We will also examine what role can be played by other federal programs such as the national trust for historic preservation's main street program and the Department of Interior's state and local river and trails conservation program.

The subcommittee begins this series of hearings today with an examination of the scope of the problem which faces us. We will look at some of the emerging population and planning trends that will influence the degree to which the country can preserve the American landscape.

The subcommittee will also look at some of our failures to date. And they are legion.

While farm and open space vanish at the rate of 5,500 acres each day, whole neighborhoods in America's cities have become barren and blighted dead zones that still fail to shame the nation into action.

In Philadelphia, 50,000 homes have been abandoned: in Detroit, 75,000; in Cleveland, 42,000; in New York, more than 100,000. Meanwhile, instead of repairing, restoring, renewing, revitalizing, rebuilding the housing stock we have, we scar the countryside with more development.

We will also examine the failure of urban renewal, where the Federal government paid for the razing of whole neighborhoods of early twentieth century brick and brownstone buildings and also footed the bill for the infamous "Projects" that now blight our cities.

We will examine our failure to provide enough parks close to home for Americans who in the 1980s find themselves without enough free time to journey to the Nation's great parks in the western states. We will also look at the condition of the great parks themselves, so many of which are overcrowded, understaffed, gradually deteriorating from within, fouled by poisoned water and add an increasingly facing development pressures from without. America's crown jewels fade and grow tarnished, a national scandal that should break the country's heart.

The subcommittee today has assembled several impressive panels, each of which has something to contribute to our knowledge of both the failures that we have suffered and the victories we have achieved. Each I hope will make us think as Americans about what we want America to look like many years down the road.

IN HONOR OF SENATOR STROM THURMOND RECEIVING THE AWARD FOR LIFE SERVICE TO VETERANS

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SPENCE. Mr. Speaker, on May 6 of this year, the distinguished senior Senator from South Carolina, the Honorable STROM THURMOND, was presented with the prestigious Award for Life Service to Veterans from the Paralyzed Veterans of America and the Vietnam Veterans Institute. The award is intended to recognize outstanding Americans who have made consistent and dedicated contributions to the well-being of America's veterans. I can think of no individual alive today who better deserves this honor than Senator THURMOND. Throughout the several decades of his public service, he has selflessly devoted himself to the causes of the defense of this great Nation and the men and women who have put their lives on the line to protect its freedoms. In order to properly recognize this very noteworthy achievement, I would like to share with my colleagues the Senator's remarks given upon receiving the award.

ADDRESS BY SENATOR STROM THURMOND

It is a great honor, a privilege, and pleasure to accept the Paralyzed Veterans of America and Vietnam Veterans Institute Life Service to Veterans Award. When I consider the stature of each of these past recipients, such as Sonny Montgomery, Alan Cranston, Robert Byrd, John Paul Hammerschmidt, and Bob Dole, I am made keenly aware of the distinct honor that the PVA and VVI have bestowed on me with this award. I shall always strive to remain true to your trust and high standards.

And I want to take just a few minutes to comment upon the fine services which both the PVA and VVI render to this country. Having experienced the hardships of war and having sacrificed for freedom and peace, the members of these two organizations have demonstrated that they are true patriots dedicated to the best of America.

Chartered by the Congress in 1947, the PVA has exhibited particularly strong leadership in the areas of spinal cord research and wheelchair sports activities. As one of the largest private supporters of spinal cord research, the PVA has been very active, not only in improving the care, treatment and rehabilitiation of those with spinal injuries, but also active in seeking an ultimate cure. One of the notable ongoing projects to the PVA is its cooperative effort with Yale University and the Department of Veterans Affairs to fund spinal research at the Center for Neuroscience and Regeneration Research in West Haven, Connecticut.

It is through public and private partnerships such as this one that our nation is able to make great strides to benefit mankind. I commend you for your commitment to excellence.

Equally noteworthy is your commitment to wheelchair sports activities. As a lifelong advocate of exercise and physical fitness, I am keenly aware of how sports and recreational activities can improve the quality of life we enjoy, and particularly the quality of life of those in wheelchairs. In fact, I still

take exercise in the mornings every day for 45 minutes and swim one-half a mile three times a week.

Your leadership as cosponsor of the National Veterans Wheelchair Games, along with the Department of Veterans Affairs, is much appreciated. And I commend you for the contributions you make to the health and well-being of those veterans who participate.

So often we think only of assisting a veteran with obtaining a disability check or direct medical care. But there are other areas where an impact can be made in their lives, such as sports and physical fitness. These activities take a different, but important, dimension of life.

I want to also take this opportunity to commend the Vietnam Veterans Institute for its work in service to veterans.

The patriotic spirit and high ideals which I see among both the PVA and the VVI make me proud of you and the veterans of this country. Having experienced the realities of war, having sacrificed for freedom and peace, you have clearly demonstrated a dedication to the best of America.

In accepting the honor you have so graciously bestowed upon me, I would like to pay special tribute to the veterans of this nation. I have stated many times that it is the highest obligation of citizenship to defend our nation in time of need. And we cannot overemphasize the respect and admiration due those Americans who have answered the call to duty.

As we think of those who have served, I am reminded of the Battle of the Coral Sea, which began on this very day almost half a century ago and lasted four days. As many of you can personally attest, when it was all over the United States emerged with a strategic victory in the Pacific.

America's free because of people like you. And it is our responsibility to insure that the sacrifices of our veterans were not made in vain.

The preservation of liberty is a constant struggle which we must not take for granted. We preserve liberty by maintaining a strong national defense. And we must commit ourselves to insuring that our children, grandchildren, and great-grandchildren do the same.

All Americans have a good reason to look with pride upon our land, our institutions, and our people. Our citizens are a diverse group, but we share a common thread. The common thread is a commitment to freedom.

Whether on the beaches of Normandy, on the cold battlefields of Korea, in the rice paddies of Vietnam, or on the waters of the Persian Gulf, Americans have been brought together from all regions of this country to serve under one flag for one noble cause: the defense of freedom.

As representatives of the people, we have a duty to care for these men and women after they come home. It is our responsibility to insure that they receive the benefits and quality of care which they so richly deserve. This responsibility applies to both the elected officials and working people, such as yourselves, who are involved daily with other veterans.

While we will never be able to completely repay our veterans for their service, loyalty and courage, we can be sensitive and responsive to their changing needs, and make every effort to meet those needs.

Now, I believe most will agree that last year was a particularly good one for veterans, 1988. We witnessed the passage of historic judicial review legislation and the elevation of the Veterans Administration to a Cabinet-level Department, a change I had sponsored since 1975. I am convinced our veterans are better served by a Cabinet Department, and I am pleased with the deduction exhibited by Secretary Derwinski over the past few months. [Applause.]

Just before closing, I want to say a few words about our national defense.

Just nine short years ago, as we entered the decade of the 1980s, our great nation was perceived to be in serious decline, both at home and abroad. The Vietnam War had weakened our morale, Communism was on the rise throughout the Third World, and the countries of South Vietnam, Cambodia, Angola and Nicaragua had all gravitated to the Communist sphere. Americans were being held hostage in Iran. And the Soviet Union had just invaded Afghanistan. Additionally, the Soviets had begun to deploy a new generation of intermediate-range missiles, known as SS-20s. This deployment began to seriously erode the nuclear balance between NATO and the Warsaw Pact.

Looking back, we can see that these problems were brought on by several factors. During the 1970s, the Congress had seriously underfunded needed defense programs. Pay and allowances had fallen so dramatically that it was common to find servicemen and women qualifying for welfare. Members of the noncommissioned officer corps, who are the foundation of our military effectiveness at the unit level, were resigning from the service in alarming numbers. The Army Chief of Staff at the time, General Meyer, even testified that he was in charge of a hollow Army.

Additionally, the Congress in the 1970s passed numerous bills aimed at restricting the President's ability to act as Commander-in-Chief. Most onerous was the War Powers Act. Another was the Clark Amendment, which forbade military assistance to the democratic resistance of Angola. Fortunately, the Congress later repealed the Clark Amendment, a decision long overdue.

Beginning in 1981, a massive rearmament program was begun, which I believe was necessary to modernize our forces across the board, both conventional and nuclear. The changes we have seen in our military forces over the past few years are encouraging. The quality of our personnel is high. These men and women are receiving modern equipment, both in the active forces and in the reserves.

Along with this rearmament has come a resurgence in our national pride.

Unfortunately, there are some in Washington who do not seem to realize the reason for our success. It seems foreign to some that these positive results have been acheived through strength and commitment. Yet it is strength and commitment which the Soviets most respect. And we must never forget that.

Even with recent conciliatory visits of President Gorbachev to the West, we must always remember that when you distill everything down to its essentials, it is strength which engenders respect.

In closing, I want to express my deep appreciation to the PVA and the VVI for the Life Service Award which you have so graciously bestowed this evening. I am both proud and humbled by this occasion. The Paralyzed Veterans of America and the Vietnam Veterans Institute personify that commitment and spirit which has made America great.

I salute you and commend you for your loyalty, courage, and devotion to duty. Were it not for the patriotic deeds of citizens like you and the thousands of others who have worn the uniform, there would be no America.

Keep up your good work.

God bless you, and God bless America.

CUBA'S INDEPENDENCE DAY 1989

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. FASCELL. Mr. Speaker, May 20 marks the 87th anniversary of Cuba's independence. Once again as we look back at the brave and tenacious leaders who led the battle for Cuban independence, we are struck by the lack of freedom in Cuba today. The long struggle for independence was betrayed by Fidel Castro who promised democracy, development and a better life for the people of Cuba, but delivered dictatorship, dependence, human rights abuses and stagnation.

The past year has witnessed the continuing movement in Latin America and elsewhere toward democracy. Free elections have been held in countries which are consolidating their young democratic systems and in those that are in the process of establishing them. With few notable exceptions we have watched peaceful transitions of power from one elected president to another in countries where experience with democracy is recent. Castro's Cuba now has the dubious distinction of being the oldest dictatorship in the hemisphere, and one of the oldest in the world. In the rest of the hemisphere elections reign; in Cuba a call for a plebiscite on Castro's regime is a radical idea. How far out of step is Cuba from the rest of Latin America.

As more and more Latin American countries enter the transition to democracy and the observance of human rights, Cuba is more and more isolated from its neighbors in this hemisphere. In fact, Cuba is being left behind even in the Communist world. As glasnost, perestroika and demands for reform have come to characterize much of the Communist world, Fidel Castro insists that liberalization is not for Cuba. Fidel's Cuba has become an anachronism, stunted in growth, ruled by an outmoded dictatorship wedded to failed policies. Cuba is not a model for revolutionary youth. In Latin America it has become the example of what to avoid.

The past year saw the first UN Human Rights Commission report detailing human rights abuses in Cuba. Under the capable leadership of Ambassador Armando Valladares, the U.S. mission to the United Nations Human Rights Commission worked to get the UNHRC to continue its investigation into the abuses which have characterized Cuba during the Castro era. While the effort was not completely successful, it does keep the facts about the situation in Cuba before the world. As we commemorate the anniversary of Cuba's independence, we should pay special tribute to the modern day Cuban heros, those who risk their freedom and more as human rights advocates struggling against enormous

odds to make the world aware of the truth of life in Cuba today.

Perhaps the most vivid illustration of the state of Cuba today was General Secretary Gorbachev's recent visit. To avoid the embarrassment of demonstrators appealing for the reforms which have been introduced into the U.S.S.R., Castro had to round up the human rights activists. The visit highlighted the differences between the trends sweeping the world and Castro's stubborn clinging to ideas discarded even in much of the Communist world.

The past year also saw the signing of the agreement on Angola under which Cuban troops, which have been fighting in support of the Marxist regime in that country since 1976, will finally return home and leave the fate of Angola in the hands of its citizens. We must remain vigilant, however. We have no reason to trust the word of Castro. We must insist that Cuba fulfill all its obligations under the agreements.

Years ago the United States played a role in the battle for Cuban independence, helping the brave Cuban fighters win their long fight to give the people of Cuba control over their own government. Today we contribute by keeping alive the flow of ideas to Cuba through the radio station which bears the name of the great Cuban patriot Jose Marti, one of the greatest figures in the history of the fight for independence in our hemisphere. We have all heard the reports of the wide listenership of Radio Marti and of its role in bringing the truth to the people of Cuba. Not long ago this body approved a new program, TV Marti. I am confident that this new venture will also contribute significantly to bringing information and unbiased news to our neighbors in Cuba.

Again we commemorate the anniversary of Cuban independence with the hope that the Cuban people will one day truly gain their independence and be able to exercise the fundamental rights of all people, that of choosing their own government and enjoying the liberties which we take for granted.

TRIBUTE TO CARL O. HYDE

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of Texas. Mr. Speaker, today I am introducing legislation to recognize the service of a dedicated U.S. Postal Service professional, the late Carl O. Hyde of Midland, TX. This bill, which will rename the Midland General Mail Facility the Carl O. Hyde General Mail Facility, seeks to honor and remember Mr. Hyde's contributions as a 46-year employee of the U.S. Postal Service.

It is with the broad support of Mr. Hyde's coworkers, many friends, and fellow citizens of the Midland community that I take this action today. A man who enjoyed the reputation for seeking efficiency and excellence in the postal system, Carl Hyde was fondly known as "Mr. Zip" by those who worked with him. In 1979, he was voted the Federal Employee of the Year by the Permian Basin Executive Association. He worked tirelessly to bring about many improvements in the Postal Service in Midland. At the time of his death, he had over 4,100 hours in Postal Service accumulated sick leave.

Mr. Hyde worked well beyond the accepted age for retirement out of love and devotion to his chosen profession. Throughout, he always maintained a positive outlook and is remembered by those he worked with as a caring man who always had time for others. It is this of exemplary service and dedication that I wish to recognize and hold up as a model for us all.

During World War II, Carl Hyde served with the U.S. Army in the Philippines. When he returned, he settled in Midland, where he became a respected and active member of the community. He served as president of the downtown Midland Lions Club, and was active in numerous civic and church programs. Among the distinguished recognitions he received were three Lion's Presidential Awards and the Ambassador of Goodwill Award. In 1987, he was inducted into the Texas Lion's Hall of Fame.

As a senior postal operations specialist, Mr. Hyde oversaw the facility construction and maintenance requirements for the 63 post offices in the El Paso Sectional Center. The construction of the new Midland General Mail Facility was one of the last projects to which Mr. Hyde devoted his considerably energy, enthusiasm, and expertise. Currently, over 300,000 pieces of west Texas mail are sorted and processed daily at this site. It is Mr. Hyde who is credited with initiating the concept of the facility, and who was actively involved in its development and planning over the years. Thus, it is most fitting and appropriate to redesignate this facility in his name.

LEXINGTON, MO, NATIVE NOW MISSOURI STATE HIGHWAY PATROL SUPERINTENDENT

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SKELTON. Mr. Speaker, it is with great pride that I congratulate a fellow Missourian, Col. C.E. "Mel" Fisher, the new superintendent of the Missouri State Highway Patrol.

Mel Fisher is a native of Lexington, MO. He is a graduate of Lexington High School and holds an associate degree in arts from Wentworth Military Academy Junior College also located in Lexington. At Wentworth, Mel balanced his achievements by excelling in athletics, as the captain of the football team, and more important by ranking third academically.

After serving honorably in the U.S. Army from 1954 to 1956, Mel soon continued his formal education and received his bachelors degree in journalism from the University of Missouri-Columbia in 1966 and his masters degree in public administration from the University of Missouri-Kansas City in 1970.

Mel is a 30-year veteran of the patrol, beginning his career in 1958 in Harrisonville. He served as a road trooper in Cass, Platte, and Clay Counties and was promoted to sergeant in 1967 and to lieutenant in 1973. In 1977 he was promoted to captain and became the commanding officer of Troop A in Lee's Summit.

In 1980, he was promoted to major and transferred to the patrol's general headquarters in Jefferson City, where he served as district commander. In 1987, Col. H.J. Hoffman named him assistant superintendent, with the rank of lieutenant colonel. Nominated on April 19, 1989 to become the superintendent of the Missouri State Highway Patrol, he was confirmed by the Missouri State Senate on April 26, 1989, rising to the rank of colonel.

Mel's career is an inspiration, exemplifying hard work, and dedication. I commend him and wish him well in his new duties.

COCHISE COUNTY IS WITHOUT DOUBT THE MOST INTERESTING

HON. JIM KOLBE

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. KOLBE. Mr. Speaker, I'd like to call the attention of my colleagues to an article recently published in the Pinal Pioneer entitled, "Cochise County is Without Doubt the Most Interesting." In the article, a number of interesting, educational, and definitely unusual tourist attractions located in Cochise County, AZ, are described and touted. For animal lovers, there's a section describing birds indigenous only to Cochise County. For those who like to take scenic drives on Sunday afternoons, there is a specifically outlined route which includes all the major tourist hot spots. For war buffs, there is a section which lists the many historical sites at Fort Huachuca, and the surrounding area. If none of these areas sound appealing, read about Arizona's old copper mines in Bisbee, or Crystal Cave in Painted Canyon. Certainly, there is something for everyone in Cochise County and more than likely, you may read about it in this article.

Also, keep in mind that the recommendation to visit Cochise County was not made by a Cochise County newspaper in an attempt to stimulate tourism, but by a newspaper in neighboring Pinal County, also within my district. I ask that my colleagues take the time to read this enjoyable article so that they may become aware of the many wonderful sights Arizona has to offer.

[From the Pinal Pioneer, Apr. 30, 1989]

COCHISE COUNTY IS WITHOUT DOUBT THE MOST INTERESTING

(By Mark Acuff)

Cochise County doesn't get a lot of ink, but those who've been exposed to its scenic wonders say the southeast corner of the state ranks right up there as one of the most interesting areas of Arizona.

Everyone has heard of Tombstone, but few know of the fantastic view at Portal or the Nature Conservancy preserves at Ramsey Canyon, the Muleshoe Ranch and Portal.

When William Least Heat Moon wrote Blue Highways about the backroads of America, it was the view of the Chiricahuas near Portal which brought him up short to say "Why didn't somebody tell me about this?"

He was heading west in his camper about at the Arizona-New Mexico border near Rodeo when the sheer ramparts of the Chiricahua Moutains hove into view. There are few more spectacular sights in all the Southwest—or the world, for that matter.

At Portal, the mountains appear as though the hand of God smote the ramparts in two, leaving a bodacious chasm where Cave Creek flows out of the mountains.

The creek itself babbles out of rugged forested mountains, surrounded by indescribable beauty. The beauty is not merely in the geology and flora, however, for this is one spot to make amateur naturalists think they died and went to heaven.

Serious birders trying to find that elusive 700th species or so have to visit the Chiricahuas, as several species are found nowhere in the United States but Cochise County.

The mountains also are home to animals usually found only in Mexico, such as coati mundi and ring tailed cats. The coatis, relatives of raccons, have prehensile tails and exhibit a behavioral repertoire which seems a cross between racoons, bears, monkeys and large cats, with a pig-like nose for rooting up grubs.

Author Moon was coming from the east, but Arizonans will be coming from the northwest for the most part. The best way to visit the marvels of Cochise County is to head east from Tucson and leave Interstate 10 at Arizona Highway 83 to Sonoita, where the grass is often so high it can hide a cow.

AZ83 turns to dirt about the time you hit Canelo, where the Nature Conservancy has purchased a ranch and Cienega (bog) important to local wildlife. Start looking for unusual birds right there.

Turn east at Canelo and drive through Fort Huachuca, paying heed to the signs asking you not to run over marching soldiers.

The fort has a wonderful museum of surprisingly large size. In addition to the expected exhibits on the fort's involvement in the Apache wars, there are major exhibits on the contributions of the Buffalo Soldiers, the black cavalry and infantry regiments once stationed there.

As you leave the fort, note the "Fort Huachuca Aerostat," the government anti-drug blimp which so far has spent tons of your money and not caused a single conviction.

Keep going past the government boondoggle and take AZ92 south to Ramsey Canyon, about eight miles south of Sierra Vista.

The Mile Hi preserve of the Nature Conservancy is there, dedicated to hummingbird research and the invention of new ways to get rid of vinca in the canyon.

There are cabins for rent surrounded by zillions of hummingbird feeders by a rushing stream. Nectar feeding bats attend the feeders at night, and that has brought bat researchers to mist net and band bats for research.

AZ92 runs on over to Naco and Bisbee along the Sonora border, allowing the casual tourist to watch wetbacks and drug dealers floating down the San Pedro, which flows north to the Gila after rising in Mexico.

At Bisbee, one can stay the night at the fabulous Copper Queen, a Victorian marvel erected in the heyday of the mines, or several more modern establishments. Bisbee, like Jerome, clings to the mountainside and is home to many galleries and crafts shops.

Down the hill from Bisbee is Douglas, home to another hotel wonder, the Gadsden. It not only has a wondrous mezzanine surrounded by Tiffany stained glass depicting the flora and fauna of the county, but a four story art deco chandelier and gold leaf covered bannisters.

From Douglas, US666 heads from the Mexican border to the Canadian. Take it to the Willcox Playa, where thousands of sandhill cranes spend the winter.

There are accommodations aplenty at Willcox. AZ186 takes you from Willcox to the Chiricahua National Monument, a wonderland of tall rock spires and unusual formations set in a forest. A dirt road goes from there right over the top of the mountains to Cave Creek. This is not for the faint of heart, but affords spectacular views.

The Nature Conservancy has also bought up a preserve around Portal. Crystal Cave is in Painted Canyon, five miles west of Portal. The crystal formations have suffered from vandalism and mining attempts, but much of the dazzling formations remains, at depths down to 650 feet.

Caving is understandably dangerous and should not be undertaken without proper equipment and training.

But one can visit the other Nature Conservancy preserve northwest of Willcox in relative safety.

Take Airport Road straight west of Willcox about 15 miles to a sign pointing to the Muleshoe Ranch, turn right another 15 miles across the War Bonnet Ranch and Antelope Ranch to the end of the road. This is the Muleshoe Ranch Preserve, noted on maps as Hookers (no apostrophe) Hot Springs. At 55,000 acres it is the second largest such preserve in the country.

At the south end of the Galiuro Mountains, the ranch ranges from saguaro desert to ponderosa pine forests. There are 30 hot springs and three permanent streams with gallery forests. A visitor can spend weeks just hiking around the ranch, and one birder recently counted 97 species in one day—after the migratory birds had left for the year.

There are coatis and ring tailed cats, javelinas, deer, antelope and bighorn sheep. Coyotes sing at night and bats flit about. Some of the bats are the pets of the preserve manager, Dr. Donna Howell, who is in demand among Tucson school kids at Halloween when she brings the bats and talks of their importance in the cosmic scheme. Her home at the preserve headquarters is protected by any Attack Mouse, a cute little fellow known for his ability to rend asunder other rodents twice his size and swallow them. His attack howl sounds exactly like a smoke alarm going off.

Cabins can be rented at the Muleshoe as well, at $25 a head for the night. There's a hot tub connected to a 140 degree spring, so hot you need to wait for it to cool down before getting in.

It might be possible to visit all these sights in one day, but to really enjoy them plan on spending a night or two at Ramsey Canyon and/or the Muleshoe. There are few more rewarding places in all Arizona—and you'll hardly see another soul.

For more information call the Conservancy at 622-3861.

NEW SMOOT-HAWLEY BARES ITS TEETH

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. CRANE. Mr. Speaker, just as I, along with several of my colleagues, predicted during last years' debate on the Omnibus Trade and Competitiveness Act of 1988, threats of counterretaliation to the Super 301 amendment are being made. As the May 30 deadline for the USTR's report identifying countries it believes practice unfair trade rapidly approaches, the European Community has issued a warning that it will retaliate against any American retaliation. Also, the EC has correctly pointed out that the United States engages in several unfair trade practices of our own, such as export subsidies and quotas on sugar, dairy products, and other agricultural imports.

Prof. Jagdish Bhagwati of Columbia University, along with several distinguished U.S. economists, recently released a paper on our Nation's trade policy which includes a series of thought-provoking comments. Under the heading entitled, "Super-301: Prying Open Foreign Markets," the following valid points are raised:

When we confront the strong, such as the European Community, we are likely to produce strongly spirited reactions, proportionate to our folly. While trade disputes will settle, the battles leave scars. The ethos spreads that the trading system is unfair. Protectionists can only find this to their advantage as they continually seek to maneuver the legislative and administrative processes to obtain protection.

When we so confront the weak, they are likely to buckle under. But the danger now is that the small countries we face in trade will view our 301 actions as the way of the bully, reviving the image of the "ugly American."

The 1988 act has greatly expanded the scope of 301 actions. The President is urged to "take all appropriate and feasible action within his power" to obtain the elimination of unreasonable foreign trade practices. But the practices that the 1988 act lists as objectionable are not agreed to as such as by our trading partners at the GATT or in bilateral treaties. The unilateral declaration of such practices as providing us with the excuse for retribution is not calculated to produce an orderly world trading regime.

Then again, in order for a country to demonstrate that its alleged trade barriers are being removed, it is now expected to show an increase in U.S. imports annually over a 3-year period. But trade flows, and balances, are determined—except in the very short-run

period—by macroeconomic factors and policies, not by changes in trade barriers.

I would also like to bring to the attention of my colleagues the following article by Lindley H. Clark, Jr. which appeared in the Wall Street Journal last month.

[From the Wall Street Journal, Apr. 28, 1989]

NEW SMOOT-HAWLEY BARES ITS TEETH

(By Lindley, H. Clark, Jr.)

Congress last year passed something called the Omnibus Trade and Competitiveness Act of 1988. So far, it's just lain there, doing neither good nor evil. But the trade act is about ready to show it can become the most protectionist piece of legislation enacted since the Smoot-Hawley Tariff of 1930.

The trade act is baring its teeth because its provisions say the administration by May 30 must name countries it believes have a pattern of unfair trade practices that hurt U.S. businesses. When a country is included on this list, the government has as long as 18 months to identify unfair practices. Negotiations are supposed to end the practices within three years, or the targeted nations will face trade sanctions. The small and weak countries may succumb to the pressure; large and strong nations may retaliate against any U.S. "punishment." leading to new trade wars.

The language of the act is wonderfully free-swinging. The administration is empowered to crack down on any foreign practice it deems "unreasonable." As Jagdish Bhagwati, a Columbia University economist, remarks, the practice does not have to be illegal. It need only be something we unilaterally consider "unfair and inequitable."

But can't President Bush derail all of this by living up to his free trade rhetoric? He can, but he may not. Under previous legislation, the president early in the procedure could decide against any U.S. counteraciton. Now the power to determine "unfairness" has been transferred to the U.S. trade representative—currently Carla Hills. She has been talking as tough as her predecessor, Clayton Yeutter.

The president at the end of the process still can veto whatever the trade representative decides, but he'll be under strong pressure not to do so. A powerful hint of that came last week in a statement by Sen. Max Baucus, a Montana Democrat. The administration, he said, will be "cutting the heart out of" the new trade law if it doesn't put Japan on the May 30 list.

"If Japan, the most egregious offender, is not named, the most important provision of the trade bill will be cut out," the senator said. Sen. Baucus heads the trade panel of the Senate Finance Committee.

The president met last weekend at Camp David with a group of economists, so maybe there's hope yet. One area on which economists are virtually unanimous is free trade. It's all but impossible to get an economist to say a kind word for the trade act.

Prof. Bhagwati showed how true this was by preparing a statement on U.S. trade policy, with emphasis on the trade act. The statement was signed by a wide range of prominent economists of varying political persuasions.

The statement stresses that in the past, trade barriers traditionally have been reduced by trading these reductions. It's impossible to estimate exactly how our trade restraints compare with those of our trading partners, but a U.S. official once privately said the situation was "about 50-50". If Sen. Baucus gets his way, Japan and other nations will reduce their barriers against U.S. trade whether or not we do anything in return.

It's sad. The U.S. after World War II led the way toward a general opening of world markets. The result has been a huge expansion of world trade, with major benefits for the economies of the U.S. and other nations.

If the U.S. now lurches into a heavy-handed effort to reshape world trade to suit Sen. Baucus and his friends, the action could hardly be coming at a more unfortunate time. Negotiations under the General Agreement on Tariffs and Trade are still going on. The talks have had plenty of trouble, which is hardly surprising: This Uruguay round was highly ambitious. Many issues beg for reciprocal action, notably agriculture.

There is no part of the world economy that's as distorted as agriculture. It is, of course, heavily involved in domestic politics, which helps to explain why GATT has largely bypassed it up to now. Han Seung-Soo, Korea's minister of trade and industry, has been in the U.S. lately pleading for exclusion from the trade act's hit list. As an economist, he knows his country's best interest is to admit more U.S. farm imports; but as a politician, he's painfully aware of Korean demonstrations featuring the burning of Yankee products.

The U.S. and Europe, not to mention Japan, have plenty of farm restrictions of their own. The Economist magazine estimates that Europe's Common Agricultural Policy means Europeans pay up to four times the world price for food. GATT ministerial talks in Montreal late last year bogged down in part because of disputes over agriculture. Movement has more or less resumed in Geneva as all countries have agreed to reduce their subsidies to agriculture.

Well-intentioned or not, that agreement could be meaningless. We need to work out ways to get the subsidies down and, eventually, out. The atmosphere for such negotiations, which would have large and important benefits for the world, would be improved if the U.S. were not running a sock-it-to-them sideshow.

We need a kinder, gentler world, to adapt President Bush's phrase. Europe at the moment is hard at work on Europe 92, converting into a single market. There are widespread fears in the U.S. and elsewhere the result will be to exclude foreign goods. The chances Europe will become a protectionist bloc will be greatly enhanced by Europe's fears that the U.S. has something quite similar in mind for itself.

The Reagan administration came into office in 1981 with a firm commitment to free trade. In practice, the administration was more protectionist than most of its postwar predecessors. The voluntary export restraint agreement wasn't invented in the Reagan years, but it was refined to a fine art.

President Bush has an opportunity to place himself on the side of setting trade disputes by multilateral negotiations, not by one-sided threats. Working through GATT will be slower, but the results will be more likely to contribute to the sort of world we all want.

INTRODUCTION OF A BILL TO AMEND THE AFRICAN ELEPHANT CONSERVATION ACT OF 1988

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. FIELDS. Mr. Speaker, I am pleased to join with our distinguished colleague, CLAUDINE SCHNEIDER, in proposing this legislation to improve the African Elephant Conservation Act of 1988.

Mr. Speaker, last year the Congress enacted as part of the Endangered Species Act reauthorization of this historic act of help save the African elephant.

The African Elephant Conservation Act directed the Department of the Interior to review the elephant conservation effort of both ivory-producing and ivory-trading countries and to ban the importation of ivory into the United States from any nation which does not have an effective program.

While the Department has prohibited the importation of ivory from some 80 countries which are not members of the Convention on International Trade in Endangered Species of Wild Fauna and Flora [CITES], they are still reviewing a number of other conservation programs. In addition, the Department has outlawed any ivory from the African nation of Somalia which has been a sanctuary for marauding bands of ivory poachers.

Mr. Speaker, the African Elephant Conservation Act of 1988, which I strongly supported, was an important first step in the battle to help save African elephants from extinction.

Regrettably, however, without further actions by our Government and the international community, the elephant will soon cease to exist as a viable species throughout much of Africa.

The population estimates for the African elephant are both shocking and depressing. In 1979, the total elephant population in Africa was about 1.3 million animals. Two years ago, nearly 700,000 elephants roamed the plains and forests of Africa. Today, fewer than 400,000 African elephants are alive. And the destruction of this magnificent animal has not been confined to just a few African nations but has been widespread throughout the continent. I urge my colleagues to consider the following:

Before the civil war in Angola, over 200,000 elephants roamed that country's plains. Today, fewer than 8,000 live in that war-torn nation.

In 1973, some 130,000 elephants lived in the Republic of Kenya. Last year, it was estimated that fewer than 16,000 remained. This is a population loss of 90 percent.

In 1977, the Selous Game Reserve in the United Republic of Tanzania had a population of 109,000 elephants. Today, only half of them, or 50,000, are alive.

In 1976, some 80,000 to 100,000 elephants roamed the plains of the Central African Republic. By 1987, fewer than 9,000 remained.

During the turbulent period of Idi Amin's rule in the 1970's, 80 to 90 percent of Uganda's

elephants were slaughtered. A single herd in the Murchison Falls National Park was reduced from more than 9,000 elephants in 1973 to only 25 survivors. And, finally, before its civil war, Chad had an estimated 15,000 elephants. Today, fewer than 1,500 elephants live in that nation.

While population growth has contributed to the demise of the African elephant, the single fundamental reason for the staggering 75 percent decline is ivory poachers.

Mr. Speaker, these heavily armed, immoral, and unscrupulous poachers are indiscriminately slaughtering thousands of elephants, regardless of age, sex, or size, for ivory prices which are greater than a year's wages for most African workers.

During the past decade, the price for elephant ivory has increased more than sevenfold. In fact, the value of ivory has skyrocketed from $4 a pound in 1970 to more than $80 today; and if what has happened to the price of rhino horn is any indication, elephant ivory will continue to escalate in price until all elephants are gone.

Mr. Speaker, sadly, there are only three African nations—Botswana, Zimbabwe, and South Africa—where elephants are relatively free from the constant pressure of poaching. These three countries have sound and effective elephant conservation programs. The rest of Africa is fighting and losing the battle against poachers. These nations are not only losing the war, but they are losing their heritage. The survival of the African elephant is as important to that continent as the bald eagle is to the United States.

Without elephants, many African nations will lose millions of dollars from tourists, sportsmen, and conservationists who come to see the elephant in its natural habitat.

Mr. Speaker, since 1980, the annual volume of world ivory, of which more than 90 percent is poached, has been about 800 tons. To meet this demand, more than 70,000 elephants must die each year. With only about 400,000 left, there is little time to save this irreplaceable species.

We must, therefore, take bold steps to stop the importation of poached ivory and we must reduce the growing international demand for this product.

While I applaud the tireless campaign of the African Wildlife Foundation and its worldwide effort to encourage people not to buy elephant ivory, it is time the U.S. Congress implemented stronger actions that those mandated by the African Elephant Conservation Act.

As I indicated, this act was an important and positive first step. Unfortunately, the level of poaching, the demand for ivory, and the decline of the African elephant are much more severe than anyone imagined.

It is, therefore, my firm belief that we must amend the African Elephant Conservation Act by banning the importation of all worked and raw ivory from any country that does not have a native population of African elephants.

By implementing such a ban, we would immediately send a strong signal to the rest of the world that the United States will not accept poached ivory. While we now import one-third of the international trade in carved ivory, which represents about $30 million, only 3 percent comes directly from Africa. The bulk of it arrives from such intermediary places as Hong Kong, Taiwan, and Japan.

Based on my experience, there is no question that traders in these countries make millions by knowingly carving poached ivory. During my visits to the Orient, I have seen huge amounts of carved ivory and I am convinced that most of this ivory was illegally obtained. There are only a few countries in Africa which have legal "culling" operations and this ivory could not begin to satisfy the demand of Chinese and Japanese ivory merchants.

Mr. Speaker, the message of our legislation is unambiguously clear. In order to import ivory into the United States, you must have a native population of elephants. I am confident that this message will not be lost on either CITES or the rest of the world.

A second positive impact of this legislation is that you would significantly simplify the job of tracking elephant ivory. Unfortunately, once ivory is carved, it is virtually impossible to determine its origin. By limiting imports to ivory-producing nations, the U.S. Fish and Wildlife Service should be able to determine, with some precision, whether an ivory shipment was legally obtained or poached. Under today's unworkable tracking system, once ivory leaves Africa, it is extremely difficult, if not impossible, to find out where it ends up. It is time we gave the benefit of the doubt to the elephants and not the ivory merchants.

And, finally, by establishing such a ban, ivory traders would be forced to move their carving operations to Africa. By so doing, they would help build the local economies of these impoverished nations and would provide a powerful new incentive to manage the African elephant populations in a sound manner.

Mr. Speaker, there is no question that if the African elephant, which is now a valuable economic commodity, no longer has any financial value, then African governments will simply stop spending their meager resources to protect them. As a result, these elephants will be slaughtered for their meat and for the illegal ivory trade outside the United States.

With the population declining by nearly 10 percent a year, we must take additional steps now to stop the annihilation of the African elephant.

I am convinced that neither CITES nor the African Elephant Conservation Act of 1988 will stop this systematic destruction. Only a straightforward ban, which has been endorsed by such diverse groups as the Humane Society of the United States, Game Conservation International, the African Wildlife Foundation, and the Houston/Dallas Safari Club offers real hope of saving this species.

I am convinced that once this ban is enacted, the European community will once again follow our example, as they did with the African Elephant Conservation Act, and they too will prohibit the importation of ivory from so-called intermediary countries. Together the United States and the European community account for 64 percent of the world's consumption of carved ivory. We can make a difference.

Mr. Speaker, in order to save the African elephant, three things must occur. First, consumers must stop buying ivory products. Second, CITES must, during its upcoming conference in October, take meaningful steps to help stop the worldwide flow of poached ivory. And, third, the Congress or the Bush administration must establish a simple, straightforward ban on the importation of all ivory from those countries without a native population of elephants.

If we accomplish these three things, we can stop the slaughter of this magnificent animal and we can ensure that our children and grandchildren will have an opportunity to see elephants in their natural habitat.

As the host of the television series "The Living Planet," Mr. David Attenborough, once said, "Extinction is a one way process. Once a species is extinct, it is lost forever."

Mr. Speaker, I urge my colleagues to join with me and CLAUDINE SCHNEIDER, in strong support of this important legislation. We must approve this measure on behalf of our largest one of our most loved land mammals, the African elephant. Please join us in this vital effort to save the African elephant.

TAXES ON SENIORS ARE TOO HIGH

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of Texas. Mr. Speaker, I am pleased that the conference report on House Concurrent Resolution 106, the fiscal 1990 budget resolution, contains language asking the tax-writing committees in each body to take a close look at what has become an onerous and unacceptable tax burden on our Nation's elderly. I would have preferred the language by Senator ARMSTRONG contained in the Senate resolution, which would have increased the threshold at which the Social Security earnings test takes effect, because I believe this disincentive for senior citizens to engage in work is particularly bad policy. However, I am hopeful that the conference report language will set a process in motion that will do away with this restriction, and address the basic issue of the fairness of tax rates for seniors.

The dollar reduction in Social Security benefits for each earned dollar in excess of $8,800 is in effect a marginal tax rate of 50 percent for those seniors to which it applies. When added to the other seniors-only taxes, including partial Social Security benefits taxation and the new catastrophic health care supplemental premium—a senior citizen who normally would be in the lowest tax bracket becomes subject to a marginal tax rate of 83 percent. This rate is punitive, unfair, and unwise social policy. Currently, more than 855,000 senior workers have their benefits reduced due to this onerous law. These individuals are forced to forgo the full benefits they have worked for and earned over the years. Senior citizens who want to work should not be penalized for doing so, and society should not deprive itself of the talent, experience, and motivation of elderly workers. The conflict between contributing to society through work and giving up earned benefits is unconscionable.

I urge the House Ways and Means and Senate Finance Committees to take seriously the demonstrated concern of the majority of Members and look at ways to reduce the tax burden and restore fairness to seniors. I urge individual Members to support legislation such as H.R. 58, which seeks to eliminate the Social Security earnings test. Finally, I urge the health subcommittees to take a serious look at the ill-conceived catastrophic health care financing scheme, which has caused senior citizens across the country to cry foul.

Mr. Speaker, the tax burden on senior citizens is too high. It is our job to make sure that the elderly can truly enjoy their golden years without having to worry about rising tax rates or choosing between productive work and keeping earned benefits.

U.S. INTERESTS IN THE 1990'S—MANAGING THE GLOBAL ECONOMY: FINAL REPORT OF THE 75TH AMERICAN ASSEMBLY

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BEREUTER. Mr. Speaker, this Member had the intellectually challenging and satisfying experience to be among the 60 participants in the 76th American Assembly, Columbia University, which met on April 20–23, 1989, at the Arden House in Harriman, NY, to focus on the global economy of the 1990's as it relates to American interests. The Honorable William E. Brock and Dr. Robert D. Hormats acted as codirectors for this assembly program and supervised the preparation of papers used as background reading by the participants.

I believe the final report of the assembly, entitled, "Seize the Moment," is a statement that deserves the attention of my colleagues in the U.S. Congress, our staff, the executive branch, American business interests, and Americans generally. While not all participants in the assembly agree with all aspects of the statement, it does represent an unusually large degree of general agreement given the complex and controversial nature of the issues and interests involved and the vigorous discussion and debate that occurred. I invite the attention of my colleagues to the following report of the American Assembly:

SEIZE THE MOMENT: U.S. INTERESTS IN THE 1990'S

PREAMBLE

Dramatic changes have taken place in the global economy—and the pace is likely to continue at a relentless rate. We see the next few years as a watershed—a significant turning point in post-World War II political, economic, and security relations. It is a uniquely promising moment in history, when Western Europe is moving toward unity; Japan has attained great economic power and is seeking appropriate world responsibilities; the Soviet Union, several nations in Eastern Europe, and China are turning away from doctrinaire communism to attempt economic and political reforms; and many developing countries have emerged as pace-setters in political and economic reform. In short, we have relative peace and many shared political and economic goals—a large number of which have been inspired by U.S. example. Moreover, this remarkable moment in history is formed by a fast-moving, multi-dimensional technological revolution which has heightened the increasing interdependence of nations.

Yet, at a time that should be triumphant, the industrialized democracies have permitted dangerous trade and other economic imbalances to build up within the international system. Unless corrected soon, they could engulf the world in a new wave of protectionism and bring a financial crisis in the 1990s. Those imbalances are rooted in mistaken and often self-indulgent domestic policies of the industrialized democracies. Responsibility for ensuring a health international economy now rests primarily upon domestic policy changes in the United States, Japan, and Western Europe. It is urgent that the leaders of those nations act quickly and decisively. The 1990s represent a decade of enormous opportunity, but we must no longer ignore the growing dangers.

We need to seize the moment to create a new architecture for international economic cooperation, one that takes advantage of the economic strength many of our friends and allies have attained in recent years. We need to promote global growth, expand and liberalize trade, strengthen the international development effort, and address issues such as drugs and environmental deterioration, which affect virtually all nations acutely.

Constructing this new architecture poses an exciting challenge to American leadership. Having risen to the task of rebuilding the global economy after World War II, the United States is at a point in history when it must again exert leadership, as it did then, to develop a comprehensive strategy for addressing the myriad issues before the international economy. This time the United States can act with the help of a group of nations that were unable to play a major role in the 1940s, but they can and must now share responsibility for providing the ideas, leadership, and resources necessary to meet the challenges ahead.

The world has made remarkable economic progress since the devastation of World War II—and Americans should feel a strong sense of pride that their nation's leadership has played a critical role in this success. Most of the goals set by the United States for achieving a stronger and prosperous democratic world over the last forty years have been met beyond expectations: Western Europe and Japan are thriving and prosperous democracies, market economics has demonstrated its superiority to communism, and world trade and investment have expanded dramatically.

What then should our goals be, what policy instruments should be employed to achieve them, and what institutional structures are best suited to the tasks ahead?

The economic and political relationships among nations and the underlying characteristic of the global economy today differ greatly from those of the 1940s, when current international institutions were created, and by the end of this century they will be far different still. Today the freedom of capital flow exerts powerful constraints on national management, burgeoning populations in the developing world exert massive pressures for migration, governments increasingly seek to manage flows to trade and direct investment, the forces of economic nationalism have been stronger as globalization of the world economy renders workers and industries more vulnerable to international forces; nations artificially create competitive advantage to the detriment of others; trade and current account imbalances reflect large domestic imbalances in the United States and its trading partners; populations have come to realize how vulnerable they are to one another's lack of environmental responsbility, remarkable changes in the previously rigid economies in the Communist world reflect recognition that they lack global competitiveness and are unable to meet the basic needs of their citizens; the world's poorer nations, most of them debt-encumbered, are experiencing enormous human and economic problems which portend social volatility and international instability; and technological changes cause quick shifts in competitive advantage and bring the world closer together by permitting the instant and massive dissemination of information and ideas.

Leaders and officials under pressure of time and politics must make choices that will influence the course of our lives and societies. Often what appear to be insurmountable political or resources constraints to new policies or shifts in priorities, attitudes, or patterns of resource allocation can be overcome if benefits of doing so, or the costly implications of not doing so, are made dramatically clear. President Franklin Roosevelt conveyed a sense of the costs to America of failing to provide Britain with lend-lease aid by explaining the importance of helping a neighbor to put out the fire in his home lest it next spread to yours.

It is frequently asserted that democracies take bold decisions only in crisis. In the current environment it is essential to build a new architecture of international economic cooperation and address internal economic problems, to avert a crisis. Failure to act puts the United States in harm's way—vulnerable to an energy crisis as our import dependence increases, vulnerable to a financial crisis as domestic and international deficits and our attendant dependence on massive imports of foreign capital persist, vulnerable to an outbreak of economiic nationalism as trade issues and imbalances go unattended to, vulnerable to massive instability in the Third World along with massive immigration pressures as the debt problem festers, vulnerable to unexampled dangers to the physical environment, and vulnerable to the geopolitical consequences of instability in Eastern Europe as their economies deteriorate. Even if such crises never occur, insufficiently bold action on the domestic and international economic fronts will mean a steady drift that renders us less and less capable of influencing events and saps American leadership potential and spirit.

FIRST AMONG EQUALS: RELATIONSHIPS WITH JAPAN AND EUROPE

From being first, the United States has become first among equals, its main rivals also being its closest allies: the European Community (EC) and Japan. The difficulties thus created stem in large measure from the success of earlier American initiatives. Economic reconstruction of Western Europe and Japan and the political integration of the European Communiuty were, with the successful containment of the USSR, the principal strategic goals of the United States in the postwar world.

Goal of cooperative global economic management

With the exception of the much more urgent concern about the global environment, the goals of the United States in managing the global economy are essentially what they have always been: sustained economic growth on the basis of a open, market oriented global economy. What has changed is the ability of the United States to achieve this goal on its own. While the United States can and should remain the leader of the foreseeable future, to do so it will have to improve its own economic performance by managing its own affairs more successfully and cooperating more effectively with Japan and the European Community than it has succeeded in doing up to now. There will be frictions, but these are containable—and must be contained.

A prime U.S. policy goal in dealing with Japan and the European Community must be genuine partnership, beginning with economic and financial responsibility sharing. For political as much as economic reasons, the American people increasingly believe they are paying too high a cost and a disproportionate share of the costs for leadership in security, world economic development, and maintenance of the world trading system.

The existing international institutions, both formal—the International Monetary Fund (IMF), the World Bank, the regional development banks, the General Agreement on Tariffs and Trade (GATT), the Organization for Economic Cooperation and Development (OECD), and the relevent U.N. agencies—and informal—the Groups of Five and Seven—need to be reinforced. This is particularly true of the problem of the global environment, where the increasing cogency of the issue demands a more effective institutional framework. There will also have to be reallocation of responsibilities, with Japan, for example, being encouraged to play a far bigger and more positive role.

Successful global policy coordination requires not merely the constant cooperation of the United States, Japan, and West Germany within the evolving EC institutional framework, but willingness of all the main newly industrializing countries (NICs), including the primary NICs such as Korea and Taiwan, to align the pursuit of domestic and international goals. Without such coordination, governments cannot expect to achieve and maintain the growth of the world economy, price stability, and exchange rate stability. The ongoing effort to achieve more stable exchange rates can in turn help focus attention on the need for mutually compatible changes in domestic policies

In trade, too, the multilateral system embodied in the GATT must remain the cornerstone of U.S. policy and must be strengthened through successful completion of the Uruguay Round. But this will not be enough to preserve it. The United States is also committed to market-opening strategies of a unilateral and bilateral character aimed at achieving more equitable access to markets. The United States must be mindful of the need to pursue these strategies in ways that complement and reinforce the multilateral objective and promote the fundamental goal of a more liberal world economy.

The emergence of a new power—Europe 1992

A new kind of entity is emerging in Western Europe, one characterized by ever greater pooling of sovereignty in economic affairs. For a long time, the United States will have to deal simultaneously with both the EC institutions and the member states, especially the major ones. But relations with the community institutions, and in particular the Commission, should be upgraded.

The European Community's program to completing the internal market should be regarded as an opportunity rather than as a threat. For the Europeans themselves it represents a further step toward an essentially political vision. For the United States it should be no more controversial than all the previous stages toward its longstanding goal of strengthening Western Europe. To date, the risk of a "fortress Europe" has been greatly exaggerated, and what risks of increased protection there are can be averted by purposeful U.S. and multilateral action, to which the European Community generally has shown itself sensitive.

Despite the absence of any broad protectionist objective, there are risks in emerging EC trade policy—in anti-dumping, in local content requirements, in reciprocity, and in the replacement of national quota restriction by EC-wide measures. The United States can—and must—tackle these, largely through the Uruguay Round, but also in bilateral fora.

On the other portion of the European continent, the collapse of the Communist model represents one of the great changes in the world and a positive development for the United States and its allies. But smug self-satisfaction is not the right response. Efforts need to be made, consistent with maintenance of Western security, to bring Eastern European countries into the world economy. The European Community is clearly in the best position to achieve this. It should be encouraged to do so.

A crucial bilateral relationship—Japan

Japan, the world's first economic superpower without military power, is embarking on an historic, domestic debate about the nature of its global responsibilities and long-range interests. The United States also stands at an historic juncture regarding its global responsibilities. These two democracies must fundamentally reassess the nature of their partnership.

Yet the U.S.-Japan relationship suffers from intense conflicts over important economic interests. The United States is growing increasingly frustrated by the limited results of endless attempts to penetrate the Japanese markets, whether in semiconductors, supercomputers, agriculture, or consumer goods. On the other hand, the Japanese rightly argue that the United States lacks a responsible fiscal policy and adequate savings rate. There are real risks from this state of mutual recrimination.

Immediate disputes must be resolved—and a wider cooperative vision put in its place. Japan must import substantially more manufactured goods. The current account surplus is both a political and an economic problem. It has fallen from 4.4 percent of Japan's GNP in 1986 to 2.9 percent last year. It should fall further and more of the surplus should go to the developing countries.

Japan must be encouraged to proceed faster toward implementing the vision of its role in the world economy indicated in the Maekawa report, one in which growth is driven largely by domestic demand at home and greater governmental attention is given to constructive engagement abroad, especially in the developing world. There is also a need to find opportunities for additional shared activities. The immense challenges of addressing the global environmental changes and Third World debt present an important opportunity in that regard.

A VASTLY DIFFERENT THIRD WORLD

A stable, growing world economy that meets U.S. interests must include the active participation of the Third World. The failure to deal with a vastly changed, but often ignored, Third World is potentially explosive. In the decade ahead, developing countries must be part of the solution to many problems confronting the industrialized world—from the U.S. trade deficit to the scourge of narcotics.

The Third World covers a broad spectrum of nations that includes such new industrial powerhouses as South Korea, such nations as Mexico where economic potential is hobbled by debt, and the desperately poor lands of sub-Saharan Africa, where living standards have sharply eroded in recent years.

Difficulties of developing countries

If debt burdens are not eased soon, some Latin American countries are likely to erupt with social and political turbulence. Rather than waiting for a crisis, prompt action can prevent one. Renewing growth and investment in developing countries will restore a valuable market for U.S. exports. Thus, helping the Third World reduce its debt burden is not only charity, but also enlightened self-interest.

Sustaining the global environment provides a major new challenge in relations with developing countries. The apparent warming of the world climate is likely to widen the gap between the developed and developing world. Dealing with this issue will require urgent policy choices and new forms of cooperation by all nations. The implications of failing to act range from rising sea levels through the renewed threat of famine due to possible failures in agricultural production. Dealing with this issue will require urgent policy changes by all nations. Industrialized countries must reduce their use of energy; new energy strategies, based on highly efficient technologies, must be developed and transferred to the Third World; and developing countries must address the task of slowing and reversing deforestation.

Great advances in improving well-being have been achieved in the past three decades, but much remains to be done to alleviate poverty in the foreseeable future. Sub-Saharan Africa, where explosive population growth is combined with severe environmental degradation requires priority attention..

The shared social problems of illegal narcotics and AIDS demonstrate the Third World is not a remote concern, but part of our own lives. AIDS epidemics are apparently most serious in Africa, the Caribbean, Europe, and North America. And the rising tide of illicit drugs entering developed countries is a significant and increasingly divisive factor in relations with the developing world. Clearly, these common plaques require cooperation.

Ultimately, the developing countries themselves must take the tough steps necessary to attain growth. They must overcome formidable internal constraint arising from inefficient state economic controls. Some Third World regimes use their development problems as an excuse for human rights violation and outright corruption, which themselves retard development progress. Steps must be taken to slow rapid population growth if the task of providing jobs and meeting basic human needs is to be within the realm of the possible.

Developing countries willing to help themselves also need international support and

encouragement that the United States has failed to provide. What can the United States do given its budgetary and other constraints? Considerably more than it is doing. The United States needs a coherent, predictable, long-term program for a differentiated and much more important Third World. Sustained and rapid economic growth in this area, particularly the middle-income developing countries now heavily burdened with debt, can be a key element in reducing the U.S. trade deficit without inducing a global recession. Some of the elements in a differentiating package for the Third World should include: support for human development programs and for opening up of their economies in South Asia; long-term twenty-year commitment to accelerating African development through a major reallocation of concessional flows; specific plans for reduction of debt burdens in middle-income countries, particularly in Latin America.

A GLOBAL COMPACT

The coming of a new president to power coincides with an extraordinary opportunity to create a more open and peaceful international system. It is essential that the United States articulate a clear sense of the world it would like to see and how it would like to get there. Many other nations do not yet know what role the United States wants for itself, much less others. At the same time, these countries not only accept the idea of U.S. leadership, they see no alternative. Yet, the current push for managed trade in Washington suggests that many Americans want an aggressive internationalism with the United States pursuing more confrontational policies against new economic "enemies," above all Japan. Recurrent calls for burden-shifting and bringing home American troops suggest that others want a return to neo-isolationism.

It is the firm recommendation of this Assembly that President Bush and Congress reject those cramped visions and embrace another that is far more positive and hopeful: *shared leadership.* There must be a greater opening of foreign markets and a greater sharing of military burdens, but the United States should remain committed to the strategic vision that has been immensely successful since the war; continued world economic growth, economic stability, open trade and investment, and a more equal distribution of economic resources through higher growth rates in developing countries. To those traditional goals must now be added another rapidly growing in significance; a healthy environment.

Reaching a global compact

The industrialized democracies now face a clear and present danger that unless they soon take corrective actions at home, the imbalances could bring on a financial earthquake during the early 1990s. The first fissure already appeared during the stock market crash of 1987. Unfortunately, several of these nations have demonstrated an inability to overcome their own domestic constraints. The United States has talked incessantly about its chronic budget deficits, but those deficits are bigger today than two years ago. The agreement recently reached by the president and Congress is wholly inadequate to correct the problem. In like measure, Japan has promised to adopt a more globalized economy, but the results of its reforms—while welcome—are still inadequate.

This Assembly strongly and urgently recommends that the United States now take the lead in reaching a compact with the other industrialized democracies that commits each of them to put in place domestic measures that are desperately needed. President Bush should seize the opportunity at the coming Seven Nation Economic Summit this July to begin negotiating this compact. The G-7 mechanism for surveillance and policy coordination should be employed to monitor progress in carrying out this accord, and the IMF should be given a more prominent and transparent role in this evolving mechanism. In addition, the president should work with Congress to appoint a private bipartisan group in the United States who can work with the federal government to monitor progress. A global compact, taken seriously, would not only ensure each nation that it would realize significant benefit for taking tough political steps at home but would also provide an additional—and much needed—source of discipline upon it.

To what should the nations agree? This Assembly recommends the following measures:

The United States.—The United States must reestablish its international credibility and begin to deal with its domestic problems.

For its own sake, and for the world economy, the United States must finally put its economic house in order.

For years the nation has borrowed more than it has saved, spent more than it has earned, and bought more than it has produced. The result: a huge and growing external debt, high real interest rates, and lower investment in its markets than its competitors.

A critical first step is to balance the federal budget. We agree with President Bush's desire to first eliminate unnecessary spending. Nor would we exempt any area, including defense or entitlements, from this careful scrutiny. While respecting his desire to avoid raising taxes, and especially tax rates, we note elsewhere in this report and in the president's message to Congress an urgent need for additional expenditures in certain critical areas such as education. We believe that the funding of these essential programs and the needs of the total economy for more growth, lower interest rates, and reduced inflation will require significantly higher revenues.

This Assembly recommends, as part of a package of fiscal measures, that gasoline taxes be significantly and gradually raised as a means of achieving balance, reducing the rate of consumption growth, and lessening the nation's dependence on foreign oil, the largest American import. It must be adjusted, we agree, to eliminate regional and personal inequities—but this can be done. Adoption of a gas tax would reveal to the American people and the world that the U.S. government still has a capacity to act. We also look favorably upon "sin" taxes, a value added tax, and user fees. The sum of the new revenues raised should equal $50 billion per year. In parallel with this, a new effort is required to raise consistently the level of private American savings—and new techniques must be explored for doing this.

Japan.—Despite many changes, Japan has moved too slowly to open its borders, and resentments are building to dangerous levels. As its part of a global compact, Japan should fully and speedily carry out its own commitment to the Maekawa report, globalizing its economy. Japan should also pay special attention to a series of additional measures: reform of its distribution system; a rationalization of its land and rice policies; an increase of its official development assistance to at least 1 percent of its GNP (although the Japanese participants viewed this figure as unrealistic), all of it untied; recycling its surpluses to urgent needs in the Third World, in the form of ODA, debt relief or otherwise, on a far larger scale; a reduction in the anti-consumption bias in its tax policy; and enforcement of anti-monopoly laws.

The European Community.—President Bush should specifically welcome the economic and political integration of Europe, recognizing that it is a positive development for the United States and a contribution to world economic growth. The European Community should supplement the 1992 program with accompanying policies aimed at increasing growth. In addition, the European Community should pledge to reduce average trade barriers to the lowest level of any of its constituent members, so passing on some of the internal benefits of its growth to others. The European Community, like the United States and Japan, should also reduce substantially its subsidies and protection associated with its agricultural policy, as well as liberalize its non-traffic barriers (NTBs) and play a more concerted and constructive role in the Uruguay Round. It should make transparent and eliminate gray area measures such as inter-industry, trade-restricting arrangements. We would welcome further changes in the European Community that would allow it to speak with a single voice in international economic institutions.

These measures, taken together, should bring significant progress toward reducing the current imbalances in world trade and placing the international economy on a smoother path through the 1990s. Current imbalances are unsustainable. The United States has a keen self interest in substantially reducing its level of borrowing from overseas. It must not be forgotten that while trilateral understandings on global issues are extremely important, any viable solutions to global problems must fully recognize the interests and responsibilities of the Third World and should be implemented through multilateral institutions.

A broader agenda for the United States

Over the long haul, the capacity of the United States to play a decisive role in world leadership depends upon its political will to deal with current problems, thereby insuring its continuing economic strength. Such leadership will be substantially enhanced if U.S. real GNP grows long term at least as fast as most, and preferably all, major industrialized economies with similar per capita incomes. In addition to the measures enumerated above, this Assembly recommends that the nation adopt a sweeping series of additional changes to strengthen its competitiveness and improve its prospects during the 1990s:

Education.—While its institutions of higher education are among the finest in the world, the U.S. system of primary and secondary schools is sorely inadequate for its domestic and international needs. The nation must invest not only more money but more time on the part of parents and other adults in the education of the next generation. A radical effort to improve teacher and student performance in grades pre-school through 12 is an absolute imperative, as the effective employment of the newest education technologies, especially for continuing education.

Infrastructure.—The disrepair of many roads and bridges, growing inefficiencies in other forms of transportation, and inadequate water and sewage systems hobble the country's ability to compete. The nation must seek a national infrastructure strategy and be prepared to invest several hundred billion dollars over the next few decades.

Government Regulation.—Care should be taken that anti-trust, communication, tax, and other regulatory policies not inhibit the competitiveness of U.S. industries.

Technologies.—U.S. policies should enhance the competitiveness of its industries. Strong support should be given to lowering the cost of capital. In some cases, promotion of industry may be essential to the national interest and the United States should provide support, especially for basic and process research. A regulatory environment should be created that fosters pro-competitive cooperative activities, particularly in high-technology products and a renewed attention to long-term needs through greater investment in research and development in the private sector. In addition, the United States should act to support American companies when foreign mercantilist practices demand a response in order to avoid harm.

A renewed emphasis upon development

The burning problem of Third World debt must be urgently addressed. While a welcome first step, the Brady plan to reduce debt obligations must be pushed forward as far and as fast as possible. Expectations are high, especially in Latin America, and must not be disappointed. Twelve Latin American nations hold elections in the next eighteen months, and growth must be restored promptly to sustain democracy and stability. Mexico is the most pressing and important of these nations to the United States. Debt reduction must be accompanied by a flow of new resources and economic reforms in the debtor countries. The surplus nations, most notably Japan, must play a major role in financing debt relief, but the United States cannot be a free-rider. Given its own budget constraints, the United States should reallocate expenditures within its current aid budgets and act to expand more borrowing from international financial institutions by encouraging them to more fully utilize their guarantee authority. Reducing its own budget deficit would also lower interest rates, benefitting both ourselves and Third World debtors. It is imperative to reverse the flow of resources from South to North.

Easing the debt burden will not spur economic growth without new measures to expand trade opportunities, too. Preferential treatment for exports of the developing nations is no longer the central issue. The industrialized countries can make concessions, such as liberalization of trade in textiles and sugar as well as abolishing all barriers to exports from the poorest nations. The developing countries, however, should now be prepared to join in agreement on issues such as international investment, intellectual property, and services and expose their economies to more competition through liberalization of trade barriers and restrictions. The developing nations should also play a greater role in the formation of international economic policy as well as accepting increasing responsibilities in the system, especially the newly industrializing nations.

It should be noted that regional needs now differ somewhat for these nations. South Asia is graduating from highly concessional terms to assistance from the World Bank, and thus the resources of the International Development Assistance (IDA) and other concessional lending should be increasingly directed to Sub-Saharan Africa. The administration of the regional development banks and the specialized U.N. agencies should also be reformed to serve more effectively as bridges between the First and Third Worlds.

A new economic approach toward the Soviet Union and Eastern Europe

These nations should be more fully integrated into the international economic system to the extent that they are able and willing to accept responsibilities. We support increased contact between the Soviet Union and international economic institutions, to promote an exchange of information and discuss the rules and practices of the international economic system, though full membership is now premature. The Western democracies should seek greater economic openness and political pluralism in the nations of Eastern Europe and their expanded relations with multilateral economic institutions, recognizing the momentous possibilities that now exist there. The United States and its partners should not hesitate to differentiate between Eastern European countries in order to encourage the desired political evolution. The West should not negotiate specific new security arrangements with the Soviet Union regarding the future status of Eastern Europe, but it should make clear to the Soviets through the CSCE framework that it is not seeking to threaten Soviet security.

Reinforcing international financial institutions

The United States has not paid enough attention to multilateral institutions in the past. President Bush and leaders of other nations must take a more active role in the Bretton Woods institutions. For example, the Uruguay Round offers a major opportunity for fundamental reform of the GATT. The United States must also promptly and willingly pay its bills, ending a practice that has been embarrassing for this country. It is especially important that the roles of the participating nations reflect their economic contributions and standing. In particular, Japan is entitled to greater prominence. The United States must overcome its resistance to such changes and be willing to give up its veto power in the IMF and World Bank.

* * * * *

In all of these areas, American leadership is critical to success. While the United States is no longer dominant, it is still unique in its combination of economic strength, military power, technological prowess, and political vitality. At the same time, America must now learn to share the stage with other nations. The transition ahead will bring frequent frustrations, even acrimony, among the industrialized nations, but the United States should continue to welcome the emergence of other powers. They can and must accept some of the responsibilities as well as the costs of leadership.

Dean Acheson once wrote of the enormous excitement of being "present at the creation." Another such moment is at hand. If the industrialized democracies fail to seize the moment they risk serious global economic, political, and ecological crises within the decade. So taking advantage of the opportunity is not a choice but a major and urgent obligation. If, on the other hand, they do act together, and in cooperation with the developing nations, clearing away the imbalances of the global economy and building an open, dynamic world trading system, we could be on the verge of the most important—and most fulfilling—decade of this century, preparing a promising road for the twenty-first century.

To repeat, this is a watershed time. Failure to act would reflect a refusal to learn from history. The postwar era was built by men and women who insisted we learn from the panic, the Great Depression, and the Second World War. The world they built has served us well. The lesson of their political will, courage, and foresight is one we must now heed.

NATIONAL ADOPTION WEEK OF 1989

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of New Jersey. Mr. Speaker, there are over 2 million people in this country that want to adopt a child—prospective parents who have placed their names on an adoption agency waiting list, yearning to give a child a loving, caring home.

At the same time, there are thousands of special needs children in foster care and institutions who are legally free and waiting for permanent adoptive homes. Due to barriers in the system, however, there have been difficulties in placing these deserving children.

Another tragic fact to consider is that 40 percent of all pregnancies to teens end in abortion. Of the 300,000 babies who are carried to term and born out of wedlock, only about 5 percent are placed for adoption.

In light of these statistics, Mr. Speaker, we as a society must do more to facilitate the adoption of special needs children and promote adoption as an option for problem pregnancies.

President and Mrs. Bush, longtime advocates of adoption, have helped establish this issue as a national priority. The President has proposed a restoration of the tax deduction for adoption expenses and is working with States and the insurance industry to change policies that discriminate against adopted children with special needs.

Barbara Bush has become the honorary chair of the National Committee for Adoption and heads the committee's National Advisory Board.

There has also been legislation introduced here in Congress that would effectively encourage adoption. Two such measures—H.R. 1205 and H.R. 1669—introduced by my colleagues Mr. LEHMAN and Mr. MCEWEN respectively, help break down some of the financial barriers associated with adopting children. However, Mr. Speaker, still more must be done to ensure that institutional as well as financial barriers are removed from the adoption process.

With these concerns in mind, I am today introducing a resolution declaring Thanskgiving week as "National Adoption Week of 1989." With the support of over 100 of my colleagues, this measure is introduced to focus

public attention on the benefits of adoption for all concerned—the birthparents, the adoptive parents, and especially the children.

Mr. Speaker, I urge my colleagues to support this resolution. In my view, Mr. Speaker, nothing is more important, no one more precious, or vulnerable than children. National Adoption Week provides us with the opportunity to reflect on the many benefits of adoption and to renew efforts to bring children and adoptive parents together as a family so they can share the love that each has to offer.

TEACH YOUR CHILDREN WELL

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. MONTGOMERY. Mr. Speaker, in the Memorial Day message I recently sent to my colleagues I pointed out that we all have a duty to teach the children, to teach the children why we are a free nation, to teach the children about those who gave us our freedom.

One of the outstanding members of the Veterans' Affairs Committee, Hon. TIM PENNY of Minnesota, is the devoted father of four children. When Tim's 8-year-old son, Joey, was asked to do a report for school on "His Hero," this young man had many choices. As a sports fan, Joey could have chosen any of the superstars who play for the Minnesota Twins or the Vikings. As a member of a political family, Joey could have chosen that great Minnesotan, Hubert Humphrey, or, of course, his dad. Joey could also have chosen President John Kennedy, whose May 29 birthday he shares. However, rather than write about any of these famous Americans, all of whom certainly qualify as heroes, Joey chose to write about his uncle, Greg Penny, a Vietnam veteran. Joey's essay follows:

My hero is my Uncle Greg. He was in the Vietnam war. He went in the Army when he was 19 years old. He is 38 years old now. When he was in the war he was very brave. He and other soldiers had to fight in the jungle for many days. Some of his friends were killed. Some of his friends were wounded. Uncle Greg was wounded too. . . . . A bomb blew up by him and he was hurt in his arm and leg. He had to go to a hospital. He got better and went back to the war. After one year in Vietnam he came home. The Vietnam war ended 13 years ago. Now my Uncle Greg lives in Minnesota. He is a mailman. He has a medal for being brave in the war.

There are many ways we can observe Memorial Day on May 29. We can observe it by visiting the Vietnam Memorial with its 58,000 names of those who died in Vietnam. We can observe it by remembering those buried in the cemeteries throughout the world that are maintained by the United States. We can observe it by attending ceremonies, at Arlington National Cemetery or other national cemeteries, which honor the 600,000 Americans who lost their lives in defense of freedom during World War I, World War II, and the Korean conflict. We can also observe Memorial Day, and best honor those who died in service to our Nation, by thanking the survivors of those wars—men like Greg Penny who served with honor and who, thankfully, returned so that our children can know firsthand a true American hero. It is veterans like Greg Penny who, by their example, teach the children. It is youngsters like Joey Penny who will keep the memory alive.

DANIEL D. VILLANUEVA HONORED

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. ROYBAL. Mr. Speaker, I would like to take this opportunity to introduce Mr. Daniel D. Villanueva to the 101st Congress on the occasion of his upcoming retirement after 25 years of service to the people of Los Angeles.

Danny has been particularly instrumental in promoting the continued progress of the Latino community in Los Angeles. Since his days as an outstanding place kicker for the Los Angeles Rams, he has served as an essential role model for many young people. My own experiences with Mr. Villanueva have always been very cordial, positive, and productive. His excellent leadership on the many projects he undertakes has made him an especially valuable asset to our Los Angeles community.

The number of lives he had affected and the value of his impact to our community can never be fully measured.

Daniel D. Villanueva is currently manager of the western division of Univision Station Group, Inc. and general manager of KMEX–TV, channel 34, Los Angeles, 1 of the 10 stations of the Univision Station Group and a partner in Seven Hills Television Co. in Phoenix, AZ (KTVW).

Involved with KMEX–TV almost since its inception, Danny has worked for the past 15 years to create a Spanish language network to serve the needs of the growing Hispanic population in the United States.

He joined KMEX in 1963 as sports director, became director of community relations and news director in 1968, and station manager in 1969. Two years later, he was appointed vice president and general manager of KMEX. He was president of KMEX–TV and a director of Spanish International Communications Co. until its sale to Hallmark Cards Inc. in 1987.

He was founder and chairman of the board of Camino Real Federal Savings & Loan Association of San Fernando; former chairman of the California State Park and Recreation Commission with which he had been associated from 1963 to 1971; director of the youth program sponsored by the Ford dealers of southern California from 1962 to 1972. He founded and still serves as honorary chairman of Navidad en el Barrio Christmas telethon.

He was also president of the Mexican-American Business and Professional Men's Scholarship Association; member of the board of directors of Plaza de la Raza; member of the board of directors of the National Conference of Christians and Jews; member of the advisory committee of the Chicano Association for Student Assistance of UCLA; director of the Ruben Salazer Bilingual Education Foundation and member of the board of the YMCA; director of Salesian Boys Club, as well as the board of directors of Bilingual Foundation of the Arts.

Villanueva's current community and professional activities include service on the board of directors of the California Broadcasters Association; the National Junior Achievement; the Greater Los Angeles Chamber of Commerce; the National Hispanic Educational Fund; the American Red Cross; the East Los Angeles College Foundation; California Economic Development Corp.; and the National Association of Broadcasters.

He acted as commissioner of boxing for 1984 Summer Olympics holding a key position with the Olympic Committee.

As part of his commitment to furthering the interests of the Hispanic community and its leadership, Villanueva was instrumental in arranging and moderating an Aspen Institute conference on immigration reform. Hispanic and non-Hispanic leaders gathered at the Aspen Institute in March 1984, to discuss important issues raised by immigration and to create a consensus proposal for U.S. congressional consideration. The conference was supported by funds from Spanish International Communications Corp.

As a community service, Villanueva organized an effort to insure the Olympic Torch would travel through the predominately Hispanic Eastside of Los Angeles.

Villanueva, the son of Pilar and Primitive Villanueva, both deceased, is a native of Tucumcari, NM and was raised in Calexico. He is the ninth of 12 children.

He graduated from New Mexico State University with a bachelor of arts degree in English literature and pursued graduate studies in counseling and guidance at the same university.

A former professional football player, Villanueva was a field goal specialist with the Los Angeles Rams, 1960–1964, and the Dallas Cowboys, 1965–1967. He retired from the National Football League after the 1967 playoff game. He holds the alltime professional individual record in a season for the most points after touchdown with no misses (56), achieved when he played for Dallas in 1966. He still holds a number of L.A. Rams alltime records.

Mr. Speaker, it is a pleasure and a distinct honor for me to offer this tribute to my good friend, Danny Villanueva, on his retirement after so many years of service to the entire Los Angeles community.

SOUTHEAST LIGHTHOUSE PRESERVATION ACT

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Ms. SCHNEIDER. Mr. Speaker, I am pleased to introduce legislation today that will transfer the historic Southeast Lighthouse on Block Island from the U.S. Coast Guard to the Block Island Southeast Lighthouse Foundation. This legislation represents the first step in the rehabilitation and preservation of the

Southeast Light, one of Rhode Island's most beloved, historic landmarks.

The Southeast Light was first illuminated on February 1, 1875, and is one of the primary lights along the east coast. The lighthouse soon became a popular attraction for the increasing number of tourists that discovered Block Island in the 19th century. Both the powerful light and the dramatic structure which houses it are historically and functionally important. It is the highest in New England, visible 35 miles at sea, and its 237,000 candle-power, produced by a 1,000-watt bulb, is the strongest on the Atlantic coast.

The dramatic bluff upon which the lighthouse stands has been eroding steadily for over 100 years. Time has taken its toll on the land and now the Southeast Light is in danger of joining the many ships that have found their final resting place at the base of the Mohegan Bluffs. The Southeast Lighthouse Foundation, with the full approval of the Coast Guard, will take on full responsibility for the light's renovation—including relocating the lighthouse inland, away from the threat of the decaying bluffs—and maintenance.

Although modern electronic aids to navigation have rendered many of our Nation's lighthouses obsolete, the Southeast Light must be rescued and preserved as a monument to the dedicated and heroic efforts of the U.S. Lighthouse Service, the U.S. Coast Guard, and the people of Block Island who have saved and protected the lives of countless mariners.

We cannot stand by while Rhode Island's most visible historic symbol slips irretrievably away. My colleague, Senator CHAFEE, has introduced similar legislation in the other body, and I am hopeful that with this legislation and the commitment of the Block Island Southeast Light Foundation, the U.S. Coast Guard, the Rhode Island Historical Society, and the residents of Block Island, this important State landmark will be preserved as a monument to our maritime history.

ENCOURAGING PROJECTS TO EXAMINE THE FEASIBILITY OF "PRISON BOOT CAMPS" AT THE FEDERAL PRISON SYSTEM LEVEL

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mrs. MARTIN of Illinois. Mr. Speaker, there have been two developments this week which suggest to me the potential for a more effective law enforcement program for our Nation.

On Tuesday, CHARLIE RANGEL introduced the Correctional Alternatives Act of 1989, legislation which would allow the Bureau of Justice Assistance, over the course of the next 4 fiscal years, to make special grants available to States with innovative alternatives to incarceration for nonviolent criminal offenders.

So called prison boot camps, currently operating in seven States as a voluntary alternative to traditional incarceration for young adult offenders, are among the most interesting alternatives which the legislation would support.

Perhaps the greatest and most regrettable failing in our criminal justice system is reflected in the high rates of rescidivism characteristic of prison populations. Breaking the pattern of criminal behavior through effective rehabilitation programs must be a fundamental part of the criminal justice process. This is especially so with regard to youthful offenders—an increasing number of who are entering the criminal justice system as a result of drug related offenses. We cannot give up on these individuals. Neither can we allow them to give up on themselves.

The prison boot camps now operating specifically target impressionable young adults who have been convicted of nonviolent crimes and who have not been previously incarcerated. The camps provide an environment within which these offenders are required to participate in a regimented program involving strict discipline, physical training, and other activities characteristic of military basic training. The hope is that by instilling a greater sense of discipline, industriousness, and self-respect into the lives of these young people before patterns of criminal behavior have hardened, they can be set upon a new path while one is still open to them. It's not very subtle. It may not even be very kind and gentle, as anyone who's ever been through military boot camp could attest. It may, however, work.

The evidence we have to date, based on the seven State programs in operation, is inconclusive yet encouraging enough so that we should proceed ahead. In addition to supporting the programs now operating at the State level, it seems appropriate that we give the idea a chance at the Federal level. That's where the President's contribution to the week's positive news on law enforcement might come in.

The Federal anticrime plan which the President unveiled calls for, among other things, $1 billion for new Federal prison construction projects. The additional capacity is undoubtedly necessary and prison construction is where the lion's share of whatever money is eventually appropriated needs to go. We should, however, assure that at least some small portion of that money is designated for a pilot program to determine the feasibility of boot camp facilities within the Federal Prison System. Data suggests that there are a sufficient number of Federal offenders meeting the criteria that States now use to identify boot camp candidates to make the program workable. I say it's worth a try.

WOMEN FACE POLICE WRATH

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BURTON. Mr. Speaker, a very prominent Indian newspaper, the Tribune, which is based in Chandigarh, ran a story which should disturb all Members of Congress concerned about human rights abuses around the world. The Indian authorities are either out of control in their terrorizing of a largely innocent Sikh population or they are directed by the Central Government in New Delhi. Both of these contentions are unacceptable. I, again, call upon the Indian Government to respect the human rights of Sikhs living in the Punjab. I am placing in the RECORD an article which documents the terror:

[From the Tribune, Chandigarh, Panjab, May 1, 1989]

WOMEN FACE POLICE WRATH

(From Ramesh Vinayak)

AMRITSAR, April 30.—An aged widow, Surjit Kaur, and her two daughters Savinder Kaur (21) and Narinder Kaur (18)—were beaten up and tortured by a police party headed by the SHO of the Beas police station at Butala village.

Although more than a week has elapsed since the incident, the family is in a state of shock.

When this correspondent went to the village, none of the victims would come forward to narrate the event after much cajoling by a group of villagers. Savinder Kaur and Narinder Kaur mustered courage to speak.

The two sisters, who still found it difficult to stand, broke down occasionally. The family has no adult male member. The father, Sohan Singh, died of cancer three months ago leaving behind four daughters and two sons aged six and nine.

Savinder Kaur, who is a matriculate, said on the evening of April 20, a number of policemen and CRPF jawans surrounded their house. Six policemen entered the house and dragged out the women in the courtyard. While they spared the boys and the eldest daughter. Paramjit Kaur, who has been bed-ridden ever since she donated blood to save her father, they beat up the mother and Savinder Kaur and Narinder Kaur charging them with harbouring terrorists. The mother was spared after a sound bashing.

"We were partly unconscious when we were made to lie prostrate on the ground. A heavy log was placed on our legs with two policemen pressing heavily on it before we fainted", recalled Savinder Kaur with tears in her eyes.

"After we regained consciousness, the policemen sprinkled salt in our eyes. All pleadings by our elder sister in bed to have mercy were greeted with filthiest abuses from the cops", said Narinder Kaur.

After two hours of torture, the two sisters were put into a police vehicle and taken to the Beas police station. There they were again questioned by the police which kept accusing them of sheltering terrorists Balwinder Singh Shapuri, Harbhajan Singh, Satnam Singh and Khajan Singh.

As news about their arrest reached the village sarpanch. Mr. Gurdeep Singh, accompanied by the panches and village elders, he reached the police station and pleaded for their release. The constables on duty not only refused to listen to them but also accused them of defending the girls, who they said, had "illicit" relationship with terrorists.

The girls release could not be secured as the police officials were away to the Jandiala police station to celebrate the promotion of their colleague. The following day, the village leaders approached the officials concerned who agreed to release the girls on the condition that the family immediately abandoned the farmhouse on the outskirts and shifted to the village.

The Majitha police district chief, Mr. G.S. Mann, when contacted, feigned ignorance about the incident.

In another incident, Kuljit Kaur wife of Khajan Singh of Sattowal village, was ar-

rested some time back. She was rounded up on April 19 and tortured at the Mehta police station throughout the night. On intervention by villagers, she was let off and has since been staying with her parents.

A woman of Dharde village was meted out a similar treatment last week on the suspicion of harbouring terrorists.

Many villagers allege that the youth are time and again arrested and tortured and then let go after payment of bribe. The bribe paid vary from Rs 10,000 and above.

INTERNATIONAL YEAR OF BIBLE READING

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. GARCIA. Mr. Speaker, this resolution designates 1990 as the "International Year of Bible Reading." Through reading and studying the Holy Scriptures people can find answers to their problems. History has clearly illustrated the fact that the Bible has had a profound influence on our Founding Fathers in shaping the direction of our country as well as on the lives of individuals, families and societies in many parts of the world. The Bible provides a major source of hope and strength. A renewed knowledge and faith in God through the Holy Scriptures can strengthen the family of nations and their respective people.

H.J. RES. —

Whereas the Bible, the Word of God, has made a unique contribution in shaping the United States as a distinctive and blessed Nation and people;

Whereas deeply held religious convictions springing from the Holy Scriptures led to the early settlement of our Nation;

Whereas many of our great national leaders, such as Presidents Washington, Jackson, Lincoln, and Wilson, paid tribute to the important influence the Bible has had in the development of our Nation;

Whereas President Jackson called the Bible "the rock on which our Republic rests";

Whereas the history of our Nation clearly illustrates the value of voluntarily applying the teachings of the Holy Scriptures in the lives of individuals, families, and societies;

Whereas the Bible has had a profound positive effect in the shaping of individuals, families, and societies in many parts of the world;

Whereas the Bible provides a major source of hope for the poor and repressed peoples of the world;

Whereas the family of nations now faces great challenges that will test international relationships as they have never been tested before;

Whereas the renewing of knowledge and faith in God through Holy Scripture reading can strengthen the family of nations and their respective people; and

Whereas numerous individuals and organizations around the world are joining hands to encourage international Bible reading in 1990: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That 1990 is designated as the "International Year of Bible Reading". The President is authorized and requested to issue a proclamation recognizing both the formative influence the Bible has had on many societies of the world and the need for worldwide study and application of the teachings of the Holy Scriptures.

ARAFAT ON THE PLO CHARTER

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. FRANK. Mr. Speaker, earlier this month, along with my colleagues from Michigan [Mr. WOLPE] and Connecticut [Mr. GEJDENSON] I inserted into the RECORD material which demonstrates the extreme inconsistency and ambiguity with which the PLO has expressed itself concerning the right of Israel to exist within secure borders. Recently, I received a compilation of statements that have been made by Yasser Arafat within the past few weeks. And these statements deepen my dismay over Arafat's failure to consistently, clearly, and forthrightly make the statements about Israel's right to exist and his opposition to terrorism that we have a right to expect.

For instance, I was especially disturbed to read in this compilation several statements by Mr. Arafat which wholly inaccurately describe aspects of Israeli society—a nonexistent sign that he claims hangs in the Knesset, an inaccurate discussion of the Israeli flag, and other matters.

Grave damage can be done to the prospects of peace in the Middle East if Arafat succeeds in saying one thing to the West when it is covenient and quite a different set of things for consumption of his constituency in the Arab world. I think it is important for us to insist that he be held to a far higher standard of clarity and consistency than he has so far shown.

And I ask that the compilation of statements which was passed along to me by Consul General Arthur Avron of the Israeli Consulate in Boston be printed here.

ARAFAT ON THE PLO CHARTER

In an interview with Radio Monte Carlo (May 3), Yasser Arafat made the following statements:

Q: "You said in French that the charter is 'caduque', that is to say nullified . . ."

Arafat: "That is your translation. Would it make sense for me to teach you how to translate?"

Q: "Let's say that it has expired (Arabic: Faata 'Alaiha al-Zaman) . . ."

Arafat: "It has aged (Arabic: Taqaadamat)."

Q: "Fine, the translation is 'it has aged'."

Arafat: "The word 'taqaadamat' appears in many verses in the Koran with regard to other (earlier) verses. Does this mean that these other verses were nullified? No."

Q: "If the charter can be amended only by the PNC, are you ready to convene a meeting on the issue? Is there a possibility . . ."

Arafat: "Can anyone claim that it is possible to change something adopted by the PNC not by means of the PNC members, whether it concerns political decisions, the declaration of independence, or the charter?"

ARAFAT: STATEMENTS AND CONTRADICTIONS

The following are a few examples of the contradictions which are found in remarks made recently by PLO Chief Yasser Arafat:

On Amending the PLO Covenant:

Statement: "As for the Covenant, I believe there is an expression in French, 'C'est caduque' [meaning: null and void]." (May 2, 1989, French Television TF1)

Contradiction: "I haven't the authority to effect changes in the Covenant by myself." (April 29, 1989, "Le Figaro")

"This Covenant may only be amended with a majority of two-thirds of the total number of members of the National Assembly of the Palestine Liberation Organization at a special meeting called for that purpose."

(From Article 33 of the PLO Covenant)

On the Pursuit of Peace:

Statement: "Our desire for peace is a strategy and not an interim tactic. We are bent on peace, come what may, come what may. . . ." (Geneva press conference, December 14, 1988)

Contradiction: "An escalated struggle, an intensification of the uprising, continued martyrdom, and an expansion of the confrontation will bring us our final victory."

(December 15, 1988, "Voice of Palestine" Radio, PLO, Baghdad)

"The Palestinian uprising will in no way end until the attainment of the legitimate rights of the Palestinian people, including the right of return."

(January 13, 1989, Qatar News Agency)

"I didn't change my policy and didn't surrender to the American demand, and conditions—the U.S. has changed its policy." (December 23, 1988, "Al-Qabas", Kuwait)

On renouncing terrorism:

Statement: "We totally and absolutely renounce all forms of terrorism." (Geneva press conference, December 14, 1988)

Contradiction: Q: "Mr. Arafat, last week at this famous press conference you renounced terrorism. Have you done this due to American pressure?

A: "I did not mean to renounce. . . . Actually, I only repeated what our Palestine National Council had accepted. . . . I am still now committed to what I said in Cairo in 1984." (December 19, 1988, Interview with Viennese TV)

On Acceptance of UN Resolutions 242 and 338:

Statement: "I also made reference to our acceptance of resolutions 242 and 338 as the basis for the negotiations with Israel within the framework of the international conference." (Geneva press conference, December 14, 1988)

Contradiction: "The acceptance of Resolution 242 by the PNC is conditional upon these three principles—a Palestinian state, self-determination, and the right of return." (January 5, 1989, Speaking in Abu Dhabi, Middle East News Agency)

On Freedom of Expression for Palestinians:

Statement: "Their [the Palestinian people's] human dignity shall be safeguarded under a democratic parliamentary system of government built on freedom of opinion." (December 13, 1988, Speech before UN General Assembly, Geneva)

Contradiction: "Any Palestinian leader who suggests ending the intifada exposes himself to the bullets of his own people and endangers his own life. The PLO will know how to deal with him." (January 3, 1989, "Al Anbaa", Kuwaiti Daily)

"Whoever thinks of stopping the intifada before it achieves its goals, I will give him ten bullets in the chest." (January 1, 1989, Speaking in Riyadh, quoted by the Spokes-

man of the U.S. State Department on January 19, 1989)

The following are a few examples of disinformation which appear repeatedly in Arafat's interviews and statements:

Statement: "Look at the Israeli flag: the two blue stripes bordering the 'Star of David' are meant to symbolize the Nile [in Egypt] and the Euphrates [in Iraq]. This illustrates the 'Empire of Israel.'"

(April 29, 1989, Interview in "Le Figaro")

Fact: The following account on the symbolism of the Israeli flag was given by the flag's designer, David Wolfsohn, after it first appeared at the Zionist Congress in Basle in 1897: ". . . Then an idea struck me. We have a flag—and it is blue and white. The 'tallit' (prayer-shawl) with which we wrap ourselves when we pray: that is our symbol. Let us take this 'tallit' from its bag and unroll it before the eyes of Israel and the eyes of the nations. So I ordered a blue and white flag with the Shield of David painted on it. That is how our national flag came into being. And no one expressed any surprise or asked whence it came or how."

Statement: "For more than 15 years, a sign has been hanging over the entrance to the Israeli parliament which reads 'The Land of Israel extends from the Nile to the Euphrates.'"

(April 29, 1989, Interview in "Le Figaro")

Fact: The Israeli Knesset (Parliament) is open to the public, and the entrance is in full view of the visitors. No such sign exists nor has it ever existed.

Statement: Q.: "And the hijackings, which stained the 70's with blood—do you not feel that these were mistakes?" A.: "I was against this from the very beginning, and there are documents to prove it."

(April 29, 1989, Interview in "Le Figaro")

Fact: Arafat became chairman of the PLO, and commander of its armed units in early 1968. Very soon thereafter, on July 23, 1968, a PLO terror group carried out the organization's first hijacking—an attack against an El Al plane which was forced to land in Algeria. Numerous PLO hijackings have since taken place. As late as April 1, 1986, a unit of the Hawari Apparatus detonated a bomb aboard a TWA plane, killing four persons, including a mother and her infant daughter who were sucked out of the aircraft. The Hawari Apparatus has been identified by the U.S. Defense Department (Terrorist Group Profiles, U.S. Government Printing Office, 1988) as a 'FATAH' unit under Arafat's command.

FOOD IRRADIATION SAFETY AND LABELING REQUIREMENT ACT

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BOSCO. Mr. Speaker, today I am reintroducing legislation along with 53 of my colleagues to curb the use of food irradiation until safety assurances about this controversial technology have been clearly explored. Senator MITCHELL is introducing identical legislation in the Senate.

Food irradiation is a preservation method in which food is exposed to gamma radiation in order to destroy insects and bacteria that can cause food spoilage and disease. The Food and Drug Administration in recent years has moved to broaden the permitted use of irradiation to include dried herbs, spices, pork, fresh produce, and grains.

Proponents of the process contend that the extended shelf-life of radiation-treated foods may help boost exports, and that dependency on post-harvest pesticides may be reduced. However, many scientists, public officials and consumers are growing increasingly concerned about the use of food irradiation especially since no conclusive studies have been conducted to determine the potentially harmful impacts of this process.

This legislation authorizes the National Academy of Sciences to conduct a comprehensive study to assess the various unresolved safety and health questions of food irradiation, including an analysis of environmental consequences. The legislation would also prohibit the irradiation of pork and produce and tighten the labeling requirements for irradiated herbs and spices.

Current information on the long-term health effects of human consumption of irradiated foods is simply insufficient. Although the Federal Government has studied this procedure for more than 40 years, definitive results have proved rather elusive. In fact, when traditional means of testing the safety of irradiated foods proved inadequate, the FDA approved the use of irradiation on pork and produce—in July 1985 and April 1986 respectively—based on theoretical calculations of radiation chemistry and on the anticipated low-level of human exposure to the unique chemical constituencies of irradiated foods. In other words, the FDA apparently concluded that irradiated foods should be safe, even though there is no concrete evidence to backup this assumption.

The irradiation of foods results in a notable loss of nutritional value, and may actually increase the risk of food poisoning since the process removes the odorous bacteria that warns of food spoilage and leaves dangerous levels of botulinum and other bacteria intact.

Food irradiation also requires the use, transportation and disposal of large quantities of highly radioactive cesium-137 and cobalt-60. Irradiation processing plants will dramatically increase the amount of radioactive materials in and around our communities and will increase the likelihood of an accident at which radiation is emitted. Waste from these plants must be handled like any other highly radioactive material and will compound the current crisis of radioactive waste disposal.

Mr. Speaker, for these reasons I believe that a more prudent approach to formulating food irradiation policy is in order. Based on our limited understanding of the potential harmful implications of food irradiation, I believe Congress would do well to hold the process in abeyance until these unresolved safety concerns have been sufficiently addressed. This bill is endorsed by the National Coalition to Stop Food Irradiation, Food and Water, and the New York Public Interest Group. I invite my colleagues to join me in supporting this important legislation.

UNRESTRAINED CLEARCUTTING IN OUR NATIONAL FORESTS MUST STOP

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BRYANT. Mr. Speaker, I am today introducing the Clearcutting Restraint Act of 1989 to restrict the practice of clearcutting as a method of timber harvesting in America's national forests.

Clearcutting is the practice of completely destroying a forest stripping it of every standing tree and reducing it to a muddy field in an effort to take from it every commercially valuable stick of timber.

This practice results in fields and mountainsides stripped bare of everything but tree stumps. It is a sight that is shocking to see and anyone who sees it knows instinctively that it cannot be a prudent method of managing the national forests that belong to the American people.

In 1988, the U.S. Forest Service allowed 283,061 acres in our national forests to be clearcut. Anyone who has ever seen the aftermath of a clearcut is astonished to learn that the Forest Service regularly permits this practice.

I have seen portions of Texas national forests turned into barren fields of mud and stumps, and I have rounded a mountain while hunting on horseback to see an entire mountainside across the valley stripped of every tree in the Lolo National Forest of Montana.

Clearcutting is a wasteful and irresponsible practice that is a relic of a time when Americans thought our supply of natural resources was without limit.

Clearcutting and the intense site preparation that follows a clearcut is specifically designed, through bulldozing and burning, to remove all vegetation which would compete with the short-term growth of a single species of tree to be replanted. In the South, for example, this is always pine. In the Northwest, it is often Douglas fir.

This practice must be stopped because it is enormously wasteful. In a clearcut, all trees are cut down, even if they are not commercially mature trees. If they are not commercially useful, they are burned.

It is not economical, the Forest Service's own studies conducted at the Crossett Experiment Station in Crosset, AR, concluded that clearcutting is not the most cost-efficient method of forest management.

And clearcutting ignores the need for natural species diversity as a requirement for a healthy forest and environment. Clearcutting totally eliminates species diversity of plants and animals. A live, healthy forest is replaced after a clearcut with a single species tree plantation, which forest experts believe loses its immunity to natural infestations of tree killing pests, such as the southern pine beetle.

There is a responsible alternative to clearcutting. It is selection management, a method of forest management in which selected trees are taken out of a stand of forest according to their commercial suitability and the impact

their removal would have on the health of the remaining forest.

It is the management method now used on 80 percent of the privately held forest land in the South, and it is widely recognized as the most responsible and ecologically sound and economical method of forest management.

The legislation which I will introduce would prohibit clearcutting or related even-age management techniques in any national forest in America in which one-tenth of the acreage of available commercial timberland in that forest has already been removed by clearcutting or related techniques. It would require the Forest Service to utilize selection management techniques of forest management, which emphasize the preservation of diversity of species of trees, other plants, and animals.

It is important to emphasize two things.

First, these national forests belong to the American people. They should be managed in the interests of the American people and in pursuit of the maintenance of goals for our national forest now in the law: Recreation, wildlife, watershed protection, grazing, as well as timber production. Clearcutting is inconsistent with all these goals.

Second, this legislation applies only to national forests. It does not affect privately held land. Private landowners will continue to be able to do as they please with their forests. Surely, it is in our publicly owned national forests that we should be able to guarantee responsible management of our forests.

I welcome the support of the Audubon Society, the Wilderness Society, the Environmental Policy Institute, and the Friends of the Earth, as well as other environmental and conservation groups, for this legislative initiative.

I would like to add that earlier this year, I visited the Amazon region of Brazil and participated in multiple meetings with Brazilian officials in which the United States delegation complained about the destruction of the rain forest there. It will continue to be impossible to lecture other regions of the world about natural resource protection, about the dangers to the world of stripping our forests bare, as long as we continue to pursue wasteful forest management practices ourselves. This was pointed out to us at every single meeting there.

It is particularly difficult to point the finger elsewhere when it is pointed out that the study of Dr. Jerry Franklin of the University of Washington, one of the leading experts, concluded that only two or three million acres of America's ancient forests remain. These are being logged at the rate of 60,000 acres per year.

Surely, the responsible step we hope to take by enacting this bill is the least we can do to begin to manage our own forests responsibly.

As I introduce this measure, I would also like to call the attention of my colleagues to an article about the cost-effective nature of selection management by Bill Carroll, a consulting forester in Huntsville, TX.

SELECTION MANAGEMENT IS MORE COST EFFICIENT

(By Bill Carroll)

Defenders of dominant even-age logging (clearcutting, seed tree, and shelterwood) continued to argue that selection management, the alternative favored by environmentalists, many practicing foresters, and many timberland owners, is not economically feasible.

The Forest Service made that point in our 1988 Texas trial, but Dr. James B. Baker, their leading expert on the issue, had written articles showing that selection management is more cost efficient and has a higher benefit/cost ratio. Although the Forest Service presented Baker as their witness, it was the citizens groups suing the Forest Service who introduced his writings in evidence. Baker's studies confirmed the position of the citizen groups. Therefore, Judge Robert M. Parker found selection to be cost efficient for production of timber as well as essential for survival of the Red-cockaded woodpecker.

Let's take a look at Baker's 1985 study, "Uneven-Age Stand Management on the Crossett Experimental Forest." Crossett, Arkansas, is the research station that Baker directs as a Forest Service researcher. In his article, Baker uses the term "uneven-aged" interchangeably with "selection."

Before digesting Baker's figures, we should note that Baker did not attempt to cover environmental values, like wildlife, recreation, soil, water, air quality, native diversity, and natural beauty. As a forester, I consider these values to have great importance in private forests and dominant weight in public forests. Baker, himself, noted that selection is beneficial because of those values. But, of necessity, he confined his figures to wood and dollars. Even there, selection forests surpassed plantations.

Baker found that a conventional selection pine stand had a cost efficiency of 143.2, board feet per dollar, far surpassing the 55.2 of a typical even-age plantation. Loblolly and Shortleaf pine dominated both stands. The selection stand began in a cut-over condition on a poor site. The plantation began as a clearcut.

In forty years of actual growth (projected by Baker to fifty years), the selection stand produced 17,618 board feet of sawlogs per acre, compared to 11,920 for the plantation. Baker divided those figures by the discounted dollars spent on each stand to reach the cost efficiencies of 143.2 and 55.2, a 2½ to 1 advantage for selection.

In total wood production, adding pulp and posts to sawlogs, Baker found the cost efficiency of selection to be 33.4 cubic feet per dollar, more than 12% better than the even-age plantation, at 29.6.

Baker also made economic comparisons under two other standards: benefit/cost and present net value. Selection has a benefit/cost ratio of 3.76. Plantations lag about 20% at 3.05. Baker obtained these figures by dividing the discounted values of all returns by the discounted value of all costs.

The present net value came out $341 per acre for selection and $444 for even-age plantation.

In 1986, Baker wrote a follow-up article, "Production and Financial Comparison of Uneven-aged and Even-aged Management of Loblolly Pine." There, he came up with similar comparisons, plus more explanation, including:

"The high net present value for even-aged plantations is misleading in that it resulted more from the relatively large investment required by the system than from its efficiency. The results of this comparison indicate that a landowner should select this system only if he desires one of the noneconomic benefits associated with it—such as maximum total output or production, the opportunity to plant superior seedlings, or ease of management."

Under the multiple use and other concepts in our national forests, "maximum total output", "superior seedlings" and "ease of management" should give way to public benefit. Furthermore, the Forest Service's use of "superior seedlings" on a grand scale is reducing our native diversity and is saddling our timber stock with strains that are more susceptible to insects and diseases.

Baker also made comparisons of two other categories, selection with low stocking and shelterwood with natural regeneration. The former is hypothetical and the latter is seldom, if ever, used with natural regeneration in the national forests in Texas. His results on the shelterwood are not comparable because the figures began after the young pines were established, thus affording a head start of several years. Shelterwood came in a weak second in cost efficiency as to sawlog production and a strong first in benefit/cost.

Outside the South, the Forest Service generally employs only the present net value approach. I consider PNV to be inappropriate on the national forests or in any event less appropriate than cost efficiency.

Dr. Baker has pioneered his computations in a realm generally ignored by line officers, his counterparts in the Forest Service. As a result, we no longer have to accept, at least not in the South, the hackneyed claim that selection is not economically feasible in national forests.

As a former forester for Louisiana Pacific Corporation, I know that this company is practicing selection under forest-wide regulations on almost a million acres throughout the South. It is doing so for economic reasons—to save the substantial costs of site preparation and planting.

From Texas to Georgia, Larson-McGowin is practicing natural stand management on about 85% of the forests that they manage. Deltic Farm and Timber Company is doing likewise on over 300,000 acres of its forests in Southern Arkansas. Gibbs Brothers has practiced selection management for 40 years on 50,000 acres in Walker County, Texas, as have owners of a million acres of non-industrial forests in the South. I know of other owners, large and small, who employ selection management in Vermont, Michigan, Wisconsin, California, and Oregon. If it weren't economically favorable, most of them wouldn't be doing it.

I present Dr. Baker and the private selection managers as examples to the Forest Service to foresake the "ease" of even-age and to vastly increase their selection forests, even if it requires more training for their foresters. The Forest Service could shift mainly to selection in 12 to 20 years, some of which could start as soon as the agency agreed. I realize that there are occasional situations, like severe damage, where a stand should be managed under even-age. But in most places, the Forest Service has gone overboard for even-age. In Texas national forests, the available commercial timberland is 100% on even-age, of which 60% is clearcutting. From my observations, 15% is the maximum justifiable, if that much.

In my opinion, the real reason for Forest Service insistence on even-age logging has nothing to do with the feasibility of selection. It actually stems from the fact that the Knutson-Vandenberg Act enables the agency to allocate timber sale receipts to site preparation and planting, including funds for overhead. Few bureaucrats could

resist such a budgetary incentive. Selection management involves no expenditures for site prep and planting, and thereby does not offer this huge budgetary plum.

In addition to sale of timber, selection management produces other income, such as payments for superior hunting privileges. I have mentioned the environmental advantages of selection. Space does not allow me to cover these advantages here, but I will make a prediction. As more computations become available, like those reported by Baker, we should look forward to a considerable replacement of even-age by selection management from coast to coast.

GORBACHEV AND NATO

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BENNETT. Mr. Speaker, I include for the record at this point an able article by J.D. Hittle (U.S.M.C., Ret.) that every thoughtful American should read.

He points out that bringing down the tactical nuclear deterrent of short-range nuclear weapons in Europe prior to equalizing conventional NATO strengths to offset Warsaw Pact conventional strengths could be very dangerous for NATO. General Hittle emphasizes that "even accepting the Soviet reduction figures still leaves the Warsaw Pact with a heavy conventional arms superiority over NATO."

In view of this Warsaw Pack's conventional superiority, General Galvin said that for now "we must rely on our short-range nuclear forces." NATO would be clearly imperiled if we abandoned these nuclear tactical weapons without bringing about conventional parity.

General Hittle's article follows:

[From the Navy Times, May 22, 1989]

GORBACHEV SUCCESSFUL IN THROWING NATO INTO DISARRAY

(By Gen. James D. Hittle, USMC (Ret.))

There can be valid disagreement as to whether Mikhail S. Gorbachev will succeed in salvaging—let alone reforming—the Soviet economy. But, on one count he already must be judged a stunning success.

He has NATO in disarray. In so doing, he has accomplished what his communist predecessors from Stalin to Chernenko were unable to do—undermine the essential unity of the western alliance. This has been, since its founding after WWII, the protective shield of the United States and the Western European free nations in blocking communist aggression.

It was the common threat of Russian expansion that was the glue that bound together the NATO alliance. With his perestroika and glastnost, Mr. Gorbachev has provided NATO's wishful thinkers a "justification" for playing down, even rejecting, the sound strategic thinking on which the viability of NATO has long rested. His promised arms reductions simply added to the euphoria. All too few in the West gave them even a cursory analysis. Even accepting the Soviet reduction figures still leaves the Warsaw Pact with a heavy conventional arms superiority over NATO.

It is in this potentially dangerous circumstance that a rift has opened in NATO. Germany, with powerful eastward looking elements flexing their power, advocates deferring the deployment of a replacement for Lance, which is NATO's current, and aging, battlefield nuclear missile. In view of the Warsaw Pact's conventional superiority, the defense of the West depends heavily on a modern nuclear battlefield missile. Army Gen. John Galvin, the supreme allied commander in Europe, stated bluntly that "we must rely on our short range nuclear forces."

West Germany is not only urging deferment of replacing the Lance missile, but wants to move even further toward the Soviet position by pushing a negotiated agreement with Russia for reduction of battlefield nuclear missiles. Such a negotiated reduction of short-range missiles is viewed by many NATO supporters as virtually conceding the Soviet Union a conventional rollthrough victory against NATO.

Such fundamental differences in NATO can't be papered over and minimized. Already Mrs. Thatcher, the British Prime Minister, has personally met with Chancellor Helmut Kohl of West Germany and the meeting, according to press reports, simply reaffirmed their differing positions.

Underlying the seriousness of the disagreement, NATO nations have begun choosing up sides. According to the New York Times, three countries have openly lined up against West Germany: the United States, Britain and the Netherlands. The following are considered to be generally supporting the West German position: Belgium, Denmark, Greece, Italy, Norway, and Spain. That leaves Canada, France, Iceland, Luxembourg, Portugal and Turkey on the fence. What side they finally come down on remains to be seen, and could be decisive in this crucial issue.

Yet, however the battlefield nuclear missile issues comes out, the bed-rock problem won't easily go away. Western Germany, a pivotal power in NATO, is once again gazing eastward with unveiled interest. This, in itself, warrants more attention than it is getting. What is it that holds such a fascination for Germany beyond her eastern borders? In a sense, Germany's fixation on the lure of the East has much in common with the legendary moth and the flame.

Twice in this century Germans have fought major and immensely costly wars with the Russian colossus. After WWI, a defeated Germany, smarting under the military limitations imposed by the Treaty of Versailles, joined communist Russia in economic and military cooperation that laid much of the foundation for Germany's emergence prior to WWII with surprising military effectiveness. What happened after WWI is intriguingly similar to what is going on now between the USSR and West Germany. Then, Lenin needed help from an industrialized country. Germany fit the need.

As early as 1921 Germany and Russia began planning for German industrial activity in Russia. German specialists were soon supervising ammunition production in Russia, and Junkers began aircraft production in Kiev and Kharkov. This was followed by German tank, aviation and other training in Russia, including joint Russian and German maneuvers. This cooperation, continued into the Nazi period. The eminent British author and student of that era, J. W. Wheeler-Bennett, underlined the continuing importance of Soviet-German cooperation, writing that the early German moves after WWI toward Russia "were the first links in a chain of events which led to the Nazi-Soviet Pact 20 years later."

History may not repeat, but similar threads continue to run throughout similar circumstances. The question is whether the Soviet Union, again needing outside economic help, will rekindle the flame of German venturing to the East, and if so, does West Gemany harbor, deep in her national instincts, a grand eastern-oriented dream of a German-Soviet reapproachment, unification with East Germany, economic cooperation, and eventually an alliance that would make Germany, and the USSR, the most powerful nations in Europe, if not the world.

This is speculative, but there is a reality to the present German eastward shift. Gorbachev has achieved the heretofore unattainable Soviet objective, the present disarray of NATO, and has set the stage for the potential disolution of this great and noble alliance that has been the protecting bastion of western civilization. On this, Soviet President Gorbachev must be getting high marks on his Kremlin report card.

RENEW THE U.S. CONTRIBUTION TO THE U.N. POPULATION FUND

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. MOODY. Mr. Speaker, each year, 14 million children worldwide die of hunger-related causes. Even now, 800 million people live in absolute poverty, unable to meet minimal nutritional needs. A total of 1.3 billion people do not even have safe drinking water.

The United States appropriates millions of dollars for humanitarian assistance to address these problems in developing nations. Yet since 1985, the United States has withheld contributions to one organization that helps people in more than 140 Third World countries. That organization, the U.N. Population Fund [UNFPA], is the largest internationally funded source of aid to population and family planning programs worldwide. It supports projects ranging from maternal and child health care to programs integrating family planning with parasite control to expanding contraceptive services to training nurses and doctors.

To U.S. Agency for International Development [AID] has been withholding our $25 million earmark each year because it determined that UNFPA helps manage China's population program, which AID asserts is coercive. The facts do not support this assertion.

UNFPA contributes only 1 percent of China's $1 billion population fund. This assistance takes the form of training Chinese doctors, technical advice for census taking, building factories to manufacture contraceptives, et cetera. UNFPA states that it does not support coercive policies anywhere. In fact, UNFPA's program was approved by its 48-member Governing Council, of which the United States is a member.

Development assistance should not become a pawn in a political game. Problems with China should be taken up directly with the Chinese Government and not used as reasons to weaken UNFPA. In this case, allegations of coercion are serving as an excuse for AID to cut off family planning to all countries receiving aid from UNFPA.

The real losers are countries like Bangladesh, Haiti, and others relying upon UNFPA to help them establish population programs and family planning services. Some additional industrialized countries have stepped up their contributions to UNFPA to fill the void left by the U.S. withdrawal, but the need for assistance is increasing all the time, too.

In the 100th Congress, the Senate Foreign Affairs Committee approved language restoring the U.S. annual contribution to UNFPA. However, the Senate bill never came to the floor and the fiscal year 1989 foreign aid bill was approved without instructions requiring AID to distribute funds to UNFPA.

The House foreign assistance authorization is in flux this year, but we will continue to urge the Foreign Affairs Committee to include such instructions in the fiscal year 1990 bill.

But the need for this assistance is crucial. Today, as a demonstration of our concern about this much-needed program, I am introducing a sense-of-Congress resolution with Representative JOHN PORTER and 30 of our colleagues that endorses renewed U.S. contributions to UNFPA. I hope the rest of our colleagues will join us as cosponsors of this demonstration of support for a vital component of development assistance.

PUGET SOUND TANKER SAFETY ACT OF 1989

HON. JAMES A. McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. McDERMOTT. Mr. Speaker, the more we learn about the March 24 oilspill in Prince William Sound, AK, the clearer it becomes that we must take strong measures to protect our waters from this kind of catastrophe. The cleanup effort now underway would have been far less difficult if effective contingency planning had been done in advance, and if existing plans had been implemented when the spill occurred. More important, the spill might not even have occurred if proper preventive measures had been in place.

Today, Congressman NORM DICKS and I are introducing H.R. 2423, the Puget Sound Tanker Safety Act of 1989. This legislation, based on the bill introduced in the Senate by Senator BROCK ADAMS, is intended to help reduce the chance of another major oilspill, and particularly to protect the waters of Puget Sound.

Disastrous as the *Exxon Valdez* spill was for south-central Alaska and its waters, such a large spill would have been truly catastrophic if it had occurred in Puget Sound. Eleven million gallons of oil would have literally covered the surface from shore to shore, remaining for weeks and perhaps months because of inadequate tidal flushing.

Tankers move regularly through the Strait of Juan de Fuca, Rosario Strait, and Puget Sound to the five refineries located on our shores. We have experienced several spills in recent years, but none yet approaching the magnitude of the Alaska spill. Although many people have worked long and hard to clean up previous spills, we cannot be confident that existing response measures would be adequate for a spill as large as the one Prince William Sound experienced.

We also can have no confidence that present tanker design and construction gives maximum protection against major spills. Most tankers using our waters have single hulls, even though there is strong evidence that the use of double hulls would reduce oilspills in case of accidents at a very reasonable additional cost. As long ago as 1973, when it authorized the Trans Alaska Pipeline System, Congress was assured that new tankers carrying oil from Valdez would have segregated ballast systems including double bottoms. Former Senator Warren Magnuson fought for years to require double hulls on new and rebuilt tankers. So did Congressman NORM DICKS and Transportation Secretary, now Senator, BROCK ADAMS. But the Reagan administration dropped this proposed requirement after lobbying by Exxon and other oil companies.

No one can guarantee that a double hull would have prevented or reduced the *Exxon Valdez* spill. But in 1975 the Office of Technology Assessment found that:

Double sides and double bottoms can distinctly provide protection, given a collision or grounding respectively. Moreover, in the more severe cases of collisions and groundings where the inner hull may be ruptured, the double hull or double bottoms will provide three valuable characteristics: survivability, containment, and time.

To this day, I know of no evidence contradicting those conclusions.

That is why this bill requires double hulls on all new or rebuilt tankers operating in U.S. waters, regardless of where they were built. Double hulls will not prevent every spill, but the evidence seems persuasive that they will help a great deal. I believe the discussion of double hulls must resume as part of our examination of oilspill prevention, and this bill puts the issue before us again. In that regard, I think the article in the May 15 New York Times by Matthew Wald, "A Debate on Double-Hull Oil Tankers" is important reading for all of us, and I ask unanimous consent that its text be inserted in the RECORD at the conclusion of these remarks. This article reports the opinions of several experts that a double hull might have prevented the *Exxon Valdez* spill.

The bill we are introducing also requires specific preparedness and planning measures for Puget Sound tanker traffic, supervised and enforced by the Coast Guard. It requires that necessary equipment be available and in working order. It requires annual practice drills to assure that contingency plans can be carried out. It makes these plans and equipment inventories available to the public, to improve our confidence in the safety of Puget Sound tanker traffic. Along with other measures like full coverage by the Coast Guard vessel tracking system, regular safety inspections of tankers entering our waters, and improved pilotage requirements, it will go a long way to protect our waters.

We cannot afford to risk another *Exxon Valdez* spill anywhere in the world, and most especially in the vulnerable waters of Puget Sound. Senator ADAMS, Congressman DICKS, and I see this legislation as an important step toward the most effective oilspill prevention and response system we can develop, for the sound and for the rest of our Nation. It is not the full answer, and I look forward to working with my colleagues and other interested parties to improve our efforts. I look forward to the consideration of this bill, and ask unanimous consent that the text of the bill be inserted in the RECORD.

[From the New York Times, May 15, 1989]

A DEBATE ON DOUBLE-HULL OIL TANKERS

(By Matthew L. Wald)

The Exxon Valdez would probably have survived its grounding on Bligh Reef without leaking crude oil, or leaking far less, if it had had a double hull, according to some shipbuilders and marine architects.

Such hulls were once promised by the Federal Government for tankers carrying Alaskan oil, but the requirement was dropped after lobbying by the oil companies, Exxon prominent among them.

For years Exxon has maintained that having one hull inside the other, far from being an advantage, could make accidents worse in certain situations. And since its tanker went aground on March 24, the company has said that no design could have withstood the forces created by such a tremendous mass hitting an immovable object.

Exxon and some other companies also said that double-hulled tankers cost substantially more to build and operate.

A MATTER OF SPECULATION

The "what if" question about the Exxon Valdez is necessarily speculative, because an authoritative answer would rely on a detailed analysis of the internal structure of the ship, its bearing and speed, and the shape of the rock it hit. But experts not affiliated with Exxon said in interviews that broad conclusions could be drawn.

"For something like this, there might not have been any spill," said Dr. William Morgan, the director of ship hydromechanics at the Navy's David Taylor Model Basin, a test laboratory in Washington.

The value of a double hull in this case may never be known, because the National Transportation Safety Board, which begins hearings in Anchorage on Tuesday, will not take up the question.

Drucella Anderson, a spokeswoman for the board, said its inquiry would concentrate on human factors in the accident. The question of double hulls was explored extensively in the 1970's, she said.

The Exxon Valdez has a single hull because the oil companies won the argument on the issue 10 year ago. They did so by prevailing in an international standards organization, the Intergovernmental Maritime Consultative Organization. The Coast Guard decided to follow that group's position, despite a study by a Coast Guard naval architect showing that double bottoms or double hulls would probably have prevented pollution in 27 of 30 tanker groundings from 1969 through 1973.

Many experts still believe that double hulls would reduce the risk of pollution and might not raise costs.

"For any accident, you've got to be better off with a double hull," said Everett C. Hunt, director of trhe Maritime Research Department at the Webb Institute of Naval Architecture, in Glen Cove, N.Y. "You don't have to do a lot of calculation to come to that conclusion."

With a double hull, "there would be no spill of oil" in an accident like that involv-

ing the Exxon Valdez, said another expert, Paul E. Atkinson, the president of a company that built three double-hulled vessels for the Valdez trade.

Mr. Atkinson, who retired in 1977 as president of Sun Shipbuilding and Drydock Company, a subsidiary of the Sun Oil Company, referred to the double-hulled vessels as "ecology tankers." He said they cost about 5 percent more to build but were cheaper to run because the space between the hulls could be kept clean and used for ballast.

In conventional tankers, which log half their miles without a cargo, the Oil tanks must be filled with water for the empty run, to stabilize the ship. When the tankers load oil that water is supposed to be disposed of properly.

The value of a double hull for the Exxon Valdez is a tantalizing question because even though the tanker was several miles off course, the accident appears to have been a matter of feet.

The tanker was drawing 55 feet 11 inches at the bow and 56 feet 1 inch at the stern when it ran aground, the Coast Guard said. According to a tide calculation by the Coast Guard office in Valdez, the spot where she was hit was covered with 51 feet of water.

WITHIN THE MARGIN

The distance by which the tanker failed to clear the reef, 5 feet, is within the margin that would have been provided by a double hull. A standard formula considered by the Government in the mid-1970's called for a gap between the hulls of 1 foot for each 15 feet of beam of the tanker. The Exxon Valdez is about 166 feet wide, which would have meant a space on the bottom of 11 feet.

Still, many experts, and the Coast Guard dispute whether a double hull would have done the Exxon Valdez much good. They said the reef need not have made contact with the inner hull to crack it.

"Even an 11-foot double hull would not have done any good at all," said Lieut. Comdr. Thomas Falkenstein; a Coast Guard spokesman in Valdez. He said the force of the impact could be transferred to an internal girder, which could be shoved into the inner tank or the force of the impact on the rigid ship could make the inner hull crack.

Lawrence G. Rawl, the chairman of Exxon Corporation, testified before a House subcommittee on April 6 that a double bottom would be useful only in a grounding on soft sand. In the case of a grounding on rock, he said, water could rush into the area between the hulls, upsetting the balance and creating the possibility of capsizing. The company has also argued in the past that gases from the cargo could escape into the space between the hull, posing a hazard to the crew.

Ms. Anderson said the safety board had made only one finding on double bottoms; in response to a 1973 tanker grounding in Cold Bay, Alaska, it recommended that single-hulled tankers operating in port areas be given extra supervision "to insure that the risk of polluting outflow from grounding while operating in a port area is commersurate with that of tankers outfitted with double bottoms."

Bligh Reef, where the Exxon Valdez ran aground, is outside the port area of Valdez.

H.R. 2423

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Puget Sound Tanker Safety Act of 1989".

SEC. 2. CONGRESSIONAL FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds the following:

(1) Puget Sound is a unique and irreplaceable marine environment and is of paramount importance to the economy of Washington State and the Pacific Northwest.

(2) Transport of oil by water on Puget Sound poses a continuing threat to this unique environment.

(3) Because of the occurrence of several oil spills in the area over the past several years, there is concern about the adequacy of the existing regulatory regime for vessels carrying oil on Puget Sound.

(4) Because of the inadequate response to the tragic oil tanker accident in Prince William Sound, Alaska, there is concern about the adequacy of existing procedures for responding to oil spills in Puget Sound.

(b) PURPOSE.—The purposes of this Act are the following:

(1) Authorize new regulations to better ensure the safety of vessels carrying oil in Puget Sound.

(2) Improve existing procedures for responding to oil spills in Puget Sound.

(3) Ensure that the people of Washington State are informed about the adequacy of existing procedures for responding to oil spills in Puget Sound.

SEC. 3. DEFINITIONS.

In this Act—

(1) the term "barge" has the meaning that term has in section 2101(2) of title 46 of the United States Code;

(2) the term "major conversion" has the meaning that term has in section 3701(2) of title 46, United States Code;

(3) the term "new tanker" means a tanker—

(A) for which a contract for construction has not been entered into before the date of the enactment of this Act;

(B) for which, in the absence of such a contract, construction begins after the date of the enactment of this Act; or

(C) which undergoes—

(i) a major conversion under a contract entered into after the date of the enactment of this Act; or

(ii) construction work that begins after the date of the enactment of this Act;

(4) the term "oil" has the meaning that term has in section 2101(20) of title 46, United States Code;

(5) the term "public vessel" has the meaning that term has in section 2101(24);

(6) the term "Puget Sound" means all waters within boundaries to be established by the Secretary in regulations issued not later than 30 days after the date of the enactment of this Act, and includes all navigable waters of the United States within the jurisdiction of Washington State east of Cape Flattery, Washington, and all navigable waters within Grays Harbor and Willapa Bay, Washington;

(7) the term "Secretary" means the Secretary of the Department in which the Coast Guard is operating;

(8) the term "spill" includes any discharge, leaking, pumping, pouring, emitting, emptying, or dumping;

(9) the term "tank vessel" means a vessel that is constructed or adapted to carry, or that carries, oil in bulk as cargo or cargo residue; and

(10) the term "tanker" means a self-propelled tank vessel constructed or adapted primarily to carry oil in bulk in its cargo spaces.

SEC. 4. DESIGN REQUIREMENTS FOR VESSELS CARRYING CERTAIN CARGOES IN BULK.

(a) TANKER MINIMUM STANDARDS.—A tanker to which this section applies shall be equipped with a double hull, including double sides and a double bottom throughout the cargo length of the vessel.

(b) APPLICABILITY.—This section applies to a new tanker of 20,000 gross tons or more (other than a public vessel) which—

(1) carries oil in bulk as cargo or cargo residue; and

(2)(A) operates on the navigable waters of the United States; or

(B) transfers oil in a port or place subject to the jurisdiction of the United States.

(c) DISCUSSION WITH IMO.—

(1) IN GENERAL.—As soon as practicable after the date of the enactment of this Act, the Secretary shall enter into discussions with the International Maritime Organization regarding requiring additional safety standards for tankers operating in environmentally sensitive areas.

(2) COMPARISON OF SAFETY RECORDS.—Discussions of the Secretary under this subsection shall include a review of the comparative safety records worldwide of tankers with double hulls or double bottoms and tankers without those features.

(3) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary shall submit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Merchant Marine and Fisheries of the House of Representatives, describing the results of discussions under this subsection.

(d) STUDIES.—Not later than one year after the date of enactment of this Act, the Secretary shall conduct studies and submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on the Merchant Marine and Fisheries of the House of Representatives—

(1) a report on all recent oil spills in Puget Sound involving barges, including—

(A) discussion of whether any of these spills could have been prevented by requiring double hulls or double bottoms on barges, or by requiring additional safety lines between towing vessels in Puget Sound;

(B) a specific recommendation on the desirability of requiring double bottoms or double hulls on barges carrying oil in Puget Sound; and

(C) a specific recommendation on the desirability of requiring additional safety lines between towing vessels in Puget Sound; and

(2) a report on individual tank size in tankers carrying oil in bulk, including—

(A) discussion of changes in tank size over the last 20 years; and

(B) a specific recommendation on whether limits should be placed on the size of individual tanks within tankers.

SEC. 5. INDIVIDUALIZED VESSELS SPILL PREVENTION PLANS.

(a) REGULATORY MEASURES.—

(1) IN GENERAL.—Not later than one year after the date of the enactment of this Act, the Secretary shall issue a final rule requiring all operators of vessels to which this section applies to prepare and implement an individualized spill prevention and countermeasure plan in accordance with this section.

(2) CONTENTS OF PLAN.—A spill prevention and countermeasure plan under this subsection shall include the following:

(A) Procedures for timely notification of appropriate authorities regarding the occurrence of a spill of oil.

(B) Identification of personnel responsible for taking corrective action in the case of a spill of oil.

(C) Description of procedures used to minimize the damage from a spill of oil and to make immediate repairs to the vessel if possible.

(D) Description of countermeasure and response equipment and its location of the vessel.

(E) Minimum standards for crew training.

(b) EQUIPMENT STANDARDS.—Not later than one year after the date of the enactment of this Act, the Secretary shall issue a final rule listing equipment that is required to be carried on vessels to which this section applies to carry out a spill prevention and countermeasure plans required by subsection (a).

(c) INSPECTION AND MAINTENANCE.—After issuing rules in accordance with subsections (a) and (b), the Secretary shall issue and implement regulations providing for annual inspection of each vessel to which this section applies—

(1) to ensure that the vessel is in compliance with the plan required by subsection (a) for that vessel; and

(2) to ensure that any equipment required pursuant to subsection (b) is on board the vessel and in good working order.

(d) APPLICABILITY.—This section applies to all tank vessels (other than public vessels) which—

(1) carry oil in bulk as cargo or cargo residue in Puget Sound; or

(2) transfer oil in any port or place in Puget Sound.

SEC. 6. OIL SPILL CONTINGENCY PLANS.

(a) CONTINGENCY PLANS.—

(1) IN GENERAL.—Not later than one year after the date of enactment of this Act, the Secretary shall issue a final rule requiring persons to whom this section applies to prepare and submit to the Secretary for approval a contingency plan for the prevention, containment, and cleanup of oil spills from vessels or facilities described in subsection (e).

(2) CONTENTS.—A contingency plan under this subsection shall include the following:

(A) An analysis of the maximum probable spill which may reasonably be expected from a facility or vessel, determined in accordance with the guidelines established under subsection (d).

(B) A description of the amount, type, and location of all countermeasure equipment maintained or readily available, and the estimated time required for its deployment.

(C) Procedures for early detection and timely notification of appropriate authorities regarding the occurrence of oil spills.

(D) Procedures to assess the severity of an oil spill, plan countermeasures, and begin cleanup efforts.

(E) Identification of trained, prepared, and available personnel for responding to an oil spill.

(F) Provision for disposal of recovered spilled material.

(b) COOPERATIVE EFFORTS.—An owner or operator to whom this section applies may comply with this section by preparing, submitting, and implementing a contingency plan in accordance with this section in cooperation with other such persons.

(c) REVIEW AND APPROVAL OF PLANS.—

(1) IN GENERAL.—The Secretary shall review for approval contingency plans prepared under this section.

(2) REVIEW OF PLANS.—In approving the contingency plans required by this section, the Secretary shall consider the adequacy of risk analysis used in determining the maximum probable spill analyzed in the plan, and the estimated response time and adequacy of trained personnel and communications equipment provided for in the plan.

(3) APPROVAL OF PLANS.—The Secretary shall not approve a plan under this section unless the Secretary determines that the equipment described in the plan is sufficient to respond to the maximum probable spill which may reasonably be expected from a vessel or facility covered by the plan.

(4) DELEGATION OF APPROVAL AUTHORITY.—The Secretary may enter into an agreement with the State of Washington to delegate the approval of contingency plans under this section to the State of Washington.

(d) GUIDELINES FOR MAXIMUM PROBABLE SPILL.—The Secretary shall publish guidelines for the determination pursuant to subsection (a)(1) of the maximum probable spill which may be reasonably expected from a vessel or facility. Such guidelines shall provide for taking into account the amount of oil being transported, stored, or transferred by a vessel or facility being considered, and the risk of a spill from the vessel or facility.

(e) Applicability.—This section applies to—

(1) operators of vessels described in section 5(d); and

(2) operators of oil producing, refining, or transportation facilities that, due to their location, reasonably could be expected to spill oil into or upon Puget Sound or adjoining shorelines.

SEC. 7. PUBLIC AWARENESS AND PRACTICE DRILLS.

(a) PUBLICATION OF PLANS AND EQUIPMENT INVENTORIES.—The Secretary shall annually publish an up-to-date description of contingency plans approved pursuant to section 6 and an inventory of equipment available for responding under those plans to oil spills.

(b) PRACTICE DRILLS.—

(1) IN GENERAL.—The Secretary shall annually conduct practice drills of the contingency plans approved under section 6.

(2) REPORTS.—The Secretary shall publish a report on each practice drill conducted under this subsection, including an assessment of actual response time, available equipment as compared to equipment listed in the plan for which the drill is conducted, and requirements, if necessary, for changes in that plan.

SEC. 8. IMPACT ON OTHER LAW.

Nothing in this Act shall be construed or interpreted as changing, diminishing, or preempting in any way the authority of a State, or any political subdivision thereof—

(1) to regulate vessels carrying oil or other hazardous materials in waters of the State; and

(2) to provide for oil spill contingency response planning and activities for those waters.

SEC. 9. PENALTIES.

(a) Civil Penalties.—

(1) IN GENERAL.—A person who violates this Act or a regulation issued under this Act is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation.

(2) IN REM LIABILITY.—A vessel used to commit a violation for which a penalty is assessed under this subsection is liable in rem for that penalty.

(b) CRIMINAL PENALTY.—A person who willfully and knowingly violates this Act or a regulation issued under this Act shall be fined under title 18, United States Code, imprisoned for not more than five years, or both.

(c) INJUNCTIONS.—The district courts of the United States have jurisdiction to restrain a violation of this Act or of a regulation issued under this Act.

CONGRESSIONAL SALUTE TO DR. DANIEL SOLOMON

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. DYMALLY. Mr. Speaker, I rise today to pay tribute to a remarkable individual who truly deserves to be recognized for his dedication and service to the public. As a resident of Culver City for over 30 years, Dr. Daniel Solomon is known to others as a gentle, down to earth man with a kind and generous heart.

After serving 4 years in the U.S. Army, much of it spent overseas, Dr. Dan, who is originally from Pittsburgh, attended the University of Pennsylvania, went through medical school on the GI bill, worked endless nights as an assembler in a Westinghouse factory to meet expenses, and fulfilled both an internship and a residency in surgery at Cook County General Hospital in Illinois.

This was an invaluable experience which afforded him the opportunity to observe and to treat numerous patients with rare ailments and diseases that most physicians never even see in a lifetime in the practice of medicine.

Dan arrived in Culver City in 1955 to join the staff of Kaiser Permanente Hospital, during which time he moonlighted, giving insurance evaluations in the evening. Indeed, many of his first patients after he entered into private practice, were the very people whose homes he visited while conducting insurance examinations, were impressed by his demeanor, his knowledge of medicine, and his concern for their well being.

The son of poor Russian immigrants, who spent his childhood in poverty, Dan still feels most comfortable and compatible with people of very modest means, and like others of that era, he still maintains a frugal depression mentality. Unlike many in his position who forgot their humble beginnings, Dr. Solomon caters to a large segment of the medically disenfranchised, those who are on Medi-Cal and Medicare. He decries the loss of the Los Angeles County administered program which allowed the poor to receive quality medical care, from physicians who participated, at a county paid set fee of $3 per visit, with a minimum of required redtape. That program was abolished in favor of the present system which has allowed thousands to fall through the cracks of the health care establishment, without receiving any medical care until they are desperately ill. Dr. Solomon, along with many of his colleagues tried to save the original program, with the help of Baxter Ward, without much success. They were given a 1-

year reprieve, before the present bureaucratic system finally prevailed.

Dr. Dan's most prized possession, a framed Culver City Police patch, was presented to him by the city's police department, upon his retirement as the official Culver City Police physician, a position that required much time and great endurance, but which left him with fond memories, a storehouse of stories and anecdotes and many friends and patients in the Culver City Police Department.

An avid collector of fine art and pre-Columbian sculpture, this sensitive and compassionate man, who loves children, displays many of his paintings in his office, patient examining rooms and waiting room, so that youngsters who are not exposed to art and beauty in their everyday lives can share his pleasure in viewing works of art, thereby enhancing their aesthetic values.

Dr. Dan and his wife Mary Anne, lend support to many local, national, and international charitable organizations, including the scholarship fund of his own alma mater. They also donate art and sculpture from their own extensive collection to museums all over the world.

An extremely patriotic man, Dan strongly feels that only in America could someone like himself, a poor but bright and ambitious child, the son of an immigrant janitor, grow up and through study, hard work, and sheer determination fulfill his fondest childhood dreams and become a doctor.

Daniel Solomon, successful and prominent Culver City physician, you are a very special person. You have treated, nurtured, and befriended hundreds of hundreds of Culver City men, women, and children over the last 2½ decades, who remember you with great fondness and admiration. The citizens of Culver City are grateful that you chose to live in their city. Your are truly an absolute and genuine Culver City treasure.

A TRIBUTE TO NORTHEAST MICHIGAN VIETNAM VETERANS

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. DAVIS. Mr. Speaker, I would like to pay tribute today to a group of northeast Michigan Vietnam veterans who are visiting the Washington area. This is the largest group of veterans from our area to come to Washington during my 11 years in Congress. Many of the veterans have never been to the Nation's capital and I am sure the tour of the Vietnam Veterans Memorial will hold special memories for them. I am honored to be a part of their trip and I am especially pleased that we were able to arrange for a hometown bandmember to play taps during ceremonies at the Tomb of the Unknown Soldier. The group also will tour the White House and the Pentagon during their two-day trip. I hope their experience here is meaningful and that they will remember it for year to come.

I would like to thank the northeast Vietnam veterans for including my office in their visit.

A&M CONSOLIDATED COMPETES IN NATIONAL BICENTENNIAL COMPETITION ON THE CONSTITUTION AND BILL OF RIGHTS

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BARTON. Mr. Speaker, I would like to acknowledge a group of outstanding students who represented the State of Texas in the "1989 National Bicentennial Competition on the Constitution and Bill of Rights" held recently in Washington, DC. This group is from my congressional district, and they were my representatives in the State of Texas competition which they won.

Twenty-seven students from A&M Consolidated High School in College Station reached the national finals through much hard work and dedication by studying these documents and the values and principles they embody. These students are: Kelly Andrews, Karen Bassichis, Abid Bhimani, Christine Bivins, Josh Busby, Jennifer Busch, Lisa D'Souza, Richard De Vaul, Christopher Dinkel, Barbara Ellison, Kay Fisher, Brian Fiske, John Herring, Brooke Hill, Chi-Cheng Huang, Jeremy Hyman, Padma Kodali, Christina Laane, Eric MacGilvray, Darrin Marquez, Michael McGrann, Kazys Motekaitis, Rahim Rajan, Shannon Ramsay, William Taparauskas, Thomas Weaber, and David Ray Wright.

I highly commend these students, along with their teacher, Mr. Bobby Slovak, their State coordinator, Ms. Hope Lochridge, and their district coordinator, Mrs. Barbara Weisinger. They have worked very hard and have represented Texas well.

Educating our Nation's young people about the Constitution is an investment we can never overlook. These students are the decisionmakers of tomorrow, and we must depend on them to carry out what our Founding Fathers envisioned for the future.

IN RECOGNITION OF THE WINNERS OF THE CREVE COEUR CHAMBER OF COMMERCE ANNUAL ESSAY CONTEST

HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BUECHNER. Mr. Speaker, I rise today in recognition of three outstanding young people from my district: Scott Kelley, Sue Yu, and Aaron Cooper. These young people deserve our congratulations as the winners of the 1989 Creve Coeur Missouri Chamber of Commerce and the Lions Club Essay Contest.

Scott, Sue, and Aaron will each receive a scholarship from the Creve Coeur chamber of commerce and the Creve Coeur Lions Club based on their exceptional understanding of economics as illustrated by their prize-winning essays in the Chamber of Commerce and Lions Club annual essay contest. This contest has traditionally attempted to challenge students to formulate a response to a specific question in their answer, combining pragmatic considerations with social responsibility.

This years question, "In a capitalist society, is there an obligation in the business community to narrow the gap between the "have" and "have not's?" would challenge even the most seasoned of social architects, but leave these young people undaunted. Their answers are notable for their bold and intelligent analysis, and reflect tremendous insight into the problems which confront our society today. In their discussion of these issues they have shown an awareness often lacking in more experienced policymakers.

The first place answer came from Scott Kelley of Westminster Christian Academy who likened the problem of poverty in America to Robin Hood of England. His argument, that redistributing wealth for social purposes by any mechanism is inferior to increasing productivity for poverty aleviation, should be must reading for American policymakers.

For this award-winning answer Scott will receive a $2,000 scholarship from the Chamber and the Lions Club. The second and third place awards of $1,000 each go to Sue Yu of Parkway Central Senior High School and Aaron Cooper of Parkway North Senior High, but in my book they are all first place winners.

Our Nation is fortunate to have fine young people such as these and organizations such as the Creve Coeur Chamber of Commerce and the Creve Coeur Lions Club which encourage these activities. The chamber and the Lions Club are to be commended for taking an active interest in the education of our youth, and for backing this commitment with the investment in time and money it requires. This is the sort of private sector initiative we should, indeed must, encourage.

Our young people are the window to the future of our Nation. Through their eyes we can see tomorrow, with their thoughts we will dream new dreams. The winners, indeed, all of the participants, renew our optimism in the future of this Nation. For this we thank them.

Mr. Speaker, I ask each of my colleagues to join me in congratulating these young Americans and wishing them success in whatever field of endeavor they pursue.

IMPORTANCE OF PROTECTING VETERANS' HEALTH CARE PROGRAMS

HON. LARKIN I. SMITH

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of Mississippi. Mr. Speaker, I represent a district in which there are two Veterans' Administration hospitals. The veterans in my district and their families became deeply concerned when they learned that elements of the U.S. Congress were playing politics with the future of their health care. The system of medical care for veterans desperately needs the supplemental funding provided in H.R. 2072. That crucial funding was placed in jeopardy when the dire emergency supplemental appropriations bill was held up by attempts to saddle the bill with nonemergency funding

proposals. Fortunately, after debate on the floor pointed out the serious consequences of overloading the spending bill, Members of Congress put politics aside and passed the dire emergency supplemental appropriations bill. Let us pledge here today never to waver from our commitment to provide medical care for the veterans who have served our country.

A TRIBUTE TO BON VIEW ELEMENTARY SCHOOL

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BROWN of California. Mr. Speaker, on May 19, 1989, Bon View Elementary School will be celebrating its 30th anniversary, and I invite my colleagues to join me in recognizing the important role that Bon View School has played in the lives of students and in the community.

Bon View School was built in 1958 in the predominantly agricultural area of southeast Ontario in anticipation of future family housing development. Aided by the growth of Ontario International Airport and the industrialization of the area, Bon View has grown from 450 students in 1958, to its current enrollment of 823 students. The school has continued to keep pace with the growth of the community by stressing the importance of science and mathematics. Bon View has two computer labs, and promotes special events such as an annual science fair and a schoolwide, Math-a-thon. In addition to its commitment to promoting science and math, Bon View School employs a thematic curriculum that has been recognized statewide for its innovative approach to the wide spectrum of educational needs represented in our elementary schools.

In the relatively short span of 30 years, Bon View School has become an integral part of the Ontario community. In cooperation with the PTA and local businesses, Bon View participates in community activities such as the Families Without Christmas Program. Bon View School is now educating its second generation of students, and continues to serve the community of southeast Ontario. I join the faculty, parents, and students of Bon View School in their celebration of 30 years of excellence in education and development.

ISRAELI ELECTION PROPOSAL

HON. JOHN MILLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. MILLER of Washington. Mr. Speaker, recently during his visit to Washington, Israeli Prime Minister Yitzak Shamir made an encouraging and productive proposal toward peace in the Middle East. The Prime Minister's proposal for free democratic elections in the West Bank and Gaza Strip gives us true hope toward realizing a solution to the complicated problems in the Middle East.

Prime Minister Shamir proposed that these elections would produce a delegation which could negotiate an interim period of self-rule. This interim period would be followed by negotiations to produce a permanent agreement in which all options to solve these problems would be considered. It has been made clear that interim arrangements on self-rule is not to be the end goal. Rather, it is a process leading to a permanent resolution.

Unfortunately, recently the PLO has so far rejected this proposal despite the fact that the Prime Minister's proposal does not disqualify Palestinians elected who might be PLO supporters, and despite the fact that King Hussein of Jordan and President Mubarak of Egypt have not rejected this proposal.

There are uncertainties and unanswered questions in the proposal such as the details of what self-rule would mean in the interim period, would there be international observers of the elections, and what would be the role of the PLO in these elections. But this proposal is a great place to begin—democracy always is. And we must remember that free and democratic elections in the West Bank and Gaza Strip would be an occurrence that does not happen in the countries surrounding Israel. We should be criticizing these governments who do not propose similar elections in their countries for their own people rather than concentrating on shortcomings of Prime Minister Shamir's proposal.

As Defense Minister Rabin and Foreign Minister Peres travel to the United States later this week, it is my hope that the PLO will reconsider their outright rejection and that the United States can use this hopeful proposal in furthering our goals of peace in the Middle East.

HUMAN RIGHTS SITUATION IN ZAIRE

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. McMILLEN of Maryland. Mr. Speaker, I rise today to make a few comments on the current human rights situation in the Republic of Zaire. Last year the Government of Zaire and its President, Mobuto Sese Seko, were correctly criticized for various human rights violations. These violations included two arrests of one of Zaire's most prominent dissidents, Tshisekedi Wa Mulumba. The jailing of Mr. Tshisekedi led to a protest by 58 members of the U.S. Congress. Like many of my colleagues, I too was concerned by these and other violations of recognized civil and political rights.

I continue to be concerned, Mr. Speaker. However, I am encouraged that some progress is being made by the Government of Zaire in the area of human rights. A recent United Nations Commission report noted the government of Zaire's willingness to cooperate fully and to continue its efforts to improve the human rights situation. As a result of these efforts by the Government of Zaire, the United Nations Commission on Human Rights reached a decision to discontinue further consideration of the human rights situation in Zaire.

Zaire is also making a certain amount of economic progress. The Republic of Zaire was cited in a recent survey by the United Nations as one of 14 reforming countries exhibiting strong signs of economic growth. This is indeed encouraging.

Nevertheless Zaire has a long way to go in the area of human rights and economic growth. The country's standard of living remains one of the lowest in the world. And efforts must be made to limit the security police's broad powers, which the State Department cited in its 1987 human rights report as resulting "in arbitrary harassment, physical mistreatment and detention of ordinary citizens as well as suspected political opponents."

Mr. Speaker, it is my hope that the progress in respecting basic human rights and in promoting economic growth will continue.

I will continue to closely watch the actions of the government of Zaire. Zaire has been a strong supporter of the United States in the past, and deserves our patience and encouragement as well as our careful scrutiny.

DIRE EMERGENCY SUPPLEMENTAL

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. LENT. Mr. Speaker, I rise to urge House passage today of a clean fiscal year 1989 supplemental appropriations bill to include desperately needed funds for veterans' health care services.

H.R. 2072 is called a dire emergency supplemental, because the situation for veterans' health care funding is just that—a crisis that threatens vital medical care for our Nation's vets. At the Long Island Northport VA Hospital, veterans are being denied medical treatment because of staff reductions, programs are being frozen or terminated, and supplies are being rationed or have run out entirely.

These veterans are the brave soldiers who shed their blood at Hamburger Hill, Normandy, and Iwo Jima. Is this the kind of treatment they deserve?

It's imperative that we pass a clean bill without amendments. If we load the measure down with extraneous amendments, I guarantee you, the bill will be vetoed. Frankly, I for one cannot imagine jeopardizing veterans' medical care. I couldn't return to my district and look these folks in the eye and tell them their Government let them down. Let's do what's right for once and pass H.R. 2072 without amendments so that vets can receive the medical care they so desperately need.

FINANCIAL INSTITUTIONS REFORM

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. BROOKS. Mr. Speaker, as you know, the bill H.R. 1278, the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, has been sequentially referred to the Committee on the Judiciary until May 25 for consideration of those issues coming within that committee's jurisdiction. Because of the short time available for the committee's action, I plan to hold the bill for markup in the full committee. I would also note that the referral is strictly limited to consideration of those matters coming within the committee's jurisdiction as spelled out in rule X, clause 1(m), and any amendments offered which do not clearly fall within that jurisdiction will be ruled out of order.

In an effort to give Members a few days to study the bill before proceeding to markup, I am scheduling full committee sessions on the matter to begin at 10 a.m., Tuesday, May 23. Full committee sessions will also be scheduled for Wednesday and Thursday, the 24th and 25th, if needed.

Mr. Speaker, I also want to inform the House that because of my personal financial position, I will refrain from debating or voting in the committee concerning any issue which arises during our consideration of the bill which might pose a conflict of interest or a perception of a conflict of interest.

MEASURED SUPPORT FOR THE CABLE COMPETITION ACT

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. RITTER. Mr. Speaker, I am interested in seeing this country regain its leadership in the development of policy and technology which facilitate introduction of high definition television. For example, Congressman LEVINE and I are the principal cosponsors of H.R. 1267, the High Definition Television Competitiveness Act of 1989. The bill creates new incentives for U.S. industry to engage in R&D in order to develop HDTV.

Existing law prohibits telephone companies from providing video programming services to their telephone customers. By restricting the business opportunities of telephone companies in this way, we slow the deployment of fiber optic technology in telephone networks—technology that is capable of supporting high definition television and scores of other information-rich communications services. Thus, I am adding my name to the Cable Competition Act of 1989 to bring significant new incentives for the fiber optic wiring of local telephone networks.

While I am cosponsoring this bill because of the positive impact it will have on technological innovation, I must admit that I have a number of concerns which are either not addressed or not adequately addressed in the bill. The cable TV industry is worried that telephone companies will compete unfairly by using traditional telephone service to subsidize the new video services this bill will authorize. Although section 4 of the bill requires the FCC to prevent such predatory cross-subsidization by telephone companies, I think Congress also needs to consider ways to guarantee that telephone companies compete fairly. I urge the cable industry and other interested parties to make constructive suggestions on how to accomplish this objective.

Under this legislation, telephone companies are free to purchase existing cable systems. Section 5 of the bill, however, requires all purchasers, not just telephone companies, to install fiber optics within a reasonable time after purchase. While that may be appropriate for telephone companies purchasing cable—after all, the goal of the bill is to stimulate the telephone companies to speed installation of fiber to the home—I'm not sure the same is true for all purchasers of cable companies.

Finally, I believe that his bill should not be the vehicle for settling the controversy over rate regulation of cable TV, particularly since the fiber optic network stimulated by this bill should add competitive pressure to hold cable rates down.

I will be looking closely at these issues as the legislative process goes forward and look for input from interested parties.

THE SOCIAL SECURITY REPRESENTATIVE PAYEE ACT OF 1989

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. LEVIN of Michigan. Mr. Speaker, today I'm joining my colleagues, Mr. MATSUI and Mr. MOODY, in introducing legislation, the Social Security Representative Payee Act of 1989, that is designed to reform and strengthen vital services which the Social Security Administration provides to some 5 million people who are among the most vulnerable in American society.

Most SSA recipients are capable of managing their own affairs, but for those who cannot—because they are under legal age or because of a mental or physical impairment—current law authorizes the appointment of someone known as a representative payee to arrange for a place for that person to live, to pay that person's bills, and perform related services.

This legislation addresses several problems that have come to light in the media and before congressional committees in the past year concerning beneficiary rights, how representative payees are selected, and how they are held accountable for managing the beneficiary's funds in his or her best interest.

First, this bill spells out beneficiary rights in several important areas. By requiring a face-to-face interview with the beneficiary, it will build needed protection into the procedures that SSA uses to determine whether someone really needs to have a representative payee in the first place. Such an interview also provides the opportunity for SSA to explain how the program operates and what complaint and appeals rights a Social Security or SSI beneficiary has once a representative payee is in place.

Second, this legislation tightens up the process by which SSA recruits and screens representative payee applicants. Because of the potential that serious conflicts of interest could occur if someone pays himself or herself for services rendered to Social Security or SSI beneficiaries, the legislation bans all creditors from acting as rep payees, except in the cases of relatives who live in the same household as the beneficiary and residential care facilities licensed by State governments.

It also gives SSA additional tools to use to screen the pool of rep payees and apply greater scrutiny in high risk situations, such as applicants with criminal records. Before anyone can be certified as a rep payee under this legislation, SSA would be required to complete a thorough investigation designed to verify the applicant's identity and determine whether he or she has a prior felony record or has been terminated as a rep payee in the past.

At the same time it provides a mechanism to keep bad apples from getting into the system, the legislation also recognizes the need to help SSA recruit payees who will manage beneficiary affairs conscientiously. This is done by providing authorization for SSA to compensate qualified nonprofit organizations which apply to take on this responsibility. Testimony received at a recent hearing of the House Social Security Subcommittee showed that there are organizations ready and willing to do this job in my State of Michigan and elsewhere around the Nation.

At that hearing a strong call to reform SSA procedures concerning representative payees came from State and local government officials, SSA employees, and advocacy groups. These witnesses described situations where beneficiaries were told by SSA personnel that they couldn't receive money to which they were clearly entitled unless they themselves found someone to act as their rep payee. This legislation deals with that problem by placing an affirmative responsibility on SSA to certify a responsible rep payee or, if need be, temporarily fulfill the rep payee function until one can be found

Finally, this legislation proposes a comprehensive system designed to monitor how rep payees fulfill their responsibilities on the job. The secretary is required to develop a program of accountability monitoring based on quarterly reporting by representative payees of the names and addresses of all beneficiaries in their charge. More detailed annual accounting, as well as any other measures that the secretary deems necessary, will also be used. In the case of relatives and certain governmental institutions acting as rep payees, the secretary is authorized to develop alternative mandatory annual accounting procedures.

Another key accountability feature has also been carefully designed to link the rep payee application and reporting processes. The secretary is required to keep certain centralized files (e.g., names, addresses, and Social Security numbers of rep payees and benefici-

aries, and information about past Social Security violations) available for use by the local office in rep payee investigations.

The purpose of this requirement is twofold. The bill specifies how this information will be used in rep payee certification and accountability monitoring decisions. A second purpose is to improve State regulation of nursing homes, adult residential care facilities, board and care homes, and other facilities in which Social Security and SSI recipients reside by requiring SSA to share information with State licensing and protective services officials for use in investigating unlicensed board and care homes.

Mr. Speaker, I believe that this legislation is both timely and needed. I urge my colleagues to give this proposal their close scrutiny and welcome their support in our common efforts to improve this key social support system.

A CONGRESSIONAL TRIBUTE TO COL. RICHARD J. MAKSIMOWSKI

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. HANSEN. Mr. Speaker, I rise today to pay tribute to Col. Richard J. Maksimowski on the occasion of his retirement from the U.S. Army on September 1, 1989. His 27 years of dedication and exemplary service are deserving of recognition and it is indeed my honor to share with you and my distinguished colleagues a small compliment to a great man.

Since the beginning of his military career in 1962, Colonel Maksimowski has dutifully fulfilled assignments on foreign soil, in several States, and finally, as commander of the Tooele Army Depot where he has served for the past 3½ years. As this institution resides in my district, it is my duty and extreme pleasure to acknowledge his generous service.

Colonel Maksimowski's accomplishments at the Tooele complex are numerous and wide-ranging. To mention a few, he has yielded a 4.35 percent productivity gain for fiscal years 1988 and 1989 accompanied by a combined monetary savings of $19.7 million. He is also responsible for a $263,737 savings from 63 active quality circles. Recently, Tooele Army Depot enjoyed a successful visit by the United States/Soviet delegation from the United Nations Disarmament Conference in Geneva which made satisfactory assessments for two intensive chemical surety operational inspections. Colonel Maksimowski has been instrumental in implementing and developing several training and safety programs which have proved to be highly effective. Management skills have allowed him to productively manage a massive military industrial complex consisting of major facilities at seven different operational locations in five States, employing over 4,000 civilians and military personnel.

Throughout his distinguished 27-year career, Colonel Maksimowski has been an exemplary officer and consummate professional soldier. He has consistently reflected the highest standards of military tradition, and has brought great credit upon himself, the Officers Corps, and the U.S. Army.

Mr. Speaker, this man is a real "Hall-of-Famer." I take great pride in Colonel Maksimowski, and I am confident that my colleagues feel the same. I would ask the House to join with me in honoring him. May we extend to him our deepest appreciation for a job well done and wish him the best in his retirement years.

SUPPORT UNFPA

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. PORTER. Mr. Speaker, world population will double again within our lifetimes. Given the growing problems of environmental destruction, global warming, and economic instability, this is notice of problems ahead.

Key allies of the United States are experiencing tremendous growth rates which will double their population even faster. Kenya, which has steadfastly supported our Navy protecting the Persian Gulf, has a population growing at over 3 percent per year. Pakistan, which has supported the coming victory in Afghanistan, was another rapidly growing population. Egypt, which forms the cornerstone of the Middle East peace process, also is growing rapidly. Most importantly, Mexico continues to grow at a very fast rate. Each one of these key allies must maintain record economic growth targets just to keep average incomes from falling. This is a long-term trend to disaster.

It does not have to be that way. With free market economics and voluntary family planning, average incomes and prosperity can come. It's happened in South Korea, it's happening in Taiwan, and it's starting to happen in Thailand. We have ended our foreign aid program to South Korea and Taiwan and will soon be ending our program for Thailand. With strong voluntary family planning programs, each of these countries have made major strides in increasing incomes, education, and productivity.

One of the most effective family-planning programs is that of the UNFPA. It operates in over 130 countries and is given the kind of access and influence that our own bilateral AID population program can only dream of. If we are concerned about the destruction of the world's tropical forests, global warming, and relieving poverty around the world, support for UNFPA is crucial.

Regardless of what we may think of China, where UNFPA plays only a minor role, the work UNFPA does in the other 130 countries where it operates is crucial to the health and well-being of our future. I commend Mr. MOODY for his continued leadership on this issue and urge this resolution's rapid adoption.

KEEPING OUR PROMISE TO THE FILIPINO VETERANS OF THE SECOND WORLD WAR

HON. TOM CAMPBELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. CAMPBELL of California. Mr. Speaker, I rise to introduce a bill that would allow Filipino veterans of World War II to be naturalized as U.S. citizens. It would keep a promise our country made, then broke, over 40 years ago, to brave soldiers who defended our two countries in their hour of greatest need.

Think back, for a moment, to the world of 1942. Europe lay at the feet of Hitler, submarines prowled our coast, our fleet lay at the bottom of Pearl Harbor, and enemy troops were storming the Pacific. In this time of desperate need, Congres passed an amendment to the Nationality Act of 1940 promising citizenship to Filipino noncitizens who fought in the American Armed Forces. Filipinos came forward to our common defense by the thousands.

Filipinos played a critical role in the war for the Pacific. They fought and died alongside our own troops. They faced starvation and disease in the siege of Bataan. They took to the jungles rather than surrender, and those who were captured suffered terribly in wartime concentration camps.

Why? They were fighting for the freedom of the Philippines, their home and an American territory at the time. They sacrificed everything to see that the Philippines would not fall easily to the overwhelming invading forces. Their dogged defense bought valuable time for America, and tied down enemy troops.

And how did we repay them?

America broke its word. Safe, and under pressure from the new Government of the Philippines, it turned its back on those brave veterans, revoking the authority of our officials in the Philippines to accept naturalization requests.

For 46 years, Filipino veterans have sought redress in the courts. Three times the Supreme Court has ruled against them, last year removing all chance that the courts could correct this injustice. It is up to us to see that America lives up to its word. Time is short; if we delay, many won't live to see their sacrifice repaid.

My distinguished colleague from California, Mr. DYMALLY, has already introduced legislation for this purpose. I applaud his leadership on this issue. The bill I introduce today takes two further steps to be sure that no veteran will miss this last chance for citizenship.

First, it provides for the dispatch of an official to the Philippines to process these requests. Many of these veterans are too ill, frail, or impoverished to make a trip to America. We must ensure that they have the same chance as if America had kept its word in 1946.

Second, it authorizes funds to publicize the opportunity. All who are eligible must be made aware that America is at least keeping its word and acknowledging their sacrifice.

Let us join together to see that America's word is as good as its intentions. I urge my colleagues to support this bill and to expedite its passage.

NATIONAL WILD AND SCENIC STUDY OF THE MERRIMACK RIVER, NEW HAMPSHIRE

HON. ROBERT C. SMITH

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SMITH of New Hampshire. Mr. Speaker, today I am introducing legislation to authorize a Federal wild and scenic study of a segment of the Merrimack River in New Hampshire.

The freeflowing Merrimack is a rare treasure. From its headwaters in Franklin, NH, this scenic, whitewater river winds its way south through New Hampshire and Massachusetts down to the Atlantic Ocean. Thousands of years before the first settlers colonized America, Indians wove their way along its banks. During the 19th century, the Merrimack powered the mills of the industrial revolution. Today, it survives in a nearly unspoiled state, teeming with fish and wildlife and furnishing many recreational opportunities.

However, as the economic boom stirring the rest of New England extends its reach to southern New Hampshire, time is running out for the Merrimack. Heavy development pressures, which have made natural rivers like this one a vanishing resource in the Northeast, continue to encroach on its shoreline and threaten its freeflowing nature. In fact, American Rivers, the Nation's principal river-saving organization, recently placed the Merrimack second on its list of the 10 most endangered rivers in America.

Today, I am introducing legislation that will help us provide for the Merrimack's long-term protection. My bill would authorize a study of a segment of the river to see if it merits protection under the Federal Wild and Scenic Rivers Act.

The legislation that I have introduced singles out the most critical 22-mile segment of the Merrimack for Federal wild and scenic study. Along its course through the rolling hills of Merrimack County, NH, this segment of the river is home to many species of wildlife, including beaver, otter, muskrat, blue and green herons, kingfishers, hawks, ducks, and geese. The river supplies wintering grounds for the endangered bald eagle and is prized by local fishermen for its abundance of Atlantic salmon and rainbow trout. Its banks are secluded enough for hiking. picnicking, birdwatching, fishing, swimming, cross-country skiing, canoeing, boating, and snowshoeing.

Passage of my bill will ensure that no hydrodevelopment can take place along this segment of the river while a Federal wild and scenic study is carried out. If, at the end of the study, this segment of the river is recommended for wild and scenic designation, it will be up to State and local authorities, private landowners, and the Federal Government to work together to guarantee the river's long-term protection.

Initiation of such a study has broad support at the local, State, and Federal levels. A number of residents have banded together to form grass roots organizations dedicated to the river's preservation. The selectmen of all seven New Hampshire towns through which this 22-mile segment flows have called upon the New Hampshire congressional delegation to pursue a Federal study of the river. Governor Gregg of New Hampshire has formally endorsed the idea of a study in writing. In 1981, the U.S. Department of the Interior gave this river segment a spot on its nationwide rivers inventory, which is the first step in the wild and scenic designation process.

Finally, the entire New Hampshire congressional delegation supports a wild and scenic study of the Merrimack. My colleague from New Hampshire, Mr. DOUGLAS has joined me as an original cosponsor of this legislation, while Senators RUDMAN AND HUMPHREY will today introduce a companion measure in the Senate.

In view of the widespread support for a wild and scenic study of the Merrimack, as well as the demonstrated need for Federal help in preserving a rapidly vanishing resource, I urge my colleagues to support passage of this important legislation.

CONGRATULATIONS TO WILLIAMS & WILKINS, RECIPIENTS OF THE 1989 PRESIDENTIAL "E" AWARD

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. MFUME. Mr. Speaker, I rise today to congratulate the Baltimore based company of Williams & Wilkins, the publishing division of Waverly Inc., for their recent receipt of the Presidential "E" Award Pennant for excellence in world trade. This award is presented jointly by President George Bush and the U.S. Department of Commerce in recognition of individuals, companies, and organizations for significant contributions in promoting and expanding world trade.

Founded in 1890, Waverly Inc., is one of the largest publishing printing companies in the area. The company is comprised of two divisions, Waverly Press which performs all the company's printing activities, and Williams & Wilkins, which conducts all publishing ventures. Waverly employs over 1,100 people in their Baltimore and Boston offices.

Mr. Speaker, any Member of the U.S. Congress would be as proud as I am to have a company in their home district that is on the cutting edge of international trade and exports. Williams & Wilkins is an excellent example of the emphasis that the State of Maryland has placed on increasing its ability to locate foreign export markets and further our business links with other nations.

Additionally, Williams & Wilkins is one of the world's prominent publishers of medical scientific journals, software, videos, and books. With branch offices in London, Sydney, Hong Kong, and a soon to be opened location in Japan, Williams & Wilkins' exports comprise 28 percent of sales, which is four times the publishing industry average.

Mr. Speaker, in closing I wish to add that with our current trade deficit and increased purchase of American real estate and other assets by foreign-owned concerns, it is quite refreshing to learn that there are organizations within our own backyard that have taken the initiative to improve America's image abroad through quality products and sound business sense.

THE 100TH ANNIVERSARY OF SAINTS PETER AND PAUL CHURCH, HOBOKEN, NJ

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. GUARINI. Mr. Speaker, during the month of May a dedicated parish and its pastor and the people throughout New Jersey will celebrate the 100th anniversary of Saints Peter and Paul Church in Hoboken.

This fine church, located at 404 Hudson Street, in Hoboken, joins more than a dozen other religious institutions in my district who are celebrating their centennial.

It was during the great wave of people from Europe in the 1880's and the following 40 years, during which so many newcomers came to Hudson County upon leaving Ellis Island in New York Harbor. Many older Americans in my district tell me that upon their arrival they looked first to the Statue of Liberty and then to the land nearby to begin their new life.

The area many came to settle, to seek work, to raise their families, as they sought religious and political freedom was the Hoboken-Jersey City area, which today comprises more than 105 different nationality groups.

According to Rev. George A. Ligos, pastor, Saints Peter and Paul Parish will be celebrating its 100th anniversary with a concelebrated Mass of Thanksgiving on Sunday, May 21, 1989 at 10 a.m. and a dinner-dance at the Meadowlands Hilton, Secaucus, on Friday evening May 26, 1989.

Saints Peter and Paul Parish was established, originally, to serve the German-speaking community of Hoboken. The first Mass, celebrated by Rev. Leopold Hofschneider, the founding pastor, took place in what is now the rectory dining room on Sunday, May 19, 1889.

The original church was dedicated on July 13, 1890; the present church on March 18, 1929. It is an excellent example of Roman architecture and is noted for the stained glass windows, each with eight panels depicting scenes from the Old and New Testament.

From a parish serving a small group of German immigrants, Saints Peter and Paul has grown to a parish of approximately 700 families serving a diversified community of all ages and economic backgrounds from well over 20 nationalities. Masses are offered in English and Spanish. At the present time, it welcomes many of the young adults who are moving into Hoboken in large numbers.

Education has been part of the parish mission from the very beginning. The original school, located in the rectory basement, opened in September 1889, with 16 pupils.

The present modern school building, constructed in 1965, holds 205 students under the direction of the Dominican Sisters of Caldwell, NJ.

Saints Peter and Paul has been celebrating its 100th anniversary with a series of events that began on May 20, 1988. The climax will be a concelebrated Mass of Thanksgiving with Most Rev. Theodore E. McCarrick, Archbishop of Newark, as principal celebrant.

Saints Peter and Paul Church has been a beacon in the lives of tens of thousands of individuals who came to Hoboken and raised their families and have moved to other parts of our State and Nation. You can be assured, however, that they have never forgotten their early days in the United States, however bleak they were, which built a solid foundation of Americanism for them, developing each as a fine thread in the beautiful tapestry we know as America.

I am sure my colleagues here in the House of Representatives wish to join me today in this tribute to Saints Peter and Paul's Parish and pay tribute to its glorious 100 years of service to God and man, sharing my pride and extending best wishes to all the parishioners, nuns, and priests of this great parish.

BANNING NUCLEAR TESTS—IT'S BUSH'S MOVE

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. MARKEY. Mr. Speaker, the Bush administration is reported to be near completion of its strategic review, and many of us in Congress will be very interested in seeing if the administration will be going beyond the stale formulas for avoiding nuclear test limits that were developed by the Reagan administration. Last week 142 Members of the House and 23 Members of the Senate joined in urging the President to adopt a policy which favors negotiation of further test limits and puts our country on track toward first restricting and then banning nuclear test explosions by the mid-1990's.

I would like to call to my colleagues attention an excellent article which concisely sets forth the options facing the President on the testing issue.

[From the Christian Science Monitor, Apr. 24, 1989]

BANNING NUCLEAR TESTS—IT'S BUSH'S MOVE

(By Philip G. Schrag)

Forty countries, including Egypt, India, Iran, and Iraq, have recently proposed an amendment to the 1963 Limited Test Ban Treaty, which prohibits tests of nuclear weapons in the atmosphere. They want to turn it into a treaty banning all nuclear weapons testing. This initiative presents the Bush administration with a diplomatic challenge and a national security opportunity.

More than 100 countries have joined the treaty over its 26-year life. But nuclear weapons testing by the United States and the Soviet Union, and to a lesser extent by Britain, France, and China, continues at a vigorous pace underground.

Such testing has been vigorously criticized by most countries. In 1987, 128 countries voted for a United Nations resolution advocating the amendment that has just been formally proposed. Only the US, France, and Britain opposed the resolution.

The Limited Test Ban Treaty's amendment clause specifies that a conference to consider amendments must be convened if requested by one-third of the parties. The US, Britain, and the USSR—the three countries that drafted the treaty—are responsible for convening such a conference. Those countries will each have only one vote at the conference, but under the treaty each of them can veto any amendments.

The 40 countries that have now called for an amendment conference are more than a third of the parties. These countries want an end to underground as well as atmospheric testing. What should the US do?

In large part, the answer to this question depends on whether the Bush administration thinks that continued testing is necessary, and, if so, for how long. Until 1981, every American president since Dwight Eisenhower had endorsed efforts to negotiate a comprehensive test ban agreement. Reagan administration officials reversed this longstanding policy, believing that nuclear weapons testing would be necessary indefinitely to develop new types of nuclear weapons and to make sure that the nuclear weapons already in the US stockpile will work. President Reagan also canceled ongoing comprehensive test ban negotiations. But President Bush may take a fresh look at this issue.

There is reasons to think that a ban on nuclear testing at this time would enhance American national security. If the US and the USSR stop testing, it will be more difficult for hard-liners in third-world states to argue that their countries needed to test nuclear weapons to acquire international prestige. A comprehensive ban would also help to stabilize the nuclear arms race by impairing the ability of either the US or the USSR to build new generations of nuclear weapons.

Concern about the reliability of stockpiled weapons could be eliminated by giving final proof tests to any types of weapons in the stockpile that have not yet been tested fully, and then freezing existing blueprints. New types of nuclear missiles and bombs would have to be designed to incorporate existing designs.

The problem of verification, long a critical issue in negotiations, has largely been solved by technological advances in seismology.

President Bush could respond in four ways to the 40-nation initiative. Three of them are reasonable. The fourth possibility would be diplomatically isolating and would throw away an opportunity to contribute to nuclear nonproliferation.

First, the President could seize the initiative by reopening negotiations with the USSR toward a comprehensive test ban.

Second, if the President wants to move at a more modest pace toward an eventual comprehensive test ban treaty, he could explore with the USSR a gradual phase-out of nuclear weapon tests over several years.

Either of these approaches could lead to a treaty that would advance American interests, and either of them could convince the 40 nations that the superpowers are engaged in a serious effort to end nuclear weapons testing. As a result, the pressure to hold a large conference, in which the US would have only limited influence, might abate.

Third, the US could endorse the 40-nation initiative, convene the conference promptly, and work within it to help frame a sound, effective amendment. For example, it could insist on suitable verification arrangements and a schedule for an end to testing which permitted final experiments with any weapons that have to be modified to remain reliable without further testing.

The least attractive policy would be American obstruction of this new international effort to move the world toward a comprehensive test ban.

This course would enable the USSR to continue to portray itself as more devoted than the US to arms control. It would also increase the likelihood that by the end of the century, Pakistan, Iraq, Iran, and other nations will test nuclear weapons and deploy the missiles and bombers that could eventually ensnarl the world in a nuclear war.

INTRODUCTION OF AUBURN DAM LEGISLATION

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SHUMWAY. Mr. Speaker, 1988 proved to be another important year in the quest to complete the Auburn Dam. For years opponents of the multipurpose Auburn Dam have pointed to the lack of non-Federal cost sharing partners as evidence that the project was not economical. These opponents have argued that if we truly needed a multipurpose Auburn Dam somebody would step forward to help fund it. I am pleased to say that in 1988 "somebody" did step forward. The American River Authority [ARA], a joint entity made up of county and water district officials from El Dorado and Placer Counties, has officially proposed to finance $700 million for the water and power portions of the project.

Mr. Speaker, the ARA's action is irrefutable evidence that this project is both sorely needed and economically viable. Their action has served to expand the base of local support for this project and rejuvenate the enthusiasm of many long-time supporters. And it has sparked renewed interest on the part of the Interior Department to negotiate a Federal/non-Federal partnership which is fiscally realistic in these days of tight Federal dollars. In short, the ARA's proposal has moved the Auburn Dam effort to a new level.

Sacramento officials desperate to move forward with a comprehensive flood control plan should hail the ARA proposal as a major breakthrough in what has been, to date, a paralyzing decisionmaking process. There is no longer a need for a dry dam versus multipurpose Auburn Dam debate. Proponents of the dry dam can no longer argue that "it is the logical 'middle ground' since the funding for a multipurpose dam is not available." In essence, the so-called dry dam option is rendered irrelevant now that a viable Federal/non-Federal cost sharing agreement to fund the multipurpose project has been proposed. And waiting for the Corps' dry dam report before doing anything would be a waste of precious time which postpones the ultimate

flood control solution since the report won't be completed for more than a year, and in the meantime much could be done in the way of achieving consensus on the comprehensive multipurpose project.

Despite the ARA's funding breakthrough, there is still a considerable way to go. A final agreement must be worked out to the satisfaction of all involved—the flood control beneficiaries, potential water and power users, fisheries and recreation advocates and the new administration.

But we can't work out an agreement that takes care of the needs of all the affected constituencies until we all recognize the need to work constructively with one another. Unfortunately, many environmental organizations continue to hold to their no-multipurpose-dam-at-any-cost position. Clearly, this extreme position allows no room for debate, no room for consensus, no room for compromise. The dire flood threat will not allow Sacramento officials to view no option as the best option any longer. These leaders will have to eventually forge a politically acceptable middle ground to take care of their inescapable flood control and American River needs. As the path to the middle ground moves forward, the non-multipurpose-dam-at-any-cost advocates will increasingly cut themselves out of the debate—you can't forge a middle ground and at the same time please those who adhere to a capricious, extreme position.

In truth, the best middle ground is a multipurpose project that properly balances the need for flood protection, the need for increased water deliveries, the need for power generation and the need for environmental protection, including fisheries and recreational protection and enhancement. Mr. Speaker, today I am introducing legislation to amend the original Auburn Dam authorizing statute to ensure that when constructed, the project achieves this proper balance.

I believe my bill is an important fine-tuning of the original authorizing act. It is intended to focus the debate among affected community leaders on ensuring that we construct an Auburn Dam that best serves the widest range of needs—including environmental needs—and the widest range of beneficiaries. I fully realize that, as is the case with any other bill, the debate on this legislation and its provisions only begins with its introduction. As a result, I fervently hope that Sacramento community leaders recognize that with the introduction of this bill comes a serious opportunity to move the political consensus on this issue forward. The sooner the legislative process starts on this issue the sooner we can come up with a legislative product that articulates and implements the politically optimum middle ground, thereby removing the threat of flood devastation, drought and a fading Lower American River.

In closing, I would reurge those leaders in Sacramento who have in the past refused to seriously examine a multipurpose Auburn Dam because of fiscal skepticism, to take a good hard look. Embrace the spirit of the ARA proposal and see if you can't make a multipurpose dam work to the advantage of those you represent. The four basic components we need to agree on for a workable Auburn Dam package are: First, that the ARA financing plan is feasible; second, that the water is needed in the area and can be used both to protect fisheries and recreation in the Wild and Scenic Lower American River and for area M&I water users; third, that the flood control cost to Sacramento is not higher for a multipurpose project than the other alternatives; and fourth, that moving forward with the multipurpose project will deliver flood protection for the area in a quicker, more predictable time frame.

With these kinds of assurances, a multipurpose Auburn Dam is a winner for all affected—Placer, El Dorado, and Sacramento Counties as well as the new administration—which is the way it should be. After all, this is a communitywide issue, the importance of which demands unity in our region.

SOME OBSERVATIONS ON DEVELOPMENTS IN THE MIDDLE EAST

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. ASPIN. Mr. Speaker, I have recently concluded a 2-week visit to the Middle East, during which I spoke with a wide range of leaders—President Mubarak of Egypt, six Israeli cabinet ministers including Prime Minister Shamir, Crown Prince Hassan of Jordan, Syrian President Assad, and an assortment of West Bank mayors, journalists, and political activists. I would like to share my observations with my colleagues.

As chairman of the House Armed Services Committee, much of my trip dealt with military issues that are classified. But much of the trip was unclassified. In this brief report, I would like to touch on five topics that have often come up in conversations I have had since my return:

Has Arafat really changed?

Is the peace process going anywhere?

Who's the real power on the Arab side?

Can the Israeli political process work?

What's the nature of our military ties to Israel?

HAS ARAFAT REALLY CHANGED?

A major topic of debate in Israel and the United States—and the Arab world as well—revolves around the question of the true intentions of Yasser Arafat and the PLO. Have they really changed their position to recognize Israel, or is this just a posture du jour to allow them to get a territorial base on the West Bank from which they could then pursue their old goal of wiping out the Jewish state?

There are really two answers to this question. First, Arafat and the PLO have truly changed their position and really do recognize Israel's right to exist. Second, that doesn't mean Israel can simply retire from the West Bank and see peace and love reign for generations to come.

First, Arafat and the PLO have changed their positions—not for love of Israel, but for political reasons. The PLO is a political organization. It reflects the attitudes of its constituency. The organization was for decades beholden to the Palestinians in the diaspora—Palestinians who had left their homes in what is now Israel and for whom the destruction of Israel was the only way to return home. The PLO reflected the attitudes of that constituency.

Then, in December 1987, the uprising began on the West Bank and in Gaza. That gave the organization a new and very different constituency. The bulk of the residents of the occupied territories come from the occupied territories; their birthplaces are there—not in Israel proper. They were not pleased with the PLO's old rhetoric, which did them no good since their chief aim is to get out from under Israeli control. They don't care what happens in Haifa or Tel Aviv; they care what happens in Nablus and Hebron.

In the last year, the PLO recognized that the real action was on the West Bank and that the organization would lose its following among the Palestinians the world was watching if it failed to reflect the interests of this constituency. The Palestinians of the Diaspora, meanwhile, were progressively assimilating into the societies where they lived. That didn't mean they liked Israel anymore, but it meant that fewer and fewer really thought of returning to live in their old home towns. The goals of the Palestinians were changing significantly. And the PLO leadership finally caught up with their constituency and changed last year.

Does that mean Israel should just sign on the dotted line and accept a Palestinian state? Certainly not. Intentions can change. The PLO might shift back to its old attitudes—for example, if the Palestinians of the refugee camps in Lebanon once again become its chief constituency. Furthermore, there is certainly a violent minority of Palestinians who do not accept the new PLO posture and never will agree to a peace agreement that recognizes Israel. They will always pose a serious threat for the State of Israel—not to mention for any Palestinian entity. Any agreement, therefore, has to provide real security guarantees for Israel. It isn't what Arafat says in speeches that matters; it's what a treaty establishes on the ground.

THE PEACE PROCESS

Is the peace process going anywhere, especially considering the conflicting views of the two largest political parties in Israel? The Labor Party accepts that peace can and ought to be achieved by exchanging land for peace. But the Likud party—the largest party in the Knesset—rejects that premise. Some Likudniks reject the premise on ideological grounds—the West Bank is part of Eretz Israel and can never be handed over to others. But in my conversations I detected many Likud political leaders rejecting land-for-peace on political grounds—that is, because a majority of Likud voters are ideological.

Many Likud leaders—I cannot fathom what proportion—quietly accept the logic of Labor: democratic Israel cannot permanently keep the rapidly reproducing Arab population of the West Bank and Gaza disenfranchised and within Israel. The demographic bomb is ticking. Likud, while officially rejecting the conclusions Labor draws from this, does not dispute the reality described by Labor. The message conveyed by these Likudniks was simple: It will take time for Likud voters to shift from ide-

ology to pragmatism—to accept that Israel cannot absorb the West Bank and Gaza because the newly enfranchised citizens would soon be able to eliminate the Jewish state through the ballot box.

So, the good news is that many Likud leaders accept the premise that peace means giving up much of the occupied territories. The bad news is that they won't be willing to say that publicly for a long time to come.

I expect Prime Minister Shamir to pursue a policy of autonomy for the West Bank and Gaza. The Arabs would run the sewers, highways, and schools on their own, but the police powers would be totally under Israeli control. Shamir expects this autonomy plan to provide some breathing space in which to figure out what to do next.

I'm not convinced that this is the best approach either for Israel or the Likud party. Labor's logic seems more compelling. As more Israelis focus on the rapidly growing Arab population, Israeli voters might well shift to the Labor party in small increments, leaving Likud with an ideological minority.

Politicians traditionally follow their constituencies. The PLO is doing that. It doesn't require great imagination. But statesmen lead their constituencies. Statesmen offer a way out of a quagmire by providing a vision, a solution, and leadership. Ten years ago, Prime Minister Begin and President Sadat led their constituencies. In Prime Minister Shamir, I see a very good politician. Only time will tell whether he will be a statesman.

SYRIA'S ASSAD

Speaking of politicians, Syrian President Hafez al-Assad is another skilled practitioner. Assad may be the single most savvy political tactician in the Arab world. A statesman he is not. In 1981, he was threatened with a challenge from Islamic fundamentalists in the third largest city in Syria. He dealt with the problem by placing artillery above the city and shelling it. Perhaps 25,000 citizens died. Assad no longer faces a challenge from Islamic fundamentalists.

Regrettably, we cannot ignore Assad when we talk about the peace process. Mubarak gets on American TV all the time, but he's already signed a peace agreement with Israel. King Hussein gets lots of media attention, but he runs a small country and lacks the power to influence events powerfully. Assad tends to get ignored. That's a mistake. Assad's role is not in the good he can do for peace, but the harm. As he proved in 1981, he has no qualms about making rubble out of others.

The Syrians minced no words in my discussions with them. They want the Golan Heights back. They are fully prepared to sabotage any peace agreement that ignores their interests. When I expressed irritation over the Palestinian terrorist groups they host, they made clear that they keep them as insurance against the fear—and expectation—that Arafat will sell them down the river in any talks with Israel. Prime Minister Shamir may swear that he'll never talk to the PLO, but the Syrians are certain the Israelis eventually will deal with Arafat—and they're not happy about the prospect.

In the United States, we tend to ignore Assad and the Syrians. We do so to our peril. Making peace with the Palestinians may be child's play compared to sealing a peace with Assad.

ISRAELI POLITICS

Last November's Knesset elections produced another virtual standoff between the right and left, while the ultraorthodox parties emerged in between to bedevil the political system with their unorthodox agenda. While both the Labor and Likud parties were asking, "How do we achieve peace?" the ultraorthodox parties brushed the peace issue aside to ask, "Who is a Jew?"

These two realities—the standoff between the two big parties and the power exerted by relative fringe groups—are often cited by Israelis appalled by their political system. I do not share their fears and worries. I remain impressed by the vibrancy of Israeli democracy. It is one of Israel's major attractions and a key reason why it has drawn such overwhelming support from the American people.

Israel is a far more open society than any of the Arab countries. It is also more open than many European societies. Despite the immense security challenge Israel faces, it has not compromised on democratic values.

The public political debate is fluid and well-fueled. Political leaders are readily accessible to the public and make themselves available for unending interviews on Israeli radio and television. Political figures of right, left and center are thoughtful, intelligent and adept at communicating often complicated concepts—not just regurgitating slogans and pat phrases.

These are some of the strengths of the Israeli political system. And they are immense strengths. The weakness is shown after every election when figure groups win seats in the Knesset because the election law permits any party with 1 percent of the vote to claim a seat. Israeli politicians meeting visiting politicians from abroad always bemoan the fragmentation this causes. But I think this weakness is minor next to the numerous strengths of Israeli democracy. It doesn't just work. It works very, very well indeed.

A new election law will be enacted before the next Knesset elections. Most likely, it will raise the threshold for entry to the Knesset from 1 to 3 percent or 5 percent. Most everyone says that will solve the fragmentation problem. I doubt that. In the elections last November, Labor and Likud each got about one-third of the vote. The four fringe parties of the right got about 10 percent, the six fringe parties of the left got 13 percent, and the three ultraorthodox parties got 11 percent of the vote. A reform that lifts the threshold to 5 percent would force these smaller parties to coalesce. But that wouldn't break the impasse. In fact, I suspect that if the Knesset had only three or four parties other than Labor and Likud, those two major parties would find it much more painful than now when they are dealing with 13 minuscule parties.

OUR STRATEGIC RELATIONSHIP

Several years ago, the United States and Israel started down a new road, one intended to draw the two countries closer together in a practical, working strategic relationship. Strategic means a network of political-military ties. This is a development that hasn't gotten the attention it deserves in the American media. Too few people are aware of just how the ties that bind Israel and the United States together are proliferating.

Our societies have long been linked by bonds of friendship, shared values and mutual respect. On the official level, however, the main ties were monetary aid provided by the United States to Israel and weapons purchases made by Israel from the United States. The official relationship really didn't reflect the breadth and depth of the unofficial ties.

The strategic relationship has been evolving over the years. It involves some simple and obvious ties, such as the visits to Israeli ports by United States Navy ships so that sailors can enjoy leave time in a fascinating country. It involves some practical military links, such as joint training exercises by Israeli and American military units. And it involves the undramatic but very important aspect of mutual planning—military officers and civilians from the two nations sitting down on a regular basis to analyze problems together and come up with a joint solution. This gets very little attention—in large measure because planning for future contingencies is necessarily highly classified—but it is a very important aspect of the evolving relationship.

What's more, Israel supports the United States like no other country in the world. Unlike many allies, you don't hear Israel complaining of our visiting ships carrying nuclear weapons. Our sailors visiting there don't get shot at by passing motorists. The Israeli Government isn't demanding a lot of military support from us while spending a fraction of what we put into defense. The Israeli Government has not just been supportive of American policy and helpful to American interests, it has been extremely supportive and extremely helpful—perhaps more so than any other nation.

Two years ago, I sponsored legislation, subsequently enacted, under which Israel is now officially recognized as a "major non-NATO ally." Yes, contrary to common understanding, Israel is an American ally, in name as well as in practice. I'm proud of my role in cementing that. During my visit to Israel, I had a chance to see how the two-way relationship has been developing—not just developing, but flourishing. It was impressive. Most significantly, I see nothing on the horizon to inhibit the relationship from growing even more extensively.

A decade ago, I often noted a reluctance on the part of American military officers and diplomats to get closer to Israel. There was an attitude that Israel had nothing to offer. But the officers and diplomats who have been part of the developing strategic relationship come back with a different attitude. The more American officials deal with Israel at this working level, the more there are who are convinced that our relationship is a two-way street. I want to see more American officials involved because each added increment of involvement is an added commitment to the ties that bind Israel and the United States closer.

SOCIAL SECURITY TRUST FUND RESERVES AND S&L CRISIS ARE TWO SEPARATE ISSUES

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Ms. OAKAR. Mr. Speaker, for the last 15 months, my colleague, Congressman BYRON DORGAN, and I have worked to gain support for a most important issue—the removal of the Social Security trust fund reserves from the Gramm-Rudman-Hollings deficit calculations. At the same time, I have also worked toward a responsible solution to the savings and loan crisis that would accurately show the American people the costs of the S&L solution by placing it on budget.

In this light, I believe that it is important for all Members of Congress to understand that the two topics, while seeming to be intertwined, are, in fact, separate, critical issues that need to be addressed immediately and honestly, but on their own merits. By failing to act now and act responsibly, we will be breaking two sacred promises to the American people: To provide them Social Security during their golden years and to protect their current and future savings from profiteers and pirates.

The problem of including the Social Security trust fund reserves in the deficit calculations is a rapidly growing problem that threatens to delay the day of reckoning and places the entire trust fund in jeopardy. By continuing to use the growing reserves as a means of financing general government operations, we are setting the Nation up for an enormous and irreconcilable burden in the next few years.

The Gramm-Rudman-Hollings budget plan calls for changing the deficit calculation to exclude the trust fund reserves beginning in 1993. At that time, those reserves will total almost $100 billion. When these funds, which will be used until then to finance general government operations, are removed, the deficit will instantly swell to unprecedented levels. And, I dare say, the resulting political pandemonium will exceed anything we have experienced in the last 10 years.

There is, however, an easier, more responsible solution to avoid this coming problem. If we act today to remove the trust fund reserves from the Gramm-Rudman-Hollings deficit calculations, we will responsibly avoid a larger, more intractable problem in just a few, short years.

Tied to this discussion in the decision by the Ways and Means Committee to place the cost of the savings and loan solution on budget, following the lead of my Committee on Banking, Finance and Urban Affairs. I applaud the members of the Ways and Means Committee and their able Chairman, DAN ROSTENKOWSKI, for acting in a courageous and forthright manner, despite the possibility their decision could swell the deficit by $50 billion over 3 years and invite a Presidential veto.

My point here, Mr. Speaker, is that to offset the possibility of increasing the deficit, efforts may be made to keep the social security trust fund reserves within the Gramm-Rudman-Hollings deficit calculation. That would make the bitter pill of S&L reform more palatable, but at the equally bitter prospect of mortgaging the financial future of millions of American citizens who will be expecting their rightfully earned Social Security benefits.

As I said at the beginning of my remarks, Mr. Speaker, these two issues may seem to be related, but they are entirely separate and it would be a mistake of epic proportion for Congress to confuse them. We must be vigilant to ensure that does not happen.

TRIBUTE TO PATRICIA A. BARNES

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. FAUNTROY. Mr. Speaker, it is indeed an honor for me to salute today one of the most outstanding musical talents and most generous spirits ever to bloom from childhood roots here in the Nation's Capital, an amazing young woman who has dedicated her life to the Lord and her energies to serving the needs of His children throughout the world: Ms. Patricia Ann Barnes.

A native Washingtonian, Patricia was gifted as a young girl with a beautiful voice and began singing publicly at age 13. Through private study, as well as through her training at Montgomery Junior College and Howard University, Patricia developed her natural talent into the exquisite lyric soprano instrument that today delights audiences throughout the world. Now renowned internationally, she made her debut as a sacred music concert artist at the John F. Kennedy Center for the Performing Arts here in Washington, DC, on Sunday, October 23, 1983. Since then, Ms. Barnes' ministry of music has led her throughout the United States, the Caribbean, Europe, Africa, and Australia, bringing spiritual renewal and hopefulness to all who would hear her message.

Patricia has ministered in song to Members of Congress and to the President of the United States; she has appeared with Bishop Desmond Tutu and with the Rev. Billy Graham; she has sung before diplomats and military officers in some of the grandest settings on the globe. But the aspect of Patricia Barnes' music ministry that impresses me most, Mr. Speaker, is her selfless commitment to serving "the least of these" among us: the legions of homeless individuals and of prison inmates so often consumed by personal quagmires of hopelessness and neglect.

Over the past few years, Ms. Barnes has held dozens of benefit concerts through which she has focused the hearts and minds and grateful generosity of her audiences on the plight of the millions of men and women, and children who cannot enjoy, as we do, the comforts we too frequently take for granted: nutritious food to eat, clean clothes to wear, a home to feel safe in, a warm bed to rest in. Through the unselfish contributions of her musical genius to helping other people, Patricia Barnes has raised thousands upon thousands of dollars—not to enhance her own material riches, but to provide for our less fortunate sisters and brothers greater opportunities to sustain themselves and to take those first tentative steps toward self-sufficiency.

Even more important than her fund-raising abilities, though, is the tremendous power that Patricia Barnes exudes to raise our spirits: her musical genuis, empowered by her own unyielding faith that through God "all things are possible," uplifts the personal determination of each one of us to invest that much more of our own energies in furthering the causes of justice and goodness. And when Patricia takes her ministry into the prisons, her musical message touches countless tormented lives, bringing them hope and inspiration through the beauty and depth of her own spiritual liberation.

I have been personally blessed to enjoy the music of Patricia Barnes many times; but each time I hear her, I am startled by her intensity and brilliance, not only as a singer but also as a messenger of the Gospel. At my own 30th anniversary celebration as pastor of New Bethel Baptist Church here in the Nation's Capital, I was grateful that Patricia Barnes could be there with us to lift her voice in thanksgiving and praise to the Lord—and I can personally attest to the joy and the spiritual excitement she generates through her ministry of music.

Both as a musician and as a servant of humanity, Ms. Patricia A. Barnes is indeed a national treasure. I am delighted, Mr. Speaker, to commend her today before the Congress of the United States of America and to wish this talented young woman a lifetime of continued good health and success in her outstanding international music ministry.

TANKER TRANSPORT TRAINING SYSTEM

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. DENNY SMITH. Mr. Speaker, I have followed with interest for some time the proposed changes in the U.S. Air Force's pilot training program. The Air Force has settled in part on the Tanker-Transport Training System [TTTS], which will procure and use up to 211 commercial business jets for the Air Force's Specialized Undergraduate Pilot Training [SUPT] Program.

The TTTS aircraft will be a missionized off-the-shelf business jet, and I understand several American aircraft manufacturers plan to submit bids on the contract to supply these aircraft to the Air Force. This is great news, because in the past I have watched with dismay as U.S. Armed Forces aircraft programs have used more and more foreign designs and joint-manufacturing arrangements to produce aircraft that we could—and should—produce totally at home. These have been opportunities lost, and we should not allow it to happen again in the TTTS program. An American firm should provide this aircraft.

This program is particularly important to the general aviation manufacturing industry in this

country, which has been in a down-turn for more than a few years because of exceptionally high product liability costs.

The TTTS procurement essentially kicks-off the Specialized Undergraduate Pilot Training [SUPT] Program and paves the way for new generations of U.S. Air Force pilots to receive specialized training in aircraft whose flight characteristics and performance closely match those that they will later fly in defense of this country.

We have the opportunity under this procurement to not only enhance the training method of Air Force student pilots, but also restore a vital part of the country's aircraft manufacturing base. I hope that an American manufactured business jet will be selected. I will continue to follow the TTTS program with interest and I encourage my colleagues to do the same.

CLOSED MILITARY FACILITIES SHOULD BE TRANSFERRED TO BUREAU OF PRISONS

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. DORGAN of North Dakota. Mr. Speaker, I am introducing today for myself and my colleagues a joint resolution which would urge the Secretary of Defense to transfer closed military facilities to the Federal Bureau of Prisons for use as prisons for drug offenders.

We cannot continue to allow our society to be threatened by the rapid rise in drug-related crime. The number of convictions of drug offenders is increasing so rapidly that there is an emergency in Federal prisons which are now filled beyond capacity.

We are currently facing a situation in this country where over two-thirds of Federal inmates were convicted of drug violations and in up to 70 percent of serious crimes committed, the offender was tested positive for drugs.

The Secretary of Defense should give the highest priority to transferring these military installations to the Federal Bureau of Prisons. We have to address the need for space to incarcerate drug offenders and the use of closed bases for this purpose would accomplish this goal. The transfer of closed military bases would help the overcrowding in prisons as well as reduce the funding need for building new prisons.

I urge every Member to help take serious action against drug offenders by cosponsoring this resolution.

IN RECOGNITION OF COL. JAMES W. LaBOUNTY, A LEADER OF MEN

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 18, 1989

Mr. SHUSTER. Mr. Speaker, on this morning of May 18, 1989; Col. James W. LaBounty has accepted the command of Sharpe Army Depot in Lathrop, CA. I am assured that, in Jim, the U.S. Army has selected the right man for what I know will be a difficult assignment.

Since receiving his commission in 1967, Col. Jim LaBounty has held assignments that are indicative of a great and growing value to the U.S. Army. From the early days in Pleiku, Vietnam to his recent assignment as Chief of the Legislative Liaison Office of Army Material Command, Colonel LaBounty has been a man directed to faithfully serving the Army in both staff and command positions.

Having known Jim from his years dating back to his service with Under Secretary Ambrose, I have always found him to be a man of impeccable honor, dedication, and loyalty. In our many dealings, I have steadfastly remained confident that Col. Jim LaBounty is a man who will endure eternally true to himself; and always, always toil for the good of the Army and our Nation.

Having served in the Army and recognizing the desired qualities of leadership, I know that Col. Jim LaBounty is an officer who will long continue to earn the trust and respect of both his superiors and subordinates. Thus, as Jim leaves his haunts of Eisenhower Avenue, the Pentagon and Capitol Hill; I take this brief time to tip my hat to a gracious gentleman, good soldier, and leader of men.
